Dr. Hammarskjöld's report emphasized that UNEF had proved to be "effective" during its ten-months' service in the Middle East and had "earned acceptance as a significant pioneering effort in the evolution of methods of peace-making." Since its deployment in the Gaza Strip and the Sinai desert there had been "a steady reduction in both the number and severity of incidents"; for example, there had been no crossings of the armistice demarcation line since the end of July.

The report gave the following details of the numerical strength of each national contingent of UNEF as at Sept. 15, 1957:

Contingents	Officers	Other ranks	Total
Brazil	44	501	545
Canada	113	1,059	1,172*
Colombia	31	491	522
Denmark	25	399	424
Finland	15	240	255
India	27	930	957
Indonesia	37	545	582†
Norway	71	427	498
Sweden	27	322	349
Yugoslavia	55	618	673
Total	445	5,532	5,977

*Including Royal Canadian Air Force personnel stationed at Naples and El Arish (Abu Suweir prior to Sept. 5).

†The Indonesian contingent withdrew in September (see 15680 A.)

After stressing the "grave risks" inherent in the "inadequate and insecure" basis on which UNEF was financed, Dr. Hammarskjöld pointed out that member-States had not contributed sufficient funds for its continued upkeep and operation. He recalled that when UNEF was set up in the autumn of 1956, the General Assembly had voted an initial sum of $10,000,000 to cover its expenses, and member-countries had been asked to contribute on the same scale as their general assessments to the U.N. Budget.

To the date of his report, a total of $6,330,000 had been raised—$5,744,000 on the assessment basis, and the remaining $586,000 on a voluntary basis. Thirty-two countries had contributed to the "assessment" sum and six to the "voluntary" sum—the United States, Great Britain, the Dominican Republic, Greece, New Zealand, and Pakistan. A further $3,123,000 had been promised in voluntary contributions but had not yet been received in cash, $2,700,000 of this sum had been pledged by the U.S. Government on condition that contributions were also forthcoming from other countries. As a result of the shortfall in contributions, UNEF was faced with a serious deficit which the U.N. Organization had had to cover by dipping into its working capital—to the extent of $3,775,000—and by borrowing to a limited extent from other funds under the control of the Organization.

In conclusion, Dr. Hammarskjold asked the Assembly to authorize expenditure of $24,000,000 to cover the 14-month period ending Dec. 31, 1957 (i.e. the 14 months during which UNEF had been in existence), plus an additional $6,500,000 if the Assembly decided that Governments contributing troops to UNEF should be reimbursed for the extra expenses incurred. In addition, the Secretary-General requested authority to spend up to $20,000,000 for UNEF during 1958 (plus a corresponding additional amount for extra costs if the Assembly so decided), on the understanding that UNEF expenses would not normally exceed $2,000,000 in any single month.

A 20-nation resolution was presented on Nov. 18, 1957, expressing appreciation of UNEF's role in maintaining peace in the Middle East; thanking those countries which had contributed troops to the Force; and approving the Secretary-General's report and the recommendations contained therein. Specifically, it authorized Dr. Hammarskjold to expend, in addition to the $10,000,000 already authorized, a maximum of another $13,500,000 for the period ending Dec. 31, 1957; and, as necessary, beyond that date up to a maximum of $25,000,000 for the continued operation of the Force in 1958. It was stated that these expenses should be borne by U.N. members in accordance with the scales of assessment for their contributions to the U.N. Budget, "and such other resources as may have become available" (i.e. by voluntary contributions).

The resolution was sponsored jointly by the ten countries which were contributing or had contributed troops to UNEF [see table above], together with Ceylon, Costa Rica, the Irish Republic, Italy, Japan, Liberia, Pakistan, Persia, Siam and Uruguay.

The resolution was introduced in the General Assembly on Nov. 22 by Dr. Sidney Smith (Canadian Minister for External Affairs) and approved by the above-mentioned majority. Of the 11 opposing votes, nine were cast by the Communist countries (all except Yugoslavia, which was a co-sponsor of the resolution) and two by Latin American countries (Chile and Ecuador). The 19 abstentions were all Afro-Asian and Latin American countries, while South Africa was absent.

The Soviet delegate (M. Sobolev) reiterated that the U.S.S.R. would not contribute to the expenses of UNEF, which, he maintained, should be borne solely by Britain, France and Israel as the countries which had "launched aggression" against Egypt. The Egyptian representative, M. Omar Loutfi, expressed his country's gratitude for the creation of UNEF, emphasized that Egypt had given full co-operation to the Force, and criticized Israel for refusing to allow UNEF to operate on her side of the armistice line. The Chilean and Ecuadorean delegates agreed on the necessity for UNEF, explaining their vote against the resolution on the ground that the assessments would place an additional burden on their countries' finances.

Dr. Hammarskjold had informed the Assembly on Nov. 20 that the United States had offered a further $12,000,000 for UNEF during 1958, and that Great Britain had offered $1,000,000 (£357,000) as "special assistance" for the same purpose. The Australian delegate (Dr. Walker) announced during the debate that his Government would also make a special contribution of $50,000 for UNEF expenses. Other contributions were promised by Mexico ($10,000), Austria, Japan, the Irish Republic, Burma, and Liberia.

Present Deployment of UNEF. - Withdrawal of Finnish Contingent.

The U.N. Information Centre in London gave the following description in August last of the deployment of UNEF along the armistice demarcation line in the Gaza Strip and the Sinai desert.

In the Gaza Strip, UNEF forces were deployed from north to south as follows: (*a*) the Danish-Norwegian battalion held positions from the coast inland to a point east of Gaza, (*b*) from this point the Brazilian battalion held the line southwards to Wadi Ghazza; (*c*) the Indian battalion held the sector from Wadi Ghazza to a point east of Khan Yunis; (*d*) the Colombian battalion and the Finnish company (less two platoons) held positions along the south-western part of the Gaza Strip near Rafah. All these units were manning outposts and observation posts along the demarcation line, and carrying out patrols by day and night. Two Finnish platoons were engaged on guard duties at Rafah, where they protected supply depots.

In the town of Gaza were the headquarters of Major-General Burns (the UNEF Commander), the Norwegian medical company, and the Swedish battalion, less one rifle company deployed in the Sharm-el-Sheikh area at the entrance to the Gulf of Akaba. In the Sinai desert the Yugoslav reconnaissance battalion was patrolling the demarcation line from a point north of El Quseima southwards to the Gulf of Akaba, while the north-western sector of the line from Rafah to El Quseima was patrolled by the 56th Canadian Reconnaissance Squadron. The UNEF air station was located at El Arish, where the 115th R.C.A.F. Communication Flight was based; another Canadian flight (the 114th) was stationed at Capodichino, near Naples. A few UNEF elements were also stationed near Beirut (Lebanon), the leave centre of the U.N. Emergency Force.

The United Nations announced on Nov. 18, 1957, that Finland had decided to withdraw her contingent (250 men) from service with UNEF. As the Indonesian contingent had also been withdrawn, the U.N. Emergency Force is now recruited from eight countries—Brazil, Canada, Colombia, Denmark, India, Norway, Sweden, and Yugoslavia.

It was announced in Ottawa on Dec. 17 that Major-General Burns had been promoted to the rank of lieutenant-general in recognition of his "outstanding work and leadership" as Commander of the U.N. Emergency Force.

Hungary. - Prince Wan's Report to General Assembly.

At the special session on Hungary from Sept. 10-14, 1957 [see 15777 A], Prince Wan Waithayakon—Foreign Minister of Siam, and president of the 11th General Assembly—had been asked to take "such steps as he deems appropriate" to achieve the objectives of the U.N. resolutions on Hungary. In a report to the 12th Assembly session, presented on Dec. 10, Prince Wan pointed out that he had been refused admission to Hungary [see 15846 F] and had so far been unable to negotiate with the Soviet and Hungarian Governments.

Prince Wan said that as a "first step" he had tried to obtain assurances from the Soviet and Hungarian Foreign Ministers (respectively M. Gromyko and M. Horvath) with regard to (1) humanitarian treatment in Hungary; (2) the return of deportees from the U.S.S.R.; (3) withdrawal of Soviet troops from Hungary; and (4) free elections in Hungary—the objectives set out in the U.N. resolutions on Hungary. He had offered to pursue negotiations on these matters in Moscow and Budapest, but in each case the response had been unfavourable. M. Gromyko had informed him that the matter "does not concern the Soviet Government" and had denied that there had been any deportations to the U.S.S.R., whilst M. Horvath had similarly refused to enter into discussions on the ground that U.N. "interference" in Hungarian internal affairs was "illegitimate." He (Prince Wan) had subsequently tried to obtain assurances from M. Horvath on such matters as more lenient treatment of political prisoners and an amnesty for political offenders, but the Hungarian Foreign Minister had replied that these questions solely concerned the Hungarian Government. Later, however, M. Horvath had agreed to supply information on a number of humanitarian matters if Prince Wan drew up his questions in the form of a written memorandum. Prince Wan had agreed to this and had offered to go to Budapest for discussions, but the Hungarian Government had refused to grant him a visa on the ground that the U.N. resolutions were "illegal" and that Hungary could not admit United Nations observers.

After expressing his regret that he had so far been unable to find an opportunity for negotiations, Prince Wan said that he "could not believe that the Hungarian and Soviet Governments will remain insensible to the voice of world opinion and the conscience of mankind, which continues to make an insistent and righteous appeal for the freedom of the Hungarian people." In conclusion, he expressed the hope that "as international tension relaxes, I may be given the opportunity to assist in establishing full international co-operation in promoting respect for human rights and fundamental freedoms in Hungary."

In a short debate, M. Sobolev (U.S.S.R.) and Dr. Endre Sik (Hungary) reiterated their contention that the General Assembly's discussion on Hungary constituted an "illegal interference" in Hungarian internal affairs. A number of Western delegates strongly criticized the Soviet and Hungarian Governments for their continued defiance of the General Assembly's resolutions, and Mr. Cabot Lodge announced that the United States might ask for a special session on Hungary during 1958 if circumstances should warrant it.

M. Sobolev expressed regret that Prince Wan should have allowed himself to be associated with the "notorious" U.N. Report on Hungary, and attacked what he described as the "slanderous propaganda campaign" being waged against that country. He reiterated the allegation that the Hungarian revolution had been "the work of reactionaries" supported by the "ruling circles" of the Western Powers.

Dr. Sik, who spoke in similar terms, explained that his Government, despite its high personal regard for Prince Wan, had refused him admission to Hungary "because he received and accepted his well-publicized mission from the General Assembly."

Mr. Cabot Lodge denounced the "callousness and indifference" with which the Soviet and Hungarian Governments had repulsed Prince Wan in his efforts to carry out the humanitarian functions entrusted to him by the United Nations. In the course of his speech Mr. Cabot Lodge said that reports had been received indicating that three leaders of the Hungarian revolt had been brought to trial by "the puppet Soviet regime in Hungary"—General Pal Maleter (Minister of Defence in the short-lived Nagy Government), General Istvan Kovacs, and M. Sandor Kopacsy, former Chief of Police in Budapest.

The U.N. Special Committee on Hungary (the five-nation group headed by Mr. Alsing, of Denmark) sent a letter to the Hungarian Government on Dec. 20 expressing concern at the reports (mentioned by Mr. Lodge) that General Maleter and others were being brought to trial, and asking that the "highest humanitarian standards" should be applied in the reported proceedings. After requesting "reliable information" on this matter, the Committee declared that "world opinion will continue to be disturbed until it is satisfied that the present authorities in Hungary are shaping their policy . . . in accordance with the General Assembly's resolution of Sept. 14, 1957, which called upon Hungary 'to desist from repressive measures against the Hungarian people.'"

The Hungarian delegate at the U.N. (Dr. Mod) refused to transmit the letter to Budapest and returned it to the Special Committee, with the observation that his Government did not recognize the Committee's *locus standi*. He denied Mr. Lodge's allegation that General Maleter and others were being brought to trial and accused Mr. Lodge of trying to "poison the atmosphere."

As at the 11th session, the General Assembly took no action on the credentials of the Hungarian delegation—i.e. it neither approved nor disapproved of them. A recommendation by the Credentials Committee to this effect was approved by the full Assembly by 77 votes to one (Hungary), with no abstentions.

Korea. - Ending of Korean Reconstruction Agency.

By 53 votes to nine, with 15 abstentions, the Political Committee adopted an 11-nation resolution urging that a Korean settlement should be based on "the fundamental principles for unification established at the Geneva conference in 1954 and endorsed by the United Nations." [These principles included free elections in both North and South Korea under U.N. auspices.] The resolution also commended the work of the U.N. Korean Reconstruction Agency (UNKRA) and asked that the Korean question should be placed on the agenda of the next Assembly session.

The debate in the Political Committee was marked by sharp exchanges between Representative Walter Judd (U.S.A.) and M. Sobolev (U.S.S.R.), each side accusing the other of violations of the Korean armistice agreement.

Representative Judd called on Communist China, the Soviet Union, and North Korea to demonstrate their professed desire for a Korean settlement by taking four positive measures: (1) withdrawal of Chinese troops from North Korea; (2) accounting for the fate of the 2,720 missing Servicemen (including 450 Americans) who fought under the U.N. Command; (3) returning to their homes the thousands of abducted South Korean civilians; and (4) acceptance of the U.N. resolutions for the peaceful reunification of Korea, including free elections in both parts of the country under U.N. auspices. Mr. Judd charged that modern Soviet-type weapons, including artillery and rockets, were being poured into North Korea in a "large-scale illegal military build-up" and in violation of the armistice agreement. He also criticized the fact that the North Korean regime had consistently refused to allow *bona fide* inspection, as provided for in the armistice agreement, and had not given any information to the Neutral Nations' Supervisory Commission as required by that agreement.

M. Sobolev made counter-allegations that the U.S.A. was violating the armistice by building up the forces of the "Syngman Rhee puppet regime" and sending large supplies of modern weapons to South Korea. He said that it was "perfectly obvious" that the re-establishment of Korea's national unity could only be achieved by "giving due consideration to the existence in the Korean peninsula of two States with different social and economic systems." After describing earlier U.N. resolutions on Korea as "unrealistic and harmful," M. Sobolev maintained that the "only rational approach to solving the problem of unifying Korea lies in upholding the truce and in transforming it into a lasting peace, and in political, economic and cultural *rapprochement* between the two parts of the country, which ultimately should bring about the unification of Korea."

The Political Committee adopted the 11-Power resolution on Nov. 18 by the above-mentioned majority; the nine dissenting votes were cast by the Soviet-bloc countries, and the 15 abstentions were Afghanistan, Burma, Cambodia, Ceylon, Egypt, Finland, Haiti, Indonesia, Morocco, Nepal, Saudi Arabia, Sudan, Syria, Yemen, and Yugoslavia. India did not participate in the vote, and four delegations were absent. In the

full Assembly the resolution was passed on Nov. 29 by 54 votes to nine, with 16 abstentions (Finland, Yugoslavia, and 14 Afro-Asian countries). During the debate Mr. Judd said that the Communist military build-up in North Korea included 700 aircraft (most of them jets of the latest types), 3,900 rocket launchers, heavy artillery, and T-34 tanks.

The resolution was sponsored jointly by Australia, Ethiopia, France, Great Britain, Greece, Luxemburg, New Zealand, the Philippines, Siam, Turkey, and the United States.

Prior to the debate, the head of the U.N. Korean Reconstruction Agency (Lieut-General John B. Coulter) had presented a report in which it was stated that UNKRA would be wound up during 1958. General Coulter said that the great majority of UNKRA projects would have been successfully completed by the end of 1957, and "only a very small number" would be carried forward to the spring of 1958.

UNKRA [which was established on Dec. 1, 1950] was described by General Coulter as "a most significant and highly successful chapter in U.N. history" and as an "unprecedented U.N. undertaking." In the seven years of its existence it had proved that collective action by the U.N. could "assist a country and its people who have been ravaged by aggression." Nevertheless, much still remained to be done in making good the devastation caused by the Korean War, and it was hoped that aid from the U.S.A. and world voluntary agencies would assist the "valiant efforts" being made by the South Korean Government and people.

General Coulter reported that a total of $1,914,900,000 had been provided for South Korea from July 1, 1950, to June 30, 1957, excluding direct military assistance. Of this sum, $617,400,000 had been provided through the U.N. (including $143,000,000 through UNKRA) and $474,400,000 in relief aid under the U.N. Emergency Relief Programme.

The Palestine Arab Refugees.

After considering the annual report of Mr. Henry R. Labouisse, Director of the U.N. Relief and Works Agency for Palestine Refugees (UNRWA), the Assembly adopted a five-Power resolution—sponsored by Great Britain, the Netherlands, New Zealand, the Philippines, and United States—calling for additional contributions by member-States as a matter of "urgent concern."

In his report, presented on Nov. 4, Mr. Labouisse emphasized—as in previous years—that UNRWA was in desperate need of funds if it was to continue to carry out its work for the 988,000 Palestine Arab refugees under its care in the Gaza Strip, Jordan, Lebanon and Syria. Estimated financial needs of UNRWA in 1958 would be $40,700,000 (£14,500,000), of which $25,700,000 would be for the relief programme and $15,000,000 for rehabilitation activities, including education. By Dec. 31, 1957, however, the Agency's working capital would barely suffice to cover expenditure for two months, and Mr. Labouisse therefore urged the Assembly to contribute $8,000,000 over and above the 1958 estimate so as to provide an adequate working capital.

Mr. Labouisse emphasized that UNRWA provided shelter in camps for about 630,000 of the refugees, and also maintained schools attended by about 170,000 refugee children. The Agency's commitments were "urgent and inescapable," since hundreds of thousands of human beings depended on it for the bulk of their daily food and for medical care and shelter. If UNRWA broke down for lack of funds, acute starvation and disease would become an immediate threat. Moreover, if UNRWA's education programme were curtailed it would mean that "huge crowds of refugee children would be condemned to frustration and idleness," with grave political and social consequences.

In a personal appeal to the Assembly on Nov. 18, Mr. Labouisse explained that voluntary contributions pledged by U.N. member-Governments for 1958 had fallen far short of the $25,700,000 budgeted for relief and the $15,000,000 estimated for rehabilitation. After expressing deep disappointment "that a humanitarian objective so eminently worth-while could only command the active support of little more than one-third of the members," he summarized the situation for 1958 as follows: (1) to meet the minimum relief budget of $25,700,000 would require "about $2,000,000 more than can be reasonably foreseen at present"; (2) for rehabilitation, another $2,000,000 was needed to meet only the first priority items—largely education and training; (3) to carry out the full rehabilitation programme, budgeted at $15,000,000, the Agency would need another $8,000,000 over and above present foreseeable contributions; (4) an additional $8,000,000 was needed to build up the working capital fund, which had been practically exhausted as stated in his report.

In conclusion, Mr. Labouisse said that failure by the Assembly to ensure the necessary funds for UNRWA would be "tantamount to a decision to bring whole sections of our work to an end."

Prior to Mr. Labouisse's report, the General Assembly had met on Oct. 6 as an *ad hoc* "pledging conference" to seek funds for refugees in need of U.N. aid. Twenty-one countries undertook to contribute a total of $25,000,000 (over £9,000,000) for the Palestine Arab refugees, of which $21,800,000 was pledged by the United States and $2,900,000 by Great Britain. [About 90 per cent of UNRWA's total funds have been contributed by the U.S.A. and Britain since the establishment of the Agency.] Six Arab countries—Jordan, Lebanon, Libya, Morocco, Sudan, and Saudi Arabia—undertook to give various sums, the largest being $95,000 from Saudi Arabia. Among other countries, Canada promised $500,000, Australia £A.50,000, and Yugoslavia $40,000. No offer was made by the U.S.S.R. or any other Soviet-bloc country.

The above-mentioned five-Power resolution was adopted by the Assembly on Dec. 12 by 52 votes to nil, with 19 abstentions and many delegations absent. After the vote, the President of the Assembly (Sir Leslie Munro) urgently appealed to all member-Governments to provide sufficient funds to enable UNRWA to carry out its work.

The Canadian Government subsequently announced that it would contribute $1,500,000 worth of Canadian flour to UNRWA—representing 20,000 tons of flour or 1,000,000 bushels of wheat—in 1958, over and above the cash contribution of $500,000 pledged for that year.

French Togoland.

By 50 votes to one (Ghana), with 29 abstentions, the Assembly approved a resolution—presented in the Trusteeship Committee by Canada, Colombia, Denmark, the Irish Republic and Liberia—calling for elections in the Trust Territory of Togoland in 1958 so that the inhabitants might have an opportunity of deciding on their future status.

The resolution asked (1) that the elections should be held under U.N. auspices; (2) that a U.N. High Commissioner should supervise the elections, assisted by observers; (3) that the elections should be held on a basis of universal suffrage; and (4) that, on the basis of Togolese opinion as revealed in these elections, the General Assembly should decide at its next session whether or not Togoland should remain a Trust Territory. The resolution was accepted by M. Jaquet (Minister for *France d'Outre-mer*), who took part in the debate.

In conformity with the decision taken at the 11th session [see page 15508, second column], a U.N. Commission visited Togoland during 1957 to examine the situation resulting from the application of the new French Statute, whereby the territory had become an autonomous republic within the French Union [see 15511 A].

In its report, submitted on Aug. 21, the Commission commended the Statute as a "very significant step" towards attaining the aims of the trusteeship system and as conferring "a large measure of internal self-government" on the Togolese. It pointed out, however, that the Togolese would need to be consulted in due course on the future status of the territory, and suggested that France should publicly state that the Statute did not in its present form denote the final relationship between France and Togoland. Certain criticisms were made as regards the existing situation—notably, that the presence of armed forces and *gendarmerie* under French control represented a substantial limitation on the autonomy enjoyed by the territory; and that the opposition parties did not enjoy the same political freedom of expression and assembly as the pro-Government parties, especially in northern Togoland.

M. Max Dorsinville (Haitian representative at the U.N.) was nominated by the General Assembly as High Commissioner to supervise the Togolese elections under U.N. auspices. He will be assisted by an international staff.

Atomic Radiation.

The General Assembly unanimously endorsed a resolution by the Political Committee on the effects of atomic radiation.

This resolution (1) asked the U.N. Scientific Committee on the Effects of Atomic Radiation (a 15-nation body set up two years earlier) to complete its report to the Assembly "at the earliest possible moment"; and (2) requested Dr. Hammarskjöld, in consultation with the Scientific Committee, to consider "the strengthening and widening of scientific activities" in this field taking into account the Political Committee's debate and the various proposals submitted during the discussion. The Secretary-General was asked to submit a report on this matter to the next Assembly session.

The resolution represented a compromise between two separate resolutions presented in the Political Committee: (*a*) a resolution by the Czechoslovak Foreign Minister (M. Vaclav David) calling for a U.N. scientific conference in 1959 to consider the effects of atomic radiation; and (*b*) a resolution submitted by nine of the 15 countries represented on the Scientific Committee (Argentina, Australia, Belgium, Brazil, France, Great Britain, Mexico, Sweden, and the United States) asking (i) that the Scientific Committee should complete its report as soon as possible; (ii) that the report should be made available to the second U.N. Conference on the Peaceful Uses of Atomic Energy, to be held at Geneva in September 1958; and (iii) for continued co-operation by U.N. member-countries in providing the Committee with information. A Japanese proposal was also put forward (but not embodied in a resolution) that the Scientific Committee should be converted into a permanent U.N. body reporting annually to the General Assembly.

After a three-day debate, the Indian delegation (notably Mr. Krishna Menon and Mr. Arthur Lall) succeeded in drafting a resolution acceptable both to Czechoslovakia and to the sponsors of the nine-Power resolution. The resolution went forward to the General Assembly and was approved without opposition, as stated. India, as the "major architect" of the resolution, presented it in the General Assembly with the co-sponsorship of 15 other countries—the sponsors of the nine-Power resolution plus Austria, Canada, Egypt, Japan, Poland, and Yugoslavia.

The Refugee Question.

Dr. Auguste Lindt, the U.N. High Commissioner for Refugees, presented his annual report to the General Assembly on Nov. 4, covering the period from May 1956 to May 1957.

The report stated that the Hungarian refugee problem had now been reduced "to manageable proportions" owing to the speed with which the problem had been tackled, and the fact that the burden had been shared by many nations. Of the 199,000 refugees who had fled from Hungary, nearly 165,000 had been accepted as immigrants in 40 European and overseas countries, leaving only 12 per cent of the refugees still in the country of their first asylum—just over 20,000 in Austria and 3,000 in Yugoslavia. In addition, 13,400 refugees had been repatriated to Hungary at their own request. Most of the expenses incurred by the Austrian Government would have been reimbursed by the end of 1957 as a result of financial contributions totalling over $20,000,000.

Dr. Lindt urged that the "principle of permanent solution applied so effectively to the Hungarian refugees" should also be applied to "the other refugees in Europe displaced by the upheavals of two World Wars" and to those who had fled from their countries of origin. Of the "earlier" (i.e. non-Hungarian) refugees, 106,000 were still living in France, Germany, Austria, Italy, Greece, and Turkey, of whom 39,000 were housed in camps. The High Commissioner's Office attached the highest priority to the closing of all these camps by 1960, and in this connexion Dr. Lindt appealed to the host countries to "integrate" those refugees for whom emigration would not be possible. To achieve this aim, $7,500,000 would be needed over and above governmental contributions and pledges made to date; moreover, it would be necessary for such countries as Australia, Canada and the United States to revise their immigration regulations to enable the maximum number of refugees to be settled overseas. As regards the 12,000 refugees of European origin still in China, 50 per cent had already been assured of resettlement visas: 1,500 of them were at present in transit in Hong Kong, and funds for their support were urgently needed.

After considering Dr. Lindt's report, the Social, Humanitarian and Cultural Committee adopted a number of resolutions which were approved by the General Assembly on Nov. 12 without opposition, though in many cases with a number of abstentions (mainly from the Communist countries). They included:

(1) A resolution extending the Office of the U.N. High Commissioner for Refugees for a further five years from Jan. 1, 1959.

(2) A resolution asking Dr. Lindt to intensify his efforts to secure permanent solutions for the refugees still living in camps in European countries, and also for those outside the camps.

(3) A recommendation that the existing U.N. Refugee Fund should be replaced by a new "Executive Committee of the High Commissioner's Programme," to be set up by the Economic and Social Council and consisting of 20-25 members chosen on the widest geographical basis from States "with a demonstrated interest in and devotion to the solution of the refugee problem." The new Committee would advise the High Commissioner in his work and issue directives for the termination of the U.N. Refugee Fund in 1958.

(4) A resolution appealing to all U.N. member-countries, the specialized agencies, and non-governmental organizations to give "all possible assistance" in alleviating distress among refugees in Hong Kong.

Suez Canal Surcharge.

By 54 votes to nil, with 19 abstentions (including the Soviet group and Israel), the General Assembly endorsed on Dec. 14 a recommendation by Dr. Hammarskjöld that the cost of clearing the Suez Canal—incurred by the U.N. earlier in the year—should be met by a voluntary surcharge of three per cent on Canal dues.

In his report, presented to the Assembly in November, the U.N. Secretary-General said that the total cost of clearing the Suez Canal was $8,376,042 (about £3,000,000). He recommended that all shipping and trade using the Canal should be asked to pay voluntarily a surcharge of three per cent on Canal dues, which would be paid into a special U.N. account. The sums thus received would be used to reimburse the 11 countries which had advanced contributions totalling $11,227,453 to enable the U.N. to meet the costs of clearing the Canal. Of the 11 countries concerned, the United States had advanced $5,000,000 for Canal clearance; Australia, Canada, Norway, and the German Federal Republic had each advanced about $1,000,000; and smaller amounts had been advanced by Italy, the Netherlands, Denmark, Sweden, Ceylon, and Liberia. The Secretary-General estimated that the three per cent surcharge would cover the costs of clearance within three years on the present basis of Canal traffic.

Reviewing the salvage operations, Dr. Hammarskjöld pointed out that they had begun late in December 1956 and had been completed on April 10, 1957, several weeks ahead of the original target date. In the 3½ months the U.N. Salvage Command under General Wheeler had cleared the Canal and its approaches of all sunken vessels and other obstacles. The salvage fleet—32 vessels in all—consisted of Danish, Dutch, German, Belgian, Swedish, Italian, and Yugoslav ships manned by a total of 479 personnel, including 45 divers. British and French units had also participated in the salvage operations.

The Soviet Union refused to contribute to the surcharge on the ground that all the costs should be met by Britain, France and Israel, as originators of the military action against Egypt. A similar attitude was taken by the other Soviet-bloc countries. Israel abstained because her shipping was still prevented by Egypt from using the Suez Canal.

South-West Africa.

After a fortnight's debate the Trusteeship Committee adopted on Oct. 11 six resolutions on the status of South-West Africa—a question which had engaged the attention of the General Assembly for the last 10 years, as the South African Government has consistently declined to recognize the right of the United Nations to have any say in the affairs of the territory.

South Africa's point of view is based on the claim that the mandate over S.W. Africa given to her by the League of Nations in 1920 had expired, and that the U.N. had no right to exercise any form of trusteeship over the territory, which had meanwhile been incorporated into the Union as its fifth province.

The Committee on South-West Africa set up at the 11th session had previously presented its report in August.

The Committee expressed the opinion that "the administration of South-West Africa, in which political, social, and educational rights are governed by the practice of *apartheid*, operates to the detriment of the population, and particularly the 'Native' majority, and is contrary to the spirit and purpose of the Mandates System, the U.N. Charter, and the Universal Declaration of Human Rights." It repeated its previous recommendations that South Africa, as the mandatory Power, should take steps "to safeguard the special status of the territory and the real interests of its inhabitants"; should "set up fully representative institutions for the territory, and as a first step transform the territorial legislature into a truly representative body by extending representation to all inhabitants"; and should take steps as "a matter of urgency" to "repeal all racially discriminatory legislation and practices and revise the existing policies and practices of 'Native' administration to ensure the fulfilment of its obligations and responsibilities under the mandate."

The Committee, which was under the chairmanship of Mr. Thanat Khoman (Siam), also criticized the Union Government's refusal to issue travel documents for petitioners from South-West Africa who wished to present their complaints to the U.N. Trusteeship Committee.

The six resolutions adopted by the Trusteeship Committee were as follows:

(1) A resolution, presented by Mr. Khoman, recommending the setting-up of a Good Offices Committee to discuss with South Africa "a basis for an agreement which would continue to accord to the territory an international status." The Good Offices Committee would consist of Great Britain, the U.S.A., and a third member to be appointed by the President of the General Assembly (Sir Leslie Munro). It would be asked to report to the next session of the General Assembly in 1958.

The resolution was adopted by 52 votes to 10 (the Soviet group and Burma), with 17 abstentions (Cambodia, Ceylon, Egypt, Ethiopia, Greece, Guatemala, India, Indonesia, Iraq, Jordan, Morocco, Saudi Arabia, Sudan, Syria, Uruguay, Yemen, and Yugoslavia.

(2) A Liberian resolution asking the Assembly to call on South Africa [for the 11th year in succession] to place South-West Africa under U.N. trusteeship. Adopted by 55 votes to 3, with 18 abstentions.

(3) A resolution asking the Assembly to express its appreciation of the work of the Committee on South-West Africa, and to approve the Committee's report on conditions in the territory. Approved by 60 votes to nil, with 16 abstentions.

(4) A resolution noting "with deep concern" that South Africa contended that the League of Nations mandate had lapsed and that she therefore had "no obligations under which the United Nations has cognizance." It also expressed concern at the failure of South Africa to render annual reports on S.W. Africa to the U.N.; asked that the Committee on South-West Africa should consider what aspects of the administration of the territory might usefully be referred to the International Court of Justice for an advisory opinion; and recommended that a study already made by the Committee as to what legal action could be taken to ensure that South Africa fulfilled her obligations under the mandate should be considered further at the 13th session of the Assembly. The resolution was adopted by 55 votes to 4, with 18 abstentions.

(5) and (6) Two resolutions dealing with petitions sent to the U.N. by inhabitants of South-West Africa. One of the resolutions asked South Africa to investigate the matters raised by the peti-

tioners, and the other drew attention to the observations of the Committee on South-West Africa on conditions in the territory. Before adopting these resolutions the Trusteeship Committee heard statements by the Rev. Michael Scott and an African petitioner.

The six resolutions were adopted by the full Assembly on Oct. 25, 1957—the resolution on the Good Offices Committee by 50 votes to 10 (the Communist bloc), with 20 abstentions; the second by 60 votes to 3, with 17 abstentions; the third by 65 votes to nil, with 15 abstentions; the fourth by 55 votes to 3, with 17 abstentions; and the fifth and sixth without opposition. South Africa took no part in the debates or the voting.

South African Racial Policies.

The Steering Committee decided to place on the Assembly's agenda (*a*) the racial policies of the South African Government, and (*b*) the treatment of people of Indian and Pakistani origin in the Union.

A request for the discussion of "the question of the race conflict in South Africa resulting from the policies of *apartheid* of the Government of the Union" had been made by Bolivia, Costa Rica, Egypt, India, Indonesia, Liberia, Sudan, and Uruguay, but was strongly opposed by Mr. Botha, South Africa's representative at the U.N.

The Political Committee adopted a resolution on Nov. 1 (*a*) recommending that the General Assembly should once more appeal to South Africa to revise its *apartheid* policy "in the light of the principles and purposes of the U.N. Charter and of world opinion," and (*b*) "deploring" the fact that South Africa had not responded to similar previous appeals. The resolution was sponsored by 22 Afro-Asian countries, five Latin American countries, Greece, and the Irish Republic.

During the two weeks' debate Dr. Connor O'Brien (Irish Republic) urged the Committee to "condemn" the Union Government's racial policies, and declared that his country could not regard the matter as one falling within South Africa's domestic jurisdiction. He said that South Africa was the only country in the world which did not at least endorse the principle that law must not distinguish between human beings on grounds of race. Mr. Statos (Greece) also asked that the Assembly "should spare no effort to show South Africa that she is wrong."

Mr. Longden (U.K.) announced that he would vote against the resolution, irrespective of "any opinion we may hold upon the merits or demerits of the Union's policy of racial segregation," because the matter was essentially within South Africa's domestic jurisdiction under Article 2 of the U.N. Charter.

The voting on the resolution was 59 in favour and 5 against, with 10 abstentions. The opposing votes were cast by Australia, Belgium, France, Portugal, and the United Kingdom, the abstaining countries being Argentina, Canada, the Dominican Republic, Finland, Italy, the Netherlands, New Zealand, Peru, Spain, and the United States. Eight countries were absent—El Salvador, Honduras, Lebanon, Luxemburg, Nicaragua, Paraguay, Turkey, and South Africa. In the full Assembly the resolution was adopted on Nov. 26 by 59 votes to six, with 14 abstentions.

The second resolution, on the treatment of people of Indian and Pakistani origin in the Union, expressed "regret" that South Africa had not agreed to enter into negotiations with India and Pakistan on this question, as repeatedly urged in previous Assembly resolutions. It once again appealed to South Africa to begin such talks in order to settle the question "in accordance with the purposes and principles of the U.N. Charter and the Universal Declaration of Human Rights." India, Pakistan and South Africa were invited to report back to the Assembly jointly or separately.

The Special Political Committee adopted the resolution (sponsored by Mexico, Persia, the Philippines, and Yugoslavia) on Nov. 12, 1957, by 63 votes to nil, with 14 abstentions (Argentina, Australia, Belgium, Canada, China, the Dominican Republic, Finland, France, Italy, the Netherlands, New Zealand, Portugal, Spain, and the U.K.). Five countries were absent, including South Africa. The full Assembly adopted the resolution on Nov. 26 by 64 votes to nil, with 16 abstentions.

Special Fund for Under-Developed Countries.

The Assembly unanimously approved on Dec. 14 a resolution for the creation of a Special Fund to provide "systematic and sustained assistance in fields essential to the technical, economic, and social development of the less-developed countries." The Fund will be set up as an expansion of the existing U.N. Technical Assistance Programme.

The resolution was presented in the Economic and Finance Committee by 14 countries (including the U.S.A., France, Great Britain, Canada, and the Netherlands) and was given unanimous approval on Dec. 12. After noting that the Technical Assistance Programme [whose annual expenditure is at present $35,000,000] was unable at the present time to meet "certain urgent needs" of the under-developed countries, the resolution pointed out that if these needs could be met it would not only advance the economic and social development of those countries but also "facilitate new capital investment of all types—private and public, national and international—by creating conditions which will make such investments either feasible or more effective."

As regards the operation of the proposed Fund, the resolution stated that its resources "prospectively available at this time" were "not likely to exceed $100,000,000." In view of this, the Fund would "more immediately be used" to enlarge the scope of U.N. Technical Assistance and would include "special projects in certain fields"—notably surveys of water, mineral, and potential power resources; the establishment (including staffing and equipment) of training institutes in public administration, statistics, and technology; and the setting-up of agricultural research centres. The proposed Fund and its operations would be worked out by a Preparatory Committee (to be set up by the President of the Assembly) which would report to the Economic and Social Council in the summer of 1958. This report, with the Council's comments thereon, would be considered at the next Assembly session, and it was hoped that the Fund could be established by Jan. 1, 1959. An annex to the resolution stated that the new agency would be a multilateral U.N. fund financed principally by voluntary contributions from Governments and other sources. Assistance would be given only to projects which would make a contribution to the economic development of the requesting country, and its operations would not be "influenced by political considerations."

A 16-member Preparatory Committee was appointed by Sir Leslie Munro on Dec. 14, consisting of representatives of Canada, Chile, Denmark, Egypt, France, Ghana, Great Britain, India, Japan, Mexico, the Netherlands, Pakistan, Peru, the Soviet Union, the United States, and Yugoslavia.

Proposed U.N. Economic Commission for Africa.

With only one dissenting vote (Belgium) the General Assembly approved a recommendation that the Economic and Social Council should give "favourable and prompt consideration" to the establishment of a U.N. Economic Commission for Africa, similar to the U.N regional commissions for Europe, Asia and the Far East, and Latin America.

A 29-Power resolution to this effect was adopted by the Economic Committee on Oct. 24 by 71 votes to nil, with Great Britain and Belgium abstaining. The resolution, whose sponsors included seven African nations (Ethiopia, Ghana, Liberia, Libya, Morocco, Sudan, and Tunisia), stressed the serious economic problems facing the African peoples, referred to the "extremely useful work" of the other regional commissions, and asked the Economic and Social Council to recommend the creation of a U.N. Economic Commission for Africa. The British and Belgian delegates explained that they were in sympathy with the aims of the resolution but had abstained because they did not altogether agree with its wording.

Miscellaneous Subjects.

Other subjects discussed and decisions taken by the General Assembly are summarized below:

Chinese Representation at the U.N. The Steering Committee decided (by 9 votes to 4, with 2 abstentions) not to place on the agenda an Indian recommendation that the Assembly should consider "the representation of China in the United Nations" at its current session. Instead, it approved (by 10 votes to 3, with 2 abstentions) a U.S. resolution not to consider "any proposals to exclude the representatives of the Republic of China [i.e. Nationalist China] and to seat representatives of the Chinese People's Republic." This resolution was approved by the full Assembly on Sept. 24 by 47 votes to 27, with 7 abstentions and South Africa absent.

Resolution on "Peaceful Co-existence." At its closing session on Dec. 14 the Assembly unanimously approved a three-Power resolution calling upon all States "to make every effort to strengthen international peace, to develop friendly and co-operative relations, and to settle disputes by peaceful means." The resolution had been presented in the Political Committee by India, Sweden, and Yugoslavia.

Definition of Aggression. The Assembly approved a recommendation by its Legal Committee that the problem of arriving at a definition of aggression should be postponed until 1959. After a six-weeks' debate, the Legal Committee had adopted a resolution recommending (1) the establishment of a special committee to consider the views of Governments on this matter; (2) that this committee, after receiving governmental comments, should report to the U.N. Secretary-General; (3) that the matter should be placed on the Assembly's agenda not earlier than the 14th session in 1959.

Economic and Social Council. France, the Netherlands, and Nationalist China were re-elected to the Economic and Social Council for further two-year terms, while Chile, Costa Rica, and the Sudan were elected in place of Argentina, the Dominican Republic, and Egypt. The membership of the Council at Jan. 1, 1958, was as follows: Brazil, Canada, Chile, Nationalist China, Costa Rica, Finland, France, Greece, Indonesia, Mexico, Netherlands, Pakistan, Poland, Sudan, U.S.S.R., United Kingdom, United States, and Yugoslavia. The President of the Economic and Social Council is Mohammed Mir Khan, of Pakistan.

Technical Assistance Funds. At a U.N. "pledging conference" on Oct. 10, 75 countries had promised a record total of $30,250,000 for the U.N. Technical Assistance Programme in 1958. The United

States pledged the largest amount ($15,000,000), as in former years, other major contributors including Great Britain ($2,240,000), Canada ($2,000,000), the Netherlands ($1,920,000), France ($1,540,000) and the Soviet Union ($1,000,000).

U.N. Budget. The Assembly approved a U.N. Budget of $55,062,850 for 1958, on the recommendation of its Administrative and Budgetary Committee. Dr. Hammarskjold had originally asked for $54,782,500, the higher figure adopted being principally due to the extra expenses allocated for the second U.N. Conference on the Peaceful Uses of Atomic Energy to be held at Geneva in 1958.

The Assembly also approved a recommendation by the Administrative and Budgetary Committee reducing the annual assessment of the United States from 33.33 per cent of the total Budget to a maximum of 30 per cent. The U.S. Government had sought a decrease in its contribution on the ground that it was providing one-third of the total U.N. contributions of all member-countries. The U.S. contribution will be "scaled down" to 30 per cent over the next five years, and the reduction will not be reflected in the 1958 Budget.

[In the fiscal year 1957 the U.S. Government contributed $16,361,047 of the U.N. Budget on the basis of the 33 33 per cent assessment—representing a *per capita* payment of nearly 10 cents for every man, woman, and child in the United States. In addition, the U.S.A. contributed $27,467,782 for the specialized agencies and $54,524,100 for voluntary U.N. programmes during the same year.]

At a press conference on Dec. 14, after the Assembly had ended, Sir Leslie Munro said that the principal achievement of the 12th session had been the pacification of the Syrian-Turkish border dispute—which, he pointed out, had been achieved "not by passing a resolution but by not passing a resolution." Dr. Hammarskjold particularly welcomed the decision to set up the new $100,000,000 Special Fund for under-developed territories, describing it as a "major achievement" of the 12th session.—(U.N. Information Centre, London - New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 12th Session, Opening, 15818 A; Syrian-Turkish Dispute, 15919 A; New Guinea, 15951 A; Disarmament, 15941 A.)**

A. GREECE. — Resignation of M. Karamanlis. - M. Georgakopoulos forms Caretaker Government.

M. Constantine Karamanlis tendered his resignation to King Paul of the Hellenes on March 2 after a Cabinet crisis resulting from the resignation of two Ministers—M. Papaligouras (Trade) and M. Rallis (Public Works)—and the defection of 13 other deputies from the National Radical Union, the Government party headed by M. Karamanlis. The 15 N.R.U. deputies (including M. Papaligouras and M. Rallis) opposed the provisions of a new electoral Bill drawn up by M. Karamanlis, and the withdrawal of their support from the Government deprived it of a majority in the Greek Parliament. In submitting his resignation, M. Karamanlis advised King Paul to dissolve Parliament at an early date and proclaim general elections as soon as possible.

The Government's electoral Bill provided for the introduction of "reinforced" proportional representation, which would favour the two major parties—M. Karamanlis's Radicals and the Liberals—by awarding them a premium of seats if they polled over one-quarter of the total national vote. The smaller parties, on the other hand, insist on "pure" proportional representation.

After consultations with the political leaders, King Paul requested M. Constantine Georgakopoulos (the president of the Greek Red Cross) to form a non-party caretaker administration and to ask Parliament to pass the electoral law within 15 days, after which Parliament would be dissolved (whether or not the law was passed) and general elections held in April. M. Georgakopoulos accepted this task and formed a non-party Government which was sworn in on March 5 with the following membership:

M. Georgakopoulos—Prime Minister, and Minister of the Interior; M. Pesmajoglu—Foreign Affairs; M. Demetriakis—Justice; M. Lianopoulos—Education; M. Mertikopoulos—Finance; M. Stergipoulos—Trade and Industry; M. Pipas—Public Works and Communications; M. Frangistas—Agriculture; M. Tsafos—Merchant Marine; M. Kapodistrias—Labour; M. Malaspinas—Social Welfare; M. Spiliopoulos—Northern Greece; M. Manikadis—Under-Secretary for the Interior.

M. Georgakopoulos served as Minister of Education before the war during the Metaxas regime.

M. Karamanlis had been Prime Minister since the death of Field-Marshal Papagos in October 1955. His party, the National Radical Union—the successor to Field-Marshal Papagos's Greek Rally—obtained an overall majority at the last elections in February 1956. (Times - Manchester Guardian) **(Prev. rep. Cabinet, 14920 A; 14732 A.)**

B. BURMA - MALAYA. — Diplomatic Relations.

It was announced in Rangoon on Feb. 28 that Burma and Malaya had agreed to establish diplomatic relations between the two countries at embassy level.—(Daily Telegraph)

C. CANADA. — Immigration Statistics.

It was officially announced in Ottawa on Feb. 7 that 282,164 immigrants entered Canada in 1957, compared with 155,080 in 1956. The 1957 figure was the highest since 1913.

The largest individual groups in 1957 were as follows (1956 figures in parentheses): British (U.K. and Ireland) 112,828 (51,319); Hungarians 29,825; Germans and Austrians 29,564 (29,405); and Italians 29,443 (29,805). Other groups included 12,310 Netherlanders, 11,008 U.S. nationals, 7,790 Danes, 5,785 Yugoslavs, and 5,471 French nationals.

Of immigrants of British origin entering Canada in 1957, English immigrants totalled 72,476 (32,389 in 1956); Scots 23,514 (10,939); Irish 14,336 (6,962); and Welsh 2,502 (1,029).

The following table shows the total of immigrants entering Canada since the Second World War:

1946	71,719
1947	64,127
1948	125,414
1949	95,217
1950	73,912
1951	194,391
1952	164,498
1953	168,868
1954	154,227
1955	109,946
1956	164,857
1957	282,164
Total immigration, 1946-1957 ..	1,669,310

Of individual groups, the total number of British immigrants during the 12-year period was 531,852; of Germans and Austrians, 197,965; of Italians, 194,405; of U.S. nationals, 111,537; and of French nationals, 32,729.

The number of Hungarian refugees entering Canada since the revolution in October 1956 amounted to 36,503 as at Jan. 23, 1958; this figure compared with about 36,000 admitted to the United States.

The latter months of 1956 and the first six months of 1957 were marked by an unprecedented influx of British immigrants, which accounted for the 1957 figure being more than twice as high as the figure for 1956.

Because of the extent of this British migration, and the need to transport large numbers of Continental emigrants to Canada as well, the Minister of Citizenship and Immigration (then Mr. Pickersgill) announced on Feb. 28, 1957, that the Canadian Government had arranged for the biggest airlift in Canadian history to start to bring immigrants over, mainly from Britain. This airlift ("Operation Air Bridge to Canada"), sponsored by the Intergovernmental Committee for European Migration on behalf of the Canadian Government, began on March 15 and involved 350 transatlantic flights by chartered aircraft to take 25,000 immigrants to Canada, in addition to those who had booked normal air or shipping passages.

In addition, the Canadian Government arranged with two companies (Maritime Airways and Canadian Pacific Lines) to transport Hungarian refugees from Europe to the Canadian Pacific coast. Canada also received an increasing number of French immigrants in 1957—many of them former French settlers in Morocco, Tunisia, and Algeria who had left those countries.

The large-scale influx of immigrants during the first six months of 1957, combined with a "tighter" employment position, led to a review of the country's immigration policy by Mr. Diefenbaker's Government shortly after its assumption of office.

As a result of this review, the new Minister of Citizenship and Immigration, Mr. Fulton, announced on July 27 that it had been decided to continue the Hungarian refugee programme on a somewhat modified basis. Accordingly, during the remainder of the year only those Hungarian refugees would be accepted who were sponsored (*a*) by relatives already residing in Canada who were in a position to receive and care for them; or (*b*) by responsible persons, firms, or organizations in Canada prepared to provide employment for the refugees immediately on their arrival. [By June 30, 1957, approximately 32,000 Hungarian refugees had been admitted.]

As regards other immigrants, Mr. Fulton announced that those with no prearranged contracts had been issued with visas which would be valid only for arrival in Canada before July 31, in order to keep the total flow of immigrants within the absorptive capacity of the country's economy and the availability of housing accommodation. There would be no restrictions, however, for close relatives of earlier immigrants, large numbers of whom were expected to arrive before December 31, 1957.

An agreement modifying the Indo-Canadian agreement of 1951 on the immigration of Indian citizens into Canada was signed in New Delhi on May 3, 1957, by Mr. Nehru and Mr. Escott Reid, the Canadian High Commissioner. It provided for the doubling of the number of Indian immigrants to be admitted to Canada every year—i.e. from 150 to 300. (Department of External Affairs, Ottawa - Department of Citizenship and Immigration - Montreal Star) **(14611 C.)**

MARCH 8—15, 1958

A. ANTARCTICA. — The Commonwealth Trans-Antarctic Expedition. - Sir Edmund Hillary and Dr. Fuchs reach South Pole. - Dr. Fuchs completes Crossing of Antarctic Continent. - International Geophysical Year Programmes in Antarctica.

The British section of the Commonwealth Trans-Antarctic Expedition, led by Dr. Vivian Fuchs, successfully completed the first crossing of the Antarctic continent on March 2, 1958, after a 2,200-mile journey lasting 99 days. Sir Edmund Hillary, leader of the New Zealand section of the expedition, had reached the South Pole overland on Jan. 3 —the first man to do so since Captain Scott, who reached the Pole on Jan. 18, 1912, and perished with his four companions on the return journey to McMurdo Sound. Sir Edmund met Dr. Fuchs at the Pole on Jan. 19 and accompanied him from Depot 700 (see below) on the final stage of the expedition to Scott Base.

The Commonwealth Trans-Antarctic Expedition was undertaken as part of the International Geophysical Year programme in Antarctica (see 14349 A), in which eleven countries are participating—Great Britain, the United States, Australia, New Zealand, the Soviet Union, France, Japan, Norway, Belgium, Argentina and Chile. [The bases established by the various countries are described in 14349 A and shown on the accompanying map.] Close co-operation and exchange of scientific information was maintained between the different national expeditions, and, by mutual agreement, it was decided to ignore territorial claims in establishing the various bases—e.g. Russian bases were established in the Australian Antarctic Territory, U.S. bases in the Ross Dependency (which is under New Zealand sovereignty) and the British Falkland Islands Dependencies, and a Japanese base in the Norwegian Antarctic Territory.

A description is given below of (i) the crossing of Antarctica by Dr. Fuchs and the British section of the Commonwealth Trans-Antarctic Expedition, and the achievements of the New Zealand section under Sir Edmund Hillary; (ii) the activities of the various national expeditions in Antarctica, and the researches carried out in connexion with the I.G.Y. programme.

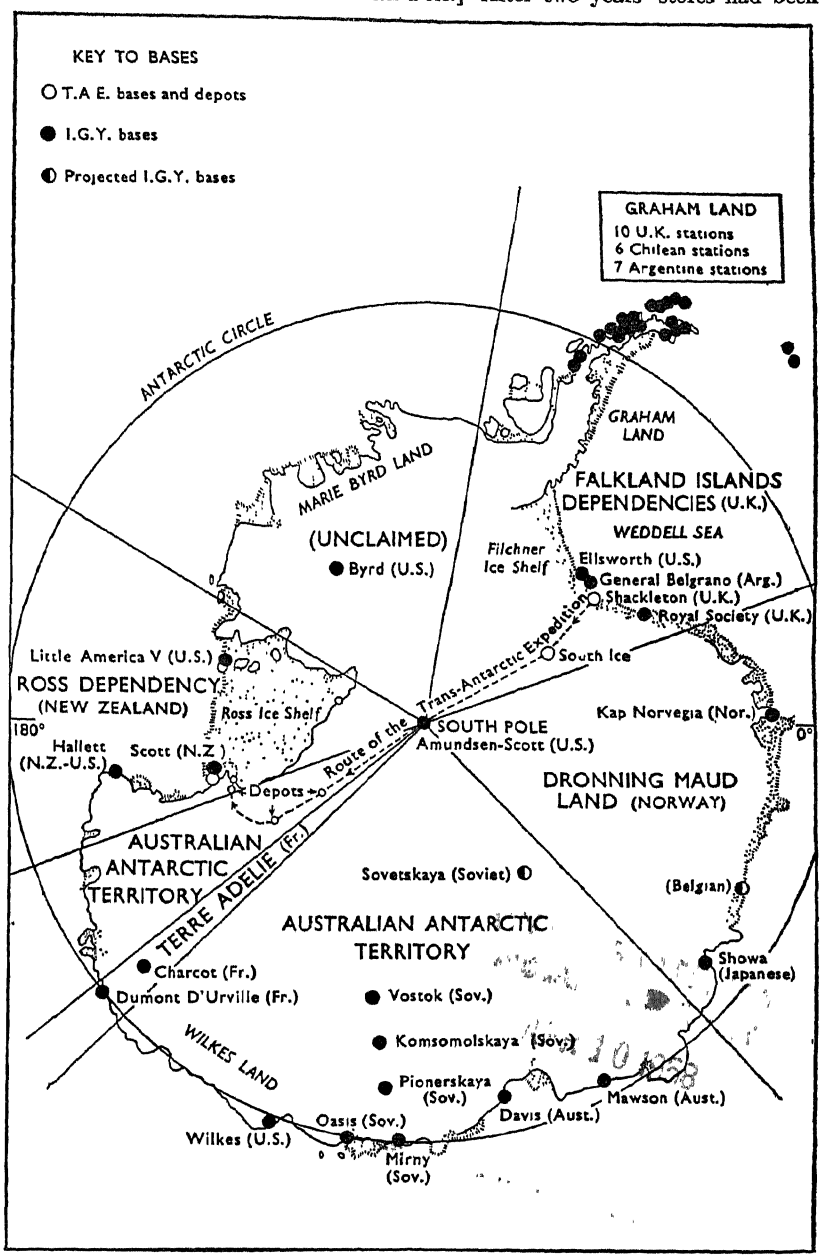
The Crossing of Antarctica.

Dr. Vivian Fuchs (50), Director of the Falkland Islands Dependencies Scientific Bureau since 1950, planned to cross the Antarctic Continent from Vahsel Bay, on the Weddell Sea, to McMurdo Sound, on the Ross Sea, carrying out *en route* a full programme of geophysical research including studies in meteorology, glaciology, mineralogy, wind and temperature measurements, etc. The planning of the expedition was directed by a committee of management in London under Marshal of the R.A.F. Sir John Slessor, a similar body (the Ross Sea Committee) being set up in New Zealand for the organization and equipment of the N.Z. supporting party under Sir Edmund Hillary.

The expedition was undertaken essentially as a Commonwealth enterprise, the route traversed crossing Commonwealth territory throughout its entire length (see map). It had the official backing of four Commonwealth Governments, the British Government contributing £100,000, New Zealand £50,000 (subsequently raised to £250,000), Australia £A.25,000 and South Africa £18,000. Support was also forthcoming from the Royal Geographical Society in London and from various British and Commonwealth commercial concerns. In addition, public appeals were launched in Britain (for £175,000) and in New Zealand (for £100,000). Altogether, the cost of the expedition was estimated at about £500,000.

Dr. Fuchs and an advance party sailed from Millwall Docks (London) on Nov. 14, 1955, in the Canadian sealer *Theron* (850 tons), a vessel specially designed for navigating in Canadian Arctic waters and chosen for its suitability for similar conditions in the Antarctic. She was loaded with some 300 tons of stores and scientific equipment, in addition to several Sno-cat and Weasel tractors and 24 Greenland "huskies." The *Theron* arrived on Jan. 30, 1956 at Vahsel Bay, where a base was set up which was named Shackleton, in honour of the British Antarctic explorer. [Sir Ernest Shackleton attempted the trans-antarctic journey in 1914, but his ship, the *Endeavour*, was caught and crushed in the Antarctic ice before he could land; on a previous overland journey he had got within 90 miles of the South Pole.] After two years' stores had been landed and an advance party of eight men left at Shackleton Base, the *Theron* left Vahsel Bay in February 1956, with Dr. Fuchs on board, and arrived back in the Thames on March 23; she was trapped for a time by ice in the Weddell Sea, and completed the journey to London with her hull badly damaged.

On Nov. 15, 1956, Dr. Fuchs and the main party left London for Antarctica in the Danish polar vessel *Magga Dan* (1,850 tons displacement), which had been specially chartered for the Expedition in place of the *Theron*. The vessel—which



The map, prepared by the New Zealand Department of External Affairs, shows the bases established in Antarctica by the countries taking part in the International Geophysical Year programme. The route taken by the Commonwealth Trans-Antarctic Expedition is also shown.

had a Danish crew and captain—carried a number of Sno-cat and Weasel vehicles (described below) and a great quantity of scientific equipment and stores.

The *Magga Dan* was launched at Aalborg (Denmark) on June 1, 1956, and cost £500,000 to build. A refrigerated motor vessel with accommodation for 34 passengers, she was specially designed for navigation in polar waters and can sail for 16,000 miles without refuelling—i.e. for three months. Powered by a turbo-charged engine, she incorporates a number of novel features—e.g. a heated glass wheelhouse on the foremast, reached by an internal ladder, from which the captain can navigate the ship with a full set of instruments similar to those on the normal wheelhouse on the bridge. In addition, the vessel has specially strong plating to resist ice pressure; an ice-cutting knife which protects the propeller; and three fins on each side of the underwater hull to force ice away from the propeller. The *Magga Dan* is one of eight similar vessels under construction for the Danish shipping firm of Lauritzen.

The Sno-cat—which was used with outstanding success in the Antarctic—is a four-ton tractor having four pontoon tracks, each equipped with spikes for manoeuvrability on ice. The pontoons are so flexible that all four tracks can be at different angles and levels and still provide complete traction; moreover, the vehicle can continue travelling with one or two tracks completely removed, as might happen in an emergency. The Weasel—evolved during the war—is a three-ton vehicle with caterpillar tracks (as on a tank), and sledges with runners 8-in. wide. Other equipment included a portable bridge of aluminium construction, designed to span crevasses up to ten feet wide. This bridge, 14 ft. in length and weighing 260 lb., was made in three longitudinal units (each 30-in. wide) which could be spaced as required so as to give three different widths of track.

Dr. Fuchs took with him the pocket chronometer which was carried to the South Pole by Captain Scott in 1911-12, and subsequently recovered when the bodies of Scott and his companions were found by the Relief Expedition under Dr. Atkinson. The chronometer was lent by its owners to Dr. Fuchs, who explained that he was taking it to the Antarctic for sentimental reasons because he felt that "Scott would have liked it." The chronometer was carried by Dr. Fuchs to the South Pole and across the entire Antarctic continent from Vahsel Bay to McMurdo Sound. [The latter was Scott's base in the ill-fated Expedition of 1911-12.]

The *Magga Dan* arrived at Shackleton Base on Jan. 13, 1957, landed Dr. Fuchs and his companions, and left for London on Jan. 29 after the unloading of stores and equipment had been completed. For the next eight or nine months the Shackleton Base was busy with the preparations for the Trans-Antarctic Expedition, reconnaissance flights being made by an *Otter* aircraft belonging to the Expedition and piloted by Flight-Lieut. Gordon Haslop, of the Royal New Zealand Air Force. These flights—over vast areas never before charted—enabled Dr. Fuchs to plan the first stage of his journey from Shackleton to the South Pole and to choose what appeared to be the most favourable route.

Meanwhile, the New Zealand party under Sir Edmund Hillary had arrived at McMurdo Sound (in South Victoria Land) in January 1957 and set up a base which was named Scott Base in honour of Captain Scott. Regular radio communication was established with Dr. Fuchs and his party at Shackleton, and extensive air and land reconnaissances were carried out with the aim of finding a favourable route which Dr. Fuchs could use on the second part of his trans-antarctic journey—i.e. from the South Pole to Scott Base. After a 200-mile journey by dog-team, lasting 13 days, a four-man New Zealand party reached the polar plateau in February and radioed to Sir Edmund that they had found a good tractor route up the Skelton Glacier.

After several months' preparation, Sir Edmund Hillary and a New Zealand party left Scott Base on Oct. 13, 1957, to lay depots for Dr. Fuchs's expedition at various points between McMurdo Sound and the South Pole, with the intention of meeting Dr. Fuchs at Depot 700 (the last depot before the Pole) and accompanying him from that point to Scott Base. Using tractors and dog-teams, and taking the Skelton Glacier route previously reconnoitred, the New Zealanders reached Depot 480 (i.e. 480 miles south of Scott Base, and 700 miles from the Pole) on Nov. 27, after an adventurous journey across country which had not been visited by man since Captain Scott's last expedition; during this journey Sir Edmund Hillary and his party had to contend with temperatures of 20 degrees below zero, continuous high winds, and dangerous areas of crevasses into which tractors and sledges sometimes fell, necessitating man-hauling from time to time under extremely trying conditions.

From Depot 480, where Sir Edmund's party stopped for ten days, Mr. Robert Miller (deputy leader of the N.Z. expedition) and Dr. George Marsh (the expedition's medical officer) went on ahead of the main body with two dog-teams and reached Depot 700 (470 miles from the Pole) on Dec. 13; the 230-mile journey was made in good weather conditions and at an average speed of nearly 18 miles a day. Sir Edmund Hillary and the remainder of the party, using tractors only, arrived at Depot 700 on Dec. 21, after a rapid journey in which Sir Edmund had a narrow escape when his tractor plunged into a crevasse to half the height of its load.

By Dec. 21, therefore, all New Zealand commitments for the Trans-Antarctic Expedition had been fulfilled, Sir Edmund Hillary and his party having reached Depot 700—the pre-arranged rendezvous for their later meeting with Dr. Fuchs—after covering the 700 miles from Scott Base in 70 days. At intervals along the 700-mile route five depots had been laid containing a total of 42 drums of fuel, food for 300 days, and 100 gallons of paraffin, as well as meat for the New Zealand dog-teams. All the depots were supplied and provisioned by air, frequent flights being made by *Beaver* and *Auster* aircraft of the Royal New Zealand Air Force, based on McMurdo Sound (where an airstrip had been built) and piloted and serviced by New Zealand airmen. The operations were in charge of Squadron-Leader John Claydon, who was in command at Scott Base during Sir Edmund Hillary's absence.

Dr. Fuchs and his party, meanwhile, had left Shackleton Base on Nov. 24 for their 2,000-mile trek across Antarctica, their first objective being South Ice—a depot 300 miles south of Shackleton (see map), and the only depot between that base and the Pole. The South Ice depot had been established and stocked some months earlier after aerial reconnaissances in which Dr. Fuchs took part.

The ten-man party leaving Shackleton consisted of Dr. Vivian Fuchs; Mr. David Stratton (of London), surveyor, and second-in-command of the expedition; Warrant-Officer Roy Homard (of London), engineer; Mr. Ralph Lenton (of Coulsdon, Surrey), radio operator and carpenter; Mr. David Pratt (of Bournemouth), engineer and transport officer; Dr. Allan Rogers (of Bristol University), medical officer; Mr. George Lowe (a New Zealander, and a member of the British Everest Expedition of 1953), photographer; Mr. Johannes la Grange (a South African), meteorologist; Mr. Geoffrey Pratt (of Richmond, Surrey), physicist and seismologist; and Mr. Hal Lister (of Keighley), glaciologist.

The expedition left Shackleton in three Sno-Cats, two Weasels, and a Muskeg tractor, the leading vehicle—Sno-Cat *Rock 'n Roll*—being driven by Dr. Fuchs and Mr. Stratton. During the first ten days of December the party was considerably delayed by a number of dangerous crevasses, and on one occasion Dr. Fuchs and Mr. Stratton had a narrow escape when the three-ton *Rock 'n Roll* broke through the covering of a 60-ft. crevasse and hung suspended with its track pontoons stuck against the sides of the crevasse; the other five vehicles acted as anchors to prevent the Sno-Cat plunging into the crevasse, and *Rock 'n Roll* was eventually recovered after five hours. Spare parts for the battered Sno-Cat were flown out by Squadron-Leader John Lewis, commanding the R.A.F. contingent providing air support for Dr. Fuchs's party.

On Dec. 22 the expedition reached South Ice nearly a month after leaving Shackleton, and after traversing 300 miles under very difficult conditions and, for the latter part of the journey, in bad weather, low temperatures, and blizzards. After a three-day stop to recover from the strenuous journey from Shackleton, to take on stores, and to change vehicle tracks and re-load sledges, Dr. Fuchs and his party left on Dec. 26 for the 500-mile stretch to the South Pole.

As stated above, Sir Edmund Hillary and the New Zealanders had already arrived at Depot 700 to meet Dr. Fuchs's party advancing from the other side of the Antarctic continent. On Dec. 26 (the day Dr. Fuchs left South Ice) Sir Edmund Hillary sent a radio message to Scott Base saying that he was "hell-bent for the Pole, God willing and crevasses permitting." Sir Edmund's decision to go on to the Pole—taken on his own initiative—was conveyed to the Ross Sea Committee in New Zealand, and also to Dr. Fuchs.

It was pointed out in New Zealand—both by the Prime Minister, Mr. Walter Nash, and by the Ross Sea Committee—that Sir Edmund had advised Dr. Fuchs of his intentions, and that his (Sir Edmund's) survey of the route from Depot 700 to the Pole would be "of inestimable value" to Dr. Fuchs and his party. The secretary of the Ross Sea Committee (Mr. Arthur Helm) emphasized that there was no question of a "race" to the Pole between Hillary and Fuchs, while Mr. Nash said that Hillary's "dash to the Pole" would be a "splendid thing" if it aided Dr. Fuchs and the Commonwealth expedition; Mr. Nash added that "everything is in order so long as Hillary is in touch with Fuchs."

Sir Edmund and his party set out for the Pole with four tractors (two of which were later abandoned) and a caboose sledge. In their 500-mile journey, across territory never before explored from the ground, they had to contend with

crevasses, deep snow, and bad weather conditions. On Jan. 3, 1958, Hillary and his party reached the South Pole after a final spurt in which they covered the last 100 miles in two days, and with only one drum of petrol remaining unused—sufficient only for another 20 miles. The New Zealanders received a warm welcome from the American scientists who had previously established a research station at the Pole (the Amundsen-Scott Base) in connexion with the I.G.Y. programme (see below).

Sir Edmund Hillary received many congratulations on being the first man to reach the South Pole overland since Captain Scott, following his earlier achievement in 1953 when he was the first man to climb Mount Everest, with the Sherpa Tensing. In a statement in Wellington, the Prime Minister of New Zealand said that Sir Edmund had achieved "a double feat of endurance and courage which must rank extremely high in the history of human endeavour." Mr. Nash added "To have climbed Everest might have been enough for any explorer, however intrepid; on top of that, to have led a party over what has been described as 'the worst journey in the world'—to the South Pole—is an achievement which all New Zealanders and all British people will be proud to honour." Sir Edmund also received congratulations from the Royal Geographical Society in London.

In a radio message to Scott Base on Jan. 5, Sir Edmund Hillary (who had kept in radio contact with Dr. Fuchs) reported that Dr. Fuchs's party were still 350 miles from the Pole and in difficulties owing to blizzards and trouble with the Weasel tractors. On the following day Sir Edmund and his party flew back from the Pole to Scott Base in two U.S. Navy planes, leaving one member—Mr. Peter Mulgrew—at the Pole to provide an independent radio link with the outside world for Dr. Fuchs and his team. On arrival at Scott Base, Sir Edmund said that further fuel supplies would be immediately flown to Depot 700, as requested by Dr. Fuchs; he added that "if Dr. Fuchs wishes to continue across [the Antarctic continent], our job is to see he does it as quickly and safely as possible; we will use our local knowledge of the area to try to give him a fast trip to Scott Base and beat the weather."

Since leaving South Ice on Dec. 26, Dr. Fuchs's party had encountered serious difficulties in the journey across the uncharted terrain between the depot and the Pole. A radio message from Dr. Fuchs, dated Dec. 31, said that the sledges were taking "heavy punishment" in their progress across "immense fields of high sastrugi" (i.e. furrows of frozen ice), while a further message dated Jan. 5 said that the Muskeg tractor had been abandoned and that the other vehicles were "crashing over precipitous places every few yards, causing damage to runners and tow-bars." In spite of these obstacles, he hoped to get to the Pole within 15 days.

The London headquarters of the Commonwealth Trans-Antarctic Expedition disclosed on Jan. 6 that Dr. Fuchs had rejected a suggestion by Sir Edmund Hillary that he (Dr. Fuchs) should abandon the second half of the 2,000-mile journey across Antarctica after he had reached the South Pole, and that the journey to Scott Base should be resumed in the next Antarctic summer season (i.e. in November 1958).

Sir Edmund Hillary had sent a cable to London pointing out that Dr. Fuchs's party was still over 350 miles from the Pole and was encountering serious difficulties owing to icefields, "enormous" sastrugi, and repairs to vehicles. Although Dr. Fuchs hoped to be at the Pole by Jan. 20 "with reasonable luck," he (Sir Edmund) felt that this would require "a much higher average than he has been able to maintain." Sir Edmund's cable continued: "Have expressed my views to Fuchs that with the extreme delay in his programme and the punishment his vehicles are sustaining, he would be most unwise to attempt to continue on over the 1,250 miles to Scott Base this season. This journey could only be done at considerable risk to man and at the sacrifice of any effective seismic programme. I suggested that he winter his vehicles at the South Pole, that his party be evacuated by air, and that in November they fly in again to the Pole in ample time to recondition their vehicles and complete their journey with full scientific progress."

Dr. Fuchs sent a message to London worded as follows: "Have received message from Hillary urging me to abandon journey at Pole and return there next season to continue work. His grounds are deterioration of weather in the late season. I am aware of this possibility, which must be accepted. I have informed him that there is no question of abandonment, and that the return of the party in the following season is impracticable . . . He states his agreement with his mechanic's view that the continuation of the journey late in the season is an unjustifiable risk. I do not agree, but have informed him that I do not feel able to ask him to join us at Depot 700 to use his local knowledge, but will find our own way out."

Marshal of the R.A.F. Sir John Slessor (chairman of the London committee) replied to Dr. Fuchs as follows: "The committee have considered your telegram and Hillary's. We have full confidence in you and your judgment as leader of the expedition. We support your decision and any other you may make."

Dr. Fuchs and his party reached the South Pole on Jan. 19, within the time-limit set by him when 350 miles from the Pole. In their pioneering journey over the uncharted and frozen wastes between Shackleton Base and the Pole they had covered 930 miles in 56 days, an average of nearly 17 miles a day in spite of the difficulties of the terrain. Dr. Fuchs was warmly welcomed at the Pole by Sir Edmund Hillary, who had flown there to meet him, and also by Rear-Admiral George Dufek (the leader of the U.S. Expedition) and the American scientists at the polar station. He was handed a telegram from the Queen and the Duke of Edinburgh expressing their congratulations on his achievement, and their best wishes for the next stage of his journey to Scott Base.

Many newspapermen and photographers were present to welcome Dr. Fuchs and his party on their arrival at the South Pole, whose "population" had grown to about 40 men—the U.S. scientists at the Amundsen-Scott base, Sir Edmund Hillary and members of the New Zealand party, Dr. Fuchs and the Commonwealth party, and the pressmen who had been flown in. In a despatch from the Pole, the Special Correspondent of *The Times* described Dr. Fuchs's arrival as "a gay and lighthearted occasion, more in the mood of an Austrian ski field than the ominous 'terrible place' that filled Robert Falcon Scott's thoughts 46 years ago."

Dr. Fuchs and Sir Edmund Hillary, who greeted each other with great cordiality, held a joint press conference at which Dr. Fuchs paid tribute to Sir Edmund's work in laying depots between Scott Base and the Pole. After saying that he was "perfectly happy" about Sir Edmund's dash to the Pole, Dr. Fuchs emphasized that he had "never considered for a moment concluding the present season's work at the Pole" and was determined to complete the journey to Scott Base at the earliest possible moment. Describing the journey from Shackleton Base, he said that his party had been delayed by the weather, crevasses, and "vehicle trouble," and had run into numerous "whiteouts" (blizzards), which he described as "like driving into a blank wall."

After repairs to vehicles, Dr. Fuchs and his party left the South Pole for Scott Base on Jan. 24, along the route previously reconnoitred by Sir Edmund Hillary and the New Zealanders. Sir Edmund had meanwhile flown back to Scott Base after his meeting with Dr. Fuchs at the Pole.

On Jan. 28, when only four days out from the Pole, a radio message was received from Dr. Fuchs stating that Mr. Geoffrey Pratt (the expedition's seismologist) had "twice collapsed from severe cumulative carbon monoxide poisoning", as the expedition had little oxygen, Dr. Fuchs requested Rear-Admiral Dufek to send a plane to evacuate Mr. Pratt to sea-level at the earliest moment, as "medical opinion indicates a rapid recovery at low altitude" Two U.S. Navy planes immediately took off from McMurdo Sound, and after an 800-mile flight in bad weather parachuted oxygen cylinders to Dr. Fuchs's party, who had given their position by radio; thanks to the promptness of this aid, Mr Pratt made a rapid recovery and was able to continue with the expedition.

Rear-Admiral C. R. L. Parry, secretary of the expedition, said in London that the carbon monoxide contamination might have occurred through a fault in the exhaust system of one of the Sno-Cats, or in a tent used by Mr. Pratt during a halt in camp.

Depot 700 was reached on Feb. 7, after Dr. Fuchs had negotiated a heavily crevassed area in which two Sno-Cats were damaged by falls into crevasses; both vehicles were recovered and repaired after several hours' mechanical work in low temperatures. Sir Edmund Hillary flew from Scott Base to join Dr. Fuchs at Depot 700, and to act as guide on the final stage of the journey to McMurdo Sound.

The Commonwealth Trans-Antarctic Expedition successfully completed its journey across Antarctica on March 2, when Dr. Fuchs, his party, and Sir Edmund Hillary arrived at Scott Base after an uneventful journey from Depot 700 in good weather. Dr. Fuchs, the first man in history to cross the Antarctic continent overland, completed the 2,200-mile trek in 99 days since leaving Shackleton Base on Nov. 24. He had originally allowed 100 days for the journey, and thus beat his own target-date.

The four Sno-Cats bearing the members of the Expedition, led by Dr. Fuchs in *Rock 'n Roll*, were escorted on the last mile by a cavalcade of vehicles and sledges which had gone out from Scott Base to welcome them. The Trans-Antarctic Expedition ended its journey at the foot of Observation Hill, whose summit bears a Cross erected to the memory of Captain Scott and his four companions who perished with their leader on the return journey from the Pole in 1912—Dr. Edward Adrian Wilson, Captain Lawrence Oates, Lieutenant Henry Bowers, and Petty-Officer Edgar Evans. The Cross on Observation Hill bears the famous words *To strive, to seek, to find, and not to yield*—taken from Tennyson's *Ulysses* at the suggestion of Mr. Apsley Cherry-Garrard, a survivor of Scott's Last Expedition and author of *The Worst Journey in the World*.

Dr. Fuchs and Sir Edmund Hillary descended from their vehicle with arms interlinked and, with the other members of the Expedition, stood bare-headed as the National Anthem was played; the Union Jack was flown from the historic flagstaff erected by Captain Scott

during the *Discovery* Expedition of 1901, with the New Zealand flag alongside. Speaking with emotion, Dr. Fuchs expressed his thanks for the enthusiastic reception accorded him, and paid high tributes to the members of his expedition, the New Zealand expedition, and Sir Edmund Hillary.

Shortly after his arrival at Scott Base, Dr. Fuchs received a telegram from the Queen in which her Majesty and the Duke of Edinburgh sent their "warmest congratulations" to all members of the expedition and to Dr. Fuchs personally; her Majesty added: "You have made a notable contribution to scientific knowledge and have succeeded in a great enterprise. Well done!" A telegram was also received from the Secretary of State for Commonwealth Relations (Lord Home) announcing that the Queen had decided to confer a knighthood on Dr. Fuchs. Other congratulatory telegrams were received by Dr. Fuchs from Mr. Macmillan, Mr. Walter Nash, and Mr. Strydom (Prime Minister of South Africa), and also from the Royal Geographical Society and scientific institutions in the United States, France, and many other countries.

Dr. Fuchs gave a press conference on the same day in which he said that the depots laid by the New Zealand support party under Sir Edmund Hillary had helped to make the last part of the journey go smoothly, "with ample food, fuel, and everything we could require from Depot 700 onwards." In a personal tribute to Sir Edmund, he said that "we only missed crevasses after Depot 700 because Ed showed us the way." Regarding the journey as a whole, Dr. Fuchs said that the "trickiest" part was the 300-mile run from Shackleton Base to South Ice, as he himself had anticipated. The Sno-Cat vehicles had performed excellently throughout and had averaged 30 miles a day since leaving the Pole.

Summarizing the Expedition's scientific work, Dr. Fuchs said that they had surveyed two previously unknown mountain ranges in the Weddell Sea, carried out seismic and gravimetric soundings right across the continent, and carried out geological and meteorological work. Mr. Geoffrey Pratt, in a separate statement, said that it had been definitely established that Antarctica was a continent and that no part of it was below sea-level.

Dr. Fuchs, the other members of the expedition, and Sir Edmund Hillary sailed from McMurdo Sound for New Zealand on March 5 in the N.Z. research vessel *Endeavour*. The main New Zealand party remained at Scott Base to continue the scientific work of the I.G.Y. programme.

The I.G.Y. Programme in the Antarctic.

A summary of the scientific work carried out in Antarctica by the different national expeditions is given below under cross-headings.

British Royal Society Expedition. - Non-stop R.A.F. Flight across Antarctica.

Although the Trans-Antarctic Expedition represented the main British contribution to the I.G.Y. programme in Antarctica, important researches were also carried out by a British scientific party, under the aegis of the Royal Society, which established a base about 150 miles from Dr. Fuchs's headquarters at Shackleton (see map). The Royal Society's base (Halley Bay) was set up in January 1956, when the m.v. *Tottan* arrived there after leaving Southampton on Nov. 22, 1955.

The Royal Society base was under the command of Surgeon Lieutenant-Commander David Dalgleish, R.N., until November 1956, when Commander Dalgleish returned to England. He was succeeded in the leadership by Colonel Robin Smart, R.A.M.C., who went out with Dr. Fuchs in the *Magga Dan*. Colonel Smart, in turn, will return to England early in 1958 and will be succeeded at Halley Bay by Mr. Joseph McDowell, a senior scientist at the Meteorological Office.

The researches carried out at Halley Bay include studies in meteorology, solar radiation, glaciology, the Aurora Australis and other atmospheric phenomena, etc. Scientists were seconded for these purposes by the Meteorological Office, the Jodrell Bank radio-astronomy station, and other scientific institutions. Similar researches are carried out by other British parties operating in Graham Land, in the Falkland Islands Dependencies.

An outstanding British achievement in Antarctica was the first non-stop flight across the Antarctic continent by a single-engined aircraft, accomplished on Jan. 6, 1958, by Squadron-Leader John Lewis and a crew of three. The machine—an R.A.F. *Otter*—flew 1,600 miles from South Ice to Scott Base in 10 hours 57 minutes, flying over the South Pole and over Dr. Fuchs's party then making their way to the Pole.

Squadron-Leader Lewis (of Kenilworth, Warwicks.) was attached to Dr. Fuchs's party at Shackleton Base and carried out the air reconnaissance preparatory to the setting-up of the South Ice depot. The other three airmen taking part in the trans-antarctic flight were Flight-Lieut. Gordon Haslop, a New Zealander (co-pilot), Flight-Sergeant Peter Weston (mechanic) and Sergeant Ellis Williams (radio operator).

New Zealand Expedition.

In addition to assisting the Commonwealth Trans-Antarctic Expedition by laying depots from Scott Base to the Pole, the New Zealand Expedition under Sir Edmund Hillary carried out a full programme of scientific work from its headquarters at Scott Base. Among the New Zealanders' achievements were the discovery of an extensive Antarctic coalfield, the climbing of what is believed to be the highest mountain in the Antarctic continent, and the discovery of important relics of Captain Scott's Expedition.

The discovery of extensive coal deposits in the Ross Dependency was reported in December 1957 by two geologists of the N.Z. Expedition, Mr. Bernie Gunn and Mr. Guyon Warren. The coalfield was first sighted from the air and then thoroughly investigated on the ground during a geological survey covering 200 miles between the Skelton Glacier in the north and the Mawson Glacier in the south. The aerial survey disclosed black coal continuously exposed for two miles, while ground investigations discovered six seams, each from 6 ft. to 10 ft. thick. Mr. Gunn reported that the coal was of the sub-bituminous variety.

Mount Harmsworth (10,500 ft.), the highest peak so far known on the Antarctic continent, was climbed in February 1957 by three members of the N.Z. Expedition (Mr. Gunn, Mr. Warren, and Mr. Arnold Heine), who reached the summit in 16 hours. The 13,500-ft. Mount Erebus, climbed by members of the Scott and Shackleton Expeditions, is on Ross Island and is not considered as being on the Antarctic continent proper.

In March 1957 Sir Edmund Hillary and three other members of the N.Z. Expedition made a return trip to Cape Crozier (at the eastern tip of Ross Island) in 48 hours, retracing the famous "worst journey in the world" carried out in 1911 by Dr. Wilson, Lieutenant "Birdie" Bowers, and Apsley Cherry-Garrard, and described in the latter's well-known book bearing that title. They found the stone hut built by Wilson, Bowers and Cherry-Garrard, and, in addition, a 9-ft. manhauling sledge used by the three explorers, a thermos flask "as good as new," clinical and meteorological thermometers in perfect condition, and three unexposed films. All these relics were taken back to Scott Base.

[Dr. Wilson, "Birdie" Bowers, and Cherry-Garrard made a hazardous journey to Cape Crozier to enable Dr. Wilson - Chief Scientist in Scott's Last Expedition—to obtain embryos of the Emperor penguin; they suffered great hardships on the journey, which lasted many weeks and was described by Captain Scott as the "hardest journey ever undertaken." Dr. Wilson and "Birdie" Bowers later accompanied Captain Scott to the Pole and perished with their leader on the return journey. Mr. Cherry-Garrard (72) is still living.]

Australian Expedition.

Australian scientists established bases at Mawson (in the Australian Antarctic Territory) and Davis (150 miles west of Mawson Base), and carried out extensive exploration and researches along the little-known coast of Wilkes Land; hitherto unknown mountain ranges were discovered, with peaks up to 8,000 feet, and journeys were made by tractor and dog-teams covering hundreds of miles. In one such journey (a three-month trek ending in February 1957, led by Mr. William Brewster) a five-man Australian team made the first penetration of the Prince Charles Mountains 150 miles inland from Mawson—and covered over 800 miles in all.

A feature of the Australian programme was the installation (in June 1957) of an automatic weather-recording station—the first of its kind in the Antarctic—at Windmill Island, about 1,000 miles east of Mawson Base. The "robot," completely unattended, issues regular weather reports at six-hourly intervals and transmits information on wind pressure, temperatures, etc., which is picked up at the Mawson and Davis bases and relayed thence to Australia.

The robot was designed by a French firm which has built similar automatic stations capable of withstanding the severe conditions of the Sahara Desert. The Australian version is designed to withstand snow, very low temperatures, and winds of up to 120 m.p.h. It is controlled by an electro-mechanical "brain" operating on power supplied by a wind-driven generator, and carries a radio transmitter, meteorological instruments, etc. Transmissions are in code, the messages being de-coded at the Australian bases.

The Australian Expedition travelled to the Antarctic in the Danish vessel *Kista Dan* (a sister-ship of the *Magga Dan*), which was chartered by the Australian Government.

American Expedition.

The American programme in the Antarctic ("Operation Deepfreeze") was the most extensive of any of the national expeditions, involving the construction of five major scientific bases—including one at the South Pole—and a number of outposts in different parts of the continent.

The first part of the programme was undertaken by a U.S. naval task force which sailed for the Antarctic in November 1955 from Boston and Norfolk (Virginia). It consisted of three large cargo vessels, three tankers and three icebreakers, including the 9,000-ton U.S.S. *Glacier*, the biggest icebreaker in the U.S. Navy. The vessels

carried over 2,000 men (including a battalion of "Seabees" for constructional work), 10,000 tons of stores, scientific instruments, and building materials, and 19 naval aircraft ranging from *Skymasters* to de Havilland *Otters*. Rear-Admiral Richard E. Byrd (70), the veteran polar explorer, was recalled to active service as officer in command of the expedition, the task force being under the command of Rear-Admiral George J. Dufek.

The task force arrived at McMurdo Sound in December 1955 and carried out the following programme up to the end of March 1956. (1) the construction of a major scientific station (Little America V) at Kainan Bay, an indentation in the Ross Ice Shelf, manned by more than 70 scientists and naval personnel; (2) the construction of an airstrip at McMurdo Sound, adjacent to New Zealand's Scott Base, which was thereafter used extensively by U.S., British, and New Zealand aircraft; (3) the stockpiling of over 1,000 tons of stores at Little America and McMurdo Sound for subsequent delivery by air to the other U.S. bases at the South Pole and elsewhere [see below]. The Little America base was named "Little America V" because four earlier bases of the same name had been established in the area during previous expeditions commanded by Rear-Admiral Byrd. The task force left Antarctica on March 29, 1956, after successfully accomplishing all its objectives.

Extensive aerial reconnaissances over the Antarctic continent were carried out by U.S. naval planes as soon as the airstrip at McMurdo Sound (a compacted snow runway) had been completed. During the first ten days of January, 1956, *Neptune* and *Skymaster* aircraft made nine long-range flights into the heart of the continent, flying over the Geographic and Magnetic poles and on one occasion making a trans-continental flight of 2,700 miles to the Weddell Sea and back to McMurdo Sound. About 1,000,000 square miles of territory—three-quarters of which was previously unknown—were flown over and photographed in these exploratory flights, in one of which Rear-Admiral Byrd flew over the South Pole for the third time in his life. Several previously unknown mountain ranges were discovered, as well as high plateaux rising in places to 13,000 feet.

The second part of "Operation Deepfreeze" was carried out in record time between November 1956 and the end of February, 1957, by a task force of 12 ships and 40 aircraft based on Christchurch and Lyttelton, New Zealand. Over 3,500 U.S. Navy, Army, and Marine Corps personnel were engaged on the programme, which included the construction of (1) the South Pole base, (2) the Byrd base in Marie Byrd Land, in that sector of the Antarctic continent to which no territorial claim has yet been made; (3) the Ellsworth base, on the Weddell Sea; (4) the Wilkes Base, in the Australian Antarctic Territory; and (5) the Hallet Base, in the Ross Dependency, which was run as a joint U.S.-New Zealand scientific station. With the exception of the South Pole station, nearly all these bases (including Little America) were established round the rim of the Antarctic continent, as shown on the accompanying map

Dr. Paul A. Siple, who first won fame when he went to Little America in 1929 as a Boy Scout, was placed in charge of the South Pole station; a specialist in polar problems, he has accompanied almost all U.S. expeditions to Antarctica. The Ellsworth Base was placed in charge of Commander Finn Ronne, who was prominently associated with Admiral Byrd's previous Antarctic expeditions, and who made a famous sledging journey of 1,200 miles in 1940-41.

The South Pole base was completed within a few weeks by a team of "Seabees" flown in and supplied throughout by air. An advance party with 30 days' supplies was landed at the Pole on Nov. 20, 1956, by five *Globemasters* and *Dakotas*, and in the next few weeks a regular "shuttle" service was maintained between the Pole and McMurdo Sound in which 500 tons of stores, prefabricated buildings, and scientific equipment were flown to the polar station, in addition to Weasel tractors and dog-teams. Some of the stores and other equipment were dropped by parachute, the heavier equipment being flown in by transport planes which made successful landings in difficult surface conditions. The polar station was completed by mid-January, 1957, and was named the Amundsen-Scott Base in honour of the Norwegian and British explorers who reached the South Pole for the first time in 1911-12. [Amundsen reached the Pole on Dec. 14, 1911, and Scott on Jan. 18, 1912.]

An outstanding American achievement was the construction of the Wilkes Base in two weeks by a team of 95 "Seabees." A *New York Times* correspondent in Antarctica described the base as consisting of "16 windowless orange buildings, a forest of radio masts, and various odd-shaped towers and domes, looking like a motion picture version of a Martian city."

Important scientific and exploration work was carried out in the Antarctic continent by American scientists, whose programme includes seven major tractor journeys, covering thousands of miles, to be carried out over the 18 months commencing October 1957. Among U.S. achievements to date have been the determination of the geological structure below the South Pole, and important geographical discoveries in different parts of Antarctica.

The seven tractor journeys referred to above were worked out by Dr. Albert P. Crary, Chief Scientist in charge of the Little America Base. They will include a 1,500-mile journey from Little America over the Ross Ice Shelf; an extensive reconnaissance of Marie Byrd Land; explorations in the South Polar area; and extensive journeys from the Wilkes and Ellsworth bases. In all, the tractor parties will traverse about 7,500 miles of little-known or unexplored territory. In most cases fuel and food will be delivered to the tractor parties by air.

Important findings with regard to the geological structure of the polar plateau were announced on Dec. 6, 1957, by the Rev. Daniel Linehan, one of America's leading seismologists and a member of the U.S. Expedition. Father Linehan stated that his tests had shown that there was bedrock under the Pole at 903 feet above sea-level, but that it was buried under 8,297 feet of snow and ice. The geological conformation below the South Pole was as follows: (1) a top layer of snow and ice, relatively compact, lying 77 feet thick on the surface of the polar plateau; (2) an intermediate stratum of harder ice, 20 feet thick, underlying the primary layer; (3) a huge mass of very dense ice, 8,200 feet thick, resting on a rock foundation.

Father Linehan's experiments constituted the first attempt to measure the depth of snow and ice at the Pole and to determine the underlying geological structure. To obtain his seismographic charts he detonated T.N.T. charges in a deep crater left by a tractor that had fallen from a U.S. supply plane in an intended parachute drop; it took 0.4 seconds for the sound-waves to reach the solid rock under the ice and to return to the seismographic recording equipment on the surface.

On Dec. 27, 1957, Commander Finn Ronne reported that exploratory flights from Ellsworth Base, followed by ground reconnaissance, had resulted in the discovery of a huge island off the Antarctic continent to the west of the Weddell Sea coast, below Cape Horn. On present maps this island was marked as the Filchner Ice Shelf, but it was in fact a true island with an area of about 200 miles by 180 miles, and a maximum inland elevation of 3,200 feet above sea-level.

American scientists at McMurdo Sound reported on Feb. 14, 1958, that aerial surveys had disclosed the existence of a great mountain range comparable to the Rockies, with peaks rising to 17,000 feet. The discovery was made in the eastern part of Marie Byrd Land, and some of the newly-discovered mountains were measured by U.S. scientists after a 1,100-mile trek by tractors. As the range runs parallel to the south coast of the Weddell Sea, it was conjectured that it might be an Antarctic extension of the Andes range, which runs the length of South America. It was pointed out that important geological similarities existed between the Andes and the newly-discovered range.

The lowest temperature ever recorded—102.1 degrees below zero (Fahrenheit)—was registered at the U.S. South Pole base on Sept. 19, 1957. Hitherto the official world minimum temperature was 90 degrees below zero, recorded at Verkhoyansk (eastern Siberia) in February 1892.

Admiral Dufek announced on Feb. 13, 1958, that three U.S. bases in the Antarctic were being discontinued—Little America, Ellsworth, and Wilkes, though Little America would continue to be used as a weather-reporting station, and a snow runway would be maintained there. The South Pole, Byrd, Hallett, and McMurdo Sound bases would continue to operate during 1958-59.

The McMurdo Sound airstrip, however, was hurriedly abandoned on Feb. 16 after the Ross Sea ice had broken up and threatened to flood the airstrip. The largest runway in Antarctica, it had been the principal staging-point for all U.S. air supply operations, and had been regularly used by planes flying to and from New Zealand. It was pointed out that the Scott Base runway was still protected by several miles of fast ice, and that planes could operate from the permanent Ross Ice Shelf if that runway was endangered.

Russian Expedition.

Important researches were carried out by a Soviet Expedition which established its main base at Mirny, on the coast of the Australian Antarctic Territory, and a number of other bases at considerable distances inland, including one at the "pole of inaccessibility"—that point of the Antarctic continent farthest from the sea. Led by Professor Mikhail Somov, it was the first Russian expedition to the Antarctic since Admiral Bellingshausen circumnavigated the continent in 1819-21, during the reign of Tsar Alexander I.

The expedition sailed from Kaliningrad on Nov. 30, 1955, in the 12,600-ton motorship *Ob* and the auxiliary ship *Lena*, both diesel electric vessels. The *Ob*, fitted out at Riga as a "floating laboratory," was equipped with hydro-chemical, hydro-biological, and micro-biological laboratories, and other research facilities of the most modern type. Both vessels carried tractors, aircraft, and large quantities of stores.

The Mirny base was established in January 1956, over 8,500 tons of stores being unloaded as well as scientific equipment for meteorological, gravimetric, geological, seismographical and glaciological studies. When completed, the base consisted of 18 prefabricated houses, a radio station, a large community centre, warehouses, and scientific buildings and laboratories, with a population of 92 scientists and research workers. Tractor journeys and reconnaissance flights were carried out in the interior, and a second base (Pionerskaya) was set up in May 1956 about 240 miles inland from Mirny. In addition, a research station (Oasis) was established on the coast 180 miles east of Mirny.

When the Mirny base had been set up, the *Ob* and *Lena* sailed for the Baltic in March 1956 and returned to Antarctica in November 1956, together with a third vessel, the m.v. *Ko-operatzia*. After landing a second party of scientists to relieve those who had already spent a year in the Antarctic, and a quantity of stores and equipment, the three ships returned to Riga in April 1957. On Oct. 8, 1957, a party of 27 Soviet explorers headed by M. Alexei Treshnikov set out from Mirny in six snow-tractors to set up a station in the area of the South Geo-magnetic Pole, about 870 miles inland. After establishing an intermediate base (Komsomolskaya), they successfully accomplished their objective on Dec. 17, when the Vostok (East) base was set up at the South Geo-magnetic Pole, about 790 miles from the South Pole. [The South Geo-magnetic Pole is not to be confused with the South Magnetic Pole, where a research station was established by the French Expedition—see below.] The Vostok and Komsomolskaya bases were supplied by *Ilyushin* transport planes based on an airstrip at Mirny.

Another 30-man party, with 10 tractors and 20 sledges, left Mirny in December 1957 to set up a research station at the "pole of inaccessibility," which is 400 miles from the South Pole. After a 1,250-mile journey across icy wastes previously unexplored, the objective was reached and a base (Sovietskaya) set up in latitude 78.24 deg. S., longitude 87.35 deg. E., at an altitude of over 12,000 feet. Thus was the first time an Antarctic party had reached the "pole of inaccessibility," which is situated in one of the remotest and least-known areas of Antarctica.

The Soviet scientists at Mirny and the other bases carried out a great deal of important research work, including measurements of the thickness of the ice shield, geological and geographical researches, and weather recordings, the results of which were communicated to the U.S., French, and Australian Expeditions. In addition, over 25,000 square miles of territory were mapped and charted in aerial surveys. During the ground surveys Russian explorers discovered an ice-free oasis, previously unknown, extending over 500 square kilometres in Queen Mary Land, on the eastern edge of the continent; scientists flown in by helicopter reported sparse vegetation of primitive type, mostly of the lichen variety.

Close co-operation was maintained between the Russian and American Expeditions, a U.S. scientist (Mr. Gordon Cartwright) spending the 1956-57 Antarctic winter at Mirny. Mr. Cartwright described the Soviet base as modern, well-equipped and comfortable, and paid tribute to the high quality of the scientific work carried out; he disclosed that the Russians had 40 pigs there "rooting away on eight tons of soil brought from Russia for an experimental garden." In January 1958 Mirny was visited by a party of 200 Americans from the U.S.S. *Burton Island*, a naval icebreaker; they were received with great cordiality and allowed to inspect every part of the research station and all scientific equipment. A *New York Times* correspondent accompanying the party said that the Russians were "very well advanced" in oceanography, meteorology, and glaciology, though in some other fields they appeared to be lagging behind the U.S. programmes; he added that "Mirny appears as well organized as Little America, the largest U.S. scientific station in the Antarctic."

French Expedition.

The French Expedition set up two bases in Adélie Land (French Antarctica)—one on the coast (Dumont d'Urville) and the second 300 miles inland at the South Magnetic Pole (Charcot). During the first Antarctic season (1955-56) the expedition was led by Captain Robert Guillard, and subsequently by M. Bertrand Imbert (in 1956-57) and Commander Gaston Rouillon (in 1957-58). M. Paul-Emile Victor, president of the *Comité antarctique français de l'année géophysique*, travelled out with the first party.

The expedition sailed from Rouen in November 1955 in the 600-ton Norwegian polar ship *Norsel*, which had been chartered for the purpose. She carried a party of 40 scientists, several hundred tons of supplies and scientific equipment, and snow-tractors equipped with caterpillar tracks. The *Norsel* arrived at Adélie Land on Jan. 2, 1956, and a temporary base was set up at Pointe-Géologie (on one of the offshore islands), where the expedition spent the first winter; during this period the French party constructed the first "railway" in the Antarctic, a 150-metre line used to transport 350 tons of stores from the *Norsel* to an improvised quay.

The Dumont d'Urville and Charcot bases were established in the following season (1956-57), and important magnetic, seismological and meteorological work carried out. Weather reports were relayed to Nouméa (New Caledonia) and also to the other expeditions operating in the Antarctic. Ice-boring tests at the Charcot base showed that the ice at the South Magnetic Pole was 9,000 feet thick.

Norwegian Expedition.

The Norwegian Expedition sailed from Oslo in November 1956 in two 600-ton sealers, the *Polarsirkel* and *Polarbjörn*, and established a base in January 1957 at Kap Norvegia, on the coast of Dronning (Queen) Maud Land—the Norwegian Antarctic territory, which is six times the size of Norway itself. The expedition was led by Hr. Sigurd Helle, of the Norwegian Polar Institute, and included Hr. John Giaever, leader of the Norwegian-British-Swedish Expedition of 1950-52 (see 12535 B).

The *Polarsirkel* and *Polarbjörn* carried several hundred tons of stores, tractors, 44 Greenland "huskies," and scientific equipment for a full programme of geo-magnetic, glaciological and meteorological studies. One of the principal objectives of the expedition (to be undertaken in the 1957-58 season) will be the exploration of a high mountain range in the interior of Queen Maud Land, and the establishment of a base in that area. The loftiest portion of this range has been seen on only one previous occasion—in 1939, when German flying-boats made a deep reconnaissance into the interior in an unsuccessful effort to establish a German claim to the region. [Norway proclaimed her sovereignty over Queen Maud Land only six days before the arrival of the German expedition in that year.] The only previous expedition to penetrate the interior of Queen Maud Land was the Norwegian-Swedish-British Expedition of 1950-52, which set up a base (Maudheim) about 240 miles west of the point which is the goal of the new Norwegian expedition.

Japanese Expedition.

A 50-man Japanese Expedition under Dr. Takesi Nagata sailed from Tokio in November 1956 in the *Soya Maru* (a converted coastguard ship of 2,200 tons), and the *Umitaka Maru* to establish a base on the coast of Prince Harald Land in the Norwegian Antarctic, about 600 miles west of the Australian base at Mawson. The Japanese base (Showa) was set up in January 1957, the two vessels subsequently returning to Tokio after unloading of stores and equipment had been completed. The last Japanese expedition to visit the Antarctic was in 1911-12, when Lieutenant Choku Shirase explored the Ross Sea area; his ship, the *Kainan Maru*, gave its name to Kainan Bay, the site of the present U.S. base of Little America.

Equipment taken by Dr. Nagata's party included four snow tractors, dog-teams, a light aircraft, two helicopters, prefabricated houses, and scientific apparatus for an extensive programme of research into cosmic rays, the ionosphere, terrestrial magnetism, the aurora, glaciology, seismography, and geological work. In addition to these studies, Japanese tractors and dog-teams penetrated over 120 miles inland and carried out geographical exploration in some of the most remote and little-known areas of the Antarctic continent.

Continuation of Antarctic Research.

The Special Committee on Antarctic Research (a body set up by the International Council of Scientific Unions, which is responsible for the I.G.Y. programmes) decided in principle on Feb. 5, 1958, that the scientific investigations in Antarctica should be continued for at least five years after the end of the International Geophysical Year. The decision was taken after a three-day meeting at The Hague, which is the headquarters of the special committee. It was also decided that three new meteorological stations should be set up in the Antarctic—on Bouvet Island, Heard Island, and Peter I Island respectively. (Times - Daily Telegraph - Manchester Guardian - New Zealand External Affairs Department - Australian News and Information Bureau - New York Times - New York Herald Tribune - Soviet Embassy Press Department, London - Le Monde, Paris - Aftenposten, Oslo)

A. PERSIA. — The Shah's Divorce from Queen Soraya. - Statement by Persian Court.

A statement was issued by the Persian court on March 14 announcing the divorce of the Shah Mohammed Reza Pahlevi and Queen Soraya. The Shah and Queen Soraya, who are childless, were married in 1951.

The announcement said that the Shah had been unanimously advised by a Council of Privy Councillors, including the Prime Minister (Dr. Eghbal), that the heir to the throne must be in direct descent from the Sovereign in order to "safeguard the interests of the nation and the future of the constitutional monarchy, and to avoid unrest and confusion." It was stated that the Shah had accepted this decision and agreed to a divorce from Queen Soraya "with deep sorrow," and that Queen Soraya had agreed to abide by the decision of the Shah, "disregarding her personal feelings and the bonds of affection between them, to preserve the high interests of the State."

Queen Soraya (26) is the daughter of a Persian nobleman (the present Ambassador to Western Germany) and a German mother. She issued the following private statement in Bonn, where she was staying with her father: "Since his Imperial Majesty has deemed it necessary that a successor to the throne must be of direct descent in the male line from generation to generation, I will, with deepest regret, sacrifice my own happiness in the interest of the future of the State and the welfare of the people, and declare my consent to a separation from his Imperial Majesty."

The Shah (who is 38) was married in 1939 to Princess Fawzia, the sister of King Farouk of Egypt; a daughter (Princess Shanaz) was born of the marriage but no male heir, and the marriage was dissolved in 1948. The Shah married Queen Soraya three years later.—(Times - Daily Telegraph)

(Prev. rep. 11306 G.)

A. UNITED KINGDOM. — £60,000,000 Expansion Programme for Universities. - University College for Sussex. - Leeds University Development Plan.

The Chancellor of the Exchequer (Mr. Heathcoat Amory) informed the House of Commons on Feb. 20 that he had authorized a provisional building programme for university expansion totalling £60,000,000 in the four years 1960-63. In addition, authorization had been given for an early start on a new University College of Sussex, to be built at Brighton.

Mr. Heathcoat Amory explained that the programme had been authorized on the recommendations of the University Grants Committee, but would be "subject to review if the economic situation changes substantially." The Government were satisfied that the current rate of university building programmes (£10,400,000 in 1957, £12,000,000 in 1958 and £12,000,000 in 1959) must not only be maintained but substantially increased if the nation was to get the extra graduates needed and thereby secure the full benefits of future advances in science and technology. Under the new building programme, it should be possible to achieve an increase to about 124,000 students by the middle 'sixties, with a possible temporary rise of ten per cent in the second half of the decade. At present about 43 per cent of all university students were studying Arts subjects, and it was expected that two-thirds of the expansion plan would be devoted to science and technology.

Plans for a university or university college in Sussex were first suggested before the First World War, and had been again revived in the past two or three years. Brighton Town Council has agreed to contribute £12,000 a year towards the scheme, and also to provide a site for the University College of Sussex in Stanmer Park, the former seat of the Earls of Chichester.

Details of a comprehensive scheme to develop the University of Leeds at a cost of over £6,000,000 were given on Jan. 30 by Mr. Edmund Williamson, the University's Bursar. Mr. Williamson said that new buildings would include the Houldsworth School of Applied Science, to cost £620,000; three new engineering buildings (£1,500,000); a Chemistry and Physics extension (£520,000); a new building for the Arts faculty (£720,000); and a residential centre for 600 men students at Weetwood, three miles from the city centre (£900,000). The Houldsworth building—named after the late Sir Hubert Houldsworth, former chairman of the National Coal Board and Pro-Chancellor of the University—would house three departments: of gas engineering and general fuel science; chemical engineering; and metallurgy. The development plan would be carried out in three stages, of which the last would begin in 1962.—(Times - Daily Telegraph)

B. FRANCE - INDIA. — Economic and Technical Co-operation Agreement.

Following negotiations which had started in 1956, an agreement on economic and technical co-operation between France and India was signed in Delhi on Jan. 23, 1958, by Mr. B. K. Nehru (Secretary to the Indian Ministry of Finance) and Count Ostrorog, the French Ambassador.

The agreement provided that the French Government would facilitate the financing of the manufacture and delivery by French suppliers of capital goods required for projects under the Second Indian Five-Year Plan up to a total of 25,000,000,000 French francs (about 280,000,000 rupees, or £21,000,000). Contracts would have to be approved by both Governments, and the credit terms would be negotiated separately in each case between the purchasers and suppliers. The credits would be on a medium-term basis and would bear interest at 6 per cent p.a. They would be used for the purchase of railway equipment, harbour construction, steelworks and coal-mining machinery, electric transmission lines, telecommunications material, ships, aircraft, and equipment for technical training centres, etc.

It was also provided that the French Government would make available to India a number of highly qualified technical experts, and would provide scholarships for Indian engineering students to study in France.

It was pointed out in the French Press that France had already taken an important part in the development of the Indian economy by building an electronics factory at Bangalore, contributing to the electrification of the Indian railways, etc.; in addition, India had bought a number of *Mystère* jet aircraft from France.—(Indian High Commissioner's Office, London - Le Monde, Paris) **(Prev. rep. 15428 C.)**

C. ARGENTINA. — New Foreign Minister.

Dr. Alejandro Ceballos, a surgeon, was appointed Foreign Minister on Jan. 31 in succession to Sr. Alfonso Laferrère, whose resignation had been announced on Jan. 13. The new Foreign Minister had been Federal Commissioner for the University of Buenos Aires. No reason was given for the resignation of his predecessor.—(New York Times)

(Prev. rep. 15733 A.)

D. GERMANY. — Influx of Refugees from Eastern Germany into Western Germany, 1949-57. - East German Measures against Clandestine Emigration.

The Federal Ministry for All-German Questions announced on Feb. 1 that the total number of refugees from Eastern Germany who had been admitted to Western Germany since 1949 was as follows over the nine-year period:

1949 ..	125,245	1952 ..	182,393	1955 ..	252,807
1950 ..	197,788	1953 ..	331,390	1956 ..	279,189
1951 ..	165,648	1954 ..	184,198	1957 ..	261,622

Grand total: 1,980,343

Legislation amending the East German penal code was approved by the *Volkskammer* on Dec. 11, 1957.

Among the changes in the penal law were the introduction of severe penalties for persons clandestinely leaving Eastern Germany, who would be punished in future by up to three years' forced labour and heavy fines. Penalties were also laid down for persons who induced or aided residents of Eastern Germany to leave the country without official authority. Any person encouraging young people or specialized workers to go to Western Germany would be liable to at least six months' imprisonment, while prison terms of unspecified duration were laid down for those who incited East Germans to go to Western Germany for the purpose of joining Western military organizations.

Of the nearly 2,000,000 East Germans fleeing to the West in the past nine years, a very high proportion were from the younger age-groups, including large numbers of workers in industry and agriculture. The loss of this labour potential, and its consequent serious effects on the East German economy, had been stressed on a number of occasions by East German spokesmen, and the above-mentioned legislation was regarded in Western Germany as a further attempt to halt the exodus.

A protest resolution against the East German legislation was adopted by the West German *Bundestag* on Dec. 12, 1957. (Frankfurter Allgemeine Zeitung) **(Prev. rep. 15416 C.)**

Corrigendum. The figure of 129,579 refugees from Eastern Germany who had entered the Federal Republic during 1957, quoted in report 15964 B, should have referred only to those entering West German territory through West Berlin. The total number of East German refugees entering Western Germany, both through West Berlin and at other border areas, was 261,622 as stated above. (Ed. K.C.A.)

E. ITALY. — Abolition of Licensed Prostitution.

After protracted debates in the Italian Parliament, extending over several years, a Bill for the abolition of licensed prostitution in Italy was passed by the Chamber of Deputies on Jan. 28, 1958, by secret ballot. It had been approved by the Senate three years earlier—on Jan. 21, 1955—and came into force with its publication in the *Gazzetta Ufficiale* on March 4.

The legislation—popularly known as the "Merlin law"—owed its inception to Senator Angelina Merlin (a Left-wing Socialist and former school-mistress), who had introduced a Bill to abolish prostitution as far back as 1948. It was approved by the Senate in 1949, subsequently dropped in the Chamber of Deputies, and re-adopted by the Senate in 1952. The general elections of 1953 occurred before action could be taken in the Chamber of Deputies, and Signora Merlin once more introduced the Bill in the new Parliament, where it was passed by the Senate in 1955 as stated above, and subsequently by the Chamber of Deputies.

The Bill provides for the closing-down of all brothels within six months; according to official data, some 560 establishments will be affected. Italy was the last country in Europe in which prostitution had remained legal, brothels being conducted under licence subject to heavy taxation.
(Giornale d'Italia, Rome - Corriere della Sera, Milan - Times)

F. NEW GUINEA. — Further Agreement on Dutch-Australian Co-operation.

A joint communiqué was issued in Canberra and The Hague on Feb. 27 announcing that it had been decided to take the following measures to extend the co-operation of the two countries in respect of New Guinea, in implementation of the Netherlands-Australian declaration of Nov. 6, 1957: (1) Dutch liaison officials would be stationed at Port Moresby and Australian liaison officials at Hollandia; (2) an official of the Netherlands Ministry of Overseas Affairs would be appointed attaché at the Embassy in Canberra, with special responsibility for New Guinea affairs; (3) in addition to the normal diplomatic consultations between the two Governments concerning New Guinea affairs, regular consultations would be held between officials of Netherlands and Australian New Guinea, and representatives of the Ministries of the two countries concerned with New Guinea policy.—(Australian News and Information Bureau - Netherlands News Agency)

(Prev. rep. 15865 C.)

A. CHINA. — Marshal Chen Yi appointed Foreign Minister. - Government Reorganization. - Dismissal of "Rightist" Ministers and Deputies. - "Rectification" Campaign amongst National Minorities.

The Chinese Premier, Mr. Chou En-lai, resigned on Feb. 11 from the post of Foreign Minister, which he had held since September 1949, and was succeeded by Marshal Chen Yi, a Deputy Premier. On the same day the National People's Congress approved a Government reorganization whereby several Ministries and Commissions were abolished or merged with others.

Marshal Chen Yi (57), the son of a magistrate, was converted to Communism while studying in France after the First World War, and joined the Communist Party in 1923. He held military commands in the Civil War of 1926-27, in the subsequent Communist uprisings against the Kuomintang Government, and in the war against Japan, winning a high reputation as a guerrilla leader; during the Communist campaign against the Nationalist forces he commanded the army which captured Nanking and Shanghai in 1949. He has been a member of the Communist Party's Central Committee since 1945 and of the Politburo since 1956, and a Deputy Premier since 1954.

Announcing the Government's reorganization proposals, Mr. Chou En-lai said that the 35 Ministries and Commissions established in 1954 had since increased to 48, and that reorganization was necessary in the light of the "rectification campaign" against "bureaucracy." It was accordingly proposed (*a*) that the National Construction Commission should be abolished and its work distributed among the State Planning and National Economic Commissions and the Ministry of Building; (*b*) that the Ministries of Electric Power and Water Conservancy, of Forestry and the Timber Industry, of Education and Higher Education, and of Light Industry and Food, should be merged; and (*c*) that the First and Second Ministries of Machine-building and the Ministry of the Electrical Equipment Industry should be merged into the First Ministry of Machine-building, whilst the Third Ministry of Machine-building should be renamed the Second Ministry of Machine-building.

The following appointments were proposed by the Government and approved by the National People's Comgress in this connexion:

Mr. Fu Tso-yi (formerly Minister of Water Conservancy) as Minister of Conservancy and Power.
Mr. Yang Hsiu-feng (formerly Minister of Higher Education) as Minister of Education.
Mr. Chang Hsi-jo (formerly Minister of Education) as chairman of the Commission for Cultural Relations with Foreign Countries.
Mr. Tsao Erh-lu (formerly Second Minister of Machine Building) as First Minister of Machine Building.
Mr. Yu Chiu-i as Minister of the Petroleum Industry.
Mr. Yang Yi-chun as Second Minister of Commerce, the new name of the former Ministry of Urban Services.
Mr. Wang Shou-tao (a veteran Communist and member of the party's Central Committee) as Minister of Communications.
Mr. Sha Chien-lin (a member of the Democratic League, and hitherto Minister of Light Industry) as Minister of Food.
Mr. Li Chu-chen as Minister of Light Industry.
Mr. Liang Hsi as Minister of Forestry.

Six Communist Ministers were relieved of their posts—Mr. Wang Ho-shou (chairman of the now abolished National Construction Commission); Mr. Lai Chi-ka (Minister of the Building Industry); Mr. Liu Lan-po (Minister of Electric Power); Mr. Huang Chen (First Minister of Machine-building); Mr. Li Chu-kuei (Minister of the Petroleum Industry); and Mr. Wan Li (Minister of Urban Services).

Three non-Communist Ministers—Mr. Chang Po-chun (Communications), Dr. Lo Lung-chi (Timber Industry), and Mr. Chang Nai-chi (Food), who had been under attack as "rightists" since June 1957—were removed from their posts on Jan. 31, 1958.

Chang Po-chun, head of the Peasants' and Workers' Party (one of the minor parties allied with the Communists), had advocated a bicameral legislative system modelled on the lines of the Western democracies, whilst Dr. Lo Lung-chi, like Mr. Chang Po-chun, had criticized the Communist Party for monopolizing State affairs. Because of his "rightist" attitude and "bourgeois leanings" Mr. Chang Po-chun had previously (in November 1957) been dismissed as director of the *Kwangming Daily* (the organ of the minor parties), together with the paper's chief editor (Chu An-ping). Mr. Chang Nai-chi was vice-chairman of the Democratic National Construction Association, a small party founded by industrial, commercial and intellectual circles in 1954.

The National People's Congress approved on Feb. 3 a proposal by its credentials committee to expel 38 deputies accused of "rightism." In addition to the three Ministers dismissed on Jan. 31, they included General Lung Yun (a member of the Kuomintang Revolutionary Committee, who was also deprived of his post as a vice-chairman of the National Defence Council), Miss Ting Ling (the well-known novelist, whose expulsion from the Communist Party and the Writers' Association had been reported on Jan. 8), and Miss Hsieh Hsueh-hung (leader of the uprising in Formosa in 1949 against the Kuomintang régime). Sixteen other deputies had previously been deprived of their mandates by local congresses.

The fact that seven months had elapsed between the opening of the campaign against the "rightist" Ministers and deputies and the action taken against them was regarded as evidence of a division of opinion inside the Communist Party leadership; President Mao Tse-tung in particular was believed to have strongly supported a lenient policy. According to Reuter reports from Peking, Communist officials stated that the "rightists" would be banished to rural areas, but might be allowed to return to public life after "confessing their errors."

The purge of "rightists" had meanwhile proceeded in a number of provinces.

The Hunan Provincial Congress dismissed the Vice-Governor of the province, Mr. Cheng Hsin-ling, at the end of December, and deprived four deputies to the National People's Congress of their mandates, including Professor Tseng Chao-lun (a noted chemist), Deputy Minister of Higher Education. Earlier the same month a conference of the Chekiang Communist Party expelled Mr. Sha Wen-han, the Governor of the province, and three of his senior officials, and recommended their dismissal from their posts.

In an article published at the beginning of February, Mr. Lo Jui-ch'ing (Minister of Public Security) stated that over 100,000 "rightists and counter-revolutionaries" had been arrested during the past two years, including persons holding important Communist Party and administrative posts, and 3,000 members of the Communist Youth League. In addition, over 3,600 active agents had been arrested and the political histories of 1,770,000 people investigated between June 1955 and October 1957.

Mr. Liu Ke-ping, chairman of the Committee of Nationalities of the National People's Congress, announced on Jan. 17 that the Government had decided to launch a "rectification campaign" among the national minorities in view of "the dangerous nature and seriousness of separatist activities." He stated that separatist ideas were harboured mainly by young intellectuals among the Mongols, the Huis (a Moslem community of about 3,500,000 people, living in Kansu and other provinces of N.W. China), the Uighurs of Sinkiang (N.W. China), and the Koreans in Manchuria, and were supported by some Communist Party members, including "high-ranking cadres."—(Times - Manchester Guardian - New York Times) **(Prev. rep. 15839 A.)**

B. AUSTRALIA - UNITED KINGDOM. — Reciprocal Agreement on Social Security.

A reciprocal Anglo-Australian agreement on social security was signed in Canberra on Jan. 28 by Mr. Menzies and Mr. Macmillan, who was then visiting Australia during his six-weeks' tour of Commonwealth countries (see 16041 A). Its provisions were announced by the Australian Minister for Social Services (Mr. Roberton) as follows:

(1) British migrants would be able to receive Australian old-age, invalidity, widowhood, sickness, and unemployment benefits on the same residential basis as Australians, as well as the same family allowances. [Hitherto British immigrants received these benefits in Australia at reduced rates because of residential qualifications, but in future their residence in the U.K. will be taken into account as if it had been residence in Australia.]
(2) Persons receiving British pensions at reduced rates would be entitled to an automatic increase in their Australian pensions, ranging up to 33s. 6d. a week.
(3) Permanent incapacity for work or blindness occurring in the United Kingdom would be accepted as having occurred in Australia for the purpose of invalidity pensions.
(4) Present arrangements for paying Australian old-age and widows' pensions during temporary visits to the United Kingdom would be extended to include invalidity pensions.
(5) Australian child endowment and U.K. family allowances would be paid for periods of travel between the two countries, even when families intended to settle permanently in the country to which they were going; payment would be made by the country they were leaving.

In a joint statement, Mr. Macmillan and Mr. Menzies said that both Governments "recognize residence in one country as being equivalent to residence in the other for the purpose of qualifying for social benefits"; they added that "the people of the United Kingdom and Australia will now be able to move freely from one country to another without sacrificing rights they have acquired to benefits and pensions."

The agreement comes into force on April 1, 1958, and replaces an earlier agreement signed in 1953.—(Australian News and Information Bureau) **(Prev. rep. 12967 F; 12776 B.)**

A. UNITED KINGDOM - UNITED STATES. — Agreement on Supply of U.S. Ballistic Missiles to Britain. - Statement by Mr. Sandys. - House of Commons Debate.

An agreement for the supply of U.S. ballistic missiles to the United Kingdom was signed in Washington on Feb. 22 by Mr. Christian A. Herter, U.S. Under-Secretary of State, and Sir Harold Caccia, the British Ambassador. The agreement—in the form of a Note exchange and an accompanying memorandum—was published in London and Washington on Feb. 24, the text of the memorandum being as follows :

" (1) The Government of the United States shall supply to the Government of the United Kingdom an agreed number of intermediate-range ballistic missiles and their related specialized equipment, and make available training assistance in order to facilitate the deployment by the U.K. Government of the said missiles. The missiles shall be located only in the United Kingdom at such sites and under such conditions as may be agreed upon between the two Governments.

(2) The U.K. Government shall provide the sites and supporting facilities required for the deployment of the missiles.

(3) Ownership of the missiles and related equipment shall pass to the U.K. Government under established U.S. Mutual Assistance Programme procedures as soon as the U.K. Government is in a position to man and operate the missiles.

(4) The missiles will be manned and operated by U.K. personnel, who will be trained by the U.S. Government for the purposes of this project at the earliest feasible date.

(5) For the purposes of this Agreement, training and test-firing of missiles will normally take place on U.S. ranges, but by agreement with the U.S. Government the U.K. Government may arrange with the Government of Australia for missiles to be test-fired on the Woomera Range.

(6) Material, equipment, and training provided by the U.S. to the U.K. Government . . . will be furnished pursuant to the U.S. Mutual Security Act of 1954, as amended, acts amendatory or supplementary thereto, appropriations acts thereunder, or any other applicable U.S. legislative provisions.

(7) The decision to launch these missiles will be a matter for joint decision by the two Governments. Any such joint decision will be made in the light of the circumstances at the time and having regard to the undertaking the two Governments have assumed in Article 5 of the North Atlantic Treaty.

(8) References to intermediate-range ballistic missiles in this Agreement do not include the nuclear warheads for such missiles. The U.S. Government shall provide nuclear warheads for the missiles transferred to the U.K. Government pursuant to this Agreement. All nuclear warheads so provided shall remain in full U S. ownership, custody, and control in accordance with U.S. law.

(9) The arrangements recorded herein are made in consonance with the North Atlantic Treaty and in pursuance of the Mutual Defence Assistance Agreement between the United Kingdom and the United States, signed January 27, 1950 . . . and are subject to the applicable provisions thereof.

(10) This Agreement shall be subject to revision by agreement between the two Governments and shall remain in force for not less than five years from the date of the Agreement, but may thereafter be terminated by either Government upon six months' notice."

Statements by Mr. Sandys.

Mr. Duncan Sandys, the U.K. Minister of Defence, made a statement on the agreement to the House of Commons on the same day (Feb. 24).

After pointing out that the new agreement represented the implementation of the agreement in principle reached by President Eisenhower and Mr. Macmillan at the Bermuda conference, **Mr. Sandys** went on : " The missiles will be manned and operated by units of the Royal Air Force. The agreement provides that the missiles shall not be launched except by a joint positive decision of both Governments. The nuclear warheads will remain in American custody and will be kept in an unarmed condition so that there can be no risk of a nuclear explosion ; and the weapon is designed in such a way that it would be impossible for it to be launched accidentally.

" The United States will supply the missiles and specialized equipment at their expense, and will also pay for the training of British personnel in America. Britain will meet the cost of providing and constructing the sites and supplying certain items of equipment. The British share of this expenditure is estimated at about £10,000,000.

" The missiles will be deployed in small numbers on dispersed sites, mostly on active or disused R.A.F. airfields. These sites will be mainly in East Anglia, Lincolnshire, and Yorkshire. It would obviously not be in the public interest to disclose the number of missiles, or the number of sites, or their precise location."

Mr. George Brown (Lab.) asked the following questions : (1) Did the paragraph relating to the manning and operating by units of the R.A.F. mean that no missile sites would be constructed in Britain until those units had been trained in America to operate them ?

(2) Did it mean that there would be no sites operated by the Americans while those units were being trained ?

(3) How would the joint positive decision by both Governments be carried out ? In particular, could the Minister confirm that these sites, unlike others in Europe, would not be under the control of the Supreme Allied Commander, Europe ?

(4) Was it proposed to make British nuclear warheads to fit the missiles if the McMahon Act was not amended ; if so, would Britain have complete control, instead of a shared control, over what would be part of the nation's deterrent force ?

(5) Did the statement that the British share of the expenditure was estimated at about £10,000,000 mean that the entire British cost was £10,000,000 ? Could the Minister give an assurance that this was the limit of the British investment ?

Mr. Sandys, in reply, said that the British share of the total Anglo-American expenditure was estimated at £10,000,000. The U.S. Government had not asked for any facilities to deploy missiles of their own, or to man missiles in Britain. There would be special arrangements for ensuring that there would be rapid consultation about the joint decision, but he did not think the House would expect him to go into detail. The missiles would be assigned to R.A.F. Bomber Command, whose operational plans were being co-ordinated with those of the U.S. Strategic Air Force. Those plans already took account of the Supreme Commander's needs in Europe. " We are not planning development of a British warhead for the *Thor* rocket," Mr. Sandys added. " We are concentrating our efforts on developing a British rocket of a more advanced type."

Mr. Chetwynd (Lab.) asked whether the decision to use the bases would be political or military, and at what level the final decision would be taken.

Mr. Sandys replied : " The decision will be taken in the same manner as the arrangements for taking decisions under the Attlee-Truman agreement. It will require a joint positive decision of both Governments—I emphasize Governments, not military commanders."

In reply to **Vice-Admiral Hughes-Hallett** (C.), who asked to what extent the NATO Powers had been associated with or informed of the agreement, **Mr. Sandys** said that the Permanent Council of NATO had been fully informed. Answering a question by **Mr. Beswick** (Lab) about the rocket sites, **Mr. Sandys** said that these would have nothing to do with U.S. Air Force stations and that the sites would be mostly on R.A.F. stations, either active or disused. When **Sir John Smyth** (C.) asked whether the rockets would be test-fired in Britain, **Mr. Sandys** replied · " There is no question of these rockets being launched in Britain unless war occurs. There is no question of testing them here. The agreement specifically requires that they will be tested on American testing-grounds. We have made a special provision in the agreement that, if it is desirable, we will test them on the Woomera range."

Mr. Brown then asked whether, as the *Thor* rocket had not been successfully tested, it was intended to have a further testing at Woomera before they came to Britain. He asked for an assurance that it was not intended to proceed with the physical establishment of the missile bases until after " summit " talks had been held.

Mr. Sandys said that the weapon was in the final stages, and unless the Government had been confident that it would work they would not have made the agreement. He added : " On the other point, which is wider and political, until there is an agreement on disarmament the free world must continue to maintain the balance of power. There is absolutely no reason to suppose . . . that the Russians are holding up their rocket plans. I am sure they would be very surprised if we were to hold up ours."

A further statement was made by Mr. Sandys at a press conference later the same day.

Mr. Sandys said that there could be no accidental nuclear explosion at a *Thor* missile site, but if there was a fire at the site the main risk would be from the detonation of a certain amount of ordinary high explosive. Such an explosion would be most unlikely to have any effect outside the circumference of the airfield. In the unlikely event of such a detonation there might also be some danger of radioactive contamination, which would be localized and could be dealt with by simple decontamination procedures. The nuclear warheads would be maintained in an unarmed condition, and the arming process would not begin until the missile had actually been launched. It would not be completed until the later stages of the missile's flight. If a missile went off course, there were arrangements for destroying it in the air.

The Minister also said that it would take a number of months to train the British crews who would man the sites. Part of the training could be carried out in Britain, but the specialized technical training would be provided in the United States. Work had not yet started on the construction of the sites, but it would begin soon.

Mr. Sandys emphasized that there was no provision in the agreement for the manning of missiles and sites in Britain by the American forces, either as an interim measure until the British crews were trained, or as part of the American strategic deterrent stationed in the United Kingdom.

House of Commons Debate.

A two-day debate on the Government's Defence White Paper was opened in the House of Commons on Feb. 26 by Mr. Sandys.

Mr. Sandys referred to the " amount of space and emphasis given to disarmament " in the White Paper, and continued : " As Minister of Defence, there is nothing I wish for more ardently than world disarmament. When I speak of disarmament I mean comprehensive, thorough-going disarmament, right down to the level needed for internal security purposes only. The White Paper makes it clear that this would eventually involve supervision and control by a world authority. I believe that nothing less than that must be our ultimate objective.

"We want summit talks, and we want them to succeed. I sincerely hope that it may be possible to make some serious headway in the months ahead with discussions on disarmament. I base that hope on the simple fact that disarmament is so obviously just as much in the interests of Russia and every other country as it is in ours. The main difficulty about negotiations is that—unhappily—each side distrusts the intentions of the other.

"Since the whole process of disarmament obviously cannot be carried through all at once, it is essential to maintain the balance of military power at each stage. It is not at all a simple matter to equate a reduction in nuclear power with a reduction in conventional forces, but somehow or other we have to find a way of doing it. I have no doubt that some risks will have to be taken on both sides.

"I have spoken first about disarmament because, although this is a Defence debate, we all know that the only ultimately satisfactory solution of the problem of defence is to make it superfluous. Until we can achieve agreed all-round disarmament—and I can assure the House that the Government will work flat out for it—we cannot afford to lower our guard. Nothing would more prejudice the prospects of world disarmament than for the West to disarm unilaterally in advance of an agreement."

After saying that the White Paper was "essentially in the nature of a progress report on the Government's defence policy outlined last year," Mr. Sandys maintained that the developments of the past 12 months in the economic and military spheres had fully justified the principles upon which last year's White Paper were based.

On the Government's policy of nuclear defence the Minister spoke as follows:

"The strength of NATO rests ultimately upon the nuclear deterrent. It has been pointed out that the nuclear deterrent does not itself provide protection. It depends equally upon maintaining strong forces on the ground along the whole of the front from Norway to the Caucasus. It is essential that the NATO front in Europe should be firmly held. At the same time it is important not to allow our flank to be turned in the Middle East or Far East That is why we are making contributions to the defence system of the Baghdad Pact and the South-East Asia alliance. Britain is the only country to be a member of all three alliances If sometimes our allies on the Continent think we are not playing a full part in NATO, I hope they will remember that we also provide substantial forces to help defend freedom in other parts of the world."

The Opposition (Mr. Sandys continued) wanted the physical preparation of the missile bases in Britain to be held up until after the summit talks. The Government understood and respected the motives which inspired the proposals, but did not feel that a gesture of this kind would have any practical effect. It was clear from Mr. Khrushchev's speeches that the Russians were going ahead with their own rocket plans, and they would be very surprised if the West were to hold up theirs. In fact they might misinterpret it as a sign of weakness.

Some people had been "surprised and even shocked" by the statement in the White Paper that if the Russians were to launch a major attack against the West, even with conventional forces only, the West would have to hit back with strategic nuclear weapons. But however much the idea might be disliked it was, in fact, the position, and there was nothing new about it. It was the accepted and well-established strategy of NATO, and the method by which peace had been preserved during the past decade. Unless it was possible to get an agreement on disarmament, there was at present no alternative to it. "If there has been any doubt about this," said Mr. Sandys, "it is just as well it should be removed. It is generally agreed that if the Kaiser and Hitler had known clearly in advance what would be the reactions to their aggression, two bloody World Wars could have been avoided."

Continuing, Mr. Sandys emphasized that the West would never start a war against Russia. It was equally obvious that no-one with any sense would think of launching a nuclear counter-offensive to deal with some minor aggression, or—as *The Times* had described it—"accidental border incidents." If, on the other hand, the Russians, with their incomparably larger conventional forces, were to launch an all-out conventional attack, the Western allies would have the choice of striking back with nuclear weapons or submitting to defeat and occupation. It was inconceivable that the free peoples would meekly surrender their liberties without a fight, whatever the consequences.

It might be argued that although what had been said in the White Paper was perfectly true, it was not helpful just when it was hoped to reopen negotiations on disarmament. But it was not only helpful but necessary, as they would get nowhere in negotiations if they shrunk from basic issues. The objective must be to work out with the Russians a programme of disarmament by stages. To do that, it was necessary to start by recognizing frankly the realities of the military position on both sides. These were the overwhelming Russian superiority in conventional forces, and the reliance of the West on the nuclear deterrent. He had had a number of talks with Mr. Khrushchev, who was the last person in the world to resent or to be put off by plain speaking.

In the event of a full-scale conventional attack against the West, he [Mr. Sandys] had said that the only alternative to using nuclear weapons would be to surrender. But there was a third course. It was for Britain and her allies to expand their conventional forces to the extent necessary to resist an all-out conventional attack. There was no practical reason why they could not do this. Their combined populations were larger and their industrial resources were greater. But it would entail a stupendous increase in the demands of defence on manpower, money, and industry. Britain might have to maintain between 1,000,000 and 1,500,000 men in the armed forces, and spend perhaps £1,000,000,000 more a year on the Defence budget.

Pending some agreement on disarmament, defence must go on, Mr. Sandys concluded. He thought, however, the House would agree that the more they studied the various "ugly choices," the more they must be impressed with the aim of bringing about disarmament —"comprehensive and balanced disarmament, not of course unilateral disarmament." Mr. Sandys added: "We do not seek it because we are weak or frightened—in fact the strength of the West is increasing. We seek it because in the long run it is the only solution which makes sense; the only road to real peace and economic progress for mankind."

Mr. George Brown (Lab.) moved an Opposition amendment that "this House declines to approve a defence policy which relies predominantly upon the threat of thermo-nuclear warfare, insists on the installation of strategic rocket bases in Britain before the projected summit talks, and fails to provide effectively for Britain's defence requirement."

Mr. Brown said that what was shocking people outside was that Mr. Sandys seemed to have no other idea for dealing with any conflict —other than the smallest border incident—except the thermo-nuclear weapon. "The louder you shout that in any circumstances we will reply with a weapon of mass suicide--which means, in fact, obliterating London—the more unlikely it is that you are going to be believed." The would-be aggressor was going to say "I do not believe they would" and "I do not believe they could." It was turning a deterrent into an incentive—if they chose their ground right. This "unselective, apparently not-thought-out attempt to blanket defence problems with assertions" seemed a very grave disservice.

The Government were avoiding a decision about weapons, and were "turning the weapon of deterrence, which was only a weapon so long as it was not used, into a weapon that would be used early in the proceedings." The Labour Party accepted the deterrent, but did not bind themselves "so to arrange the defence forces that it would be used early in the chain reaction." The Prime Minister had said that the nuclear deterrent would not be used in a border incident; this meant that it would be used in all other cases.

Mr. Macmillan intervened: "I said that if it was a case of mobilization of large forces, of 200 divisions, of an all-out attack on Europe, or the bombing of London, then that would be a case where I think the deterrent would have to be used." When **Mr. Brown** replied that that was not what the Minister had said in the White Paper, **Mr. Macmillan** retorted that he meant the bombing of London with conventional bombs. The Labour Party had said the deterrent would not be used in minor cases; the White Paper said it would be used in major cases. It would seem that the opposite of minor was "major" or "massive."

Mr. Brown replied that this was not the case; "there were lots of possibilities in between." The Labour Party were not running away from their acceptance of the deterrent in an all-out global war. The Government had written a White Paper which everyone outside had taken to mean would involve the use of the ultimate deterrent in anything but a border incident. He understood that the thermo-nuclear weapon would not be used in, for example, a conflict in Central Europe or the Middle East which was "neither border, nor major, nor direct." What, he asked, would the Government use in such cases?

Mr. Sandys said that it was misleading the House to suggest that anyone on behalf of the Government had said that they intended to use massive nuclear retaliation for anything which was more than a border incident. No-one had ever said that. They had made absolutely clear that if there was a major full-scale attack, even with conventional forces, nuclear retaliation would be necessary, but that small incidents would not involve that. There was an area in between, but he was not going to enter into speculation or definition.

Mr. Sydney Silverman (Lab.) asked Mr. Brown to "correct the impression," created by his speech, that the Opposition had accepted the nuclear weapon as a make-weight to make good the deficiency in conventional forces. The last Labour Party conference, he added, had unanimously accepted a resolution which committed the party to a policy of dispensing with nuclear weapons if international agreement to dispense with them could be obtained, whether or not such an agreement was linked with other forms of disarmament.

Mr. Brown replied that he and Mr. Silverman had "better look at that resolution again." He then went on to say that if tactical atomic weapons or large-scale forces were not provided—and the Government was doing neither—then there was nothing with which to meet the "in-between" area.

Referring to the setting-up of missile bases, Mr. Brown said—speaking for himself—that he considered the H-bombers right and therefore could not say that the missiles were wrong. But that did not mean that it was inevitable to have them, or that this was the right time to begin building missile sites. The Prime Minister had said that he desperately wanted the Summit talks to be a success. If he hoped to get some kind of agreement to start a movement towards disarmament, why choose this moment to instal the rockets? It was absurd to "poison the atmosphere still further" in advance of summit talks and to create suspicion of Britain's motives. Nothing would be lost by waiting.

The "grave charge" against the White Paper (Mr. Brown concluded) was that "by its apparent concentration on the thermo-nuclear strategic ultimate deterrent, it presented a defence policy which seemed to offer people little hope."

Sir Fitzroy Maclean (C.) said that in preparing for an "all-out" war it might be found that Britain had under-prepared for a continuation of the "cold" war. There was a danger that the strength of the conventional forces, particularly of the Army, might be allowed to run down. Mr. Sandys had "nailed his colours rather too firmly to the mast of voluntary recruitment," but while nobody wanted to see conscription retained, it might be the only way to get the numbers to fight a "cold" war.

Mr. Victor Yates (Lab.) said the Government's present policy was "poisoning the prospects of peace." While supporting the Opposition amendment, he thought it did not go far enough. He was not in favour of missile bases in Britain either before or after Summit talks.

Among other Members, **Sir Peter Macdonald** (C.) thought that the Minister was taking a "very serious risk" in scrapping conventional weapons, some of them very advanced, before he had the nuclear weapons to take their place. **Mr. George Wigg** (Lab.) asked that "the nonsense of spending £300,000,000 on the thermo-nuclear deterrent" should be given up, as it was "useless" and "deceived no-one but ourselves." **Mr. Mellish** (Lab.) said that complete stalemate had been reached between Russia, the U.S.A., and Britain, who all had the "ultimate deterrent," and it was now the time for Britain to set an example. "But," he added, "if all attempts at negotiations with the Russians fail, I hope members of my own party will get up and attack the Russians. I cannot take much longer the view that anything we do is wrong and whatever the Russians do is right."

Mr. Aubrey Jones (Minister of Supply) said that half the technological resources of the Western alliance were on this side of the Atlantic, and over the past 10 years the two halves had not been hitched together to the common purpose. The Government sought not only closer co-operation with the Americans but also with the West European countries, and the scope for co-operation with the latter was certainly as great as with America. Countries should get together at the outset to determine weapon requirements and then allocate or share them out. The great obstacle to overcome was the affront to national pride caused by inter-dependence.

It was economical (Mr. Jones continued) to extend the life of the V-bomber as long as possible, but even when equipped with the propelled bomb, these aircraft were vulnerable to long-range interceptors and to long-range surface-to-air missiles. In some aspects of technology the Russians were ahead of the West, and it was prudent to presume that the vulnerability of the V-bomber would come far sooner than was thought. It ought not to be presumed that their invulnerability would be as long as had been thought six months earlier.

Mr. Brown was making a great mistake if he thought that at the first effort one could reach perfection in such things as the *Thor* missile. There were many improvements to be made to it; that was the main reason why Britain was developing her own missile. There was a geographical reason for undertaking this, as well as an industrial reason and a political reason. The Government would welcome the development of the missile as a joint project with any European country which cared to join in.

Mr. Geoffrey de Freitas (Lab.), speaking in the resumed debate on Feb. 27, supported the argument that the Government's decision on missile bases was politically and militarily wrong and that nothing should be done which might jeopardize the success of the coming summit talks with Russia. As regards the *Thor* missile, he said that of all the Servicemen, scientists, and others with whom he had talked, not one had a good word to say for it. Tests had shown that it could not be trusted to go off when it was meant to, and that the liquid propellant was "highly temperamental." Should not the Government wait for the development of a solid fuel rocket, or for something that could be launched from underground or in the air?

After criticizing the Government for its "out-of-date" attitude to Civil Defence and its "lack of decision," Mr. de Freitas asserted that the concept of a strategic reserve able to move anywhere at any time was "a complete myth" because of lack of modern transport. Referring to the Soviet propaganda, he declared: "One of its successes has been in this country, where there is about to be a wave of pacifism or neutralism. The Government has encouraged this wave, not deliberately but by confusing and frightening the public . . . Our people will not support any Government in a defence policy they do not understand."

Mr. George Ward (Secretary of State for Air) said that the Labour Party agreed there should be a British contribution to the nuclear deterrent but argued that Government policy relied too much on it. The Liberal Party believed that there should be a deterrent, but only an American one. The third school of thought believed that nuclear weapons should be banned altogether in advance of any comprehensive disarmament agreement.

On the Liberal point of view, he commented: "It is not easy to understand how one could renounce the H-bomb on high moral grounds and at the same time shelter behind the Americans, relying on that very weapon for prevention of another global war. To their credit, the Labour Party has rejected this thesis."

Continuing, Mr. Ward said that if it were Government policy to ban nuclear weapons in advance of a comprehensive disarmament agreement, then the defence of the West could rest only on conventional forces. The Russians' 200 divisions could be doubled on mobilization, and they had 500 modern submarines compared with the maximum of 235 deployed by the Germans at the height of the last war. Even if we could match the Russian strength, and Fighter Command had four or five times the strength now planned, it would be unwise to believe that we should be freed from the fear of nuclear attack. Mr. Ward added: "If the Russians found themselves losing a war fought only with conventional weapons, does anyone really believe they would hesitate to use nuclear weapons to avoid defeat?"

Replying to the criticism of the *Thor*, Mr. Ward said that doubts had been cast on its operational performance, but British scientists had been in close consultation with their American counterparts and were kept in close touch with the progress of its development and trials. The Government were satisfied that the *Thor* would be an efficient weapon, and would not have accepted it if they had thought otherwise.

As regards the missile sites, Mr. Ward said it was understandable that people should be apprehensive, but emphasized that these widely-dispersed sites would be much more difficult targets than strategic bomber bases. There was no question of launching rockets or test-fired motors in peace-time, and there would be less danger in living near missile sites than in living near an airfield. There was also no risk of a nuclear explosion caused by an accident, even if there were some other kind of explosion, which was extremely unlikely. The missiles were in the final stages of development, and their deployment would take place after technical representatives were agreed on their performance.

In conclusion, Mr. Ward stated that the Government had never intended these rockets to be an element of independent British power. That would come later with Britain's own rockets.

Mr. Shinwell (Minister of Defence in the Labour Government) said that he had "not yet reached the stage of being able to interpret with clarity what was called the unofficial defence policy of the Labour Party." He thought that the difference between the official defence policy of the Labour Party and the defence policy of the Government was less acute than the differences on defence within the Labour Party itself. Much of these differences arose from the propaganda of unofficial people outside the House—"superannuated philosophers like Bertrand Russell" and "that famous playwright J. B. Priestley, who undoubtedly has made a contribution to national culture, but in the sphere of politics is about as woolly as any person I have known since the days of Ramsay MacDonald . . ."

Mr. Shinwell said that there was general agreement on all sides with a declaration made by the Prime Minister [in a foreign affairs debate] that he desired a Summit conference, disarmament, and peace. If he [Mr. Shinwell] believed that the renunciation of nuclear weapons would promote peace, he would gladly support it. But the quarrel, if there was one, was between the most powerful Communist nation in the world, Soviet Russia, and the most powerful capitalist nation in the world, the United States. Should that quarrel lead to a major conflict, Britain, whether she liked it or not, would inevitably be involved—"whether with conventional weapons, nuclear weapons, or none at all."

"There is no escape," Mr. Shinwell declared. "The choice is either to build up a defence mechanism, for what it is worth, having regard to Britain's limited financial position, or to rely entirely and exclusively on the U.S.A. in the event of global conflict. It is impossible to build up conventional forces and employ conventional strategy capable of dealing with the Russians. What is the use of denying that we have got to rely on the military power of the United States." After saying that there had been far too much denigration of Britain on both sides of the House, Mr. Shinwell declared: "We are a great Power. But we have not got as much as we should like simply because we cannot afford it. We have to accept the Anglo-American alliance and to do everything we can to prevent an emergency."

Recalling that some Labour Members had said that it would be an unfriendly act to station missiles in Britain before a Summit conference, Mr. Shinwell declared: "What nonsense! Let us be realistic about the whole position. The Russians have everything. They have just had another nuclear test equal to a million tons of T.N.T." He could not understand those Opposition members who had suggested that it was part of the official Labour Party policy to oppose the construction of missile bases in Britain. He would like to know when that decision had been reached, and how it had been injected into official policy.

In conclusion, Mr. Shinwell made three proposals. First he urged that the Government should follow a strong policy in co-ordinating the Service departments, and "incidentally cut out the Ministry of Defence." Second, he asked, in view of the Government's declared anxiety to have a Summit meeting, whether it would not be possible for the Government to enter into consultation with the Opposition from time to time on matters of defence. He did not mean a Council of State or a coalition, but that the Minister of Defence should approach the Opposition and talk these things over from time to time. He would even go further and advocate a Standing Committee from both sides of the House to analyse defence problems in the interests of the country, and to "keep defence out of politics." Third, he urged the Prime Minister to expedite "with all his undoubted courage" a meeting with the Russians—adding that though he (Mr. Shinwell) was not too optimistic about the result, "it is far better to go on talking than to fight."

Mr. Nigel Birch (C.), after paying tribute to Mr. Shinwell for "a very patriotic speech," said that "what Britain needed to keep her end up" was good conventional weapons and a viable economy, with the ability to lend and invest in the Commonwealth and throughout the world. That, however, would depend on a valid, effective deterrent being in Western hands.

The **Rev. Llywelyn Williams** (Lab) said that he had no illusions about Russia or Communism, but he refused to continue thinking in terms of Russia as a Power which sooner or later would wage an aggressive war. He did not underestimate the terrible consequences of a Russian occupation of Britain, but thought that that would be better than an island completely ruined and devastated beyond repair. **Mr. George Thomas** (Lab.) thought that the Labour Party should give a unilateral lead on the missile bases, though conceding that he was out of step with many other Labour M.P.s on this matter. **Brigadier Prior-Palmer** (C.) said that Mr. Thomas was "flying in the face of history."

Mr. Richard Crossman (Lab.) said that there was no Western deterrent but only an American deterrent; those who were saying that Britain should not live under its shelter ignored the fact that she had been doing so for ten years. If Britain wanted to influence Washington by her military strength, it was "insane to have 240 V-bombers and 35½ H-bombs." Two efficient divisions, capable of rapid movement anywhere in the world, would influence the Americans far more, and would count for much more than the "bogus pretence of being a nuclear Power." The biggest single contribution Britain could make to peace would be to prevent anyone else joining the "nuclear club."

Mr. John Strachey (Secretary for War in the Labour Government) wound up for the Opposition. He said that the Minister of Defence had given the impression in the White Paper that the only response Britain could make would be "to start throwing H-bombs on to the sources of power in Russia and committing suicide in the process." Instead, the Minister should simply have said that any Russian aggression must be met by a proper degree of resistance sufficient to check it when it took place. The division of opinion in the country was not between people who were for and against nuclear weapons, but between those people in the Opposition who were against all nuclear weapons at all times and for anyone, and those who gave the impression that they were only against British nuclear weapons—i.e. the conflict between unilateral and multilateral disarmament. By his statement in the White Paper, however, the Minister had done great harm in tending to "break the spirit of the people of Britain and their powers of resistance by giving them no hope of survival."

Mr. Christopher Soames (Secretary for War), replying to the debate, said that there had been "a good deal of misinterpretation" of the relevant statement in the White Paper. It had been asserted that everyone had taken this to mean that the ultimate deterrent would be used in any incident but a minor one. This, however, was a complete failure to comprehend the purpose of the White Paper statement. The whole question was that "we want the deterrent to deter." The balance of conventional power had not changed since the days when America alone possessed the atom bomb, while Russia had a preponderance of conventional forces. If the West were to renounce the use of the deterrent in the event of a major aggression by Russia with conventional weapons only, then, in the context of the present balance of power, the Communist side would have a supreme military advantage. To those who thought that Britain should counter conventional aggression only with conventional resistance, he would say that they should then not support the reductions in conventional arms now taking place.

Of all the areas where there was friction or danger of it, the one in which it was least likely to develop on a major scale was Europe—owing to the fact that the Western countries had built up the strength of NATO and had devoted sufficient of their resources to provide the deterrent. The strength of NATO forces on the ground was such that it would need a major aggression to overcome them.

Mr. Soames continued: "I do not think any of us believe that Russia intends wilfully to bring about a major clash of arms with the West. The danger of global war lies not in cold calculation by the men in the Kremlin. It lies in miscalculation. So it must be not only in our interests but in the interests of the whole world that we should narrow the area of possible miscalculation. The Russians won't chance their arm in a manner which they consider will result in nuclear retaliation." However, if the West were unilaterally to renounce the use of the H-bomb, even in the event of major Russian aggression, then Western Europe would become overnight the biggest danger spot of all.

Mr. Soames said that the real danger was that an unscrupulous nation, playing on the abhorrence and reluctance of the West to launch into a mutually devastating nuclear exchange, might indulge in military adventures or encourage others to do so while giving them thinly veiled support. This was an area in which no Government could say in advance what weapons they would need to have recourse to in any of the possible different sets of circumstances. The Government could not say and would not try to, and neither would the Opposition were they in Power.

As regards the missile bases, Mr. Soames emphasized that there would be no rockets in position before the "Summit" talks unless those talks were very long delayed. The outcome of the talks would depend on whether or not the Russians wanted to reduce tension in the world. If that was so, the Russians would not be deflected by the fact that the deterrent power based in Britain had increased. Nor would the Government be deflected in their search for peace by the knowledge that the Russians were themselves building rocket bases.

On a division the Opposition amendment was rejected by 318 votes to 263, and the Government motion agreed to by 317 votes to 261. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Defence White Paper, 16029 A; Defence Debate, 15550 A.)**

A. CEYLON. — Parliamentary Select Committee to consider Constitutional Reform and Republican Status.

The Ceylon House of Representatives adopted a resolution on Nov. 27, 1957, proposing the appointment of a Joint Select Committee of the Senate and the House to consider the revision of the Constitution laid down in the Ceylon (Constitution and Independence) Orders in Council of 1946 and 1947. The Committee was also asked to consider other written law with reference to: (1) the establishment of a Republic; (2) the guaranteeing of fundamental rights; (3) the position of the Senate and nominated members of the House of Representatives; and (4) the Public Service Commission and the Judicial Service Commission.

The resolution had been moved by the Prime Minister (Mr. Bandaranaike) and was adopted by 41 votes to two, being supported by most Opposition members.

After the resolution had been passed by the Senate, both Houses appointed their representatives on the Joint Select Committee in January 1958. They included Mr. Bandaranaike; the Ministers of Finance (Mr. S. de Zoysa), Food and Agriculture (Mr. Gunawardene), Labour, Housing and Social Services (Mr. Illangaratne), Justice (Senator M. W. H. de Silva) and Home Affairs (Senator Jayasuriya); the Leader of the Opposition (Dr. N. M. Perera); Mr. M. D. Banda and Senator E. B. Wickremanayake, of the National Party; and Mr. Pieter Keuneman, of the Communist Party.

The committee held its inaugural meeting on March 14. (Ceylon Government Information Department) **(Prev. rep. Constitution, 9102 A; 9006 C; 7967 B; Republican Status, Proposal, 14961 A.)**

B. SOUTH-EAST ASIA.—Mekong Development Plan.

The United Nations survey mission headed by Lieut.-General Raymond A. Wheeler which visited South Vietnam, Laos, Cambodia and Siam to investigate the conditions for implementing the Mekong River Development Plan (see 15938 A) recommended in its report, published by U.N. headquarters on Feb. 21, that a five-year programme costing $9,200,000 should be carried out for the collection of basic data for the comprehensive development of the river basin.

The report recommended immediate steps to survey the exact level of the river from the Burma-Laos border to its mouth, as well as the levels of its major tributaries; to establish hydrological stations along the river and measure its flow on uniform standards; to undertake aerial mapping of promising reaches on the river, starting in Laos and Siam; and to undertake special studies of problems related to the river's development—notably fisheries, agriculture, forestry, mineral resources, and transportation.

The mission emphasized that, properly developed, the Mekong could "easily rank with South-East Asia's greatest natural resources." It acknowledged the "enthusiastic co-operation" received from the four riparian countries.

It was announced at U.N. headquarters on the same date that the mission's recommendations had been accepted by a committee of the four countries which had been set up to co-ordinate current investigations.—(U.N. Information Centre, London - Times - New York Times - Vietnam Press Agency) **(Prev. rep. 15938 A.)**

C. UNITED KINGDOM. — Restoration at Stonehenge.

Plans for re-erecting a trilithon and three other stones at Stonehenge, at a cost of £8,500, were announced on Feb. 25 by the Minister of Works, Mr. Hugh Molson. The trilithon, consisting of two uprights weighing about 45 tons each, and a lintel across the top, had lain untouched since the end of the 18th century, when amateur excavators caused its downfall; the three other stones to be raised, in the outer circle, fell in 1900. The restoration is expected to be completed within three or four months.—(Times - Daily Telegraph)

D. POLAND. — Purge of United Workers' Party.

It was announced in Warsaw during February that, as a result of the purge of party members ordered by the central committee of the Polish United Workers' Party in October last, 970,500 members and candidate members had been investigated, representing 78.1 per cent of the basic party organization. As a result, 20,890 members had been expelled and another 129,895 struck off the party's membership registers.—(Polish Embassy Press Office, London) **(Prev. rep. 15871 A.)**

A. YUGOSLAVIA. — Trial and Imprisonment of Socialist Leaders. - Protest by Socialist International.

Two leading members of the pre-war Serbian Socialist Party, Dr. Alexander Pavlovich and M. Bogdan Krekich, and a professor of theology at Belgrade University, Dr. Dragoslav Stranjakovich, were arrested at the beginning of December on charges of conspiring to overthrow the Yugoslav Government. All three men had supported the Chetnik movement led by General Mihailovich during the Second World War. Dr. Milan Zujovich, a professor of law at Belgrade University, was subsequently arrested in January on a similar charge.

The trial of Dr. Pavlovich, M. Krekich, and Dr. Zujovich opened in Belgrade on Jan. 31, Dr. Stranjakovich being granted a separate trial on health grounds.

Dr. Pavlovich (73), a Belgrade lawyer and former vice-president of the Socialist Party, was a member of the National Organization Committee of the Chetnik movement during the war; he was sentenced to 10 years' imprisonment in 1946 as a collaborator, being released after eight years. **M. Krekich** (70) was the pre-war secretary of the Yugoslav Trade Union Congress and one of the founders of the Serbian Socialist Party. **Dr. Zujovich** (58) is a brother of Dr. Mladen Zujovich (a leading supporter of General Mihailovich), who was sentenced to death *in absentia* in 1946 and now lives in Paris. **Dr. Stranjakovich** (56) served a term of imprisonment after the war for Chetnik activities; before the war he worked with Professor Jovanovich, an eminent Serbian historian who became Prime Minister of the Yugoslav Government-in-exile in London.

The indictment alleged (i) that Dr. Pavlovich, M. Krekich, and Dr. Stranjakovich had formed a conspiratorial group with the object of overthrowing the régime by force and destroying the unity of the peoples of Yugoslavia; (ii) that they had supplied Chetnik émigrés with material, subsequently published in the foreign Press, in order to "compromise" the régime and defend the policy of the "Chetnik traitors"; and (iii) that they had tried to contact foreign embassies in Belgrade. Dr. Zujovich was accused of acting as their accomplice. All the accused pleaded "not guilty."

Dr. Pavlovich and M. Krekich admitted that they had discussed means of contacting Yugoslav émigrés in Paris and London, but emphasized that they were opposed to the use of force; they said that the only object of their regular meetings was to "talk over old times over a cup of coffee." Dr. Pavlovich also admitted having given to a Yugoslav employee of the U.S. Embassy a memorandum, drawn up by M. Krekich, on a project for constructing a railway from Belgrade to Bar; he stated, however, that he had done so for the official's personal information, and not in order to obtain U.S. financial support for the plan. [The project for a Belgrade-Bar railway which would avoid Croatian territory and withdraw Serbian trade from the Croatian port of Rijeka (formerly Fiume) had frequently been put forward by Serbian nationalists in the past.]

M. Krekich admitted that he had written a letter containing "theoretical ideas" to Dr. Jovanovich (Premier of the wartime Royal Yugoslav Government-in-exile, and now living in London); that he had drawn up a "programme of action" for Yugoslav émigrés; that he had written a book entitled *The Face of Tito's Yugoslavia*, the manuscript of which was found in his house; and that he had supplied information on religion in Yugoslavia to some Yugoslavs who had told him that it was wanted by the U.S. and French Embassies. He declared, however, that his "programme" was a theoretical work and not a "call to action"; that his book was not intended for publication abroad; and that his aim had been to mobilize support among Yugoslav émigrés against "Croatian separatists."

Dr. Zujovich withdrew a statement, made to the police while under interrogation, in which he had said that he had handed M. Krekich's "programme" to Professor Leduc, of Paris University, who was then visiting Belgrade, so that it could be passed on to his (Dr. Zujovich's) brother in Paris. Denying the accuracy of this statement, he said he had made it while in a "state of depression" and declared that he had destroyed the "programme" on discovering its contents. Dr. Stranjakovich, who gave evidence at the trial of the other accused, testified that his visits to Dr. Pavlovich had been merely concerned with his researches into the history of Serbian-Croatian antagonism, and that his (M. Stranjakovich's) wife had burned his copy of M. Krekich's book. Evidence was also given *in camera* by two Yugoslav employees of the U.S. Embassy in Belgrade.

The accused were all found guilty on Feb. 4, Dr. Pavlovich being sentenced to 8½ years' rigorous imprisonment, M. Krekich to seven years, and Dr. Zujovich to four years. After a separate trial, Dr. Stranjakovich was sentenced to six years' rigorous imprisonment on March 8.

Protests against the sentences on Dr. Pavlovich and M. Krekich were sent to the Yugoslav Government by the trade union group of British M.P.s and by the Austrian Socialist Party. On Feb. 15 the Socialist International appealed to President Tito to discuss the sentences with a three-man deputation comprising Mr. Aneurin Bevan (Britain), Mr. Haakon Lie (Norway) and Herr Otto Probst (Austria), who, it was proposed, should visit Belgrade. As no official reply was received to this request, and as the Yugoslav Government indicated that it would not grant visas to the delegation, the International asked its member-parties on March 3 to use their influence with the Yugoslav Government.

Borba, the official organ of the Yugoslav League of Communists, had previously condemned the attitude of the Socialist International as an "interference in the internal affairs of Yugoslavia" and as "inconsistent with the principle of the equality of States and the independence of individual Labour and Socialist movements."—(Tanjug Agency, Belgrade - Times - Le Monde, Paris - New York Times)

(Prev. rep. Political Trials, 15822 A.)

B. CANADA. — Atomic Energy Co-operation Agreements with Western Germany and Switzerland. - New Agreement on Uranium Supplies for Britain. - Canadian Uranium Production in 1957.

The Canadian Minister of Trade and Commerce (then Mr. C. D. Howe) announced on Feb. 18, 1957, that the Canadian Government were prepared to negotiate bilateral agreements with friendly Governments covering co-operation in the peaceful uses of atomic energy, and, in particular, the supply of natural uranium for such uses. He pointed out that these agreements would contain control provisions similar to those contained in the statute of the International Atomic Energy Agency. Sales arrangements under bilateral agreements would be on a normal commercial basis, the contracts being negotiated by Eldorado Mining and Refining Ltd.—the Crown company responsible for all uranium purchases in Canada.

The first co-operation agreement for the peaceful uses of atomic energy was signed on Dec. 10, 1957, between Canada and the German Federal Republic, and the second on March 7, 1958, between Canada and Switzerland. They included provisions for exchange of information, the supply of equipment and materials, and access to and use of facilities, as well as the supply of Canadian uranium under separate contracts.

Mr. Gordon Churchill, Minister of Trade and Commerce in Mr. Diefenbaker's Government, announced on Feb. 1, 1958, that arrangements had been completed for the sale to the U.K. Atomic Energy Authority of approximately $105,000,000 (about £38,000,000) worth of Canadian uranium, in addition to the order for uranium supplies worth $115,000,000 which had been arranged at the Bermuda meeting in March 1957 [see page 15458]. Deliveries under the latter order would end on March 31, 1962, whilst the new order would cover the period from April 1, 1962 to March 31, 1963.

Mr. Churchill stated that negotiations were in progress for the supply by Canada of a substantial part of the U.K. Atomic Energy Authority's uranium requirements between April 1, 1963, and Dec. 31, 1966; hitherto, Canada had undertaken to supply in full the quantity which the U.K. Atomic Energy Authority requested in this period. In addition to the sales to Britain, every effort would be made to sell surplus uranium to individual friendly countries and to organizations such as Euratom and the O.E.E.C.

In his statement Mr. Churchill also announced that Canada had produced 6,687 tons of uranium during 1957, that it was estimated that 13,000 tons would be produced in 1958, and that production was expected to rise to about 15,500 tons in 1959. Eldorado Mining and Refining Ltd. had entered into purchase contracts with 16 Canadian producers to a total value of about $1,425,723,000, whilst the total value of shipments made under sales contracts at Dec. 31, 1957, was $223,162,037. The bulk of the uranium to be produced under existing contracts would be delivered to the U.S. Atomic Energy Commission under the 1948 arrangement.—(External Affairs Department, Ottawa - Frankfurter Allgemeine Zeitung - Neue Zürcher Zeitung - Times)

(Prev. rep. Anglo-Canadian Agreement, 15457 A; Uranium Production, 16008 B.)

C. INDIA. — Mining Disasters.

The worst colliery disaster in Indian history occurred at the Chinakuri pit in West Bengal on the night of Feb. 19, when an explosion killed 183 miners. The Chinakuri mine belongs to the Bengal Coal Company. The Indian Minister of Labour (Mr. Nanda) announced that a court of inquiry would be set up to investigate the cause of accident.

Two other mining disasters occurred in the same area, but on the Bihar side of the West Bengal-Bihar border, immediately after the Chinakuri explosion. In one of these disasters the Central Bhowrah mine was flooded and 23 miners drowned, whilst another 15 miners lost their lives when they were trapped in the Mahalbani mine by flood-waters from the Damodar River.—(The Statesman, Calcutta)

A. FRANCE. — Designation of Representatives in European Common Assembly. - Legislation passed by National Assembly.

The French National Assembly passed a Bill on March 4 providing for the designation of the 36 French members in the Common Assembly to be set up for the European Economic Community, the European Atomic Community, and the European Coal and Steel Community. The legislation laid down that 24 of the 36 French representatives should be deputies and 12 Senators ; that each Chamber should elect (by an absolute majority of votes) those of its members it wished to delegate ; and that those elected should hold office for one year but should be eligible for re-election.

M. Maurice Schumann, chairman of the National Assembly's Foreign Affairs Commission, proposed to designate an additional 18 alternate members (12 deputies and six Senators), but this proposal was dropped after M. Bonnefous (Minister of Public Works) had pointed out that no provision for alternate delegates had been made in the Euratom and Common Market Treaties. Instead, the Commission put forward a resolution inviting the French representatives in the Common Assembly to ask that body to propose to the six member-Governments that they should agree to the designation of alternate members, with a view to "ensuring the continuity of work in the Common Assembly and facilitating the participation of representatives of overseas territories." This rider was accepted by the Government and agreed to by the National Assembly.

M. Kriegel-Valrimont (Communist) moved that the French representatives should not be elected by majority vote but by proportional representation, to avoid the possibility of Communists being excluded from the Common Assembly. His amendment was rejected (by 370 votes to 150) after heated exchanges with Socialist and M.R.P. deputies, who denounced the Communist attitude towards the European treaties and institutions and declared that the Communists were themselves to blame for their exclusion from the European Assemblies.

The Bill as a whole was then adopted, against the votes of the Communists and *progressistes*.—(Le Monde, Paris)

(Prev. rep. 15951 A ; 15927 A.)

B. UNITED KINGDOM - SOVIET UNION. — Agreement on London-Moscow Air Service.

An agreement between British European Airways and Soviet *Aeroflot* for a direct air service between London and Moscow was signed in the Soviet capital on Feb. 26 by Air-Marshal Zhigarev (head of the Soviet civil aviation organization) and Marshal of the R.A.F. Lord Douglas of Kirtleside, chairman of B.E.A.

Lord Douglas said at a press conference in Moscow that a regular passenger service would be opened in the summer *via* Copenhagen, beginning with two flights a week. The flights would be made with British *Viscounts* and Soviet *TU-104's* and *IL-18's*, but later BEA would use *Comets*, which would make possible non-stop flights from London to Moscow. The *Viscounts* would take about six hours for the flights, but the *TU-104's* would be considerably faster. The new line would not affect the Scandinavian Airlines service between Copenhagen and Moscow.

The agreement implemented the Anglo-Soviet civil aviation agreement signed in December last.—(Times - Soviet Embassy Press Department, London) **(Prev. rep. 15926 B.)**

C. NETHERLANDS.—Expulsion of Soviet Diplomats.

It was announced in The Hague on Jan. 29 that the Netherlands Government had expelled three members of the Soviet Embassy as *personae non gratae*—Colonel L. I. Tchernov, the military and air attaché ; Lieut.-Commander V. S. Zenin, the naval attaché ; and M. Suchatsev, an interpreter, all of whom had left the country.

No official reason was given for the expulsion of the Soviet diplomats, but the Dutch Press stated that the two attachés had regularly invited lower-ranking Netherlands officers to parties and meetings to collect data about the Dutch armed forces, and had concentrated their attention on the naval base at Den Helder. (Netherlands News Agency)

D. MALAYA. — Membership of World Bank and International Monetary Fund.

The Federation of Malaya became a member of the International Bank and the International Monetary Fund on March 10, her quota in the I.M.F. being $25,000,000 and her subscription to the capital stock of the Bank 250 shares, with a par value of $25,000,000. This brought the membership of both institutions to 65 ; the total of members' quotas in the Fund to $9,031,000,000 ; and the total subscribed capital of the Bank to $9,358,400,000.—(International Bank and I.M.F., Washington) **(Prev. rep. 15855 B.)**

E. UNITED KINGDOM. — Kelvingrove By-election.

Polling took place on March 13 in the Kelvingrove division of Glasgow, the by-election being caused by the death of Mr. Walter Elliot (Conservative), a former Minister of Health, Minister of Agriculture, and Secretary of State for Scotland. The Labour Party won the seat from the Conservatives, the result being :

McAlister, Mrs. Mary (Labour)	10,210
Elliot, Mrs. Katharine (Conservative)	8,850
*Murray, David (Liberal-Home Rule) . ..	1,622
*Park, William (Independent Labour Party) .	587
Labour gain from Conservative. Majority ..	1,360

* Forfeited deposits.

Figures at the general election were : W. Elliot (C.) 14,854, J. L. Williams (Lab.) 11,966—Conservative majority, 2,888.

The Labour candidate polled 48 per cent of the total vote, the Conservative candidate 41.61 per cent, the Liberal-Home Rule candidate 7.63 per cent, and the I.L.P. candidate 2.76 per cent, whereas at the general election the Conservatives polled 55.38 per cent and Labour 44.62 per cent in a straight fight. The Conservative proportion thus fell by 13.77 per cent, while the Labour proportion rose by 3.38 per cent.

60.53 per cent of the electorate voted in the by-election, compared with 67.59 per cent at the general election. The total electorate numbered 35,138 (one of the smallest in the country), a decrease of 4,544 since the general election—mainly due to rehousing.

The B.B.C. and the I.T.A. collaborated in televising the by-election—the first occasion on which the B.B.C. had undertaken T.V. coverage of a by-election. In agreement between the Conservative Party, the Labour Party, the I.L.P., and Mr. David Murray (who was not officially supported by the Scottish Liberal Party), several televised programmes were given at which the candidates were seen and heard by about 1,000,000 Scottish viewers.

Mrs. Katharine Elliot, the Conservative candidate, is the widow of the late Member ; she is current chairman of the National Union of Conservative and Unionist Associations, and a member of Roxburgh County Council. Mr. Murray's candidature as a "Liberal-Home Ruler" was sponsored by a committee of independent Liberals, Scottish Nationalists, and others.

Mr. Walter Elliot (69), who died on Jan. 8, had a distinguished career in politics, science and medicine, and was a prominent figure in British political life for many years.

Born in Lanark, Walter Elliot graduated at Glasgow University with degrees in science and in medicine and surgery, subsequently taking his Doctorate of Science. He served as a doctor with the Scots Greys in the First World War, winning the M.C. and bar, and was first elected to Parliament in December 1918 as Unionist M.P. for Lanark. Thereafter he represented Kelvingrove from 1924 to 1945, when he lost the seat by 88 votes. In the following year he was returned to Parliament as an M.P. for the Scottish Universities, and after the abolition of university representation he was again returned for Kelvingrove in 1950, holding the seat until his death.

Mr. Elliot became Financial Secretary to the Treasury in the National Government of 1931, and was subsequently Minister of Agriculture and Fisheries (1932-36), Secretary of State for Scotland (1936-38), and Minister of Health (1938-40). As Minister of Agriculture he instituted Marketing Boards at a time of acute agricultural depression, while as Minister of Health in the immediate pre-war years he was responsible for the organization of special hospital services and plans for evacuation and billeting. In 1941 he succeeded Major-General John Hay Beith (Ian Hay) as Public Relations Officer at the War Office.

Mr. Elliot was a Companion of Honour, a Fellow of the Royal Society, Lord High Commissioner of the General Assembly of the Church of Scotland in 1956, and a former Rector of Glasgow and Aberdeen Universities.

Mrs. Mary McAlister, the new Member for Kelvingrove, is a Glasgow housewife and a member of Glasgow City Council. She is the 28th woman M.P. in the House of Commons. (Times - Daily Herald - Glasgow Herald)

(Prev. rep. By-elections, 16015 A.)

F. KENYA. — New Chief Secretary.

It was announced on March 11 that Mr. W. F. Coutts, Education Secretary and Minister of Education, Labour and Lands in the Kenya Government, had been appointed Chief Secretary of Kenya in succession to Mr. Richard Turnbull, following the latter's appointment as Governor of Tanganyika. (Times) **(Prev. rep. 15948 E ; Ministerial Appointments, 15632 A ; 14621 A.)**

G. MONACO. — Birth of Prince Albert.

A son was born to Prince Rainier and Princess Grace on March 14 and was given the names Albert Alexandre Louis Pierre. The infant prince became heir to the Monegasque throne under the laws of primogeniture, taking precedence over the infant Princess Caroline, who was born in January 1957.—(Le Monde, Paris) **(Prev. rep. 15358 C.)**

MARCH 15—22, 1958

A. SOVIET UNION - WESTERN POWERS. — The "Summit" Correspondence.

The voluminous correspondence between the U.S.S.R. and the Western Powers, initiated in 1957 by Marshal Bulganin, was continued during the first three months of 1958, during which period further letters—nearly all running to many thousands of words—were exchanged between the Soviet Prime Minister on the one hand and President Eisenhower, Mr. Macmillan, and other Western Heads of Government on the other.

As summarized on pages 15976-78, Marshal Bulganin had sent Notes on Dec. 10-14 to all U.N. member-nations, and also separately to the 15 NATO countries and to Switzerland, setting forth the Soviet Government's proposals for the suspension of nuclear tests, a demilitarized zone in Central Europe, a non-aggression pact between NATO and the Warsaw Treaty Organization, etc. On Jan. 8, 1958, he sent further Notes to the NATO countries and to four "uncommitted" countries (India, Egypt, Austria, and Sweden) proposing a "summit" conference of Heads of Government, preferably in Switzerland, during the early months of 1958; copies of this correspondence [summarized on pages 15978-79] were also sent to every U.N. member-country and to Switzerland.

Replies to Marshal Bulganin's Letters of December 1957 and January 1958.

During January letters were sent to Marshal Bulganin by President Eisenhower, Mr. Macmillan, M. Gaillard, Dr. Adenauer, Signor Zoli, Mr. Nehru, and many other Heads of Government in reply to the above-mentioned letters from the Soviet Prime Minister. Summaries of the more important of these replies are given below:

President Eisenhower to Marshal Bulganin.

In a letter dated Jan. 12, 1958, sent in reply to Marshal Bulganin's letter of Dec. 10, 1957, President Eisenhower proposed (1) that the U.S.A. and the U.S.S.R. should agree to relinquish the veto power in the Security Council; (2) that they should proceed "vigorously" to bring about the reunification of Germany by free elections, and also to implement that part of the Yalta Agreement whereby the peoples of Eastern Europe were promised the right to choose their own form of government; (3) that the U.S.A. and the U.S.S.R. should "agree that outer space should be used only for peaceful purposes"; and (4) that steps should be taken toward nuclear disarmament and the cessation of nuclear arms production, under effective safeguards and inspection. President Eisenhower expressed his willingness to take part in a summit conference, but emphasized that "preparatory work, with goodwill on both sides, is a pre-requisite to success."

Refuting Marshal Bulganin's allegation that peace was endangered by the collective defence efforts of the free-world nations, President Eisenhower said: "The past 40 years provides an opportunity to judge the comparative peace records of our two systems. We gladly submit our national record for respecting peace to the impartial judgment of mankind . . . Three times in this century wars have occurred under circumstances which strongly suggest, if indeed they do not prove, that it would not have occurred had the United States been militarily strong and committed in advance to the defence of nations that were attacked. On each of these three occasions the United States was militarily unprepared, or ill-prepared, when war came, and it was not known that the U.S.A. would go to the aid of those subjected to armed aggression . . .

"I may be permitted to recall that in March 1939, when the Soviet Union felt relatively weak and threatened by Fascist aggression, it contended that aggression was rife because 'the majority of the non-aggressive countries, particularly Britain and France, have rejected the policy of collective security.' Stalin went on to say that the policy of 'let each country defend itself as best it can . . . means conniving at aggression and giving free rein to war.' Now the Soviet Union is no longer weak or confronted by powerful aggressive forces. The vast Sino-Soviet bloc embraces nearly one billion people and large resources. Such a bloc would of course be dominant in the world were the free-world nations to be disunited . . .

"Of course the United States would greatly prefer it if collective security could be obtained on a universal basis through the United Nations. This was our hope when in 1945 our two Governments signed the U.N. Charter . . . Also, by that Charter we agreed to make available to the Security Council armed forces, assistance, and facilities so that it could maintain international peace and security. The Soviet Union has persistently prevented the establishment of such a universal collective security system and has, by the use of its veto—now 82 times—made the Security Council undependable as a protector of peace . . ."

President Eisenhower went on to give Marshal Bulganin "two solemn and categorical assurances":

(1) "Never will the United States lend its support to any aggressive action by any collective defence organization or any member thereof."

(2) "Always will the United States be ready to move toward the development of effective U.N. collective security measures in replacement of regional collective defence measures."

Turning to the proposals contained in Marshal Bulganin's letter of Dec. 10, President Eisenhower said that they seemed to be "inexact or incomplete in their meaning, and inadequate as a programme for productive negotiations for peace." He continued:

"You [Marshal Bulganin] first seem to assume that the obligations of the Charter are non-existent and that the voice of the United Nations is nothing we should heed. You suggest that we should agree to respect the independence of the countries of the Middle East and renounce the use of force in the settlement of questions relating to that area. But by the U.N. Charter we have already taken precisely those obligations as regards all countries, including those of the Middle East . . .

"You also suggest some form of non-aggression agreement between NATO and the Warsaw Pact. But all the members of NATO are already bound to the U.N. Charter provision against aggression.

"You suggest that the United States, the United Kingdom and the Soviet Union should undertake not to use nuclear weapons. But our three nations and others have already undertaken, by the Charter, not to use any weapons against the territorial integrity or political independence of any State . . .

"You suggest that we should proclaim our intention to develop between us relations of friendship and peaceful co-operation. Such an intention is already proclaimed as between ourselves and others by the U.N. Charter, to which we have subscribed. The need is not to repeat what we already proclaim, but to take concrete steps under the terms of the Charter that will bring about these relations of friendship and peaceful co-operation.

"As recently as last November, the Communist Party of the Soviet Union signed and proclaimed to the world a declaration which was designed to promote the triumph of Communism throughout the world by every means, not excluding violence, and which contained many slanderous references to the United States. Such a declaration is difficult to reconcile with professions of a desire for friendship, or indeed of peaceful co-existence. This declaration makes clear where responsibility for the 'cold war' lies.

"You renew the oft-repeated Soviet proposal that the United States, the United Kingdom, and the Soviet Union should cease for two or three years to test nuclear weapons; and you suggest that nuclear weapons should not be stationed or produced in Germany. You add the possibility that Poland and Czechoslovakia might be added to this non-nuclear weapons area.

"These proposals do not serve to meet the real problem of armament. The heart of that problem is, as you say, the mounting production, primarily by the Soviet Union and the U.S.A., of new types of weapons.

"Your proposals regarding Central Europe will of course be studied by NATO . . . But there cannot be great significance in de-nuclearizing a small area when, as you say, 'the range of modern types of weapons does not know of any geographical limit.'

"I note, furthermore, that your proposal on Germany is in no way related to the ending of the division of that country but would, in fact, tend to perpetuate that division. It is unrealistic thus to ignore the basic link between political solutions and security arrangements . . ."

President Eisenhower then put forward his own proposals, as follows:

(1) As the Security Council had "been too often prevented by veto from discharging the primary responsibility we have given it for the maintenance of international peace and security," the U.S.A. and the Soviet Union should agree to relinquish the veto power.

(2) Both countries should "proceed vigorously to bring about the reunification of Germany by free elections, as we agreed at Geneva in 1955 and as the situation urgently demands." President Eisenhower recalled that an agreed directive had been issued at the Geneva "summit" conference declaring that the Heads of Government "have agreed that the settlement of the German question and the reunification of Germany by means of free elections shall be carried out . . ."

The President also recalled that the Heads of Government of the U.S.A., the U.S.S.R., and Great Britain had agreed at Yalta in 1945 that the people of the East European countries "should have the right to choose the form of government under which they would live." After pointing out that this agreement had not yet been fulfilled, he continued: "At Geneva in 1955 you [Marshal Bulganin] took the position that there were no grounds for discussing this question . . . and that it would involve interference in the internal affairs of the Eastern European States.

"But have not subsequent developments shown that I was justified in my appeal to you for consideration of these matters? Surely the Hungarian developments and the virtually unanimous action of the U.N. General Assembly in relation thereto show that conditions in Eastern Europe are regarded throughout the world as much more than a matter of purely domestic scope. I propose that we should now discuss this matter. There is an intrinsic need of this in the interest of peace and justice, which seems to me compelling."

(3) To solve what he considered to be "the most important problem which faces the world today," President Eisenhower proposed that "we should agree that outer space should be used only for peaceful purposes." He wrote in this connexion: "We face a decisive moment in history in relation to this matter. Both the Soviet Union

and the United States are now using outer space for the testing of missiles designed for military purposes. The time to stop is now. I recall that a decade ago, when the U.S.A. had a monopoly of atomic weapons and atomic experience, we offered to renounce the making of such weapons and to make the use of atomic energy an international asset for peaceful purposes only. If only that offer had been accepted by the Soviet Union, there would not now be the danger from nuclear weapons which you describe. The nations of the world face today another choice perhaps even more momentous than that of 1948. This relates to the use of outer space. Let us this time make the right choice—the peaceful choice."

(4) In addition, the President urged that both countries should "end the now unrestrained production of nuclear weapons"; that nuclear tests should be stopped "not just for two or three years, but indefinitely"; that steps be taken to bring about a progressive and controlled reduction of conventional weapons; that agreement should be reached on measures to safeguard against the possibility of surprise attack, for which "there is open a wide range of choices as to where to begin"; and that technical groups be appointed to study all these matters and to reach agreement on the necessary inspection measures.

In conclusion, President Eisenhower wrote as follows with regard to the possibility of a "summit" conference: "I have noted that you attach great importance to personal contacts between statesmen, and that you would be prepared to come to an agreement on a personal meeting of State leaders to discuss both the problems mentioned in your letter and other problems. I, too, believe that such personal contacts can be of value. I showed that by coming to Geneva in 1955. I have repeatedly stated that there is nothing I would not do to advance the cause of a just and durable peace.

"But meetings between us do not automatically produce good results. Preparatory work, with goodwill on both sides, is a prerequisite to success. High-level meetings create great expectations and for that reason involve a danger of disillusionment, dejection, and increased distrust if the meetings are ill-prepared, if they evade the root causes of danger, if they are used primarily for propaganda, or if agreements arrived at are not fulfilled.

"Consequently, this is my proposal: I am ready to meet with the Soviet leaders to discuss the proposals mentioned in your letter and the proposals which I make, with the attendance as appropriate of leaders of other States . . . It would be essential that prior to such a meeting these complex matters should be worked on in advance through diplomatic channels and by our Foreign Ministers, so that the issues can be presented in a form suitable for our decisions, and so that it can be ascertained that a top-level meeting would, in fact, hold good hope of advancing the cause of peace and justice in the world. Arrangements should also be made for the appropriate inclusion, in the preparatory work, of other Governments to which I allude."

In reply to Marshal Bulganin's 10,000-word letter of Jan. 8, President Eisenhower sent a 44-word letter on Jan. 20 pointing out that his (the President's) letter of Jan. 12 had dealt with all the substantive matters raised therein.

Mr. Macmillan to Marshal Bulganin.

The British Prime Minister's reply to Marshal Bulganin's letter of Dec. 10 was published in London on Jan. 16, 1958.

Mr. Macmillan "emphatically endorsed" the view that "the preservation of peace ought in times like these to be the first objective of every civilized Government." After stressing that this was "the heartfelt desire of the British people and the sincere aim of the British Government," he continued:

"I can assure you most solemnly that no British Government will ever commit, take part in, or condone an act of aggression against the Soviet Union. That was the purpose of my reference in a broadcast on Jan. 4 to a pact of non-aggression [see 15991 A]. This concept is, of course, inherent in the U.N. Charter. Nevertheless I solemnly repeat this assurance.

"But, as I went on to say in my broadcast, peace cannot be secured just by words: we need deeds as well. We need also to understand one another correctly and not to labour under misapprehensions on either side. For this reason I was sorry to see repeated in your letter a number of statements about the policy of the U.K. Government and about the character and purpose of NATO which are not justified by the facts. Although I do not think that much would be gained by a public argument about these points, I must call attention to some of these mis-statements which, if allowed to pass without comment, might be likely to gain credence. You asserted, for example, that the German Federal Government was to be given the opportunity to produce atomic and hydrogen weapons, and that the disarmament talks had been frustrated because the Western Powers had tried to impose unacceptable conditions on the Soviet Union. As is well known, there is no justification for either of these statements . . ."

Mr. Macmillan went on to express regret that Marshal Bulganin's letter seemed "to ignore a great many constructive proposals which we and our associates have put forward with the aim of reducing tension"—e.g. the draft Treaty of Assistance offered by the Western Powers to the U.S.S.R. at Geneva in 1955, and the Western disarmament plan recently approved by a two-thirds majority at the United Nations. Moreover, he (Mr. Macmillan) was "grieved" that Marshal Bulganin had made no reference to German reunification, "although this remains an essential condition of European security."

As regards the Polish plan for an atom-free zone in Central Europe [the "Rapacki Plan"—see page 15979], Mr. Macmillan thought it was "open to certain obvious objections"; nevertheless, the British Government were studying it "with a view to seeing whether there are elements which could be made the basis of some alternative proposal."

In conclusion, Mr. Macmillan recalled that the recent Paris meeting of the North Atlantic Council [see 15965 A] had recorded the NATO countries' willingness to examine "any proposal from whatever source" for general or partial disarmament. Moreover, they had declared that they would welcome a meeting at Foreign Ministers' level if the U.S.S.R. refused to participate in the new U.N. Disarmament Commission.

In a further letter on Feb. 8 to Marshal Bulganin (in reply to the latter's letter of Jan. 8) Mr. Macmillan said that he would be willing to participate in a meeting of Heads of Government, which, however, "must be preceded by adequate preparations." Mr. Macmillan continued:

"Such a meeting will not be fruitful unless the ground has been thoroughly prepared in advance and it is clear from this preparatory work that there is broad agreement on the nature and order of the agenda, and a real desire among all who participate to make practical progress towards a settlement of the differences between us. There must be a reasonable prospect of achieving concrete results on specific issues. Otherwise we should run the risk of a fruitless meeting which might make matters worse and not better. I remember very well our meetings at Geneva in 1955. In looking back at these discussions, I am convinced that one of the main reasons why we then achieved so little was that the ground had not been sufficiently prepared before the Heads of Government met."

In drawing up the agenda (Mr. Macmillan continued) it would be necessary to consider not only the proposals which Marshal Bulganin himself had advanced but also "any other proposal which might be put forward by other Governments concerned"—for example, the suggestions contained in President Eisenhower's letter of Jan. 12, which he (Mr. Macmillan) fully endorsed.

Reverting to the suggestion that a Foreign Ministers' meeting might help to break the deadlock on disarmament, Mr. Macmillan said: "This meeting of Foreign Ministers might well extend its scope and be a preliminary to a meeting of Heads of Government . . . I therefore propose that a meeting of Foreign Ministers should take place in the near future. As a matter of convenience it might be best that this meeting should consist of the Foreign Ministers of the Governments represented at Geneva in 1955. But this does not prejudice the ultimate composition of a subsequent meeting of Heads of Government.

"I have put forward this proposal for a meeting of Foreign Ministers in the knowledge that you have already commented adversely upon it. Nevertheless I believe it to be the best way in which to begin. An alternative method would be to make these preparations through confidential diplomatic exchanges . . . If either of these proposals proved acceptable to the Governments concerned, the detailed arrangements for a Foreign Ministers' meeting or for diplomatic exchanges might best be made without delay through their diplomatic representatives in Moscow.

"If we can adopt this approach, progress may well be made towards a better understanding between us, but it is right that we should recognize from the outset that on some of these issues there is between us a considerable gulf to be bridged. To ignore or minimize this fact would be unrealistic and therefore in the long run unhelpful to the end that we have in view. This is the reason why I attach such importance to adequate preparation.

"In all this we must remember that our peoples are anxious that something concrete in the way of agreement should be achieved. My anxiety is that their hopes should not be raised only to be disappointed. Nevertheless, in spite of our different approaches to some of the issues outstanding between us, we undoubtedly have one thing in common—namely, a very strong interest in the preservation of peace. I believe that each side recognizes that the other has this same interest, and on this basis it ought to be possible for us to have a useful meeting and to obtain positive results."

Other Replies to Marshal Bulganin.

The replies of the Prime Ministers of the other NATO countries were, generally speaking, broadly similar to those of President Eisenhower and Mr. Macmillan, though laying special emphasis on matters of particular concern to the country in question—e.g. M. Gaillard stressed that the support openly expressed by the U.S.S.R. for the Algerian rebels was difficult to reconcile with the professed Soviet assurances of friendship for France, while Dr. Adenauer called on the Soviet Government to honour its pledge to reunify Germany by free elections, given at the Geneva "summit" meeting in 1955. All the NATO Premiers expressed general agreement on the desirability of "summit" talks but, like President Eisenhower and Mr. Macmillan, stressed that they should be preceded by diplomatic consultations or a Foreign Ministers' meeting so as to give the best possible chances of success. Summaries are given below of the replies sent by the French Prime Minister and by the German Federal Chancellor.

M. Gaillard said that his Government was ready to resume discussion of the "concrete problems of Europe," including those mentioned by Marshal Bulganin, "on condition that the full validity of the undertakings entered into at the last Geneva conference of Heads of Government shall not be called in question." In addition, France, was ready to resume discussions on disarmament and to study any Russian objections to the Western proposals. As regards Marshal Bulganin's suggestion for a non-aggression pact between NATO and the Warsaw Treaty Organization, M. Gaillard commented that it was "hardly easy to believe in the practical utility of new undertakings in this field as long as the Soviet Government continues to proclaim that it attaches no credence to the assurances given on numerous occasions by the Western Powers."

M. Gaillard strongly criticized Russia's support for the resolutions adopted at the recent "Afro-Asian solidarity conference" in Cairo [see 16000 A] and, in particular, for the resolutions calling for immediate Algerian independence and urging French African territories to leave the French Union. Such actions, he emphasized, were incompatible with the Soviet assurances of goodwill towards France. He supported the idea of a "summit" meeting, but stressed that it should be adequately prepared with the co-operation of all Governments concerned.

Dr. Adenauer (whose reply was sent on Jan 21) believed that progress toward "summit" talks could best be achieved by "the proven possibilities of diplomatic negotiations" rather than by the continual exchange of letters, since the experience of the past few years had shown that no progress could be made by "polemical correspondence." Diplomatic talks, followed by a meeting of Foreign Ministers, might bring matters "to a point where the Heads of Government would face clear decisions, perhaps between alternatives." He fully endorsed the proposals contained in President Eisenhower's letter.

The Federal Chancellor declared that the constant reiteration of untrue allegations against the Federal Republic did not lend itself to an easing of tensions—e.g. the Soviet allegations that Western Germany was pursuing an "aggressive" and "militaristic" policy and proceeding with nuclear armament. In the latter connexion he pointed out that the Federal Government was the only government which had voluntarily renounced the production of nuclear weapons. As regards the proposal for an atom-free zone in Central Europe, Dr. Adenauer commented: "It seems to me of decisive significance to deal, not with the subsidiary question of where atomic arms will be stored today or tomorrow, but with the fundamental question of renouncing the production of these weapons. You yourself [Marshal Bulganin] pointed out in your first letter to me that 'the use of such means of destruction knows no geographical frontiers . . .'

Dr. Adenauer reiterated that the Federal Government would give no consideration whatever to the Soviet proposal for a "confederation" between Western and Eastern Germany. He called on the Soviet Government to implement the Geneva directive of 1955 whereby the Heads of Government had agreed to "reunify Germany by means of free elections in conformity with the national interests of the German people and the interests of European security."

Among the replies sent by the Prime Ministers of "uncommitted" countries, Mr. Nehru said that India believed that "a high-level conference is both desirable and necessary," and would welcome such a conference "whether it is confined to a few or more members." He added that India would gladly consider an invitation to take part in such a conference "if her presence is desired and if we can serve the cause of peace thereby."

After recalling his messages to Marshal Bulganin and President Eisenhower on the subject of nuclear disarmament [see 16012 A], and referring to the "sympathetic" replies he had received from both statesmen, Mr. Nehru expressed his conviction that "the urgent need today is for an agreement between the Soviet Union and the United States on a summit conference." He declared: "We cannot afford to allow the present drift to continue, as this can only worsen the situation and lead to a terrible catastrophe which all wish to avoid. I feel also that discussions can only bring useful results if they are not conducted in a polemical manner, with each party arguing its case and blaming the other . . ."

The Swiss Government informed the U.S.S.R. on Jan. 20 that it did not feel itself justified in taking the initiative in convening a meeting of Heads of Government, as it had done in November 1955, because present international conditions were different from those of 1956. [Marshal Bulganin had suggested that Switzerland might "serve the cause of peace" by inviting the Great Powers to a top-level conference.] Nevertheless, Switzerland was ready to put her good offices at the disposal of the Powers, and to welcome a conference on Swiss territory if the nations concerned agreed on the desirability of such a meeting.

Further Bulganin-Eisenhower Correspondence.

Marshal Bulganin sent a further letter to President Eisenhower on Feb. 1 containing a list of the subjects which he proposed should be discussed at a "summit" conference, and again rejecting the idea of a preparatory meeting of Foreign Ministers.

The Soviet Prime Minister proposed that a "summit" conference should concentrate on "the most urgent questions," which he listed as follows:

(1) Immediate cessation of nuclear tests.
(2) Renunciation of nuclear weapons by the United States, the Soviet Union, and Great Britain.
(3) An atom-free zone in Central Europe.
(4) A non-aggression pact between NATO and the Warsaw Treaty Organization.
(5) Reduction in the number of foreign troops stationed "on the territory of Germany and in other European States."
(6) Measures to safeguard against the possibility of surprise attack.
(7) Expansion of world trade.
(8) Cessation of "war propaganda."
(9) Easing of tension in the Middle East.

In addition, the meeting could also discuss "other constructive proposals designed to halt the 'cold war' that might be tabled by other parties to the talks." Marshal Bulganin added that "it goes without saying that all participants should be unanimously agreed as to the necessity for considering such proposals." As regards questions which offered "little hope of a mutually acceptable solution at the present time," the meeting might "agree on the procedure for discussing them at a subsequent stage in the negotiations between States."

Marshal Bulganin expressed disappointment at President Eisenhower's "negative attitude" to his suggestion that the U.S.A. and the U.S.S.R. should proclaim "a firm determination to develop relations of friendly and peaceful co-operation." As regards the President's references to the U.N. Charter, he said that the Soviet proposals were "designed to strengthen world peace and are in complete accord with the principles of the Charter," adding that the dissolution of such "military groupings" as NATO, SEATO, and the Baghdad Pact was necessary if the aims of the Charter were to be fulfilled.

President Eisenhower's proposal that the U.S.A. and the U.S.S.R. should agree to abandon the veto power was described by Marshal Bulganin as "a departure from the unanimity principle of the Great Powers in the Security Council, which is the mainstay of the very existence of the U.N. Organization . . . and prevents the adoption of important political decisions which would ignore the interests of States in the minority." He added: "The United Nations is not a kind of world government adopting laws and decisions that are binding on all States. When the U.N. was formed it was intended . . . that States should voluntarily undertake obligations to fulfil the provisions of the Charter, while fully retaining their independence of action . . . The removal of this [unanimity] principle would lead to abuses, to violation of the interests of the minority, and to attempts to use the Organization in the interests of a single Power or group of Powers . . ."

Reiterating his Government's "well-known attitude" on the German question, Marshal Bulganin declared "clearly and unequivocally" that the reunification of Germany could only be achieved by a *rapprochement* between the two German States. With regard to the East European countries, the Soviet Government's position "requires no explanation" and "polemics on this question would be useless." Any discussion of the social and economic regimes of those countries would constitute "an intolerable interference in the domestic affairs of sovereign States." As regards Hungary, Marshal Bulganin said that the events of 1956 had "demonstrated that the Hungarian people were able to give a due rebuff to the elements who, acting on the instructions and with the support of certain foreign circles, raised their hand against the social system chosen by the people of Hungary."

Marshal Bulganin agreed with President Eisenhower on the importance of using outer space for peaceful purposes only, but said that this question could be considered "only as part of the general problem of banning nuclear and rocket weapons." The Soviet Union was willing to examine the question of outer space, and also of intercontinental rockets, if the Western Powers were willing to "reach agreement to ban atomic and hydrogen weapons, to end tests of those weapons, and to dismantle foreign military bases on the territories of other States."

Finally, Marshal Bulganin rejected the proposal that a "summit" meeting should be preceded by a Foreign Ministers' meeting, on the ground that "the biased attitude of certain possible participants in a ministerial conference" would create "additional obstacles" to a summit conference and might "nip this important measure in the bud."

In his reply, dated Feb. 17, President Eisenhower described Marshal Bulganin's latest letter as "a slightly abbreviated and moderated edition of the lengthy and rather bitter speech which Mr. Khrushchev made at Minsk on Jan. 22" [see below]. The President added: "I begin to wonder whether we shall get anywhere by writing speeches to each other. As I have read your successive lengthy missives, I cannot avoid the feeling that if our two countries are to move ahead to the establishment of better relations, we must find some ways other than mere prolongation of repetitive public debate."

President Eisenhower continued: "I tried in my letter to you of Jan. 12 to put forward some new ideas. For example, I proposed strengthening the U.N. by some reduction in the use of the veto power in the Security Council. That proposal you reject, alleging

that it would give the Security Council power to 'adopt decisions that would be binding on all States' and make it in effect a 'world government.' That argument is a misrepresentation of my proposal. I suggested that our two nations should avoid vetoing Security Council recommendations as to how nations might proceed toward the peaceful solution of their disputes . . . Already, the General Assembly can, free of veto, recommend procedures for peaceful settlement. Would it really be catastrophic for the Security Council to exercise that same facility?

"Another new idea was that outer space should be perpetually dedicated to peaceful purposes . . . Mr. Khrushchev in his Minsk speech said, 'This means they want to prohibit that which they do not possess.' Since the record completely disproves that uncalled-for statement, may we now hope between us to consider and devise co-operative international procedures to give reality to the idea of the use of outer space for peace only?

"When the United States alone possessed atomic weapons and the Soviet Union possessed none, the U.S.A. proposed to forego its monopoly in the interest of world peace and security. We are prepared to take the same attitude now in relation to outer space. If this peaceful purpose is not realized, and the worse than useless race of weapons goes on, the world will have only the Soviet Union to blame, just as it has only the Soviet Union to blame for the fact that atomic and nuclear power are now used increasingly for weapons purposes, instead of being dedicated wholly to peaceful uses, as the U.S.A. proposed a decade ago . . .

"A terrible new menace can be seen to be in the making—the use of outer space for war purposes. The time to deal with that menace is now. It would be tragic if the Soviet leaders were blind or indifferent to this menace as they were apparently blind or indifferent to the atomic and nuclear menace at its inception a decade ago.

"With respect to the meeting of Heads of Government, the cumulative effect of your last three missives is to leave considerable puzzlement as to what you think another such meeting could contribute to a genuine settlement of our problems. You have proposed, and insisted on, about ten topics which you want to have discussed at such a meeting. I, in turn, suggested some eight topics which I thought should be discussed . . . I wrote that, if there were to be a top-level meeting, I would be willing to discuss your proposals in good faith if you would so discuss mine. Your answer is that I must be prepared to discuss your proposals but that, as regards mine, there must be 'unanimous agreement of all participants as to the necessity for considering such proposals.' In other words, you demand the right to veto discussion of the matters I believe to be vital to peace.

"I note that Mr. Khrushchev devoted a considerable part of his Minsk speech to a discussion of the conditions in Hungary, Poland, and East Germany. Does the Soviet Union claim such a proprietary interest in these lands and peoples that to discuss them is solely a matter of Soviet domestic concern? . . . If indeed a top-level conference were to apply the formula that no-one is to say anything except what all the rest agree they would like to hear, we would end up in the ludicrous posture of just glaring silently at each other across the table . . .

"'Polemics' will not, I fear, advance us along the path of better relations, which is my nation's goal. Indeed, I deplore the constantly mounting accusations in the Soviet Union that the U.S.A. is . . . ruled by aggressive, war-minded imperialists. Mr. Khrushchev's speech of Jan. 22 is an outstanding example of such charges, and indeed they are to be found in your note of February 1.

"What is the explanation of such charges? They seem to fly in the face of established history. Until the end of the First World War, war was generally accepted as a lawful means of conducting foreign policy. But after World War I showed the terrible consequences of such toleration of war, the U.S.A. took the initiative in bringing about the Pact of Paris whereby the nations of the world renounced war as an instrument of national policy. An even broader renunciation of force is now found in the U.N. Charter. The United States, which initiated the concept of the international renunciation of force, has sought to adhere scrupulously to that concept.

"I am really amazed to be told by Soviet leaders, who have never even been near this country, that there are in the United States those who, in your words, 'utter the dangerous call for preventive war' and conduct 'unrestrained propaganda for war.' If any such persons exist in the United States, I do not know of them; nor do I know of any 'imperialist ruling circles' that are supposedly eager to plunge the world into war in order to make financial gains . . .

"It is, of course, quite true that our people are flatly opposed to regimes which hold people against their will and which deny the principle on which our nation was founded—that Governments derive their just powers from the consent of the governed, and can never rightly deprive the governed of their inalienable right to life, liberty, and the pursuit of happiness. Our people's rejection of many foreign and domestic aspects of Soviet methods and policies is, however, demonstrably not a moving cause to war. Otherwise we would have struck when we had atomic weapons and the Soviet Union had none; or when we had thermo-nuclear bombs and the Soviet Union had none.

"When I contrast the actual facts of American life with such portrayals as those of Mr. Khrushchev at Minsk . . . I am impressed more than ever before with the enormous difficulties besetting us in attempting to move toward better relations, and with the greater necessity than ever before of doing so. It is possible that the Soviet leadership feels it necessary deliberately to misrepresent the American viewpoint . . . I prefer, however, to assume that these misrepresentations are not wilful but result from genuine misconceptions which could be done away with . . ."

Mr. Khrushchev's Minsk speech of Jan. 22, referred to by President Eisenhower, was that in which he had announced the new Soviet agricultural policy with regard to the sale of machine-tractors [see 16038 A]. In addition, Mr. Khrushchev had spoken extensively on the international situation, with special reference to the position in Eastern Europe, and of Soviet technological achievements.

Speaking of the "events of 1956," with special reference to Hungary, Mr. Khrushchev said that "reactionary buzzards, in transports of joy, were croaking for all the world to hear that a crisis of Communism had set in and that the Soviet Union and the people's democracies had come up against difficulties with which they could not cope." The Soviet Union, however, had given "fraternal assistance" to Hungary, as a result of which "the counter-revolutionary gangs were routed and revolutionary order restored." Mr. Khrushchev admitted that "certain difficulties" had also arisen in other East European countries, "particularly in Poland," but said that his recent talks with the Polish leaders [see 16016 A] had convinced him that Poland would "succeed in overcoming existing difficulties and achieve new successes in developing the country's socialist economy and raising the living standards of the people." Both in the U.S.S.R. and the "people's democracies" the predictions of a "crisis of Communism" had "failed miserably," and "these forecasts of our opponents have collapsed."

Speaking of Soviet technological achievements, Mr. Khrushchev said that the launching of the two Soviet earth satellites, the second weighing 508 kilograms [half a ton], had been followed by the launching in America of "a satellite the size of an orange" weighing about 1¼ kilograms [3¼ lb.]. After referring to the successful development of a Soviet inter-continental ballistic missile, he said that the U.S.S.R. possessed "rockets which could be delivered to any area on the globe so as to strike a crushing blow at the aggressors if they attempted to unleash a new war."

Much of Mr. Khrushchev's speech was a recapitulation of the Soviet viewpoint on international questions as set out in Marshal Bulganin's letters, dealing with nuclear disarmament, the German question, the proposals for a "summit" conference, the creation of an atom-free zone in Central Europe, and the necessity for "peaceful co-existence."

In yet another letter to President Eisenhower, presented in Washington on March 6, Marshal Bulganin expressed his willingness for a meeting of Foreign Ministers preparatory to a summit conference—thereby reversing his previous refusal to agree to such a meeting.

Marshal Bulganin expressed the opinion that his correspondence with President Eisenhower had "had its positive effect and has played a definite part in the preparations for a conference." He denied that the Soviet Government was insisting that only its own proposals should be discussed, or that it would refuse to examine the issues raised by President Eisenhower, saying in this connexion: "The Soviet Government's only consideration in putting forward these problems for discussion [i.e. the agenda proposed in his previous letter] is its conviction that the best way to initiate a general *détente* under present conditions is to solve the most urgent problems that can be solved here and now, without detriment to the interests of any State . . . We do not believe, and have never stated, that a summit conference should discuss only those questions suggested by the Soviet Union . . . This does not mean, however, that we can agree to discuss issues which fall within the province of internal affairs of other States, the examination of which could have no other result than a further exacerbation of relations between States. The situation in the countries of Eastern Europe and the unification of the German Democratic Republic and the German Federal Republic fall precisely within that category . . . Discussion of such issues would mean inadmissable interference in the internal affairs of sovereign States—a course which the Soviet Union will not take under any circumstances."

The Soviet Prime Minister said that his Government had "thoroughly studied" President Eisenhower's latest letter and were prepared to discuss the following subjects at a summit conference, additional to those earlier proposed: (i) "the question of banning the use of outer space for military purposes and of closing down foreign military bases on the territory of other States"; (ii) "the question of concluding a German peace treaty," with the participation of representatives of both German States. Marshal Bulganin reiterated that the question of German reunification, as distinct from that of a peace treaty, was "wholly within the competence of the two German States and . . . cannot be a subject for discussion at the projected summit conference."

After saying that his Government believed that "all ways and means should be used" to expedite the preparations for a summit conference, Marshal Bulganin added: "Some of the questions involved could, we presume, be settled through diplomatic channels, and these naturally must be used. At the same time we take into consideration the fact that the United States and some other Governments have suggested a Foreign Ministers' conference as a preparatory step to a summit conference. If you feel that a Foreign Ministers' conference would help to expedite a conference of Heads of Government, we are ready to meet this suggestion half-way . . ."

The Pineau-Gromyko Correspondence.

Meanwhile, the French Foreign Minister (M. Pineau) had sent a letter on Feb. 13 to the Foreign Minister of the U.S.S.R. (M. Gromyko) proposing that "summit" talks should be preceded by a conference of Foreign Ministers which would be "entrusted with drawing up the agenda for a conference at higher level and determining the list of Heads of Government who should be invited to attend." M. Pineau's letter to M. Gromyko had been preceded by private discussions with the Soviet Ambassador in Paris, M. Vinogradov.

In his reply (March 1) M. Gromyko said that the Soviet Government were prepared to agree to a Foreign Ministers' meeting "in the very near future," with the "limited task of preparing the agenda and determining the composition of the conference of Heads of Government." The Soviet Government also believed that parallel negotiations should be conducted through diplomatic channels. After suggesting that the Foreign Ministers' meeting should be held in Geneva in April, and the conference of Heads of Government in June, M. Gromyko proposed that the West should be represented at both conferences by France, Great Britain, the United States and Italy, and the East by the Soviet Union, Poland, Czechoslovakia, and Rumania. Certain "uncommitted" countries should also participate, in agreement with both sides.

Soviet Aide-Mémoire to United States. - Proposed Agenda for Foreign Ministers' Conference.

The Soviet Government's agreement to a Foreign Ministers' meeting preparatory to a "summit" conference was also conveyed by M. Gromyko to the U.S. Ambassador in Moscow (Mr. Llewellyn Thompson) on Feb. 28 in the form of an *aide-mémoire*. A suggested agenda was also proposed, incorporating the nine points contained in Marshal Bulganin's letter of February 1 to President Eisenhower, together with two additional matters raised by the President.

The *aide-mémoire* expressed the Soviet Government's view that the preparatory conference of Foreign Ministers should be "strictly confined to issues pertaining to the organizational side of the preparations for a summit conference." As regards its composition, it should—in the Soviet Government's opinion—"include roughly the same countries which are to take part in the summit meeting" For example, it could be attended by representatives of all the member-States of NATO and the Warsaw Treaty Organization, and also by representatives of "uncommitted States such as India, Afghanistan, Egypt, Yugoslavia, Sweden, and Austria" If, however, a more limited composition was considered desirable, it could include the United States, Great Britain, France, Italy, the Soviet Union, Poland, Czechoslovakia, Rumania, India, Sweden, and Yugoslavia. The Soviet Government would agree to convening the Foreign Ministers' meeting "at a place acceptable to the other participants in such a conference."

As regards the agenda of the "summit" conference, the Soviet Government proposed the nine points mentioned by Marshal Bulganin plus two others raised by President Eisenhower—(i) a ban on the use of outer space for military purposes, and (ii) the conclusion of a German peace treaty. Discussions with regard to (i) should include "the elimination of foreign bases on the territories of other States." With regard to (ii), the *aide-mémoire* reiterated that the problem of German reunification "cannot be the subject of discussion." Similarly, any discussion of the internal situation in the Eastern European countries would constitute "inadmissible interference in the internal affairs of sovereign States, to which the Soviet Union will in no case be a party."

President Eisenhower discussed the Soviet *aide-mémoire* with Mr. Dulles, and also had a meeting on March 3 with M. Menshikov, who had succeeded M. Zarubin as Soviet Ambassador in Washington.

The appointment of M. Mikhail Menshikov as Ambassador in Washington *vice* M. Zarubin had been announced in Moscow in December last. M. Menshikov (55), an economist, was Minister of Foreign Trade from 1949-51 and Ambassador to India from 1953 until his appointment to Washington. It was stated that M. Zarubin would be given a new appointment.

U.S. Reply to Soviet Aide-Mémoire.

The American reply to the Soviet *aide-mémoire* was delivered in Moscow on March 6. Whilst welcoming the fact that the Soviet Government was now prepared to agree to a Foreign Ministers' meeting prior to a summit conference, it expressed "regret that the character of the preparation envisaged by the Soviet Government falls short of what would be required, in the opinion of the U.S. Government, to assure that such a meeting would actually serve to reduce international tensions."

The U.S. reply said: "The Soviet Government memorandum, and the preceding letters of December and January from Chairman Bulganin to President Eisenhower, raises a basic question in relation to a 'summit' meeting: What is the purpose for which a 'summit' meeting would be held? Is it merely to stage a spectacle? Or is it to take meaningful decisions?

"The United States wants a meeting of Heads of Government to take meaningful decisions which would begin seriously to resolve at least some important political issues; inaugurate some significant steps to limit armaments; and, by such decisions, to create an atmosphere conducive to further settlements. Anything less would not respond to the hopes of mankind. If a meeting of Heads of Government is to take meaningful decisions, then the groundwork for these decisions would have to be prepared in advance.

"The letter of Chairman Bulganin to President Eisenhower of Feb. 1, 1958, states that the agenda should concentrate on 'the most urgent problems, with regard to which the known positions of States provide a certain degree of assurance as to their positive solution at this time . . .'

"What are these matters? The presently declared positions of the Soviet Union and the United States do not as yet indicate the probability of agreement as to any matters of significance that have been proposed by either of our Governments in the course of the extensive correspondence. How shall areas of possible agreement be found, developed and defined?

"The Soviet memorandum says that the preparatory work of the Foreign Ministers should be 'strictly limited to questions relating to the organizational side of preparation for a meeting at the summit.' The U.S. Government does not press for placing upon the Foreign Ministers all the preparatory work, provided there is some other acceptable procedure. But it is convinced that, if there is to be a meeting of Heads of Government, substantive preparatory work must take place in some way to ascertain whether such a meeting would meet the criteria which both Governments accept. The U.S.A. suggests, as an alternative or supplementary means, the use of diplomatic channels.

"With respect to Soviet statements as to a desirable agenda, the position of the U.S. Government concerning certain specific items is as follows:

(1) The United States believes that any new meeting of Heads of Government should not ignore the preceding meeting but should preferably begin where that meeting left off. Meetings of Heads of Government will quickly lose the special significance and authority which is now ascribed to them if a second meeting consigns to oblivion the understandings and agreements of the first meeting.

(2) The Geneva 'summit' meeting of 1955 dealt with three main topics: (1) European security and Germany, (2) Disarmament; and (3) development of contacts between East and West. As regards the third item, persistent efforts over the last 2½ years have led to an agreement reached through diplomatic negotiations and concluded on Jan. 27, 1958 [see 16040 A]. While it is by no means all that we would desire, it does mark what we hope will be concrete progress on the third item of the 1955 agenda. With respect to the other two matters—European security and Germany, and disarmament—no progress has been made.

(3) At the Geneva conference of 1955 it was agreed that there was a 'close link between the reunification of Germany and the problems of European security.' The Heads of the four Governments recognized 'their common responsibility for the settlement of the German question and the reunification of Germany.' Furthermore, they agreed that 'the settlement of the German question and the reunification of Germany by means of free elections shall be carried out in conformity with the national interests of the German people and the interests of European security.' Yet the Soviet memorandum of Feb. 28 is emphatic that the reunification of Germany 'cannot be the subject of consideration at a forthcoming conference at the summit.'

(4) At Geneva it was agreed that we would 'work together to develop an acceptable system for disarmament through the sub-committee of the U.N. Disarmament Commission.' Yet the Soviet Union now declines to work through the sub-committee or, indeed, the Disarmament Commission itself.

(5) With respect to the agenda in general, the Soviet Government seems to claim a veto power without according reciprocity in that respect. The U.S Government suggests that there must be reasonable 'give-and-take' in the selection of items for discussion. In any event, the United States would not find it possible to enter a conference in which special privilege and authority were accorded in advance to any other State . . .

"The Soviet memorandum indicates that the 'summit' meeting should . . . result in the 'creation of conditions for the peaceful collaboration of all States.' This greatly-to-be-desired result cannot, however, be achieved if there are excluded from consideration the principal causes of international tension.

"A basic cause—perhaps the basic cause—of tension is the support by the Soviet State of the world-wide ambitions of international Communism. Other major causes of tension are the enforced partition of Germany, and external interference in countries of Eastern Europe which result in denying to the peoples their right freely to choose their own Government . . . The United States also believes that there must be effective measures of disarmament, including steps to curb the production of nuclear weapons and the means of their delivery . . . The Soviet memorandum does not suggest dealing with this problem . . .

"It is not necessary that all the problems that confront and divide us should be resolved at one time. But we do believe that, if there is to be a meeting of Heads of Government, it should deal, more effectively than did the last such meeting, with essential issues. . . . A meeting of Heads of Government that was merely ceremonial

or social, or which merely repeated promises already given or hopes already expressed, would not, in the opinion of the U.S. Government, be warranted . . . The United States reaffirms its desire that a meeting of Heads of Government will be held—not as a spectacle, not to reaffirm generalities, but to take serious decisions which will lead to an international atmosphere of co-operation and goodwill."

The Soviet terms for a summit meeting were also considered in Paris by the North Atlantic Council, which issued a brief statement on March 4 saying that " the U.S. delegate made a statement on the Soviet Note of Feb. 28 to his Government." A NATO spokesman said that the West " cannot accept a summit conference unless there is some agreement on matters of substance, including European security and German reunification."

The Bulganin-Macmillan Correspondence.

Marshal Bulganin sent a further 3,000-word letter to Mr. Macmillan on March 14 (in reply to Mr. Macmillan's letter of Feb. 8) broadly similar to that sent to President Eisenhower on March 6. Like the latter, it expressed the Soviet Government's willingness to participate in a meeeting of Foreign Ministers prior to a summit conference, and suggested that negotiations should also continue through diplomatic channels. Marshal Bulganin reiterated that the Soviet Union would not discuss the following matters at a summit conference : (1) the question of renouncing the " unanimity principle " [i.e. the veto in the Security Council] ; (2) the reunification of Germany ; or (3) conditions in the East European countries.

In the course of his letter Marshal Bulganin commented that the recent Anglo-American agreement on the establishment of missile sites in Britain [see 16063 A] " can contribute neither to the betterment of relations between our countries nor to the relaxation of international tension," and had introduced " a serious element of tension into the international situation." After alleging that the missile bases would have " targets in the Soviet Union as their objective," Marshal Bulganin also criticized the recent British White Paper on Defence [see 16029 A] on the ground that it " declares Britain's readiness to use atomic and hydrogen weapons against the Soviet Union first."

Soviet " Peace Plan " for Outer Space.

The Soviet Foreign Ministry issued on March 16 a four-point " peace plan " stating that the U.S.S.R. would agree to a prohibition on the use of outer space for military purposes, provided that " foreign military bases " were eliminated from the territory of other States. The four points were :

(1) Prohibition of the use of outer space for military purposes, and an undertaking by States to launch rockets only in accordance with an agreed international programme.

(2) Elimination of foreign military bases from the territory of other States, " first and foremost from Europe, the Middle East, and North Africa."

(3) Establishment, within the framework of the United Nations, of adequate international control to ensure implementation of the commitments under (1) and (2).

(4) Creation of a U.N. body for international co-operation in the field of outer space research, with the following functions : (*a*) to draw up an agreed international programme for launching intercontinental and outer space rockets for research purposes only ; (*b*) to continue on a permanent basis those types of outer space research being carried out as part of the International Geophysical Year programme ; (*c*) to serve as a world centre for collection, dissemination, and exchange of information on outer space research ; (*d*) to co-ordinate national research plans.

The statement accused the U.S.A. of (i) making " feverish efforts " to develop its own short- and medium-range rocket weapons while at the same time proposing a ban on the inter-continental ballistic missile ; (ii) suggesting the outlawry of the I.C.B.M. " while evading the question of eliminating American military bases on foreign territories designed to launch rocket weapons " ; and (iii) proposing to ban the use of outer space for military purposes with the aim of warding off retaliation through cosmic space, while at the same time " maintaining its numerous military bases on foreign territories intended for attacking the Soviet Union."

It was stated that the Soviet Union would agree to scientific co-operation in outer space matters " if agreement is reached on a radical solution of the disarmament problem, including a ban on atomic and hydrogen weapons." Moreover, agreement on these matters would facilitate world-wide co-operation between the U.S.A. and the U.S.S.R. in combating disease and drought and in developing arid regions of the world, as proposed by President Eisenhower in his State of the Union message [see page 16008, first column.] (New York Times - New York Herald Tribune - U.S. Information Service - Soviet Embassy Press Dept., London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Frankfurter Allgemeine Zeitung) **(Prev. rep. 15991 A ; 15975 A.)**

A. HONDURAS. — Constituent Assembly Elections. - Dr. Villeda Morales elected President of Republic.

Elections for a 58-member National Constituent Assembly were held in Honduras on Sept. 22, 1957, and were contested by three parties : the Liberals led by Dr. Ramón Villeda Morales, formerly Honduran Ambassador in Washington ; the Nationalists led by Señor Gonzalo Carias, a son of General Tiburcio Carias (the former dictator, who ruled the country from 1932 to 1948) ; and a Reformist Party led by Señor Abraham Williams. The Liberals won an overall majority with 37 seats, the Nationalists obtaining 18 and the Reformists three. The electorate numbered over 500,000 (of whom 40 per cent were women), and a modified form of proportional representation was introduced for the first time. No disturbances occurred except in El Paraiso province (near the Nicaraguan border), where several people were killed and injured in election incidents. The elections represented the first step in the restoration of constitutional government, which had been suspended since 1954 ; they also constituted the first defeat for the Nationalists since 1932, in which year General Carias became President of Honduras.

The Constituent Assembly elections were carried out under the aegis of the military junta which had ruled the country since the deposition of President Lozano in 1956 (see 15248 B). Of the three original members of the junta—Colonel Hector Carracioli, General Roque Rodriguez, and Major Roberto Gonzalvez Barnes—General Rodriguez had resigned in July, while Major Gonzalvez Barnes withdrew on Nov. 18, 1957 (after the elections) and was replaced by Colonel Oswaldo Lopez, the Defence Minister.

The resignation of Major Gonzalvez Barnes was caused by differences over a new constitutional provision placing the armed forces under the sole command of a Chief of the Armed Forces, who would be virtually independent of Parliamentary authority. The new Constituent Assembly approved this provision on Nov. 27 but added an amendment stipulating that the Chief of the Armed Forces should take his instructions from the President—a proviso which was believed to have been opposed by Major Gonzalvez Barnes. Another amendment was inserted allowing the Chief of the Armed Forces to appeal to the Constituent Assembly in the event of differences between himself and the President, and giving the Assembly power to decide such differences by majority vote. The Tegucigalpa Correspondent of the *New York Times* described this " ambiguous allocation of control " as " stemming from an agreement between Liberal Party leaders and the armed forces to ensure the military's acceptance of a Liberal victory."

It had been laid down that the Constituent Assembly, in addition to drafting a new Constitution (the Republic's fourteenth), would also decide whether to appoint a President itself or whether to call Presidential elections. The Assembly decided on the former course and accordingly elected Dr. Villeda Morales as President of the Republic on Nov. 25, 1957, by 37 votes to 19. President Villeda Morales will hold office for a six-year term.—(New York Times - Le Monde, Paris) **(Prev. rep. 15248 B.)**

B. POLAND - YUGOSLAVIA. — Creation of Committee for Economic Co-operation.

Following discussions held in Warsaw between Polish and Yugoslav Government delegations, an agreement was signed on Feb. 20 providing for the setting-up of a permanent Yugoslav-Polish Committee for Economic Co-operation.

A joint communiqué stated that the committee's task would be " the exchange of experiences in planning systems and economic organizations in the two countries ; the examination of questions relating to the expansion of their economic co-operation ; and the submission of recommendations to the two Governments for the extension of their trade exchanges, co-operation in the development of industrial production, research and scientific work, and co-operation of banks and commercial enterprises." The committee would initiate and develop direct contacts between individual enterprises, groups of enterprises, and the institutions and organizations concerned in both countries.

The communiqué also said that the committee, which had already started to function, had found that co-operation in the fields of transport, transit of goods, and tourist traffic could be expanded ; that there were possibilities of broad industrial co-operation, mutual technical assistance, and co-operation between scientific research institutes; and that there was room for a further widening of mutual commercial exchanges.

The agreement, which implemented a decision taken by President Tito and M. Gomulka during the latter's visit to Belgrade in September 1957, was signed by M. Jaroszewicz (a Polish Deputy Premier) and M. Vukmanovich-Tempo (a Vice-Chairman of the Yugoslav Federal Executive Council). (Polish Embassy, London - Tanjug Agency, Belgrade) **(Prev. rep. 15807 A.)**

A. EGYPT - SUDAN. — Egyptian Claim to Sudanese-administered Areas North of 22nd Parallel. - Sudanese Appeal to Security Council.

A crisis in relations between Egypt and the Sudan developed during February as a result of claims put forward by the Egyptian Government to two areas lying north of the 22nd parallel, which have been administered as part of the Sudan since 1902. The dispute was precipitated by the approach of the plebiscite on the formation of the United Arab Republic, held on Feb. 21, and of the Sudanese general elections, which began on Feb. 27.

The Egyptian claim was based on the agreement of 1899 establishing the Anglo-Egyptian condominium in the Sudan, which laid down that the 22nd parallel should form the boundary between Egypt and the Sudan. This frontier, however, divided in two certain villages and the territories of certain nomad tribes, and the Governor-General of the Sudan accordingly issued a decree in 1902 whereby two areas north of it were incorporated in the Sudan for administrative purposes and a third area south of it became Egyptian territory. The Egyptian Minister of the Interior subsequently issued a decree in 1907 recognizing the new boundary.

In support of the Sudanese claim to the disputed areas, it was pointed out that the transitional Constitution defined Sudanese territory as that forming the Anglo-Egyptian Sudan at the date of its entry into force on Jan. 1, 1956. The Egyptian Government, on the other hand, maintained that the transitional Constitution, having been drawn up unilaterally, did not affect the 1899 agreement, which was the only international treaty on the subject. The Sudan pointed out, however, that the inhabitants of the disputed territories possessed Sudanese nationality and had voted as such in the first Sudanese parliamentary elections in 1953, which had been held in implementation of the Anglo-Egyptian agreement of February 1953 on self-government for the Sudan; on the other hand, they had never voted in any Egyptian parliamentary election or plebiscite.

Three areas were involved in the dispute: (1) a large triangular area bounded on the east by the Red Sea, on the south by the 22nd parallel, and on the west by a line running north-eastward from a point about 150 miles west of the coast to reach the coast roughly at the 23rd parallel; it includes the fishing village of Halaib, where there is a Sudanese police post, and contains some mineral deposits. (2) A desert area of Egyptian territory to the west of the first area, lying south of the 22nd parallel. (3) About 140 square miles of Sudanese territory north of the 22nd parallel, on both banks of the Nile north of Wadi Halfa, which would be submerged if the Egyptian project for the Aswan High Dam were carried out.

[Talks on the revision of the 1929 Nile waters agreement, including the effects of the Aswan Dam project on the Sudan and any compensation payable to the displaced Sudanese population, had been resumed in Cairo in December 1957 between a Sudanese delegation led by Mr. Mirgani Hamza (Minister for Irrigation) and an Egyptian Government delegation, but had been suspended to "permit the delegations to consult their Governments."]

The Egyptian Government put forward its claim (*a*) in a Note of Feb. 1, which drew attention to the fact that the Sudanese Government were making arrangements for elections in areas north of the 1899 frontier, and (*b*) in a second Note of Feb. 13, which asked for an early settlement and offered to exchange the Egyptian territory south of the 22nd parallel for the two Sudanese areas north of it. Although the Sudanese Government asked for the question to be postponed until after the general elections, a third Egyptian Note (Feb. 16) stated that Egyptian officials would be sent into the disputed area to conduct the plebiscite on the United Arab Republic.

Meanwhile the Sudanese Government had despatched a small Army unit to Halaib after it had received reports on Feb. 9 that Egyptian troops were being sent to the area. Another Army unit was subsequently sent to Wadi Halfa following the unexpected arrival in Sudanese waters on Feb. 16 of an Egyptian steamer carrying a number of Egyptian officials, who were turned back by the Sudanese authorities because they had no entry permits.

A fourth Egyptian Note was presented in Khartoum on Feb. 18 protesting against the Sudanese Government's action in sending troops to Halaib, demanding their immediate withdrawal, and insisting that the area should be included in the Egyptian plebiscite.

A communiqué issued in Cairo on the same day denounced the Sudanese troop movements as a "flagrant violation" of the 1899 agreement; denied that the Egyptian officials who had entered the Halaib area had been accompanied by troops; and alleged that the Sudanese Government, by making the dispute public, had broken an agreement that the exchange of views between the Governments should be kept secret. In a message to Sayed Abdel Rahman (leader of the Ansar sect, which is closely connected with the ruling Umma Party), President Nasser strongly protested against allegations that Egypt had "invaded" the Sudan, which had appeared in the Umma Party press and which he categorically denied.

The Sudanese Cabinet immediately rejected the demands contained in the Egyptian Note of Feb. 18; in a statement issued the same day it declared that "we shall not hesitate in defending our sovereignty, territory, and dignity with all the power we possess if Egypt persists in her present attitude."

Earlier the same day (Feb. 18) the Sudanese Foreign Minister (Mr. Mahgoub) had flown to Cairo for talks with President Nasser and Dr. Fawzi, the Egyptian Foreign Minister. Mr. Mahgoub proposed that the Egyptian officials and police in the Halaib area should be withdrawn, and that elections to the Sudanese Parliament should be held in the disputed areas on the understanding that this would not prejudice Egypt's claim in later negotiations. This proposal was rejected by the Egyptian Government, which suggested that either all forces should be withdrawn from the disputed areas and neither the plebiscite nor the elections should be held there, or alternatively that both should be held, but that the population should vote at polling stations outside the disputed areas. Both proposals were rejected immediately by the Sudanese Cabinet, and Mr. Mahgoub returned to Khartoum.

The Sudanese Government sent a letter on Feb. 20 to the U.N. Secretary-General (Dr. Hammarskjold) alleging that there had been a "huge infiltration" of Egyptians into the disputed area, "backed by a concentration of Egyptian troops on the border," and requesting an immediate meeting of the Security Council so that that body could "use its offices to stop the Egyptian aggression." After setting out the legal arguments in support of the Sudanese claim, the letter expressed "deep concern" at the "unprovoked and illegal attitude of the Egyptian Government, which constitutes a breach of Sudanese sovereignty." It declared that "since the Sudan is determined to defend its territory, the situation might result in a breach of the peace and, if uncontrolled, may develop into armed conflict."

Thirteen Egyptian officials who landed on Feb. 20 from a Nile steamer at the village of Debeira (in the western disputed area north of Wadi Halfa) to conduct a plebiscite were detained by the Sudanese authorities, together with their 13-man escort (including six Army and police officers) and the ship's crew of 14. In the eastern disputed area, however, the Egyptian flag was hoisted on Feb. 21 at Abu Ramada (15 miles north of Halaib and 80 miles within the Sudanese administrative bounday) by the Egyptian electoral commissioner (Colonel Jawheri), who refused to leave the area when requested to do so by the local Sudanese district commissioner. Reports from Khartoum alleged that Colonel Jawheri was in command of a military force, though estimates of its strength varied from "a small border guard" to 200-300 men.

The Egyptian Government announced on Feb. 21 that it had decided to postpone the settlement of the frontier dispute until after the Sudanese elections, and that negotiations on all undecided questions would begin after the new Sudanese Government had been elected. The statement added: "Egypt will not reply to provocations which have attempted to present the position in the form of an armed intervention or of an invasion of the Sudanese territories, at a time when only normal frontier patrols are on the southern borders."

Cairo Radio stated that the Government had made its decision after studying messages which had been received from Sayed Ali el-Mirghani (leader of the Khatmia sect) and Mr. Azhari (the leader of the National Unionist Party, and former Sudanese Premier). No official intimation of this decision, however, was sent to the Sudan Government, which protested strongly on Feb. 22 against this omission, and also against the hostile attitude of Cairo Radio and the Egyptian Press.

When the Security Council met on Feb. 21 to consider the Sudan's complaint, the Sudanese delegate (Mr. Osman) said that it was with "profound regret" that his Government had brought the "grave situation" before the U.N., and expressed the hope that the Council would "adopt measures which will calm the situation." Mr. Omar Loutfi (Egypt), announcing his Government's decision, said that he was confident that the dispute would be "settled within the framework of friendly relations which for centuries have bound the two nations together." He deplored the Sudanese Government's "hasty" appeal to the Council, which, he said, had been made before other means of settlement had been exhausted.

The Sudanese Government announced on Feb. 25 that the Egyptian flag had been hauled down at Abu Ramada and that the Egyptian forces there had moved, although it was not known whether or not they had left Sudanese territory. The Egyptians who had been detained at Debeira were released on Feb. 28, together with their ship.—(Times - Daily Telegraph - U.N. Information Centre, London - New York Times)

A. EASTERN GERMANY. — Purge of Socialist Unity Party Leadership. - Action against "Schirdewan Group." - Decentralization of Industry. - The Five-year Plans. - Soviet Aid for Chemical Industry.

A major crisis in the leadership of the East German Socialist Unity (Communist) Party came to a head at a meeting on Feb. 3-6, when the party's Central Committee took disciplinary measures against three of its leading members who were accused of forming "an opportunist group which had attempted to change the political line of the party" (i.e. the "Stalinist" policy of Herr Walter Ulbricht, the party's First Secretary). Herr Karl Schirdewan, the party's chief of personnel and an economic expert, who had acted as First Secretary during the illness of Herr Ulbricht in 1955 and was regarded as his probable successor, was expelled from the Central Committee and the Politburo; Herr Ernst Wollweber, who had already been removed from his post as Minister of State Security on Nov. 1 [see 15865], was also expelled from the Central Committee; and Professor Fred Oelssner, a Deputy Premier and the party's leading theoretician, was expelled from the Politburo but not from the Central Committee. Professor Oelssner was subsequently deprived of his post as Deputy Premier on Feb. 16.

According to a report presented to the Central Committee by Herr Honecker (a member of the secretariat), Herr Schirdewan had "misinterpreted" the decisions of the 1956 Soviet Communist Party congress, which he had regarded as the signal for a relaxation of tensions and abandonment of "the war against the class enemy." At meetings of the Central Committee in October 1956 he had insisted that the party should take note of recent developments in Hungary and Poland and should incorporate "safety valves" into the political system by pursuing a policy of democratization. He had subsequently sought to protect "the counter-revolutionary Harich group" [see 15560 A] and had formed a "fraction," with Herr Wollweber and others, with the aim of changing the party's policy.

Herr Schirdewan's group was also accused of advocating German reunification "at any cost," of misunderstanding the policy of relaxing international tension to the extent of ignoring the need to maintain Eastern Germany's security, and of under-estimating "the constant efforts of militarists to undermine the German Democratic Republic." Both Herr Wollweber and Professor Oelssner were said to have taken a negligent view of the fight against "enemy agents," who were thereby enabled to obtain confidential information. Professor Oelssner was not accused of being a member of the Schirdewan group, but was said to have given it indirect support by advocating the liberalization of agricultural policies and opposing the party's policy of industrial decentralization.

Decentralization of Industry.

At a two-day session on Feb. 10-11, the East German *Volkskammer* approved a Bill for decentralization of industry similar to that recently carried out in the Soviet Union [see 15775 A]. Under the Bill the Ministries of Mining, the Chemical industry, Coal and Power, Heavy Engineering, General Engineering, Light Industry, the Food Industry, and Labour and Professional Training were abolished, and overall control of industrial and agricultural production was vested in the State Planning Commission, which had previously been responsible only for long-term planning. The more important branches of industry were grouped in "Associations of Nationally-owned Enterprises," under the Commission's supervision, and Economic Councils were set up in the 14 administrative districts to run industries of lesser importance; it was stated that these councils would enjoy considerable independence but would be responsible both to the State Planning Commission and the district governments.

It was claimed that the effect of the reorganization would be to abolish detailed governmental control of all stages of industry and agriculture, and to place more responsibility in the hands of managements of the nationalized enterprises and the local authorites. Herr Leuschner, a Deputy Premier, retained his post as chairman of the State Planning Commission, whilst the heads of six of the dissolved Ministries were appointed to the Commission as heads of various departments.

The Five-year Plans.

The second East German Five-year Plan, covering the years 1956-60, was approved by the *Volkskammer* on Jan. 9. The delay in presenting the Plan for parliamentary approval, after it had been originally submitted to the Socialist Unity Party congress in March 1956, was officially attributed to various re-assessments which had been found necessary, and to the need for full co-ordination with the other Communist countries.

Announcing details of the Plan, Herr Leuschner said that the four basic problems were: (1) Priority development of basic industries, particularly coal, power production, chemicals and building materials. (2) Improvement of industrial technique, including further mechanization and automation. (3) A considerable increase in agricultural production, in order to satisfy the demand for meat, animal fats, and milk. (4) A speed-up in housing construction and a considerable increase in the production of consumer goods.

The State Planning Commission's report claimed that Eastern Germany occupied fifth place in total industrial production among the countries of Europe, and that among the Communist countries it came second only to the Soviet Union in the production of electric power, machine-tools, and many chemicals. Under the plan, the value of industrial production was scheduled to rise from 46,000,000,000 marks in 1955 to 56,000,000,000 marks in 1958 and 63,000,000,000 marks in 1960, an increase of 38 per cent. [This represented a considerable downward revision of the original plan put forward in 1956, which provided for an increase of 55 per cent.]

In 1955, the report stated, production of electric power amounted to 1,610 kw. per head of population; it was planned to increase this to 1,970 kw. in 1958 and 2,340 kw. in 1960. Eastern Germany's output of lignite (200,000,000 tons a year) was the highest in the world, and by 1960 would reach 244,000,000 tons. [The East German Press had previously announced that a newly-discovered process for converting lignite into coke had been put into operation at a plant at Lauchhammer (Saxe-Anhalt), and that a similar plant would be built in the Senftenberg area (60 miles S.E. of Berlin), where lignite deposits were estimated at 30,000,000,000 tons.]

The Plan also provided for (*a*) a greatly increased output of agricultural machinery; (*b*) greater production of animal fats and meat to cover consumption entirely from home production by 1965; (*c*) an increase in exports by 64 per cent over 1955, to be achieved by 1960, in order to make possible the import of larger quantities of raw materials and consumer goods.

Detailed results of the first Five-year Plan (1951-1955), published on Feb. 6, 1956, showed that a considerable increase in industrial production had been achieved since 1950, although many branches of industry had failed to reach the targets laid down for them.

It was claimed that industrial production as a whole had increased by 90 per cent since 1950, compared with a planned increase of 92 per cent. Production of machinery had risen by 200 per cent, although the planned increase had been only 115 per cent; on the other hand, production of iron ore (a 300 per cent increase), raw steel (150 per cent), textiles (150 per cent), soft coal, electric power, and houses had all fallen short of what had been planned. In agriculture, production of most crops except grains and pulses had failed to reach the target, owing partly to inadequate production of artificial fertilizers; it was claimed, however, that production of fats had risen by 400 per cent, and that of meat and fish by 150 per cent, a greater increase than had been planned. It was stated that 20 per cent of all arable land was being cultivated by collective farms.

Agreement with U.S.S.R. on Development of Chemical Industry.

A Soviet-East German agreement was signed in Moscow on Feb. 25 providing for co-operation between the two countries in developing the chemical industry of the German Democratic Republic. It laid down (i) that the U.S.S.R. would assist the reconstruction of the East German chemical industry by delivering the necessary materials to enable Eastern Germany "to satisfy fully her requirements in chemicals and to increase deliveries of chemical industry products to the U.S.S.R."; (ii) that the Soviet Government would grant Eastern Germany a long-term loan to help pay for the materials delivered by the U.S.S.R.; (iii) that Eastern Germany would repay the loan by deliveries of chemical products.—(East German News Agency, A.D.N. - Neues Deutschland, East Berlin - Frankfurter Allgemeine Zeitung - Soviet Embassy Press Dept., London) **(Prev. rep. Socialist Unity Party, 15267 A; East German Five-Year Plans, 19010 A; Economic Co-operation with U.S.S.R., 15818 C.)**

B. UNITED KINGDOM. — Bank Rate reduced.

The Bank of England announced on March 20 that the Bank Rate would be cut from seven per cent to six per cent. An official statement explained the decision as follows:

"The abnormal rise [in Bank Rate] from 5 to 7 per cent in September, 1957, was required both to defend sterling against the marked lack of confidence in the exchange markets of the world and also to support Government measures to maintain the real value of the pound.

"While there is still a need to strengthen further the overseas monetary position, the speculative pressure against sterling has ceased and such an exceptionally high level of short-term interest rates in London is no longer justified. But at home, although inflationary pressures are moderating, the reduction in Bank Rate does not imply any general relaxation in monetary policy."

The reduction came exactly six months after the increase in the Bank Rate to seven per cent—its highest level for 37 years. It was stated in the Press that the main factors behind the cut were obviously the great improvement in the gold and dollar reserves and the greatly decreased trade gap. (Financial Times) **(Prev. rep. 15790 D; 15770 A.)**

A. UNITED KINGDOM. — Royal Navy. - Estimates, 1958-59. - Abolition of Nore and East Indies Commands. - Closing of Sheerness and Portland Dockyards. - Changes in Admiralty Technical Organization and Dockyard Administration. - New Duties for Fourth Sea Lord.

A memorandum on the Navy Estimates for 1958-59, in which far-reaching changes were announced in naval structure and organization, especially with regard to shore support, was published as a White Paper on Feb. 18. The principal changes included (1) the abolition of the Nore Command; (2) the closing of Sheerness and Portland dockyards in 1959 and 1960 respectively; (3) the closing of certain naval establishments at Chatham; (4) the concentration of underwater weapon research at Portland (to be retained as a naval base) and the transfer thither of the Torpedo Experimental Establishment from Greenock; (5) the closing over the next three years of certain naval air establishments; (6) the abolition of the East Indies Command. It was also announced that a considerable number of warships in the Reserve Fleet would be sold.

The White Paper is summarized below under cross-headings.

Finance.

The White Paper pointed out that the net total of £339,400,000 for the Navy shown in the Defence Estimates [see 16029 A] was £23,400,000 higher than the 1957-58 figure, the increase being necessary to meet higher costs of materials and transport, increased rates of pay and allowances, higher National Insurance contributions, and compensation for premature retirement [see 15795 A]. The combined effect of these items would be to reduce the Admiralty's spending power on other Navy Votes in 1958-59 by about £6,000,000 as compared with 1957-58, but savings would again accrue from reductions in the numbers of naval personnel and reserves and of civilian employees. Other economies would be achieved by the closure of certain naval establishments [see below], further reductions in material stocks, reduced requirements for new equipment and for ship repairs and refits, and reorganization and reduction of services generally. Savings would also be made by revision of the programmes of new works and of stores and equipment, and by improved co-ordination of naval requirements with those of the Army and R.A.F. As regards research and development, the rising expenditure on nuclear propulsion would be met by reductions in less urgent parts of the programme.

General Policy.

The Navy's main functions in the nuclear age were described as (1) the maintenance of the freedom of the seas; and (2) the prompt handling of local situations which, if left uncontrolled, might lead to total war. The White Paper explained that the policy of diverting, where possible, the available resources from shore support to the fighting ships had continued during 1957. "This policy" it stressed, "will not only give the Fleet greater mobility and immediate readiness, but will ensure that . . . the reduction in the number of seagoing ships will be much less than the proportionate loss in manpower."

The core of the Navy would remain the aircraft carriers, around which would be grouped supporting ships carrying the latest weapons for dealing with air, surface, and underwater attacks, and able to act by themselves on detached services should the need arise. There was no intention of maintaining any part of the Fleet for global war alone; although a large proportion of ships had been assigned their duties in the maritime plans of NATO, each of them had its duties short of global war. "Uncertainty about the course and direction of global war . . . does not therefore restrict the role, size, or shape of the future Navy."

Disposition of the Fleet.

As the responsibilities of Britain and the Commonwealth in the East were "particularly large and scattered," stretching from Aden to Hong Kong and from Mombasa to New Zealand, it was intended to maintain continuously an aircraft carrier and supporting ships east of Suez and based on Hong Kong. These ships would have the necessary fighter and strike aircraft to afford them protection, to support ground operations, and to deal with submarine threats in the event of a limited war in that area. Their ability to give assistance when necessary would be reinforced by the provision of a Commando carrier [see below] able, by means of helicopters, to land commandos far inland.

In the Atlantic and Mediterranean, the interests of the U.K. and other NATO countries centred largely on the control of the oceans around which they were grouped. In view of the growing strength of the Russian submarine fleet, it was proposed that the Navy's contribution to NATO should be predominantly in the anti-submarine role. It was intended to have two aircraft carriers at sea in the NATO area, supported by two cruisers and a number of destroyers, frigates, and submarines, with a third aircraft carrier in immediate reserve. Frigates would also be kept in the West Indies and the South Atlantic, and the Royal Navy would continue to maintain a ship in Antarctica.

Composition of the Fleet.

Aircraft Carriers. Those now in service comprised the *Eagle*, *Ark Royal*, and *Bulwark*, but the two latter would be replaced during 1958 by *Victorious* and *Centaur*, now being modernized. In accordance with the fleet disposition policy described above, *Bulwark* would be deployed east of Suez during 1958 until relieved by *Albion* (now refitting), when she would return for conversion to the role of Commando carrier. The White Paper added that *Victorious* was undergoing sea trials after being virtually rebuilt at Portsmouth; when she rejoined the Fleet in August 1958 she would be "one of the most up-to-date aircraft carriers in the world," with a fully angled deck, steam catapults, and the most modern launching control system. Her electronic equipment, of the most advanced design, included a high-powered radar set able to detect aircraft targets at considerable range and show their position simultaneously in range, bearing, and height, and also having a new display system making it possible to clarify the airborne target situation quickly and easily. This combination, which would enable the capabilities of the latest and next generations of aircraft to be exploited to the full, was believed to be in advance of anything achieved by other navies. In due course the *Hermes* (still under construction) and the *Eagle* (when modernized) would be of a similar standard.

The Commando Carrier "Bulwark." When the conversion of *Bulwark* to a Commando carrier (the first such ship to be commissioned in the Navy) had been completed, she would be deployed east of Suez, together with a full strength commando and equipment. The *Bulwark* would carry sufficient stores and fuel to support the commando in active operations ashore, and would give the Royal Marines greater mobility and usefulness. She would be fully convertible to the anti-submarine role at short notice.

Cruisers. The three *Tiger* class cruisers [see 15619 A] were nearing completion and the first should be ready by the end of 1958.

Guided Missile Ships. Trial firings from H.M.S. *Girdle Ness* of the ship-to-air guided missile *Seaslug* had achieved "marked success" in 1957. Four guided missile destroyers had been ordered and would be given the names of former "County" class cruisers—*London*, *Hampshire*, *Devonshire*, and *Kent*.

Frigates. The programmes of converting destroyers to anti-submarine frigates had been completed, and the Navy now had 32 frigates. Of the 44 in current building programmes, 17 had been completed (9 during 1957-58) and 14 were still under construction, including 5 expected to be completed during 1958-59. The first "general purpose" frigate had been laid down.

Submarines. During 1957 three more fast battery submarines of the long-range *Porpoise* class had been launched, and three others were expected to come into service during 1958-59. These would be the first submarines to join the Fleet operationally for 10 years, the high-test peroxide submarines *Explorer* and *Excalibur* [see 15619 A] being for experimental and training purposes. Since the war, however, a large number of older submarines had been modernized or converted.

Much experimental work had been done (in association with the Atomic Energy Authority) on the nuclear submarine *Dreadnought*, and design work was proceeding, making use of information made available by the U.S. Navy. To strengthen the links between the Admiralty, the Atomic Energy Authority, and the contractors, the former had appointed a Technical Chief Executive who would have executive control of the *Dreadnought* project.

Aircraft. The first front-line squadron of *Scimitars* [see 15619 A], the Navy's first swept-wing aircraft, would be formed in June, and in due course this fighter would replace the *Sea Hawk*. The *Scimitar* would be followed by the *Sea Vixen* fighter, which would replace the *Sea Venom* and eventually become the principal long-range weapon of the Fleet's air defence system. Service trials of the *Sea Vixen*, which would be armed with the air-to-air guided missile *Firestreak* and fitted with interception radar installation, would take place later in 1958. The first Blackburn *N.A. 39* was also expected to fly in 1958.

As regards helicopters, the British-built *Whirlwind* had come into service in the second half of 1957, and a squadron had already been embarked, with others under formation. Meanwhile the *Wessex*, a more powerful helicopter with a heavier load capacity, was being developed to replace the *Whirlwind*. Helicopters would be increasingly used to locate and destroy submarines, and it was planned to order more of them.

Afloat Support. To increase the Fleet's ability to operate over longer periods independently of shore bases, a "Fast Fleet Replenishment Ship" (the *Retainer*) had completed conversion and would shortly join the Fleet. A second ship (the *Resurgent*) was also being converted, and a fast freighter had been acquired for conversion.

The Reserve Fleet. The policy of reducing the size of the Reserve Fleet and maintaining the more important ships in greater readiness would be continued.

Abolition of East Indies Command.

The East Indies Command would be abolished during 1958 and the Senior Naval Commander, Persian Gulf (at present subordinate to the C.-in-C., East Indies) would become an independent Commander. He would also act as naval deputy to the Commander, British Forces, Arabian Peninsula, and be responsible for naval forces in the Arabian Sea, Persian Gulf, Gulf of Aden, and Red Sea. The remaining responsibilities of the C.-in-C., East Indies, would be divided between the C.-in-C., Far East, and the C.-in-C., South Atlantic and South America.

The impending transfer of the Royal Malayan Navy from the Singapore Government to the Federation of Malaya would be marked by the abolition of the post of Flag Officer, Malaya, who had acted as naval adviser to the Governor of Singapore. His residual tasks would be taken over by the C.-in-C., Far East Station.

The Royal Dockyards and Shore Support.

To ensure that the available resources of men and money were used to the best advantage, a thorough review had been carried out of the future needs of the Navy ashore, together with a careful examination of the future of the Royal Dockyards and naval air establishments, and of the structure of the Home Command. As a result, it had been decided to abolish the Nore Command and to close H.M. Dockyards at Sheerness and Portland, the R.N. Aircraft Yard at Donibristle (N.B.), and five other air establishments. No other dockyards would be closed in the United Kingdom. Of the dockyards overseas, those at Singapore and Gibraltar would be retained; the forthcoming closure of the Hong Kong dockyard had already been announced [see 15894 D]; and the future of the dockyard at Malta would be decided after consultation with the Maltese Government [see 15972 A].

The consequences of these decisions would be as follows:

(1) The Nore Command and the post of C.-in-C., The Nore, would be abolished and the C.-in-C.'s present functions (in both his national and NATO capacities) transferred to other authorities by April 1, 1961. Responsibility for naval establishments remaining in the Command area would be allocated to another Command.

(2) Sheerness Dockyard would be run-down by April 1960, but before closure every effort would be made to dispose of the yard to industrial or commercial interests. Of the 2,500 industrial and non-industrial staff employed, about 1,100 were established, and as many of these as possible would be absorbed into Chatham Dockyard. The balance (mostly unestablished employees) would be reduced by normal wastage and discharge. The R.N. Base (H.M.S. *Wildfire*) and the Chart and Boom Defence Depots at Sheerness would be closed at the same time.

(3) Chatham Dockyard would be retained, but by April, 1961, H.M. ships would normally be refitted there with only key personnel on board. The barracks and other naval establishments at Chatham would be closed or transferred as follows: R.N. Barracks—to be closed by April 1961; R.N. Supply and Secretariat School (H.M.S. *Ceres*)—to be housed in Chatham Barracks for at least two years and then moved (probably to Portsmouth); Mechanical Training Establishment—to be transferred (probably to Portsmouth) by September 1960; R.N. Hospital—to cease as such by April 1961; Chatham Torpedo Depot and Gunwharf Workshops—to be closed by the end of 1958, the armaments depots at Upnor, Lodge Hill, and the Isle of Grain, and Chatham Gunwharf storehouses—to be closed by 1963.

In the Medway area as a whole the total number of industrial and non-industrial employees would be reduced by normal wastage and discharge by about 2,700 over the next three years.

(4) Portland Dockyard would be run-down by July 1959, but a naval base would be retained at Portland in support of local establishments and H.M. ships using the harbour.

In addition, all research and development establishments dealing with underwater weapons, including the Torpedo Experimental Establishment at Greenock, would be concentrated at Portland. Most of the concentration would be carried out in the first quarter of 1959, but the Torpedo Experimental Establishment would not leave Greenock until the end of 1959. The R.N. Torpedo Depot, Weymouth, would then be closed, but its facilities and most of its staff would be available for the T.E.E. The Admiralty Gunnery Establishment, Portland, would be transferred in 1959 to Portsdown, near Portsmouth.

The White Paper explained that the effects of the reorganization on civilian employment at Portland could not be precisely estimated. Of 1,600 industrial and non-industrial employees at the dockyard, most established men would remain employed in the area, but 200-300 would be offered transfers to Admiralty work elsewhere, and about 700 unestablished employees would be gradually reduced by normal wastage or discharge. At the Torpedo Experimental Establishment, Greenock, which employed some 750 persons, about 200-300 unestablished employees would be reduced by normal wastage discharge, but all established staff would be offered transfers to other establishments.

(5) The Home Air Command would be concentrated in larger groups at fewer bases, and six air establishments would be closed over the next three years, in addition to the air stations at Anthorn and Stretton already closing.

These establishments would be: the Aircraft Repair Yard, Donibristle (which was unsuitable for the latest aircraft); the R.N. Air Stations at Ford (Sussex), Bramcote (Warwickshire), Eglinton (Co. Down), and Brawdy (Pembroke—to be kept in reserve); and the Air Electrical Training Establishment at Worthy Down (near Winchester). All these would be closed in 1959 except Brawdy and Worthy Down, which would be closed in 1960 and 1961 respectively.

R.N. Air Stations would be retained at Yeovilton, Lossiemouth, Culdross, Abbotsinch, Arbroath, and Lee-on-Solent, and aircraft yards at Belfast and Fleetlands. A small part of the Home Air Command task would be accommodated at the R.N. Air Station Halfar (Malta).

The White Paper explained that every effort would be made to dispose of the Donibristle repair yard to industrial or commercial interests. Of the 1,400 staff employed, as many established men as possible would be absorbed into Rosyth Dockyard, but about 700 unestablished employees would have to be reduced by normal wastage or discharge. About 900 unestablished employees would be similarly affected at the other air establishments named.

Smaller reductions and reorganizations, already effected or decided on, included: (*a*) the withdrawal from Germany of the Elbe and Rhine squadrons; (*b*) the amalgamation of the small craft supporting the Fleet and shore establishments into a single Port Auxiliary Service; (*c*) further reductions in storage depots; (*d*) a reduction of training establishments to conform to the decrease in naval personnel.

Strength of the Fleet.

The present strength of the Royal Navy was given as follows:

Ships in the Operational Fleet, or preparing for service: Total 145, including 4 aircraft carriers, 6 cruisers, 24 destroyers, 30 frigates, 2 despatch vessels, 1 fast minelayer, 1 netlayer, 39 submarines, 28 minesweepers, 5 coastal craft, and 5 landing vessels.

Ships engaged on trials and training: Total 54, including 1 guided missile ship, 1 cruiser, 2 destroyers, 21 frigates, 24 minesweepers, 2 coastal craft, and 3 landing vessels.

Fleet support and auxiliaries: 46 vessels.

Ships in reserve or in dockyards for refit, modernization, or conversion: Total 357, including 5 aircraft carriers, 8 cruisers, 1 battleship, 30 destroyers, 54 frigates, 2 fast minelayers, 18 submarines, 156 minesweepers, 19 coastal craft, 14 landing vessels, 1 netlayer, 1 destroyer depot ship, 1 submarine depot ship, 1 repair ship, 8 maintenance ships, 1 survey ship, 2 controlled minelayers, 30 boom defence vessels, and 5 degaussing vessels.

Naval Construction.

Ships completed during 1957-58 comprised 1 submarine, 9 frigates, 12 coastal and 8 inshore minesweepers, 7 fast patrol boats, and 1 seaward defence boat.

Ships under construction on March 31, 1958, would comprise: 1 aircraft carrier, 3 cruisers, 5 submarines, 14 frigates, 13 coastal minesweepers, 12 inshore minesweepers, 3 inshore survey craft, 3 fast patrol boats, 1 seaward defence boat, and 2 boom defence vessels.

Research and Development.

In addition to the development work on the atomic submarine *Dreadnought* [see above], investigations were in hand with a view to (*a*) the development of counter-measures against submarines having increased underwater speed; (*b*) the provision of automatic means for handling tactical information in warships, leading to greater speed in handling and a saving in manpower.

The decision to combine at Portsdown the Admiralty Signal and Research and Admiralty Gunnery Establishments [see above] would enable the design and development of ship-borne gunnery and guided-missile systems to be carried out in one establishment. In the international field, much progress had been achieved through the U.S. Mutual Weapons Development Programme, which had enabled Britain to introduce several valuable new weapons into service; moreover, in conformity with agreements reached in the Western European Union, bilateral discussions had started with France, Holland, and Western Germany regarding certain naval projects.

Manpower.

Regular Recruiting. The White Paper estimated that about 6,900 recruits would be obtained in 1957-58, or about 15 per cent fewer than in 1956-57. To provide the manpower needed for the reduced Navy now planned, an average annual entry of about 8,000 recruits would be needed over the next five years.

National Service. The number of N.S. entrants was expected to be about 1,900 in 1957-58 and 1,100 in 1958-59.

Women's Royal Naval Service. It was intended to bring the number of W.R.N.S. up to their authorized complement of 3,000, requiring an annual recruitment rate of about 1,000.

Premature Retirements. About 1,900 officers and 950 ratings and Royal Marine "other ranks" would be prematurely released as part of the planned reduction in the size of the Navy over the next five years. About 95 per cent of those concerned had already volunteered to retire.

The Naval Reserves. To ensure the most economical use of training facilities, the naval volunteer reserves were being reorganized by bringing the Royal Naval Reserve and the R.N. Volunteer Reserve into one unified reserve to be called "The Royal Naval Reserve." For 1958-59 the strength of the new Reserve was expected to be about 4,300 officers and 9,300 ratings, excluding about 1,800 temporary officers fulfilling their National Service obligations.

The Women's R.N.V.R. would be reorganized on similar lines and re-named the "Women's Royal Naval Reserve," but the other Naval Reserves would continue unchanged. About 15,000 National Servicemen would be discharging their liability to carry out part-time service in the Royal Naval Special Reserve during 1958-59; the remainder of this Reserve would consist of men who, having completed both full and part-time National Service, were enrolled in the Special List of the Reserves, for which no further training was required.

Civilians in the Naval Service. The total of Admiralty civilian staffs at April 1, 1958 was estimated at about 169,000, compared with about 181,000 a year before. The number was expected to fall by over 10,000 in 1958-59—a total reduction of well over 20,000 in two years. Three-quarters of the civilian staffs were employed in provision and maintenance of ships, weapons, equipment and stores, whilst 7,000 were engaged in research and development (against 1,400 in 1939) and over 10,000 were employed in the support of the Fleet Air Arm.

Admiralty Organization for Matériel. - Administration of Royal Dockyards. - Additional Responsibilities for Fourth Sea Lord.

The White Paper announced that the following measures were being put into effect as a result of the recommendations of the committee under Sir Barclay Nihill which had recently reviewed the organizations for handling Admiralty *matériel* requirements and the administrative organization of the Royal Dockyards [see 14869 A].

(1) The Fourth Sea Lord had assumed responsibility for the superintendence of the Royal Dockyards and maintenance in the Fleet, and would be known as "Fourth Sea Lord and Vice-Controller."

(2) Those departments (except the H.Q. of the Royal Naval Scientific Service) which had previously reported direct to the Controller were being grouped together into four departments, each under a Director-General, as follows: (*a*) a Ship Department, responsible for the production of ships, propelling machinery, and electrical installations; (*b*) a Weapons Department, responsible for the design and production of weapons and radar and communications equipment; (*c*) an Aircraft Department, responsible for exercising the Admiralty's *matériel* responsibilities for aircraft and their weapons and equipment, including maintenance and repair; (*d*) a Dockyard and Maintenance Department, responsible for the repair and maintenance of the Fleet and for the organization and running of the dockyards. The Director-General of this department would report direct to the Fouth Sea Lord.

(3) In place of the traditional structure based on three professional departments working directly under the Admiral Superintendent, each of the home dockyards would in future have a general manager with full authority for the administration and organization of productive work, but acting under the general direction of the Admiral Superintendent.

(4) The Admiral Superintendent would have general responsibility for the whole dockyard and the ships using it, as well as for discipline. He would be chairman of the dockyard Whitley Councils.

(5) At each home dockyard there would be four functional departments, responsible respectively for planning, production, yard services, and personnel. Each would be under a manager acting under the general direction and control of the dockyard's general manager.

(6) The Captain of the Dockyard would in future be known as "Naval Assistant and Queen's Harbourmaster." He would be relieved of his production work (which would be undertaken by the production manager), but would assume responsibility for ship berthing and mooring, and for boom defence and marine salvage work.

(7) Dockyard servicing craft (i.e. tugs, launches, barges, and lighters, numbering over 1,000) would be brought into one pool and be known as "Port Auxiliaries," under the general administration of the Director-General of Dockyards and Fleet Maintenance. At individual dockyards they would be under the direction of the Naval Assistant and Queen's Harbourmaster.

Adoption of Navy Estimates.

The Navy Estimates were passed by the House of Commons on March 4 without a division.

Mr. Robert Allan (Parliamentary Secretary to the Admiralty) referred to Russian progress in building up "an extremely large and powerful Navy" and to the transformation which would take place in naval warfare as a result of the coming of the nuclear submarine. The Soviet Union, he said, had 500 submarines, 23 cruisers of the *Sverdlov* type [12,800 tons], a large number of destroyers and supporting ships, and a naval air arm of 3,500 aircraft. It was imperative that the Western Powers should make it plain that they were well able at least to contain this fleet. Within the NATO fleet the most effective contribution which the Royal Navy could make was by giving greater emphasis to anti-submarine work.

Great advances had been made by the Royal Navy in under-water detection of conventional submarines, but nuclear submarines would transform the position, and it might be that the most effective counter to the nuclear submarine would be another nuclear submarine. The tactical superiority of nuclear submarines, which would bring about a "revolutionary" change in naval warfare, might be minimized by new defensive devices, but their strategic value, especially when armed with *Polaris* missiles (now being developed in the U.S.A.), was "invaluable." The *Polaris* was said to have a range of 1,500 miles and could be armed with a nuclear warhead; nuclear submarines (which could carry 20 or more such missiles) would thus be able to place themselves within range of almost any target in the world with little fear of detection or counter-attack.

As regards defence against hostile submarines in general, Mr. Allan stated that the Navy's modern anti-submarine vessels were fitted with an under-water detection and attack system developed since the war; that the technique of attack from the air by helicopters had also been developed; and that the Navy's submarines were playing an ever more important anti-submarine role.

Other recent developments in connexion with the Royal Navy are summarized below:

Recommissioning of H.M.S. Victorious. The aircraft carrier *Victorious*, referred to in the White Paper, rejoined the Fleet on Jan. 14, 1958, after a refit and modernization lasting about seven years, in which the ship was completely rebuilt above the hangar deck and her tonnage increased from 22,600 to about 32,000.

Submarine Escape Apparatus. The Admiralty announced on Dec. 10, 1957, that the "free escape" system, which enabled men of average fitness to rise to the surface from depths up to 250 ft. without breathing apparatus (see 15619 A), had been adopted as the standard method of escape from sunken submarines and had been fitted into all but a few submarines. The "rescue bell" method, which had been fitted experimentally in two submarines, had proved less satisfactory and had been abandoned.

"Tribal" Class Names for Frigates. It was stated on Nov. 7, 1957, that, at the instance of Admiral of the Fleet Lord Mountbatten (the First Sea Lord), who had close associations with the former "Tribal" class destroyers, the class name would be revived for the 11 "general purpose" frigates now on order. The first, already laid down by Messrs. Thorneycroft at Southampton, would be known as H.M.S. *Gurkha*.

Disposal of Obsolete and Surplus Ships. It was announced (*a*) on Dec. 10, 1957, that the 35,000-ton battleships *Anson* and *Duke of York* had been sold to Shipbreaking Industries Ltd. (a subsidiary of the Metal Industries Group) and would be broken up; (*b*) on March 10, 1958, that five aircraft carriers, five cruisers, and four destroyers—all at present in the Reserve Fleet—would be disposed of as surplus to Naval requirements, as now foreseen. The ships, which would be either scrapped or sold to friendly navies, comprised the aircraft carriers *Ocean*, *Theseus*, *Glory*, *Perseus* and *Unicorn* (varying between 12,265 and 14,750 tons and having neither angled flight decks nor a speed above 23 knots); the cruisers *Liverpool* and *Glasgow* (9,000 tons) and *Bellona*, *Cleopatra*, and *Dido* (5,000 tons); and the destroyers *Zambesi*, *Zebra*, *Zephyr*, and *Savage*.

Naval Appointments.

The following Naval appointments were announced in recent months:

Vice-Admiral R. D. Watson, Fourth Sea Lord and Chief of Supplies and Transport, to succeed Sir Geoffrey Robson as C.-in-C., South Atlantic and South America, with effect from April, 1958 (announced Nov. 22, 1957).

Vice-Admiral Sir Gordon Hubback, Director of Dockyards, as Fourth Sea Lord and Vice-Controller in succession to Vice-Admiral Watson, with effect from January 1958 (announced Dec. 21, 1957).

Vice-Admiral M. L. Power as Deputy Chief of Naval Staff and Fifth Sea Lord in succession to Vice-Admiral A. N. C. Bingley (announced July 24, 1957).

Vice-Admiral R. G. Onslow as C.-in-C., Plymouth, in succession to Admiral Sir Mark Pizey, with effect from February 1958 (announced Nov. 28, 1957).

[*Corrigendum.* It was erroneously stated in the last paragraph of report 15619 A that Admiral Sir Caspar John had been promoted to Admiral of the Fleet on Jan. 10, 1957. He was in fact promoted to Admiral rank on Jan. 8, 1957.]

The Admiralty also announced on March 6 the appointment of Mr. A. J. Sims (50) to the new post of Director-General of Ships, created as a result of the internal reorganization at headquarters [see above]. On the retirement of Sir Victor Shepheard from the post of Director of Naval Construction later in 1958, Mr. Sims would also become head of the Royal Corps of Naval Constructors.

The appointment of Mr. Rowland Baker as technical chief executive for the *Dreadnought* nuclear submarine project was announced on March 14. Mr. Baker (49), a wartime designer of landing craft, had been Assistant Director of Naval Construction. He will be responsible for close liaison between the Admiralty, the Atomic Energy Authority, and the contractors concerned, and will direct all departments and contractors participating in the project.—(Cmd. 371 - Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM. — Royal Music Library presented to British Museum by H.M. the Queen.

It was announced on Nov. 27, 1957, that the Queen had presented the Royal Music Library to the British Museum, where it had been deposited on indefinite loan by King George V in 1911.

The Royal Music Library contains over 7,000 pieces of music ranging from the early 16th century to the end of the 19th, most of the collection having been brought together in the middle of the 18th century. It includes 97 volumes of Handel autographs, the most extensive collection of works by one composer to be preserved in a single library anywhere in the world; important sources of English virginal music, and also a motet (*Quam pulchra est*) by Henry VIII; string fantasias by Giovanni Coperario (music tutor to the children of James I), an English composer who Italianized his name from John Cooper; 66 of Purcell's major compositions, dating from the latter part of the 17th century; and a collection of operas and other vocal works by Agostino Steffani, *Kappellmeister* at the Hanoverian Court at the end of the 17th century. About one-third of the compositions are in manuscript and the rest are printed.

The Queen's gift was made on the bicentenary of the presentation of the Old Royal Library by King George II. The market value of the Royal Music Library is estimated at several hundred thousand pounds. (Times - Daily Telegraph)

A. FRANCE - YUGOSLAVIA. — French Seizure of Arms Consignment from Yugoslav Ship off Algerian Coast. - Yugoslav Protest rejected by France.

The 5,000-ton Yugoslav freighter *Slovenija*, which was suspected of carrying a consignment of arms for the Algerian rebels, was intercepted by French warships off the Algerian coast on Jan. 18 while on her way from Rijeka (Fiume) to New York *via* Casablanca. She was escorted to Oran, and subsequently allowed to proceed on her voyage after the arms found on board had been unloaded.

The consignment consisted of 55 tons of arms and 95 tons of ammunition, valued at over 2,000,000,000 French francs (about £1,700,000). The inventory given by the French authorities was as follows: 4,000 Mauser rifles, 1,500 Czech automatic pistols, 1,000 German machine pistols, 200 machine guns, 48 bazookas, 15 mortars, 1,002,000 cartridges for machine-pistols, 202,000 cartridges for automatic pistols, 998,000 other cartridges, 330 Bangalore torpedoes, 100 Bangalore primers, 6,000 mortar shells, and 2,000 anti-tank rocket charges. The arms would have been sufficient to equip five or six battalions. The Bangalore torpedoes were believed to be intended for blowing gaps in the barbed-wire defences erected by the French Army along the Algerian frontiers with Tunisia and Morocco.

According to the *Slovenija's* manifest, the cargo was to have been delivered to a Casablanca agent, M. Mohammed Laraki, acting on behalf of the Government of the Yemen; the Yemeni Government radio, however, was reported on Feb. 1 to have officially denied all knowledge of it. A consignment of seven tons of arms and 71 tons of ammunition had previously been delivered to M. Laraki on Aug. 8 by another Yugoslav ship, nominally for transmission to Saudi Arabia, but had been seized by the Moroccan police.

On Jan. 20 the Yugoslav Government lodged a protest against the interception of the *Slovenija* and the seizure of the arms with the French Ambassador in Belgrade (M. Broustra) demanding their immediate restitution and reserving Yugoslavia's right to claim damages. A similar protest by the Yugoslav Ambassador in Paris was rejected by M. Pineau, the French Foreign Minister. A statement issued in Belgrade by the official Tanjug Agency said that the *Slovenija* was 45 miles off the Algerian coast when she was intercepted, and claimed that the seizure of the arms would have been illegal "even if it had happened in French territorial waters, because even there ships have the right of innocent passage." French Government spokesmen, however, pointed out that France had claimed the right in December 1956 to stop ships suspected of carrying arms up to 50 miles from the North African coast, and that no objection had been raised by any foreign Government. A later Tanjug statement (Jan. 23) said that the *Slovenija* had been stopped when 65 miles from the coast, according to information received from her captain.

M. Pineau told the Press on Jan. 20 that the French Government knew that the arms had been purchased in Prague about Nov. 15 by Idriss Ben Said, a "notorious arms dealer" and an agent of the National Liberation Front (F.L.N.); he added that the claim that the consignment was destined for Yemen proved "with certainty" that those handling it must have had "at least some doubts" with regard to its true destination, as "it seems very difficult to go from Fiume to the Yemen by way of Casablanca." An F.L.N. spokesman in Morocco denied all knowledge of the person named by M. Pineau, and declared that the F.L.N. had never purchased arms abroad at any time. The Moroccan Foreign Minister, M. Balafrej, stated on the same day (Jan. 21) that no permission had been given for the import of the arms, which would have been seized by the Moroccan police if they had been landed. M. Broustra was informed by the Yugoslav Foreign Ministry that the Yugoslav shipping company had agreed to handle the cargo on behalf of a Zurich firm named Félix; this was confirmed in the Swiss National Council on Jan. 31 by Herr Markus Feldmann (head of the Swiss Department of Justice and Police), who said that this firm was known to have handled consignments on account of East European countries, and had been under observation for several years.

B. PERSIA. — Formation of Nation Party.

The Persian Prime Minister (Dr. Eghbal) announced on Feb. 17 the official formation of a Government majority party under the name of the Nation Party. He stated that the party had been formed on the Shah's orders with a view to establishing a two-party political system, and that it would be headed by himself (Dr. Eghbal). An Opposition People's Party was formed in May 1957.—(Times - New York Times)

(Prev. rep. 15591 C.)

C. UNITED STATES. — Successful Launching of Vanguard Earth Satellite into Orbit. - Failure of Previous Vanguard and Second Explorer Launchings.

The second American earth satellite to orbit the earth was successfully launched by a Navy *Vanguard* rocket from Cape Canaveral (Florida) at 7.16 a.m. local time on March 17. The satellite (a 6-inch sphere the size of a grape-fruit) weighed 3¼ lb. and contained two miniature radio transmitters. It was at first given the name *Vanguard I* but it was subsequently announced that it would be called *Beta 1958*—the name given to it by officials connected with the International Geophysical Year programmes.

Dr. John P. Hagen, director of the *Vanguard* project, said in a press statement that both the satellite and the third stage of the launching vehicle (a rocket 4 ft. long and nearly 50 lb. in weight, which ejected the sphere from its nose when it reached the required height) were circling the earth at between 18,000 and 19,000 m.p.h., the rocket orbiting about a mile from the satellite. According to early calculations, the satellite's farthest point from the earth (apogee) was 2,500 miles—i.e. farther than the Army's *Explorer* or either of the Russian *Sputniks*—and its minimum height 400 miles. It took about 135 minutes to circle the earth. Dr. Hagen said that it would be "a very long-life satellite" and would probably remain in orbit from five to ten years.

The *Vanguard* rocket—a much more advanced rocket than the Army's *Jupiter-C* used to launch the *Explorer*—consisted of three stages. The first stage carried the satellite to an altitude of about 35 miles at 3,700 m.p.h.; the second stage carried it up to 138 miles at 9,000 m.p.h., before "coasting" to the orbit point 300 miles up; and the third stage of the rocket took over when the satellite was in orbit.

Of the two transmitters in the satellite, one is powered by solar batteries (drawing their power from the rays of the sun and operating only in sunlight) and sends out signals on a frequency of 108.3 megacycles; it is expected to continue in operation for "a long long time." The second transmitter, powered by ordinary batteries, broadcasts constantly at 108 megacycles and is expected to continue for about two weeks. Dr. Hagen said that it would be possible to determine the temperatures inside and outside the satellite from the information transmitted.

The successful launching of the *Vanguard* satellite into orbit followed two previous failures—the first one on Dec. 6 [see 15980 E] and the second on Feb. 5.

On the latter occasion the *Vanguard* had been successfully launched and, according to the U.S. Navy's announcement, had risen to several thousand feet when it "deviated to the right and broke into two pieces, at which time the range safety officer destroyed it." As a result, the two parts of the shattered missile fell flaming into the sea. It was subsequently explained that the *Vanguard* had failed 60 seconds after launching because of "small irregularities" in the control section of the first stage; these had "caused the engine to deflect far to the right, and the resultant abnormally high forces caused the rocket to break in the middle."

A second *Jupiter-C* rocket with another *Explorer* satellite was fired at Cape Canaveral at 1.28 p.m. local time on March 5, but after a successful launching no further signals from it were received. A joint statement by the U.S. Army and the Jet Propulsion Laboratory, issued on March 6, said that scientists had reported that the fourth-stage rocket (a 40-in. tube) had failed to ignite and that it was "now certain that orbiting was not achieved."

The statement continued: "The reason for the failure of the automatic ignition system to ignite the last stage, after all three stages had functioned perfectly, is not known and will probably be very difficult to determine. Lacking the additional velocity which should have been contributed by the last stage, the satellite behaved as an ordinary surface-to-surface missile. Since it was not protected against re-entry heat conditions, it probably burned up upon re-entering the atmosphere at a range of approximately 1,900 miles."

[The satellite was almost exactly the same as *Explorer I* but weighed 32.4 lb. (about one lb. more than *Explorer I*), as it carried slightly heavier instruments.]

After the successful launching of the *Vanguard* satellite, a White House statement said that it was "part of a series of tests which will be conducted prior to the launching of satellites as part of the U.S. participation in the International Geophysical Year."

Dr. Hagen said there would be seven attempts to launch full-scale satellites during the remainder of the I.G.Y. The first two of these would be 20 in. across and weigh 21¼ lb.; the third would be only 13 in. in diameter, but would have a special exterior so that magnetic measurements could be made.

MARCH 22—29, 1958

A. INDONESIA. — "Provisional Government" set up in Central Sumatra. - Rising in Northern Celebes. - Government Military Action against Rebels. - President Sukarno's Tour of Asia and Middle East.

A "Provisional Government" headed by Dr. Sjafruddin Prawiranegara, the former Governor of the Bank of Indonesia, was proclaimed on Feb. 15 by the Central Sumatran Revolutionary Council (the "Banteng Council" headed by Lieut.-Colonel Achmed Hussein), after the Indonesian Government had rejected an ultimatum demanding its resignation. Central Sumatra had been one of the areas which for some time had demanded greater local autonomy, a fairer share of the national revenue and of the proceeds of their own exports, and a strictly non-Communist Government in Jakarta [see 15421 A]. The continued deterioration in the relations between the Central Government and the military administration in Central Sumatra was attributed to the interruption of inter-island traffic caused by the taking over in December of the Royal Dutch Packet Navigation Company (K.P.M.), which had compelled the provincial administrations to organize barter trade in rubber, tea, coffee, copra, and other products with Malaya and Singapore in return for rice, consumer goods, and equipment. Fears of increasing Communist influence in Java, and dissatisfaction at the continued non-participation of Dr. Hatta in the Government, were also believed to have been contributory factors.

During January a number of prominent political figures openly associated themselves with the Revolutionary Council, including two former Premiers, Dr. Mohammad Natsir and Dr. Burhanuddin Harahap, and two former Finance Ministers, Dr. Sjafruddin Prawiranegara and Dr. Sumitro Djojohadikusumo. [Dr. Natsir, Dr. Harahap, and Dr. Sjafruddin are members of the *Masjumi*, and Dr. Sumitro is a Socialist.] Several senior military officers also took refuge in Central Sumatra, among them Colonel Lubis, the former Deputy Chief of Staff, who had been evading arrest since the failure of his attempt in November 1956 to lead a military *coup* in Java (see 15421 A); Colonel Simbolon, leader of the abortive *coup* in North Sumatra in December 1956 (see 15421 A); and Colonel Djambek, a former staff officer.

Dr. Sjafruddin Prawiranegara had gone to Sumatra on leave in December, and refused to return to Jakarta when summoned by the Government. In an open letter to President Sukarno, published on Jan. 22, he expressed the opinion that there were only two ways to restore *de facto* authority over the whole of Indonesia—either by establishing "a national Government which is not only strong but has authority and has been formed according to the Constitution," or by asking for Soviet aid. He rejected the latter alternative, however, and appealed to all "patriots" to safeguard Indonesia from becoming a "Soviet satellite." He was subsequently dismissed from his post as Governor of the Bank of Indonesia.

President Sukarno, who was then visiting Tokio in the course of his foreign tour [see below], received the Indonesian military attaché in Peking (Colonel Warouw) on Feb. 8. Dr. Sukarno denied reports that Colonel Warouw had presented him with an ultimatum threatening that a "free Republic of Indonesia," with headquarters in Central Sumatra, would be proclaimed unless he consented to the formation of a new Government headed by Dr. Hatta, the former Vice-President; he stated, however, that he would return to Indonesia sooner than he had intended.

The Revolutionary Council, meeting at Padang on Feb. 9, approved an ultimatum calling on President Sukarno to dismiss Dr. Djuanda's Cabinet within five days, to abandon his policy of "guided democracy," and to appoint a new Government headed by Dr. Hatta and the Sultan of Jogjakarta (a former Defence Minister, who resigned in 1953 after the failure of a military *coup* in which he was allegedly implicated —see 12744 A). If President Sukarno failed to comply with these demands, the Council would regard themselves as no longer bound to obey him as Head of State.

The Cabinet rejected the Council's demands on Feb. 11; ordered the dishonourable discharge of Lieut.-Colonel Hussein and Colonels Lubis, Simbolon, and Djambek; and placed the military forces in Central Sumatra under the direct command of the Chief of Staff, Major-General Nasution. In a broadcast on the following day General Nasution ordered the arrest of the four Colonels, whom he accused of complicity in the attempt to assassinate President Sukarno in November last.

In view of the Government's refusal to accept its demands, the Revolutionary Council proclaimed a rival "Provisional Government" at Padang on Feb. 15. The proclamation stated that the new "Provisional Government" would be prepared to make way at any time for a Government headed by Dr. Hatta and the Sultan of Jogjakarta, and that it would carry out its threat to withdraw its recognition of President Sukarno if such a Government were not formed within a reasonable time. The members of the "provisional Government"—which established its headquarters at Bukittingi (60 miles north of Padang)—were Dr. Sjafruddin Prawiranegara (Premier and Finance), Colonel Simbolon (Foreign Affairs), Dr. Harahap (Defence and Justice), Colonel Djambek (Interior), Dr. Sumitro Djojohadikusumo (Commerce and Communications), Mr. Mohammad Sjafei (Education, Culture, and Public Health), Mr. Saladin Sarumpaet (Agriculture and Labour), Mr. Abdulgani Usman (Social Welfare), Colonel Warouw (Reconstruction and Industry), Lieut.-Colonel Saleh Lahade (Information), and Mr. Mochtar Lintang (Religious Affairs).

The position of Colonel Warouw, who was in Peking, and of Colonel Lahade and Mr. Lintang, who were in Macassar, remained at first obscure; General Nasution asked them on Feb. 16 to state whether they had accepted their nomination, whilst Padang Radio appealed to them two days later to come to Sumatra to take up their posts. Lieut.-Colonel Lahade, as well as Lieut.-Colonel Sumual (the former military commander in East Indonesia, who in March 1957 had headed the autonomous movement in that area—see 15636 A), subsequently joined the rebel Government. It was announced in Jakarta at the beginning of March that they had been dishonourably dismissed from their posts.

Immediately after its formation the rebel "Government" declared the Central Government's assets abroad to be blocked, and the signatures of directors of the Bank of Indonesia to be invalid. The three oil companies operating in Sumatra—Caltex, Royal Dutch Shell, and Standard-Vacuum—were ordered to discontinue paying royalties to the Central Government and sending oil products from their refineries to Jakarta; doubt was expressed in the British Press, however, as to the probable effectiveness of these measures, as only Caltex (which has no refineries in Sumatra) operates predominantly in the area under rebel control. A spokesman of Standard-Vacuum was reported on Feb. 17 to have stated that his company would continue to recognize the Central Government in Jakarta. On Feb. 19 the rebel "Government" asked the K.P.M. to resume normal shipping operations between the Indonesian islands, and announced that one of the company's ships then at Padang would be immediately released.

Dr. Sjafruddin said on Feb. 15 that his "Provisional Government" would pursue an independent foreign policy and would not be drawn into either of the conflicting Power blocs. On Feb. 18 the "Provisional Government" announced that it had ordered Indonesian representatives abroad to communicate with it for instructions, and on Feb. 20 that it would send three representatives to Europe, Asia, and the U.S.A. respectively to explain its aims to foreign Governments. The post of European representative was accepted by Mr. Makatita, who had been Commercial Counsellor at the Indonesian Embassy in London until November 1957; because of his support for the rebel Government he was dishonourably discharged from the Indonesian Foreign Service on Feb. 21.

Lieut.-Colonel Somba, commander in North Celebes, where a separate administration had been set up in January (see below), declared his support for the rebel "Government" on Feb. 17, but no other commander followed his example. Conflicting reports on the attitudes of the military commanders in North and South Sumatra were received from Jakarta and Padang. The rebels claimed that the commanders in North and South Sumatra had promised their "benevolent neutrality" and that those in South Sumatra and Atjeh had promised not to allow Government troops to cross their territory. The authorities in Jakarta, on the other hand, reported that the commander in North Sumatra had announced that he recognized only the Central Government, and had given warning that action would be taken against officials accepting orders from the rebel Government. Lieut.-Colonel Barlian (commander in South Sumatra) issued a statement on Feb. 18 appealing to both sides to avoid bloodshed, and on the following day a delegation left for Jakarta with his approval in an attempt to secure a peaceful settlement. A similar delegation from Atjeh was reported on Feb. 26 to be on its way to Jakarta. In South and South-East Celebes, West Java, Central Java, Borneo, and the Lesser Sunda Islands the military commanders announced their support for the Central Government.

Claims by the rebels that 10 Moslem parties, including the *Nahdlatul-'Ulama* (which is represented in the Central Government) and the *Masjumi*, had jointly declared their support for the "Provisional Government" were not confirmed in Jakarta. Mr. Mansjur, the chairman of the Parliamentary Defence Committee and a leading member of the *Nahdlatul-'Ulama*, issued a statement urging the Government to suppress the revolt, which he described as an act of high treason, whilst the *Masjumi* declared that it regarded both the rebel Government and the Central Government as unconstitutional.

APR 24 1958

Strong measures were taken by the Central Government to meet the threat from the rebels. The naval force stationed off the Sumatran coast was heavily reinforced, and on Feb. 17 the ports of Padang and Teluk Bajur (Central Sumatra) and Menado and Bitung (North Celebes) were declared closed. Air communications with North Celebes were suspended on the following day, and Dr. Djuanda announced on Feb. 21 that an economic blockade would be imposed as one of the Government's measures to subdue the rebels.

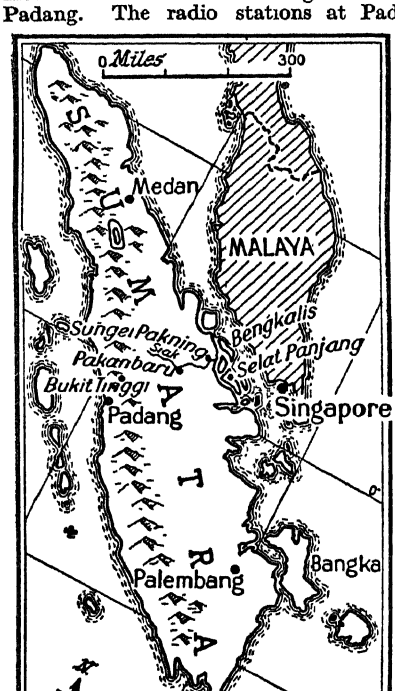
General Nasution ordered the arrest of the members of the rebel Government on charges of treason, and also of Colonel Somba (his chief of staff) and two of his officials. He also issued an order banning all organizations and private councils representing the dissident movements in the outer provinces, including the "Banteng Council," the "Garuda Council" set up by Colonel Barlian in South Sumatra, and the *Permesta* ("universal struggle") movement founded by Lieut.-Colonel Sumual.

President Sukarno returned to Jakarta from Tokio on Feb. 16, five days earlier than he had intended, and was greeted by enthusiastic crowds. He had talks on Feb. 18 with Mr. Suwirjo and Dr. Sukiman, the respective chairmen of the Nationalist Party and the *Masjumi*, and a two-hour meeting on Feb. 20 with Dr. Hatta.

In a broadcast on Feb. 21, when he resumed his Presidential functions, President Sukarno said that the efforts of a "certain small group" had reached a climax in their attempt to impose their will upon the entire people. He claimed that the Central Government had unsuccessfully tried to find a peaceful solution and announced that it would deal with the new situation firmly and with all the means at its disposal, though it would seek to avoid the use of force.

The Military Operations in Sumatra.

Military operations began on the same day, when Government aircraft bombed a bridge at Painan, 43 miles south of Padang. The radio stations at Padang, Bukittinggi, and Menado (N. Celebes) were bombed and temporarily put out of action on Feb. 22 (though Padang and Menado resumed broadcasting on March 1), and a number of other road bridges linking Central and South Sumatra were also attacked from the air. On Feb. 24 a ferry-boat on the Kampar river was sunk by aircraft, cutting communications between Padang and Pakanbaru, the centre of the Caltex oilfield; further attacks were made on ferry-boats at various other points in Central Sumatra, including the town of Tratak Buluh, near Pakanbaru, between Feb. 27 and March 1. An Air Force statement said that warning shots had been fired before each raid to enable the population to take cover.



(*Economist*)

The Central Government announced on March 8 that further measures would be taken to quell the rebellion; on the same day Government aircraft dropped leaflets over Padang announcing that a landing would be made in "a very short time," calling upon the population to clear obstacles from Padang airport and help in crushing rebel elements, and advising them to leave the town. Reports from Singapore suggested that Government troops were gathering in the Rhio (Riouw) archipelago—south of Singapore, and facing the east coast of Central Sumatra—which had previously been claimed by Jakarta to have remained loyal to the Central Government. Several hundred Government troops were also reported to have occupied the large island of Bengkalis (off the east coast of Central Sumatra) on March 7, the rebel forces in the island withdrawing to the interior.

On March 9 the Indonesian Government put more than 7,500 square miles of airspace east of Sumatra and the Rhio archipelago "out of bounds" to all foreign aircraft—including the air base of Tinjang Pinang, whence it was believed Government aircraft had been attacking targets in Central Sumatra. This measure made it necessary for foreign airliners flying to and from Singapore and the Far East to make an 80-mile detour. The Central Government also ordered the requisitioning of private aircraft and the conscription of all civilians skilled as aircrew, under threats of punishment for desertion in the event of non-compliance.

In face of the threatened landings Dr. Sjafruddin Prawiranegara gave a warning on March 10 that the rebel Government would take steps to prevent the Government in Jakarta from controlling the oil; "we won't blow up the wells," he said, "but there are other means." Four days earlier Padang radio had announced conscription for all able-bodied men in view of the measures taken by the Jakarta Government.

The Caltex Company announced on March 10 that it was suspending operations at its oilfield near Pakanbaru; that no more oil would be sent to Sungei Pakning (the port at the mouth of the Siak River to which oil is normally sent from Pakanbaru by river tanker); that all the Company's river tankers had been ordered to sail for Singapore; and that the 50 families of Caltex employees living at Sungei Pakning and Dumai on the east coast were being evacuated to Singapore at the request of the Government in Jakarta. The company's male employees, however, would remain at their posts. [There are over 600 men working for Caltex in Central Sumatra, mostly American, British, and Indonesian, with an almost equal number of dependants.]

Army headquarters in Jakarta announced on March 11 that the rebels had been cleared from Bengkalis, Selat Panjang (an island south of Bengkalis, also opposite the mouth of the Siak River), and Sungei Pakning (the oil terminal at the river mouth). The statement claimed that civil servants, the police, and the local population had proved to be loyal and had given full support to the Government.

The Pakanbaru Operations.

In the early hours of March 12 bombers and fighters of the Indonesian Air Force attacked Pakanbaru in strength, after which 300 paratroopers were dropped on the nearby airport from Dakota aircraft; after short but bitter fighting the paratroops cleared the airport, thus making it possible for transport planes to land reinforcements. Padang radio claimed that the Central Government's forces had met with "strong opposition" from the rebel forces, that many men on both sides had been killed in "intense fighting," and that the situation was "well in hand," as the paratroopers had been surrounded by rebel forces.

Indonesian Army H.Q. claimed on March 13 that the Government forces which had captured Pakanbaru airfield had occupied Pakanbaru itself in a swift operation with air support, and had advanced 15 miles west of the town. The rebels admitted that their forces had withdrawn to the outskirts of Pakanbaru but claimed that 900 of their men had counter-attacked and that fierce fighting was going on, especially at the airfield. On the following day (March 14) Indonesian Army H.Q. announced that their forces were in complete control of Pakanbaru, its airfield, and the surrounding district, and had also occupied Dumai on the coast north-east of Pakanbaru. Dr. Djuanda stated in Jakarta on March 14 that no evacuation of the oil employees would be necessary, and that the Caltex company could resume operations if it wished; a message from the Caltex employees was received in Singapore stating that all was quiet in the area and that they needed no assistance.

Jakarta radio claimed that its fighter aircraft had destroyed a rebel convoy west of Pakanbaru on March 14; that the town of Siak Intpur (on the east coast) had been recaptured on March 16; and that its forces had reoccupied Indrapura (east of Pakanbaru) on March 18. It also claimed that 400 rebel troops had surrendered to Government forces in the Pakanbaru area up to March 17. Padang radio, on the other hand, claimed on March 16-17 that rebel forces had shot down four Government aircraft and destroyed two river craft bringing reinforcements up the Siak River. Nevertheless, it became clear that the Government's grip on the east coast area at the mouth of the Siak River was tightening.

It was stated in Singapore on March 19 that the Caltex Oil Company had decided to send back the families which had been evacuated from Dumai and Sungei Pakning, in view of the restoration of peaceful conditions in the area; 17 of the Company's river tankers accordingly sailed from Singapore for Sumatra on March 22 with a number of women and children previously evacuated.

Lieut.-Colonel Sukendro, the Indonesian Army's intelligence chief, stated on March 21 that the Government's main task was now to safeguard the Caltex and Standard Vacuum oil properties in Central Sumatra; he alleged that an order to apply "scorched earth" policy to these properties had been signed by the rebel commander in the oil areas, but had been frustrated when Government forces recaptured Pakanbaru on March 12.

Following the lifting of the rebel threat to Medan [see below], the Government's forces resumed their drive in the Sumatran oil areas. On March 23 it was stated that Government troops had occupied the townships of Kamburi (the site of Caltex installations) and Ayer Molek, and the airfield at Lapura; on March 25 Jakarta radio said that there had been clashes near Sungei Darka, 60 miles south of Pakanbaru, in which 17 rebels had been killed; while on March 26 it was stated that Government forces had occupied Rengat (S.E. of Pakanbaru), the Standard Vacuum oil properties at Lirik (north of Rengat) and a nearby airfield, and Taluk, S.E of Tengat and about 100 miles east of Padang as the crow flies. The recapture of Taluk marked the farthest penetration inland from Pakanbaru.

Foreign correspondents' dispatches on March 26 made it clear (*a*) that Government forces controlled the whole of Central Sumatra along the east coast, and thence inland to the mountains in the west; (*b*) that the loopholes for the rebels' barter trade across the Straits of Malacca had been closed; and (*c*) that the rebels were "boxed in" along a narrow strip between the north-south mountains and the Indian Ocean. The reports said that there had only been "shadowy" fighting and that losses were slight. In Pakanbaru itself everything was quiet, and Army supplies were reaching the town *via* the Siak River

The Indonesian Government had stated on March 24 that the Caltex and Standard Vacuum companies had resumed operations in the oilfields round Pakanbaru. On March 25 the Government lifted its ban on the airspace over the Rhio Archipelago.

Military Operations in Medan Area.

Meanwhile the rebellion had spread on March 16 to Medan, the capital of Northern Sumatra and the largest town in the island, with a population of about 260,000 Padang radio announced that Medan airport had been captured earlier the same day by Government units which had defected to the rebels, after severe fighting with the Air Force garrison at the airport. Padang radio also said that the rebel troops were commanded by a Major Naingolan; that an agreement had been reached whereby Major Naingolan's troops undertook not to make further attacks on the garrison provided Government aircraft and soldiers did not use the airfield for military purposes; and that the city of Medan itself was under rebel control. The rebel units were stated to have been Sumatran troops several thousand men strong. No confirmation of the Medan fighting came from Jakarta, but Medan airport was suddenly closed to civil air traffic and Medan radio ceased broadcasting during the day; when it resumed, it broadcast an announcement on behalf of Major Naingolan.

On March 17, however, the rebel forces were reported to have withdrawn from Medan, and Indonesian Army H.Q. claimed that the city was again under the control of Government forces, which had recaptured Medan airport and had also reoccupied Belawandeli, the port of Medan.

Jakarta Radio said that the officers of the rebel force which captured the city the previous day had been dismissed, and that General Nasution had placed all military units at Medan under his direct command. Padang radio, however, denied the recapture of Medan; it also claimed that the Atjeh district (in the far north of the island) had gone over to the rebels, and that fighting was going on there. This, however, was denied in Jakarta.

From conflicting reports it appeared that the rebels were still in the neighbourhood of Medan on March 19; on the following day fighting for the city was reported to have flared up again, and Medan airport was again closed to civil air traffic. Meanwhile Army and Air Force spokesmen in Jakarta announced on March 19 that a rebel convoy of 60 lorries and armoured cars had been destroyed by *Mustang* fighters near Pematang Siantar, 50 miles south of Medan, and that 50 rebels had been killed in a clash with Government forces. Padang radio, on the other hand, claimed on March 20 that the rebels had captured Pematang Siantar and that the loyalist garrison had fled, leaving their arms behind.

The Indonesian Government claimed on March 21-23 that its forces advancing from Medan had isolated 300 men of Major Naingolan's rebel forces at the edge of Lake Toba (100 miles south of Medan), and that a lorry convoy of 800 rebel troops had been attacked from the air. On March 25 the Government claimed that 127 rebel officers and men had surrendered in that area, whilst Padang radio admitted that Prapat (70 miles south of Medan) had fallen to Government troops.

With the permission of the Indonesian Government, the Dutch liner *Oranje* embarked 520 foreign nationals from the Medan area (about 300 Dutch, 200 Americans, and a small number of British) at Belawandeli on March 20, landing them at Singapore on the following day.

Naval Operations off West Coast of Sumatra.

Warships of the Indonesian Navy had meanwhile shelled various rebel-held areas on the west coast of Sumatra at intervals between March 7 and 14. Simultaneously with the landings at Pakanbaru on March 12, a Government corvette off Padang warned all ships in harbour that they would be destroyed unless they left immediately; later there was an exchange of fire between the corvette and another small warship and rebel shore batteries. On March 13 Padang radio reported that there had been two bombardments of Padang by Government corvettes, claiming that shore batteries had scored hits on the vessels. Further shelling off Padang was reported on March 14.

On March 16 Padang radio claimed that shore batteries had put out of action a Government corvette, which had been towed away by another warship, after the two vessels had shelled the town and damaged a hospital and a bank. Little was heard from this area on succeeding days, but on March 21 the Danish ship *Bretagne* (2,784 tons), carrying food and medical supplies provided by the Red Cross, was shelled and slightly damaged by an Indonesian corvette off Padang, no casualties being caused. A spokesman of the *Bretagne's* owners in Copenhagen stated that the Indonesian Government had allowed her to proceed to Padang, and that the shelling was due to a "misunderstanding."

The Indonesian Navy announced on March 26 that mines had been laid along the West Sumatran coast from Painan to Pariaman—30 miles north and south of Padang respectively—and that the area had been closed to shipping.

Alleged Arms Supplies to Rebels.

Indonesian Army H.Q. in Jakarta alleged on March 13 that the rebel forces at Pakanbaru had been receiving arms dropped by foreign aircraft, and stated that most of these arms had been captured by the Government forces The official Antara News Agency, quoting a "war correspondent" at Pakanbaru, said that the arms included a bazooka, a machine-gun, and three other guns, and were of American manufacture.

Lieut.-Colonel Sukendro said on March 21 that arms had been dropped from an aircraft at Pakanbaru on Feb. 26 and March 12—on the second occasion a few hours before the landing of Government paratroops at Pakanbaru airport. The Government troops had found A A. guns, bazookas, and 75-mm. recoilless rifles, which, he said, had been bought in Formosa and were of American manufacture. He could not say, however, that the Chinese Nationalist Government had supplied the arms, nor that they had been sent by the United States. He admitted that there was no evidence of the nationality of the aircraft (a DC-4) which had dropped the arms at Pakanbaru.

International Repercussions of the Rebellion.

Dr. Djuanda issued a statement on March 19 declaring that any foreign intervention in connexion with the Sumatran rebellion could lead to developments prejudicial to world peace. He added:

"The Government will not allow the present Indonesian internal conflict to be converted into a struggle for power between the Communists and the anti-Communist group. Equally, the Government will not allow the Indonesian situation to be interpreted as a campaign against either the United States or the Soviet Union. If the rebellion in Indonesia is given belligerent rights by one party, it would follow that the other party would have every reason to recognize other rebellions, for instance in the case of the Malayan, Philippine, and Burmese rebellions. . ."

[Dr. Djuanda's remarks followed a press statement by Mr. Dulles on March 13, after the meeting of the SEATO Council in Manila, in which he said that the State Department's legal advisers were examining as "a precautionary measure" the question of recognition of the Sumatran rebels as "belligerents."]

The Malayan Government announced on March 18 that its policy was one of strict non-interference, as the situation concerned only the people of Indonesia. It added, however, that it would take a "serious view" of any infringement of the Federation's sovereignty within its territorial waters—an apparent warning to the Indonesian Government not to conduct naval operations against the rebels based on its conception of the extension of Indonesian territorial waters (see 16043 A).

The Australian Minister for External Affairs (Mr. Casey) said on Feb 16 that political developments in Indonesia must be regarded at the present stage as a domestic affair, but he hoped the Indonesian people would find a peaceful solution. Mr. Casey also said that Australia was "interested in anything designed to curb the spread of Communism anywhere" and was particularly interested in the stability and progress of her nearest neighbour, Indonesia, where she wanted to see a Government "based on the will of the people and representative of democratic opinion."

In reply to a suggestion by Dr. Evatt (the Leader of the Opposition) that Australia should offer to mediate in the Indonesian dispute, Mr. Menzies announced on March 21 that the Government had decided against mediation because it took the view that intervention would not be welcomed by the Indonesian Government in what was a purely domestic affair. On the following day Mr. Casey declared, on his return

from the SEATO meeting, that although the Indonesian rebellion was causing much anxiety to SEATO member-countries, neither Australia nor SEATO planned to intervene in the Indonesian crisis.

Separatist Movements in Celebes and the Moluccas.

The military authorities in North Celebes severed relations on Jan. 1 with the administration in Macassar (capital of Celebes), and on Jan. 7 declared North Celebes a separate province with Menado as its capital. Press reports suggested that this movement was not generally supported by the civil population, and 2,000 civilians and two Army platoons in Central Celebes were reported to have left their towns and villages several days beforehand in protest against the local military leaders' support for the *Permesta* movement. On the island of Ternate (in the North Moluccas) troops of the North Celebes command clashed with the local police on Dec. 31, some civilians and soldiers being killed. The Moluccas military command declared the North Moluccas a closed area for sea, land, and air traffic on Jan. 7, and two troopships sent to Ternate by the North Celebes command were seized by a gunboat despatched from Ambon, in the South Moluccas.

An Army spokesman in Jakarta reported on Jan. 9 that 2,000 members of the revolutionary "Republic of the South Moluccas" movement had surrendered on the island of Ceram, following widespread dissensions in the ranks of the movement. Ten Army officers and civilians had previously been arrested at Ambon in December on a charge of conspiring to overthrow the provincial Government.

President Sukarno's Tour.

President Sukarno left Jakarta on Jan. 6 for a six-weeks' tour of Asian countries and the Middle East, accompanied by the Foreign Minister, Dr. Subandrio. After spending six days in India, during which he had informal talks with the Prime Minister, Mr. Nehru, he flew to Cairo for discussions with President Nasser; a joint communiqué (Jan. 16) stated that President Nasser had reaffirmed Egypt's full support for the Indonesian claim to Dutch New Guinea. On Jan. 17-19 President Sukarno and Dr. Subandrio visited Belgrade as the guests of President Tito. A communiqué issued at the end of the visit announced that a joint commission for the promotion of economic relations between Yugoslavia and Indonesia would soon be established, and that measures would be taken to increase trade between the two countries, "including the sale of certain military equipment by Yugoslavia to meet the needs of the Indonesian forces." It was stated that President Tito had accepted an invitation to visit Indonesia in 1958.

After a brief visit to Syria, where he had talks with President Kuwatly, President Sukarno flew to Karachi on Jan. 20 for a four-day visit to Pakistan. A communiqué issued on Jan. 23 said that President Sukarno and President Mirza had reaffirmed their faith in the principles of the U.N. Charter and the resolutions of the Bandung conference; that closer commercial and cultural relations between the two countries would be developed; and that President Mirza would visit Indonesia at a future date. President Sukarno next flew to Colombo for discussions with the Ceylonese Premier, Mr. Bandaranaike. A statement issued on Jan. 24 reaffirmed Ceylon's support for Indonesia's claim to Dutch New Guinea; appealed for the admission of Communist China to the U.N. and for high-level negotiations on disarmament and control of nuclear weapons; and announced that Mr. Bandaranaike had accepted an invitation to visit Indonesia.

On Jan. 24-26 President Sukarno visited Rangoon, where the Burmese Premier (U Nu) gave him an assurance of Burma's support for the Indonesian claim to Dutch New Guinea. After a three-day visit to Bangkok, President Sukarno concluded his tour with a more prolonged visit to Japan; in view of the situation in Indonesia, however, he curtailed his visit and returned to Jakarta on Feb. 16, as stated above.

A. UNITED KINGDOM. — Viscount Simon appointed Chairman of Port of London Authority.

The Port of London Authority announced on Jan. 30 that Viscount Simon, who would shortly relinquish his office as president of the U.K. Chamber of Shipping, had been unanimously elected to succeed the late Viscount Waverley (see 15963 A) as chairman of the P.L.A. (Times)

B. UNITED KINGDOM. — Increase in National Health Service Contributions. - Implementing Legislation. - Increased Cost of Health Service.

Mr. Heathcoat Amory, the Chancellor of the Exchequer, announced in the House of Commons on Feb. 18 that the weekly contributions of employees under the National Health Service would be increased from July 1 by 6d. (men), 4d. (women), and 2d. (juveniles), with an increase of 2d. in each case from the employer.

The Chancellor explained that the increasing cost of the Health Services had caused the Government particular concern. When the N.H.S. was instituted in 1948, the gross cost was expected to be £175,000,000 and the share borne by the Exchequer £126,000,000. These expectations had been immediately falsified, and the cost had risen greatly from the start; as a result, the gross cost for 1958-59 was estimated at £740,000,000, of which the Exchequer's share, at existing contribution rates, would be £555,000,000. This was over four times as much in money terms and three times as much in real terms as was originally contemplated, and represented a higher proportion of the total than envisaged at the outset. The Government had decided that the whole of this vastly increased charge could not be borne by the Exchequer, and that it was necessary to increase contributions; the increases would yield about £24,000,000 next year and £32,000,000 in a full year. Even on the basis of the higher contributions, employees and employers together would still be paying under 20 per cent of the gross cost of the service—i.e. less than the proportion originally proposed.

The National Health Service Contributions Bill, giving effect to the increases, received a second reading in the House of Commons on March 5.

Mr. Derek Walker-Smith (Minister of Health) said that the total cost of the National Health Service had risen from £452,000,000 in 1949-50 (its first full year) to an estimated £740,000,000 in 1958-59. About £200,000,000 of the increase was due to inflation, and the actual amount of the increase, when adjusted to real values, was about £80,000,000. Over 50 per cent of the estimated cost of the N.H.S. in 1958-59 represented hospital administration (mainly wages and the cost of ordinary commercial commodities), but £74,000,000, or 10 per cent, was for drugs. The size of the drug bill represented both the high level of general costs and the special costs of research and development work carried out on new and improved drugs; attempts were being made to limit its size by influencing doctors' prescription habits and curbing manufacturers' prices. Most proprietory drugs were covered by an agreement negotiated in 1957 for a trial period of three years, and a committee had been set up last summer to investigate its working. Mr. Walker-Smith added that the present average cost of a prescription was 6s.

Labour Members opposing the Bill included **Dr. Edith Summerskill**, who called it a "panic measure" which would "place an additional burden on the poorest in the country," and **Mr. Hilary Marquand**, who gave a warning that it might well prove "an inflationary move" by encouraging fresh wage claims.

The second reading was given by 308 votes to 252 after Dr. Charles Hill (Chancellor of the Duchy of Lancaster) had pointed out that at present contributions covered only £18,000,000 of the £74,000,000 drug bill—which itself did not include drugs prescribed in hospitals. The third reading was given on March 24 by 307 votes to 237.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15397 A.)**

C. PAKISTAN - PERSIA.—Agreement on Commerce, Transit Trade and Domiciliary Rights.

A reciprocal agreement on commerce, transit trade, and the rights of domicile was signed in Karachi on Feb 5 by the Pakistani and Persian Governments.

Under the agreement the nationals of either country will be granted most-favoured-nation treatment in the other as regards movable and immovable property and the import and export of goods. They will also be permitted to establish commercial, industrial, trading, banking, and insurance organizations on a reciprocal basis, and will enjoy in the host country the same protection as that country's own nationals with regard to their persons and property. The agreement also allowed freedom of transit for goods moving from one country through the other to third countries, and laid down certain routes for such transit trade.

The agreement is valid for three years in the first instance, and may be automatically renewed for further three-year periods unless six months' notice of termination is given by either country.—(Pakistan High Commissioner's Office, London)
(Prev. rep. 16023 A.)

D. RELIGIOUS LIFE. — Church of England. - New Bishop of Wakefield.

It was announced on March 27 that the Rt. Rev. J. A. Ramsbotham (52), Suffragan Bishop of Jarrow, had been appointed Bishop of Wakefield in succession to Dr. Roger Wilson, recently translated to the See of Chichester.
(Church Times) **(Prev. rep. 15890 C.)**

A. UNITED ARAB STATES. — Plebiscite on Union of Egypt and Syria. - Colonel Nasser elected President of United Arab Republic. - First U.A.R. Cabinet. - Federation of United Arab Republic and Yemen as United Arab States. - Conspiracy Allegations against King Saud and King Faisal. - President Nasser's Attack on Arab Federation. - Resignation of General Bizri.

A plebiscite held in Egypt and Syria on Feb. 21 resulted in an overwhelming majority for the union of the two countries, and in the election of Colonel Nasser as first President of the United Arab Republic (U.A.R.). President Nasser formed the first U.A.R. Cabinet on March 6. An agreement was subsequently signed on March 8 whereby a Federal union was established between the U.A.R. and the Yemen, under the name of the United Arab States. Details of these and other recent developments in the U.A.R. are given below under cross-headings.

The U.A.R. Plebiscite. - President Nasser's Cabinet.

The plebiscite of Feb. 21 resulted in a 99.99 per cent majority in favour of union in Egypt and a 99 8 per cent majority in Syria. The voting figures were officially given as follows : for union, 6,102,128 in Egypt and 1,312,759 in Syria ; against union, 247 in Egypt and 39 in Syria. For Colonel Nasser's election as President, 6,102,116 in Egypt and 1,312,809 in Syria ; against, 265 in Egypt and 186 in Syria.

After the result was announced President Kuwatly and the Syrian Cabinet headed by M. Sabry Assali tendered their resignation to President Nasser. Foreign diplomatic missions to Syria automatically lost their official status with the confirmation of the union, but were allowed two months in which to wind up their work, during which period their immunity and privileges would continue.

Between Feb. 22 and 25 the United Arab Republic was officially recognized by Afghanistan, Albania, Belgium, Bulgaria, Ceylon, Communist China, Czechoslovakia, Denmark, Western Germany, Greece, Hungary, Indonesia, Italy, Japan, Netherlands, Norway, Spain, Sweden, Switzerland, Tunisia, the U.S.A., the U.S.S.R., and the Vatican. Lebanon and Saudi Arabia announced their recognition on Feb. 26, the Sudan on March 3, and Pakistan on March 11. By March 13 recognition had also been accorded by Ethiopia, India, Yugoslavia, and all other countries having diplomatic representation in Cairo except Iraq, Jordan, Panama, and the Philippines. [Great Britain, France, and Australia have at present no diplomatic relations with Egypt.] The Iraqi Foreign Minister (Dr. Jamali) stated on March 6 that Iraq would not recognize the U.A.R. at present, and denounced it as an " unnatural union " and " a forgery and a farce."

The U.N. Secretary-General (Dr. Hammarskjold) announced on March 7 that he had accepted the credentials of the delegation of the U.A.R., which had become a single member of the U.N. in place of Egypt and Syria—thereby reducing the number of U.N. member-countries from 82 to 81. The delegation of the United Arab Republic at United Nations headquarters will be headed by M. Omar Loutfi, formerly head of the Egyptian delegation at the United Nations.

On Feb. 24 President Nasser flew to Damascus for consultations with Syrian political leaders on the Constitution of the U.A.R. and the formation of his Cabinet. A provisional Constitution, which expanded to 75 Articles the 17-point programme announced on Feb. 5, was proclaimed on March 5 ; the most important new provisions were that the President could appoint and dismiss one or more Vice-Presidents, and that the National Assembly would have the right to pass a vote of no-confidence in a Minister of the Republic.

The appointment by President Nasser of four Vice-Presidents of the United Arab Republic, and the membership of the first Cabinet of the U.A.R., were announced in Damascus on March 6.

Vice Presidents.

M. Abdel Latif el-Boghdadi ; Field-Marshal Abdel Hakim Amer ; M. Sabry Assali ; and M. Akram Hourani.

Cabinet.

Joint Egyptian-Syrian Ministries.

Dr. Mahmoud Fawzi	Foreign Affairs.
Field-Marshal Abdel Hakim Amer	War.
Dr. Aziz Sidky	Industry.
M. Kamaleddin Hussein ..	Education.
M. Fathi Radwan	National Guidance.
M. Ahmed Hassan Bakoury	Religious Affairs.
Wing-Commander Ali Sabry	Presidential Affairs.
M. Salah Bitar	Minister of State for Arab Affairs.

Ministries with Separate Regional Heads.

M. Hassan Abbas Zaki (Egypt) and M. Fakher el-Kayali (Syria)	Finance.
M. Zakaria Mohieddin (Egypt) and Colonel Abdel Hamid Sarraj (Syria)	Interior.
Dr. Nureddin Tarraf (Egypt) and M. Shawkhat Kanawati (Syria)	Health.
M. Ahmad Husni (Egypt) and M. Abdel Wahab Homad (Syria)	Justice.
M. Abdul Sharbassi (Egypt) and M. Nureddin Kuhala (Syria)	Public Works.
M. Mohammed Abu Nosseir (Egypt) and Major Ahmed Abdel Karim (Syria) ..	Rural and Municipal Affairs.
M. Abdel Moneim el-Kaissouny (Egypt) and M. Khalil Kallas (Syria)	Trade and Economy.
Dr. Said Marei (Egypt) and M. Ahmed Yunis (Syria) ..	Agriculture.
Dr. Mustafa Khalil (Egypt) and Colonel Amin Nafouri (Syria)	Communications.
M. Hussein Shafei	Planning and Social Affairs for Egypt.
M. Hassan Jubarrah ..	Planning for Syria.
Major Mustafa Hamdun ..	Social Affairs for Syria.

Of the four Vice-Presidents, M. el-Boghdadi was the former Speaker of the Egyptian National Assembly ; Field-Marshal Amer was C.-in-C. of the Egyptian armed forces and had been appointed C.-in-C. of the forces of the United Arab Republic on Feb. 22 ; M. Sabry Assali had previously been Prime Minister of Syria ; and M. Hourani, leader of the *Baath* Party, was the former Speaker of the Syrian Parliament.

All the joint Ministers had previously held the same posts in the Egyptian Government except M. Salah Bitar, the former Syrian Minister of Foreign Affairs. Most of the other Ministers had also belonged either to the former Egyptian or Syrian Governments, holding the same or similar posts. The newcomers on the Syrian side included Colonel Sarraj, hitherto head of the *Deuxième Bureau* (Intelligence Section) in the Syrian General Staff, as well as three other young Syrian officers, all of whom were reported to be *Baath* Party supporters—Major Hamdun, Major Kamm, and Colonel Nafouri. Apart from ex-President Kuwatly, who for some time had wished to retire for health reasons, the most notable member of the former Syrian Government not to be included in the new Ministry was Dr. Khaled el-Azem, the former Deputy Premier and Defence Minister, who had conducted the negotiations with the Soviet Union for Soviet economic aid to Syria.

The system of duplicate Ministries was regarded as an indication that the original proposal for a Central Cabinet and two Regional Executive Councils had been abandoned. M. Kayyali stated on March 12, however, that each region would have its own budget, in addition to the budget for the United Republic as a whole.

The *Baath* (Renaissance) Party dissolved itself on Feb. 24, and in a message to President Nasser promised to continue to work under his leadership " to liberate Arab territory from imperialism and to establish a progressive Arab society in which freedom, justice and prosperity prevail." This party—which enjoyed widespread support among the younger Syrian officers and part of the intellectuals and the middle classes—was largely responsible for the overthrow of the Shishakli dictatorship in 1954, and since 1956 had occupied a dominant position in Syrian politics. Its programme—Arab nationalism and unity, social and agrarian reforms, and neutralism—closely resembled that of Colonel Nasser's movement in Egypt.

Federal Union with Yemen.

An agreement establishing a federal union between the United Arab Republic and the Yemen, under the name of the United Arab States, was signed in Dasmascus on March 8 by President Nasser and the Crown Prince of the Yemen, Mohammed el-Badr. The terms of the agreement, which had been drafted during negotiations in Cairo on Feb. 6-16 and subsequently approved by the Imam of the Yemen, were as follows :

(1) The United Arab States would be a federation of the U.A.R., the Kingdom of the Yemen, and " those Arab States which will agree to join this Union."

(2) Each State would " preserve its international personality and its system of government."

(3) Defence and foreign policy would be unified, and economic policies co-ordinated. A Customs union and a common currency would be established later.

(4) The heads of member-States would constitute the Supreme Council of the Union.

(5) A permanent Federal Council, consisting of six representatives from each member-State appointed for three years, would assist the Supreme Council in the exercise of its duties, handle the political affairs of the Union, and prepare plans and measures designed to achieve closer unity. The members of the Supreme Council would preside in turn over the Federal Council for a year at a time, and their decisions would have to be unanimous.

(6) Councils for defence, economic questions, and cultural matters would be attached to the Federal Council.

(7) The United Arab States would have a separate Federal budget, to which the U.A.R. would contribute 97 per cent and the Yemen 3 per cent.

(8) A federal authority would define the frontiers of the United Arab States.

Orders issued by the Supreme Council on March 13 appointed Field-Marshal Hakim Amer as C.-in-C. of the armed forces of the United Arab States; named the Yemeni port of Hodeida as the permanent seat of the Federal Council, which, however, would also meet periodically in Cairo and Damascus; and set up a central currency organization for the Yemen, with authority to issue currency and control financial operations. A new paper currency would be issued—to be known as the Yemen pound, with the same value as the Egyptian pound—and silver rials of the same value as the existing Maria Theresa thalers would be the smaller monetary units.

The Imam's decision to federate with the U.A.R. was attributed by the Middle East Correspondent of *The Times* to "a realistic assessment by his advisers of the vulnerability of the monarchy in face of Colonel Nasser's emotional appeal to the dispossessed." A similar view was expressed by *The Observer*, which commented that "faced with growing pressure for reform in the Yemen, the Imam seems to have decided that this can be appeased less explosively inside the U.A.R. orbit than outside."

The Times commented: "The Imam is 69 and a sick man; for some years now the manoeuvring to secure the succession has been intense, and it would seem, particularly since the attempted *coup d'état* of 1955 [see 14167 C], that the so-called Young Yemenis, of whom Crown Prince El-Badr is the figurehead, have increasingly won the Imam's ear. Aware of the influence in their country of Cairo Radio and the 'Free Yemeni' movement directed from Cairo against the interests of the throne, they appear to have captured the Imam from within and, by persuading him to accept Colonel Nasser's leadership in the Arab world, they may hope to have outflanked their opponents and to have preserved the succession for their protégé, the Crown Prince.

"The logic of events may subsequently force upon them both the development and the reform of their backward country—some sketchy development has, indeed, already begun—but both they and Colonel Nasser may find it easier to concentrate on exploiting the squabble with Britain about the status of the Aden Protectorates as an escape from the enormity of their domestic problems." In this connexion it was noted that the agreement of March 8 provided for the definition of the frontiers of the United Arab States, and that the Crown Prince had expressed the hope, in a speech in Damascus on March 2, that the U.A.R. would help to "liberate the occupied south of Yemen" (i.e. the Aden Protectorates).

The total population of the United Arab States is about 35,000,000—23,000,000 Egyptians, 4,000,000 Syrians, and 8,000,000 Yemenis.

Resignation of General Bizri.

A Cairo announcement of March 22 stated that President Nasser had accepted the resignation of General Afifi Bizri, Commander-in-Chief of the Syrian Army prior to the formation of the United Arab Republic.

General Bizri became Syrian C.-in-C. in August last (see 15721 A), and had been generally regarded as a pro-Communist. No official reason was given for his resignation, but the Middle East Correspondent of *The Times* said that it was "unofficially conceded in informed Egyptian quarters that the decision to drop him from the team was taken by Colonel Nasser because of his Communist connexions." The Correspondent added that it was "not to be overlooked that all three of the Syrian leaders who were supposed to be aligned on the Communist side against the Baathists—the Communist Party leader, Khaled Baqdash, the deputy Prime Minister, Khaled el-Azem, and General Bizri—have been removed from their positions since the proclamation of the Syrian-Egyptian union." General Bizri held the rank of colonel at the time of his appointment as Syrian C.-in-C.; he was promoted to the rank of full general ten days before his resignation.

Egyptian-Syrian Conspiracy Allegations against King Saud and King Faisal. - President Nasser's Attack on Arab Federation.

In a speech in Damascus on March 5, President Nasser alleged that three cheques totalling £1,900,000, drawn on the Arab Bank of Riyadh (the capital of Saudi Arabia), had been paid to Colonel Sarraj to finance a military *coup* against the union of Syria and Egypt; he stated also that Colonel Sarraj had cashed the cheques but had passed on the money to the United Arab Republic, which would use it to promote heavy industry. Although President Nasser mentioned no names, Colonel Sarraj himself openly accused King Saud of being the instigator when he gave details of the alleged conspiracy at a press conference on the same day.

Colonel Sarraj said that he had been approached by Assad Ibrahim, the father of one of King Saud's wives, who had told him that the King had sworn to prevent the union, and had offered his financial and moral support to a *coup* which would make Colonel Sarraj President of Syria. King Saud's alleged plan was said to have involved the death of President Nasser, whose aircraft was to have been shot down while on its way to Damascus. Ibrahim was also alleged to have said that the U.S. Ambassador in Damascus was aware of the plot, and that the U.S.A. would recognize the new Syrian régime after the *coup*. Colonel Sarraj said that he had pretended to accept the proposal and that a cheque for £2,000,000 had been handed to him on Feb. 21 by M. Aziz Abbad (a member of the Syrian Parliament), who had brought it from Riyadh, in earnest of £20,000,000 more for carrying out the *coup*; he had, however, kept his Government informed, and the cheque had been cashed for the benefit of the U.A.R. on March 7. M. Abbad confirmed that he had acted as a "go-between," and alleged that King Saud, while not insisting on President Nasser's murder, had asked him to suggest it to Colonel Sarraj.

King Saud issued a statement on March 6 denying all knowledge of the alleged plot.

The King said that such a plot was inconsistent both with his principles and with his neutral attitude towards the U.A.R.; declared that it was "either a foreign conspiracy aimed at causing a dispute between sections of the Arab world or an artificial plan designed to jeopardize the interests of Arab nations"; and ordered the setting-up of a committee to investigate the matter. The Arab Bank stated on March 6 that it had no record or knowledge of the cheques allegedly paid to Colonel Sarraj, whilst the U.S. State Department described the allegations of U.S. complicity as "completely without foundation." The Government of the U.A.R. offered on March 7 to receive the inquiry committee set up by King Saud, and to provide it with all documents and facilities to enable it to carry out its mission. Demonstrations against King Saud occurred on March 6 both in Damascus and in Beirut, the Lebanese capital.

During a political trial in Cairo, held on March 5-9 before the Supreme Military Court, allegations were made that a conspiracy for the assassination of President Nasser and his Cabinet, and the setting-up of a Government headed by M. Ahmed Mortada el-Maraghi (Minister of the Interior in the Maher and Hilaly Governments of 1952), had received financial support from both King Saud and King Faisal of Iraq.

The five persons accused (all of whom were tried *in absentia*) were M. Maraghi, M. Hussein Khairy (a relative of ex-King Farouk), M. Mahmoud Namek, and two Lebanese citizens, M. Edmond Habib and M. Jofy Bishara. The chief witness for the prosecution, Wing-Commander Issam Khalil, alleged that the defendants had been promised £2,000,000 to £3,000,000 by King Saud and £100,000 by Crown Prince Abdul Ilah of Iraq; that British intelligence agents had paid him sums totalling £162,500, unaware that he was himself a Government security agent; that M. Maraghi, whom he accused of being the "No. 1 British agent," had said that the U.S.A. and France were co-operating with the conspirators; and that the Lebanese Government had given them police protection in Beirut. Another witness, M. Farid Sherif, told the Court that the accused had said that they were receiving money from King Faisal as well as from King Saud.

Despite his congratulatory message to King Faisal on the creation of the Arab Federation (see 16017 A), President Nasser declared in a broadcast on Feb. 26 that the Federation of Iraq and Jordan would be "scattered like dry leaves before the wind" and that the U.A.R. would "bring together the whole Arab nation whether they [i.e. the Governments of Iraq and Jordan] like it or not." In another broadcast on Feb. 27 President Nasser denounced the Foreign Ministers of Iraq and Jordan (respectively Mr. Burhanuddin Bashayan and Mr. Samir Rifai), together with Dr. Jamali (the former Iraqi Premier), as "imperialist stooges." (Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. United Arab Republic, 16005 A.)**

A. UNITED KINGDOM. — Exchange Control. - Lifting of Restrictions on Import of Sterling Notes.

All restrictions on the import into the U.K. of sterling notes were removed as from Feb. 28; previously the amount of sterling notes which a traveller was allowed to bring into the country was limited to £10 per person. The new relaxation will help travellers, enable some exchange control work at ports to be eliminated, and make possible the repatriation of the large stocks of sterling notes held abroad, especially by foreign banks. No change was made in the limit of £10 in sterling notes which may be taken out of the United Kingdom by travellers. (Treasury Press Office - Financial Times)

A. UNITED KINGDOM.—Army Estimates, 1958-59. - Brigade Group adopted as Basic Formation of Army. - Reorganization of Middle East Command.

The Army Estimates for 1958-59, and an accompanying memorandum by the Secretary of State for War (Mr. Christopher Soames), were published as White Papers on Feb. 19. The memorandum is summarized below under cross-headings.

Finance.

The net figure of £401,900,100 shown for the Army in the Defence White Paper (£500,000 more than the net figure shown in the Estimates for 1957-58) was arrived at after deducting from the gross Estimates a total of £96,750,000 for Appropriations in Aid, including £39,500,000 representing the estimated contribution by the German Federal Government to the local costs of the British Army in Germany. No mutual defence assistance would be forthcoming from the U.S. Government in 1958-59.

As a result of the decrease in the Army's strength from about 325,000 adult males to 285,000, reductions had been possible in the Votes for civilians, movements, supplies, and stores for maintenance —the last-named Vote having been still further reduced by the proposed use for normal maintenance of surplus stores worth about £20,000,000 Against these reductions had been set the increased cost of improvements in pay, allowances, and conditions of service (amounting to about £13,000,000), and the extra cost (totalling £11,000,000) of retirement benefits, including special compensation payments to officers, warrant officers, and n.c o.s prematurely retired [see 15795 A].

Operations.

After speaking of the " substantial savings " in manpower made by the re-deployment of British troops in Germany and the rundown of the B.A.O.R., the memorandum reviewed the Army's activities in the Middle East, East and West Africa, and Malaya. It mentioned the Command reorganization in the Middle East necessitated by Britain's inability to rely in future on unrestricted sea passage through the Suez Canal or overflying rights for military aircraft [see below], and said that G.H.Q., Middle East Land Forces in Cyprus would remain responsible for British commitments under the Baghdad Pact.

The garrison in Libya had been reduced; evacuation of British troops from Jordan had been completed in July; and the Government of the Federation of Malaya had assumed responsibility for external defence and internal security, although at its request U.K., Australian, and New Zealand forces remained in Malaya and had continued to take part in anti-terrorist operations.

In West Africa, control of the Nigerian military forces and financial responsibility for them would be assumed by the Government of the Federation of Nigeria on April 1, 1958, and discussions were proceeding for the transfer of the forces in Sierra Leone on April 1, 1959. In Kenya, the last of the British battalions sent out in the Mau Mau emergency would leave the Colony during the coming spring, but a battalion of the Central Reserve would be stationed there from the same period.

Organization. - Brigade Group adopted as Basic Formation.

Under the Army reorganization plan announced in July 1957 (see 15702 A), four amalgamations of Royal Armoured regiments and seven amalgamations of infantry battalions would take place during 1958-59, whilst the Royal Artillery would be reduced by seven regiments and the Royal Engineers by the equivalent of two, with consequential reductions in the Royal Signals and in administrative services.

After prolonged study, the War Office had decided to adopt the Brigade Group as the most suitable basic formation for all purposes. There would be infantry and armoured brigade groups, and each would consist of all arms and be self-contained and capable of operating independently. Divisional headquarters, instead of commanding a fixed number of brigades as hitherto, would be smaller, with a varying number of armoured and infantry brigade groups placed under each, according to the requirements of the military situation. Divisional troops would be kept to a minimum, and Brigade groups would obtain their support mainly from Corps resources.

The Central Reserve would, in the main, be stationed in the United Kingdom, and would be organized on a brigade group basis. To increase its mobility and effectiveness, recourse would be had to stores located at suitable points overseas; Central Reserve units could thus be flown in an emergency to the theatre of operations with little more than personal equipment.

The proposed Brigade Group organization was set out in an appendix to the memorandum as follows:

H.Q. Armoured Brigade Group—3 armoured regiments; armoured personnel carrier squadron; infantry battalion; medium regiment Royal Artillery; field squadron Royal Engineers; signals squadron; reconnaissance flight Army Air Corps; services.

H.Q. Infantry Brigade Group—3 infantry battalions; armoured regiment; field regiment Royal Artillery; field squadron Royal Engineers; signals squadron; reconnaissance flight Army Air Corps; services.

The Reserve Army. Since part-time training for National Servicemen in the Reserve Army had been waived in January 1957 [see 15669 A] recruiting for the Territorial Army had risen steadily, and in October-December 1957 had increased by an average of 1,000 a month, compared with a net monthly decrease in October-December 1956. Returns also showed that 14,000 young men with no previous military experience had volunteered for the T.A. in 1957, compared with only 7,000 in 1956.

The memorandum also referred to the recommendations of a Committee on the Army Cadet Force, which had published its report in October 1957. These included (1) a more standardized organization; (2) closer co-operation between the A.C.F. and the Regular and Territorial Armies; (3) a stricter selection procedure for A.C.F. leaders; (4) the setting-up of an A.C.F training centre. The memorandum stressed that implementation of the report should improve the efficiency of the A C.F. and increase the flow of volunteers from the A.C.F. to the Regular and Reserve Armies.

Civilianization. During 1957-58 the rundown of the Army had been accompanied by a reduction of 30,306 in the number of civilians employed, a further 10,359 being due for discharge in 1958-59. The policy of employing civilians in lieu of soldiers to the maximum possible extent would continue, however, and the ratio of soldiers to civilians (5 to 3 in 1956) was expected to be about 1 to 1 in 1963.

Closure of Installations. As a result of a review of U.K. administrative arrangements, 15 major storage installations and two important workshops had been closed during 1957, and a further 26 installations would be closed in 1958-59

Weapons and Development.

The Memorandum stated that two surface-to-surface Guided Weapons Regiments now in training would join the B.A O.R. in due course, and that the *Thunderbird* surface-to-air guided missile (see 15669 A) would be available for training purposes in 1958-59. As to other weapons, a proportion of the Army would be equipped with the British version of the FN rifle during the year; the L-2 submachine gun (also known as the *Sterling*) was now being produced in quantity and would progressively replace the *Sten*; and the *Mobat A*—an interim heavy anti-tank gun derived from the B.A.T.—would be issued to infantry units. More of the new range of radio equipment would also be introduced into service. Development was proceeding of a more advanced anti-tank weapon

Manpower.

The total strength of the Active Army at Dec. 31, 1957, was given as 340,638, compared with 383,848 at Dec. 31, 1956.

National Servicemen. The Army's share of the men to be called up in 1958 would be about 79,000, against about 90,000 in 1957.

Regular Other Ranks. *Recruiting.* The number of Regular recruits in 1957 was given as 28,696 (27,611 on normal and 1,085 on short-service engagements). The memorandum explained that the announcement in April 1957 that it was planned to end National Service in 1962 had been followed by a sharp decline in the number of three-year engagements. Since October, 1957, the shortest engagement (with some minor exceptions) had been for six years, and between Nov. 1, 1957 and Jan. 31, 1958 the number of six-year and nine-year engagements was 3,537.

The number of boys recruited in 1957 was 3,076, or 18 per cent more than in 1956. The number of boys under training as Junior Leaders and Army Apprentices had increased during the year from 4,300 to 4,700.

Prolongations. In October-December, 1957, 620 men on three-year engagements prolonged to six, nine, or 12 years; and 1,254 others on six to 12 years' engagements prolonged to 15 years or more.

Women's Royal Army Corps. Recruiting declined during the first nine months of 1957 but improved in the fourth quarter, though there was still a shortage of clerical and signal grades. It was intended that the WRAC should take over more administrative and static jobs as the Army grew smaller.

Officers. There were still too few young Regular officers coming forward. Although the shortage was at present being made good by National Service officers, it was vital that more candidates should be obtained from the Royal Military Academy, Sandhurst, and by direct entry from the Universities.

To help remedy the present shortage of professionally-qualified officers, the following categories of University graduates would be eligible for National Service and short-service commissions without preliminary service in the ranks: (*a*) science or engineering graduates, for direct commissioning into the Royal Engineers, Royal Signals, Royal Army Ordnance Corps, and Royal Electrical and Mechanical Engineers; (*b*) graduates holding degrees in mathematics, physics, or engineering subjects, for commissioning into the Intelligence Corps; (*c*) graduates with degrees in subjects required by the Royal Army Educational Corps; (*d*) graduates holding a degree of Bachelor of Commerce or Economics, or qualified as accountants, for commissioning into the Royal Army Pay Corps.

The memorandum stressed that there were still too few candidates coming forward for permanent commissions in the Royal Army Medical Corps.

Rations.

After referring to the improved ration scales (with more protein foods, especially meat) introduced early in 1957 for troops at home and overseas, the memorandum stated that catering by civilian contract would be tried out in two major U.K. units in 1958-59. Meanwhile proposals made by an Inter-Service Working Party for co-ordinating food supplies in the U.K., and accepted by the Service Departments, would enable two Army Command Supply Depots (at Plymouth and Southampton) to be closed immediately, and there would be further closures during 1958-59. In addition, some Army Depots would draw their bulk food supplies from Naval Depots, resulting in less movement.

Works.

In accordance with recommendations put forward by a committee under Lieut.-General Lord Weeks, and accepted by the Army Council, the existing military works organization would be replaced by a new civilian works organization which would combine technical, administrative, and financial responsibility for the planning, execution, and control of works services. It would be headed by a Director-General of Works and an Assistant Under-Secretary of State, to be appointed shortly.

During 1957-58 barracks had been completed in the U.K. for about 3,750 men at 12 sites (the largest being at Bicester, Sudbury, and Donnington), and 140 new married quarters had been built and about 1,000 modernized. A building programme to cover the next five years, with special emphasis on new barrack accommodation and married quarters, had been drawn up and 15 major projects were planned to start in 1958-59. Provision of permanent accommodation (including married quarters) for long-term garrisons in Aden, East Africa, and the Far East was also planned to begin in the year 1958-59.

Disposals.

Since April 1956 about 328,000 tons of stores, 193,000 tons of ammunition, and 30,000 vehicles had been disposed of in the U.K., and a further 300,000 tons of stores and ammunition and 13,000 vehicles remained for disposal. In 1956-57 about £9,800,000 was obtained from the sale of Army surpluses at home and overseas. Corresponding receipts for 1957-58 and 1958-59 were expected to total £16,000,000 and £13,000,000 respectively.

Administration.

During 1957-58 the War Office had begun studies aimed at the simplification of Army Administration, the delegation of authority, and the reduction of paper work. A Committee on Army Administration under General Sir Robert Mansergh, and with members drawn from business and industry, had been appointed to pursue these studies and, in particular, to simplify the administrative work of "teeth" arm units. Modern systems of stock control would be introduced for the B.A.O.R., thus reducing the amount of stores needed to be held on the Continent, and saving manpower, storage, and foreign exchange. Electronic computers would also make an increasing contribution towards efficiency and economy.

The names of the units affected by the amalgamation announced in the memorandum as due to take place in 1958-59, with the provisional dates and places of amalgamation, were given by the War Office on Feb. 20 as follows :

Royal Armoured Corps. 3rd and 7th Hussars (October 1958, U.K.); 4th and 8th Hussars (October 1958, B.A.O.R.); 4th and 7th Royal Tank Regiment (January 1959, B.A.O.R.); King's Dragoon Guards and Queen's Own Hussars (January 1959, place undecided).

Infantry. West and East Yorkshire Regts. (April-June 1958, Dover); Devonshire and Dorset Regts. (April-June 1958, B.A.O.R.); Bedfordshire and Hertfordshire Regt. and Essex Regt. (June-August 1959, B.A.O.R.; East and South Lancashire Regts. (July-September, 1958, Hong Kong); King's and Manchester Regts. (September-November 1958, U.K.); North and South Staffordshire Regts. (March-May 1959, B.A.O.R.); Royal Berkshire and Wiltshire Regts. (March-May 1959, U.K.).

The nine Royal Artillery regiments to be disbanded in 1958-59 had not yet been decided on.

Adoption of Army Estimates.

The House of Commons passed the Army Estimates without a division on March 6, on a motion by Mr. Christopher Soames (Secretary of State for War).

Speaking of the "re-shaping" of the Army, Mr. Soames said that from the time when atomic weapons became a possibility on the tactical battlefield, large concentrations of men and material became "a thing of the past." The organization of the fighting formation thus had to be adapted to changed circumstances. The large division of 20,000 or more was no longer what was required, and most countries had decided in favour of a division of about 10,000, with armoured divisions of possibly 15,000. The Army Council had unanimously decided that the Brigade system, with two types, armoured and infantry, should be adopted as being "sound for global war and readily adaptable to our needs for cold or limited war." There would be Brigade Groups in Europe [Germany] and at home. Divisional headquarters would be smaller and would be capable of controlling from two to four Brigade Groups, which might possibly include both types of brigade; the support units would be Corps or Army Groups, allotted as the tactical situation demanded. This would provide a basic fighting formation organized in the best way to meet the situation in nuclear war, while retaining the power of centralization at divisional headquarters. In addition to the active U.K. Army, there would be a Brigade of Gurkhas and the Colonial forces. Mr. Soames added that it was planned to raise the percentage of men serving in the "teeth" arms—the infantry, armoured corps, artillery, engineers, and signals—from the present 59 per cent to 64 per cent by employing more civilians in the administrative services.

Turning to the effects of the Army's rundown, the Minister stated that by the beginning of 1963 about 5,000 officers and over 6,000 warrant officers and senior n.c.o.'s would have been retired, but about 78 per cent of Regular officers of or below the rank of major and 70 per cent of warrant officers and senior n.c.o.'s of or above the rank of sergeant would be retained. About 1,280 officers and 1,820 warrant officers and senior n.c.o.'s would be retired in 1958-59; in the later stages, lists of those to be retired would be issued every six months.

Mr. Soames said that although recruiting figures so far were "encouraging," it was as yet too soon to prophesy whether or not the Army would get the numbers needed, since neither the results of the improved pay and allowances coming into operation in April nor the effect on recruits of the approaching end of National Service could be predicted. Financial benefits, however, were by no means the whole answer to the problem of recruiting and keeping men, and it would not be possible to get the recruits or prolongations needed unless the permanent building programme was proceeded with urgently. The Government therefore planned to spend £45,000,000 in the next five years on rebuilding barracks and providing married quarters at home, in addition to work already in hand.

In connexion with recruiting, Mr. Soames also announced : (1) that the provision of a new and attractive "walking out" uniform was being considered, and that different types of uniform would be tried out by chosen regiments during 1958; (2) that a committee of serving officers with recent regimental experience had been set up under General Sir Lashmer Whistler to review methods of discipline, management, and instruction from the point of view of the individual soldier.

Other Army Developments.

Other developments in connexion with the Army during recent months are summarized below :

Opposition to Merger of Scottish Regiments. The Government's proposal, as part of the regimental merger scheme (see 15702 A), to amalgamate the Highland Light Infantry and the Royal Scots Fusiliers—both regiments with a long and distinguished history—was strongly opposed by the regiments themselves and by prominent Scottish civilians. On Aug. 1, 1957, a deputation of Scottish M.P.s of all parties, led by Sir Thomas Moore, saw the Prime Minister and suggested as alternatives (*a*) that the R.S.F. should be merged with the Cameronians instead, or (*b*) that both the H.L.I. and the R.S.F. should remain intact, but that the R.S.F. should form part of the proposed Fusilier Brigade (15702 A). On Aug. 16, however, Mr. Macmillan replied that neither alternative was practicable, and that the H.L.I. and the R.S.F. might have to be disbanded and a new regiment raised in their place unless they agreed to the proposed merger.

The Government's refusal to modify their plan aroused great indignation in Scotland, culminating on Sept. 29 in a protest march at Glasgow (the H.L.I. headquarters) in which about 20,000 soldiers and civilians took part. Renewed approaches to the War Office proved useless, however, and on Oct. 15 Mr. John Hare (Secretary of State for War) informed the Lord Provost of Glasgow (Mr. Andrew Hood), who had taken a prominent part in opposing the amalgamation, that each of the suggested alternatives possessed "some insuperable objection." Mr. Hare also rejected a further suggestion, put forward by (the late) Colonel Walter Elliot, M.P., that the H.L.I. should amalgamate with a battalion of the Parachute Regiment.

The position was made more difficult by the fact that the H.L.I. traditionally wore kilts and the R.S.F. trews. After lengthy inter-regimental discussions, a compromise was reached whereby the R.S.F. agreed to wear kilts instead of trews provided they were in the R.S.F.'s own tartan, whilst the H.L.I. agreed to give up their own tartan provided that kilts were worn. This solution, however, was unacceptable to the War Office, which insisted that the amalgamated regiment should wear trews. The honorary colonels of the H.L.I. and R.S.F. (respectively Major-General Urquhart and Major-General Hakewill-Smith) were unable to agree to this, whereupon Mr. Hare asked them to resign "to allow of successors being appointed who could agree." [It was commented in the Press that there was no precedent in modern times for the colonel of a regiment resigning except for health reasons.]

Mr. Hare explained in the House of Commons on Dec. 11, 1957, that the Army Council had decided that the amalgamated regiment should wear trews and not kilts for two reasons : (1) the other colonels of both Highland and Lowland Brigades had stressed that "the wearing of the kilt by a regiment forming part of the Lowland Brigade is unacceptable to both Highland and Lowland regiments"; (2) the new amalgamated regiment would be one of four within the Lowland Brigade, and senior officers and n.c.o.'s would be on a common roll for posting. "To submit officers and other ranks to the need to change from kilts to trews, or alternatively from trews to kilts, would . . . be most unwelcome to other Lowlanders in the Brigade."

The War Office announced on Dec. 24 (i) that Brigadier A. L. Buchanan-Dunlop (Deputy Advocate-General at G.H.Q., Far East Land Forces) had been appointed honorary colonel of the Royal Scots Fusiliers; (ii) that Major-General Bramwell-Davis (G.O.C., Aldershot District) had been appointed honorary colonel of the Highland Light Infantry. On Feb. 10 the two colonels issued a joint statement expressing the wish of both regiments to "accept the necessity of amalgamating, with all that this entails."

T.A. Yeomanry Regiments reorganized as Armoured Car Regiments. The War Office announced on Feb. 26, 1958, that the British commitment to provide two Territorial Army divisions as NATO reinforcements had ended, and that five T.A. yeomanry regiments at present equipped with tanks (including four retained as armoured regiments for the NATO divisions when the T.A. was reorganized in 1956) would be reorganized as armoured car regiments. They

were : the Royal Wiltshire Yeomanry, the Queen's Own Warwickshire and Worcestershire Yeomanry, the Staffordshire Yeomanry, the Cheshire Yeomanry, and the Westminster Dragoons.

New Guided Weapons Regiment. The War Office announced on Sept. 4, 1957, that No. 27 Heavy Anti-Aircraft Regiment would be converted into No. 27 Guided Weapons Regiment (Field), Royal Artillery, and would be equipped with guided weapons and stationed at Oswestry. The new regiment was the second *Corporal* regiment to be formed.

Army Appointments. The following senior appointments were announced in recent months (date of announcement in parentheses) :

Lieut.-General Sir Gerald Lathbury, C.-in-C., East Africa, as Director-General of Military Training, War Office, *vice* Lieut.-General Sir James Cassels (April 1, 1957).

Lieut.-General Sir Roger Bower, lately G.O.C., Malaya Command, as C.-in-C., Middle East Land Forces, *vice* General Sir Geoffrey Bourne, appointed Commandant of the Imperial Defence College in succession to Admiral Sir Guy Russell. (Nov. 14, 1957).

Reorganization of Middle East Command.

Mr. Sandys, the Minister of Defence, had announced on Nov. 8, 1957 that, as it was clear that British forces in Arabia and East Africa could be better controlled from London than from Cyprus in the present situation, the Government had decided to create a separate integrated command at Aden responsible direct to London. The new Command would control all British land and air forces in the Arabian peninsula and British Somaliland, and the naval forces allotted to the Persian Gulf. The new arrangements would come into force on April 1, 1958.

For the same reasons it had been decided to separate the East African area from the Middle East Command. An element of the Strategic Reserve would be stationed in Kenya, and these troops would be readily available at need to go as reinforcements either to the Arabian Peninsula or the Far East. Although their use would be controlled from London, they would be administered by the G.O.C., East Africa. The new arrangements would not involve any new headquarters or base installations in Kenya ; vehicles and heavy equipment would be kept in Aden and Singapore to enable them to be quickly transported.

The Minister added that it was intended eventually to establish an integrated Army and Air Force Command in Cyprus, under a single commander, but the internal situation in the island made it necessary for the time being to postpone this arrangement. British land forces in Libya would continue to be controlled from Cyprus. The decision to detach the forces in the Arabian Peninsula and East Africa from the Middle East Command would enable substantial reductions to be made in the staff and base organization in Cyprus.

The independent Aden Command came into being on April 1, 1958, under Air Vice-Marshal M. L. Heath, who, as A.O.C., British Forces, Arabian Peninsula, will control the above-mentioned forces and also the Trucial Oman Scouts, the Aden Protectorate Levies, and the Somaliland Scouts. (Cmnd. 372 - Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. 16029 A ; Army Estimates, 1957-58, 15669 A ; Amalgamation of Units, 15702 A.)

A. UNITED KINGDOM. — Committee on Co-operation between Gas and Electricity Industries.

The Parliamentary Secretary to the Ministry of Power (Mr. Ian Horobin) announced on March 10 that the Government had set up a committee to re-examine the possibilities of economic co-operation between the gas and electricity industries—e.g. by cutting out needless duplication of showrooms, meter reading, and administrative methods—without affecting the basic competition between them. The committee's chairman will be Sir Cecil Weir, a former head of the British delegation to the European Coal and Steel Community, and previously economic adviser to the Control Commission for Germany. (Times - Daily Telegraph)

B. JAPAN. — Opening of Kanmon Tunnel.

The Kanmon undersea road tunnel, linking the islands of Honshu (the main island) and Kyushu under the Straits of Shimonoseki, was opened to traffic on March 9. With a length of 11,421 ft., it is the second largest undersea tunnel in the world, being surpassed only by the Mersey Tunnel in Britain. It consists of two " storeys "—an upper one for vehicles and a lower for pedestrians—and cost 7,616,720,000 yen (about £7,000,000). A railway tunnel under the Straits of Shimonoseki has been in operation since 1942.—(Japanese Embassy Press Office, London) **(Prev. rep. 5649 D.)**

C. UNITED KINGDOM. — Torrington By-election. - Liberal Gain from Conservatives.

Polling took place on March 27 in the Torrington division of Devon, the by-election being caused by the succession to the peerage of Mr. George Lambert (National Liberal and Conservative) consequent on the death of his father, Lord Lambert. The Liberal Party won the seat from the Conservatives in a three-cornered contest, the result being :

Bonham Carter, Mark (Liberal)	13,408
Royle, Anthony (National Liberal and Conservative)	13,189
Lamb, Leonard (Labour)	8,697
Liberal gain from Conservative. Liberal majority ..	219

Torrington was the first by-election to be won by the Liberal Party for 29 years. Figures at the 1955 general election were : G. Lambert (Nat. L. and C.) 20,124, L. Lamb (Lab.) 10,812—National Liberal and Conservative majority, 9,312.

The Liberal candidate received 37.99 per cent of the votes, the National Liberal and Conservative 37.37 per cent, and the Labour candidate 24.64 per cent. At the general election the National Liberal and Conservative candidate received 65 05 per cent of the votes and the Labour candidate 34.95 per cent. The National Liberal and Conservative proportion thus dropped by 27 68 per cent and the Labour proportion by 10.31 per cent. The last occasion the Liberals contested the constituency was in 1950, when they polled 9,589 votes in a three-cornered contest—the National Liberal and Conservative receiving 19,128 votes and the Labour candidate 8,735 votes. Mr. George Lambert had represented the constituency and its predecessor, South Molton, since 1945.

79.98 per cent of the electorate voted in the by-election, against 69.19 per cent at the general election—an increase of over 10 per cent. The total electorate numbered 44,128, a decrease of 584 since the general election.

Torrington is a large rural constituency covering 600 square miles of north-west Devon and including the small towns of Bideford, Crediton, and Okehampton. It extends from just south of Barnstaple to within a few miles of Exeter, taking in a stretch of the North Devon coast and part of Dartmoor. The constituency includes Lundy Island.

The Torrington result was greeted with jubilation by the Liberal Party, whose leader (Mr. Grimond) described it as " a magnificent achievement " and added that " we [the Liberals] are now a real, progressive alternative to discredited Conservatism." Mr. Morgan Phillips, secretary of the Labour Party, said that the by-election represented " another shattering blow to the Government." Lord Hailsham, chairman of the Conservative Party, said that the Government " will not be deterred from continuing to pursue their policies in the interests of the safety and stability of the country."

The result was declared at Bideford on March 28 after a recount. In a televised interview the same evening, Lady Violet Bonham Carter (mother of the successful candidate) disclosed that the first count had given the Liberals a majority of 294 and that a recount had been demanded on behalf of the Conservative candidate.

The Torrington result constituted the Government's fourth by-election defeat since the last general election, and the third in succession following the Rochdale and Kelvingrove by-elections, both of which were won by Labour. It also restored the number of Liberal M.P.s in the House of Commons to six, cancelling out the loss of Carmarthen to Labour in February 1957.

Mr. Mark Bonham Carter (36) is the son of Sir Maurice and Lady Violet Bonham Carter and grandson of the Earl of Oxford and Asquith, who (as Mr. Herbert Asquith) was Prime Minister from 1908-1916. He is a director of the publishing firm of Collins, and contested Barnstaple for the Liberal Party in 1945. (Times - News Chronicle)
(Prev. rep. By-elections, 16068 E.)

D. GREECE. — Discovery of Uranium Deposits.

The discovery of " rich " uranium and thorium deposits in northern Greece was announced in Athens on March 17. It was stated that the deposits had been discovered by a French team of geologists in parts of eastern Macedonia and western Thrace, near the Greek-Bulgarian frontiers. Under Greek law the uranium and thorium deposits are the property of the State.—(Times)

E. UNITED STATES. — Mr. Stans succeeds Mr. Brundage as Director of the Budget.

It was announced in Washington on March 13 that President Eisenhower had accepted the resignation of Mr. Percival F. Brundage as Director of the Budget and had appointed Mr. Maurice A. Stans, the deputy director, as Mr. Brundage's successor.—(New York Times - New York Herald Tribune)
(Prev. rep. 14732 B.)

A. DISARMAMENT. — Polish Proposals for Atom-free Zone in Central Europe. - Memorandum on Rapacki Plan. - Soviet Allegations against Western Powers. - Repudiation by Britain and United States.

The Polish proposals for an "atom-free" zone in Central Europe, covering the territory of Poland, Czechoslovakia, Eastern Germany and Western Germany, were amplified in a memorandum issued in Warsaw on Feb. 15 and handed by M. Adam Rapacki (the Foreign Minister, and originator of the proposals) to the Ambassadors of the United States, the Soviet Union, Great Britain, France, Czechoslovakia, and Eastern Germany, and also to the Chargés d'Affaires of Canada and Denmark. The memorandum was also conveyed to the West German Government through the intermediary of the Swedish Government.

The memorandum contained a "more detailed elaboration" of M. Rapacki's proposals originally made at the U.N. General Assembly [see page 15979], and expressed the hope that they might "facilitate the opening of negotiations and the reaching of an agreement on this subject." The detailed proposals were set forth as follows :

(1) Poland, Czechoslovakia, the German Democratic Republic, and the German Federal Republic should constitute an "atom-free" zone in which (*a*) nuclear weapons would be neither manufactured nor stockpiled ; (*b*) installations designed for such weapons would not be set up ; and (*c*) the use of nuclear weapons would be prohibited.

(2) The United States, the Soviet Union, Great Britain and France should undertake not to maintain nuclear weapons in the armaments of their forces stationed on the territories of these States ; not to instal any installations or equipment in those territories for servicing nuclear weapons, including missile launching sites ; and not to transfer such weapons or equipment to any of the four Governments in the area.

(3) Those Powers possessing nuclear weapons should undertake not to use them against any territory in the "atom-free" zone, or against any targets situated in the zone.

(4) Other States maintaining forces on the territory of any State in the zone should give undertakings similar to those of the great Powers.

(5) To ensure the implementation of these provisions, the States concerned should create "a system of broad and effective control in the area of the proposed zone, and submit themselves to its functioning." Such inspection could comprise both ground and aerial control, and the experience gained "could provide useful experience for the realization of broader disarmament measures."

(6) The control and supervisory machinery should include representatives of the NATO and Warsaw Treaty organizations, and also "representatives of States which do not belong to any military grouping in Europe."

(7) In the Polish Government's view, these arrangements and obligations could best be embodied in an "appropriate international convention." Alternatively, they could be embodied either in four unilateral declarations [by the great Powers] "bearing the character of an international obligation" and deposited with a mutually agreed State ; or in a joint document signed by the Powers.

Full agreement with these proposals was notified to the Polish Government by Czechoslovakia on Feb. 19, by Eastern Germany on Feb. 27, and by the Soviet Union on March 3. The spokesman of the Soviet Foreign Ministry (M. Ilyichev) had previously stated that the U.S.S.R. was willing to undertake all the commitments in the "Rapacki plan" provided that the U.S., British, and French Governments "do the same." No replies from the Western Powers had been received in Warsaw by the end of March.

The Soviet Government issued a statement on March 14 accusing the Western Powers of trying to "distract attention" from a summit conference by resuming disarmament negotiations through U.N. channels. The statement said :

"Reports have appeared in the foreign Press lately that the U.S.A. and other Western Powers are planning to summon the U.N. Disarmament Commission. Knowing in advance that this would yield no positive results, they set themselves the task of blaming the stalemate in the disarmament talks on the Soviet Union's refusal to take part in the Commission's work. Using this as a pretext, it is planned to refer the entire disarmament problem to the Security Council . . . Under these circumstances, the plans to summon the U.N. Disarmament Commission and to refer the disarmament problem to the Security Council can be regarded only as an attempt to sidetrack public attention from a summit meeting of Heads of Government, one of whose main tasks would be to find ways to agreed decisions on disarmament problems."

The statement went on to recapitulate the Soviet Government's objections to the enlarged U.N. Disarmament Commission, and the reasons why it would not participate in its work.

The British Foreign Office issued a statement on the same day (March 14) saying that it was "regrettable that the Soviet Union should have issued so distorted a statement," and continuing :

"It is true that the Western Powers were thinking of a meeting of the Security Council if the Russians remain unwilling to attend a meeting of the Disarmament Commission. But the intention was that the Council would be summoned only to give their approval for the prosecution of disarmament negotiations through other channels—including, of course, a possible summit meeting. In this way the responsibility of the U.N. in the matter of disarmament would be maintained. There was never any intention to inaugurate a discussion of the substance of disarmament in the Security Council at this stage.

"This whole concept was explained to the Russians in confidence some days ago, and it is unfortunate that they should have chosen to react in this unhelpful manner to a constructive scheme designed to take account of their position and to improve the prospects of breaking the deadlock in the disarmament talks."

The U.S. State Department issued an announcement on March 15 saying that the Soviet statement "distorts the U.S. position and casts doubt that the Soviet Union wants serious discussions on the disarmament question." It continued :

"Specifically, the U.S.A proposed to the U.S.S.R., after consultation with a number of other U.N. members, that a meeting of the enlarged Disarmament Commission be held pursuant to the resolution adopted by the General Assembly last year . . The U.S.A. also informed the U.S.S.R. that if it was found that, owing to Soviet non-participation, the Disarmament Commission could not usefully pursue serious discussions, the Security Council should hold a purely procedural meeting in order to provide a proper link between the U.N. and any subsequent disarmament discussions.

"Under the Charter, the Security Council has an important responsibility to bring about the regulation of armaments. The purpose of Council consideration would be to give this body the opportunity to take procedural action designed to lead to an early resumption of disarmament discussions through other channels. Rather than creating obstacles in the way of future disarmament discussions, this procedure would ease the way to and enhance the possibility of meaningful talks.

"The U.S.S.R.'s reiteration of its unwillingness to participate in the Disarmament Commission constitutes a continued flouting of the resolution adopted overwhelmingly by the General Assembly. In opposing Security Council consideration of disarmament, even on a procedural basis, the U.S.S.R. seems to be implying that it no longer recognizes the responsibility of the Council to deal with disarmament."

The statement added that "the United States is not prepared to disregard the United Nations in its efforts to resume disarmament talks."—(Polish Embassy Press Office, London - Soviet Embassy Press Dept., London - Times - New York Times) **(Prev. rep. 15941 A ; Rapacki Plan, page 15979 ; Polish-Soviet Discussions, 16016 A.)**

B. VATICAN. — Cardinal Stritch appointed Pro-Prefect of "Propaganda Fide" Organization.

The Papal organ *Osservatore Romano* announced on March 1 that the Archbishop of Chicago, Cardinal Samuel Alphonsus Stritch (70), had been appointed by the Pope to the newly created post of Pro-Prefect of the Sacred Congregation for the Propagation of the Faith (*Propaganda Fide*). Cardinal Stritch thereby became the first American prelate to head one of the 12 Congregations (departments) of the central administrative machinery of the Roman Catholic Church.

In his new capacity, Cardinal Stritch will be in effect head of all Roman Catholic missions throughout the world, with authority over some 25,000 missionary priests, nearly 10,000 missionary lay brothers, and over 60,000 missionary nuns in five continents. As a member of the Curia he will reside in Rome permanently. The 14 other members of the Curia include only one non-Italian—Cardinal Tisserant, of France, who is Dean of the Sacred College.

The nominal head of the *Propaganda Fide* organization is Cardinal Biondi, who is 85 years of age and in ill-health. The *New York Times* said that the appointment of a Pro-Prefect in the person of Cardinal Stritch was "an acknowledgement that Cardinal Biondi needs an assistant with vast powers." (The Universe - New York Times)

C. AUSTRALIA. — New Leader of Country Party.

Sir Arthur Fadden (63), the Australian Federal Treasurer, announced on March 21 that he was resigning from the leadership of the Country Party, which he had held since 1941. Mr. John McEwen (58), Federal Minister for Trade and deputy leader of the Country Party, was elected to the party leadership on March 26, and at the same time was appointed Deputy Prime Minister in the Federal Government. It was stated that Sir Arthur Fadden would continue as Federal Treasurer during the remainder of the term of the present Parliament. (Australian News and Information Bureau) **(Prev. rep. Cabinet, 15170 C ; Country Party, 14649 A.)**

A. INTERNATIONAL LABOUR ORGANIZATION.— Convention on Abolition of Forced Labour. - Credentials withdrawn from Hungarian Employers' and Workers' Delegates. - New I.L.O. Members.

A convention banning all forms of forced or compulsory labour was adopted by the International Labour Organization by 240 votes to nil, with one abstention, at its 40th session in Geneva in June 1957. It provided that each I.L.O. member-country ratifying the convention would undertake not to make use of any form of forced or compulsory labour (1) as a means of political coercion or as a punishment for holding political views opposed to the established political, social, or economic system ; (2) as a method of using labour for purposes of economic development ; (3) as a means of labour discipline ; (4) as a punishment for having participated in strikes ; (5) as a means of racial, social, national or religious discrimination.

The new convention (which supplemented a largely outdated instrument of 1930) represented the culmination of efforts which had been in progress for five years previously. The first step was taken in June 1951, when the U.N. Secretary-General and the Director-General of the I.L.O. jointly set up a five-man *ad hoc* committee to investigate forced labour systems [see 11820 C], at the request of the U.N. Economic and Social Council. After two years' investigations, this committee issued a report (June 1953) emphasizing that forced labour, as used in several countries for political or economic ends, violated the principles set forth in the U.N. Charter and the Declaration of Human Rights [see 13009 A]. In November 1953 the eighth session of the U.N. General Assembly adopted a resolution condemning all forms of forced labour, whether for political coercion or economic purposes ; demanding their abolition ; and asking the I.L.O. and the Economic and Social Council to give early consideration to the committee's report " as a matter of urgency " [see page 13372, second column].

The I.L.O. convention was adopted after an acrimonious debate in which the U.S., Irish, and other Western delegates alleged that forced labour was being used in " Iron Curtain " countries on a considerable scale ; the U.S. Government delegate (Mr. Stuart Rothman) commented in this connexion on the deportations of Hungarians to the Soviet Union after the suppression of the Hungarian uprising. Delegates of the U.S.S.R. and other Communist countries made counter-allegations of forced labour practices in colonial territories of certain Western Powers, and of alleged racial discrimination against Negro, Puerto Rican, and Mexican workers in the United States. All these allegations were strongly denied by the countries against which they were levelled.

The single abstaining vote was that of the U.S. employers' delegate (Mr. Cola G. Parker), who refrained from voting as a protest against the " cynical hypocrisy " of certain countries which, he alleged, would vote for the convention but had no intention of carrying out its provisions. The U.S. Government and workers' delegates voted for the convention.

The British Government announced on Nov. 21, 1957, that it intended to ratify the convention, pointing out that U.K. law and practices were fully in accordance with its provisions. The British instrument of ratification was deposited with the International Labour Office in Geneva on Jan. 1, 1958.

Credentials withdrawn from Hungarian Employers' and Workers' Delegates.

At its 40th session in June 1957 the I.L.O. voted to invalidate the credentials of the Hungarian employers' and workers' delegates, the required two-thirds majority being obtained in both cases. A proposal to invalidate the credentials of the Hungarian Government delegates failed to secure the two-thirds majority needed for adoption. [Under the constitution of the I.L.O., each member-country is represented by two Government delegates, one employers' delegate, and one workers' delegate.]

The proposal to unseat the Hungarian employers' delegate was made by employers' representatives of the non-Communist countries, while the unseating of the Hungarian workers' delegates was urged by the International Confederation of Free Trade Unions (I.C.F.T.U.) and the International Confederation of Christian Trade Unions. The proposals were put forward a few days after the publication of the U.N. Fact-Finding Report on Hungary [see 15621 A], in which both the Soviet Government and the Kadar regime were strongly criticized. The Credentials Committee of the I.L.O. recommended by majority vote that the Hungarian employers' and workers' delegates should be debarred, but that no action should be taken with regard to the Hungarian Government delegation pending a solution of the Hungarian problem within the framework of the United Nations.

The full conference accordingly voted to unseat the Hungarian employers' and workers' delegates ; the only opposing votes were cast by the Communist countries, though there were a number of abstentions. Despite the Credentials Committee's recommendation that no action should be taken on the Hungarian Government delegation, a resolution to unseat it received 94 votes in favour and 88 against, with 52 abstentions ; as stated above, it failed to secure adoption for lack of a two-thirds majority.

The last occasion on which an I.L.O. delegation had been unseated was in 1950, when the Venezuelan workers' delegation was debarred on the ground that free trade unionism had been destroyed by the military junta then ruling the country.

New Members of I.L.O.

Tunisia, Morocco and the Sudan were admitted to I.L.O. membership in 1956, and Ghana in 1957. Venezuela, which withdrew from the I.L.O. in 1956 (see 14212 A), decided on March 17, 1958, to rejoin the Organization, whose membership was thereby raised to 79 countries.—(Ministry of Labour Gazette - Manchester Guardian - New York Times)

(Prev. rep. 13369 A, page 13372 ; 13009 A ; 11820 C.)

B. LONDON. — Opening of Planetarium.

The London Planetarium—the first of its kind in Britain—was opened on March 20 in Marylebone Road, N.W.

The planetarium is enclosed in an aluminium dome 81 ft. in diameter, and has a projection hall seating 550 people. The heavenly bodies are projected on to the interior of the dome by a complex instrument (built by the German firm of Carl Zeiss at a cost of £70,000) consisting of nearly 29,000 separate parts and weighing 2½ tons. This instrument contains some 200 projectors and gearing systems which ensure that the positions in the sky of the sun, moon, planets, stars, and comets are shown correctly for any date in the past, present or future. For example, it can show the night sky as it was at the time of the Battle of Hastings (1066) ; reproduce the three-tailed Donati Comet which appeared in 1858, or the meteoric showers that occur when the Earth passes through the Orionid belt ; or illustrate the orbit of the *sputniks*. Moreover, the instrument can be so adjusted that viewers see the night sky as it appears in Australia, with the Southern Cross. The images of over 9,000 stars can be projected in their various magnitudes of brightness, and the passage of the sun, moon, planets, and stars can be speeded up so that the celestial movements of 24 hours are compressed within 11 seconds.

The inaugural ceremony was attended by Prince Philip and by many well-known scientists, including the Astronomer-Royal, Dr. Richard Woolley.—(Times - Daily Telegraph)

C. LIBYA - TURKEY. — President Bayar's Visit to Tripoli. - Cultural and Residence Agreement.

President Bayar of Turkey visited Tripoli from Feb. 5-10 as the guest of King Idris of Libya, returning a visit paid by the King to Turkey in 1956. The President was accompanied by M. Zorlu, the Turkish Foreign Minister.

A communiqué issued on Feb. 10 said that the representatives of the two countries had discussed " various questions of mutual interest " and had agreed " to harmonize their efforts to ensure peace and security in their respective regions and to strengthen Turkish-Libyan co-operation." It was also announced that an agreement had been signed (*a*) providing for cultural co-operation (including exchanges of students, teachers, and experts) between the two countries ; and (*b*) granting nationals of either country the right to live and set up establishments in the other. The agreement will be valid for five years in the first instance, and will continue in force thereafter unless six months' notice is given by either side.

(Turkish Embassy Press Department, London)

D. EGYPT. — Legislative and Executive Councils for Gaza Strip.

A new 30-member Legislative Council for the Gaza Strip was set up by the Egyptian administration on March 15, following the establishment of a 10-member Executive Council in February. The Legislative Council will be presided over by Major-General Hassan Abdul Latif, the Civil Governor of the area, and will include among its members the mayors of Gaza and Khan Yunis (the two main towns), representatives of other municipalities, seven representatives of the indigenous population, and four representatives of the Palestine Arab refugees in the area (who number 220,000 out of the Gaza Strip's total population of 300,000). It was stated in Cairo that the new Legislative Council would " help the Governor to administer the Strip " but that there was no intention of granting autonomy or independence to the area.

(Times - Manchester Guardian)

E. ITALY. — Dissolution of Parliament.

A decree dissolving both Houses of the Italian Parliament in preparation for general elections on May 25 was signed on March 17 by President Gronchi. The dissolution had been requested by Signor Zoli's Government, as the five-year term of the Chamber of Deputies had almost expired. Although the Senate's mandate was not due to expire until the summer of 1959, Signor Zoli requested a simultaneous dissolution of both Houses in the interests of political stability.

(Giornale d'Italia, Rome - Corriere della Sera, Milan)

A. EUROPEAN ORGANIZATIONS. — First Meetings of Councils of Ministers of Euratom and Common Market. - Inaugural Meeting of European Parliamentary Assembly. - M. Robert Schuman elected President of European Assembly.

The Councils of Ministers of the European Common Market and Euratom met for the first time in Brussels on Jan. 25, M. Victor Larock (the Belgian Foreign Minister) being elected President of the Council of the European Economic Community and M. Roger Motz (Belgian Minister for Economic Affairs) President of the Council of Euratom. The joint meeting was attended by the Commissions of the Common Market and Euratom, the High Authority of the Coal and Steel Community, and the Board of Governors of the European Investment Bank, which consists of the Finance Ministers of the six member-countries.

It was decided that the members of the Commission of the Common Market should be allotted the following specific tasks: M. Rey—external relations, i.e. GATT and the Free Trade Area; M. Marjolin—economic and financial questions; Signor Malvestiti—internal marketing problems of the Community; Herr Hans von der Groeben—trade competition and harmonization of policy; Signor Petrilli—social questions; Mr. Mansholt—agriculture; M. Rasquin—transport; and M. Lemeignan—overseas territories. Herr Hans von der Groeben had been appointed as the second German member [see page 15958, second column] in mid-January.

It was also decided that the six member-countries should be represented by a joint spokesman in the negotiations for a European Free Trade Area, and also in the trade discussions within GATT and in atomic energy discussions with the O.E.E.C.

At a separate meeting on the same day the Governors of the European Investment Bank appointed the 12 members of the Bank's Board of Directors, and decided that the Steering Committee should consist of an Italian as chairman, and a Frenchman and a German as the two vice-chairmen.

The first business meeting of the Commission of the Common Market took place in Luxemburg on Jan. 31, whilst the Commission of Euratom held its first business meeting on Feb. 24 in Brussels. The inaugural meeting of the Board of Directors of the European Investment Bank was held in Brussels on Feb. 26 under the chairmanship of Signor Campilli, the Bank's President.

The new European Assembly, which serves as the parliamentary body for the three institutions of "Little Europe"—the Common Market, Euratom, and the Coal and Steel Community—was inaugurated at the *Maison de l'Europe* in Strasbourg on March 19. It elected as its President M. Robert Schuman (France), the originator of the "Schuman plan" and one of the pioneers of European integration.

The Assembly concluded its meeting on March 21 after adopting the following resolutions *inter alia*:

(1) It unanimously voted that its name should be the European Parliamentary Assembly.

(2) It decided to adopt seating by political groups from left to right in the semi-circular chamber, instead of the seating method adopted in the former Assembly of the Coal and Steel Community, which was in alphabetical order. There will thus be three groups—Socialists, Liberals, and Christian Democrats. The resolution marked not only formal recognition that the Assembly was divided into political rather than national groups, but also the determination of its members to stress the Assembly's supranational character.

(3) It adopted a motion put forward by the Socialists and Christian Democrats inviting the Councils of Ministers to give employers and workers equal representation in the Economic and Social Committee, thereby opposing the proposals for the Committee's membership which had been put forward by the Councils of Ministers.

(4) Another resolution put forward by the Liberal group was also adopted, expressing the wish that a section of the Economic and Social Committee should deal specially with economic and social questions relating to the populations of overseas territories.

(5) Thirteen Standing Committees were set up to maintain a close and permanent watch on the joint work of the three Communities as regards foreign and commercial policy, social policy, finance, agriculture, etc.

It was announced in Washington on Feb. 28 that President Eisenhower had appointed Mr. W. Walton Butterworth as U.S. Representative to the European Economic Community and the European Atomic Energy Community; it was stated that Mr. Butterworth would continue to serve as U.S. Representative to the European Coal and Steel Community, a position he had held since March 1956.

It had previously been announced on Feb. 28 that M. Louis Armand, the president of Euratom, would visit the U.S.A. in April at the invitation of the U.S. Government to discuss the possibilities of close co-operation between the U.S.A. and the European Atomic Energy Community in the peaceful uses of atomic energy.—(Bulletins of the European Communities, Brussels - Luxemburg - Le Monde, Paris) **(Prev. rep. 15951 A.)**

B. INDIA. — New Atomic Energy Commission. - Indian Atomic Energy Developments.

Dr. H. J. Bhabha, Secretary of the Indian Atomic Energy Department, announced on March 14 that the Government of India had decided to set up a new Atomic Energy Commission with full executive and financial powers, modelled to a certain extent on the U.K. Atomic Energy Authority. He explained that the new Commission would replace the first Atomic Energy Commission set up in 1948, and that its object would be the expansion of India's atomic energy programme.

Dr. Bhabha said that the new Commission would consist of full-time and part-time members, the total number of members being not less than three nor more than seven. The Secretary of the Department of Atomic Energy would be *ex officio* chairman of the Commission, which would also have two other *ex officio* members—one for Finance and Administration, and the Director of the Atomic Energy Establishment, who would be in charge of research and development.

The new Commission would be responsible for (*a*) formulating the policy of the Department of Atomic Energy for the consideration and approval of the Prime Minister; (*b*) preparing the budget of that Department; (*c*) implementing governmental policy in atomic energy matters. Within the limits of Budget provisions as approved by Parliament, the Commission would exercise the Government's powers, both administrative and financial, for carrying out the work of the Department of Atomic Energy.

The Chairman, in his capacity as Secretary of the Department of Atomic Energy, would be responsible under the Prime Minister for taking decisions on technical questions and advising the Government on matters of atomic policy. All recommendations of the Commission on policy and allied matters would be put to the Prime Minister through the Chairman. He would have the power of overriding the other members of the Commission, except that the Member for Finance and Administration might ask that any financial matter with which he disagreed should be referred to the Prime Minister and the Finance Minister.

The Member for Finance and Administration would exercise the Government's powers in all financial matters concerning the Department of Atomic Energy, and no proposal with financial implications could be sanctioned without his prior concurrence.

Dr. Bhabha also announced that the Radio Chemistry Laboratory at Trombay (near Bombay), the creation of which had been decided on in 1956, had been in full operation since the beginning of February.

Other important developments relating to atomic energy had been announced in the report of the Department of Atomic Energy published on June 6, 1957.

The report said that the Government of India had decided to give top priority to the construction of a plant to produce uranium metal of atomic purity. The new plant would provide fuel elements for the zero-energy reactor (*Zerlina*), which was expected to be in operation by the middle of 1958, and also for the "Canada-India" reactor under construction; the latter, when completed, would be one of the most powerful research reactors in the world. The new uranium metal plant would be additional to the thorium-uranium plant at Trombay, which produces thorium nitrate for the gas-mantle industry.

The report also announced that the capacity of Indian Rare Earths Ltd., which processes the Travancore monazite sands, was to be doubled to 3,000 tons of monazite per annum; that steps were being taken to establish plants for the production of atomically pure graphite and beryllium oxide; and that a separate heavy-water plant was being set up at Nangal in conjunction with the proposed fertilizer plant in that area. In addition, a plant for producing ziliconium (another valuable atomic metal) was also contemplated, and large deposits of uranium and thorium ore had been discovered on the Ranchi plateau.

President Prasad, opening the new session of both Houses of Parliament on Feb. 10, 1958, announced that the Government of India had under consideration the construction of one or more atomic power stations during the current Five-Year Plan period.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London)

(Prev. rep. 15375 A; 14877 B; 9471 E.)

C. BULGARIA - GREECE. — Border Agreement.

Following Greco-Bulgarian military talks on border problems, the General Staffs of both countries signed four protocols at Salonika on Feb. 11 settling all issues considered likely to arise along the 300 miles of common frontiers. (Times)

MARCH 29—APRIL 5, 1958

A. SUDAN. — General Elections. - New Umma-P.D.P. Coalition Cabinet formed by Mr. Khalil.

Voting in the first general elections held in the Sudan since the attainment of independence in 1956 began on Feb. 27 and was completed on March 8. A total of 203 members were to be elected—the 173 members of the House of Representatives, and 30 of the 50 members of the Senate. The elections resulted in a victory for the ruling alliance of the Umma and People's Democratic parties, the results for the House of Representatives being announced on March 11 as follows :

Umma Party	63
National Unionist Party	45
People's Democratic Party ..	27
Southern Liberals	20
Southern Federalist	1
Anti-Imperialist Front	1
Uncommitted Southern members	16

Thirty members of the Senate are elected, as stated above, and the remaining 20 nominated by the Supreme Commission which exercises the functions of Head of State. The Umma Party won 14 of the elected seats, the National Unionists and P.D.P. five each, and Southern representatives six. The nominated seats were distributed in proportion to party strengths in the House of Representatives, seven being allocated to the Umma Party, five to the National Unionists, four to the P.D.P., and four to Southern representatives. Hence the final distribution of seats in the Senate was announced on March 20 as follows :

Umma Party	21
National Unionist Party	10
People's Democratic Party ..	9
Southern representatives	10

CITY, ETC. LIBRARY 9 1958

Electoral procedure, which had been laid down in the Parliamentary Elections Act of 1957 [see 15787 A], differed in certain respects from that followed in the 1953 elections ; e.g. voting in all constituencies was direct, and the five seats reserved in the former House of Representatives for graduates' representatives were abolished. In over 100 constituencies, including all those in the Southern Provinces and Darfur Province, voting was by token ; each candidate was allotted a symbol, and the elector voted by dropping his token into the ballot-box bearing the symbol of the candidate of his choice. In the remaining constituencies voting was by ballot ; the ballot papers, however, did not give the candidates' names but the symbols or colours allotted to them, against one of which the voter made a mark. To prevent plural voting, voters were marked on the left hand with silver nitrate after voting for the House of Representatives ; those over 30, who had a second vote for the Senate, were marked on the right hand after casting their second vote.

Over 500 candidates were put forward for the House of Representatives, and over 70 for the elected Senate seats ; some candidates stood for both Houses, as is permissible under Sudanese law. Only two candidates were returned unopposed to the Lower House ; both were Northerners contesting Southern seats, their opponents being disqualified on technical grounds.

Of those eligible for the franchise, 77 per cent had registered as voters, the proportion ranging from 63.5 per cent in Darfur Province to 93 per cent in Khartoum Province. The proportion of the registered electors who voted in the main towns was extremely high, being over 90 per cent in five Khartoum constituencies.

No serious incidents occurred during the elections, strict precautions having been taken to maintain order ; voters were forbidden to carry heavy sticks when going to the polls, and public meetings and processions were banned from Feb. 27 to March 20. As allegations had been made by various parties that their opponents were receiving financial assistance from the Egyptian, U.S., or Soviet Embassies, members of the Diplomatic Corps were forbidden to leave Khartoum without permission while the elections were in progress.

Details are given below of the election results as they affected the leading parties, and of the policies of the various parties.

Umma Party. All leading members of the Umma (People's) Party were re-elected, including the Prime Minister, Mr. Khalil, and all the Umma members of his Cabinet. Founded in 1945, the party has consistently advocated complete independence of Egypt. Its foreign policy is defined as " positive neutrality ; better understanding with Egypt and closest collaboration with neighbouring countries, such as Libya and Ethiopia ; Arab unity within the Arab League ; collaboration with all African States." It also favours close trade and economic relations with Britain and the U.S A., and in 1957 advocated acceptance of the " Eisenhower Doctrine." Conservative in outlook, it is closely associated with the Ansar sect headed by Sayed Abdel Rahman el-Mahdi.

National Unionist Party. The defeat of the National Unionists, led by Mr. Azhari, was attributed partly to the frontier dispute with Egypt [see 16075 A] and partly to the opposition of Sayed Ali el-Mirghani, leader of the Khatmia sect, who had supported the N.U.P. in the 1953 elections but in 1956 joined with Sayed Abdel Rahman el-Mahdi in advocating an all-party Government. The party formerly advocated union with Egypt, and still favours the conclusion of a defence pact with Egypt and the co-ordination of the two countries' foreign policies ; in other respects, however, it supports a neutralist foreign policy, avoidance of military pacts, and the development of Sudanese trade with the most favourable markets, irrespective of Power blocs. It draws much of its support from the large towns and from the official and professional classes.

People's Democratic Party. Four of the six P.D.P. members of the Government—Mr. Mirghani Hamza (the Vice-Premier and Minister of Agriculture, Irrigation and Power), Mr. Ali Abdel Rahman (the party president and Minister of the Interior), Mr. Hammad Tewfik (Minister of Commerce), and Dr. Amin el Sayed (Minister of Health)—lost their seats in the House of Representatives. The P.D.P. was formed in 1956 by a number of dissident groups inside the National Unionist Party, including those led by Mr. Hamza, who opposed Mr. Azhari's policy as too pro-Egyptian, and by Mr Mohamed Nur el-Din, who favoured union with Egypt. It is also supported by Sayed Ali el-Mirghani and many of the Khatmia sect. Though allied with the Umma Party, it advocates close political collaboration with Egypt, and in 1957 opposed acceptance of the "Eisenhower Doctrine."

Southern Parties. The most striking feature of the election was the defeat of the Government's supporters in the Southern Provinces. The Liberals (the principal Southern party) were divided before the election into two main groups—the orthodox Liberals led by Mr. Benjamin Lwoki, who supported the Umma Party and the Government, and the dissident Liberals led by Mr. Stanislaus Paysama, who demanded a federal Constitution and had close ties with the National Unionists. In the elections, all the three Southern Ministers —Mr. Lwoki, Mr. Alfred Uludo, and Mr. Gordon Ayom—lost their seats in the House of Representatives, together with most of the pro-Government Liberals, although Mr. Lwoki was elected to the Senate. Almost all the Southern Liberals re-elected were followers of Mr. Paysama, whilst the new members—one of whom was in prison for a non-political offence—were largely supporters of the 1955 uprising.

Mr. Paysama formed a new parliamentary group—the Southern Sudanese Federal Bloc—on March 19 from Liberals and Independents. Father Saturnino Lohure, a native Roman Catholic priest who had stood as an Independent, was elected president of this group, which comprised 39 of the 46 members for Southern seats, including the member in prison.

Other Parties. The Anti-Imperialist Front, which won one seat, is an extreme left-wing organization. The recently-formed National Liberation Party, which is supported by members of the family of the Khalifa (the successor of the Mahdi, who was defeated at Omdurman in 1898 after the Dervish revolt), failed to return a candidate. Both parties are pro-Egyptian in outlook, and co-operated with the National Unionists in the elections.

When the House of Representatives assembled on March 20, Mr. Mohamed Saleh Shangeiti (a former High Court Judge and Speaker of the Legislative Assembly from 1949-52, who was not a member of either the new House or its predecessor) was unanimously elected Speaker. Mr. Khalil was then re-elected Prime Minister by 103 votes against 44 for Mr. Azhari and 25 for Mr. Paysama ; 11 members of the Southern Federal Bloc voted for Mr. Khalil and two for Mr. Azhari, as they had already promised their votes before Mr. Paysama was nominated. After his re-election Mr. Khalil stated that his external policy would be based on non-alignment with either of the world power blocs, and on the maintenance of good relations with all countries, including Egypt.

The formation of the Cabinet was delayed by disagreement inside the People's Democratic Party over its nominees. The party's backbenchers protested on March 26 against Mr. Khalil's proposal to give the Ministry of the Interior to Mr. Hamza, whom they considered to be too closely connected with the Umma Party, and demanded that Mr. Abdel Rahman should retain the post. Mr. Khalil, however, refused to accept this demand, the membership of the Cabinet being announced on March 27 as follows :

*Mr. Abdullah Khalil (Umma)	Prime Minister and Defence.
†Mr. Mirghani Hamza (P.D.P.)	Deputy Premier, Interior, and Irrigation.
*Mr. M. A. Mahgoub (Umma)	Foreign Affairs.
†Mr. A. A. Rahman (P.D.P.)	Agriculture and Commerce.
*Mr. Ziada Arbab (Umma) ..	Education and Justice.
Mr. Buth Diu (Umma) ..	Public Works.
†Mr. Mohamed Nur el-Din (P.D.P.)	Health.
Mr. A. R. Ali Taha (Umma)	Local Government.
*Mr. M. H. Sherrif (Umma)	Communications.
*Mr. M. A. Abusin (P.D.P.) ..	Social Affairs.
Mr. Santino Deng Teng (Umma)	Animal Resources.
Mr. Ferdinand Adyang (P.D.P.)	Mineral Resources.
†Mr. Amin El-Tom (Umma)	Minister of State.
Mr. Abdullah Nugdalla (Umma)	Minister without Portfolio.

* Held same post in previous Cabinet.
† Member of previous Cabinet.

Mr. Mirghani Hamza, though defeated in the elections to the House of Representatives, was subsequently appointed a member of the Sudanese Senate.

The main differences between the new Cabinet and its predecessor were that the Umma Party now holds a majority of the portfolios, and that the Republican Socialists (now largely merged with the Umma Party) and the Liberals are no longer represented. The three Southern Ministers are Mr. Buth Diu and Mr. Santino Deng Teng (both former National Unionist Ministers who had joined the Umma Party) and Mr. Adyang, a P.D.P. supporter.—(Sudan Government Information Centre, Khartoum - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 1953 Elections, 13303 A; 13331 B; Electoral Law, 15787 A; Cabinet, 14970 C.)**

A. UNITED KINGDOM. — Manpower Distribution.

The following table shows the manpower position in Britain at the end of 1957, comparison being given with the position at December 31, 1956:

	Dec. 31 1957	Dec. 31 1956
Total Working Population*		
Men	16,218,000	16,270,000
Women	7,930,000	7,939,000
	24,148,000	24,209,000
H.M. Forces and Women's Services	650,000	761,000
Registered Unemployed†	361,000	331,000
Persons in Civil Employment	23,131,000	23,111,000
of whom: *Men*	15,319,000	15,290,000
Women	7,812,000	7,821,000

*The total "working population" represents the total number of persons aged 15 or over working for pay or gain, or registering themselves as available for such work. It includes H.M. Forces and the Women's Services, those on release leave and not yet in employment, registered unemployed, private indoor domestic servants, and gainfully employed persons over pensionable age. Part-time workers are counted as full units.

†Excluding persons registered as "temporarily stopped," most of whom were on employers' pay-rolls and were therefore included in the numbers shown as in civil employment.

An analysis by industrial groups of the total number of persons in civil employment is given below:

Basic Industries	Dec. 31 1957	Dec. 31 1956
Coal Mining	790,000	783,000
Other Mining and Quarrying	78,000	78,000
Gas, Electricity, and Water	381,000	379,000
Transport and Communications	1,710.000	1,711,000
Agriculture and Fishing	964,000	993,000
Number in Basic Industries	3,923,000	3,944,000
Manufacturing Industries		
Chemicals and Allied Trades	534,000	532,000
Metals, Engineering, and Vehicles	4,677,000	4,633,000
Textiles	917,000	941,000
Clothing (including footwear)	667,000	682,000
Food, Drink, and Tobacco	911,000	914,000
Other Manufactures	1,594,000	1,596,000
Number in Manufacturing Industries	9,300,000	9,298,000
Building and Contracting	1,470,000	1,496,000
Distributive Trades	2,981,000	2,933,000
Professional, Financial, and Miscellaneous Services	4,169,000	4,142,000
Public Administration		
National Government Service	537,000	557,000
Local Government Service	751,000	741,000
Total in Civil Employment	23,131,000	23,111,000

The largest percentage increases, as compared with 1956, were in distributive trades (1.64 per cent); local government (1.35 per cent); metals, engineering, and vehicles (0.94 per cent); coal mining (0.89 per cent); professional, financial, and miscellaneous services (0.65 per cent); and chemicals and allied trades (0.38 per cent). The biggest percentage decreases were in national government service (3.59 per cent); agriculture and fisheries (2.92 per cent); textiles (2.62 per cent); clothing and footwear (2.19 per cent); and building and contracting (1.80 per cent). (Ministry of Labour Gazette) **(15432 A.)**

B. UNITED KINGDOM. — Army. - Corrigenda.

The following corrections should be made on page 16088: (*a*) in column one, paragraph 6, under the cross-heading "Royal Armoured Corps," the correct name of the regiment to be amalgamated with the King's Dragoon Guards is the Queen's Bays, not the Queen's Own Hussars as incorrectly stated; (*b*) in the second column, ninth paragraph, second line, the post of Brigadier Buchanan-Dunlop should correctly read Deputy Adjutant-General at G.H.Q., Far East Land Forces. (Ed. K.C.A.)

C. NETHERLANDS.—State Visit of Queen Elizabeth II and the Duke of Edinburgh.

Her Majesty Queen Elizabeth II and the Duke of Edinburgh paid a three-day State visit to the Netherlands on March 25-27—the first State visit to that country by a British sovereign for 300 years. During their visit the Queen and Prince Philip went to Amsterdam, The Hague, and Rotterdam, receiving an enthusiastic welcome from the great crowds which had assembled to greet them.

The Queen and the Duke of Edinburgh travelled from Harwich in the Royal yacht *Britannia* and arrived in the morning of March 25 at the port of Ymuiden, where they were welcomed by Princess Beatrix, the heiress to the Dutch throne. The *Britannia* then sailed up the North Sea Canal and anchored in the River Y, in the heart of Amsterdam. On disembarking, the Queen and the Duke were welcomed by Queen Juliana of the Netherlands, Princess Irene (the second daughter of Queen Juliana and Prince Bernhard), the Netherlands Prime Minister (Dr. Drees), the ambassadors of the Commonwealth countries, and the civic authorities. Prince Bernhard was unable to be present owing to his convalescence from an influenza attack.

From the landing-stage the Queen and Prince Philip drove with Queen Juliana and Princess Irene to the Royal palace on the Dam (the main square of Amsterdam), where Queen Elizabeth reviewed a guard of honour of the Dutch Grenadier Guards. Later in the morning her Majesty, accompanied by Prince Philip, Dr. Drees, and the Burgomaster of Amsterdam (Mr. van Hall), laid a wreath on the National War Memorial facing the palace, which commemorates the 210,000 Dutch men and women who lost their lives in the Second World War and the German occupation. In the afternoon the Queen and the Duke visited the Rijksmuseum, which houses one of the world's most famous art collections, notably of the great Dutch masters. Later they visited Asscher's diamond-cutting works, one of the leading firms in the diamond industry. In the evening a State banquet was held at the Royal palace at which speeches were made by Queen Juliana and Queen Elizabeth, after which the two Queens and Prince Philip attended a concert by the Concertgebouw Orchestra under its conductor, Eduard van Beinum.

In the morning of March 26 Queen Elizabeth and Queen Juliana drove to Aalsmeer (the biggest horticultural centre in the Netherlands) to see a flower auction, while Prince Philip and Prince Bernhard visited the International Trade Fair at Utrecht. From Aalsmeer the two Queens drove to The Hague by way of the seaside resort and fishing harbour of Scheveningen, where their car was "mobbed" by several hundred fisherwomen wearing the traditional voluminous dresses. With Prince Philip and Prince Bernhard they lunched with Princess Wilhelmina (the mother of Queen Juliana, who abdicated ten years ago after a reign of 50 years) at the House in the Woods (Huis ten Bosch), a small palace near The Hague where the ex-Queen lives in retirement.

During the afternoon the Queen and the Duke of Edinburgh visited an "Age of Shakespeare" exhibition held in the municipal museum at The Hague, after which they attended a reception given by the heads of the Commonwealth diplomatic missions. In the evening they attended a dinner given in their honour by the Netherlands Government, followed by a reception in the Ridderzaal (Hall of Knights), where the States-General meets on ceremonial occasions.

Before visiting Rotterdam on the final day of their tour, Queen Elizabeth and Prince Philip paid a short visit to Delft to see the Hydraulics Laboratory at which plans are drawn up for large-scale coast protection and reclamation projects. In addition to inspecting models of the Delta Plan [see 14292 A], they also saw the plans for the construction of Europort, a new harbour which will be built near the Hook of Holland to accommodate the largest and most modern oil tankers. Prince Philip also visited the Technical University at Delft, while Queen Elizabeth and Queen Juliana visited a new housing estate on the outskirts of Rotterdam.

In Rotterdam the Queen and the Duke of Edinburgh visited the Town Hall (one of the few buildings in the city centre to survive the German air attack of 1940), the Bouwcentrum (the building centre at which plans for the city's reconstruction are drawn up), and the English Church (St. Mary's). They also saw some of the city's modern architecture, and the great progress made in rebuilding the war-devastated areas. In the evening her Majesty and Prince Philip gave a farewell dinner for Queen Juliana and Prince Bernhard on board the *Britannia*, which was berthed in the River Maas.

The Queen and Prince Philip sailed from Rotterdam in the *Britannia* in the evening of March 27, arriving at Dover the following morning.

Mr. Selwyn Lloyd accompanied H.M. the Queen on her visit to the Netherlands as Minister-in-Attendance. While in The Hague he had discussions with the Netherlands Foreign Minister (Mr. Luns) on a number of international problems. (Algemeen Handelsblad, Amsterdam - Nieuwe Rotterdamse Courant - Haagse Post - Netherlands News Agency) **(15596 C.)**

D. NIGERIA. — Control of Military Forces.

Control of the Nigerian military forces was formally transferred to the Federal Government of Nigeria on April 1, in conformity with the policy announced by the U.K. Secretary of State for War in the White Paper issued on Feb. 19.—(Times) **(Prev. rep. 16087 A.)**

A. UNITED STATES. — Vice-President Nixon to assume Presidential Functions in Event of President Eisenhower's Disability. - Constitutional Implications of Eisenhower-Nixon Agreement.

President Eisenhower stated on Feb. 26 that he had a "clear understanding" with Vice-President Nixon on what to do if he (the President) should become unable to perform his duties. He added that Mr. Nixon "knows exactly what he should do in the event of a presidential disability," and that others around him (the President) were "completely privy" to the arrangement.

Following widespread demands in Congress that any arrangements about the presidency should be made public, the White House announced details of the agreement between President Eisenhower and Vice-President Nixon on March 3. The statement was as follows :

"The President and the Vice-President have agreed that the following procedures are in accord with the purposes and provisions of Article 2, Section 1, of the Constitution, dealing with Presidential inability. They believe that these procedures, which are intended to apply to themselves only, are in no sense outside or contrary to the Constitution but are consistent with its present provisions and implement its clear intent.

"(1) In the event of inability the President would—if possible—so inform the Vice-President, and the Vice-President would serve as Acting President, exercising the powers and duties of the office until the inability had ended.

"(2) In the event of an inability which would prevent the President from communicating with the Vice-President, the Vice-President, after such consultation as seems to him appropriate under the circumstances, would decide upon the devolution of the powers and duties of the Office and would serve as Acting President until the inability had ended.

"(3) The President, in either event, would determine when the inability had ended and at that time would resume the full exercise of the powers and duties of the Office."

The U.S. Constitution contains no clear provision as to the exact arrangements which would have to be made in the event of the President's incapacity to perform his presidential functions, or how such incapacity should be ascertained. The relevant section of the Constitution (Article 2, section 1, paragraph 6) reads as follows :

"In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and Congress may by law provide for the case of removal, death, resignation or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected."

[It is generally agreed in the U.S.A. that the "founding fathers" of the country had left the provision purposely vague in framing the Constitution.]

Mr. Hagerty, press secretary at the White House, said on March 3 that the statement on the proposed arrangement in the event of the President's disability had been drawn up by President Eisenhower, Vice-President Nixon, and the Attorney General, Mr. Rogers, who had fully concurred in its constitutional aspects. Mr. Hagerty pointed out that the arrangement did not imply any abandonment of the request, previously made by the Administration to Congress, for a Constitutional amendment to deal with the problem.

At his press conference on March 5 President Eisenhower stressed that during his three illnesses in recent years Vice-President Nixon had not exercised any presidential powers. However, in any future crisis which required presidential action when the President was incapacitated, Mr. Nixon would have legal authority to use all necessary powers. He added : "We are not trying to rewrite the Constitution. We are just trying to carry out what normal humans of good faith having some confidence in each other would do in accordance with the language of the Constitution."

Mr. Rogers, the Attorney-General, stated on the same day that in the event of the President's disability, the Vice-President could exercise supreme power without taking the presidential oath of office. His powers would include authority to sign or veto legislation, and presumably to reorganize the Cabinet, command the armed forces, and make decisions affecting peace and national security. Mr. Rogers expressed the view that the President would regain his powers on the ending of his disability by making a simple declaration to that effect.

The arrangement between President Eisenhower and Vice-President Nixon was welcomed by Representative Emanuel Celler (Democrat), chairman of the Judiciary Sub-committee of the House of Representatives, which had been studying the question ; Mr. Celler expressed the view that only an ordinary Act of Congress would be required to regulate the question, and that no Constitutional amendment would be necessary. On the other hand, the legality of the arrangement was challenged by Mr. Sam Rayburn (Democrat), the Speaker of the House, who expressed the view (*a*) that the scheme was not possible under the Constitution ; (*b*) that there was no constitutional provision for an Acting President ; and (*c*) that any such provision would need endorsement from Congress, either by Act or Constitutional Amendment. Mr. Rayburn also thought that a Vice-President could not exercise presidential powers without taking the presidential oath, and that if he took the oath he must remain President for the remainder of the presidential term of office.

On March 25 President Eisenhower put before a bi-partisan group of Congressional leaders a proposal for the amendment of the Constitution on this question, which had been worked out by the Department of Justice and had received the President's full support. The proposal was (i) that the Constitution should be amended to permit the Cabinet to determine when the Vice-President should assume the duties of a disabled President ; and (ii) that the decision should be taken by majority vote, thus filling the gap in the Constitution as to who should decide when the President was incapacitated. In a subsequent press statement Mr. Hagerty pointed out that the proposed constitutional change would not apply as a practical matter to President Eisenhower, because his second and final term of office would have ended before such an amendment could be adopted under the procedure required.

Meanwhile several other proposals had been considered in Congress. The House Judiciary Sub-committee decided on Feb. 20, by three votes to two (the Republicans opposing), that an eight-man commission should be set up under the chairmanship of the Vice-President to advise him when a President was ill or otherwise unable to perform his duties, though leaving the final decision to the Vice-President himself.

The Bill approved by the sub-committee would allow any three members of the advisory commission to start an investigation into the President's health ; it also provided that the Vice-President would be authorized to take over from an incapacitated President only the "powers and duties" of the presidential office, but not the office itself. [In the past ailing Presidents had been reluctant to transfer their powers for fear they would not get them back on their recovery, whilst Vice-Presidents had been reluctant to assume the presidential power for fear of being charged with usurpation of functions.] In addition to the Vice-President, the members of the advisory commission would comprise the Secretary of State, the President *pro tempore* of the Senate, the Speaker of the House of Representatives, and the majority and minority leaders in the House and Senate, but the Vice-President, the Speaker, and the Senate President *pro tempore* would not have a vote. The Vice-President's decision would only be required if an ailing President was too ill to understand his condition or unwilling to declare it. Otherwise, the President could himself declare his inability in a written message to Congress, upon which the Vice-President would then temporarily take over.

Following the announcement of the arrangement between President Eisenhower and Vice-President Nixon, Senator Kefauver (Democrat) and eight other senators of both parties proposed on March 4 a Constitutional Amendment authorizing a Vice-President to take over as Acting President whenever a President was unable to carry out his duties. The Kefauver amendment provided :

(*a*) That a Vice-President could assume power as Acting President whenever the President felt himself incapacitated and so notified the Vice-President, or when a majority of the Cabinet decided that the President was unable to perform his duties.

(*b*) That a President could regain his office by giving seven days' notice that he intended to do so. If a Vice-President still questioned Presidential ability to function he could appeal to Congress on the matter. A two-thirds majority of both Houses would be required to sustain the Vice-President's protest ; otherwise, the President would reassume his office at once.

The co-sponsors of Senator Kefauver's amendment were Senators Dirksen, Langer, Jenner, Watkins, Hruska, and Butler (Republicans) and Senators Hennings jr. and Olin D. Johnston (Democrats). Senator Knowland, the Republican Senate leader, stated that the proposal would be "generally acceptable" to the Administration.—(New York Times - New York Herald Tribune) **(Prev. rep. 15894 A.)**

B. SOVIET UNION. — Further Nuclear Tests.

Nine nuclear weapon tests were held in the Soviet Union during the month Feb. 22 to March 22, the last six of these tests taking place within a period of ten days (two on March 14 and one each on March 15, 20, 21, and 22). All the tests were reported by the U.S. Atomic Energy Commission, which stated that the first test on Feb. 22 and another on Feb. 27 were in the megaton range (i.e. of the hydrogen-bomb type) and the others on a smaller scale. The Japanese Meteorological Office reported an exceptionally high degree of radio-activity over Japan during the period of the tests, while the Norwegian and Swedish military authorities reported similarly high radio-activity over Scandinavia during the same period. No statement was issued in Moscow.—(New York Times - Times) **(Prev. rep. 16012 A.)**

A. UNITED KINGDOM. — National Trust Acquisitions. - Hardwick Hall and Chatsworth Art Treasures accepted in lieu of Estate Duty.

Important acquisitions by the National Trust during the past three years (up to Easter 1958) are listed below, the names of donors or other methods of acquisition being given in parentheses :

Houses of Historical or Architectural Interest.

Ashdown House, near Lambourn (Berks.)—A small 17th century house of great architectural interest, together with 40 acres of parkland and an endowment. (The Dowager Countess of Craven).

Berrington Hall, near Leominster (Herefordshire)—An 18th century mansion with fine painted ceilings and interior decorations, together with 482 acres of land and an endowment. (The Dowager Lady Craven).

Clandon Park, near Guildford (Surrey)—A fine example of Palladian architecture, with 300 acres of parkland laid out by "Capability" Brown. (Given, with an endowment, by the Earl of Onslow).

Claydon House, near Aylesbury (Bucks.)—Home of the Verney family since the 15th century, with an 18th century wing containing rich rococo decorations. (Mr. and Mrs. Ralph Verney).

Croft Castle, near Leominster (Herefordshire)—A castellated mediaeval stronghold, modernized in the 18th century, with parkland planted with celebrated avenues of Spanish chestnuts, some of great age. The home of the Croft family since the Norman Conquest, but in danger of becoming derelict following the death of the late Major O. G. S. Croft. (Purchased, together with an estate of 1,750 acres, with the help of grants totalling £50,000 from the Minister of Works).

Dyrham Park, near Chipping Sodbury (Gloucestershire)—An 18th century mansion containing an important collection of furniture and pictures. (Transferred to the National Trust, after restoration, by the Ministry of Works.)

Ickworth Park, near Bury St. Edmunds (Suffolk)—A large house dating from 1791-1830 and of great architectural interest. (Offered to the Treasury, together with 1,000 acres of parkland and an endowment of £180,000, by the Dowager Lady Bristol in settlement of death duties, and transferred to the National Trust.)

Mottisfont Abbey, near Romsey (Hants.)—Formerly an Augustinian priory, dating from the 12th century but secularized in Henry VIII's reign. Given with 2,029 acres of land and an endowment. (Mrs. Gilbert Russell.)

Pinehurst House, near Dorking (Surrey)—(Accepted by the Treasury in part-payment of death duties on the estate of the late Miss G. Corbet Hue, and handed over to the Trust through the National Land Fund.)

Saltram House, Plympton (Devon)—A Georgian mansion with rooms decorated by Robert Adam, paintings by Sir Joshua Reynolds and Angelica Kauffmann, unique Chinese mirror paintings, and especially fine 18th century furniture. (Accepted by the Treasury, together with 391 acres of park and woodland, in part-payment of duty on the estate of the late Earl of Morley, and transferred to the National Trust)

St. Michael's Mount, near Penzance (Cornwall)—A small "island" connected with the mainland at low tide and surmounted by a 15th century castle, which incorporates part of a monastery given by Edward the Confessor to the Abbey of Mont St. Michel in Brittany and rebuilt in 1135-50. The legendary home of the giant Cormoran (killed by Jack the Giant Killer), and traditionally associated with Joseph of Arimathea and Tristan and Iseult, the Mount has been the home of the St. Aubyn family since 1660. (Lord St. Levan.)

Trelissick, Feock, on the Fal estuary near Falmouth (Cornwall)—Originally an Elizabethan farmhouse, to which a large classical portico and wings were added in 1824. Given with 376 acres of estate and woodlands, and an endowment (Mrs. Ronald Copeland.)

Waddesdon Manor, near Aylesbury (Bucks.)—Built in the 1880's by Baron Ferdinand de Rothschild in the style of a Renaissance French château, the house contains valuable 17th and 18th century French furniture and tapestries, a magnificent collection of Sèvres, Oriental, and other porcelain, and one of the finest private art collections ever given to the public. The pictures include about 70 by Guardi, Gainsborough (notably the famous *Pink Boy*), Reynolds, Romney, Watteau, Boucher, Cuyp, Pieter de Hooch, Gerard Dou, Teniers, Van der Velde, and Wouwermans. Given with the ornamental gardens, about 200 acres of parkland, and an endowment fund of £750,000—the largest bequest ever made to the National Trust. (Bequeathed by the late Mr. James de Rothschild.)

Washington Old Hall, near Sunderland (Co. Durham)—The ancestral home of George Washington's family. (Taken over from Washington Urban District Council).

Cliffs, Headlands, Harbours, and Islands.

Boscastle Harbour (North Cornwall)—Given with 146 acres of surrounding land, including the rugged headlands of Penally Point and Willapark. (Mr. T. P. Fulford and others).

Gower Coast (Glamorgan)—About 350 acres of great scenic beauty, including the Bishopston valley, Pwll Du Head, and cliffs to the westward. (Given by the widow and daughter of the late Mr. F. W. Gilbertson).

Gunwalloe Towans, near Mullion (South Cornwall)—About 108 acres overlooking Poldhu Cove, Lizard Peninsula. (Purchased out of funds bequeathed by the late Mr. E. S. Arnold).

Lowland Point, near Coverack (South Cornwall)—Overlooking the well-known Manacles rocks, the scene of many shipwrecks. The area of 57 acres includes cliffs and croft land. (Given by an anonymous group to prevent "commercialization").

Portquin, near Port Isaac (North Cornwall)—A small area of cliffs and farmland. (Purchased out of the Woodward and Arnold bequests).

St. Agnes Beacon, near Perranporth (North Cornwall)—A 630-ft. heather-covered hill close to the sea, giving views over the coast from Gurnard's Head (St. Ives) to Trevose Head (Padstow). (Purchased from funds bequeathed by the late Mrs. Hetty Cohen).

The St. Kilda group, Outer Hebrides—An isolated group of islands (St. Kilda, Hirta, Dun, Soay, Boreray, and Levinish), the largest being seven miles in circumference. Uninhabited since the islanders migrated to the mainland in 1930, the group is now mainly important from the standpoint of nature conservation and as a bird sanctuary. (Bequeathed to the National Trust for Scotland by the late Marquess of Bute).

Other Places of Scenic or General Interest.

Gatton Park, near Reigate (Surrey)—About 111 acres of parkland adjoining woodlands already owned by the National Trust. (Purchased from Sir Jeremiah Colman).

Harewoods Estate, near Bletchingley (Surrey)—A 2,000-acre estate comprising farms, smallholdings, cottages, and parkland, together with manorial rights over Outwood Common. (Mr. and Mrs. Theodore H. Lloyd).

Holmwood Common, near Dorking (Surrey)—About 630 acres of common, much of it wooded. (Purchased from the Duke of Norfolk by the Surrey County Council and local district councils, and handed to the Trust with an agreement to contribute to upkeep.)

Marsden Moor, between Huddersfield and Oldham—Lying partly within the Peak District National Park and consisting of 5,689 acres of unspoilt country within easy reach of large industrial towns. (Accepted by the Treasury in part payment of death duties and transferred to the National Trust.)

Plas-yn-Rhiw, near Pwllheli (Caernarvonshire)—About 200 acres of woodland and moorland overlooking Cardigan Bay. (Given by the Misses Keating in 1956 to celebrate the Trust's 60th anniversary.)

Pont Pill, Fowey Harbour (Cornwall)—A small area on the south bank of the Pill, opposite land already owned by the National Trust and facing Fowey town. (Mr. J. G. Allday).

Wasdale (Lake District)—A large area of 7,234 acres at Wasdale itself (Wastwater valley) and 410 acres at Seatoller, at the head of Borrowdale. (Accepted by the Treasury in part satisfaction of death duties on the Leconfield estates and handed over to the National Trust.)

East Afton Down, Freshwater, Isle of Wight—About 200 acres of downland ridge rising from Freshwater Bay. (Given by Lord Mottistone in memory of his father, the first baron).

Compton Farm, Freshwater, I.O.W.—A 240-acre farm adjoining the above. (Purchased by the National Trust with funds left by the late Mrs. Mary Salter in memory of her son).

Bembridge Mill, Bembridge, I.O.W.—The last windmill in the island and an 18th-century landmark. (Accepted by the Trust conditional on its being put into good repair at an estimated cost of £1,500).

Acquisition of Hardwick Hall and Chatsworth Art Treasures.

It was announced on Aug. 13, 1957, that, in part-payment of duty on the estate of the late Duke of Devonshire, who died in 1950 (see 11319 A), the Treasury had accepted the following property from the trustees of the Chatsworth Settlement : (1) Hardwick Hall, near Chesterfield (Derbyshire), with its contents, including a fine collection of furniture and works of art ; (2) Hardwick Park, covering 934 acres ; (3) eight major works of art from the famous Devonshire collection at Chatsworth, near Bakewell (Derbyshire). The total value of the transaction was given as over £1,200,000, of which the Chatsworth art treasures represented about £1,000,000 ; Hardwick Hall and Park about £30,000 ; and the Hardwick collection of furniture, pictures, and tapestries about £200,000. It was stated that Hardwick Hall and its contents, together with Hardwick Park, would be transferred to the National Trust through the National Land Fund.

The eight works of art from the Chatsworth collection comprised (*a*) the Donne Tryptich by Hans Memling, one of the most celebrated 15th century Flemish paintings in existence ; (*b*) the Chatsworth Head of Apollo (470-460 B.C.) one of the finest works extant of its period ; (*c*) the Benedictional of St. Aethelwold, dating from the 10th century and an excellent example of the Winchester school of illumination ; (*d*) the Hardwick hunting tapestries, a set of four 14th century tapestries woven at Arras or Tournai ; (*e*) Holbein's cartoon (large drawing) of Henry VII and Henry VIII (1537) ; (*f*) the Chatsworth Van Dyck sketch book, once owned by the English painter Sir Peter Lely ; (*g*) the *Liber Veritatis* of Claude Lorrain—a volume of drawings (copies of his paintings) with notes ; (*h*) Rembrandt's *The Philosopher* (1652). It was announced that the eight works of art from Chatsworth would be transferred to London art galleries and museums.

The announcement that the eight art treasures from Chatsworth would be removed to London aroused strong local protests, and demands that they be retained in Derbyshire were made by a conference of the local government bodies concerned. In reply to these representations, Mr. Thorneycroft (then Chancellor of the Exchequer) pointed out on Sept. 23 (*a*) that it was not Government policy to remove to London all works of art accepted in satisfaction of estate duty; (*b*) that the contents of Hardwick Hall had been accepted under the 1953 Finance Act, which allowed works of art to be accepted in satisfaction of estate duty only where they remained in the building with which they had been associated, and where that building passed into public ownership or the ownership of the National Trust; (*c*) that the Chatsworth art treasures had, however, been accepted under the 1956 Finance Act, which enabled the Treasury to take "works of art of pre-eminent quality" in payment of duty, the question where they should be placed being left to be examined on merit in each case. He added that the curator of the Chatsworth collection had stated that Hardwick Hall was an unsuitable building for the display of delicate paintings such as the Memling Triptych, which needed to be kept in conditions of constant temperature and humidity.

[The acceptance of these treasures constituted the first such decision by the Treasury under the 1956 Finance Act.]

Hardwick Hall was built in 1591-97 by Elizabeth, Dowager Countess of Shrewsbury (the celebrated "Bess of Hardwick"), whose second husband, Sir William Cavendish, became the ancestor of the present ducal family. Comparatively little altered either internally or externally, the house remains an outstanding example of Elizabethan domestic architecture.

A. CEYLON. — Trade and Economic Co-operation Agreements with U.S.S.R. - Soviet Loan to Ceylon.

A trade and payments agreement between Ceylon and the Soviet Union was signed in Colombo on Feb. 8. It is valid for one year in the first instance, but automatically renewable unless either party gives notice of termination.

Under the agreement, Ceylonese exports to the U.S.S.R. will include tea, rubber, coconut oil, copra, dessicated coconuts, coconut fibre, coir and coir products, citronella oil, spices, etc. The Soviet Union will supply Ceylon with petroleum products, rolled iron and steel products, chemicals and chemical fertilizers, cement, sawn timber, cellulose, cotton fabrics, miscellaneous machinery and equipment, and other commodities. These lists, however, will not restrict trade in other goods.

A second agreement on Soviet-Ceylonese economic and technical co-operation was signed in Colombo on Feb. 25.

It provided for Soviet co-operation in implementing Ceylon's economic development plans with regard to the following projects: irrigation schemes and hydro-power installations in the Malwatu-Oya, Kelani Ganga, and Kaluganga river basins; reclaiming land for sugar-cane at Kantalai, and for cotton planting in the Hambantota district; designing and building a metallurgical plant, a factory for the production of motor-car tyres and tubes, a flour mill and grain elevator, a plant for the manufacture of building materials, prefabricated units, and certain other projects; opening up peat production in the area of Muturajawela; joint scientific research and technical co-operation for the development of fisheries, and for the equipment of science laboratories in secondary schools. Technical assistance will also be given in restoring irrigation installations destroyed by the recent floods.

The Soviet Union will assist in the above projects by carrying out designing and research work; supplying the necessary equipment, machines, and some materials; and providing specialists to help in the construction and installation of the projects envisaged by the Ceylon Government. Soviet specialists will also help to train Ceylonese personnel engaged on the projects to be built with Soviet aid.

To help Ceylon pay for the designing work and for the equipment, machines and other technical assistance supplied by the U.S.S.R., the Soviet Government granted to the Ceylonese Government a long-term loan of 120,000,000 roubles (142,000,000 rupees or £10,650,000) at 2½ per cent interest p.a., repayable over 12 years. The loan will be repaid by deliveries of Ceylonese goods, or in pounds sterling or other convertible currencies, by agreement between the two sides. The prices for the equipment and materials supplied by the Soviet Union will be based on world prices.

In addition, it was agreed that the Soviet Union would admit Ceylonese students for training in various branches of agriculture and industry at higher educational institutes in the U.S.S.R. The two countries also agreed to exchange planning experts.

The Soviet delegation in the negotiations was led by M. Maletin, deputy chairman of the State Committee for Foreign Economic Relations; the Ceylonese negotiators were Mr. Stanley de Zoysa, the Finance Minister, and Mr. R. G. Senanayake, the Minister of Commerce and Trade.

B. NORTHERN IRELAND. — General Election.

General elections held in Northern Ireland on March 20 resulted in the Unionist Party's return to power with only one fewer seat than in the former Parliament. Although the Unionists lost four seats to the Northern Ireland Labour Party (all in Belfast), they gained three other constituencies—one from the Irish (Eire) Labour Party, one from an Independent Unionist, and one from a Nationalist Abstentionist. With the election of the four members for Queen's University, the final state of the parties was: Unionists 37, Nationalists 7, N.I. Labour 4, Republican Labour 1, Independent Labour 1, Independent Nationalist 1, Independent 1—giving the Unionists an overall majority of 22 at Stormont.

Unlike the last (1953) elections, there were no "abstentionist" Nationalists, since all candidates were required to sign a declaration pledging themselves to take their seats if elected. In the former Parliament there were 38 Unionists, 7 Nationalists, 2 Abstentionists, 2 Independent Unionists, 1 Republican Labour, 1 Independent Labour and 1 Independent.

Of the 52 seats in the N.I. Parliament, 27 were filled by unopposed returns—the unopposed members comprising 25 Unionists and two Nationalists. Among the unopposed Unionists (constituencies in parentheses) were Lord Brookeborough, the Prime Minister (Lisnaskea, Co. Fermanagh); Mr. Terence O'Neill, Minister of Finance (Bannside); Mr. W. B Topping, Q.C., Minister of Home Affairs (Larne); Mr. W. M. May, Minister of Education (Ards); Mr. J. L. O. Andrews, Minister of Health (Mid-Down); the Rev. Robert Moore, Minister of Agriculture (North Londonderry); Sir Norman Stronge, Speaker of the N.I. House of Commons (Mid-Armagh); Dame Dehra Parker, the former Minister of Health (South Londonderry); and Mr. Edmond Warnock, Q.C., the former Attorney-General (St. Anne's Belfast). The two unopposed Nationalists were Mr. Cahir Healy (South Fermanagh) and Mr. P. J. Gormley (Mid-Londonderry). Mr. Healy (81) has represented South Fermanagh in the N.I. Parliament since 1925, and formerly sat at Westminster as an Irish Nationalist.

Among the Unionists elected, Mr. Ivan Neill (Minister of Labour) retained the Ballynafeigh division of Belfast against an Independent Unionist, while Lord Glentoran (Minister of Commerce) retained the Bloomfield division of Belfast in a three-cornered contest against N.I. Labour and Independent Unionist opponents. The Unionists gained the Clifton division of Belfast from an Independent Unionist, the Dock division of Belfast from the Irish Labour Party, and Mid-Tyrone from a Nationalist Abstentionist. The successful Unionist candidate at Mid-Tyrone (Mr. Alexander Blevins, a new member, and a former police sergeant) won the constituency in a three-cornered contest against a Farmers' candidate and a Nationalist. As stated above, the N.I. Labour Party won four Belfast seats from the Unionists—the Oldpark, Pottinger, Victoria, and Woodvale divisions.

The elections for the four Queen's University seats (held by proportional representation) resulted in the re-election of the three sitting Unionist members (Sir Samuel Irwin, Miss Bessie Maconachie, and Professor Lloyd Dodd), the fourth seat being won by an Independent, Mr. Charles Stewart, Q.C. [Mr. Stewart replaced Dr. Eileen Hickey, who was also an Independent and did not seek re-election.] The unsuccessful candidates included the Rev. Albert McElroy (a Presbyterian clergyman), chairman of the Ulster Liberal Party and the first Liberal to fight an election in Northern Ireland for 25 years.
(Belfast Telegraph - Northern Whig) **(Prev. rep. 13227 A.)**

C. UNITED KINGDOM. — Opening of the Belgrade Theatre at Coventry.

The Belgrade Theatre, Coventry, the first major theatre to be built in Britain since the war, was opened on March 27 by the Duchess of Kent, in the presence of the Lord Mayor of Coventry (Alderman Mrs. Pearl Hyde) and the Yugoslav Ambassador. The theatre gets its name from the close post-war links between Coventry and the capital of Yugoslavia, whose Government and people have made a number of gifts to Coventry—including £6,000 worth of timber used in building the theatre.

The theatre block contains a number of shops and was built over five years at a cost of £274,000, following a decision by Coventry City Council to build a civic theatre as part of the city's reconstruction plan. The Belgrade Theatre, autonomous and non-profit-making, is administered by a trust of 15 members on which members of the City Council are in a majority. Its director is Mr. Bryan Bailey, formerly director of the Guildford Repertory Company.
(Times - Manchester Guardian)

A. HAITI. — Political Developments. - Resignation of Provisional Presidents. - Military Government takes Political Control after Widespread Disorders. - Election of President Duvalier.

The resignation of President Magloire in December 1956 (see 15363 A) was followed by six months of serious political disturbances, during which Haiti was ruled by three successive Provisional Presidents—all of whom were ousted after a few weeks—and an Executive Council. Large-scale strikes and other disturbances occurred from time to time throughout this period, culminating in May 1957 in an outbreak of violence which threatened to develop into a civil war. After widespread rioting in Port-au-Prince (the capital), the Haitian Army took over control at the end of May and for some months thereafter ruled the country through a Military Government. When tranquillity and order had been largely restored, elections were held in September 1957 at which Dr. François Duvalier was elected President of the Republic. In October the military authorities relinquished control to the civilian administration of President Duvalier, and no further disturbances occurred during the remainder of 1957 or the first three months of 1958. The developments summarized above are described below in greater detail.

As stated in 15363 A, the president of the Haitian Supreme Court (M. Pierre-Louis) took office as Provisional President after the resignation of President Magloire, and announced his intention of holding presidential elections in April 1957. M. Pierre-Louis' appointment as Provisional President had been agreed to by a number of leading politicians who had announced their intention of standing as candidates at the presidential elections, the most important of whom were Senator Louis Dejoie, a wealthy landowner and industrialist; Dr. François Duvalier, a physician who had taken a leading part in the campaign to eradicate malaria and yaws, and who enjoyed strong support from the trade unions and the working classes generally; M. Clement Jumelle, a former Minister of Finance under President Magloire; and Dr. Daniel Fignole, a professor of mathematics.

On Feb. 4, 1957, however, President Pierre-Louis resigned after M. Dejoie and Dr. Duvalier had threatened to call a general strike of their supporters as a protest against his alleged slowness in investigating corruption under the Magloire regime. Three days later M. Franck Sylvain (a former Supreme Court judge) was elected Provisional President at a joint session of the Senate and the Chamber of Deputies, and announced—like his predecessor—that presidential elections would be held in April.

President Sylvain's position, like that of President Pierre-Louis, rapidly became untenable as a result of differences with the presidential candidates, a number of whom alleged that M. Sylvain was designing to "fix" the presidential elections in favour of Dr. Duvalier. Faced with demands that he should reorganize his Cabinet, President Sylvain dissolved both Houses of the Haitian Congress on March 30, 1957. On the same date the Ministry of Justice issued a warrant for the arrest of M. Jumelle (who had meanwhile gone into hiding) on the ground that he had allegedly transferred a credit of $400,000 to a New York account while Minister of Finance in the Magloire regime.

On April 2, 1957, however, President Sylvain himself resigned in obscure circumstances, an Army communiqué announcing that he was under house arrest while inquiries were being made into "events of extreme gravity" that had occurred the previous evening. The Army authorities did not enlarge on this statement, but it was understood to refer to the discovery of a bomb cache in a house outside Port-au-Prince. The *New York Times* Correspondent in Haiti, quoting "authoritative sources," said that the discovery had "thwarted a plot to blow up stores here [in Port-au-Prince] that had been closed in a protest strike aimed at forcing out the Sylvain regime."

Following President Sylvain's resignation, the various presidential nominees agreed to set up an Executive Council to govern the country until the presidential elections, which were postponed to June 16, 1957. The members of this Council were chosen by the presidential candidates and the names submitted for approval to the Army Chief of Staff (General Cantave), who had taken over interim control on behalf of the Army. The Executive Council was sworn in on April 6, 1957, but split three weeks later when three of its members (supporters of Dr. Duvalier) resigned after alleging that Dr. Duvalier's opponents were attempting to gain control of the electoral machinery. At the request of General Cantave, the Haitian Supreme Court was asked to give a ruling as to whether or not the Executive Council was qualified to exercise executive authority despite the withdrawal of the Ministers backing Dr. Duvalier. The Supreme Court's affirmative reply to this question was accepted by the Army, and the Council continued to function minus Dr. Duvalier's supporters. On May 13, 1957, however, the Executive Council virtually collapsed when five of the presidential candidates—including Dr. Duvalier and M. Jumelle, who had meanwhile come out of hiding—alleged that the supporters of M. Dejoie and Professor Fignole had seized control of the country's administrative machinery and electoral organization with the intention of "rigging" the forthcoming presidential and congressional elections.

Meanwhile, partisans of Dr. Duvalier and M. Jumelle had seized control of the ports of St. Marc and Cap Haitien (respectively 50 miles north-west and 80 miles north of Port-au-Prince), set up a "revolutionary committee of public safety," and announced that they no longer recognized the authority of the Executive Council; the "committee of public safety" said that it would exercise control in northern Haiti until a President had been selected who would guarantee "free and honest elections." The members of the Executive Council, accompanied by General Cantave, travelled to St. Marc on May 19 to visit the town as a test of their authority, but were refused admittance, although General Cantave was allowed to enter amidst demonstrations of support for the Army. The Executive Council thereupon ordered General Cantave to surrender his post as Army Chief of Staff to Colonel Arnaud, the Chief of Police.

Amidst mounting unrest throughout the country, marked by lawlessness, strikes, and anti-Government demonstrations, General Cantave issued a proclamation on May 21, 1957, dissolving the Executive Council and announcing that the Army had taken over control until a Provisional President was chosen who could guarantee free elections. At the same time the Army imposed a nation-wide curfew, banned all broadcasts of a political or subversive nature, and imposed a censorship on outgoing press reports. On May 24-25 violent rioting occurred in Port-au-Prince as supporters of the opposing candidates battled with each other in the streets; at the same time fighting also broke out between troops supporting General Cantave and others supporting Colonel Arnaud, who had attempted to seize Army headquarters. Meanwhile pillaging mobs raged through the capital looting and burning buildings, including a number of business establishments and the offices of the newspaper *Le Matin*. No precise estimate of casualties was possible because of the censorship, but it was believed that at least ten people were killed and many more injured.

The crisis was temporarily resolved on May 26, 1957, when Professor Fignole was sworn in as Provisional President with the agreement of Dr. Duvalier, M. Jumelle, General Cantave, and Colonel Arnaud, all of whom had held a conference at the Presidential Palace. President Fignole issued a statement on the same day announcing his intention of holding "free and honest" elections in the near future, and also announcing that General Cantave had resigned as Army Chief of Staff in favour of General Antonio Thrasybule Kebreau. On June 14, 1957, however, President Fignole was ousted by the Army in a bloodless coup, and General Kebreau appointed a six-man Military Government to rule the country pending free elections. The rift between President Fignole and the Army had begun when M. Fignole ordered General Kebreau to make a "loyalty check" of every officer in the forces; the new Chief of Staff refused this demand, ordered the arrest of a number of the President's supporters, and deposed the President by a coup. Professor Fignole himself was placed on board a coastguard vessel which took him to Miami (Florida).

The supporters of Professor Fignole ("Fignolistes") immediately launched a "passive resistance" campaign in support of the ousted President, which took the form of mass wailing, beating of steel drums, and banging of pots and pans in the streets of Port-au-Prince and other centres. Large-scale mob violence broke out in the capital on June 16, 1957, following an unfounded rumour that the ex-President had been executed by the military authorities (Professor Fignole had in fact arrived in New York as an exile), and order was only restored after heavy fighting between Army detachments and the "Fignolistes" in which at least 50 people lost their lives and more than 200 were wounded.

On Aug. 3, 1957, the Military Government announced that presidential and congressional elections would be held in September on the basis of universal suffrage. An electoral decree, signed by General Kebreau, was issued on Aug. 29 laying down (1) that all men and women aged 21 and over would be eligible to vote; (2) that authorized agents of the candidates would be present at the polling booths, together with the presiding officials; (3) that no member of the armed forces might carry arms while voting; (4) that the President, when elected, would be sworn-in on the basis of the 1950 Constitution; (5) that the President's term of office would be six years from May 15, 1957 (i.e. expiring in May 1963); (6) that the first task of the new National Assembly would be the framing of a Constitution; (7) that Senators would serve for a six-year term; and (8) that Deputies would serve for four years.

The Military Government also took elaborate precautions to prevent irregularities at the polls (e.g. attempts to disrupt the voting or to tamper with ballot-boxes), penalties of three months' imprisonment or heavy fines being laid down for such offences. Other measures included a ban on the wearing of political emblems, and a prohibition on the sale of alcoholic drinks on polling day. As 90 per cent of the electorate of 1,500,000 were illiterate, special rules were also drawn up for the balloting. To prevent electors from voting twice, each voter was required to dip his little finger in indelible red ink so that he could be identified if he tried to vote elsewhere.

Presidential and congressional elections were held on Sept. 22, 1957, under the Army's surveillance and in an orderly atmosphere; few irregularities were reported, only a few minor incidents occurred, and foreign press correspondents stated that the elections as a whole were fairly and freely conducted. The elections were contested by two candidates, Dr. Duvalier and Senator Dejoie, M. Jumelle having withdrawn at the last moment after alleging electoral irregularities and calling upon his supporters to abstain from voting. M. Jumelle's allegations were described by the Military Government as merely a "political manoeuvre."

The official results, issued by the Military Government, showed that Dr. Duvalier had been elected to the Presidency with 679,884 votes against 266,992 for Senator Dejoie. In the congressional elections, Dr. Duvalier's supporters won all seats in the Senate and 23 out of 37 in the Chamber of Deputies. Senator Dejoie, however, alleged that the elections had been "riddled with fraud and violence" and called on his supporters to launch a general strike as a protest. [M. Dejoie had sponsored five successful general strikes against various Governments since 1946.] The Army responded to this threat by imposing martial law on Sept. 27, whereupon the threatened general strike collapsed and M. Dejoie went into hiding after a warrant had been issued for his arrest.

President Duvalier (48) was sworn-in on Oct. 22, 1957, on which date the Military Government relinquished all the executive and legislative powers it had wielded since June 16. The state of martial law was ended at the same time, and all security measures previously taken by the Military Government were cancelled. The new President formed a ten-member civilian Cabinet in which the Foreign Affairs portfolio was taken by the Ambassador to the Dominican Republic, M. Vifort Beauvoir. Among other appointments, the portfolio of Education was taken by the Rev. Jean-Baptiste Georges, the first minister of religion to serve in a Haitian Cabinet.

Shortly after taking office, President Duvalier announced an amnesty for all Haitians accused of subversive activities since the beginning of 1957, except for those charged with complicity in the Port-au-Prince riots of May 24-25. On Feb. 25, 1958, after a meeting at the Presidential palace between President Duvalier and Senator Dejoie (who had meanwhile come out of hiding after the warrant for his arrest had been withdrawn), it was announced that the amnesty would also be extended to those involved in the May disturbances.—(New York Times - Le Monde, Paris)

A. LITERATURE. — Book Selections, March 1958.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Bjarnhof, Karl—"The Stars Grow Pale." A Novel. Translated from the Danish. (Methuen, 16s.)

Bromhead, P. A.—"The House of Lords and Contemporary Politics, 1911-1957." (Routledge & Kegan Paul, 30s.)

Churchill, Sir Winston—"A History of the English-Speaking Peoples: Volume IV—The Great Democracies." (Cassell, 30s.)

Gary, Romain—"The Roots of Heaven." Translated from the French (*Les racines du ciel*). (Michael Joseph, 16s.) Prix Goncourt Novel.

Herrmann, Paul—"The World Unveiled: The Story of Exploration from Columbus to Livingstone." Translated from the German. (Hamish Hamilton, 42s.)

Lerner, Max—"America as a Civilization: Life and Thought in the United States Today." (Jonathan Cape, 50s.)

Phelps, Gilbert—"The Centenarians." A Novel of the Future. (William Heinemann, 15s.)

Runciman, Sir Steven—"The Sicilian Vespers: A History of the Mediterranean World in the Late Thirteenth Century." (Cambridge University Press, 27s. 6d.)

West, Ray B.—"Kingdom of the Saints: The Story of Brigham Young and the Mormons." (Jonathan Cape, 30s.)

United States. Lapp, Ralph E.—"The Voyage of the Lucky Dragon." The Story of the *Fukuryu Maru* and the Nuclear Test at Bikini in 1954 (Harper & Brothers, New York. $3.50)

Mayer, Martin—"Madison Avenue, U.S.A." (Harper & Brothers, New York, $4.95)

France. Romains, Jules—"Souvenirs et confidences d'un écrivain." (Arthème Fayard, Paris)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 16038 C)**

B. AUSTRALIA. — Parramatta By-election.

Sir Garfield Barwick, Q.C., one of Australia's leading barristers, was elected on March 10 as Liberal member for Parramatta (N.S.W.) in a Federal by-election caused by the appointment of Mr. Howard Beale as Ambassador to the United States. Excluding 500 overseas postal votes which remained to be counted but could not affect the result, Sir Garfield polled 22,621 votes against 17,859 for Alderman D. J. Mahoney, the mayor of Parramatta (Labour), and 911 for Mr. A. V. Fenwick (Independent). Mr. Howard Beale, formerly Minister for Supply and Defence Production, had a majority of nearly 10,000 when he stood for the Liberals at the last general election.—(Australian News and Information Bureau)

(Prev. rep. 14442 C.)

C. NETHERLANDS. — Bank Rate reduced.

The discount rate of the Netherlands Bank was reduced from 4½ per cent to 4 per cent on March 24—the second reduction in two months. (Algemeen Handelsblad, Amsterdam)

(Prev. rep. 16016 F.)

D. SOVIET UNION. — Elections to Supreme Soviet.

Elections to the two Houses of the Supreme Soviet took place throughout the U.S.S.R. on March 16, a total of 1,378 candidates being elected—738 to the Soviet of the Union and 640 to the Soviet of Nationalities. [It had previously been announced that the membership of the Soviet of the Union would be increased from 700 to 731, and that of the Soviet of Nationalities from 600 to 633—see 15992 A]. In accordance with the usual practice, only one candidate was put forward for each seat, the list of candidates being officially described as "the Communist and non-party bloc."

The following description of the method of selection of candidates was given by the Moscow Correspondent of *The Times* (March 11): "Nominations may be made by any industrial, agricultural, social, or party group. About two months before election day nomination meetings are held at which various nominees are openly and sometimes even hotly discussed. Nominations from various meetings in a district go to an election board composed of leading individuals of the area, who correlate and select nominees. The final list of candidates is compiled by a central election board, and carries only one name for each district on election day." Electors voted for the official candidates by dropping their unmarked ballot papers into a box, without entering the polling booths. Those wishing to vote against a candidate had to cross out his name or write in another name, either publicly or in a polling booth.

The electorate, comprising all Soviet citizens over 18 except the insane and those deprived of electoral rights by a court of law, numbered 133,836,325—an increase of over 13,000,000 since the 1954 elections. The official results, published on March 18, stated (1) that over 133,796,091 electors (99.97 per cent) had voted; (2) that the candidates for the Soviet of the Union had received 133,214,652 votes (99.57 per cent of the votes cast); (3) that the candidates for the Soviet of Nationalities had received 133,431,524 votes (99.73 per cent). As compared with the 1954 elections, the proportion of abstentions slightly increased (from 0.02 to 0.03 per cent) and the number of adverse votes roughly doubled—from 247,897 to 580,641 in the voting for the Soviet of the Union, and from 187,357 to 363,736 in the voting for the Soviet of Nationalities. There were 798 and 831 invalid ballot papers respectively in the elections for the two Houses.

More than half the deputies returned were new, only about 600 of the members of the previous Supreme Soviet being re-nominated and re-elected. The number of members of the armed forces elected was considerably reduced. Over 60 per cent of the candidates were described as "workers" or "peasants" and the remainder as "intellectuals," whilst over 25 per cent were women.

A statement was issued on Feb. 9 by a number of members of the Communist Party Central Committee (including all the 23 full or candidate members of its Presidium except M. Pervukhin) announcing that they had been nominated for more than one constituency, and that they had received instructions from the Central Committee as to which nomination they should accept. M. Khrushchev, who stood for the Kalinin district of Moscow, had been nominated for about 100 constituencies, far more than any other candidate. Marshal Bulganin, on the other hand, received only a small number of nominations; on the Central Committee's instructions he stood as candidate for a remote district in the Caucasus, instead of the Moscow constituency which he had previously represented.

At the Soviet Government's invitation, three U.S. observers made a tour of the Soviet Union during the election campaign and visited polling stations in Moscow while voting was in progress. The delegation, which had a 90-minute interview with M. Khrushchev on March 17, consisted of Professor Scammon, of the U.S. Government Affairs Institute, Professor Black, professor of history at Princeton University, and Mr. Donovan, managing editor of *Fortune* magazine. A Soviet delegation of three observers had previously visited the U.S.A. at the Government's invitation during the 1956 presidential campaign and election.—(Soviet Embassy Press Department, London - Times - New York Times) **(Prev. rep. 13491 B.)**

E. NORWAY. — Reduction of Working Week.

Under an agreement concluded between the Norwegian Federation of Trade Unions and the Employers' Federation in February, the 48-hour working week in Norway will be reduced to 45 hours from March 1, 1959, without loss of pay, for a period of three years. The agreement fixed wage-rates for that period, and laid down that the unions could only put forward new wage demands if the cost of living rose by more than seven points above its present level.

(Norwegian Embassy Press Office, London)

F. GHANA. — Diplomatic Relations with Holland.

It was announced from The Hague in February that the Netherlands and Ghana had agreed to establish diplomatic relations at ambassadorial level.—(Netherlands News Agency)

A. ARGENTINA. — Left-wing Radical Victory in Presidential and Congressional Elections. - Dr. Frondizi wins Presidential Nomination.

Polling took place in Argentina on Feb. 23 to elect a President and Vice-President of the Republic (chosen by an Electoral College as described below), and also for a new Congress, provincial legislatures, provincial governorships, and municipal councils. The presidential elections were contested by ten parties, of which the most important were the Left-wing Radicals (*Unión Cívica Radical Intransigente*) led by Dr. Arturo Frondizi; the Moderate Radicals (*Unión Cívica Radical del Pueblo*) led by Dr. Ricardo Balbin; the Christian Democratic Party (*Partido Democráta Cristiano*), which is moderate conservative in outlook; and the Socialist Party (*Partido Socialista*).

Whereas the deputies in the new Argentine Congress were directly elected, the President and Vice-President were indirectly elected under an Electoral College system instituted in 1912 by President Roque Saenz Peña.

Under the "Saenz Peña law," all the Argentine provinces and the City of Buenos Aires send electors to an Electoral College of 466 members which chooses the President and Vice-President of the Republic. Two-thirds of the Electoral College members in each province are chosen from the party whose presidential candidate obtains most votes in that province, while one-third of the members goes to the party whose candidate is runner-up. The Electoral College thus represents only the two candidates polling the highest number of votes in each province, all other candidates being eliminated. To secure election as President, a candidate must receive at least 234 Electoral College votes out of the total of 466—i.e. half the votes plus one, a bare absolute majority. Should none of the candidates command such an absolute majority, the election of the President devolves on the Argentine Congress.

The elections of Feb. 23 were held in an atmosphere of complete electoral freedom and without any incidents; the *New York Times* said that they were regarded by Argentinians as "free of official intimidation, corruption and fraud for the first time in thirty years," while the Buenos Aires Correspondent of the London *Times* described them as "probably the only completely democratic elections held in the nation's history." To prevent electoral irregularities or intimidation, units of the armed forces were stationed at all the 41,000 polling stations from the Bolivian frontier in the north to Tierra del Fuego in the south. General Aramburu, who had acted as Provisional President since November 1955, emphasized in an eve-of-the-poll broadcast that the Provisional Government had kept its promise to lead Argentina towards democracy and to hold free and fair elections. "Two years ago," he declared, "we took over a country plunged into internal warfare; today we return it to the people in freedom."

The elections resulted in a sweeping victory for the "Intransigent" Radicals led by Dr. Frondizi, who won large majorities in the Electoral College, in both Houses of the Argentine Congress, and in all the provincial councils. In the presidential elections Dr. Frondizi obtained 4,370,189 votes and Dr. Balbin 2,687,745, all other parties polling poorly; the Christian Democrats received about 280,000 votes and the Socialists about 253,000. The number of "blank" votes was 710,815, compared with over 2,000,000 at the Constituent Assembly elections of July 1957 [see 15733 E]. As the *Unión Cívica Radical Intransigente* obtained 319 votes in the Electoral College, Dr. Frondizi was assured of election to the Presidency. In the Congressional elections the "Intransigent" Radicals secured 133 of the 187 seats in the Chamber of Deputies, and Dr. Balbin's *Unión Cívica Radical del Pueblo* 52 seats; the two remaining seats went to a Liberal group from Corrientes province. Polling was heavy throughout the country—about 90 per cent of the electorate of approximately 10,000,000.

Dr. Frondizi's candidature was supported by a wide range of political opinion ranging from the Communists on the extreme left to the outlawed Peronistas on the extreme right, though he had not officially solicited the support of either of these groups. Ex-President Perón, from his exile in Ciudad Trujillo, had instructed his supporters to vote for Dr. Frondizi, and an analysis of the voting figures made it apparent that over 1,000,000 Peronistas had done so instead of casting "blanks" as in the 1957 elections. In a post-election statement, however, Dr. Frondizi declared that he was under no obligation either to the Peronistas or to the Communists; he announced his intention of granting an amnesty to all political prisoners, but said that the possibility of Señor Perón's return to Argentina would have to be decided by Congress. In Ciudad Trujillo, Señor Perón said that the election results had "opened new perspectives" but did not elaborate on this statement.

Dr. Arturo Frondizi (49) was born in the small town of Paso de los Libres, the son of Italian immigrant parents. Graduating at the University of Buenos Aires, he became a well-known lawyer and a leading member of the then undivided Radical Party. He entered the Chamber of Deputies in 1946— at the elections which first brought the Peronistas to power—and was prominent among the small group of Opposition deputies who tried to resist Perón's suppression of democratic liberties. In his capacity as lawyer he frequently defended persons who had been imprisoned by the Peronista regime. In the Radical split which followed Perón's overthrow he became leader of the "Intransigent" (left-wing) section of the party in opposition to the "Moderate" section under Dr. Balbin's leadership. Dr. Frondizi is known as a strong supporter of civil liberties and an opponent of the policy of granting concessions to foreign companies; he was one of the deputies who voted against ratification of the Pan-American treaty of Rio de Janeiro. He has also advocated a more conciliatory attitude towards the Peronistas.—(New York Times - New York Herald Tribune - Times - Le Monde, Paris)

(Prev. rep. 15866 A; 15733 A.)

B. UNITED KINGDOM. — Information Services.

The Chancellor of the Duchy of Lancaster (Dr. Hill) issued a written statement on Feb. 3 dealing with the progress made in co-ordinating Government information services at home and abroad, in accordance with the policy set out in the Government's White Paper of July 1957.

Dr. Hill stated that the main instrument of co-ordination in Britain was a meeting of chief information officers of departments, held twice weekly under his chairmanship. Working groups had been set up to consider the information aspects of particular issues, e.g. the defence of the pound, the "projection at home of the Commonwealth and its significance," and British scientific and industrial achievements.

Abroad, the expansion of the official information services was proceeding "with due regard to the need for economy in Government expenditure."

In the Commonwealth, a new post was being opened shortly in the Federation of Rhodesia and Nyasaland, and additional posts in certain important cities in Canada and Malaya. In addition, the staffing of the existing posts in Australia, India, Pakistan, Ceylon, Ghana, and Malaya was being strengthened; appointments had been made to new information posts in East Africa and Singapore; arrangements were being made to open new posts in Nigeria; and the programme of visits to the U.K. from the Commonwealth had been increased.

Information staffs and facilities had been increased in Burma and the Persian Gulf, and the building-up of staffs and facilities in Morocco and Tunisia had begun.

The overseas Press services of the Central Office of Information carried by wireless had been extended to Australia; the hitherto combined service to India, Pakistan, and Ceylon had been separated into two distinct services (one for India and Ceylon and another for Pakistan); and improved methods of transmission were being introduced.

Television films now went regularly to 25 countries, and material to 15 more. The photographic, reference, and publication services of the C.O.I. had been expanded.

The British Council was increasing its work in Burma, Indonesia, Iraq, Persia, the Persian Gulf, Latin America, Siam, the Sudan, Turkey, and Yugoslavia. In the Commonwealth there would be a similar expansion in South Africa, India, Pakistan, and Ceylon.

Dr. Hill also stated that the rearrangement of the external services of the B.B.C. was nearing completion, and that the increased services in Hausa, Swahili, and Somali were expected to begin shortly.—(Times) **(Prev. rep. 15688 A.)**

C. RELIGIOUS LIFE. — Church of England. - Commission on Revision of Church Catechism.

The Church Information Board announced on March 26 that the Archbishops of Canterbury and York had appointed a Commission with the following terms of reference:

"(1) To consider the revision of the Church Catechism in order that its scope may be enlarged and its language made more suitable for present conditions.

(2) To assist it in its task, the Commission is to consult with a panel of laymen and women, members of the Church of England who are professionally engaged in the teaching of the Christian religion to children and young people. The Commission is to select the names of persons who might be invited to serve on this panel and to submit them for the approval of the two Archbishops.

(3) It shall be within the powers of the Commission, if they so desire, to propose in place of our Catechism two catechisms, one for children and the other for persons of riper years."

The 14-member Commission is headed by the Bishop of Bradford as chairman, its other members including the Bishops of Coventry, Truro, and Worcester and the Lady Margaret Professor of Divinity at Cambridge, Canon C. F. D. Moule. It was set up in accordance with resolutions passed by the Convocations of Canterbury and York.—(Church Times)

D. IRISH REPUBLIC. — Bank Rate reduced.

The Irish Central Bank announced on March 27 that its discount rate was being reduced from 6 per cent to 5½ per cent with immediate effect.—(Irish Times, Dublin) (15784 E.)

APRIL 5—12, 1958

A. SOVIET UNION.—First Session of New Supreme Soviet. - M. Khrushchev appointed Prime Minister. - Premiership combined with First Secretaryship of Communist Party. - Composition of New Government. - Suspension of Soviet Nuclear Tests.

The newly elected Supreme Soviet of the U.S.S.R. (see 16099 D) held its first session in Moscow from March 27-31. The most important developments during this session were (1) the replacement of Marshal Bulganin as Prime Minister by M. Nikita Khrushchev, who retained the post of First Secretary of the Communist Party concurrently with the Premiership; (2) the appointment of a new Government in which the principal portfolios (e.g. those of Foreign Affairs and Defence) remained unchanged, and in which Marshal Bulganin took the relatively minor post of chairman of the State Bank; and (3) the announcement by M. Gromyko (the Foreign Minister) that the Soviet Government had decided to suspend nuclear tests.

M. Khrushchev appointed Prime Minister.

After the Supreme Soviet had re-elected Marshal Voroshilov as President of the U.S.S.R., Marshal Bulganin formally tendered his resignation as required under the Constitution following the election of a new Supreme Soviet. President Voroshilov then proposed that M. Khrushchev should be appointed Chairman of the U.S.S.R. Council of Ministers (i.e. Prime Minister) and should retain the post of First Secretary of the Soviet Communist Party. In proposing M. Khrushchev for the Premiership, President Voroshilov described him as an "outstanding personality of the party and Government," a "staunch fighter for peace and peaceful co-existence," and a man whose "indefatigable labours in this field, visits to East and West, and interviews with politicians and newspapermen from various countries have added considerably to the circle of our friends and raised the international prestige of the Soviet Union to new heights." After the Supreme Soviet had unanimously adopted President Voroshilov's proposal, M. Khrushchev thanked the deputies for the "honour and great confidence" shown in him, and declared that he would "spare neither health, strength nor even life" to justify that confidence. [A biography of M. Khrushchev is given on page 12870, first column.]

Marshal Bulganin (62) had been Prime Minister since the beginning of 1955, when he replaced M. Malenkov; during his Premiership he accompanied M. Khrushchev on many foreign visits, including the one to Britain in 1956. Since that year he had been engaged in prolonged and lengthy correspondence with Western Heads of Government, culminating in the recent proposals for a "summit" conference (see 16069 A, 15975 A, 15625 A). It was believed—though never officially confirmed—that he had given only lukewarm support to M. Khrushchev at the time of the expulsion of the Molotov-Malenkov-Kaganovich "anti-party group" in July 1957 (see 15639 A), and that his political influence had diminished since that time. As stated in 16099 D, Marshal Bulganin received only a small number of nominations in the recent Supreme Soviet elections, whereas M. Khrushchev was nominated in about 100 constituencies.

M. Khrushchev (63) became First Secretary of the Soviet Communist Party in March 1953, shortly after the Malenkov Cabinet was formed following Stalin's death. His retention of the party secretaryship, concurrently with the Premiership, was widely commented on abroad as an apparent reversal of the post-Stalinist policy of ensuring that the two offices were not filled by the same individual. Moreover, it was conjectured abroad that M. Khrushchev's assumption of the two posts might represent the abandonment of the policy of "collective leadership," of which M. Khrushchev himself had been a leading exponent since the death of Stalin.

Marshal Stalin combined the post of Prime Minister and party secretary throughout the Second World War and until his death in 1953. His successor, M. Malenkov, held the two posts for only a few days before relinquishing the party secretaryship to M. Khrushchev.

The London *Times* commented as follows on the political changes in the Soviet Union:

"Mr. Khrushchev, as first secretary of the party since 1953, has had more power than any other Soviet leader; his appointment as Prime Minister puts him in a position comparable with that of Stalin at the time of his death . . . Mr. Bulganin's departure had been more or less expected . . . but Mr. Khrushchev's appointment as his successor has caused a certain surprise. Some thought it unlikely that the man who denounced Stalin and the 'cult of the individual' would appear to be treading the same path so soon after the 20th party congress. A motive that may have weighed with Mr. Khrushchev is that, though he has long been the sole arbiter of Soviet foreign policy, he has had no legal status as Russia's spokesman and negotiator with foreign Powers. This was of some hindrance at the summit talks at Geneva. As Prime Minister he will no longer suffer from this disability."

Composition of New Government.

The Supreme Soviet approved the composition of the new Government, which was announced by M. Khrushchev after approval by the central committee of the Communist Party. Its membership was:

M. Nikita Khrushchev	Prime Minister.
M. Frol Kozlov, M. Anastas Mikoyan	First Deputy Premiers.
M. Alexei Kosygin, M. Alexander Zasyadko, *M. Josef Kuzmin, M. Dimitri Ustinov	Deputy Premiers.
M. Andrei Gromyko	Foreign Affairs.
M. Nikolai Dudorov	Internal Affairs.
M. Ivan Kabanov	Foreign Trade.
M. Vyacheslav Yelyutin	Higher Education.
M. Nikolai Mikhailov	Culture.
Mme. Maria Kovrigina	Health.
M. Pyotr Antropov	Geological Surveys and Mineral Resources.
Marshal Rodion Malinovsky	Defence.
M. Boris Beshchev	Railways.
M. Viktor Bakayev	Merchant Marine.
M. Nikolai Psurtsev	Communications.
M. Vladimir Matskevich	Agriculture.
M. Yefim Slavsky	Medium Machine-building.
M. Dimitri Pavlov	Internal Trade.
M. Yevgeny Kozhevnikov	Transport Construction.
M. Arseny Zverev	Finance.
M. Sergei Tikhomirov	Chemical Industry.
M. Leonid Korniets	Grain Products.
M. Alexei Pavlenko	Power Stations.

*Also Chairman of the State Planning Committee.

In addition to the 26 Ministers listed above, the new Government also included the chairmen of the various State Committees and the Premiers of the 15 Union Republics, as follows:

Chairmen of State Committees.

*M. Georgi Perov	State Planning Committee.
M. Georgi Yenyutin	Control Commission of Council of Ministers.
M. Alexander Volkov	State Committee for Labour and Wages.
M. Yuri Maksarev	State Scientific and Technical Committee.
M. Pyotr Dementyev	State Committee for Aviation Engineering.
M. Konstantin Rudnev	State Committee for Defence Engineering.
M. Valery Kalmykov	State Committee for Radio and Electronics.
M. Boris Butoma	State Committee for Shipbuilding.
M. Vladimir Kucherenko	State Committee for Construction.
M. Semyon Skachkov	State Committee for Foreign Economic Relations.
General Ivan Serov	State Security Committee.
Marshal Nikolai Bulganin	State Bank.

*First Vice-Chairman; M. Kuzmin is Chairman of the State Planning Committee as stated above.

Prime Ministers of Union Republics.

M. Dimitri Polyansky	Russian Soviet Republic.
M. Nikifor Kalchenko	Ukraine.
M. Nikolai Avkhimovich	Byelorussia.
M. Alexei Murisepp	Estonia.
M. Vilis Lacis	Latvia.
M. Moteyus Shumauskas	Lithuania.
M. Alexander Diordita	Moldavia.
M. Givi Djavahishvili	Georgia.
M. Anton Kochinyan	Armenia.
M. Sadykh Ragimov	Azerbaijan.
Mansur Mirza Akhmedov	Uzbekistan.
M. Dinmukhamed Kunayev	Kazakhstan.
M. Nazarsho Dodkhudoyev	Tajikistan.
M. Djuma Karayev	Turkmenistan.
M. Kazy Dikambayev	Kirghizia.

M. Khrushchev's Government contained only two Deputy Premiers—M. Mikoyan and M. Kozlov—compared with six in Marshal Bulganin's Cabinet. M. Mikoyan (60) is the last of the "old guard" Bolsheviks to occupy a top governmental post, while M. Frol Kozlov (50) is a comparative newcomer whose appointment to a First Deputy Premiership was one of the principal changes brought about by M. Khrushchev. Born near Ryazan of peasant origin, he is an engineer by profession, held party secretarial posts in Kuibyshev and Leningrad during and after the war, and in 1953 was appointed head of the Leningrad party organization by M. Khrushchev. M. Kozlov was made a member of the party presidium in 1957 and at the end of that year became Prime Minister of the Russian Soviet Republic—a post in which he is now succeeded by M. Polyansky, as shown in the list above.

All the four Deputy Premiers have held top administrative posts in the country's economy. M. Kuzmin, as shown, holds the post of Chairman of the State Planning Committee concurrently with his Deputy Premiership, while M. Ustinov was formerly head of the defence industries. The only new Deputy Premier was M. Zasyadko, formerly vice-chairman of the State Planning Committee. Most of the Ministers continued to hold the same portfolios as under Marshal Bulganin, the reappointed Ministers including M. Gromyko, Marshal Malinovsky, and the Ministers of Internal Affairs, Internal Trade, Foreign Trade, Health, and Finance. General Ivan Serov remained head of the State Security Committee, while M. Semyon Skachkov succeeded M. Mikhail Pervukhin as chairman of the State Committee for Foreign Economic Relations, consequent on M. Pervukhin's recent appointment as Ambassador to Eastern Germany.

Suspension of Nuclear Tests. - Supreme Soviet Resolution. - Statement by M. Gromyko.

At its concluding session on March 31, the Supreme Soviet unanimously adopted a resolution on "the unilateral termination by the Soviet Union of atomic and hydrogen weapon tests." The resolution:

(1) Announced the ending of "all types of atomic and hydrogen weapon tests in the Soviet Union," and expressed the hope that "the Parliaments of other States possessing atomic and hydrogen weapons will do everything to terminate test explosions of these weapons by their countries as well."

(2) Entrusted the U.S.S.R. Council of Ministers with "taking the necessary measures to implement this resolution," and requested it to appeal to the other nuclear Powers to take "similar steps to ensure the ending of atomic and hydrogen weapon tests everywhere and for all time."

The resolution added: "In the event of other nuclear Powers continuing these tests, the Government of the U.S.S.R. will naturally act as it sees fit as regards the testing of atomic and hydrogen weapons by the Soviet Union . . . having regard to the interests of the security of the Soviet Union."

The preamble to the resolution declared that the ending of nuclear tests was "being demanded by the overwhelming majority of the people of the world." Nevertheless, nuclear weapons were still being manufactured and had resulted in "the creation of ever newer types of death-dealing weapons" and "an increase in the concentration of radioactive elements in the air and the soil which is poisoning the human organism and threatening the normal development of future generations." After recalling the Supreme Soviet's appeals to the British Parliament and the U.S. Congress in May 1957 [see page 15542], and asserting that the British and U.S. Governments had "failed to react" to the Soviet proposals for suspending nuclear tests, the resolution stated that the suspension of tests by the U.S.S.R. would constitute "the first step towards finally ridding mankind of the threat of devastating atomic war."

The resolution was adopted after the Supreme Soviet had heard a speech by the Foreign Minister, M. Gromyko, in which he announced the Soviet Government's decision to suspend nuclear tests.

The greater part of M. Gromyko's speech was a recapitulation of the Soviet viewpoint on disarmament and on the ending of nuclear tests, as put forward by the U.S.S.R. during the discussions of the sub-committee of the Disarmament Commission and subsequently at the United Nations. After saying that it would be "comparatively easy" to reach an agreement to end nuclear tests, because only three Powers had these weapons at present, M. Gromyko said that Britain and America had "not shown themselves willing to agree to the final and unconditional ending of tests" and had "chosen the method of obstructionism, piling one obstacle on top of another in the way of implementing the [Soviet] proposal."

M. Gromyko said that the ending of nuclear tests was being urged not only by "all the Socialist countries" but also by the peoples and Governments of India, Indonesia, Japan, Burma, Ceylon, the United Arab Republic, Pakistan, Persia, Sweden, Norway, Denmark, Finland, Mexico "and many other countries." In Great Britain, protests against nuclear tests had been "voiced by the widest sections of the population and the most diverse political and social groups," while in the United States "many noted politicians and public figures . . . have gone on record for the conclusion of an agreement on this question with the Soviet Union and Britain."

After accusing NATO of "stepping up war preparations," and declaring that the "only basis for disarmament is an honest agreement taking into account the security interests of all the parties concerned," M. Gromyko strongly criticized the decision of the West German *Bundestag* to arm the Federal German forces with atomic and rocket weapons "with the blessing of their Atlantic bloc partners." He declared that it would be "sheer folly to underrate the gravity of this step"; said that "one cannot forget that the German Federal Republic is the only European State whose government is seeking to re-define the present frontiers in Europe"; and added that the West German decision "cannot be interpreted otherwise than as a challenge to the European nations, and above all to those bordering on Germany."

The Supreme Soviet ended its session by adopting appeals to the British Parliament, the U.S. Congress, and the Parliaments of all countries calling for the ending of nuclear weapon tests. In addition, it adopted (i) a message to the West German *Bundestag* drawing attention to the "dire consequences to the cause of peace" arising from the decision to equip West German forces with atomic and rocket weapons, and (ii) a message to the Parliaments of all countries which suffered from German aggression in the Second World War, calling on them to "unite in their efforts" to prevent the arming of the German Federal Republic with such weapons.

Approval for New Agricultural Policy.

The Supreme Soviet also unanimously approved a law "on the further development of the collective farm system and the reorganization of the machine and tractor stations," embodying the reforms previously proposed by M. Khrushchev (see 16038 A) and approved by the central committee of the Communist Party and the U.S.S.R. Council of Ministers. (Soviet Embassy Press Department, London - Times)

(Prev. rep. Ministries, 15992 A; Nuclear Tests, 16095 B; Summit Correspondence, 16069 A.)

A. SAUDI ARABIA. — Increased Powers for Emir Faisal in Internal, Foreign and Economic Affairs.

King Saud issued a decree on March 23 granting his brother, the Emir Faisal, full powers over the kingdom's foreign, internal and economic affairs, with the aim of "strengthening the governmental machinery and centralizing responsibilities." The Emir Faisal (who is Crown Prince) was already Prime Minister and Foreign Minister, and had led the Saudi Arabian delegation at the United Nations on several occasions.

In the United Arab Republic—where the Emir Faisal is regarded as more pro-Egyptian than King Saud—allegations were made in Egyptian and Syrian newspapers that King Saud had virtually "abdicated" in favour of his brother, and that long-standing political differences had existed between the King and the Crown Prince. References were also made to "internal dissatisfaction" in Saudi Arabia in connexion with the alleged plot against the life of President Nasser [see page 16086]. These allegations were described as "untrue and fabricated" by the Saudi Arabian Ambassador in Baghdad (Sheikh Ibrahim Sowayel), who emphasized that the transfer of powers to Crown Prince Faisal was in accordance with the King's desire to secure a greater degree of administrative centralization as the best way of promoting Saudi Arabian interests. The Ambassador in Baghdad, and other Saudi Arabian diplomats, stressed that no disagreement existed between the King and the Crown Prince, and that King Saud continued to exercise full authority over the State as hitherto.

The following comment was brought on April 10 by the Diplomatic Correspondent of *The Times*:

"In spite of conflicting reports, it now seems possible to assess the position of the Saudi Arabian Government since the establishment of the United Arab Republic of Egypt and Syria, and since the Emir Faisal . . . took over the Ministries of Finance and Interior. The Emir Faisal, while in Cairo for medical treatment, saw President Nasser and Shukry Kuwatly [the former Syrian President] a few days before they announced the creation of the United Arab Republic, but neither of them informed him of their intentions and he was affronted by this treatment. When he returned to Saudi Arabia his pro-Egyptian attitude had modified, and King Saud chose the moment to make clear that differences with his brother, if, in fact, they existed before, were now at an end. On this view King Saud still retains ultimate control and Saudi Arabia is likely to remain poised between the United Arab Republic and the Federation of Iraq and Jordan."

During the last week of February King Saud and his Ministers had discussions in Riyadh with a delegation from the Arab Federation led by the Foreign Ministers of Iraq and Jordan. According to an official statement in Riyadh, confirmed on March 1 by the Saudi Arabian Embassy in Beirut, King Saud had made it clear that he did not intend either to join the Arab Federation or to federate with the United Arab Republic. (Times - Manchester Guardian - Le Monde, Paris)

A. KOREA. — Evacuation of Chinese Forces from Korea. - North Korean and Chinese Proposals for Withdrawal of U.N. Forces. - Forced Diversion of South Korean Aircraft to North Korea.

The North Korean Government, in a statement issued on Feb. 5, proposed that all foreign troops should be withdrawn simultaneously from North and South Korea; that free elections should subsequently be held under the supervision of representatives of neutral States with the aim of unifying the country; that consultations should take place between the North and South Korean Governments on the establishment of economic and cultural relations between the two parts of Korea; and that both Governments should reduce their armed forces to a minimum as soon as possible. The statement—issued after the North Korean Government had met to study counter-measures against the introduction of nuclear weapons into South Korea by the U.N. forces—added that the North Korean forces had been reduced by 80,000 men.

The Chinese Communist Government proposed on Feb. 7 that all foreign troops should leave Korea by specified dates; announced that it was prepared to discuss the withdrawal of the Chinese "volunteers" with the North Korean Government; and asked the U.S.A. and other countries participating in the U.N. Force to take similar measures to withdraw their troops from South Korea, as a preliminary to the reunification of the country. The statement was handed to the British Chargé d'Affaires in Peking for transmission to the 16 Governments with contingents in the U.N. Force.

The Chinese Premier, Mr. Chou En-lai, accompanied by the Foreign Minister, Marshal Chen Yi, subsequently left for Pyongyang for talks with Mr. Kim Il Sung, the Prime Minister of North Korea. A joint communiqué was issued on Feb. 19 announcing that all Chinese forces would be withdrawn from Korea by the end of 1958.

Referring to the North Korean proposals for the withdrawal of all foreign troops, the communiqué said: "After consultation with the [North] Korean Government, China has proposed to the Chinese people's volunteers that they take the initiative in withdrawing from Korea. The Chinese people's volunteers have fully concurred in this proposal . . . and have decided to withdraw completely by stages and to complete their withdrawal before the end of 1958. Now is the time when the United States and other countries in the U.N. Forces are faced with a serious test. If they sincerely desire a peaceful settlement of the Korean question, they should similarly withdraw all their forces from Korea. Otherwise the whole world will see even more clearly that it is they who have all along been obstructing the peaceful unification of Korea. If the United States and South Korea think that the withdrawal of the Chinese troops is a sign of weakness and seek to take advantage of it, they will certainly meet with unthinkable consequences The Korean people's ability to resist aggression is stronger than ever before."

The Chinese Government announced on March 12 that the first six divisions (about 100,000 men) of the Chinese "volunteers" would begin to leave Korea on March 15 and would complete their withdrawal by April 30. The total number of Chinese "volunteers" in North Korea is estimated at about 350,000 men.

The Soviet Government expressed its full support for the Chinese proposals in a statement issued on Feb. 20, and suggested that a conference of countries interested in the Korean problem should be called to consider the reunification of the country.

"The situation in Korea cannot but arouse apprehension," the statement said. "In spite of a number of constructive proposals and efforts on the part of the Government of the Korean Democratic People's Republic [i.e. North Korea] aimed at a peaceful settlement of the Korean issue, and as a result of the resistance to this on the part of the South Korean authorities, supported by the United States, the country had not yet been unified. The refusal of the United States in the summer of 1957 to fulfil the important provision of the armistice agreement which limited the importation of arms into Korea, and also the arming of the South Korean forces with the most up-to-date weapons and the transformation of South Korea into an atomic base, do not in the least serve to facilitate a peaceful settlement of the Korean issue . . .

"The Soviet Government continues to believe that the Korean issue cannot be solved by foreign interference in Korea's affairs. The solution of the problem of restoring Korean national unity can only be achieved by the Koreans themselves, through a gradual *rapprochement* between the two parts of Korea . . . *Rapprochement* between North and South Korea would be facilitated and the preservation of peace in Korea ensured if the two Governments concluded a peace pact and undertook not to resort to force in settling controversial issues; if an agreement were reached on a substantial reduction of the armed forces of the Korean Democratic People's Republic and South Korea; and if they were to declare that they would not allow the installation of nuclear and rocket weapons on their territories. Bearing in mind that Korea has now been divided for more than 12 years, and that the necessary confidence in the relations between the two parts of Korea is lacking, it would be desirable, in the Soviet Government's opinion, to call a conference of the States concerned to discuss steps conducive to a *rapprochement* between the two parts of Korea."

A Foreign Office spokesman in London, commenting on the Chinese Government's decision, said on Feb. 19 that "the British Government welcome any move which might help to reduce tension in the area and to bring about a peaceful settlement of the Korea problem on the lines described by the United Nations."

In Washington, the State Department spokesman (Mr. Lincoln White) also welcomed the withdrawal decision, and added that "once the withdrawal has been completed we would hope that the Chinese Communists would . . . agree to further steps repeatedly set forth in the U.N. General Assembly resolutions for the peaceful unification of a democratic Korea. The first step would be to agree to genuinely free elections under U.N. supervision." Mr. Lincoln White also pointed out that the U.S. forces in Korea had already been reduced by 80 per cent. [The present strength of the U.S. forces is about 30,000.] Other State Department officials said that the U.S. Government did not intend to permit the Communists to equate the status in Korea of the Chinese Communist and U.S. forces, as the U.S.A. and 15 other countries had gone into Korea to repel aggression at the request of the United Nations, whereas the Chinese Communists had entered North Korea to support aggression.

The South Korean Government denounced the Chinese and North Korean proposals on Feb. 19 as "nothing but propaganda" and "unworthy of serious study"; in a further statement on Feb. 21 it declared that if the U.N. forces withdrew, North Korea could "invade South Korea again in a blitzkrieg and face the free world with the *fait accompli* of Korea in Communist hands."

The North Korean Government submitted its proposals for free elections and for discussions on economic and cultural relations between North and South Korea to the Military Armistice Commission on Feb. 24, and called for the withdrawal of the U.N. forces as a step towards reunification. This demand was rejected by the chief U.N. delegate (General Kyster, of the U.S. Army) on the ground that reunification was not a proper subject for the Commission to consider. Representatives of the 16 Governments to which the Chinese proposals of Feb. 7 had been addressed decided at a meeting in Washington on March 4 to reject them, and to demand the withdrawal of all Chinese forces and the holding of elections under U.N. supervision.

Following the British Government's decision to withdraw all U.K. forces from Korea [see page 15669, second column] the New Zealand Minister of Defence (then Mr. Macdonald) announced on April 5, 1957, that the remaining New Zealand troops in Korea would also be withdrawn within the next few months. The last Canadians serving in the Commonwealth contingent returned home on July 31, and the last Australians on Aug. 29, 1957.

Some of the passengers—believed to be Communist agents—on board a South Korean airliner flying from Pusan to Seoul forced the American pilot at the point of a gun to fly into North Korea and land near Pyongyang on Feb. 16. Among those on board were Colonel Kim Ki Wan, chief information officer of the South Korean Air Force, Lieut.-Colonel Howard McClennan, of the U.S. Air Force, and two German sales agents. The North Korean radio claimed on the following day that the passengers had done so because they could "no longer endure the daily pressure of the fascist Syngman Rhee government" and wanted to escape "imperialist oppression." The U.N. Command demanded the return of the aircraft with its passengers and crew, and after lengthy negotiations conducted through the Armistice Commission, the two American pilots and 24 passengers were eventually released on March 6; eight other passengers remained in North Korea, the aircraft itself being detained by the North Korean authorities. (Times - Daily Telegraph - Manchester Guardian - New York Times - Soviet Embassy Press Department, London)

(Prev. rep. 16047 A; 15642 A.)

B. MIDDLE EAST. — Industrial Corporation.

The Federation of British Industries announced on April 3 that an international organization known as Midec S.A. had been formed to further the development of industrial projects in the Middle East in conjunction with Arab and other local interests. The present participating countries in Midec S.A. are Belgium, Canada, Denmark, France, the German Federal Republic, Italy, the Netherlands, Norway, Sweden, Switzerland, the United Kingdom and the United States. Its initial share capital is 1,000,000 Swiss francs.—(Times)

A. UNITED KINGDOM. — Agricultural Policy. - Farm Prices for 1957-58.

A White Paper published on March 20 announced the new farm prices and production grants for 1958-59, fixed as the result of the Annual Review in February, and providing for a cut in the total value of agricultural guarantees of about £19,000,000 in a full year. Decreases were shown in the guaranteed prices for fat pigs, eggs, milk, and wheat, but there was a small increase for fat cattle and in the rates of quality premium for bacon pigs. The new prices (effective from April 1, 1958, except those for cereals and root crops) are given below, with the 1957-58 review prices in parentheses :

Livestock and Livestock Products. *Fat Cattle* 157s. a live cwt. (156s.). *Fat Sheep and Lambs* . 3s 2½d. a lb , dressed carcase weight (same). *Fat Pigs :* 44s. 9d. a score deadweight (51s. 11d.). *Milk :* An average of 3s 1.70d a gallon (3s. 2.70d.). *Wool :* An average of 4s. 8½d. a lb. (unchanged).

The price of 44s. 9d. a score for fat pigs (subject to a reduction of 1d. a score to take account of certain expenditure on pig progeny testing stations) is related to a feed price of 26s 3d a cwt , and is equivalent to 49s. 11d. a score related to the 1957-58 feed price.

Eggs. Averages of 4s. 0.95d. a doz. for hen eggs (4s. 6.2d.) and 2s. 5.7d. a doz. for duck eggs (2s. 10.2d.).

Cereal and Other Crops (1958 Harvest). *Wheat :* An average of 28s. 1d. a cwt. (28s. 7d.). *Barley :* 29s. a cwt. (unchanged). *Oats :* 27s. 5d. a cwt. (unchanged). *Rye :* 22s 1d. a cwt. (unchanged). *Potatoes :* 229s. a ton on new basis (225s. a ton on old basis, equivalent to 229s. on new basis). *Sugar Beet :* 130s. 6d. a ton (unchanged).

Existing production grants, amounting to about £80,000,000 in a full year, would be continued, but higher rates of subsidy would be given for nitrogen fertilizers from July 1, 1958, involving additional payments totalling about £1,500,000

Important points from the White Paper are summarized below :

Reasons for Reduction of Price Guarantees. The White Paper stressed that the total cost of agricultural support had risen from £206,000,000 in 1955-56 to £240,000,000 in 1946-57 and an estimated £290,000,000 in 1957-58. In the Government's view the present trends of net income and costs and the effects of the continued increase in the efficiency of the industry—"whose recent production reflects its strength and resilience"—were such that the level of the guarantees could be reduced "consistently with the maintenance of a proper level of remuneration in the industry." Moreover it was essential to reduce the guarantees on certain products in order to guide production into the desired channels. The White Paper pointed out that under the long-term measures of the Agriculture Act [see 15415 A] the Government was obliged to maintain the guarantees at 95 7 per cent of the total, after allowing for cost changes. On the basis of the calculation in the Review, this would allow a total reduction of £21,000,000, or £2,000,000 more than the reductions now announced.

The Government's Production Policy. The main object of the Government's policy continued to be more economic production. The recent expansion of gross output had been based largely on the production—at a substantial cost in import feed—of milk, eggs, and pigs. The value of such output to the balance of payments, however, was doubtful, and it was considered that in present circumstances gross output should not be expanded any further "unless this can be done at substantially lower cost of production and without prejudicing the aim of relieving the taxpayer of the increasingly heavy burden of subsidy cost."

The general directions of the Government's policy, therefore, were as follows :

(1) The maintenance of a large arable acreage—about the present size—with greater emphasis on feed crops and less on wheat.
(2) Greater reliance on home-produced feed for livestock.
(3) Production of more beef and lamb of good market quality.
(4) Production of less milk, pigmeat, and eggs.

The White Paper pointed out that production of pigs, milk, and eggs had continued to rise. It was considered important to stop the "huge upwards fluctuations" in pig production, especially in view of the demands made on imported feeding-stuffs, and the cut of 2s. a score was nearly the maximum possible under the Agriculture Act. Egg production had risen to the point where British farmers supplied virtually the entire home market, and under international agreements Britain was forbidden to export subsidized food products : the cut of 1d a doz. compared with a maximum possible under the Agriculture Act of 2½d. The cut of 1d. a gallon in milk prices would have been more severe if it had not been necessary to consider the interests of small farmers.

The Government, however, recognized the special problem which arose because many small farmers were particularly concerned with the production of milk, pigs, and eggs; accordingly, they intended to begin discussions about marginal production schemes and also about proposals (now being prepared) for additional provisions to help small full-time farmers.

[It was explained that these proposals, intended to benefit small farms of, for example, 30-60 acres, would be based on the principle of grassland conservation, in order to build up their capacity to produce beef and lamb. The Minister of Agriculture would seek a way to inject yearly grants into small farms, with a programme covering a period of perhaps 3 to 5 years.]

Farm Output, Costs, and Income. The White Paper estimated that agricultural output had risen from 61 per cent over pre-war in 1956-57 to 63 per cent in 1957-58 ; there had been a continued expansion in production of beef, mutton, and lamb, and the arable area had been "substantially maintained." Farm efficiency appeared to be increasing at least at the rate previously announced (about £25,000,000 a year for review commodities), with the result that the increase of about £11,000,000 for review commodities in farmers' costs was the lowest since 1954.

Actual farm income for 1957-58 was forecast at £360,000,000, compared with £314,000,000 for 1956-57. When adjusted for normal weather conditions, these figures became £361 500,000 for 1957-58 and £333,500,000 for 1956-57. "Both on an actual and on a normal weather basis," the White Paper stressed, "the net income forecast for 1957-58 is by far the highest ever recorded."

Strong protests against the Government's decision to impose the price support cuts announced in the White Paper were made on March 20 by the three farmers' unions of England and Wales, Scotland, and Northern Ireland.

In a joint statement the farmers' unions explained that in discussions with the Minister of Agriculture they had offered to accept a cut of £5,000,000 in the total value of agricultural guarantees, although there was "considerable feeling" amongst their members in favour of higher guarantees to meet costs and enable farmers to enjoy a greater share of the benefits of their own efficiency. This offer would have had the effect of pegging farming incomes at about their present level, and farmers would have been prepared to accept cuts on this scale, despite the fact that their real incomes had not increased with those of the rest of the community. They felt, however, that the Government's decision to make a reduction of £19,000,000 placed "an unjustifiable burden on an industry that has already borne far more than its share of the battle for national solvency." The unions had therefore withdrawn from the discussions because they felt that there "could be no useful purpose in continuing them."

Sir James Turner, president of the N.F.U. of England and Wales, described the White Paper policy as "a harsh economic squeeze that the Government have put on people who are ill-equipped to stand it." He pointed out that the breakdown in the discussions between the Minister of Agriculture and farmers' leaders was the second of its kind in the past three years.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 15590 C ; 15465 A.)

B. FIJI. — Development of Nandi Airport.

At a meeting of the Pacific Air Transport Council, held at Wairakei (New Zealand) from Nov. 25 to Dec. 6, 1957, Britain, Australia and New Zealand concluded an agreement to share the cost of developing Nandi airport, Fiji, so as to enable it to take large jet aircraft.

Announcing the scheme on Sept. 25, 1957, Mr. Shand (then N.Z. Minister of Civil Aviation) had stated that Nandi airport was the responsibility of the South Pacific Air Transport Council, which comprises Australia, the U.K., New Zealand, Canada, Fiji, and the Western Pacific High Commission. Construction, maintenance, and operation of the airport were responsibilities of New Zealand as the agent of the Council. Mr. Shand explained that Nandi, "the northern gateway to New Zealand for air traffic," was the most important airways junction in the Pacific after Honolulu.

Under the tripartite agreement Britain and Australia will each pay 40 per cent and New Zealand 20 per cent of the total costs (estimated at £3,600,000 at the Wairakei conference), whilst Canada and Fiji will make contributions towards the operating costs of the new airport, which will have a main runway of 10,700 feet compared with 7,100 feet at present. The extended runways will be ready for the new jet airliners by July 1959, and the whole project will be completed by the end of that year.—(Directorate of Information, Wellington - New Zealand Department of External Affairs)

C. UNITED KINGDOM - UNITED STATES. — Purchase of Surplus American Tobacco against Provision of Housing for U.S. Servicemen in Britain.

The U.K. Paymaster-General, Mr. Maudling, announced on Feb. 24 that new arrangements had been made with the U.S. Government under which Britain would import $5,000,000 (£1,785,000) worth of tobacco for sterling, and in exchange would build houses for U.S. servicemen and their families in Britain at an equivalent cost.

Mr. Maudling explained that this was a second extension of the transaction announced in June 1956, and extended in March 1957, which together had involved the importation of $18,000,000 worth of tobacco without dollar expenditure. The proceeds of the new transaction would be appropriated to the defence budget, whilst the houses would be let to the U.S. authorities at a nominal rent but would remain the property of the British Government.

It was stated that the new tobacco purchase would not cause any reduction of British tobacco purchases from Commonwealth countries.—(Times - Daily Telegraph)

(Prev. rep. 15608 A.)

A. MALAYA. — Terrorist Leader's Rejection of Government Surrender Terms. - Extension of General Amnesty Offer. - The Anti-Terrorist Campaign. - Statement by Tengku Abdul Rahman.

The Prime Minister of the Malayan Federation, Tengku Abdul Rahman, announced on Dec. 22, 1957, that he had received a letter from Chin Peng, the leader of the Communist terrorists, saying that he was prepared to send two emissaries for preliminary talks with the Government with the aim of ending the jungle fighting, but that "the question of surrender does not arise." The Tengku added that he was not willing to accept the Communist terms.

Chin Peng's letter, dated Dec. 9 but posted only on Dec. 19, said: "It is not our intention to treat the elected Government as an enemy. It is also clear that the question of the surrender by us to the elected Government does not arise. The Communist Party's object is to end the emergency by reaching a fair and just agreement, and to talk of surrender on your Government's unreasonable demands is unfair and unjust."

Commenting on this letter in his statement of Dec. 22, Tengku Abdul Rahman said that "the Government cannot see any possibility of coming to terms with Chin Peng unless and until he is willing to surrender, so there will be no meeting." He added: "There will never be peace in Malaya if the emergency is to end on terrorist terms It is now obvious that the terrorists' ultimate goal is the overthrow of our democratically elected Government and the setting-up of a Communist State I will not tolerate this."

In an earlier letter of Oct. 12, 1957, which had reached Kuala Lumpur only on Nov. 7, Chin Peng had informed the Tengku that he was "prepared to meet you again for a talk with the object of obtaining a just and fair agreement in order to end this war," and that he "expected that this time agreement will be reached to our mutual satisfaction" In a statement on Nov. 8, Tengku Abdul Rahman said that as Chin Peng had obviously accepted the principle of surrender, he (the Prime Minister) was willing to discuss the further arrangements with him; he would therefore await a message from Chin Peng announcing the name of his representative and proposing the time and place where contact could be made with him.

As no further reply was received from Chin Peng, Tengku Abdul Rahman announced on Dec. 6 that unless Chin Peng sent an emissary before Dec. 31 to arrange peace talks, his (the Tengku's) offer to meet Chin Peng would be withdrawn. Chin Peng thereupon replied on Dec. 9 as stated above.

The Government's general amnesty offer to the terrorists, which was to have expired on Dec. 31, 1957, was extended to April 30, 1958, and subsequently until July 31, 1958.

Announcing the first extension on Dec. 16, 1957, Tengku Abdul Rahman stated that 122 Communist terrorists had surrendered since the latest surrender terms were announced on Sept. 3; that most of the surrenders had been from Johore, Negri Sembilan, and Perak; that "definite cracks" were appearing in the terrorist organization in Johore and Perak; and that 36 of those who had surrendered were branch committee members or of even higher rank. About 1,650 terrorists under the leadership of Chin Peng were still holding out against the Government.

Announcing the second extension of the surrender terms on March 30, 1958, Tengku Abdul Rahman said that over the past seven months the total number of surrenders had risen to 215 (against 93 in the previous seven months), if those killed and captured were included, the total number of terrorists eliminated since the achievement of Malayan independence was 300. This was sufficiently encouraging to justify an extension of the period of the surrender offer, but he did not think that the emergency could be ended by the end of the year, as he had earlier hoped [see 15793 A, second column]. The total number of Communist terrorists still in the jungle was estimated by the Tengku at about 1,500.

New anti-terrorist regulations had previously been promulgated by the Federation Government on Aug. 16, 1957, whilst on Nov. 8 the Government announced a higher scale of rewards for information leading to the killing or capture of terrorists.

The regulations of Aug. 16 were aimed primarily at Communist sympathizers and other subversive elements. They stipulated (*a*) that any person who refused to disclose the whereabouts of terrorists, or did not report a breach of the existing emergency regulations to the police, might be imprisoned for up to 10 years; (*b*) that anyone failing to report to the authorities the whereabouts of a person he had reasonable cause to believe was a Communist terrorist, or to notify to the police the receipt of any communication of terrorist origin, would also be liable to imprisonment; and (*c*) that publishers of any subversive document would incur long prison sentences. At the same time the Government prohibited the unauthorized organization of school and student tours between Malaya and other countries, in an effort to check Communist subversion of youths going abroad.

The new rewards for information on terrorists, announced on Nov. 7, were: for information leading to a capture, from 5,000 Malayan dollars (about £380) to 20,000 Malayan dollars, depending on rank. For information leading to the killing of a terrorist: from 2,000 Malayan dollars to 16,000 Malayan dollars. The previous minimum rates had been 2,000 Malayan dollars and 1,500 Malayan dollars respectively.

Meanwhile operations by the security forces against the terrorists had continued without interruption. Major anti-terrorist operations included an extensive bombardment of a known Communist-held area in south-east Johore, carried out by the cruiser H.M.S. *Newcastle* during the night of Dec. 5-6, 1957, and an all-out drive (described as the largest in the ten years of the emergency) in a 1,200-square-mile area of northern Perak in which 10,000 British, Australian, and New Zealand troops took part, together with several thousand police and Home Guards. It was announced on April 7, 1958, that British, Australian and New Zealand aircraft had completed the heaviest aerial bombardment of the jungle war, having carried out continuous round-the-clock attacks on suspected Communist supply-dumps and hide-outs in Perak State since March 17. A number of terrorists were killed or captured in smaller operations.

Kuala Lumpur, the Federal capital, and its outlying districts were declared "white" (terrorist-free) on Aug. 23, 1957, thus completing a belt across the Federation from coast to coast which was freed from the nine-year-old emergency restrictions. A further area of 120 sq. miles of the Segamat district of Johore—formerly one of the most bandit-ridden areas of Malaya—was declared "white" on Jan. 3, 1958, and Malacca on Feb. 10.

Changes in British Commonwealth Forces. - Tengku Abdul Rahman on Necessity for Defence Agreement with Britain.

It was announced in Salisbury on Oct. 24, 1957, that the proposed transfer of the 1st Battn. King's African Rifles to Malaya to relieve the Rhodesian African Rifles would no longer be required, and that there would be no Rhodesian troops left in Malaya after the return of the Rhodesian African Rifles in February 1958. The 2nd Battn. King's African Rifles had served in Malaya from 1950-52, and the 1st Battn. Northern Rhodesian Regiment from 1952-56, when the Rhodesian African Rifles took over.

The 1st Battn. New Zealand Regiment—the first battalion ever to leave New Zealand in peace-time—sailed from Wellington for Singapore on Nov. 28, 1957, to join the Commonwealth forces in Malaya. It included 150 Maoris out of a total strength of 670 men.

Tengku Abdul Rahman declared in the Legislative Council on Oct. 2, 1957, that while he was head of the Government he would "stand or fall by the defence agreement between Britain and the Federation."

After describing the agreement as "a treaty of friendship," and stressing that it in no way infringed on Malaya's sovereignty, the Tengku pointed out that at present the Federation had an Army under one division in strength, no Air Force, and no Navy. With the revenue at their command they could not at present build up the Malayan forces to the strength required for the defence of the country. The Prime Minister declared:

"We have 771,000,000 Malayan dollars (£90,175,000) in revenue. Only one-tenth of that can we spare for our armed forces. The rest must go for the national development, schools, medical and postal services, housing, agricultural improvement, land development, drainage, irrigation, road improvement, and the like. In the circumstances it is only too obvious that we cannot stand alone. If we had not entered into a defence treaty with Britain, we should have signed our death warrant. God alone knows what would happen to our country if we had to 'go it alone' at this very early stage of our independence."

In a subsequent statement on March 3, 1957, the Tengku strongly criticized a demand made by 35 British Labour M.P.s for the withdrawal of British forces from the Federation on the ground that their presence was incompatible with Malayan independence. In rebuking the Labour M.P.s concerned, Tengku Abdul Rahman declared:

"It is as much the duty of the British people as of the Malayans themselves to meet and crush the Communist challenge. It is accepted by all the free world that the fight against the Communists in Malaya is not Malaya's concern alone. The Reds are trying to establish Communist dictatorship in South-East Asia—if they succeed, the whole of South-East Asia will be lost. Malaya is engaged not only in a life or death struggle, but also in a struggle to free this part of Asia from the Communist menace. If the British and other Commonwealth countries were to withdraw their support and leave Malaya to shoulder the burden alone, it would be necessary for this country to double her security forces and expenses in order to end the war."

Other Anti-Subversion Measures.

It was announced on Oct. 30, 1957, that four Chinese officials of the National Union of Factory and General Workers had been detained under the emergency regulations for suspected subversive activities.

The Deputy Premier and Minister of Defence (Dato Abdul Razak) stated on the same day that the Government was determined to protect lawful organizations from subversive penetration, and that the persons arrested had propagated Communist subversive doctrines and practices in their union. The action taken against them implied

no departure from the Government's declared policy of fostering a sound trade union movement; the four men had been arrested, not because they were trade unionists, but because their activities were detrimental to the peace and good order of the country.

The four men concerned were the union's president and assistant secretary-general, and the vice-chairman and secretary of its Johore branch.

Tengku Abdul Rahman's Visit to South Vietnam.

Tengku Abdul Rahman, accompanied by the Malayan Ministers of Commerce and Industry (Tan Siew Sin) and Transport (Abdul Rahman Binhaji Talib), paid an official visit to South Vietnam from Jan 27-31—his first visit to a foreign country since the achievement of Malayan independence. During his stay in Saigon the Tengku had a number of conversations with President Diem, visited the headquarters of the Vietnamese armed forces, inspected the works of the Vietnam Textile Corporation at Binh-Hoa, and attended a State banquet given by President Diem.

A joint statement issued on Jan. 31 said that the discussions between President Diem and the Tengku had shown a "complete identity of views" on problems of interest to the two countries, "especially as regards the Communist danger to their internal and external security." The statement continued: "In their common desire for building a new Asian democracy founded upon respect for human rights and upon the spiritual traditions of Asia, the two Governments decided to co-operate closely in their struggle against subversive activities on their respective territories . . . They also considered the possibility of developing commercial and cultural exchanges between the two countries."

It was decided during the Tengku's stay that Malaya and South Vietnam should establish diplomatic relations in the near future.—(Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - N.Z. Directorate of Information, Wellington - Federal Information Department, Salisbury - Vietnam Press Agency) **(Prev. rep. 15793 A.)**

A. NETHERLANDS. — Provincial Elections.

Elections for the 11 Provincial Assemblies (*Provinciale Staten*) took place on March 25 and resulted in (*a*) considerable gains for the Liberal Party (the League of Freedom and Democracy); and (*b*) the regaining by the Catholic People's Party of the leading position which it lost to the Labour Party in the 1956 general elections. The total number of seats won by the various parties is shown in the following table, comparison being given with the last (1954) provincial elections:

	1958	1954
Labour Party	178	180
Catholic People's Party	190	186
*Anti-Revolutionary Party	63	69
Liberals	63	50
*Christian Historical Union	59	64
Communists	18	24
*Political Reform Party	11	11
Reformed Protestants	2	2
Other parties	6	4
	590	590

*Protestant parties of Conservative tendency.

Voting figures were as follows, the figures in the 1954 provincial elections and the 1956 general elections being shown for comparison:

	Prov. Assemblies 1958	Lower Chamber 1956	Prov. Assemblies 1954
Labour	1,654,281	1,869,270	1,566,667
Catholic	1,899,058	1,812,685	1,680,527
Anti-Revolutionary	544,243	565,471	569,363
Liberals	658,362	501,739	467,622
Christian Historicals	520,165	481,396	514,561
Communists	239,102	271,908	283,486
Political Reform	129,106	129,265	116,243
Reformed Protestants	43,512	37,040	38,127
Other parties	86,495	48,450	92,382

The provincial elections are of national importance because the Provincial Assemblies elect the members of the Upper Chamber of the States-General.—(Netherlands News Agency) **(Prev. rep. 14936 E.)**

B. CEYLON. — New Leader of United National Party.

Sir John Kotelawala (61), the former Prime Minister of Ceylon, announced on March 30 his resignation from the leadership of the United National Party, which he helped to form in 1948 and which was defeated at the last (1956) general elections. He was succeeded in the party leadership by Mr. Dudley Senanayake, from whom Sir John took over the Premiership in 1953. Although Mr. Senanayake had withdrawn from the U.N.P. and from political life prior to the 1956 elections, he has now agreed to re-enter active politics. (Ceylon Government Information Department)

(Prev. rep. 14849 A; 14735 C.)

C. INDONESIA. — K.P.M. Fleet returned to Dutch Control. - Soviet Ships transferred to Indonesia.

The Indonesian Minister of Shipping, Commodore Nazir, announced on March 21 that the Indonesian Government had decided to return to the *Koninklijke Pakketvaart Maatschappij* (K.P.M.) the 34 ships which had been seized on Dec. 6, 1957, as part of the Indonesian measures against Netherlands property; most of these vessels had been tied up in various Indonesian harbours, but four had been recaptured by Dutch warships shortly before Commodore Nazir's announcement. Commodore Nazir added that the K.P.M. ships were "no longer needed" and that there would be "no more room for K.P.M. activities in Indonesia."

Explaining his Government's decision, Commodore Nazir said that if Indonesia continued to detain the vessels after four months, Lloyds of London would have had to pay the K.P.M. between £7,000,000 and £12,000,000 as insurance money, and the ships would then have become automatically the property of Lloyds. The decision to hand back the vessels, however, would not free the company from liability for "violation of Indonesian shipping laws." The Minister also claimed that the K.P.M. owed the Indonesian Government £1,600,000 for Government advances of salaries and wages to K.P.M. staff since the vessels came under Indonesian State control, and was owing still more as "compensation for damages incurred by the Indonesian economy because the company stopped its operations abruptly."

The four K.P.M. ships which had been recaptured by the Netherlands Navy were (*a*) the *Kasimbar*—seized by the Dutch destroyer *Drenthe* on Feb. 20 in the Macassar Straits (between Borneo and Celebes) and taken to Dutch New Guinea with her Indonesian crew; and (*b*) the *Swartenhondt* (4,900 tons), the *Banjoewangi* (1,300 tons), and the *Kalabahi* (2,200 tons), which had been intercepted in March by the *Drenthe* and the frigate *Evertsen* off Celebes. It was stated in The Hague on March 13 that the *Swartenhondt*, *Kalabahi* and *Banjoewangi*, carrying 113 Dutch and 218 foreign nationals from Menado, had been intercepted and escorted to New Guinea at the request of their Dutch captains, who had asked for protection.

The Netherlands Foreign Ministry announced on March 4 that it had protested to the Indonesian Government on Feb. 28 against the "unlawful use" of the *Kasimbar*, which, when stopped by the *Drenthe*, had been flying the Dutch flag and was carrying her Dutch certificate of registry, although there were no Dutch officers on board. The Note also protested at the refusal of the Indonesian captain of the *Kasimbar* to stop when called upon to do so, and at the fact that Indonesian soldiers on board had opened machine-gun fire on the *Drenthe* after the latter had fired a warning shot across the *Kasimbar's* bows.

An Indonesian counter-protest against the detention of the *Kasimbar* and her crew was sent to the Netherlands Government on March 6. The Note claimed that the Indonesian Government's use of the vessel had been authorized by an Ordinance under which the Government could appoint officials to supervise the K.P.M. company. It described the seizure of the ship as a "violation of the rights of free shipping in peace-time"; demanded the return of the ship and its crew, armed guard, and cargo; and claimed compensation for the damage and losses incurred.

Ten Russian freighters, each of about 1,900 tons, arrived at Tanjong Priok (the harbour of Jakarta) on March 17 and were handed over to the Indonesian Government on March 23 under the Soviet-Indonesian economic co-operation and credit agreement. It was stated in Jakarta that since the crisis in Indonesian-Dutch relations the Indonesian Government had tried to obtain ships for the maintenance of inter-island shipping after the taking-over and immobilization of the K.P.M. vessels, but that negotiations with the Japanese Shipowners' Association for the chartering of Japanese ships had broken down. Commodore Nazir had previously announced on Jan. 3 that six foreign shipping enterprises had been given permission to operate inter-island services—the West German *Hapag* Line, the Japanese *Tokio Senpaku*, the British Blue Funnel Line, the U.S. Isthmian Line, and the Polish and Yugoslav State Shipping companies.—(Indonesian Embassy Press Office, London - Algemeen Handelsblad, Amsterdam - Netherlands News Agency - Soviet Embassy Press Department, London) **(Prev. rep. Seizure of K.P.M. Ships, 15931 A; Soviet-Indonesian Aid Agreement, 16022 A.)**

D. POLAND - SOVIET UNION. — Soviet Aid for Polish Atomic Energy Development.

An agreement on Soviet technical aid to Poland in the peaceful uses of atomic energy was signed in Moscow on Jan. 22. Under its terms the Soviet Union will assist Poland in designing and building her second experimental reactor and her first atomic power station, as well as in the prospecting, mining, and processing of uranium, while Polish specialists will be given industrial and technical training in the U.S.S.R.

(Polish Embassy Press Office, London)

A. SPORT. — Review of Sporting Events in 1957.

A review of the principal sporting events during 1957 is given below, covering cricket, association and rugby football, lawn tennis, rowing, and horse-racing.

Cricket.

County Championship. Surrey won the County Championship for the sixth successive year, with a total of 312 points. Northamptonshire were runners-up with 218 points, and Yorkshire third with 190 points.

England v. West Indies Test Matches. The West Indies touring team visited England in the summer of 1957 and played five test matches, of which three were won by England and two were drawn. Results of the Tests were as follows ·

First Test—Match drawn. England 186 (S. Ramadhin 7-49) and 583 for 4 declared (P. B. H. May 285 not out, M. C. Cowdrey 154); West Indies 474 (O. G. Smith 161, C. L. Walcott 90, F. M. Worrell 81) and 72 for 7 wickets (G. A. Lock 3-31). Played at Edgbaston, Birmingham.

Peter May's score of 285 not out in England's second innings was the highest ever made in a Test match between England and the West Indies, and the highest score made by an England captain in any Test match. The second innings stand of 411 by May and Cowdrey was the highest ever made for England, the third highest in Test cricket, and the best made by any country for the fourth wicket.

Second Test—England won by an innings and 36 runs. England 424 (M. C. Cowdrey 152, T. G. Evans 82, P. E Richardson 76); West Indies 127 (T. E. Bailey 7-44) and 261 (F. D. Weekes 90, G Sobers 66, T. E. Bailey 4-54). Played at Lord's.

Third Test—Match drawn. England 619 for 6 declared (T. W. Graveney 258, P. E. Richardson 126, P. B. H. May 104, M. C. Cowdrey 55) and 64 for 1 wicket; West Indies 372 (F. M. Worrell 191 not out, F. Trueman 5-63) and 367 (O. G. Smith 168, J. D. Goddard 61, J. B. Statham 5-113). Played at Trent Bridge, Nottingham.

Fourth Test. England won by an innings and 5 runs. England 279 (P. B. H. May 69, M. C. Cowdrey 68, Rev. David Sheppard 68, F. M. Worrell 7-69); West Indies 142 (P. J. Loader 6-36) and 132 (P. J. Loader 4-50) Played at Headingley, Leeds.

Fifth Test—England won by an innings and 237 runs. England 412 (T. W. Graveney 164, P. E. Richardson 107); West Indies 89 (G. A. Lock 5-28) and 86 (G. A. Lock 6-20). Played at The Oval.

England v. South Africa Test Matches. The M.C.C. touring team visited South Africa during the winter of 1956-57, England and South Africa each winning two Test matches and the fifth being drawn.

First Test—England won by 131 runs. England 268 (P. E. Richardson 117, M. C. Cowdrey 59, N. A. Adcock 4-36) and 150 (N. A. Adcock 3-33, P. Heine 3-41, H. J. Tayfield 3-40), South Africa 215 (T. E. Bailey 3-33) and 72 (T. E. Bailey 5-20). Played at Johannesburg.

Second Test—England won by 312 runs. England 369 (M. C. Cowdrey 101, T. G. Evans 62, D. Compton 58, H. J. Tayfield 5-130) and 220 for 6 declared (D. Compton 64, M. C. Cowdrey 61); South Africa 205 (J. H. Wardle 5-53) and 72 (J. H. Wardle 7-36). Played at Cape Town.

Third Test—Match drawn. England 218 (T. E. Bailey 80, P. E. Richardson 68, N. A. Adcock 4-39) and 254 (D. J. Insole 110 not out, H. J. Tayfield 8-69); South Africa 283 (R. A. McLean 100, T. L. Goddard 69, J. H. Wardle 5-61) and 142 for 6 wickets. Played at Durban.

Fourth Test—South Africa won by 17 runs. South Africa 340 (R. A. McLean 93, T. L. Goddard 67, J. H. B. Waite 61) and 142; England 251 (P. B. H. May 61, H. J. Tayfield 4-79) and 214 (D. J. Insole 68, M. C. Cowdrey 55, H. J. Tayfield 9-113). Played at Johannesburg.

Fifth Test—South Africa won by 58 runs. South Africa 164 (W. R. Endean 70, T. E. Bailey 3-23, P. J. Loader 3-35) and 134 (F. Tyson 6-40); England 110 (N. A. Adcock 4-20, P. Heine 4-22) and 130 (H. J. Tayfield 6-78). Played at Port Elizabeth.

University Match. Cambridge beat Oxford at Lord's by an innings and 186 runs, the biggest victory ever achieved by Cambridge in a University match. Scores—Cambridge 424 for 7 declared (G. Goonesena 211, G. W. Cook 111 not out); Oxford 92 (O. S. Wheatley 5-15) and 146 (I. M. Gibson 63, G. Goonesena 4-40, B. T. Smith 4-42).

The 211 runs scored by Gamini Goonesena (Cambridge's Ceylonese captain) was the highest individual innings by a Light Blue in the 113 years of the University match; it has been exceeded in the series only by the Nawab of Pataudi's 283 not out for Oxford in 1931.

Revision of Laws of Cricket. Important changes in the laws of first-class (i.e. county) cricket were proposed on Feb. 25, 1957, in the report of a committee which had been appointed by the M.C.C. during the previous autumn, under the chairmanship of Mr. H. S. Altham. The committee was set up to inquire into the future of first-class cricket and to make any necessary recommendations for making the game more interesting and attractive to the spectator. Its principal recommendations were :

(1) On-side fielders to be limited to five, with not more than two behind the wicket.

(2) The number of overs in the first innings of each team to be limited to 85.

(3) Umpires to exercise firmer control with a view to eliminating time-wasting (e.g. dilatoriness by bowlers in running up to the crease).

(4) Boundaries to be limited to a maximum of 75 yards in any direction (designed to encourage more attractive stroke play).

(5) Overseas players in any county team to be restricted to two (designed to halt the "import" of overseas players).

(6) A knock-out competition to be held on an experimental basis during the next two seasons.

The M.C.C.'s Advisory Cricket Committee decided on March 27 to accept recommendations (1), (3), (4), and (5), but not (2) and (6). As an alternative to the second recommendation (to limit the number of overs in a first innings to 85), it was agreed to institute a system of bonus points for fast scoring in the first innings of championship games. The sixth recommendation (for a knock-out competition) was deferred for further consideration

The decisions of the Advisory Cricket Committee were formally approved by the M.C.C. on April 4, 1957, and took effect in the 1957 season. The reforms applied to first-class cricket only.

Association Football.

Football League. League champions—Manchester United (for the second successive year); runners-up—Tottenham Hotspur; promoted to Division I—Leicester City and Nottingham Forest; promoted to Division II—Derby County (from Div. III North) and Ipswich Town (from Div. III South); relegated to Division II—Cardiff City and Charlton Athletic; relegated to Division III—Bury and Port Vale.

Scottish League. League champions—Glasgow Rangers; runners-up—Heart of Midlothian; promoted to Division I—Clyde and Third Lanark, relegated to Division II—Ayr United and Dumfermline Athletic.

International Championship. The International Championship for 1956-57 was won by England, the final table being :

	P.	W.	D.	L.	Goals F	Goals A.	Pts.
England .. .	3	2	1	0	6	4	5
Scotland . .	3	1	1	1	4	4	3
Wales	3	0	2	1	3	5	2
Ireland . ..	3	0	2	1	1	2	2

Results of championship matches were as follows :

Ireland 1 England 1 (Belfast)
Wales 2 Scotland 2 (Cardiff)
Scotland 1 Ireland 0 (Hampden Park, Glasgow)
England 3 Wales 1 (Wembley)
England 2 Scotland 1 (Wembley)
Ireland 0 Wales 0 (Belfast)

F.A. Cup. Won by Aston Villa, who beat Manchester United 2-1 at Wembley on May 4, 1957 Aston Villa created a new record by winning the trophy for the seventh time, their previous successes being in 1920, 1913, 1905, 1897, 1895 and 1887. Blackburn Rovers and Newcastle United have each won the Cup six times.

F.A. Amateur Cup. Won by Bishop Auckland, who beat Wycombe Wanderers 3-1 at Wembley on April 13, 1957. Bishop Auckland won the Amateur Cup for the third successive season (a record for the competition) and for the tenth time in the club's history.

Scottish Cup. Won by Falkirk, who beat Kilmarnock 2-1 at Hampden Park on April 24, 1957, after a 1-1 draw. Falkirk last won the Scottish Cup in 1913, on their only previous appearance in the final.

European Cup. A new international competition, the European Cup, was inaugurated in 1956; the idea for such a competition was first suggested by the French sporting paper *L'Equipe*, and adopted by the European Football Union. The competition is confined to the league champions of each European country, with the addition of the team winning the cup in the previous season. Games are played on a knock-out home-and-away basis and decided by goal aggregate; should a third match be necessary as a decider, it is played in a neutral country.

The European Cup was won by the Spanish champions, Real (Royal) Madrid both in 1956 and 1957. In the latter year the final was played between Real Madrid and Fiorentina (the Italian champions), the Spanish team winning 2-0. The champion clubs of 21 European countries competed in 1957—those of Austria, Belgium, Bulgaria, Czechoslovakia, Denmark, England (Manchester United), France, Western Germany, Hungary, Italy, Luxemburg, the Netherlands, Poland, Portugal, Rumania, Scotland (Glasgow Rangers), Spain, Sweden, Switzerland, Turkey and Yugoslavia.

Rugby Union Football.

International Championship. England won the International Championship for 1956-57, the final table being :

	P.	W.	D.	L.	Points F.	Points A.	Pts.
England . .	4	4	0	0	34	8	8
Ireland . ..	4	2	0	2	21	21	4
Scotland . .	4	2	0	2	21	27	4
Wales .. .	4	2	0	2	31	30	4
France	4	0	0	4	24	45	0

Results of the championship matches were as follows :

France nil, Scotland 6 points (Paris)
Wales nil, England 3 points (Cardiff)
Ireland 11 points, France 6 points (Dublin)
Scotland 9 points, Wales 6 points (Edinburgh)
Ireland nil, England 6 points (Dublin)
Scotland 3 points, Ireland 5 points (Edinburgh)
England 9 points, France 5 points (Twickenham)
Wales 6 points, Ireland 5 points (Cardiff)
England 16 points, Scotland 3 points (Twickenham)
France 13 points, Wales 19 points (Paris)

County Championship. Devon won the County Championship for the first time for 45 years, beating Yorkshire by 12 points to 3 points at Plymouth on March 9, 1957.

University Match. Cambridge beat Oxford by 14 points to 9 points at Twickenham on Dec. 12, 1956.

Lawn Tennis.

Wimbledon Championships. The winners of the Wimbledon Championships in 1957 were as follows :

Men's Singles—L. A. Hoad (Australia) beat A. J. Cooper (Australia) 6-2, 6-1, 6-2.

Women's Singles—Miss Althea Gibson (U.S.A.) beat Miss Darlene Hard (U.S.A.) 6-3, 6-2.

Men's Doubles—G. Mulloy and B. Patty (U.S.A.) beat N. A. Fraser and L. A. Hoad (Australia) 8-10, 6-4, 6-4, 6-4.

Women's Singles—Miss A. Gibson and Miss D. Hard (U.S.A.) beat Mrs. K. Hawton and Mrs T. D. Long (Australia) 6-1, 6-2.

Mixed Doubles—M. G. Rose (Australia) and Miss D. Hard (U.S.A.) beat N. A. Fraser (Australia) and Miss A. Gibson (U.S A.) 6-4, 7-5.

L. A. Hoad won the men's singles for the second year in succession; he turned professional after the tournament. Miss Althea Gibson was the first coloured player to win the women's singles.

Davis Cup. In the challenge round of the Davis Cup, played at Adelaide on Dec. 26-29, 1957, Australia beat the United States by three matches to two and thus retained the trophy. Australia and the U.S.A. have appeared in the challenge round for 14 successive years.

Rowing.

Henley Royal Regatta. The winners of the various trophies in the 1957 Royal Regatta were :

Grand Challenge Cup—Cornell University (U S.A.) beat Yale University (U.S A.) by half a length in 6 min. 53 sec.

Ladies' Plate—Pembroke College, Cambridge, beat Christ Church, Oxford, by one length in 7 min 11 sec.

Princess Elizabeth Cup—St. Paul's School beat Shrewsbury School by 1½ lengths in 7 min. 19 sec.

Thames Cup—Princeton University (U.S.A.) beat National Provincial Bank by one length in 7 min. 8 sec.

Stewards' Cup—Krylia Sovietov (U.S.S.R.) beat London R.C. easily in 7 min. 35 sec.

Visitors' Cup—Pembroke College, Cambridge, beat Christ Church, Oxford, by 2 lengths in 7 min. 33 sec.

Wyfold Cup—National Provincial Bank beat Putney Town R.C. by 3 lengths in 7 min 49 sec.

Silver Goblets—D. A. T. Leadley and C. G. V. Davidge (Leander) beat J. Kloimstein and A. Sageder (Austria) by one-third of a length in 8 min. 17 sec.

Double Sculls—A. Berkutov and Y. Tukalov (U.S.S.R.) beat G. W. Baker and M. A. Spracklen (Marlow and R.A.F.) easily in 7 min. 41 sec.

Diamond Sculls—S. Mackenzie (Australia) beat V. Ivanov (U.S.S.R.) by 4 feet in 8 min. 25 sec.

University Boat Race. In the 103rd University Boat Race, rowed on March 30, 1957. Cambridge beat Oxford by two lengths with a time of 19 min. 1 second. Cambridge have won 57 boat races and Oxford 45, with one dead-heat.

Horse Racing.

The results of the five " classic " races and the Grand National in 1957 were as follows :

The Derby. Sir Victor Sassoon's *Crepello* (L. Piggott) beat *Ballymoss* by 1½ lengths, with *Pipe of Peace* third. Run at Epsom on June 5.

The Oaks. H.M. The Queen's *Carrozza* (L. Piggott) beat *Stilken Glider* by a short head, with *Rose Royale II* third. Run at Epsom on June 7. This was the first success of one of Her Majesty's horses in a " classic " race.

St. Leger. Mr. J. McShain's *Ballymoss* (T. P. Burns) beat *Court Harwell* by a length, with *Brioche* third. Run at Doncaster on Sept. 11. Mr. McShain, an American, is the builder of the Pentagon in Washington.

2,000 Guineas. Sir Victor Sassoon's *Crepello* (L. Piggott) beat *Quorum* by half a length, with *Pipe of Peace* third. Run at Newmarket on May 1.

1,000 Guineas. The Aga Khan's *Rose Royale II* (C. Smirke) beat *Sensualita* by a length, with *Angelel* third. Run at Newmarket on May 3.

Grand National. Mr. and Mrs. Geoffrey Kohn's *Sundew* (F. Winter) beat *Wyndburgh* by eight lengths, with *Tiberetta* third. Run at Aintree on March 29.

(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times) **(Prev. rep. 15278 A ; 15298 B.)**

A. LEBANON. — New Government.

A new and expanded Lebanese Government was formed on March 14 by M. Sami Solh, who had formally tendered his resignation two days earlier, and who had been asked by President Chamoun to form a new administration. The new Government—the ninth headed by M. Solh—had 14 Ministers compared with eight in the previous Cabinet, its membership being as follows :

M. Sami Sohl—Prime Minister and Interior ; Dr Charles Malik—Foreign Affairs ; M Khalil Hibri—Public Works ; M. Farid Kozma—Information ; M. Pierre Eddé—Finance ; M. Clovis Khazen—Education ; M. Bashir Osman—Posts and Telegraphs ; Dr. Albert Moukheiber—Health ; Emir Majid Arslan—Agriculture ; M. Bashir Awar—Justice ; M. Joseph Skaff—Social Affairs ; M. Rashid Beydoun—Defence ; M. Kazem Khalil—Economy ; and M. Joseph Shader—Planning.

The Cabinet included six of the former Ministers (among them Dr. Malik, the Foreign Minister) and eight new members, several of whom took office for the first time. Two Ministers of the former Cabinet were dropped—M. Jamil Mekkaoui (Finance) and M. Selim Lahoud (Public Works).

The new administration represented all parties and groups supporting the Government, and all the country's religious denominations. By religious affiliation, it comprised three Sunni Moslems (M. Sami Solh, M. Hibri and M. Osman), three Maronites (M. Cosma, M. Eddé and M. Khazen), two Greek Orthodox members (Dr. Malik and Dr. Moukheiber), two Druses (Emir Arslan and M. Awar), two Shia Moslems (M. Beydoun and M. Khalil), a Greek Catholic (M. Skaff, and an Armenian Catholic (M. Shader).

Prior to M. Solh's resignation—tendered on the ground of " political incompatibility " within the former Cabinet—certain Ministers were understood to have been critical of the Government's pro-Western policy and to have urged closer collaboration with the United Arab Republic. The governmental reorganization was regarded by foreign correspondents as indicative of M. Solh's determination to resist Egyptian-Syrian pressure on the Lebanon to join the U.A.R., and to maintain the pro-Western policy pursued hitherto. Dr. Malik's reappointment to the Foreign Ministry was regarded as particularly significant in this respect, since he had consistently pursued a pro-Western policy and had supported the " Eisenhower doctrine " for the Middle East—to which the Lebanon is the only Arab country to give official support. Opponents of the Government, on the other hand, alleged that the real purpose of the reorganization was to enable it to amend the Constitution so that President Chamoun could stand for re-election next September, which he is at present prevented from doing.

Demonstrations in support of President Nasser and the United Arab Republic, some of considerable size, occurred in Beirut and other centres both before and after the governmental reorganization, leading to several clashes between the police and demonstrators. The most serious incident occurred on April 2, when two people were killed and 10 injured at Tyre during protest demonstrations against sentences of three years' imprisonment imposed on persons charged with tearing down the Lebanese flag during rallies in support of the United Arab Republic.

In a statement to the Chamber of Deputies on March 26, M. Sami Solh reaffirmed that the new Government would " not establish any relation or enter into any agreement with any State or group of States that would limit our independence, sovereignty, and freedom." He added that " Lebanon will remain a sovereign, independent, free and peaceful State and is determined not to permit any foreign interference in her internal affairs, no matter from what source the interference may come." The Prime Minister's declaration was regarded as an answer to Arab nationalists among the Opposition who had complained of the Government's " lukewarmness " towards the United Arab Republic, and also as a reply to the demonstrators who had acclaimed President Nasser in Beirut, Tripoli, and other centres.

The new Government was given a vote of confidence on March 27, by 88 votes to 15, after a debate marked by Opposition criticisms of Dr. Malik on the ground that he was allegedly pursuing an independent foreign policy and " imposing his will " on the Government. The two Ministers dropped from the former Cabinet, M. Mekkaoui and M. Lahould, were among the critics of the Foreign Minister.—(Times - Le Monde)

B. UNITED ARAB REPUBLIC. — New Flag.

Under a decree issued by President Nasser, a new flag was introduced on April 10 for the United Arab Republic consisting of three horizontal stripes of black, white and red, with two green stars on the white stripe.—(Daily Telegraph)

(Prev. rep. 16095 A.)

A. UNITED KINGDOM. — Lord Wheatley's Ruling on Artificial Insemination as Ground for Divorce. - Archbishop of Canterbury's Denunciation of A.I.D. - House of Lords Debate. - Government to appoint Departmental Committee on Artificial Insemination.

Widespread controversy was aroused by a ruling given by Lord Wheatley, a Judge of the Court of Session in Edinburgh, on Jan. 10 that artificial insemination by a donor (A.I.D.), although "a grave and heinous offence of contract of marriage," did not come within the definition of sexual intercourse as understood by Scots law, and therefore was "not adultery as the law interprets that term."

Lord Wheatley's ruling arose from a divorce case in which the wife claimed that her child, born when she had been separated from her husband for over a year, had been conceived as a result of A.I.D. The judge adjourned the case in order that she might supply the necessary details; as she refused to do so, he pronounced her defence irrelevant on the ground of lack of specification, and granted the husband a decree of divorce.

In his presidential address to the Convocation of Canterbury on Jan. 14, the Archbishop of Canterbury (Dr. Fisher) condemned A.I.D. as "an offence against the social and legal implications of marriage." He advocated that either it should be made a criminal offence or that the law should require every case to be registered.

Referring to Lord Wheatley's ruling, the Archbishop said: "If many people get confused over the difference between crime and sin, I doubt not that some will get confused by this judgment. They know that the Church says that adultery is a sin; they read that A.I.D. is not adultery, and some of them will get a quite illogical impression that if A.I.D. is not adultery, then it cannot be a sin either . . . Whether A.I.D. should be regarded by law as adultery for legal purposes is a matter for lawyers. Whether it is against the interests of social or personal morality, whether or no it is a sin, is a matter of great Christian concern."

Dr. Fisher recalled that in 1946 he had appointed a commission of eminent Church doctors, lawyers, and theologians to consider the subject, under the chairmanship of Dr. Wand, then Bishop of London. In its report, published in 1948, the commission had stated, with one dissentient, that "A.I.D. involves a breach of the marriage. It violates the exclusive union set up between husband and wife. It defrauds the child begotten, and deceives both his putative kinsmen and society at large For both donor and recipient the sexual act loses its personal character and becomes a mere transaction. For the child there must always be the risk of disclosure, deliberate or unintended, of the circumstances of his conception. We therefore judge A I.D to be wrong in principle and contrary to Christian standards" The commission had also declared that "the evils necessarily involved in A.I.D. are so grave that early consideration should be given to the framing of legislation to make the practice a criminal offence."

"An honest and moving case can be made out for A.I.D. on compassionate grounds," Dr. Fisher continued. "But it cannot be treated as a private matter only. It is an offence against the social and legal implications of marriage, and the fact that the offence takes place under conditions of secrecy makes it the more dangerous . . . It is impossible to tell how many cases there are. I have seen it stated that there are only some four or five specialists to cater for the whole country: the doctor in a television interview said that she acts in 50 to 60 cases a year, two-thirds of which produce A.I.D. children.

"But the evil of A.I.D. children does not rest on numbers. The institution of marriage is meant among other things to give to children the security of knowing who their parents are, and to give society the same security. By the device of A.I.D. that security is destroyed at the roots The truth must never be told to the child. The child is to be a lifelong victim of a deception; society is to be deceived also; and the family, mother, foster-father, and child exist in a relationship which is not that of nature, nor of open adoption, but one of secret make-believe It is hard to believe that the decision on so profound a matter of social, domestic, and moral welfare should be left entirely in the hands of a medical practitioner.

"It is difficult also to suppose that the law can allow the standing and integrity of the family and the parentage of children to rest upon a deliberate deception, deliberately concealed. Either parentage by A.I.D. should be made a criminal offence altogether, as the commission recommended, or if that cannot be, then the law should require that every case of A.I.D. be registered: and the register should be available for inspection under safeguards. In such a register should be recorded the name of the donor provided by the doctor.

"Indeed the donor's share in this business is the most secret, the most responsible, and the most hard to justify, since he begets children whom he will never be able to see or know, and for whose temporal and spiritual welfare he can never bear any personal responsibility. If that is not adultery on his part it is something far less responsible and far less human than adultery. For these and other reasons it would seem that legislation of some kind is urgently needed to resolve doubts and to preserve under control the integrity of marriage and of the family."

A debate on the subject was initiated in the House of Lords on Feb. 26 by Lord Blackford, who moved: "That in the opinion of this House, artificial insemination of a married woman by a donor other than her husband is tantamount to adultery, that it should be sufficient ground for divorce, and that all children so conceived are illegitimate." In reply to the debate, the Lord Chancellor (Viscount Kilmuir) announced that the Government had decided to appoint a committee to inquire into the subject and make recommendations.

Lord Blackford stated that although the celebrated surgeon John Hunter had produced a baby by A.I.D. in 1790, as a recognized branch of the medical profession the method was hardly 20 years old in Britain. A group of scientists and doctors had been formed in 1938 to experiment in this field, but had broken up after 10 years because it came to the conclusion that the results were bad from the child's viewpoint. He estimated the number of children in the country conceived in this way at 7,500, of whom only 500 had been born before 1947.

It would be idle to argue that A.I.D. was adultery, and that was why his resolution said "tantamount to adultery." If it were performed without the husband's consent he should be entitled to relief by divorce if he wished it, and the law should be amended to that effect. Contending that a child so conceived was illegitimate, Lord Blackford maintained that it appeared to be legitimate only because the husband and wife had conspired to conceal the truth about its birth, and had committed perjury when they signed the birth certificate putting down the husband as the child's father.

There were four reasons, he continued, why a husband might consent to A.I.D The chief reason, which applied to 80 per cent, was to satisfy a childless wife's craving for maternity—a reason with which they all sympathized. The second was the wish of both husband and wife to have a child which was at least 50 per cent theirs, and to have the interest of bringing it up, rather than one which was adopted. The third was the husband's fear that unless he consented to such a practice his wife might run away to another man. The fourth was the desire to get a spurious heir to a title, or to the life tenancy of an entailed estate or a trust fund. All four reasons had one common characteristic: they were all selfish reasons, which gratified the desires of the husband and wife and took no account of the action's effect on the community, on the family unit, and above all on the child.

His most serious doubt was whether the secret would be kept. Everyone knew how difficult it was to keep secrets, and how inquisitive young people were. The effect on a child of 14, 15, or 16 of getting to know that he was a "test-tube baby" would be psychologically disastrous.

Rejecting the view that A.I.D. should be made a criminal offence, Lord Blackford said that adultery was a sin but not a criminal offence, and if A.I.D. was tantamount to adultery it could not be worse. Nor did he think it a sin if it was performed with the husband's consent, but merely an undesirable practice. He was against any system of registration, but favoured the licensing of a limited number of practitioners to carry out this operation, which might lessen the increase now going on

The **Archbishop of York** (Dr. Ramsey) said that as one who held A.I.D. to be thoroughly wrong, he recognized that "high motives of doing good to unhappy people are often very conspicuous, and among doctors who practise A.I.D. ethical distinctions are shown to be clearly present about when it is and when it is not right for A.I.D. to be given." He did not think it would be wise to make it a criminal offence, but he was convinced of the need to eliminate any idea that "A.I.D. can somehow be made to lie within the marriage bond." If there were divorce laws, A.I.D. should be a ground for divorce as adultery was. The matter was urgent, because there was an idea abroad that A.I.D. could be brought within the terms of a decent fulfilment of the marriage contract. For the sake of public opinion, the divorce laws should recognize that "this intrusion of the seed of a third is as contrary to the proper meaning of the marriage bond as the intrusion of the illicit affection or body of a third."

Lord Denning (a Lord of Appeal) expressed the opinion that if A.I.D. was done without concealment there was no law against it, but if it was accompanied by secrecy and deception it was a criminal conspiracy, and the child so produced was illegitimate. To prove a child legitimate it must be shown to be the offspring of both husband and wife in lawful wedlock Once it was established that the husband was not the father, then the child was illegitimate.

From that a whole train of consequences followed in law. If the wife and doctor agreed to keep secret the child's illegitimacy, they were guilty of conspiracy. If they did it without the husband's knowledge or consent it was a gross fraud on him, since he was made liable to maintain a child which was not his. Even if he knew and consented, it was a potential fraud on others—e.g. if the grandfather left his money to his son and his son's children, or if there was a trust for the couple and their children. As the law stood the child, being illegitimate, should not receive it, but if the deception were successful he would.

If the husband died intestate, by law his property went to his wife for life, and after to his children. This child was not in law entitled to it, but by this deception it would receive the property. When it came to a false statement in the Register of Births there was an additional crime of perjury. The whole essence of the agreement between the doctor and the donor was that it should be secret, so that the donor could evade his legal responsibilities. The consequence was that he was exempt from maintenance or responsibility for his own child.

Lord Pakenham recalled that artificial insemination had been condemned 60 years ago in a Papal pronouncement. The social consequences of A.I.D. could be so damaging that the Government could reasonably be asked to bring it within the orbit of the criminal law. By some sort of registration some of the worst consequences could be averted, but it was difficult to recognize such a practice for the purpose of regulation without appearing to give it some kind of official condonation.

Lord Amulree (a doctor) suggested that the estimate of 7,000 A.I.D. children might be "on the big side." One practitioner had seen 2,500 barren couples in 25 years, only 200 of these were considered suitable for attempting A.I.D., and about half these cases were successful. His information suggested that marriages were consolidated rather than broken by A.I.D., and if it were made a crime it would be driven underground, to be performed by "charlatans and crooks."

The Bishop of Norwich (Dr. Herbert), advocating that A.I.D. should be declared illegal, questioned whether it was possible to secure complete secrecy. Was it not possible that one day some member of the House might discover that, because he was not the son of his reputed father, he had no right to his title and estates?

The Marquess of Reading, who asked for an inquiry by a departmental committee, said that they should not commit themselves to dealing with this problem until they were better informed.

Lord Brabazon of Tara contended that in the case of a couple who could not have a child because of the father's inability, it was better for the husband to have a child which was at least his wife's rather than to adopt one.

Lord Chorley maintained that A.I.D. could do much to relieve suffering, misery, and frustration, and to that extent should be encouraged and made more readily available rather than proscribed. To make it illegal would strike at the liberty of the citizen. The doctors engaged on this work did so under a high sense of the responsibility they were taking upon themselves, whereas the course advocated by the bishops would drive their patients into the clutches of charlatans, who instead of securing good donors would bring any sort of person into it. This would result in many cases in a progeny poor both morally and genetically instead of a high-class progeny. The argument that adoption was preferable to A.I.D. did not stand up to examination. An adopted child was generally the fruit of some passing and often sordid sexual relationship, but an A.I.D. offspring was likely to be a sound and healthy human being.

Lord Merriman (the president of the Probate, Divorce and Admiralty Division) agreed that A.I.D. without the husband's consent should be a ground for divorce, and suggested that registration of the full facts, with the name of the donor, should be made compulsory. On good cause being shown, a Judge of the High Court should be empowered to allow discreet access to the register.

The **Bishop of Exeter** (Dr. Mortimer) said that although, as a member of the Archbishop's Commission, he had signed their report in 1948 recommending that A.I.D. should be a criminal offence, he would not sign it today. Such a step would drive the conduct of this practice from the responsible hands in which it now rested to totally irresponsible—possibly even disreputable—hands, as happened in the case of abortion. Moreover, it might open the door to "a fiendish type of blackmail." It would be far better to institute a system of regulation and control, only selected doctors enrolled on a panel by a competent medical authority being allowed to practise. Anyone else doing so should be guilty of a criminal offence.

The **Archbishop of Canterbury** said that he hoped the Lord Chancellor would commit the Government to some kind of action. A.I.D. involved falsehood and deception by the husband who falsely claimed the status of a father; by the mother who pretended to bear in wedlock a child born out of wedlock; by the donor who could never know his own child or the mother who bore him, and who could never discharge the responsibilities of fatherhood; and by the doctor who not only connived at a perjured declaration at the birth but made the supposed father and the mother promise to conceal the truth from the child and from society.

There would be great relief throughout the country, Dr. Fisher declared, if people knew that it had been decided by Parliament that this matrimonial offence should be in itself more illegal than it now appeared. The Government should commit itself to either prevention or registration. The whole medical profession would accept what the law decreed as a matter of professional honour. Let it be driven underground, as abortion was, and no reasonable doctor would touch it. He would expect the medical profession to welcome a step which would relieve them of a spiritual, moral, and social responsibility which did not properly belong to them.

Viscount Astor said that although the House was clearly unanimous that A.I.D. without the husband's consent should be a cause for divorce, it would split the country deeply if A.I.D. was to be made a matter of legal crime rather than of personal morals.

The Lord Chancellor, replying to the debate, said that he was impressed by Lord Wheatley's reasoning, and he would certainly not be disposed without more argument to endorse the view of the Archbishop's Commission that A.I.D. at present was adultery either in English or Scottish law. The Government had been impressed by the force of the argument that A.I.D. without the husband's consent should be a ground for divorce. Whether the same result should ensue if the husband consented was a different question.

Before the question of regulation could arise, the Government and Parliament would have to make up their minds whether the practice of A.I.D. was so harmful that it should be suppressed. The Government could not be expected to give a final view on all the questions involved, as the information was by no means sufficient. In view of the many difficult and controversial questions arising, the Government had concluded that the right course was to appoint a small departmental committee to inquire into the matter and make recommendations. A committee had been chosen in preference to a Royal Commission because its procedure would be less cumbersome, and a smaller body would be able to make its recommendations rather more quickly. The precise terms of reference had still to be decided, as he had not wanted to state them before hearing the debate. In his view it would clearly be necessary for the committee to investigate what the existing practice was, and what were and should be its legal consequences.

Lord Blackford's resolution was withdrawn at the end of the debate. (Times - Daily Telegraph - Manchester Guardian)

A. ISRAEL. — Posthumous Exoneration of Dr. Kastner. - Ruling by Supreme Court.

The Supreme Court of Israel issued a ruling on Jan. 15, 1958, clearing the late Dr. Israel (Rudolf) Kastner—formerly leader of the Hungarian Jewish community—of charges of collaboration with the Nazis during the war and indirectly causing the destruction of Hungarian Jewry. In quashing the verdict delivered in 1955 by Dr. Halevi, president of the Jerusalem District Court [see 14308 A], the Supreme Court found that there was no evidence to show that Dr. Kastner had "sold his soul to the devil," as alleged in 1955, nor that he had entered into arrangements with the Nazis whereby his own family and 600 other Hungarian Jews were saved while the greater part of the Hungarian Jewish community were deported to the Auschwitz extermination camp. On the contrary, it was found that Dr. Kastner had done all in his power to prevent the deportations; that he had entered into negotiations with the Germans for this sole purpose; and that, although he had failed in his attempts, he had not aided the deportations in any way. Mr. Malkiel Gruenwald (73), who had originally accused Dr. Kastner of these crimes, was found guilty of libel and given a suspended sentence of a year's imprisonment in view of his age and ill-health.

Three men—Z. Ekstein, J. Menkes and D. Shemer—were sentenced to life imprisonment by a Tel-Aviv court on Jan. 7, 1958, for complicity in the murder of Dr. Kastner in March 1957.—(Israel Government Press Office, Jerusalem)

(Prev. rep. Dr. Kastner, 15462 B; 14308 A.)

B. FRENCH AFRICA. — Population Figures.

The population of the French African territories was given as follows in a statistical bulletin recently issued by the *Ministère de la France d'outre-mer* in Paris: (i) French West Africa (comprising Senegal, Mauritania, French Sudan, French Guinea, Ivory Coast, Dahomey, Upper Volta, and Niger)—18,930,000, including 88,200 of French and foreign origin; (ii) French Equatorial Africa (comprising Gaboon, French Congo, Ubangui-Shari, and Chad)—4,879,000, including 25,200 of French and foreign origin; (iii) Madagascar—4,918,000, including 74,100 of French and foreign origin; (iv) French Cameroons (trust territory)—3,187,000, including 16,000 Europeans; (v) French Togoland (trust territory)—1,085,000, including 1,200 Europeans. The most populous territories were the French Sudan, with 3,708,000 inhabitants (7,400 Europeans), and Upper Volta, with 3,266,000 (3,700 Europeans).

The largest towns in *Afrique Noire* were Dakar (Senegal), with 234,000 inhabitants (34,000 Europeans); Tananarive (Madagascar), with 181,000 (17,800); Abidjan (Ivory Coast), with 125,700 (7,900); Duala (Cameroons), with 119,100 (5,900); Brazzaville (French Congo), with 99,000 (1,600); and Bamako (French Sudan), with 68,600 (3,600).

(Le Monde, Paris)

C. LONDON. — Closing of Mercers' School.

The closing of the 400-year-old Mercers' School, in Holborn, as from the end of the summer term was announced on March 24 by Mr. N. C. Watney, Master of the Mercers' Company. Mr. Watney explained that the school's income was derived solely from fees and from annual grants made by the Mercers' Company; that these sources of income were insufficient to ensure the school's continuation; and that the Ministry of Education had rejected an application for Mercers' to become a direct-grant grammar school, on the ground that the school's buildings "do not measure up to the minimum educational standards."

Mercers', an independent public school, was founded by the Mercers' Company in 1542 during the reign of Henry VIII. The present number of pupils is 280, all day-boys.

(Daily Telegraph)

A. UNITED KINGDOM. — Revenue and Expenditure Returns, 1957-58. - The Floating Debt.

Exchequer returns for the financial year 1957-58, published on April 1, showed an Ordinary Budget surplus (after charging sinking funds of £37,540,573) of £423,002,559 ; this compared with an Ordinary surplus of £289,781,587 in 1956-57 and one of £461,973,000 estimated by Mr. Peter Thorneycroft (then Chancellor of the Exchequer) in his 1957-58 Budget speech, subsequently revised to £316,215,000 as a result of Supplementary Estimates. Net capital expenditure "below the line" (i.e. excluded from the Ordinary Budget) amounted to £634,566,000, as against Mr. Thorneycroft's estimate of £587,000,000. Taking the "above the line" surplus and the "below the line" deficit together, there was therefore an "overall" deficit of £211,563,441, instead of the original estimate of £125,000,000, which was subsequently increased to about £271,000,000 through Supplementary Estimates.

The following table gives the actual returns for the financial year 1957-58, the Budget estimates for that year, and the returns for the financial year 1956-57 :

	Revenue £	Expenditure £
1957-58 Actual*	5,342,584,450	4,919,581,891†
Budget estimate ..	5,288,850,000	4,826,877,000‡
1956-57 Actual§	5,157,812,652	4,868,031,065‖

*Excluding self-balancing revenue and expenditure amounting to £336,090,000, i.e. £335,515,000 for the Post Office and £575,000 for income-tax deducted from post-war refunds of excess profits tax. †Including sinking funds of £37,540,573. ‡This was subsequently increased to £4,972,635,000 by Supplementary Estimates for Supply Services totalling £135,758,000, plus an adjustment of £10,000,000 for net reduction in Civil Supply expenditure provided for in the Budget, making a total increase of £145,758,000. §Excluding self-balancing revenue and expenditure amounting to £304,635,000, i.e. £304,036,000 for the Post Office and £599,000 for income-tax deducted from post-war refunds of excess profits tax. ‖Including sinking funds of £36,984,749.

Details of the various Revenue items were as follows :

Ordinary Revenue	Year ended March 31, 1958 £	Year ended March 31, 1957 £	Increase (+) or Decrease (−) £
Inland Revenue :			
Income Tax	2,208,266,000	2,114,173,000	+ 94,093,000
Surtax	157,400,000	158,000,000	− 600,000
Death Duties ..	170,600,000	169,000,000	+ 1,600,000
Stamps	63,700,000	63,000,000	+ 700,000
Profits Tax, Excess Profits Tax and Profits Levy ..	255,150,000	200,000,000	+ 55,150,000
Other Inland Revenue Duties	550,000	640,000	− 90,000
Customs	1,207,452,000	1,198,882,000	+ 8,570,000
Excise	942,360,000	901,735,000	+ 40,625,000
Motor Vehicle Duties	100,734,000	90,610,000	+ 10,124,000
Post Office (net receipts)	7,785,000	4,464,000	+ 3,321,000
Broadcast Receiving Licences	30,700,000	28,400,000	+ 2,300,000
Receipts from Sundry Loans	32,167,591	32,713,852	− 546,261
Miscellaneous ..	165,719,859	196,194,800	− 30,474,941
Total Ord Revenue	5,342,584,450	5,157,812,652	+184,771,798

Of the Inland Revenue items exceeding the Budget estimates, Income-tax yielded £32,000,000 more, Surtax £8,400,000 more, and Stamps £3,700,000 more. Only slightly larger yields above the estimates were shown by Death Duties (£600,000), Profits Tax, E.P.T. and Excess Profits Levy (£150,000), and other Inland Revenue duties (£50,000). Customs exceeded the estimate by £3,200,000 and Excise by £29,500,000. Of the other items, Motor Vehicle Duties contributed over £7,700,000 more than estimated, but net receipts of the Post Office were £12,115,000 less, Broadcast Receiving Licences £300,000 less, and Miscellaneous revenue £19,280,000 less. Sundry loan receipts were £167,600 above the estimate.

Ordinary Expenditure is shown in the following table :

Ordinary Expenditure :	Year Ending March 31, 1958 £	Year Ending March 31, 1957 £
Interest and Management of National Debt	662,967,836	710,634,000
Sinking Funds	37,540,573	36,984,749
Payments to Northern Ireland Exchequer	71,630,645	66,443,851
Other Consolidated Fund Services ..	9,663,837	9,669,465
Total	781,802,891	823,732,065
Total Supply Services (excluding Self-Balancing)	4,137,779,000	4,044,299,000
Total Ordinary Expenditure ..	4,919,581,891	4,868,031,065

Ordinary expenditure exceeded the Budget estimate by £92,700,000, but was £53,000,000 lower than the revised estimate. Interest on and management of the National Debt took £23,000,000 more than estimated, reflecting the rise in the Bank Rate to 7 per cent. Supply Services cost nearly £68,000,000 more than estimated in the Budget, but were nearly £78,000,000 less than the revised estimate.

The increase of £48,000,000 in net expenditure "below the line" (i.e. capital expenditure) as compared with the Budget estimate was largely due to net advances to the National Coal Board for capital expenditure being over £36,000,000 higher than originally provided, whilst £16,000,000 more had to be advanced to British Railways to meet its current deficit, and £12,000,000 net to the Sugar Board. Nearly £12,000,000 less, however, was spent on Colonial Development loans.

New loans to the National Coal Board amounted to £81,381,000 (against an estimated £45,000,000). Loans to other nationalized industries were £295,000,000 (against £290,000,000 estimated), whilst repayments from these industries amounted to only £12,975,000 (against £14,000,000 estimated), and loans to British Railways were £66,327,000 (against £50,000,000 estimated). On the other hand, loans to Local Authorities were only £92,050,000, against £100,000,000 estimated ; loans for New Towns (at £28,669,000) were over £4,000,000 less than the estimate (£33,000,000) ; and Town and Country Planning compensation (£1,605,000) was nearly £400,000 less than the estimate (£2,000,000). Expenditure on Colonial Development loans at £3,070,000 was considerably lower than the estimate of £15,000,000. Loans to the Potato Marketing Board took £11,125,000 (£6,000,000 estimated) ; loans to the Sugar Board, £12,045,000 (nil) ; net advances to the Raw Cotton Commission were £579,000 (nil) ; and payments for the Development of Inventions totalled £65,000 (nil). There were no loans to the Film Corporation or the Independent Television Authority (£1,000,000 had been estimated for each), nor any loans to the Northern Ireland Exchequer (£3,000,000 estimated). Post Office capital expenditure took £78,900,000, against an estimated £75,000,000 ; Export Credits £7,008,000 (£7,000,000) ; Post-war Credits £17,499,000 (£17,000,000) ; Excess Profits Tax Refunds £703,000 (nil) ; and War Damage payments £22,040,000 (£22,000,000). Against estimates of £6,000,000 each, Scottish Special Housing accounted for only £5,315,000 and Armed Forces Housing for £2,780,000.

Interest receipts outside the Budget amounted to £169,401,000 (estimate £175,000,000), the same as payments. Amongst other receipts, in addition to those from other nationalized industries (£12,975,000), were repayments from Local Authorities of £47,497,000 ; under Town and Country Planning Acts of £4,183,000 ; from New Towns Development £730,000 ; under Export Guarantees £3,572,000 ; from the Potato Marketing Board £6,804,000 ; and from Land Settlement £1,972,000. Housing receipts from Votes were £7,216,000, and Post Office capital repayments from Votes £5,600,000. Small repayments were made by the Colonial Development Corporation (£467,000) ; Scottish Special Housing (£336,000) ; the Overseas Food Corporation (£96,000) ; the Northern Ireland Exchequer (£89,000) ; and the Independent Television Authority (£58,000).

Details of the Floating Debt are given below:

	March 31, 1958 £	March 31, 1957 £
Ways and Means Advances Outstanding :—		
Advances by Bank of England ..	—	—
Advances by Public Departments	277,080,000*	276,890,000
Treasury Bills Outstanding	4,571,150,000†	4,195,295,000
Total Floating Debt Outstanding ..	4,848,230,000	4,472,185,000

*Reduced by the cancellation on Oct. 1, 1957, of £44,915,000 Ways and Means Advances from the National Land Fund (Finance Act, 1957, Section 41). †Includes £962,000, the proceeds of which were not carried to the Exchequer within the period of the Account.

The Floating Debt thus showed a net increase over the year of £376,045,000.—(Treasury Press Office - Financial Times)

(Prev. rep. Revenue and Expenditure 1956-57, 15462 A ; 1957-58 Budget, 15481 A.)

B. UNITED ARAB REPUBLIC. — Acquisition of Submarines from Poland.

It was officially confirmed in Cairo on April 3 that three submarines had been acquired by the United Arab Republic from Poland. The Government newspapers *Al Shaab* and *Al Gomhouria* reported that the submarines had arrived at Alexandria on April 1 after "steering a course from Poland which is not normally taken by merchant ships, so as to avoid detection" ; they added that the submarines were "operated and manned by personnel of the U.A.R. armed forces who have received training in this field." Egypt had previously obtained three submarines from the Soviet Union in June 1957. (Times - Le Monde, Paris) **(Prev. rep. 15599 A.)**

C. NORWAY - UNITED KINGDOM. — Ratification of Social Security Agreement.

The social security agreement between the United Kingdom and Norway, signed on July 25, 1957, came into force on April 1 after ratification by both countries.
(Manchester Guardian - Norwegian Embassy, London)
(Prev. rep. 15715 D.)

A. UNITED KINGDOM. — Gold and Dollar Reserves.

The Treasury announced on April 2 that the sterling area's gold and dollar reserves had risen during March by $231,000,000 after taking into account (*a*) the receipt of $94,000,000 from the E.P.U. in respect of the U.K.'s surplus in February, and (*b*) the payment of $3,000,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $2,770,000,000 on March 31.

The March increase was the largest monthly gain since October 1950, except for October 1957, which reflected the effect of the drawing of the U.S. Export-Import Bank loan. The reserves had risen steadily since the increase of the Bank Rate to 7 per cent in September last, the increase having been particularly notable in the past two or three months. It was pointed out in the Press that this trend reflected the growing confidence of foreign traders in the pound, and the reversal of the speculative movement against sterling; moreover, foreign money had been attracted to London to an increasing extent over the past two months—a movement which was not interrupted by the recent reduction in the Bank Rate to 6 per cent. The main support for the pound, however, came from genuine commercial transactions, including the narrowing of the U.K.'s trade gap and the seasonal rise in certain commodity earnings.

Provisional figures for the E.P.U. March settlement showed that Britain had a surplus of £5,000,000, three-quarters of which would be settled during April in gold or dollars and one-quarter by a reduction in the U.K.'s debt to the Union.

Sterling remained strong *vis-à-vis* the U.S. dollar throughout March, the closing rates in London for spot sterling varying between $2.81½ and $2.81⅝. Transferable sterling in Zürich was also firm, reaching an all-time peak of $2.79635 on March 14 and otherwise varying between $2.7925 and $2.79625. (Treasury Press Office - Times - Financial Times)

(Prev. rep. 16045 A.)

B. YUGOSLAVIA. — General Elections.

Elections were held in Yugoslavia on March 23 for a new Federal Council (one of the two Houses of the Federal National Assembly) and for the National Assemblies of the six constituent Republics.

Under the Yugoslav electoral system adopted in 1953, candidates were nominated at public meetings of the electors, for approval by district nomination conferences. Although voters had the right to reject an approved nomination and endorse another candidate, a contest between two candidates only occurred for six out of the 301 seats in the Federal Council open for election by general suffrage, compared with 16 in 1953. For the other 295 seats there was only one candidate each, who had been officially approved by the League of Communists or the Socialist Alliance. Of the 307 candidates nominated, 123 (or over 40 per cent) were newcomers. The candidates included 54 members of the Central Committee of the League of Communists, including President Tito, and M. Kardelj and M. Rankovich, the two latter being Vice-Presidents of the Federal Executive Council.

It was announced on March 25 that 94 per cent of the registered electorate had voted—a record poll in spite of heavy snowstorms. Of the 10,645,556 votes cast, 10,296,239, or 96.7 per cent of the total poll, had been in support of the officially approved candidates, whilst 349,317 voters, or 3.3 per cent of the total, cast negative or invalid votes (the only way of expressing opposition) compared with 4.3 per cent in 1953.

Voting for the Council of Producers (the other House of the Federal National Assembly) took place on March 26, when 226 candidates presented themselves for the 216 seats; 80 per cent of the candidates were newcomers, but this represented changes decided upon by the party leadership rather than decisions by the voters.

In addition to the 301 members of the Federal Council who were elected by direct suffrage, 70 will be elected from among the members of the National Assemblies in the Federal Republics.—(Tanjug Agency, Belgrade - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris)

(Prev. rep. 13409 A.)

C. ISRAEL. — Immigration Figures.

The Central Bureau of Statistics in Jerusalem announced in January that Israel's population as at Dec. 31, 1957, amounted to 1,976,000, an increase of 103,000 over the population on Dec. 31, 1956. Of the country's total population, 1,760,000 were Jews, and 200,000 of other denominations.

Immigration in 1957 totalled 71,000 compared with 55,000 in 1956, whilst the number of emigrants was 6,245. Of the immigration in 1957, about 41,000 came from Europe, about 25,000 from Africa, about 4,000 from Asia, and about 1,000 from South America.—(Israel Government Press Office)

D. CANADA - WEST INDIES. — Canadian Economic and Technical Assistance for West Indies Federation.

The Canadian Prime Minister, Mr. Diefenbaker, announced on March 12 that the Government had decided to recommend to Parliament that Canada should give the West Indies Federation a passenger-and-cargo ship for inter-island traffic as the first major capital project in the Canadian aid programme to the Federation. This programme had been initiated some time ago, when interim arrangements were made for Canadian technical assistance; the decision now taken had followed discussions between Canadian and West Indian representatives, who had reviewed the needs of the West Indies and the possibility of Canadian assistance. In his letter to Lord Hailes, the Governor-General of the West Indies Federation, he (Mr. Diefenbaker) had proposed that further discussions on Canadian capital aid and technical assistance should take place during the Commonwealth Trade and Economic Conference to be held in Montreal in September.

The Canadian State Secretary for External Affairs (Dr. Smith) had previously announced in January (i) that $150,000 had been included in the Estimates as an interim measure for the provision of Canadian technical assistance to the West Indies and Ghana; (ii) that a Canadian housing adviser would go to the West Indies; and (iii) that immediate consideration was being given to West Indian requests for a statistician and for experts in forestry, fisheries, and technical education. (Department of External Affairs, Ottawa)

E. AUSTRALIA. — Banking Legislation. - Second Rejection by Senate.

The controversial banking legislation which had been defeated in the Senate in November and December last was reintroduced by the Federal Government in the House of Representatives on March 13, and was subsequently passed by the House in spite of continued strong Labour opposition. In the Senate, however, the Bills were again defeated on a tie vote at their second reading on March 27, the voting being 30 in favour and 30 against; the breakaway Labour groups —the Democratic Labour Party and the Queensland Labour Party—joined the Labour Party in voting against the Bills.

The Australian Prime Minister, Mr. Menzies, said after the vote that the Government's banking reforms had "not been finally disposed of," and that the Australian electors would have a "golden opportunity" when they next voted "to cast a Senate vote which would prevent the views of the House of Representatives from being frustrated." Mr. Menzies' statement was believed by political observers in Canberra to refer to the normal elections to be held in December 1958, and not to an immediate election caused by a "double dissolution" of Parliament, which would have been possible under the Constitution following two subsequent rejections of Government legislation.—(Australian News and Information Bureau - Times - Manchester Guardian) **(Prev. rep. 16033 A.)**

F. INDIA. — Creation of Defence Research and Development Department.

A Research and Development Department in the Indian Ministry of Defence came into being on Jan. 1, 1958, headed by Dr. D. S. Kothari, scientific adviser to the Defence Minister. The new department includes the Defence Science Organization, which was created in 1948, and the Technical Development Organization; the former organization consists of scientists, and the latter is staffed largely by Service officers. A Defence Research and Development Committee was also set up under the chairmanship of Dr. Kothari, who will be closely associated with the Chiefs of Staff Committee. (Indian High Commissioner's Office, London)

(Prev. rep. 14391 C.)

G. TURKEY. — Maritime Disaster.

One of the worst maritime disasters for many years occurred on March 1 when the Turkish ferry-boat *Uskudar* (148 tons), bound from Izmit to Karamürsel, sank in a heavy gale in the Sea of Marmara. The vessel carried several hundred passengers but it was impossible to ascertain the exact number of victims of the disaster; 199 bodies were recovered, but it was presumed that many more had gone down with the ship, the total number of those drowned being variously estimated as about 300 or over 400. Only 47 of the passengers and crew were rescued by Turkish warships and other craft which had rushed to the scene. A day of national mourning was observed throughout Turkey on March 3.

APRIL 12—19, 1958

A. UNITED KINGDOM. — The Budget, 1958-59.

The Chancellor of the Exchequer, Mr. Derick Heathcoat Amory, introduced the Budget for 1958-59 in the House of Commons on April 15. Estimates of Ordinary Revenue and Expenditure are shown in the following table :

ESTIMATED REVENUE	£
Inland Revenue—	
Income Tax	2,312,500,000
Surtax	163,000,000
Death Duties	163,500,000
Stamps	56,250,000
Profits Tax, Excess Profits Tax, and Excess Profits Levy	275,000,000
Total Inland Revenue	2,970,250,000
Customs and Excise—	
Customs	1,256,940,000
Excise	932,310,000
Total Customs and Excise	2,189,250,000
Motor Vehicle Duties	104,000,000
Total Receipts from Taxes	5,263,500,000
Post Office (Net Receipts)	2,000,000
Broadcast Receiving Licences	34,000,000
Receipts from Sundry Loans	30,000,000
Miscellaneous	110,000,000
TOTAL REVENUE	5,439,500,000

ESTIMATED EXPENDITURE	£
Interest and Management of the National Debt	*695,000,000
Sinking Funds	38,000,000
Payments to N Ireland Exchequer	73,000,000
Other Consol. Fund Services	10,000,000
Total	816,000,000
SUPPLY SERVICES—**Defence—**	
Army Votes	441,400,000
Navy Votes	339,400,000
Air Votes	474,550,000
Ministry of Supply (Defence)	193,350,000
Ministry of Defence	16,750,000
	1,465,450,000
Less—Contribution to local costs in Germany appropriated in aid of Defence Votes	47,000,000
	1,418,450,000
Civil—	
I. Central Government and Finance	16,890,000
II. Commonwealth & Foreign	80,700,000
III. Home, Law & Justice	99,215,000
IV. Education & Broadcasting	520,817,000
V. Health, Housing, and Local Government	779,092,000
VI. Trade, Labour & Supply	76,061,000
VII. Works, Stationery, etc.	79,988,000
VIII. Agriculture and Food	360,902,000
IX. Transport, Power and Industrial Research	221,666,000
X. Pensions, National Insce. & National Assistance	543,975,000
	2,779,306,000
Tax Collection—	
Customs and Excise and Inland Revenue Votes	61,828,000
	2,841,134,000
	4,259,584,000
TOTAL EXPENDITURE	5,075,584,000
SURPLUS	363,916,000
	5,439,500,000

SELF-BALANCING REVENUE AND EXPENDITURE

Post Office Revenue required to meet Post Office expenditure .. £367,698,000

* In addition, £205,000,000 for interest on the National Debt will be met from receipts under various Acts authorizing such application.

PUBLIC LIBRARY
MAY 16 1958

The principal changes brought about by the Budget are set out below :

Purchase Tax. The present seven rates of duty (from 5 per cent to 90 p.c) to be reduced to four (5, 15, 30, and 60 per cent), those of 10, 50, and 90 per cent being abolished. Goods hitherto charged at 90 per cent would be chargeable at 60 or 30 per cent, for electric and gas fires and water heaters, refrigerators, washing machines, vacuum cleaners, cameras, jewellery, watches, and musical instruments, etc., the rate would be cut from 60 per cent to 30 per cent; on wallpaper and garden furniture from 30 per cent to 15 per cent; on ties and other minor articles of apparel from 30 per cent to 5 per cent; on hall, office, and metal furniture from 15 per cent to 5 per cent (the same as for other furniture), and for hats from 10 per cent to 5 per cent.

Wool cloth, hitherto 10 per cent, would be exempt, but woollen clothing would be taxable at 5 per cent like other clothing. Domestic oil heaters, shopping bags and brief cases, previously exempt, would pay 30 per cent, and some other previously exempt articles 5 or 15 per cent.

The standard rate of purchase tax would therefore be 30 per cent, with a higher range of 60 per cent on cars, wireless and television sets, gramophones, gramophone records, and cosmetics, and with lower rates of 15 and 5 per cent on the more essential domestic and personal articles. [For fuller details see page 16120].

Entertainments Duty on Cinemas. To be reduced on the average by rather more than one-half, viz., from 50 per cent of the amount by which the total admission price exceeds 11d. to 33⅓ per cent of the amount by which the total admission price exceeds 1s. 6d.

Profits Tax. A single rate of 10 per cent on all profits instead of different rates on distributed (30 per cent) and undistributed (3 per cent) profits, as from April 1. The existing exemption and marginal relief for companies with small profits would continue.

Loan interest of nationalized industries and loan or share interest of building societies and co-operative societies to be allowed as a deduction in computing chargeable profits.

Industrial Allowances. The present initial allowances to be increased from 20 per cent to 25 per cent for plant and machinery, and from 10 to 12½ per cent for industrial buildings, affecting expenditure due and payable on or after April 15. The special 40 per cent rate for mining works would remain.

Income Tax. (*a*) Exemption limits for persons over 65 raised from £250 to £275 for single persons and from £400 to £440 for married couples. (*b*) The income limit for old-age relief raised from £700 to £800; thus where the income is below £800, the whole—whether earned or from investments—will be treated as earned income. (*c*) The income limit for the dependent relatives allowance to be raised from £105 to £135. (*d*) Tax relief in certain circumstances on pensions for overseas service becoming payable under the Overseas Service Act to former Civil Servants, etc. (*e*) An allowance in respect of subscriptions to professional societies with activities relating to an employee's work, and for certain statutory registration fees.

"Dividend Stripping." The law dealing with this device to be strengthened with retrospective effect to Oct. 26, 1955.

Charities. The existing disqualification from tax relief for property used by a person with an income of £150 or more to be removed.

Surtax. The law relating to revocable settlements to be tightened up.

Estate Duty. (*a*) Duty to be charged only once where two persons, e.g. a husband and wife, die together. (*b*) "Quick succession" relief, hitherto applicable only where land passes on successive deaths twice within five years, to be extended to all kinds of property.

Stamp Duty. On house purchases to be reduced to nil for property up to £3,500; ½ per cent up to £4,500; 1 per cent up to £5,250; and 1½ per cent up to £6,000. The normal 2 per cent rate to operate for property over £6,000.

Wine Duty. Reduced for heavy wines (such as port, madeira, and sherry) by about 12s. a gallon, or 2s. a bottle. [Because of other higher expenses the retail price reduction per bottle was expected to be 1s. 6d.].

Areas with Unemployment above Average. (*a*) Existing restrictions on capital issues and bank advances to be removed for development in areas where unemployment was substantially above the average. (*b*) Forthcoming legislation amending the Distribution of Industry Act to provide financial assistance to trades or businesses in any locality with a relatively high rate of unemployment (i.e not only in "development areas" scheduled under that Act). (*c*) Financial assistance under the Distribution of Industry Act for the provision of dry-docks in development areas.

Savings. (*a*) Issue of a new seven-year 5 per cent Defence Bond on May 1, repayable at £103 per cent. (*b*) Limit on holdings of current issue of National Savings Certificates raised from 600 to 1,000 units from May 1.

The Budget Speech.

The Chancellor's Budget speech fell into four main parts : (1) a review of economic developments over the past year ; (2) the Revenue and Expenditure figures for the past financial year and the Estimates for the coming year ; (3) an examination of the economic outlook and of Budget policy ; (4) specific proposals for taxation changes. The speech is given below under cross-headings.

"This is indeed a difficult moment at which to read confidently the barometer of world trade and economic activity. It is clear that the economic climate of the free world is changing. Inflationary pressures are subsiding and in some countries production has fallen off. The question is : Does this portend only a pause, soon to be followed by a renewal of the former upward movement, or are we at the beginning of a more protracted downward trend ? It is too soon to be sure.

"But of one thing at least we can be certain. Whatever the outcome, our policies must be guided by three dominant objectives : to maintain the value of our currency ; to strengthen our external finances by increasing our reserves or reducing our liabilities, or both ;

and to play a part consistent with our resources and responsibilities in the expansion of world trade and the development of the Commonwealth. Our strategic aim must always be steady expansion, though tactics may sometimes dictate a pause.

"I want first to describe shortly the course of economic events over the past year and to give my impression of our present state of economic health. I see a number of heartening signs that it has improved.

Economic Developments in 1957. "Looking at the situation at home, although the growth of production was small in 1957, there were some satisfactory shifts in the use which we made of our resources. For example, Government expenditure on goods and services fell slightly in real terms. Consumption rose by about 2 per cent, which was reasonable considering that it had not risen the year before. The rate of personal saving reached the record level of 10 per cent of income after tax. This is satisfactory and encouraging, and something from which we are going to benefit in the future.

"The lion's share of the increase in output went to investment, both in stocks and fixed capital. In 1957, the rate of fixed investment rose by 5 per cent in real terms. Over the past five years the proportion of the national product devoted to fixed investment has risen from 14 per cent to 17 per cent. These are all signs of growing economic strength.

"The excessive pressure of demand has perceptibly relaxed over the past year. Although we are still fully employed by any normal standard, there is rather more unemployment than a year ago—2 per cent in March, compared with 1.7 per cent in March last year. There are also fewer vacancies than a year ago. I know very well that statements about the high level of employment over the country as a whole carry little comfort in those particular places where the percentage of unemployment may be several times greater than the national average. Local pockets of heavy unemployment must be tackled with all possible energy, and I shall say more of this later. But they must not cause us to lose a sense of perspective when we are scrutinizing the whole picture.

"So far I have mentioned the favourable signs. But there is, of course, another side to the picture. Costs and prices again proved to be our Achilles' heel. Comparing 1957 with 1956, the price-level of output as a whole was 3 per cent up, with retail prices 3½ per cent higher. Once again the chief cause was that wages and salaries went up much faster than output—6 per cent compared with 1½ per cent. Profits rose on much the same scale, although their effect in the aggregate on prices was, of course, much smaller. These figures are important because they explain our failure as a nation to halt inflation last year. And most of our present economic worries stem from that fact.

"I am glad to say that in several important respects recent months have shown greater stability. The retail price index has remained steady over the past five months, and wholesale prices of manufactured goods have also been stable. It may be that the retail price index will go up slightly during the next few months, but the prospects generally are bright.

"At present the terms of trade are exceptionally favourable to us. Import prices are 11 per cent lower than a year ago, while export prices have not so far fallen. We now have a golden opportunity, therefore, at least to halt, and possibly reverse, the trend of rising prices from which we have suffered for so many years. We cannot count on the terms of trade remaining so favourable to us for very long, and this makes it all the more important that we should make full use of this opportunity.

"Turning to the external side of our affairs, our trading position was adversely affected during part of last year by the aftermath of the Suez trouble. Over the year as a whole, however, we had a substantial and encouraging current surplus. Indeed, it is probable that the published figure of £237 million is an under-estimate, since some of the very large receipts during the year which cannot be identified are almost certainly attributable to current transactions.

"But one must remember, again, that this surplus was helped by the favourable movement in the terms of trade in the later part of the year. The monthly trade gap in the last few months has been considerably reduced, mainly as a result of the big fall in import prices. Our exports, however, have recently levelled off after a long period of steady growth. This is an unwelcome result of the more difficult conditions in overseas markets, caused by the check to the growth in industrial production in the U.S.A. and elsewhere.

"But as recent experience has shown, we can earn a current surplus big enough to match our long-term investment oversea and still find ourselves with serious problems for sterling. Both in 1956 and in 1957 our surpluses on current trade were sufficient or more than sufficient to cover our normal long-term oversea investment. However, in both years there were very large reductions in the sterling holdings of oversea countries—over £150 million in each year. These amounted, of course, to reductions in our obligations. But falls of this kind would have led to big losses of reserves had we not undertaken fresh borrowing.

"The sterling withdrawals of which I have spoken were of two kinds. Those by non-sterling countries largely, though not wholly, reflected lack of confidence in sterling. They were substantial in the last half of 1956 and in the third quarter of 1957. The other kind of withdrawal was made by sterling area countries. This was due not to speculation but to the worsening of their general balance of payments on commercial account. The rundown of sterling area holdings was concentrated in the last half of 1957, and amounted to no less than £226 million.

"In the decline of confidence in sterling which reached its climax in the events of last autumn, there were a number of factors, both internal and external, which led to a sudden outflow of our gold and dollar reserves. One of the most important was the continued rise in money incomes in the U.K. which produced serious doubt—a doubt which was felt within our own shores as well as oversea—about the stability and strength of our currency. Faced with this crisis, the Government took drastic action to restore confidence—in priority to every other economic issue. The decisive response which we made to that emergency proved effective and received the general support of the country. Since then, as the figures have shown, confidence in the pound has been restored.

"In the third quarter of last year we lost £189 million from the reserves. In the six months since then we have increased the reserves by £328 million. £152 million of this came from borrowing from the Export-Import Bank and from postponing debt payments. The remainder, £176 million, reflects a strong commercial position and a genuine return of confidence in sterling.

"Broadly, therefore, even apart from the special measures taken to reinforce the reserves, we have regained what we lost in the third quarter of last year. Indeed, at the end of last month the reserves were only fractionally less than £1,000 million. In addition we reduced our sterling liabilities to oversea countries in the second half of last year by £227 million. In the same period we increased our private oversea investments by over £100 million. So we have some solid progress to record.

Revenue and Expenditure in 1957-58. "Revenue last year was £5,343 million, £185 million more than in the preceding financial year and £54 million above the estimate. Inland Revenue duties came to £2,855 million and Customs and Excise duties to £2,150 million, that is, £14 million and £33 million respectively above the estimate. Other revenue, at £338 million, was £23 million below the estimate, mainly due to lower receipts from the sale of Government-owned stocks.

"Expenditure above the line was originally estimated at a total of £4,827 million. It turned out to be £4,920 million, or £93 million higher. This increase was spread pretty well over the whole field of expenditure.

"The cost of the Consolidated Fund services was £782 million, £25 million higher than the estimate. This was due in the main to increased debt charges arising from higher interest rates, offset in part by the postponement of the payment of interest on the North American loans. Defence expenditure exceeded the estimate of £1,420 million by £10 million, as a result of increased prices, which to this extent could not be offset by economies elsewhere. Civil Expenditure, at £2,708 million, was £58 million above the Budget estimate. The main increase was in the cost of agricultural subsidies, due to the fall in market prices, particularly of cereals, pigmeat, eggs and milk for processing, and to the additional cost of awards following the 1957 Annual Review. Increases in the cost of running the social services and other parts of the civil administration were largely offset by savings on other items.

"While it is true that Government expenditure has risen year by year, it has risen more slowly than the value of the gross national product. Government expenditure, as defined in the national income estimates, has fallen, as a percentage of the gross national product, from 29 per cent in 1951 to 25 per cent in 1957—mainly during the period when Mr. Butler was at the Treasury.

"To sum up the result, 'above the line' there was a surplus of £423 million compared with an estimated surplus of £462 million and an actual surplus in the previous year of £290 million. So the estimates made by Mr. Thorneycroft last year have proved to be very close to the mark.

"'Below the line' receipts at £261 million were £6 million less than estimated, but payments at £896 million were up by £42 million. The main increases were in net advances to the National Coal Board, which at £81 million were £36 million above the estimate, and in the issues required to meet the deficits of British Railways, which were £16 million above the estimate. The increase in the net advances to the National Coal Board was caused in the main by an increase in stocks of small coal. Advances to the other nationalized industries at £295 million were £5 million above the estimate, while loans to local authorities at £92 million were £8 million lower. The reduction in loans to local authorities reflects the continued success of the policy of encouraging these authorities to borrow in the market wherever possible.

"The out-turn can therefore be summed up as follows. 'Above the line' there was a surplus of £423 million. 'Below the line' net payments were £635 million. So the difference which had to be financed by borrowing was £212 million. This was the main factor leading to the net increase over the year of £224 million in the total of the National Debt. Within this total the floating debt increased by £376 million. My predecessor in last year's Budget speech hoped that an overall Budget deficit of £125 million would 'be amply covered by small savings and other non-inflationary methods of finance.' In the event, the requirements of the Exchequer were higher than he had expected.

"Some increase in short-term Government borrowing and therefore in bankers' liquid assets could not be prevented. Nevertheless, the level of bank advances has fallen over the year by £72 million. I am most grateful to the banks for the co-operation which they have shown in keeping down the level of advances fully in accordance with the undertakings they gave to my predecessor.

Savings Policy. "During the year ahead I am determined to maintain the effort to meet Exchequer requirements without increasing the floating debt. This means a continuing tight hold on public expenditure, vigorous funding, and, I hope, an increase in Exchequer receipts from small savings.

"With this in mind, I have reviewed the terms of the securities offered by the National Savings movement. The Prime Minister's Premium Savings Bonds are running well. I see no reason for change here or in the arrangements for the Post Office and Trustee Savings Banks. But it is time to raise the limit on holdings of the current issue of the National Savings Certificate. This limit has remained at 600 units since the present series began in August, 1956. It will now be raised to 1,000 units with effect from May 1. Otherwise the terms of the certificates stay the same.

"There remains the Defence Bond. The present 4½ per cent bond has suffered recently by comparison with the higher yields that small savers can get elsewhere. I intend to issue a new Defence Bond on May 1, carrying interest at 5 per cent and repayable in seven years at the rate of £103 for each £100 invested. If held to maturity, the yield will be £5 8s. 6d. per cent, without any allowance for the fact that the bonus paid on maturity is tax free. The Defence Bond holder will continue to be protected from market fluctuations; but now he will also get a yield that is fully competitive with that of comparable gilt-edged securities in the market. These are very favourable terms; I think rightly so." The Chancellor then paid tribute to the continued efforts of the National Savings Movement.

Expenditure Estimates for 1958-59. - Revenue Prospects on Existing Taxation Basis. "I turn now to my crystal ball, and to the prospects for the Exchequer in the financial year just started. On the basis of existing taxation I estimate total revenue at £5,490 million—£147 million more than last year. Inland Revenue duties are expected to yield £2,975 million, and Customs and Excise duties £2,253 million. These figures are £120 million and £85 million respectively more than last year's yields. I expect an increase of £3 million from motor vehicle duties, which are estimated to yield £104 million. The estimate for non-tax revenue is £176 million, compared with £237 million last year. One reason for this fall of £61 million is that last year we had a book-keeping windfall of £37 million from the return of interest payments on the North American loans, which had been deposited in a special account pending negotiation with the Governments concerned.

"I estimate total expenditure 'above the line' this year at £5,075 million—£155 million more than the out-turn for last year. The Consolidated Fund services will require £816 million in the coming year—£34 million more than last year's out-turn. Supply expenditure is estimated at £4,259 million, £44 million more than the final estimates for last year, including all supplementary estimates, and £121 million more than last year's out-turn. This increase is the net effect of a rise of £133 million in civil expenditure—notably in the social services—and a reduction of £12 million in defence expenditure. The latter estimate assumes the receipt of £47 million from Germany towards the cost of our forces in Germany. As the House knows, this matter is still under discussion in the NATO.

"On the basis of existing taxation, therefore, total revenue is estimated at £5,490 million against expenditure of £5,075 million, giving an estimated surplus 'above the line' of £415 million. This compares with last year's surplus of £423 million, which was, however, inflated by the £37 million of returned interest on the North American loans.

"I expect the net total of expenditure 'below the line' to be £35 million less than last year's out-turn. Loans to local authorities next year I put at £65 million, £27 million less than last year. Capital expenditure by the Post Office charged 'below the line', at £38 million, is down by £41 million. This results from the new accounting arrangements announced last November.

"The National Coal Board is expected to need £76 million. Issues to other nationalized industries I put at £370 million, an increase of £75 million over last year. The bulk of this increase is accounted for by the British Transport Commission, whose investment programme is getting into gear, and who last year were able to keep down their borrowings from the Exchequer by using balances which they had available for investment. Repayments by the nationalized industries in respect of earlier borrowings are, however, expected to be £16 million higher than last year. Finally, £61 million is likely to be required for the British Transport Commission under the Transport (Railway Finances) Act to meet their current deficit, as against £66 million last year.

"The power to make advances from the Exchequer to the nationalized industries, other than the National Coal Board, was first given in the Finance Act of 1956. That power expired on March 31 of this year, but was extended to Aug. 31 by the Nationalized Industries Loans Act. Parliament passed that Act on the understanding that I would make substantive proposals in this Budget either to abandon or to continue the practice of using the Exchequer as the source of capital finance for these bodies. I have decided to recommend that the practice should continue, at any rate for another year. It is still the case that these industries cannot in practice borrow on their own credit. If they borrow on Government credit there are decisive reasons of market management for centralizing the raising of the money in the Exchequer. The renewed powers, for which I propose to move a procedure resolution, will expire at Aug. 31, 1959, so that the matter may be reviewed again in next year's Budget.

"To sum up the Exchequer prospects for the year ahead: if taxation remained unchanged, I should expect a surplus 'above the line' of £415 million and net total expenditure 'below the line' of £600 million, giving a deficit overall of £185 million, compared with last year's out-turn of £212 million.

Economic Prospects. "I come now to the part of my speech in which I must explain my view about our economic prospects and the policies which I think we should follow. This task is the more difficult this year because there are two considerations which must be in the front of all our minds. We must succeed in our struggle for stable prices, and we must find the right course to pursue in a world threatened by tendencies to recession.

"Looking first at probable developments in the economic situation at home, in spite of some uncertainties the prospects for home demand this year seem reasonably satisfactory. As regards fixed investment, we have taken steps to stabilize expenditure in the public sector this year at the same level as last year. Private investment expenditure, so far as can be judged from sample inquiries, also seems likely to stay at about its present level, which is in fact an all-time record.

"Turning to consumption, there is a special factor at work this year which reflects to some extent the world situation to which I have been referring—namely, the low level of import prices. This will tend to raise the volume of consumption, by keeping prices—especially food prices—down in relation to incomes. Provided that we maintain our competitive power, employment should remain at a generally high level, and this should make possible a moderate increase in consumer spending in real terms.

"Government expenditure will be about the same as last year in terms of real resources. The level of expenditure all across the front—civil and defence—will continue to be held at the absolute minimum consistent with the execution of our current policies.

"The remaining component of internal demand is business expenditure on stocks. A good deal has been spent on additions to stocks in the last three years. Now that commodity prices are falling and production is not rising there is likely, I should think, to be less stockbuilding this year than last, with correspondingly less demand for home production and imports. Past experience both here and in the U.S.A. has shown that fluctuation in expenditure on stocks can play quite an important part in expanding and contracting economic activity. This, then, I would say is the big uncertainty on the home front.

"The last component of total demand, in the economic sense, is exports. Their course will depend very much this year on developments abroad. We are dependent on overseas markets for the sale of nearly a quarter of our national output. So far foreign demand for our goods has kept up well, but we are seeing to-day something which we have not seen for many years—a halt in the general upward trend of world economic activity.

"It is right that we should watch particularly closely developments in the United States. The present recession there is naturally causing a feeling of uncertainty in the minds of businessmen everywhere, and particular anxieties to the primary producing countries. Everyone is wondering how deep it will go, how long it will last, and whether it will 'saucer out,' in the apt phraseology of our friends across the Atlantic. No-one can tell yet. We must bear in mind that the world economic background is by no means as buoyant as it was at the time of the 1954 recession. On the other hand, the U.S. authorities are alive to their economic problems and have so far handled them since the war with undoubted success.

"Nevertheless, we must take this situation seriously into account, both in assessing our own position and in formulating our policies. We must be careful not to do anything to add to world difficulties. At the same time it is no use deceiving ourselves into thinking that we can carry the world on our shoulders, or stem single-handed forces which are to only a limited extent within our own control. If we tried to halt a world recession by undiscriminating expansion of economic activity at home, we should fail. We could not hope to buy ourselves out of it, and we might well come near to ruining ourselves if we tried. As the Prime Minister said the other day, 'the worst possible solution would be for this country to find itself an island of inflation in a world of deflation.' It is very true.

"In these circumstances I will not attempt to forecast exactly how our balance of payments will work out in the rest of this year. But with the terms of trade so much in our favour I have every confidence that our position will remain strong.

"This does not mean that we can count on the firm foreign demand for our exports that we have enjoyed almost without a break since the war. Exporting is going to become more difficult. That is why it is so vitally important in the new circumstances that we should keep ourselves fully competitive. It is not too much to say that our national livelihood depends on that. It will be a fine achievement in the present world situation if we can maintain the volume of our exports. Any serious failure in this direction would, of course, be bound to have a seriously depressing effect on our economy. Incidentally, it is good news how well our cars are selling on the other side of the Atlantic at present.

"To sum up the economic prospect. Home demand should on the whole remain firm. But with our foreign customers running into difficulties, export demand may weaken, and this may be reinforced by a fall in business expenditure on stocks. The level of industrial production has tended to decline slightly in the last few months, and unemployment has been rising. These trends may well go rather further during the rest of the year, but I do not believe that a sudden

sharp recession in this country during the coming months is likely. But this will, of course, depend both on our continuing to follow economic policies appropriate to the circumstances in which we find ourselves and on how things develop in other parts of the world.

Sterling and the Sterling Area. "Before I come to our future policies, I want to say a few words about sterling and the sterling area. I recalled earlier the Government's declaration that the strength of sterling remained the primary objective of our economic policy. By that I mean not only a stable value for the pound at home and abroad: I mean the successful working of a sterling area system. These sterling area arrangements have proved of immense value in recent years, not only to us but to the whole sterling and non-sterling world.

"Unless sterling is strong it cannot continue to be the currency which finances a large part of the world's trade. There is no other currency in a position to take its place; nor could one quickly be developed. This is a matter not only of experience, but also of banking connexions abroad and the facilities of the City of London. No country is more dependent on international trade than ours; none would suffer more from the lack of a medium for financing it.

"It seems a pity, therefore, that in recent months voices should have been raised to question the value of the system and to suggest that it should in some unspecified way be wound up or that it should at least be drastically altered. Admittedly our reserves are not as big as we should like, particularly in relation to our liabilities. This is in part the aftermath of war. But this insufficiency can be exaggerated. The liabilities look big on paper. But we should remember that a large part of them are held for long-term purposes. Provided that confidence in sterling is maintained, only a relatively small proportion will have to be met in the immediate future.

"It is also the case that at the present time, temporarily and for reasons partly outside their control, a number of sterling area countries are having to draw down their balances. This puts a strain on the reserves and limits the freedom of our domestic action. To a large extent, however, the run-down in their balances is due to a change in the terms of trade. This same change has made it easier for us to meet the strain.

"Moreover, the fact that sterling area countries can draw down their balances in bad times, just as they build them up in good times, is a most useful contribution to world liquidity. In present circumstances this is likely to prove of great value as a cushion against the effects of diminishing income in the primary producing countries which hold their reserves in sterling.

"I hope, therefore, that we shall neither exaggerate the difficulties that come from our position as the banker of the sterling area, nor under-estimate its value to us. In a world where liquid reserves in other forms are all too scarce, sterling and the sterling area are indispensable to the smooth functioning of a large part of the world's trade, as well as to the unity and strength of the Commonwealth.

"We do not intend to tamper with this system, which is working well. On the contrary, our purpose is that it shall be preserved and developed, that confidence in its viability should be fortified, and that we shall be able to move gradually towards still wider freedom and, as opportunity offers, make yet greater contributions to Commonwealth development.

"This all means that we must conduct our own finances with a special caution in difficult times. It requires, too, that we should maintain close and continuous consultation with our sterling area partners. This will be especially reinforced this year by the Commonwealth Economic Conference in September, and through the preparations for it which are already in hand.

"I believe the problem of world liquidity, and of ensuring the strongest possible credit base for the trade of the free world, is a matter of increasing importance and urgency. It may well be that a solution can best be found by the steady expansion of institutions such as the International Monetary Fund and the International Bank. Such a solution would, of course, require the active good will and assistance of the chief creditor countries. It may be that more can be done co-operatively within the Commonwealth. That will doubtless be discussed at the Economic Conference. I can only say that in this vitally important field of provision of capital and credit for the trade of the free world, any sound plans that can be worked out for more effective international co-operation will receive the wholehearted support of the Government.

Economic Policies. - Continuation of Anti-Inflationary Measures. "I will now outline the policies that I think we should follow. At home our first priority must continue to be to finish winning the battle against inflation, and our success or failure here will largely determine our fortunes in the months and years ahead.

"The past six months or more have seen quite a significant change in the temper of public opinion about economic matters. I sense a greater realization among people generally of the real meaning of inflation and the dangers, the hardship and the social injustice that it entails. There are signs that opinion is becoming less tolerant of the endless spiral process whereby, as a nation, we have paid ourselves in incomes more than we have earned by our efforts. If the experiences of the years since the war have at last spread a wider understanding of the folly of this process, we have made an important advance.

"One factor which has contributed to this fuller understanding has been the first report of the Council on Prices, Productivity and Incomes. This report gives us an exposition of the facts about movements in wages and salaries, prices, profits and dividends over recent years—hard facts which exist quite independently of the political or economic views of the reader. I know that everybody does not agree with every opinion which the Council has expressed. It may be all to the good that the report has given rise to lively controversy. The more informed discussion we have of these matters, the better.

"But disagreement with some of the views expressed by the Council does not dispose of the problem. It cannot excuse all those concerned—including the Government—from continuing the search for a constructive solution. By a constructive solution I mean arrangements which will give us reasonable assurance that an expanding economy does not inevitably lead to rising costs and prices as it has done over the post-war years.

"The Government's view on wage settlements has been made perfectly clear. If wage increases in general go beyond the national increase of productivity, this is bound to damage the national interest. It looks very much as though this fact has been ignored in a number of voluntary agreements within the past few months. It is no use those concerned in industry pressing the Government to follow a firm and consistent line in these matters, if they themselves ignore in practice the precepts which they urge on others so strongly.

"If general wage settlements this year ignore the criterion I have mentioned, the only result in the long run will be that fewer people will be in jobs, the security of those in employment will be reduced, and the strength of our currency will once more be put in jeopardy. On the other hand, if all concerned show moderation during the next few months we shall, I believe, have laid the foundations on which we can confidently hope to build a steadily expanding economy, with price stability and with fairness to all sections of the nation.

"In the light of all this it is clear that it is too soon yet to contemplate any general relaxation on the economic front. Although the economy is capable of meeting a higher level of demand this year than is likely to be made on it, we are not yet in a strong enough position to resume a policy of general expansion.

"In the first place, we have only just emerged from a dangerously strained position. We certainly cannot be sure that we have yet fully attained price stability; and whether we do or not will depend a very great deal on the moderation shown by all concerned in fixing the level of wages and salaries on which our costs so largely depend. In the second place, our external financial position, stronger as it certainly is, is one that still imposes caution. We have had a series of foreign exchange crises, and I am determined to spare no effort to see that we do not have another.

"Our present policy must therefore be to consolidate our improved position. I do not suggest that any intensification of our disinflationary measures is needed. The September measures succeeded in their first object of restoring confidence in the pound; and I was able last month to approve a reduction in Bank rate from the exceptionally high level of 7 per cent. But the moment has not yet come for any general relaxation of credit policy. It is still necessary for the banks to hold down the level of advances and for the hire-purchase restrictions to be kept on. The Capital Issues Committee will continue for the present to maintain their critical scrutiny.

"That is the position at the moment. But I would like to re-emphasize that as a Government we are convinced that the long-term welfare of this country demands a steady expansion of our national economy. That is the objective of all our policies. We shall, therefore, not keep the brakes on one day longer than we must. We dislike restrictions intensely and we are eager to resume expansion. But the lesson from the past is that as we resume expansion we must do so at a steady pace. There is no salvation to be won through increasing production indiscriminately at any cost. That would land us back in rising prices and balance of payments difficulties, and I do not believe that the nation wants to pay such a price.

"In any case, I am convinced that in present circumstances it is not a question of getting price stability at the cost of mass unemployment. Indeed, I see no prospect, I am glad to say, of mass unemployment at the present time. There are many ways in which purchasing power can be quickly stimulated if the general level of demand was suddenly and sharply to fall.

"The real risk of large-scale unemployment would arise if our currency lost its value, or we lost our competitive power to such an extent that we could no longer pay for our food and raw materials. In the meantime, we want to see production and employment just as high as we can, consistent with maintaining the value of our money.

Policy on Export Credit Insurance. "There are some things which ought to have priority for immediate action. It must, for example, be right to make every possible effort to foster our export trade. The Government have been considering whether there are any further ways in which exports can appropriately be encouraged. I have already referred to the Commonwealth's sterling balances. As far as these are run down, that should help both to maintain the level of development in the countries concerned and to benefit our export trade.

"We have recently undertaken a detailed review of the facilities provided for our exporters by the Exports Credits Guarantee Department. Our broad conclusion is that our export credit insurance service is as good as any in the world, and that there is no need, in present circumstances, to make any substantial change in the terms or period of insurance cover which the Department, on the advice of its Advisory Committee, is prepared to give. The President of the Board of Trade will be making a more detailed statement about this later in the debate.

"I emphasize 'in present circumstances.' We do not want to start a race in credit-giving, but if our competitors were to push the credit terms for a particular type of export beyond those normally insurable, and our exporters found themselves excluded from business, we would be bound to consider extending our cover too in the field of trade affected.

"We must also be ready to meet the possibility that the level of world trade may continue to fall. In this event the buying power of our customers and industrial activity in this country might be so affected that we would be ready to use the other powers which exist in Sections 2 and 3 of the Export Guarantees Act outside the normal insurance scheme for offering economic assistance to Commonwealth and other oversea countries, and to maintain export activity here. This might well involve the provision of guarantees or finance over longer periods than at present.

"It is impossible to formulate now a precise policy to cover hypothetical needs and conditions in the future. What is clear is that these other powers in the Export Guarantees Act might be used in the event of a major reduction in world trade involving a pressure on the available currency reserves of those with whom we trade. This, of course, would involve an additional claim on our resources, and the amount which we could devote to these activities would have to be balanced against other claims at the time.

"Then there is home investment. The existing tight restrictions on expenditure by central government, local government, and nationalized industries are flexible, and can and will be modified or relaxed at any time when the moment seems right. There will be no lack of candidates for relaxation and there need be no delay. In the private sector, as I have said, it looks as if about the same amount of investment will be carried out this year as last. But we do not want a gap to develop, and I hope that those who are planning for the future will continue to do so with steady confidence.

Measures against Patches of Severe Unemployment. "The need for caution generally should not make us overlook the problem of patches of severe and persistent unemployment. This is an intractable problem, but it is the Government's firm resolve to tackle it with the greatest energy from both ends—endeavouring to bring work to the worker, and when that is not possible, helping the worker to move to where work is available.

"We have two steps in mind in this connexion. First, I am confirming to the Capital Issues Committee and to the banks that the Government would not wish any projects for sound developments in areas where unemployment is substantially above the average to be held back by lack of credit or finance. I have also informed the banks that I will regard advances made for this purpose as excluded from their promise to do their best to hold the general level of bank advances. This puts such advances on the same footing as medium credit for exports.

"Secondly, the Treasury already have powers under Section 4 of the Distribution of Industry Act to give financial assistance mainly by loans to industrial concerns in development areas. The present areas of above-the-average unemployment are, however, mostly outside the present development areas. The Government have authorized the President of the Board of Trade to introduce an amending Bill. This will enable the Treasury to give financial assistance provided under the Distribution of Industry Act to a trade or business, if the purpose for which the finance is required is likely to raise the level of employment in a locality in which a relatively high rate of unemployment exists and would otherwise be likely to persist.

"There is one type of case in which we need not wait for new powers. The Government are ready to make finance available under Section 4 of the Distribution of Industry Act to assist in the provision of dry docks in development areas, if appropriate arrangements can be made for proper contributions from the enterprises themselves and from non-Government sources. The reasons are two-fold. There is a grave risk of a shortage of dry-dock accommodation, in particular accommodation for the larger tankers and other vessels which will be coming forward in increasing numbers in the next decade; and there is substantial unemployment in several places where dry docks have from time to time been projected. I hope this assistance will prove practicable and useful.

"Regarding unemployment generally, I only want to say this. It may sound as if my unwillingness to put expansion of production before everything at any cost means that I regard unemployment as of no great importance, and as a low price to pay for the success of an economic policy. That is not my view. I have always considered that the persistent lack of a chance of a job for the person who wants to work—as most people do—is one of the most soul-destroying hardships one can imagine.

"I could therefore never be associated, any more than I know any of my right hon. friends could be, with an economic policy which did not have as one of its main aims the provision of regular productive employment for all who are able and willing to work. It ought to be—and indeed it is—our continuous aim . . . to see just how near we can get to this objective without losing price stability and putting our balance of payments and our reserves in jeopardy.

Priorities of Economic Policy. "To sum up our policies: the four priorities we should set before us are clear. We must make sure that our economy is strong and sound so that it can stand up in whatever weather lies ahead. And that means we must put first the maintenance of the value of our currency and our competitiveness as exporters. We must maintain a high rate of savings and investment, for on that our national future depends. We must make sure our economy is not only sound but fair to all sections of the nation. And we must continue to reduce, as opportunity offers, the heavy burdens of taxation.

"That these aims can be achieved, I have no doubt whatever. but they will only be if the nation as a whole means them to be. The present time is a critical one. If all of us were to press our own sectional interests to the exclusion of the nation's interest, then—let there be no doubt—we should lose all and be back in deep and dangerous economic trouble, for which we should have no-one but ourselves to blame.

Taxation Policy. "It is with these principles and objectives in mind that I ask the House to consider my proposals in taxation. If, in the economic circumstances which I have described and with the limited resources which I have available, I were to remit substantial sums of taxation, the result would . . . be to jeopardize the consolidation of our economic position which must be our immediate task That would be rash indeed.

"On the other hand, I think that I can justifiably give up some small amount of revenue if by so doing I can strengthen our economy at one or two points, improve our tax system, and deal with several cases of special need. Those, therefore, are the objects to which I propose to devote my attention within the narrow limits of finance which I judge to be available this year I will start by mentioning a number of minor proposals which in various ways will help to improve our tax system.

Vehicle Licences. "The present arrangements are not very convenient for motorists, and produce an awkward peak load of work for the issuing authorities at the end of each quarter, particularly at the end of December. I propose to take powers to introduce a new system under which licences will be issued from the first day of the first month in which they are required for periods of four, eight, or 12 months. As an exception, licences costing £3 or less will be issued only for 12 months. The amount of the vehicle tax will be unchanged. The effect on the yield this year will be negligible, but owing to the changed incidence of payments, I am sorry to say the yield will be reduced by about £2 million in the first full year of operation. That goes against the grain, but it is a good thing to do. Details of the arrangements will be announced in due course by the Minister of Transport.

Abolition of Treasury Chest Fund. "Secondly, I propose to abolish the Treasury Chest Fund. Treasury Chests, which for over a century were the means of providing local currency for the use of our forces at a number of oversea stations, have now been closed down and the functions transferred to the War Office. The central fund itself can therefore be abolished and its capital, amounting to £700,000, can be transferred to the Exchequer. Would that I had more chests to abolish!

Tithe Redemption. "A third proposal concerns Tithe Redemption Annuities The scheme set up by the Tithe Act, 1936, is proving cumbersome and costly to administer. I propose to simplify it by providing for annual instead of half-yearly collection and for the compulsory redemption of annuities of £3 per annum or less, with power to increase this figure at a later date if necessary.

Time-Limits for Income-tax Claims and Appeals. "Next I propose to rationalize the various time-limits prescribed by the Income Tax Acts for appeals and claims to relief. The alterations will all be in the direction of making the time-limits more generous. This reform, which was recommended by the Royal Commission on Taxation, should ease the way of those who have to deal with our complicated tax laws.

Minor Income-tax Changes. "Another minor improvement is a proposal to give tax relief in certain circumstances on pensions for oversea service becoming payable under the Overseas Service Act.

"I am proposing in the Finance Bill to meet one point that has been pressed upon me in connexion with the Schedule E expenses rule. This will enable some deduction to be claimed in respect of subscriptions to professional societies with activities relating to an employee's work, and for certain statutory registration fees. It will cost £750,000 in the first year and £1 million in a full year.

"Finally, in this group I propose to remove from the law the anomalous rule that a charitable body, such as a church, cannot get its ordinary exemption from tax on property it owns if the property is used by an officer whose income exceeds £150 a year.

"Dividend Stripping." "I now turn to a small group of proposals which I have felt bound to include for the protection of the revenue. The first has to do with an activity known as 'dividend stripping.' This is a device for extracting the liquid taxed reserves of one company with considerable, and unjustified, income-tax advantage, to another company which gets those reserves as taxed dividends, and at a considerable cost to the revenue.

"Although the Lord Privy Seal [Mr. Butler] dealt with this in his autumn Budget of 1955 [see 14500 A], and despite stern warnings given then, I am sorry to say that apparently the fascination of 'dividend stripping' is such that it is still being practised by some. Although the form of the device has somewhat altered—it is now largely practised by companies with trading losses—it remains quite unacceptable, and I must put a stop to it.

"The Minister of Housing and Local Government, then in another office, gave clear warning in 1955 that the Government would not hesitate to legislate against subsequent attempts at 'dividend stripping,' and to make such legislation retrospective. Accordingly, the provisions I now propose will be retrospective to Oct. 26, 1955,

which was the governing date of the earlier legislation. This should make good a loss of revenue of £2 million a year. But the gain this year will be about £4 million because of the retrospection.

Revocable Settlements. "My next protective provision relates to Surtax. Under the existing law, if a man makes a revocable settlement and on revocation he or his wife might benefit, the income arising under the settlement is treated as his for surtax purposes. A particular settlement, which came before the House of Lords recently, was designed to defeat this law by the artifice of providing that a minimum sum of £100 should not be subject to the provisions of the settlement enabling capital or income to be appointed to the settlor's wife. The taxpayer was successful on this technical point.

"I cannot approve of such a stratagem. I propose to restore the law to what was originally intended, so that if any part of the settlement capital or income can go to the settlor or his wife a proportionate part of the income should be treated as the settlor's for tax purposes. This provision will apply for 1957-58 Surtax (payable on Jan. 1, 1959) to all settlements whenever made. But I shall excuse from its operation any settlement made before today that would otherwise be caught, if the settlement is made truly irrevocable within three months after the Royal Assent to the Finance Bill.

Estate Duty. "Under the present law, if a life tenant of settled property disposes of his life interest to the reversioner within five years of his death, estate duty is payable on the settled property on his death. But the converse case, where the reversioner sells his reversion to the life tenant, is not covered by the existing law, and the gap is being exploited to a considerable extent. I propose to close this gap. The broad effect will be to charge duty, when the life tenant dies, on the amount paid by the life tenant for any reversionary interest in the settlement which he has acquired within five years of his death. The legislation will apply only where the purchase of the reversion and the death of the life tenant both take place after to-day. I do not expect any material gain to the revenue this year, but there should be a gain of £2 million in a full year.

Stamp Duty on House Purchases. "I propose in a modest way to help people who wish to buy their houses. The full rate of stamp duty on conveyances of property is £2 per cent. There is a sliding scale providing lower rates of duty for conveyances of land and buildings where the consideration is less than £5,000. I propose to improve the scale of graduation and to carry it up to a figure of £6,000." The Chancellor then explained the new scales of duty for conveyances below £6,000 [see page 16113], and said that this change was estimated to cost £3,750,000 in the present year and £6,000,000 in a full year.

Income Tax Concessions to Old People. "The first two [small changes in personal taxation] affect some older members of the community, who I think we would all agree are in general having the most difficult time to-day.

"I propose to extend the income-tax exemption limits, which were first introduced last year, from £400 to £440 for the married couple where either husband or wife is 65 or over, and from £250 to £275 for the single person who is 65 or over. Where the income is below these amounts no tax at all will be payable. There will be an appropriate marginal adjustment for incomes slightly above the limits I have mentioned. To avoid misunderstanding I ought to make it clear that this provision, which is deliberately designed for very small incomes, will not give any benefit where the income exceeds £492 for a married couple and £306 for a single person.

"To help old people with rather larger incomes I propose to increase the income limit for the age relief, which is given where the taxpayer, or in a married couple one of the spouses, is 65 years old or more, from £700 to £800. This means that where the total income is below £800 the whole of the income, whether earned or not, will be treated for tax purposes as if it were earned income. This change will reduce the tax on a single person with an investment income of £800 by about £27; for a married couple with the same income by about £32. Here again there will be marginal provision for incomes a little above the limit set. The cost of these two reliefs taken together will be £2,750,000 this year and £4,750,000 in a full year.

Dependent Relatives Allowance. "I also propose to give some help to those who assist elderly or infirm relatives. At present a taxpayer is entitled to an income-tax allowance of £60 in such cases if the dependant's income does not exceed £105. I propose to increase that limit to £135, which is a few pounds above the new old-age pension figure of 50s. a week. This will ensure that an increase in social security benefits does not lead to a loss of tax relief.

Death Duties. "In death duties, I am proposing to remove the hardship which can arise when two persons such as husband and wife die together, perhaps in an accident, and the law has to presume that the elder has died first. In some such cases it can happen that death duty is levied twice. I propose to provide, in effect, that in such cases death duty shall be levied once only.

"I propose also that what is known as the existing 'quick succession' relief, which gives relief from estate duty on a graduated scale where real property or business assets pass on successive deaths within five years, shall be extended to cover other forms of property that pass in like circumstances. This will cost £1,500,000 this year and £3 million in a full year. Both these changes will take effect on deaths occurring after today.

Profits Tax. "Next I come to a considerable reform in company taxation. The Royal Commission on Taxation recommended, and I now propose, that the two rates of profits tax at present charged by reference to distributed and undistributed profits of a company shall be replaced by a single rate to be levied on the whole of a company's profits.

"This is generally agreed to be a desirable reform. Those responsible for the management of industry and commerce have emphasized to me most strongly that it would strengthen the financial structure of industry, improve the supply of capital to firms which need it most, and help to remove distortions in company finance. This will all help in modernizing and expanding our industrial system. It will also greatly simplify the tax code and the work of administration. The existing provisions for exemptions and abatements to companies with small incomes will continue

"To maintain the present yield of profits tax—about £275 million a year—a flat rate would need to be set at about 10½ per cent. I propose to set it at the more convenient figure of 10 per cent. The change will operate as regards profits from April 1, 1958, the tax on which, broadly speaking, will not be payable until next year. This will cost a negligible amount this year, £10 million next year, and £16 million in a full year.

"After the profits to March 31, 1958, have been dealt with, the contingent liability for payment of profits tax at subsequent distributions or liquidation will cease. This should remove a source of apprehension in the case of companies which have ploughed a big part of their profits back into the business, and should enable them to face the future with greater confidence.

"I am well aware that, although the yield of duty will remain broadly the same, there will nevertheless be some differences of incidence as between different sections and units of industry. Some that make lower distributions will pay rather more profits tax than hitherto. Some that make higher distributions will pay less. Only a few will break exactly even. The Royal Commission were of course aware of these effects when they made their recommendation. They are effects which must be faced if we are to change to a system which, I believe, is generally recognized to be sounder in the long run. I consider they should be faced now.

"I propose at the same time to give effect to the recommendations of the Royal Commission that all loan or share interest paid by building societies and co-operative societies, and all loan interest paid by the nationalized industries, should be deducted in computing their profits. These bodies will then pay profits tax at 10 per cent on their properly computed profits. There will be other consequential amendments of the profits tax law; in particular, a provision to protect the yield of revenue in the current year by countering any attempts to allocate normal dividends out of last year's profits which should bear 30 per cent tax to current periods.

Allowances for Capital Investment. "My predecessors have made changes in the system of taxation for capital assets in accordance with the need to encourage or discourage investment expenditure in the aggregate. I said earlier that I hoped plans for future developments in industry will continue to be made with confidence, and I want to give a little practical encouragement in this direction. I accordingly propose to increase the present initial allowances by a quarter . . . These increases should be of particular help to actively developing concerns which need to retain in the business a high proportion of their profits. This will in many cases provide a compensating benefit for the slightly increased profits tax which the concern may have to pay. The cost of these improvements in initial allowances will be negligible this year, £16 million next year, and £23 million in a full year.

Wine Duties. "When a reduction was made in the duties on imported wines in 1949 the change related only to light wines imported in cask. The duty on these wines was reduced by about a half, from 25s. to 13s. a gallon for foreign wines and from 23s. to 11s. for Commonwealth wines. There were good reasons for giving special relief at that time to light wines imported in cask, consumption of which had fallen to a low level. But this change in the structure of the wine duties has been accompanied over the years by a considerable change—perhaps distortion is not too strong a word—in the pattern of wine consumption. Consumption of light wines has expanded rapidly and is now twice the pre-war level. Consumption of heavy wines, on the other hand—that is, port, sherry, and other high-strength wines—is still at little more than half the pre-war level. This is not necessarily a direct consequence of the structure of the duty. In wine, I am advised, tastes and fashions change. But it cannot be disputed that the duties on light and heavy wines are now further out of alignment than is reasonable."

After saying that he could not "in present circumstances" accede to the trade's proposal for a reduction of 24s. a gallon, Mr. Amory announced a reduction of 12s. and went on: "The basic duty on foreign heavy wine imported in cask will accordingly be reduced from 50s. to 38s. a gallon, while the corresponding rate for Commonwealth wine will come down from 40s. to 28s. a gallon, thus maintaining the existing preference margin of 10s. a gallon. There will be a similar reduction of 12s. a gallon in the rates for heavy wines, whether still or sparkling, imported in bottle. The excise duty on still wines of comparable alcoholic strength produced in this country will be reduced by 12s. a gallon.

"The increase in trade to be expected from these reductions of duty will benefit the Commonwealth, especially Australia and South Africa, as well as those European countries, mainly Portugal and Spain, which supply us with heavy wines. These changes will operate from tomorrow . . . I estimate the cost at £2,750,000 this year and £3 million in a full year . . .

Entertainments Duty. "A number of changes were made in the duty on entertainments by my predecessor last year. A duty of £1 per licence was imposed on television, which had become a strong competitor with other entertainments. The duty on the cinema was reduced, while the theatre and sports, which had for long paid appreciably lower rates of duty than the cinema, were freed from duty altogether.

"It was not to be expected that the changes in public demand for entertainment which had been taking place would suddenly come to an end. But the movement during the past year has been on a scale which makes it necessary to consider whether some further adjustment in the duty is called for. Attendances at cinemas, which had been declining for some years, have in the last financial year fallen much more sharply. The industry have represented to me with vigour, both in a memorandum and at a meeting with the Financial Secretary, that in these circumstances the entertainments duty on cinemas should be abolished. Even members of this House have not been altogether silent.

"I have considered carefully all that has been said. I must say frankly that it cannot possibly be an object of Government policy to keep open the doors of every cinema in the country, regardless of the tastes and habits of the public. If people prefer to occupy more of their leisure time in other forms of entertainment and less in film-going, some reduction in the number of cinemas seems inevitable. However, I am satisfied that the present level of duty is, in the changed circumstances, now too high and should be substantially reduced."

After announcing the new rates, the Chancellor said that there would also be a simplification of the arrangements for collecting the duty in a way which should both assist the trade and save work in the Customs and Excise department. He went on: "This is a substantial relief, which should be of real assistance to the industry. It should be of particular help to the smaller cinemas, many of them in small towns, where the closing of what may be the only cinema can be a serious loss. I believe that there is still a keen demand for good cinema entertainment, even if audiences are smaller and more discriminating than in the past.

"In reaching this decision, I have had fully in mind the difficulty which the fall in box-office takings has caused to the industry as a whole—producers as well as exhibitors. I believe that we need to sustain a vigorous film-production industry. British producers will, of course, obtain a share of the reduction in duty under the ordinary contractual arrangements for renting films. This change should help them to continue to improve standards and to take full advantage of the openings for an improvement of earnings from film production which I believe the future will bring.

"In addition to the benefit which the producers will derive from the reduction in duty there is also an arrangement, as the House is aware, under which a levy based on cinema admissions is collected from the exhibitors and paid into a fund for the support of British film production. The question of the future yield of the levy is under review by the President of the Board of Trade, and I have consulted with him in order to satisfy myself that the proposed reduction in duty will provide room for any change he may consider necessary. My proposal, which will operate from May 4, will cost £13 million this year and £14,500,000 in a full year.

Purchase Tax Changes. - Rejection of General Sales Tax. "Before I come to the results of the general review which I have undertaken of purchase tax, I want to say a few words about a larger issue of which we have heard a good deal in recent months—namely, the possibility of substituting for the purchase tax a general sales or turnover tax imposed at a low rate over a much wider range of expenditure. Since the last Budget this possibility has been thoroughly examined, in the light both of our own experience in this country over the 17 years during which the purchase tax has been in force, and also of the systems of sales and turnover taxation employed in some other countries. Personally, I have always been attracted by the idea of a general tax at a low rate as an alternative to the purchase tax in its present form. I certainly did not approach this subject with any prejudice in favour of the existing system.

"But for all the attractions, I can see little prospect—at any rate in the foreseeable future—of changing over to a retail sales tax. Purchase tax yields nearly £500 million a year. I have had to assume, while I have been considering this matter, that we shall have to go on looking to some form of indirect taxation on a wide range of articles to produce a yield on about the present scale. First of all, what scope is there for broadening the base of the tax? Ideally, one may say that it ought to apply to all consumer expenditure. But how would this work out in practice?

"Personal consumer expenditure in the United Kingdom is about £14,000 million a year. Breaking this total down into the main items, we first have services at about £3,800 million. Theoretically, I know this is a potential field for indirect taxation. But does it make sense? The biggest element in this total is the cost of house accommodation. Then we have travel, insurance, fuel, school fees, payment for the chimney-sweep, for the undertaker, and so on. Could we really contemplate the complication and confusion of trying to tax these multitudinous ingredients of life in the modern world? I believe that the practical answer is 'no.'

"Next, we have between £4,500 million and £5,000 million spent on goods which are already subject to purchase tax or to other revenue duties—tobacco, liquor, petrol, and so on. Another £4,500 million is spent on food. I do not personally recoil in absolute horror at the idea of taxation on at least some forms of food. But it would surely be unrealistic to regard food as a major source of revenue.

"We are left, therefore, with less than £1,000 million of expenditure on a variety of untaxed goods—young children's clothing, many textiles, books, newspapers, household soap, and cleaning materials—a whole host of things which have at various times in the past been deliberately exempted from tax. Even assuming that all these goods were included in the scope of the present purchase tax, it would require a uniform rate of tax approaching 20 per cent of the wholesale value to produce the present yield. I believe, therefore, that the comprehensive sales tax charged at a very low rate but yielding the same revenue as the present purchase tax is for practical purposes something of a mirage. And the same is true of a turnover tax.

"Turning from the scope of the purchase tax to the method of collecting it, many people have suggested that it ought to be imposed at the retail rather than at the wholesale stage. This would, I know, have some advantages from the point of view of traders. But it would also have serious disadvantages. As present we collect purchase tax from about 60,000 manufacturers and wholesalers. If the tax were charged at the retail stage it would have to be collected from about a quarter of a million different points, if not more. It is not surprising that the view reached in 1940 was that it was much more efficient to collect the tax at the earlier stages on the smaller number of traders.

"I believe that that view is just as right to-day as it was then. And it is not merely a question of the number of collection points. We all know the small village general store which sells cigarettes, groceries, ironmongery, clothing, newspapers, indeed practically everything you can think of. All the takings go into a single till with few refinements of book-keeping. It would really be unthinkable to try to insist on anything more elaborate. For all these reasons, I have little doubt that this type of indirect taxation is, in general, most effectively and economically collected at the wholesale stage.

"Although I am no lover of the purchase tax and recognize its defects, I think that its shortcomings have been somewhat exaggerated in recent months. I know that there are anomalies. But whenever you classify things into categories, borderline cases arise which, taken in isolation, may sound absurd. I have come to the conclusion that the most helpful thing that I can do is to simplify the tax and to adjust it to a more sensible pattern.

"For obvious reasons violent and abrupt change is not in the interest of trade, but unfortunately anything approaching major reform of the tax involves substantial changes, at least in some sectors. Having chosen to grasp this nettle now, I have sought to leave the structure of the tax in such a shape as to allow any further changes to be made smoothly and with the minimum of disturbance to trade."

After announcing the purchase tax changes as set out in the summaries above and below, the Chancellor said: "With the exception of the changes affecting greeting cards, calendars, and so forth, where special considerations apply, these changes will be operative from to-morrow. They will cost £30 million this year and £41 million in a full year. I am glad to think that they will make at least a small contribution to holding down the cost of living."

Estimated Results in 1958-59 on Basis of Taxation Changes. "To sum up, the changes which I propose will cost £50,500,000 this year and £108 million in a full year. This leaves me, subject to the outcome of the present discussions on the financing of our forces in Germany, with an estimated surplus 'above the line' of £364 million and an estimated deficit overall of £236 million. I think these are about right.

"I hope that the House will consider that these measures, taken together, amount to a not inconsiderable step forward in simplification and reform. There is clearly no room for large relaxations this year, but my proposals do lighten some of the burdens on the taxpayer, as well as improving our fiscal system. They will also, I believe, help to strengthen our economy and, according to the best judgment I can make, should leave it balanced and poised ready to resume a steady rate of expansion just as soon as we can. I have done my best to produce a Budget this year that consolidates what we have gained and which is, at the same time, flexible and forward-looking. I hope I have succeeded."

As pointed out by the Chancellor, the estimated effect of the taxation changes will be as follows: (*a*) extension of age exemption limits for income-tax: a loss of £2,000,000 in 1958-59 and £3,000,000 in a full year; (*b*) extension of income limit for age relief: a loss of £750,000 in 1958-59 and £1,750,000 in a full year; (*c*) allowance in respect of subscriptions to professional societies, etc. (Schedule E expenses): a loss of £750,000 in 1958-59 and £1,000,000 in a full year; (*d*) measures against "dividend stripping" by restricting relief for losses where certain dividends are received: a gain of £4,000,000 in 1958-59 and £2,000,000 in a full year; (*e*) increase of initial allowances: a negligible loss in 1958-59, one of £16,000,000 in 1959-60, and £23,000,000 in a full year; (*f*) introduction of flat rate of profits tax: a negligible loss in 1958-59, one of £10,000,000 in 1959-60, and £16,000,000 in a full year; (*g*) extension of "quick succession" reliefs from estate duty: a loss of £1,500,000 in 1958-59 and £3,000,000 in a full year; (*h*) enlargement of life interests: a negligible gain in 1958-59 and one of £2,000,000 in a full year; (*i*) stamp duty reduction for house purchase: a loss of £3,500,000 in 1958-59 and

£5,500,000 in a full year ; (*j*) abolition of *ad valorem* stamp duty on credit instalment contracts : a loss of £250,000 in 1958-59 and £500,000 in a full year ; (*k*) reduction in duty on heavy wines . a loss of £2,750,000 in 1958-59 and £3,000,000 in a full year ; (*l*) cinema entertainments duty : a loss of £13,000,000 in 1958-59 and £14,500,000 in a full year ; (*m*) purchase tax changes : a loss of £30,000,000 in 1958-59 and £41,000,000 in a full year. Total net loss : £50,500,000 in 1958-59 and £108,250,000 in a full year.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. 1957-58 Budget, 15481 A ; Revenue and Expenditure Returns, 16111 A.)

Purchase Tax Changes. The following table shows the changes in Purchase Tax in detail :

Reductions in Rate of Purchase Tax.

From 90 *per cent to* 60 *per cent.* Hairdressing goods and toilet requisites ; perfumery and toilet preparations.

From 90 *per cent to* 30 *per cent.* Pictorial calendars, post-cards, letter-cards, and greeting cards ; toilet nippers and knives ; hair curlers.

From 60 *per cent to* 30 *per cent.* Household gas and electric appliances ; mirrors ; garden ornaments ; clocks and watches of precious metal ; musical instruments (other than gramophones, radiograms, etc.) ; walking-sticks ; smokers' requisites ; trunks, bags, wallets, etc. ; cameras and photographic films ; pictures, prints, etc. ; jewellery and imitation jewellery ; pictorial calendars, post-cards, and letter-cards (not charged at 90 per cent) ; fancy goods and toilet mirrors.

From 50 *per cent to* 30 *per cent.* Fur garments, fur headgear and haberdashery, fur skin (other than rabbit and sheepskin), and fur skin rugs.

From 50 *per cent to* 5 *per cent.* Rabbit and sheep skin.

From 30 *per cent to* 15 *per cent.* Other haberdashery ; wallpaper, display papers, paper serviettes, etc. ; garden furniture ; cane or wicker receptacles ; trophy cups, bowls, etc.

From 30 *per cent to* 5 *per cent.* Articles of apparel and accessories to apparel.

From 15 *per cent to* 5 *per cent.* Office and metal furniture ; hat, coat, and umbrella stands.

From 15 *per cent to nil.* Draught excluder strip ; water filters.

From 10 *per cent to* 5 *per cent.* Narrow fabrics (not exceeding 12 in. width).

From 10 *per cent to nil.* Woollen cloth (exceeding 12 in. width).

Increases in Rate of Purchase Tax.

From nil to 5 *per cent.* Protective boots for miners, quarrymen, etc. ; clogs and other wooden-soled footwear ; protective helmets for miners and quarrymen ; laces for garments or footwear.

From nil to 15 *per cent.* Cane or wicker shopping baskets.

From nil to 30 *per cent.* Oil-burning heaters (except for central heating) ; shopping bags and baskets (not of cane or wicker) ; brief-cases and document cases ; hairpins and tiepins of base metal.

From 5 *or* 15 *per cent to* 30 *per cent.* Certain cabinets, bases, tables, etc., for sewing machines.

All these changes will apply to goods delivered by registered manufacturers or wholesalers, or imported by unregistered persons, from April 16, 1958, except the reduction for pictorial calendars, post-cards, letter-cards, and greeting cards, which will take effect from a date to be fixed by Parliament.—(Times - Financial Times)

A. KENYA. — Arrests of Kikuyu Suspects.

The Kenya Government announced on April 13 that 153 Kikuyu suspected of being leaders or organizers of the outlawed *Kiama Kia Muingi* secret society (see 15964 D) had been arrested in an operation lasting two days. The bulk of the arrests were made in the Kiambu area. Although only a small percentage of the Kikuyu tribe was involved, the Government were alert to the possibility of the K.K.M. spreading and would not hesitate to take any steps necessary to deal with this or any other subversive organization. It was stated that the K.K.M. had carried out a number of oath-taking ceremonies, some of which were similar to those of Mau Mau.—(Times - Daily Telegraph) **(Prev. rep. 15964 D.)**

B. TUNISIA. — Membership of World Bank and International Monetary Fund.

Tunisia became a member of the International Bank and the International Monetary Fund on April 14, her quota in the I.M.F. being $12,000,000 and her subscription to the capital stock of the Bank 120 shares with a par value of $12,000,000. This brought the membership of both institutions to 66 ; the total of members' quotas in the Fund to $9,053,000,000 ; and the total subscribed capital of the Bank to $9,860,400,000.—(International Bank, Washington)

C. COSTA RICA. — Presidential Election.

Presidential elections held in Costa Rica on Feb. 2, 1958, resulted in the election of Señor Mario Echandi, candidate of the National Union Party. The unsuccessful candidates were Señor Francisco Orlich, of the ruling National Liberation Party, and Señor Jorge Rossi, of the Independent Party. Virtually complete returns, issued by the Supreme Electoral Tribunal on Feb. 5, showed 104,253 votes for Sr. Echandi, 98,068 for Sr. Orlich and 32,471 for Sr. Rossi. Elections were also held at the same time for two Vice-Presidents and a new unicameral National Assembly. The number of registered electors was 354,778.

Señor Mario Echandi (52), who is of Basque descent, was born in San José, the son of a former President of Costa Rica. A leader of the National Union Party for many years, he was Ambassador in Washington in 1950 and became Foreign Minister in the following year. He entered the presidential contest against President Figueres in 1953, but withdrew shortly before the election and successfully ran for a seat in the National Assembly. He will be inducted for a six-year presidential term in May.

At the invitation of the Costa Rican Government, the U.N. Secretary-General (Dr. Hammarskjöld) sent a three-man team to observe and report on the elections—the first time that any Latin American election had been held under international supervision.

President Figueres (the outgoing president) had previously asked Dr. Hammarskjöld to submit a list of individuals from democratic countries for this purpose, and the U.N. Secretary-General accordingly submitted some 40 names - including Government officials, newspaper editors, and authorities on constitutional matters for consideration by the Costa Rican Government. After consultations between President Figueres and the political parties contesting the election, it was agreed to invite a three-man team of foreign observers consisting of Dr. Horace E. Read, Dean of the Law School of Dalhousie University, Halifax (Nova Scotia) ; Dr. Herbert Fingsten, publisher of the Stockholm newspaper *Dagens Nyheter* ; and Dr. Raul Negro, president of the Supreme Electoral Tribunal of Uruguay. The Canadian, Swedish and Uruguayan representatives accordingly observed the elections (their expenses being paid by the Costa Rican Government) and subsequently drew up a report for presentation to Dr. Hammarskjöld.

Prior to the elections, President José Figueres said that foreign observers were being invited so as to ensure that the elections were "the cleanest ever" and in order to "set an example to the Americas." [Costa Rica has a tradition of democratic government and free elections, the *New York Times* commenting that recent elections in that country "have been orderly and democratically conducted campaigns compared to those of many other Latin American countries."] In a post-election statement, Señor Figueres said that the National Liberation Party (of which he is the titular head) would act as a responsible Opposition and was "not interested in creating difficulties for the new administration." As stated above, the N.L.P. was beaten by Señor Echandi's National Union Party, which was formerly in Opposition.—(New York Times)

D. RELIGIOUS LIFE. — New Archbishop of Wales.

The Electoral Council of the Church in Wales, meeting at Llandrindod Wells on Nov. 5, 1957, elected Dr. Alfred Edwin Morris (63), Bishop of Monmouth, as fifth Archbishop of Wales in succession to the late Dr. John Morgan. The new Archbishop had been Bishop of Monmouth since 1945, and was previously Bishop of Llandaff and Professor of Hebrew and Theology at St. David's College, Lampeter.

Dr. John Morgan (71), who died on June 26, 1957, succeeded Dr. Prosser as Archbishop of Wales in 1949, having previously been Bishop of Llandaff. The son of a former Archdeacon of Bangor, he served as a chaplain to the Forces in the 1914-18 war and was subsequently Rural Dean of Llandudno and Canon of Bangor before his election as Bishop of Swansea and Brecon in 1934. He was translated to the see of Llandaff in 1939.

Dr. J. J. A. Thomas (49), Archdeacon of Gower and Vicar of Swansea, became Bishop of Swansea and Brecon on Feb. 2, 1958, in succession to Dr. Glyn Simon, now Bishop of Llandaff. The six dioceses of the Church in Wales (disestablished in 1914) are St. David's, St Asaph, Bangor, Llandaff, Monmouth, and Swansea and Brecon.—(Times - Western Mail, Cardiff)

E. MALAYA. — The Royal Malay Regiment.

It was announced in Kuala Lumpur and London on April 8 that The Malay Regiment had been given the title of The Royal Malay Regiment by Tuanku Sir Abdul Rahman, King and Ruler of the Malayan Federation. The regiment has seven battalions, the first of which was formed in 1933. (Daily Telegraph) **(Prev. rep. Army, 15669 A.)**

A. MALTA.—Crisis in Financial and Constitutional Negotiations with Britain.

Further talks on the future of Malta opened at the Colonial Office on March 10 between the Colonial Secretary, Mr. Lennox-Boyd, and a Maltese delegation led by Mr. Mintoff, the Prime Minister. After a meeting on March 11 the talks were adjourned until March 18, the only contact between Mr. Lennox-Boyd and Mr. Mintoff in the meantime being by correspondence. A further meeting took place on March 19 which was attended by Sir Robert Laycock, the Governor of Malta, and Lord Perth, Minister of State for Colonial Affairs, but on March 21 Mr. Mintoff left London for Valletta without any statement being issued.

Mr. Lennox-Boyd made a statement on his talks with Mr. Mintoff in the House of Commons on March 25, explaining the reasons for the inconclusive ending of the discussions. The Colonial Secretary said :

" In the discussions which have just concluded, the Prime Minister of Malta refused to recommend integration to the Maltese people on the imaginative terms proposed by H.M. Government. He attempted to attach a political condition - namely, the right to independence on a unilateral basis, which strikes at the root of a union in mutual confidence which was the basis of the integration proposals.

" It is impossible for the U.K. Government to pledge Parliament to proceed with integration unless a very different state of mind is shown. H.M. Government are, however, prepared to resume discussion with the Maltese Government in order to find a *modus vivendi* pending consideration of long-term arrangements.

" The Prime Minister of Malta proposed that H.M. Government should immediately enter into further financial commitments of a most extensive character or be ready to grant independence to Malta. He suggested that in implementing the plan for integration the U.K. Parliament should undertake that, until such time as full economic equivalence was achieved, they would be prepared to grant independence to Malta if a Maltese Government were at any time during that period returned to office with a mandate for that policy. At a later stage he offered to withdraw this proposal, provided that the U.K. Parliament were prepared to extend to the Maltese people at their next election a choice between integration and independence.

" In the circumstances I revived the tentative suggestion that, rather than lose all the fruits of our long negotiations, H.M. Government would be prepared, if the Maltese people so desired, to proceed with interim constitutional and economic arrangements for a period of five years. The essence of this five-year plan would be that Malta would be granted a constitution broadly on the lines of that proposed under the integration plan, save for the time being making Malta part of the United Kingdom and providing for representation at Westminster ; the same economic and financial arrangements ; and, at the end of the five years, both Governments would consult together to review the working of the constitutional and economic arrangements and to consider whether they could then proceed to the conclusion of arrangements on a permanent basis.

" Let me tell the House what our other offers were. In the first place I made it abundantly clear that there was no question whatever of H.M. Government abandoning Malta and its people, or of their being indifferent to the economic consequences of the effect of defence cuts. I repeated again the assurances already given about the level of employment in the dockyard until 1960, and again confirmed that, pending investigation of the possibility of converting the dockyard to commercial use, no decision had been taken about its future thereafter. I repeated that we stood by the economic and financial commitments under the integration plan.

" What in fact were these ? We offered to provide over a period of five years capital assistance of £25,000,000 for diversifying the economy. We offered percentage grants towards the social services costing not less at the start than £1,000,000 a year, and with provision for it to rise materially thereafter. We offered additional assistance towards remedial measures in the event of there being, unhappily, substantial unemployment. We offered to set up a working party at once to consider what practical plans . . . could be made in advance to deal with the problems that might arise if, despite the joint efforts of both Governments, there should be substantial unemployment after 1960 owing to changes in defence policy. As to the cost of converting the dockyard to commercial use, we made it clear that this is a separate issue and that it would not affect the arrangements which I have described.

" At our last meeting we discussed the 1958-59 Budget. I said that in the light of our current financial difficulties, our contribution would have to be less than in the present financial year ; but we were still ready to provide the very substantial sum of £5,000,000. In our view, and that of independent economic experts, the Maltese Government are fully capable of making a contribution from their own resources, such as raising a local loan. There was therefore no reason why the rate of advance in Malta need be slowed down.

" It was then suggested that there should be a period of three months during which H.M. Government should provide interim financial assistance. The Maltese Government maintained, however, that this should be given without prejudice to the size of the U.K. contribution for the whole year, and to the question of the Maltese Government making a contribution from their own resources.

" It was not, however, possible to agree on the provision of interim financial assistance without prior agreement on these two points, since it would make the U.K. taxpayer liable for an unknown deficit which would, in the end, be determined only by the rate of expenditure which the Maltese Government decided to incur. Moreover, Mr. Mintoff maintained that he could not withdraw the resolution [passed by the Maltese Assembly on Dec. 3, 1957—see 15972 A] unless agreement had been reached at the end of three months on all outstanding issues. I regret that Mr. Mintoff did not accept H.M. Government's offers."

Mr. Lennox-Boyd's statement was followed by exchanges with Labour members, who expressed anxiety about the latest developments and called for an immediate debate, which was refused by the Speaker.

Mr. James Callaghan (Lab.) asked whether the difference between Mr. Lennox-Boyd's offer and Mr. Mintoff's demands, on which the breakdown had finally occurred, had not been " something between £5,000,000 and £6,000,000 a year " ; and whether it was " really worth jeopardizing relations with Malta for the sake of £1,000,000 a year or less."

Mr. Lennox-Boyd replied that it was " entirely untrue " that the so-called breakdown was over a small sum of money. The memorandum submitted by Mr. Mintoff during the talks had asked for a further £22,500,000 as an industrial fund, £5,000,000 for unemployment equivalents, and a further unspecified sum to make up the loss of revenue.

Mr. Callaghan then asked whether Mr. Mintoff had been invited to issue an agreed statement about the negotiations but had refused to do so. He also said that the financial arrangements to which the Colonial Secretary had agreed had been concluded before the Minister of Defence [Mr. Sandys] had gone to Malta and cast doubts about the continuance of the dockyard. Was it not " natural " in these circumstances that a Prime Minister, looking after his own people, should ask for a revision of these financial arrangements ?

Mr. Lennox-Boyd replied that though it would have been much better to have had an agreed statement on the talks, it seemed to Mr. Mintoff that the difference was so wide that it would be impossible to arrive at any such statement. As regards the dockyard, H.M. Government were " deeply concerned about the anxieties in the minds of those working in the dockyard," but he had made it clear that the financial arrangements reached in 1957 were a separate issue from the cost of the conversion of the dockyard to civilian use. Moreover, the Government had indicated their intention to keep the level of employment in the dockyard until 1960 at about 12,000 people, about half of them on ship-repair work. They were doing their utmost to arrange that private enterprise should take over the work of ship repairing, and the Admiralty would have work for such firms " for a long time, and indeed for the foreseeable future."

Mr. Aneurin Bevan (Lab.) contended that the statement about the five-year interim arrangement went back on the promise of integration, which envisaged three seats for Malta in the British House of Commons. If these seats did not exist, there could not be integration, it was " unwise and undesirable " for Mr Lennox-Boyd to have made a statement of the Government's intentions, which would be read in Malta as an abandonment of integration, without giving the House a further opportunity of discussing the entire matter. He accused Mr. Lennox-Boyd of having made a party issue out of what was a non-party issue.

Mr. Callaghan then moved the adjournment of the House on a " definite matter of urgent public importance, namely, the breakdown of the negotiations with the Malta Government and the abandonment of the principle of integration by the British Government." **The Speaker** refused to accept the motion, saying that the discussions with Malta had been going on for a long time and that this was not a new but a continuing matter. The proper course was to arrange for a debate through the usual channels.

Mr. Lennox-Boyd's Memorandum on British Proposals to Maltese Government.

The following summary setting out the main features of the proposals that had been worked out in negotiations with the Maltese Government was circulated by the Colonial Secretary on the same day (March 25).

It would be provided in legislation that Malta would be " comprised in the territories of the United Kingdom," and the British Parliament would be asked to affirm that in no event would Malta cease to have this status without the consent of the Maltese Parliament. Provision would be made for Maltese representation (by three members) at Westminster. The U.K. Parliament would affirm that the representation of Malta would not cease without the consent of the Maltese Parliament.

Parliament would also be asked to affirm that no British legislation would be extended to Malta with respect to matters within the competence of the Maltese Parliament, except where necessary for the fulfilment of H.M. Government's responsibilities for defence, external affairs, and certain other specified purposes.

The new Constitution for Malta would provide for the disappearance of the diarchy in its present form, and for the Governor to act in accordance with the advice of Maltese Ministers in matters within their responsibility. The Maltese Parliament would have power to legislate on all matters except those specified in a schedule of excluded matters, of which the main items would be defence and external affairs. The Maltese Government would have delegated to it certain executive powers in the field of external affairs, notably to negotiate trade agreements with neighbouring countries.

Her Majesty in Council would have power to make provision for Malta (by Order in Council) with respect to defence and external affairs, where such provision was urgently necessary.

There would be provision in the legislation for consultative machinery in Malta and London. The responsible Secretary of State would have certain powers of directing reservation of Maltese Bills affecting the responsibilities of H.M. Government for defence or external affairs, or certain other specified matters.

H.M. Government would approve and support the ultimate aim of the Maltese Government that, after a reasonable period of years, Malta should reach an economy and standard of living comparable to that of the United Kingdom.

It would be open to the Maltese Government after 12 to 15 years to request that their economy should become an integral part of that of the United Kingdom. The Maltese Government would recognize the obligation of the Maltese people to make sustained efforts to bring the economy of Malta to a level which, taking account of all relevant factors, was comparable to that of the United Kingdom. A development programme would be drawn up in consultation with H.M. Government.

Towards this plan, H.M. Government would as a first step provide assistance for the first five years, as follows :

Capital.—A grant of £25,000,000 over the five-year period; also the good offices of the U.K. Government to attract industry to Malta.

Recurrent.—A minimum annual contribution of £1,000,000 towards the social services, or more as the case might be, as follows :

(i) Education—one-third of the annual recurrent expenditure of the Maltese Government if it were less than £1,250,000, or one-half if such expenditure were £1,250,000 or more ;

(ii) Health—one-third of the Maltese Government's expenditure ;

(iii) Other social welfare services—one-quarter of the Maltese Government's expenditure.

The above financial arrangements would be reviewed, and the U.K. Government would be willing to assist the Maltese Government in taking remedial measures to be agreed if, in consequence of any drastic change in Imperial defence policy, the level of unemployment in Malta should reach, and for six months remain at, a higher level than in the United Kingdom.

A working party would be set up at once to consider in advance what plans might be made to deal with such a situation should it seem likely to arise, including the possibility of changes in the arrangements for unemployment benefit and gratuities for men discharged by the Service departments.

An independent commission could be set up after two years, and would in any case be appointed towards the end of the first five years, to review progress and to report on possible changes in the above arrangements.

The summary concluded with the proposals for a five-year trial period given by Mr. Lennox-Boyd in his statement to the House.

Parliamentary Debate on Malta. - Statement by Mr. Lennox-Boyd. - Labour Criticisms of Mr. Mintoff.

The Government's attitude in the dispute with Malta was debated in the House of Commons on April 1 on a motion by Mr. Lennox-Boyd that the House should " take note " of his statement on Malta of March 25.

Mr. Lennox-Boyd stressed that he had always hoped that it would be possible to treat the consequences of the Round-Table conference report as a parliamentary and not a party matter. Since March 1956, when the Government had accepted in principle the plan for the integration of Malta, considerable progress had been made in the difficult and lengthy negotiations to implement the plan. " The whole position," he went on, " has been much complicated by the insistence of the Malta Government on points of principle such as economic equivalence. Above all there has been the weary continual argument about the U.K.'s contribution to Malta's budget. I do not think I made the slightest impression in these two years in conveying to the Maltese Government that the U.K. had to consider other territories in gauging their financial contribution to Malta. They also have to consider the readiness of a territory to help itself."

Nevertheless, in the Anglo-Maltese talks of October 1957 agreement had been reached on most outstanding points in the detailed plan for integration ; though these were not initialled, it was " fair to say they represented a certain measure of agreement." In December, however, had come the Maltese resolution threatening the severance of the ties with the United Kingdom, and this had done " great harm to our relationship with Malta."

The United Kingdom's objective had been : to raise the standard of education and other social services to get a more skilled population, which would attract commercial firms to set up business in Malta ; to increase substantially the opportunities for employment outside the Service establishments ; and to avoid unemployment. There was no guarantee of the employment of an immutable number of people by the Services, or of the provision of alternative employment for men discharged ; any statement to the contrary in the resolution was not consistent with the facts. Mr. Lennox-Boyd declared: " I do not believe any Government could give that undertaking, which we could not give to the United Kingdom."

The Colonial Secretary continued : " It has always been realized that changes in the British Government's defence policy must bring acute anxieties to many people in Malta. In the discussions last year we jointly devised what was called among ourselves the 'remedial measures' clause. This ran as follows :

'The U.K. recognizes that any drastic change in Imperial defence policy affecting Malta might alter considerably the basis on which the capital expenditure plan was drawn up, and the level of employment in Malta. In such circumstances the U.K. Government would be willing to review the position -in particular, if in consequence of such a change in Imperial defence policy the level of employment should reach, and for six months remain at, a higher level than the rate of unemployment in the United Kingdom at the time. The U.K. Government would be willing to assist the Maltese Government in taking remedial measures to be agreed.' "

" Anything that has happened since then," Mr. Lennox-Boyd continued, " must be seen in the light of this undertaking. It would have come into effect under the integration plan, and was settled as early as February 1957. Later in that year, on Nov. 20, I told Mr. Mintoff that no decision had been taken as to the future of Malta dockyard after 1960. I also told him that there was enough work to keep the dockyard going for about three years at approximately the present level of activity, although some economies would be necessary. This assurance held whether it continued to be run as a naval establishment or whether it was transferred, in whole or in part, to commercial interests.

" In a recent communication to M.P.s, the Maltese Prime Minister has said that he had been warned that employment by the Admiralty after 1960 would be reduced to 30 per cent. This is simply not true. I repeatedly said to Mr. Mintoff that the level of activity would remain substantially the same until 1960. When I was able to give a more exact figure, I said that work could be guaranteed for about 12,000 in the dockyard and naval base until 1960. No decision had been taken regarding policy after 1960.

" Mr. Mintoff's reference relates to an Admiralty memorandum which was sent in an effort to help the Maltese Government, and not to add to its alarms or fears. In the memorandum the Admiralty, in fact, assured Mr. Mintoff that even if a commercial firm did take over the dockyard, the Admiralty would still be willing, as a means of helping that commercial firm to establish itself, and thus helping Malta, to provide naval work for some years after 1960 in addition to the commercial work being done there.

" I wish I could believe that this distortion by the Prime Minister of Malta is the result of misunderstanding. It seems a tragedy that a document designed to calm fears should, in fact, have been misrepresented. I feel that a large number of employees in Government and other activities in this country would be exceedingly glad if they could have had the solemn assurance I have given to the people of Malta in the last few months."

Despite the " imaginative terms " proposed by the British Government, Mr. Mintoff had made it clear to him (Mr. Lennox-Boyd) that he would be unable to recommend integration to the Maltese people on those terms. Mr. Mintoff had argued that because of the uncertainty about the dockyard the whole basis of understanding had been unilaterally changed, and that it was no longer possible for him to proceed with integration on this basis ; as an alternative, he had proposed independence.

In the light of these arguments he (Mr. Lennox-Boyd) had suggested that rather than lose all the fruits of the long negotiations, the British Government would be prepared to proceed with the interim constitutional and economic arrangements for a period of five years, after which both Governments could consider the conclusion of arrangements on a permanent basis. This plan, however, had found no favour with Mr. Mintoff, although he (Mr. Lennox-Boyd) believed that it merited the most serious consideration.

It could not be said (the Colonial Secretary continued) that the talks with Mr. Mintoff had broken down on " a mere bagatelle," for Mr. Mintoff had now said himself that he was budgeting for a deficit of £7,000,000. No-one should think for a moment that he (Mr. Lennox-Boyd) had disregarded the contribution made by Malta to the U.K., both historically and at the present time. But the annual grant-in-aid and other financial assistance had only become a regular feature of the Maltese Budget from 1955 onwards, when Mr. Mintoff assumed office. The Government did not regret this—they were, in fact, anxious to ensure a diversified Maltese economy—but there were other important considerations.

Mr. Lennox-Boyd went on : " The U.K.'s aid to Malta was provided in pursuance of a declaration signed in 1955 by the leaders of the Maltese Labour Party (the Government), the Maltese Opposition, and H.M. Government. This made it clear that there should be close co-operation in the detailed elaboration of the long-term development plan, and that the degree of success attained would depend on the hard work and self-discipline of the Maltese people, and on the Maltese Government and people making the best possible contribution from their own resources.

" To this day we have not received a draft long-term development plan from the Maltese Government, nor has it taken any steps to increase its contribution to that development from its own resources. During this period the Maltese nation's income and note circulation has greatly increased, and the island has never been so prosperous. The reasons put forward by Malta for not taking steps to increase the contribution have been mainly political. I am not unsympathetic to the political difficulties in raising taxation in a period of constitutional and political uncertainty. But the best part of three years has gone by without any move.

" I have been frequently criticized . . . for having, if anything, been too tolerant over the failure of the Maltese Government to make their own contribution. But the U.K. Government has never insisted that the contribution should be in the form of an increase in income-

tax. The independent Economic Commission suggested that a five per cent surcharge on existing taxes would be a desirable means of meeting the costs of the six per cent increase in Government wages and salaries which came into effect in January 1957; but the Maltese Government has refused to consider this, or to consider a small increase in Excise duty.

"An easy, practical, orthodox, and politically unembarrassing means exists by which such a contribution could have been made to the capital programme from a fiduciary issue. The Maltese currency fund at present stands at £20,000,000. A fiduciary element of £4,000,000 could be created by the application of the accepted proportion of 20 per cent. The first contribution which the Maltese Government might require to contribute to a local loan may be between £1,500,000 and £2,000,000. No good reason has been advanced by the Maltese Ministers as to why they should not follow the widely accepted practice in other territories. I fail to see why the Maltese Government considers that to adopt such a course would make them puppets of the British Government. Continued reliance on grants-in-aid from the U.K. is much more undesirable from the point of view of maintaining their own independence.

"At this point the Maltese Government are not merely rejecting the contribution of £5,000,000 from the United Kingdom. They are rejecting a continuance of aid even at last year's level, which was £6,070,000. They do not seem prepared to change their position regarding a contribution from their own resources. They are prepared to proceed with expenditure at a rate which would involve a total deficit for the whole year of about £7,000,000, which in their view should be met entirely by the U.K. taxpayers. This sort of financial ultimatum is not altogether unusual, but I do not think Members could expect the Government to submit to it."

After reasserting the Government's willingness to resume discussions to find a *modus vivendi* pending consideration of long-term arrangements, the Colonial Secretary went on: "I cannot disguise from the House the possibility of a grave financial situation. The Governor of Malta, on the advice of his Ministers and since the return of Mr. Mintoff and his colleagues, has assented to an Appropriation Bill for expenditure which would involve a deficit of about £7,000,000 in 1958-59. These are formal acts and do not necessarily involve the Governor's approval of the circumstances in which they were presented to him. The Governor was entitled to assume that the Maltese Ministers were making the necessary arrangements to provide money for the expenditure contemplated. Maltese Ministers have placed the Governor in an invidious position, but his assenting to the Bill and signing of the warrants does not imply that the U.K. Government are committed to meet the deficit."

Mr. Lennox-Boyd disclosed that he proposed to instruct the Governor to make this point clear to the Maltese Ministers. The U.K. would renew its offer of £5,000,000 for the whole year, or an immediate cash issue to the Maltese Government for the next few months, provided (*a*) that Malta accepted that the contribution for the whole year would not exceed £5,000,000, and (*b*) that any budgetary expenditure in excess of that amount would be met from Malta's own considerable resources.

The ensuing debate was noteworthy for the criticisms of Mr. Mintoff's attitude expressed by a number of Labour members, including Mr. James Callaghan, Mr. Herbert Morrison and Mr. Richard Crossman.

Mr. Callaghan (Lab.) said that the situation in Malta was becoming increasingly grave. The major point was the changed strategic concept in the Mediterranean, which had given rise to the uncertainty about the future of the dockyard and to misunderstandings—whether accidental or not—in the minds of Maltese Ministers.

As regards the financial situation, Mr. Callaghan thought that there was every case for the Colonial Secretary saying to Mr. Mintoff that Britain was not ready to go beyond last year's figure [i.e. £6,000,000], although it was "a little mean" to ask a Colony like Malta to cut expenditure by £1,000,000 so that Britain could stabilize her own. He agreed, however, that Malta should rely more on her own resources, and that she could well afford to make some contribution by raising a loan in the City in view of the fact that she had a 100 per cent cover for her currency. He also thought that the British Government's long-term financial proposals after integration were "not ungenerous," and that an agreement could well have been concluded along those lines. A guarantee of ultimate equivalent standards was "invaluable" to the people of Malta and should be "snatched" by the Maltese Government.

The Opposition believed, moreover, that Mr. Mintoff should have pushed ahead with the constitutional proposals much faster than he had, and that he was "ill-advised to bury them under a mass of financial detail," which could have been argued out afterwards. There was a time when the House of Commons would have passed the integration proposals with little opposition, but he was not sure that it would be so easy now; he himself still believed that integration was the best solution, but he recognized that there were real doubts about it.

In pushing the "independence" resolution through the Maltese Legislative Assembly, Mr. Mintoff had lost sight of the way in which members of the House of Commons regarded their position. "I do not see," Mr. Callaghan declared, "how any body of persons may ask to throw in their lot with us on condition that they may be able to opt out at a later date if they do not like it. If they throw in their lot with us, then they sink or swim. There can be no question of contracting out once they come in. I regard this resolution [i.e. the "independence resolution"] as extremely ill-advised. It has made the situation more difficult than it need otherwise have been."

Referring to the possibility of a Maltese general election in the near future, Mr. Callaghan said that it would be "a sorry day for Britain and Malta" if that election were fought on the issue of independence in a mood of irritation and exasperation with Britain. He urged an immediate resumption of negotiations, and a gesture to the Maltese people by enacting the constitutional arrangements outlined by Sir Anthony Eden in March 1956 [see 15347 A] but keeping them in suspense until an appointed day. The Government should also restore the subsidy from £5,000,000 to £6,000,000.

Mr. Herbert Morrison (Lab.) was strongly critical of Mr. Mintoff's attitude, saying that if he (Mr. Morrison) had been a friend of political integration, Mr. Mintoff's recent conduct would have made him doubtful about supporting it. There could be stiff arguments in the course of free negotiations, but it was a different thing when one of the parties said that he must be given what he wanted "or else." If that was going to happen now, what would it be like when there was parliamentary representation for Malta?

Mr. Morrison added that he himself did not like the idea of Maltese representation in the House of Commons. It would be confusing and difficult, and once the principle was conceded other Colonial territories might ask for representation on a similar basis. Maltese representation was based on the French practice, which, judging by the present unhappy fate of the French Colonial territories in North Africa, did not seem to be working very successfully. In conclusion, Mr. Morrison asked the Government to resume negotiations with Malta as soon as possible and do all they could to get a friendly atmosphere, whilst dropping the idea of Maltese representation at Westminster. It would "not hurt the Labour Party if its members were not afraid to stand up and say that, on this issue, by and large Britain had been right."

Mr. Aitken (C.) did not agree that there was any other solution except integration. Whatever difficulties there might be with Mr. Mintoff, Britain was still "bound by duty and conscience to be generous to Malta," as she had been responsible for building up the Maltese economy based on British requirements. **Mr. Houghton** (Lab.) also thought that, in spite of Mr. Mintoff's "provocations," Britain should "try to rise above them and discharge her duty to Malta."

Mr. Richard Crossman (Lab.) said that it was "an extremely bad habit to go on paying money to people who do nothing but insult one"; it was "paying Danegeld for nothing." He appealed to Mr. Mintoff to "take cognizance of the difference between the present debate and the one two years ago, as there was "a serious decline from the point of view of the friends of integration" By and large the obstacles in the last two years had come from the author of the idea of integration—Mr. Mintoff—and it was "a terrible disappointment" that the man who had had this "wonderful idea" should have made it far more difficult for the Government to persuade their supporters to carry the policy through. Mr. Crossman suggested that the Government should take the claim for independence at its face value and ask Mr. Mintoff to say in detail how he proposed to achieve it; there was "no better way of teaching the people of Malta the facts of life than to take their claim seriously."

Mr. Richard Fort (C.) said: "My sympathy is with Mr. Mintoff in trying to get the British to do what we so much dislike doing—namely, to be precise in constitutional as well as in financial matters. Mr. Mintoff is an extremely intelligent representative of the Mediterranean thinker and politician, and it is precisely because his whole outlook is so entirely different from ours in this House that I have been consistently opposed to the integration proposal. That is why I found myself in sympathy with the criticism of the integration scheme which Mr. Morrison made. The principal argument advanced by those who support integration . . . seems to be that there is no alternative. I agree. To this extent I listened with by no means complete disagreement to Mr. Crossman when he said that if the Maltese are so concerned about their standing in the world, concerned to the extent of wishing to put aside very valuable financial arrangements, then we as well as they should think about their becoming an independent country. In saying that I realize that I am making a tacit decision on a subject about which I am singularly ill-equipped to take a decision—the strategic developments in the next decade or further ahead. It seems to me, however, that it is no argument for integration to say that those who oppose it are not prepared to face the alternative, when in fact there is at least one alternative the full consequences of which should be much more carefully examined than they have been so far—namely, independence.

Sir Godfrey Nicholson (C.) said that he knew Mr. Mintoff personally and thought him a "brilliant administrator," but "five per cent of him was completely unpredictable." It was no good Mr. Mintoff thinking he could "bring off a marriage on the shot-gun principle."

Mr. Chuter Ede (Lab.) said that as a member of the Round-Table conference he had "moved reluctantly towards integration," but having been to Malta, seen the people, and realized the difficulties, he had found no alternative to it. He hoped that some fruitful decision would be reached long before the proposed five-year period had expired.

Mr. Profumo (Under-Secretary, Colonial Office), who replied to the debate, emphasized that the Government would wish to do just as much to safeguard against possible unemployment in Malta, especially if it arose as a result of any change in British defence policy, as they would try to do in the case of unemployment in Britain. They could go no further than that, and could not possibly accept the Maltese Government's demand that the level of Service employment in Malta should be maintained indefinitely at any particular level, or that every man declared redundant should have an alternative job guaranteed by the Services and financed by the

British taxpayer. Every effort had been made to provide all possible assurances to the Maltese Government and people about the future of the dockyard, but there was "no place for pistols in negotiations." The British Government were ready to negotiate on the basis of a five-year trial period, at the end of which it might be possible to proceed with integration or some other long-term constitutional plans acceptable to the Government of the day.

The motion was then agreed to.

Statement by Maltese Delegation.

The Maltese Government delegation which took part in the London talks issued a statement on March 31 stressing that their main representations had centred on finding a solution to two urgent problems, one economic and the other financial.

With regard to the economic side, the Maltese Government had reached the conclusion that the Admiralty would discharge 5,000 to 8,000 men from the dockyard after 1960; the repercussions on civilian employment were expected to produce a total of between 15,000 and 24,000 unemployed out of a total working population of 85,000. Tentative proposals had been put forward for immediate measures "to forestall a catastrophe after 1960," but the British Government did not believe there would be large-scale unemployment after that year. "At the last minute" the British Government had suggested a fact-finding committee to report on future economic trends, and the Maltese delegation had suggested that discussions on remedial measures should be reopened immediately the fact-finding committee had reported. "That is how negotiations on that vital subject were left."

As regards the financial side—with special reference to the proposed reduction of the U.K. contribution to Malta from £6,000,000 to £5,000,000 in 1958-59—the delegation said that Britain's adherence to a rigid policy of deflation, if "blindly applied to Malta in the local context of unemployment and under-employment," would produce the opposite effect from that intended. In the past the British Government had agreed that Malta should put off additional taxation, the raising of public loans, and the use of the investments backing the Maltese currency until her economic and political conditions had improved. The new defence policy had not contributed to "bringing this brighter future in sight"; instead, it called for a greater contribution from Britain.

Finally, the delegation had repeatedly told Mr. Lennox-Boyd that if an acceptable solution were found to these issues, the Maltese Government would champion integration at the impending general elections. Otherwise the Maltese people should be allowed to choose "not between integration and their present colonial status but between integration and independence."

Mr. Mintoff's Threats to Britain. - Demand for Integration on Maltese Terms or Independence.

Speaking in Valletta on April 6, at an open-air mass meeting of the Malta Labour Party, Mr. Mintoff made an intransigent speech in which he demanded "integration on our terms or independence."

Mr. Mintoff said that it was "untrue" that the "independence" resolution of December last had caused the present crisis in relations with Britain, as had been alleged by the British Government. Britain could "not use Malta as she thought fit and then give financial aid as she thought fit," and no serious Government could accept such a situation. Malta still preferred integration with Britain, but the alternative of independence remained; in that case Malta would turn the naval dockyard to commercial use in much the same way as Britain proposed to do.

He had been told in London that in the event of independence Malta would lose £5,000,000 annually, and he had replied that independence did not mean that another nation would not replace Britain. He had also been told that in this case he would be letting the Russians into Malta, and that the Maltese would be unable to stop them; he had replied that it would not be up to Malta to do so, but up to Britain. Referring to a recent visit to Libya, Mr. Mintoff said that Britain was paying that country more than she had ever paid Malta "in order to keep a few soldiers there," while the Americans were paying still more for the use of one airfield; in addition, the United Nations were also helping Libya, and Russia had offered that country £10,000,000 "without strings." NATO was not paying Malta anything in return for the use of the island, but "it would not be long before they would have to start doing so"; the Maltese would "no longer be ordered about" and "whoever wants to use Malta must pay for her."

After warning Britain that she should keep Cyprus in mind, as well as other territories which she had lost because she had tried to rule by "outdated methods," Mr. Mintoff declared: "We do not want the Russians; we want work and equality with the British." If, however, Britain did not give guarantees for the employment of redundant dockyard workers, and if she did not increase her contribution to the island's Budget, the Maltese people would "fight for independence with the same vigour as they fought for integration."

Demonstrations by the Malta Labour Party in support of Mr. Mintoff took place in Valletta on April 7-8, many of the demonstrators carrying placards with the words "Englishmen pay up or go home." Anti-British slogans were shouted outside the Governor's residence and the headquarters of the armed forces, and there were some stone-throwing incidents. Valletta was temporarily placed out of bounds to British and U.S. troops, and Commandos stood by to prevent disturbances.

Archbishop of Canterbury on Anglican Rights in Malta.

Uneasiness about the position of the Anglican and other religious minorities in Malta was expressed by the Archbishop of Canterbury (Dr. Geoffrey Fisher) at a meeting of the Church Assembly in Westminster on Feb. 12.

The Archbishop's statement was made in connexion with a motion on Malta tabled by Sir Kenneth Grubb (vice-chairman of the House of Laity of the Church Assembly) and worded as follows: "That this Assembly, concerned at the extent to which the Anglican and other religious minorities in Malta continue to suffer discriminating disabilities inconsistent with their right to tolerance, urges the authorities of the Church of England to make it clear beyond all doubt that no scheme for integration of Malta with Britain can be acceptable which does not include specific guarantees for religious freedom in Malta under the civil law."

The Archbishop of Canterbury spoke as follows on the position of religious minorities in Malta:

"As the Assembly knows, plans have been under discussion for some long time by which Malta might be made constitutionally a part of the United Kingdom, with representatives in the House of Commons . . . It is not for me to express any opinion about the political and constitutional aspects of this proposal. But there is one aspect of it which directly concerns Christian people both in Malta and in the United Kingdom. It need hardly be argued that under any such proposal there must be absolute security that the conditions of religious liberty which operate in Great Britain shall operate no less effectively in Malta also.

"In fact, the principles of religious liberty are already enshrined in the present Constitution of Malta. In the Declaration of Rights in 1802 (quoted and endorsed by the Round-Table Conference) occurs this clause: 'That freemen have the right to choose their own religion. Toleration of other religions is therefore established as a right; but no sect is permitted to molest, insult, or disturb those of other religious professions.'"

Dr. Fisher also pointed out that Section 3 of the present Constitution of Malta contained the following clauses:

"(i) All persons in Malta shall have full liberty of conscience and enjoy the free exercise of their respective modes of religious worship.

(ii) No person shall be subjected to any disability or be excluded from holding any office by reason of his religious profession."

The Archbishop continued: "Some months ago I had discussions with the Colonial Secretary on this matter. He gave me an assurance that these same provisions safeguarding religious liberty would be repeated in any new constitutional agreement with Malta and that he would consider it his duty to ensure that, so far as it lay in his power to do so, these constitutional provisions should be maintained and enforced. That assurance was given, of course, in entire good faith, and I quoted it in a speech which I made to the British Council of Churches.

"Since then, however, I have grown increasingly uneasy. The history of this matter has been unhappy. Anglicans and others in Malta have often and grievously suffered denials of their proper liberties, and the Colonial Office for many years past has been very unwilling to give us any help or encouragement in the assertion of our proper claims to the rights and equalities of religious freedom.

"In recent months I began to wonder whether it should not be made quite plain that, in the view of the Church of England and of other churches, the Roman Catholic Church in Malta must be prepared to see Anglicans and others exercising the same liberties of conscience and religious profession, and enjoying the same ecclesiastical freedoms, as are an essential part of our constitutional freedoms here, and indeed of the British way of life.

"Accordingly, knowing that failure to apply the provisions in the present Constitution of Malta had often in the past given rise to serious dissatisfaction, and that any attempt under the new Constitution to change this situation would be unwelcome to the Church authorities in Malta, I took the matter up again a short while ago with the Colonial Secretary. I have had discussions with him and the Lord Chancellor, and I have submitted a full memorandum to them on the subject, which they are now considering.

"I think, therefore, that while Sir Kenneth Grubb's motion would have been very useful in showing how deep and widespread is the concern of the Church of England on this fundamental matter of human rights and religious liberties in Malta, we ought not to attempt a debate on the matter at short notice in this session of the Church Assembly."

The Maltese newspaper *Lehen Is Sewwa*, organ of the Catholic Action in Malta, replied to Dr. Fisher in a leading article on Feb. 19. It recalled the guarantees of religious toleration embodied in the Declaration of Rights of 1802 and the island's present Constitution; alleged that the Protestants in Malta had at times been "aggressive" in the past, notably during the early 19th century; and added: "Malta is Catholic and . . . has the right to principles on which it has based itself for twenty centuries. This is a question in which Dr. Fisher has no right to interfere." The newspaper is regarded as representative of Roman Catholic opinion in the island. A. WESTERN POWERS - SOVIET UNION.—American and British Reactions to Soviet Suspension of Nuclear Tests. - Khrushchev-Eisenhower Correspondence.

American and British reactions to the suspension of nuclear tests by the Soviet Union are summarized below, together with other developments since the Supreme Soviet's resolution of March 31 (see page 16102).

Statements by U.S. State Department, President Eisenhower, and Mr. Dulles.

The U.S. State Department issued a statement on March 31 making the following "general observations" on the Soviet announcement:

"The Soviet statement comes on the heels of an intensive series of secret Soviet tests [see 16095 B]. They should arouse world opinion to the need to deal in an orderly and dependable way with the testing and related aspects of the disarmament problem.

"Soviet official propaganda incessantly seeks to create abroad the image of a peace-loving Soviet Government. But that same Government openly defies the United Nations with respect to both the substance and the procedure of disarmament.

"The U.N. Charter gives that organization broad authority with reference to principles of disarmament and the regulation of armaments. In the exercise of that authority the U.N. General Assembly has, by an overwhelming vote, approved comprehensive first-stage disarmament proposals and called on the nations concerned to begin at once technical studies as to how these proposals might be carried out. These studies include the studies needed for supervised suspension of nuclear testing. The U.S.A. stands ready instantly to respond to that resolution. But the Soviet Union refuses to comply.

"The same General Assembly reconstituted and enlarged its Disarmament Commission. The United States wants that Commission to carry out its mandate. But the Soviet Union boycotts the Commission.

"The Charter makes the Security Council responsible for formulating plans for . . . the regulation of armaments. The U.S.A. has recently proposed to the Soviet Union that this responsibility be discharged. But the Soviet Union refuses to co-operate.

"The Soviet Government declines to deal with the subject of armaments in any of the several ways prescribed by the U.N. Charter. It prefers elusive formulations of its own.

"It is elemental that free nations which want to remain free will not, and should not, forego their indispensable collective capacity to deter and defend against aggression merely in reliance on a Soviet statement of intentions for which there is no system of verification, which can be evaded in secrecy and altered at will.

"The U.S.A. again calls on the Soviet Union to deal with the vital problem of disarmament in an orderly way, in accordance with the U.N. Charter, to which the signature of the Soviet Union is affixed. That Charter constitutes a solemn agreement. If it is nullified by the Soviet Union, why should the world place confidence in new Soviet engagements?"

At a press conference on April 1 Mr. Dulles described the Moscow announcement as "propaganda," since the Soviet Union "would naturally suspend tests after the conclusion of a series" [i.e. the nine nuclear tests held in the U.S.S.R. between Feb. 22 and March 22]. After saying that the U.S. Administration had had "foreknowledge" that the Soviet Union would probably "make a gesture" after the end of its latest test series, Mr. Dulles disclosed that a White House meeting had been held ten days earlier to discuss "whether to try to steal a march on the Soviets by ourselves announcing a suspension of testing, at least for the time being." It had been decided, however, "in fairness to our responsibilities and our duties to the American people," that the Administration should proceed with its programme of developing smaller and "cleaner" nuclear weapons, rather than abandon it "merely for propaganda advantages."

President Eisenhower, at his weekly press conference on April 2, described the unilateral suspension of Soviet nuclear tests as a "gimmick" that was "not to be taken seriously"; amidst the vast range of East-West problems, the question of test suspension was "just a side issue" that the Soviet Union had seized upon for propaganda purposes. This, however, did not mean that the U.S.A. should not try to seek some common ground with the Soviet Union wherever possible, nor had he abandoned hope of "a sufficient conciliatory attitude by the Soviets so that there could be a constructive summit meeting." The President confirmed that the Administration had considered the unilateral suspension of U.S. tests prior to the Russian announcement, but had rejected this for the reasons mentioned by Mr. Dulles.

In the course of his statement President Eisenhower listed a number of U.S. proposals for international disarmament and *détente* made since the end of the Second World War, all of which had been rejected or ignored by the Soviet Union. They included:

(1) The "Baruch plan" for the international control of atomic energy, presented to the United Nations in June 1946.

(2) The "open skies" proposal made at the Geneva summit conference in July 1955.

(3) The proposal for the peaceful use of outer space, presented by Mr. Cabot Lodge in the U.N. General Assembly in January 1957 and elaborated in his (the President's) letter to Marshal Bulganin of Jan. 12, 1958.

(4) The proposals presented in August 1957 to the London sub-committee of the U.N. Disarmament Commission, including technical studies aimed at drawing up an inspection system for verifying the suspension of nuclear tests; cessation of the production of fissionable material for weapons purposes; and the transfer of nuclear weapon stocks to peaceful uses.

(5) The proposal that the U.S.A. and the U.S.S.R should agree not to exercise the veto power in the Security Council, contained in his letter to Marshal Bulganin of Jan. 12, 1958.

At his press conference on April 9, President Eisenhower said—in reply to questions—that he would "seriously consider" ending American nuclear tests after the completion of the forthcoming summer series at Eniwetok, provided that he was convinced by U.S. scientists that they had all the information needed to make "clean" nuclear weapons. At an earlier press conference on March 26, the President had said that the purpose of the Eniwetok tests would be to demonstrate to other nations "the progress our scientists are achieving in reducing radio-active fall-out from nuclear explosions"; he added that foreign scientists, including scientists from Communist countries, would be invited to witness "a large nuclear explosion" in which fall-out would be "drastically reduced."

Mr. Khrushchev's Letters to President Eisenhower and Mr. Macmillan. - President Eisenhower's Reply.

Letters were sent by Mr. Khrushchev on April 4 to President Eisenhower and Mr. Macmillan drawing attention to the Supreme Soviet's resolution of March 31 on the suspension of nuclear tests by the U.S.S.R., and urging the U.S. and British Governments "to follow this example."

The letters were largely a recapitulation of the resolution adopted by the Supreme Soviet, and of the arguments adduced by M. Gromyko in his speech to that body. After saying that experimental nuclear tests had "already now, in peace-time, become hazards to the health of innocent civilians in various countries," and referring to the petition by 9,000 scientists from 44 countries for the immediate suspension of tests [see page 16013], Mr. Khrushchev commented: "Today nuclear weapons are possessed by only three Powers—the U.S.S.R., the United States, and the United Kingdom—which makes agreement on ending tests relatively easy to achieve. If the tests are not ended now, other countries may also develop nuclear weapons soon, and then agreement to end tests will, of course, be much more difficult."

Mr. Khrushchev's letter ended: "If the Powers now possessing nuclear weapons . . . also decide to give up further tests, this problem . . . will be finally solved and a big step will thereby be taken to strengthening peace and confidence among States. However, if those Powers refuse to respond to this decision of the Soviet Government and continue experimenting with atomic and hydrogen weapons, the Soviet Union will naturally have no other choice but to consider itself free, in the interests of its security, from its commitment to end nuclear tests. The Soviet Government would not like this to happen . . ."

In his reply to Mr. Khrushchev, sent on April 8, President Eisenhower urged that U.S. and Soviet experts should immediately begin to work out the technical problems involved in establishing a system of international control for "a dependable and agreed disarmament programme." The President's letter was worded as follows:

"I have your communication of April 4 repeating, in substance, the already widely publicized statement of the Soviet Government with reference to the suspension of nuclear testing.

"It seems peculiar that the Soviet Union, having just concluded a series of tests of unprecedented intensity, should now, in bold headlines, say that it will not test again, but add, in small type, that it may test again if the United States carries out its already long-announced and now imminent series of tests. The timing, wording, and manner of the Soviet declaration cannot but raise questions as to its real significance.

"The position of the United States on this matter of testing is well known. For several years we have been seeking a dependable ending to the accumulation of nuclear weapons and a dependable beginning to the steady reduction of existing stockpiles. This was my 'Atoms for Peace' proposal, made in 1953 before the United Nations. Surely, the heart of the nuclear problem is not the mere testing of weapons, but the weapons themselves. If weapons are dependably dealt with, then it is natural to suspend their testing. However, the Soviet Union continues to reject the concept of an internationally supervised programme to end weapons production and to reduce weapon stocks. Under those circumstances of the Soviets' making, the United States seeks to develop the defensive rather than the offensive capabilities of nuclear power, and to learn how to minimize the fissionable fall-out. It goes without saying that these experiments, so far as the United States is concerned, are so conducted that they cannot appreciably affect human health.

"Perhaps you recall the joint declaration made by the U.K. and U.S. Governments at Bermuda on March 21, 1957. We then declared that we would conduct nuclear tests only in such a manner as would keep world radiation from rising to more than a small fraction of the levels that might be hazardous. We went on to say that we would continue publicly announcing our test series well in advance of their occurrence, with information as to their location and general timing.

"We further said that we would be willing to register with the United Nations advance notice of our intention to conduct future nuclear tests, and to permit limited international observation of such tests if the Soviet Union would do the same.

"The Soviet Union has never responded to that invitation. Its latest series of tests was conducted behind a cloak of secrecy, so far as the Soviet Union could make it so. Nevertheless, as I recently stated, it is the intention of the United States to invite observation by the U.N. of certain of our forthcoming tests.

"Not only did the Soviet Union ignore our Bermuda proposal on testing, but it has persistently rejected the substance of my 'Atoms for Peace' proposal. It refuses to agree to an internationally supervised cut-off of the use of new fissionable material for weapons purposes and the reduction of existing weapon stocks by transfers to peaceful purposes. During the five years since I first proposed 'Atoms for Peace,' the destructive power in our nuclear arsenals has steadily mounted, and a dependably controlled reduction of that power becomes ever more difficult.

"Now that you Mr. [Khrushchev] have become head of the Soviet Government, will you not reconsider your Government's position and accept my proposal that fissionable materials henceforth be manufactured only for peaceful purposes? If the Soviet Union is as peace-loving as it professes, surely it would want to bring about an internationally supervised diversion of fissionable material from weapons purposes to peace purposes.

"If the Soviet Union is unwilling to accept 'Atoms for Peace,' there are other outstanding proposals by which the Soviet Union can advance the cause of peace. You will recall my 'open skies' proposal made to you and Chairman Bulganin in Geneva in 1955. You will also recall my proposals for the international use of outer space for peaceful purposes, emphasized in my recent correspondence with Chairman Bulganin. These proposals await Soviet acceptance . . .

"If there is ever to be an agreed limitation or suspension of testing—and the United States hopes and believes that this will in due course come about as part of a broad disarmament agreement—plans for international control should be in instant readiness. Why should we not at once put our technicians to work to study together and advise as to what specific control measures are necessary if there is to be a dependable and agreed disarmament programme?

"The U.N. General Assembly has called for technical disarmament studies in relation both to nuclear and conventional armaments. The United States says 'Yes.' I urge that the Soviet Union should also say 'Yes.' Then we can at once begin the preliminaries necessary to larger things."

Soviet Protest at Forthcoming U.S. Nuclear Tests.

The Soviet Government had previously protested to the United States on March 28 against the forthcoming U.S. nuclear tests in the Pacific, following an earlier announcement by the State Department (Feb. 17) that a large ocean area round the Marshall Islands would be dangerous to shipping from April 5, 1958, until further notice.

After referring to the fact that the Marshall Islands were a trust territory administered by the United States under the U.N. Charter, the Soviet Note asserted (1) that the holding of nuclear tests in the Marshalls would "violate the commitments assumed by the U.S.A. with regard to the trust territory, and also violate the principles of international law with regard to the freedom of the high seas"; (2) that the establishment by the U.S.A. of "a vast danger zone of 1,400,000 square kilometres" [about 540,000 square miles] would "not only hamper freedom of navigation and fishing but also infringe the rights of other States and inflict serious damage on them"; (3) that "the holding of nuclear tests on a trust territory is contrary to the principles of the international trusteeship system"; and (4) that radioactive substances resulting from the tests would contaminate the winds and ocean currents.

A State Department spokesman pointed out on March 29 that the Security Council's approval in 1947 of U.S. trusteeship over the islands was "clearly predicated upon the fact that the islands were a strategic area in which nuclear tests had already been held [in 1946] and would be held in future." The spokesman made it clear that the forthcoming test series would be carried out according to schedule.

Statement by Mr. Macmillan. - Immediate Ban on Nuclear Tests urged by Labour Party Leaders.

The following statement on the Soviet suspension of nuclear tests was made by Mr. Macmillan on April 1 in the British House of Commons:

"Any formal statement of H.M. Government's position must wait until we have had the opportunity of consultation with our allies and partners. Meanwhile, I note that the Russian announcement was timed to come after the completion of an extensive and accelerated series of Russian tests, and just before a series of American tests already announced by the U.S. Government, and when the current series of British tests is not completed.

"We have long been anxious, as our proposals have shown, to negotiate an agreement on disarmament which will include arrangements for the ending or suspension of tests under proper conditions, at a suitable date and with agreement on an inspection system. H.M. Government, with other Western Powers, suggested as long ago as July the setting-up of an expert committee to work out the inspection system. That offer has been frequently repeated since, and still stands."

Mr. Macmillan expressed the hope that "this whole question can be brought to a conclusion" at an early summit conference.

The Prime Minister replied to a number of questions by Mr. Hugh Gaitskell (Leader of the Opposition) and Mr. Aneurin Bevan, both of whom pressed for an immediate ban on British nuclear tests, followed by talks with the Russians on effective international controls.

Mr. Gaitskell recalled that several months ago the U.S.S.R. had proposed multilateral suspension of tests with the necessary controls, during the disarmament negotiations. "Had that been accepted by the Western Powers," he declared, "the tests of which you [Mr. Macmillan] have spoken would never have been carried out by the Soviet Union. There is a widespread desire in this country that we should make an effective response to what the Russians have said. There is a general feeling that we should indicate our willingness to suspend tests and propose immediate talks with the Russians on the controls needed to check them."

Mr. Macmillan reiterated that H.M. Government had proposed setting up an expert committee for control of tests as long ago as July 1957. That offer was rejected by Russia but still remained open, and he thought this approach was the one most likely to obtain satisfactory results.

Mr. Gaitskell suggested that the Soviet Union had rejected the offer because the Western Powers had "insisted on attaching to multilateral suspension conditions relating to other parts of the disarmament agreement." He added: "There is a widespread fear that if Britain delays taking advantage of this offer by Russia, and says that she or America must carry out further tests, the difficulty will arise of some country saying 'No, we cannot have suspension because we have to make some tests.' I beg the Prime Minister to do everything he possibly can to see that a positive and not a negative response is made to the Soviet proposal."

Mr. Bevan (Labour) remarked that M. Gromyko's statement about the suspension of Soviet tests had been expected for some time, and in fact had been anticipated by many newspapers. Could not the British Government have had consultations in anticipation of that statement? The Prime Minister had recently made a statement, which was universally applauded, declaring that he was "anxious for any progress, no matter how humble, because one small advance might make other advances easier." Why, then, did not Mr. Macmillan act with "a little more moral courage" and accept the Russian offer?

Mr. Macmillan replied: "I am as anxious for advance as any member of the House, but anxious that it should be properly negotiated, properly tied up, and effective without endangering our security. As for moral courage, the House must judge."

American and Russian Nuclear Tests since 1946.

The U.S. Atomic Energy Commission stated on March 31 that the Soviet Union had exploded at least 39 nuclear devices in the last nine years, while the United States had carried out 90 nuclear explosions in the last 13 years, including the bombs dropped on Hiroshima and Nagasaki in 1945.

The *New York Times* commented (March 31): "The first Soviet atomic explosion is believed to have taken place on Sept. 23, 1949. Since then the United States has announced a total of 39 Soviet tests, including the first hydrogen bomb explosion on Aug. 12, 1953. The actual total of Soviet explosions is probably somewhat larger, since the Atomic Energy Commission has followed a policy of only announcing those it deems of particular significance or interest. The Soviet explosions have taken place primarily at two principal test areas—in Central Asia and in the Barents Sea area north of the Arctic Circle.

"Because of its comparatively late start in the nuclear field, the Soviet Union staged few explosions in the 1949-54 period, with two each in 1951 and 1953 and one in 1954. During the same period the United States set off 16 explosions in 1951, 10 in 1952, 11 in 1953, and three hydrogen bombs in 1954.

"Since 1955 the Soviet test schedule has sharply accelerated. In the last nine months there were 15 explosions, including two hydrogen bombs on Feb. 27. There were four Soviet explosions in 1955, seven in 1956, 12 in 1957, and nine in 1958.

"In the last three years the United States also has been increasing the number of test explosions as it sought to decrease the size of atomic warheads, minimize radioactivity, and develop a varied family of weapons adaptable for tactical battlefield and defensive use as well as strategic devastation.

"The United States exploded 15 test devices in 1955, three in 1956, 24 in 1957, and is scheduled to set off up to 20 explosions in the forthcoming test series in the Pacific beginning next month."

In reply to a House of Commons question on March 27, Mr. Macmillan stated that the Russians had carried out over 50 nuclear tests "in the last few years."

Possibility of Undetected Nuclear Tests.

The Soviet announcement of the suspension of tests aroused much controversy in American scientific circles as to whether it might not be possible for a country—and specifically the Soviet Union—to carry out nuclear tests which would remain undetected by the outside world, by "camouflaging" them as underground explosions which could be mistaken for earthquakes. President Eisenhower had asked his Science Adviser to examine this problem, and Dr. Killian accordingly set up a special group under Dr. Hans Bethe (a leading nuclear physicist at Cornell University) to conduct detailed studies. Dr. Killian's report was not made public, on the ground that it would give the Russians too much information about U.S. techniques for detecting nuclear explosions.

Senator Hubert H. Humphrey, chairman of the Senate Disarmament Sub-committee, announced on April 13 that the sub-committee would carry out its own investigations into the possibility of detecting underground explosions; the findings would be made public "so that the American people can know the facts of inspection systems to verify a suspension of weapons tests." Questionnaires would be sent to all leading American seismologists asking them for their views on this matter, and evidence would be taken from Dr. Edward Teller (who played a leading part in developing the H-bomb), Admiral Lewis Strauss (chairman of the Atomic Energy Commission), and Dr. Hans Bethe. [The *New York Times* stated that Dr. Teller and Admiral Strauss had "opposed suspension of nuclear tests" and had "contended that the Soviet Union could evade an agreement with underground tests represented as earthquakes."] Senator Humphrey had previously urged the publication of Dr. Killian's report, but had failed to persuade the Atomic Energy Commission to authorize its release.

In a televised interview on April 13, Senator Humphrey said that there was a great deal of evidence to support a Danish newspaper report [see below] that a "catastrophic accident" involving radioactive fall-out had forced the Soviet Union to end its latest test series. Mr. Humphreys said that the Soviet tests were the "dirtiest"—in the sense of dangerous radioactivity—of any carried out to date, and had "literally covered" the northern areas of the U.S.S.R., the Scandinavian countries, Northern Europe, the United States and Japan with "very heavy" radioactive fall-out. [As stated in 16095 B, exceptionally high radioactivity was reported in Japan, Sweden, and Norway during the period of the Russian nuclear tests].

Senator Humphrey disclosed that an underground non-nuclear explosion of a magnitude of about 3.4 kilotons had taken place in the Soviet Union on March 25 and had been recorded in Nevada (5,000 miles away), Alaska, India, and Sweden. This explosion had occurred in the northern Urals, an area which had been free from earthquakes for 40 years, and its detection at such great distances was highly significant.

[The explosion to which Senator Humphrey referred had been described by *Pravda* as a "conventional" (i.e. non-atomic) explosion, "the most powerful in Russian industrial history"; it was designed to divert the Kalonga River so as to prevent the flooding of iron-ore mines in the area.]

The Danish newspaper *Berlingske Tidende*, quoting information reaching Copenhagen through diplomatic channels from Moscow, stated on April 13 that the recent Soviet nuclear tests had been broken off because of a "catastrophic accident." The nature of the reported accident was not defined, but it was stated that it had caused radioactive fall-out over the Soviet Union and many neighbouring countries to increase to danger-point.

In reply to a question in the British House of Commons on April 5, Mr. Macmillan said that "we now have specific evidence confirming that a deliberate attempt to hold a nuclear test explosion so as to avoid detection would almost certainly be successful."—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Soviet Embassy Press Department, London - Berlingske Tidende) **(Prev. rep. 16101 A; 16095 B.)**

A. AVIATION. — Paris-Tokio Transpolar Service.

A new direct air service from Europe to the Far East over the North Pole was inaugurated by *Air France* on April 10, when one of its new Lockheed *Super Starliners* left Paris for Tokio. After only one stop at Anchorage (Alaska), the plane arrived in the Japanese capital in the morning of April 12, taking only 30 hours for the 8,250-mile journey as compared with 45 hours on the southern route *via* Karachi, Delhi, Bangkok, and Saigon. Amongst those taking part in the inaugural flight was M. Gaston Monnerville, president of the Council of the Republic. A weekly flight will be made over the polar route in each direction, and a second flight added later. (Le Monde, Paris) **(Prev. rep. 15794 A.)**

B. UNITED STATES.—Disbanding of Ku Klux Klan. - The Maxton Incident. - Sentences on Klan Leaders.

A rally of about 100 members of the Ku Klux Klan, which was to have been addressed by the "Grand Wizard," the Rev. James W. Cole, was put to flight on Jan. 18 near the small town of Maxton (in Robeson County, North Carolina) by about 500 Red Indians of the Lumbee tribe, armed with shotguns, who destroyed the Klan's "fiery cross" and amplifying equipment. The Klansmen were rescued by State troopers, who organized their removal from the scene.

The population of Robeson County consists of 40,000 Whites, 30,000 Indians, and 25,000 Negroes, who live in separate communities and attend separate schools. The Klan had burned fiery crosses on Jan. 13 outside the homes of an Indian living in a house formerly owned by whites and of a white family which had taken an Indian boarder. In view of the tension aroused among the Indians by these actions, the Sheriff of Maxton had twice warned Mr. Cole not to hold the proposed rally; the local clergy had urged the population to boycott the rally, and the all-white Maxton town board had passed a resolution declaring that "we want nothing to do with the Klan."

Mr. Cole was sentenced on March 14 to 18 to 24 months' imprisonment for inciting a riot, and another leader of the Klan to six to 12 months' imprisonment. Commenting on the incident, Governor Hodges of North Carolina said that the responsibility for the riot "rests squarely on the irresponsible and misguided men who call themselves leaders of the Ku Klux Klan."

At Greenville, South Carolina, four members of the Klan were sentenced on Jan. 23 to terms of imprisonment ranging from one to six years for beating a Negro because he and his wife had cared for seven white children while their mother was in hospital.

Mr. William Hendrix, "Imperial Father" of the Ku Klux Klan, announced on Jan. 24 that its members had been ordered to disband and to destroy all records and robes, but that some sections of the movement would unite under the name of the "National Christian Church."

Founded after the Civil War to terrorize the emancipated Negro slaves, the Klan was revived in 1915 as an extreme racialist, anti-Negro, anti-Semitic, and anti-Catholic secret society. For some years it exercised great influence in the Southern States.—(New York Times - N.Y. Herald Tribune) **(Prev. rep. 15947 A; 10180 A.)**

C. UNITED KINGDOM. — New Junior Ministers.

The following junior ministerial appointments were announced from 10, Downing Street, on April 14: (*a*) Mr. Richard Wood as Parliamentary Secretary to the Ministry of Labour in succession to Mr. Robert Carr, who resigned for personal business reasons; (*b*) Mr. W. M. F. Vane as Joint Parliamentary Secretary to the Ministry of Pensions and National Insurance in place of Mr. Richard Wood.

Mr. Carr (41) resigned his ministerial post to become chairman of John Dale Ltd., a light engineering firm in North London founded by his great-great-grandfather in 1837. He is Conservative M.P. for Mitcham, and was formerly Parliamentary Private Secretary to Sir Anthony Eden when the latter was Foreign Secretary.

Mr. Richard Wood (37), the second surviving son of Lord Halifax, lost both legs while on active service in the Middle East during the Second World War; as Joint Parliamentary Secretary to the Ministry of Pensions he was specially concerned with the problems of ex-Servicemen. Mr. Vane (49), a Territorial Army officer for 17 years before entering Parliament, was formerly P.P.S. to Mr. Heathcoat Amory at the Board of Trade and the Ministry of Agriculture.

Mr. Wood has been M.P. for Bridlington since 1950, and Mr. Vane M.P. for Westmorland since 1945. Both are Conservatives. (Times - Daily Telegraph) **(Prev. rep. 15964 E.)**

D. URUGUAY. — New Chairman of National Council of Government.

Dr. Carlo L. Fischer became Chairman of the National Government Council on March 1 for the year 1958-59 (ending Feb. 28, 1959) in succession to Señor Lezama, who had held that office in 1957-58. Under the Uruguayan Constitution, the office of chairman of the National Government Council—corresponding to the Presidency of the Republic—rotates every year between the members of the majority party on the Council, and is thus analogous to the Swiss presidential system.

The National Government Council consists of six representatives of the majority *Quincista* party (Dr. Fischer, Sr. Luis Batlle Berres, Dr. Alberto Zubiria, Sr. Arturo Lezama, Sr. Justino Zavala Muñiz, and Dr. Zoilo Chelle) and three representatives of the minority Opposition parties (Dr. Luis Alberto de Herrera, Sr. Daniel Fernandez Crespo, and Sr. Ramón Viña). (Bank of London and South America) **(Prev. rep. 15440 C.)**

A. UNITED KINGDOM. — Civil Estimates, 1958-59.

The Civil Estimates for the financial year 1958-59 were published on Feb. 17, together with the Estimates for the Revenue Departments and the Ministry of Defence (civil expenditure). They showed an estimated total expenditure of £3,418,932,067, an increase of £105,698,153 over the total of the original estimates for 1957-58.

The sums required for the various classes of expenditure, with the corresponding amounts for 1957-58 given for comparison, are shown in the following table :

	Total Civil Estimates† 1958-59 £	1957-58 £
Central Government Services ..	16,889,943	16,799,899
Foreign and Colonial Offices, etc. ..	80,700,292	93,819,014
Home Department, Law and Justice	99,215,009	100,825,666
Education and Broadcasting ..	520,816,906	481,496,401
Health, Housing, and Local Government	779,091,968	788,915,868
Board of Trade, Ministries of Labour and Supply	269,410,730	288,480,328
Ministry of Works, Public Buildings, Stationery and Printing, Central Office of Information	79,987,990	78,861,280
Ministry of Agriculture, Fisheries and Food, etc.	360,902,439	351,128,137
Ministry of Transport and Civil Aviation, Ministry of Power, Department of Scientific and Industrial Research, Atomic Energy, Roads, etc.	221,666,068	203,327,706
Ministry of Pensions and National Insurance, etc.	543,974,685	490,981,475
Total Civil Estimates	2,972,656,030	2,897,635,774
Revenue Departments :		
Customs and Excise	17,008,037	16,489,630
Inland Revenue	44,820,000	41,981,000
Post Office	367,698,000	339,512,000
Total for Revenue Departments	429,526,037	397,982,630
Ministry of Defence*	16,750,000	17,615,510
Grand Total	3,418,932,067	3,313,233,914

*See also Defence Estimates. †Adjusted for Transfers.

Particulars of the more important items included in the Civil Estimates are given below, with comparative figures for 1957-58 in parentheses :

National Health Service. £530,712,430 (£545,330,965), of which £472,459,430 was for England and Wales and £58,253,000 for Scotland.

Housing. England and Wales £65,918,820 (£63,893,720), Scotland £16,293,700 (£15,372,780).

Agricultural Subsidies and Grants. £265,094,200 (£254,132,670).

Ministry of Education. England and Wales £381,667,154 (£355,803,587), Scotland £52,976,158 (£49,397,051).

Ministry of Supply. £231,300,000 (£238,937,000).

Other Estimates included £277,130,000 for National Insurance and Family Allowances ; £136,533,000 for the National Assistance Board ; £100,241,250 for War Pensions ; £17,303,061 for Colonial Services ; £19,500,000 for Colonial Development and Welfare ; £49,024,140 for grants to Universities and Colleges ; £33,889,500 for Broadcasting ; £28,945,200 for Public Buildings ; £70,398,260 for Roads in England and Wales and £10,688,690 for Roads in Scotland ; and £100,000,000 for Atomic Energy. (1958-59 Votes on Account) **(16113 A ; 15397 B.)**

B. ISRAEL. — Shell Company of Palestine sold to Wolfson Investment Company.

It was announced in London on April 1 that the Shell Company of Palestine, which distributes and markets petroleum products in Israel and was jointly owned by the Royal Dutch-Shell and British Petroleum groups, had been purchased by a newly-formed U.K. investment company, Iwol Investments, headed by Mr. Isaac Wolfson, chairman of Great Universal Stores.

The assets of the Shell Company of Palestine in Israel have been estimated at £4,250,000. They include a storage installation at Haifa, bulk oil depots at Tel-Aviv, Jerusalem, and Beersheba, about 50 service and filling stations, and distributing equipment such as pumps, tanks, and road vehicles. Consumption of petroleum products in Israel in 1957 totalled some 1,300,000 tons, of which about 40 per cent was handled by the Shell Company of Palestine. The purchase price was not announced, but press reports mentioned a figure of around £5,000,000.

The Shell and B.P. Companies decided in July 1957 to cease the marketing and distribution of petroleum products in Israel.—(Times - Financial Times) **(Prev. rep. 15720 A.)**

C. GUATEMALA. — Presidential Election.

Guatemala's second presidential election within three months was held on Jan. 19, 1958, resulting in the election of General Miguel Ydigoras Fuentes, the candidate of the right-wing Party of National Reconciliation (*Partido Redención Nacional*, or P.R.N.). Three other candidates contested the election—Colonel José Luis Cruz-Salazar, lately Guatemalan Ambassador in Washington, who ran for the right-wing National Democratic Movement (*Movimiento Democrático Nacional*, M.D.N.) ; Señor Mario Mendez Montenegro, a lawyer, representing the left-wing Revolutionary Party (*Partido Revolucionario*) ; and Colonel Enrique Ardón Fernandez, candidate of a small party known as the National Liberal Union.

As stated in 15852 A, the elections of October 1957 were invalidated after General Ydigoras Fuentes and his supporters had alleged that the successful candidate, Señor Ortiz Passarelli, had been " illegally " elected as a result of fraudulent manipulation of the ballot in rural areas. Of the three main parties contesting the January elections, the P.R.N. represents the most conservative interests in the country, including the wealthiest landowners and businessmen ; the M.D.N. is a conservative group pledged to carry on the policies of the late President Castillo Armas, who was assassinated in July 1957 ; and the *Partido Revolucionario* is a new left-wing party to which registration was denied in October, but which was permitted to contest the January elections.

Voting took place on Jan. 19 in an orderly atmosphere and with few incidents, the electors also choosing 33 of the 66 members of Congress in addition to a new President. The Office of the Provisional President (Señor Flores Avendano) announced on Jan. 20 that " tentative " results showed 140,802 votes for General Ydigoras Fuentes, 98,238 for Señor Mendez Montenegro, and 97,668 for Colonel Cruz-Salazar, the fourth candidate polling negligibly. The M.D.N. and the *Partido Revolucionario*, however, each claimed that their own candidate had headed the poll, while the P.R.N. claimed that General Ydigoras Fuentes had a majority of over 50,000 over his nearest opponent, and not 42,000 as stated by the Government.

In view of these objections, President Flores Avendano set up a 15-man Electoral Commission to scrutinize the results and issue final figures on the basis of complete reports by the Provincial Governors. The definitive results were announced by the Electoral Commission on Feb. 9 as follows : General Ydigoras Fuentes, 190,972 votes ; Colonel Cruz-Salazar, 138,488 ; Señor Mendez Montenegro, 132,824 ; Colonel Ardón Fernandez, 5,834. The total of 492,274 votes (including 24,156 invalid papers) was the highest ever recorded for a Guatemalan presidential election, though representing less than 50 per cent of the registered electorate of over 1,000,000.

Although General Ydigoras Fuentes had a majority of 52,000 over his nearest opponent, he failed to obtain the constitutionally required minimum (a bare majority of the total votes) necessary for election to the Presidency. Under the Constitution, therefore, the Guatemalan Congress had to choose between the two leading candidates - i.e. General Ydigoras Fuentes and Colonel Cruz-Salazar. The new Congress, meeting on Feb. 12, elected General Ydigoras Fuentes by 40 votes against 18 for Colonel Cruz-Salazar, with seven " blank " votes and one deputy absent.

General Ydigoras Fuentes (62) was sworn in as President of Guatemala on March 2 for a six-year term. A biography of the new President is given in 15852 A.—(New York Times)

(Prev. rep. 15852 A.)

D. AUSTRALIA. — First Atomic Reactor.

Australia's first atomic reactor was started up by the Prime Minister, Mr. Menzies, when he opened the Australian Atomic Energy Commission's research establishment at Lucas Heights, Sydney, on April 18.

The British-designed reactor, built by Head, Wrightson & Co., and known as HIFAR (High Flux Australian Reactor), is a heavy-water-moderated research model similar to those being built in the United Kingdom. It has a heat output of 10,000 kw. and a high neutron intensity ; for safety reasons it is housed in a 70-ft.-high dome-shaped cylindrical building. In addition to being used for research work, it will be a major producer of isotopes for use in medicine, science, industry, and agriculture. The cost of building the Lucas Heights station (on which work began at the end of 1955) was over £A5,000,000, including over £A1,000,000 spent in Britain. (Australian News and Information Bureau)

(Prev. rep. 14360 A.)

E. DENMARK. — Princess Margrethe assumes Constitutional Duties as Heiress to Throne.

Princess Margrethe, daughter of King Frederik IX and Queen Ingrid, officially assumed the duties of heiress to the Danish throne—including membership of the State Council—on April 16 (her 18th birthday), when she came of age under the Constitution of 1953.—(Berlingske Tidende, Copenhagen)

(Prev. rep. 12950 C ; 12921 A.)

APRIL 19—26, 1958

A. CANADA. — Conservative Victory in General Election. - Large Overall Majority in New Parliament.

Canada's second general election within nine months, held on March 31, resulted in a sweeping victory for the Progressive Conservative Party led by Mr. J. G. Diefenbaker, the Prime Minister. In the biggest political landslide in Canadian history, the Conservatives won 97 seats from other parties and emerged with an overall majority of 153 in the new Canadian Parliament- the 24th of the Confederation.

A total of 836 candidates stood for the 265 seats, the Progressive Conservatives and Liberals contesting every constituency. The C.C.F. presented 169 candidates (seven more than in 1957) and the Social Credit Party 82 (32 fewer). There were also 55 Independents and others, including 18 candidates of the Labour-Progressive (Communist) party.

Party strengths at the dissolution of the former House were: 113 Progressive Conservatives, 106 Liberals, 25 C.C.F. (Labour), 19 Social Credit, and two Independents. There were no vacancies. As stated in 16016 B, Mr. Diefenbaker sought a dissolution because the Progressive Conservatives did not command an overall majority in the House elected in June 1957.

The results of the general election were as follows, showing comparison with the 1957 elections:

	March 1958		June 1957	
	Seats	Votes	Seats	Votes
Progressive Conservatives	209	3,738,522	111	2,656,312
Liberals	48	2,316,322	104	2,704,690
C.C.F. (Labour)	8	671,736	25	707,833
Social Credit	—	180,084	19	435,263
Independents	—	50,425	6	195,434

Notes. (1) The slight discrepancy between the Conservative and Liberal representation after the 1957 elections and at the dissolution is accounted for (*a*) by the fact that several of the Independents elected in 1957 subsequently joined one or other of the two major parties, and (*b*) by by-elections during the lifetime of the former Parliament.

(2) The figure of 111 Progressive Conservatives in 1957 includes the postponed result in Wellington South (see 15676 C).

(3) Voting figures for 1958 are the latest available, covering 41,961 of the country's 43,873 polling stations (96 per cent of the total); the figures for 1957 are complete and revised.

(4) The 48 Liberals in the new House include a Liberal-Labour member, re-elected for Kenora-Rainy River (Ontario) after a recount. In the comparative figures for 1957 he is included among the six Independents.

Party representation in the new House of Commons by provinces is as follows:

	Progressive Conservative	Liberal	C.C.F.
Newfoundland	2	5	—
Prince Edward Island	4	—	—
Nova Scotia	12	—	—
New Brunswick	7	3	—
Quebec	50	25	—
Ontario	68	14*	3
Manitoba	14	—	—
Saskatchewan	16	—	1
Alberta	17	—	—
British Columbia	18	—	4
Yukon and North-West Territories (Mackenzie River)	1	1	—

*Including a Liberal-Labour member.

Party votes by provinces (returns from 41,961 of the 43,873 polling stations, or 96 per cent of the total) were as follows:

	P.C.	L.	C.C.F.	Others
Newfoundland	68,914	77,574	234	252
Prince Edward Island	41,981	25,187	211	—
Nova Scotia	206,678	136,752	16,132	—
New Brunswick	126,402	99,310	4,019	1,443
Quebec	962,481	886,327	45,193	50,864
Ontario	1,376,398	788,145	258,723	12,974
Manitoba	208,197	78,111	72,613	8,182
Saskatchewan	183,269	72,896	108,197	1,873
Alberta	261,870	57,236	19,154	95,052
British Columbia	297,752	90,374	147,260	59,749
Yukon and N.W. Territories (Mackenzie River)	4,580	4,410	—	120

Social Credit votes (included under "Others") were 93,278 in Alberta, 57,143 in British Columbia, 12,173 in Quebec, 8,809 in Ontario, 6,681 in Manitoba, 1,443 in New Brunswick, and 1,277 in Saskatchewan.

The Progressive Conservatives were returned as the majority party in nine of the ten provinces—the exception being Newfoundland, the only province with a Liberal majority. In addition to holding Ontario, Manitoba, British Columbia, and New Brunswick, the Conservatives won Quebec, Nova Scotia, and Prince Edward Island from the Liberals, Saskatchewan from the C.C.F., and Alberta from the Social Credit Party. Of the 265 seats in the Federal House of Commons, 165 remained unchanged in political representation; the Conservatives won 97 from other parties as stated above (59 from the Liberals, 19 from Social Credit, 17 from the C.C.F., and two from Independents); and the Liberals won three from Independents. The Conservatives polled 1,000,000 more votes than in 1957, their proportion of the total poll increasing from 40 per cent to 54 per cent.

The Conservatives' most spectacular success was in Quebec, where they won a majority of seats for the first time since 1887. Of the 75 Quebec seats, the Conservatives won 50 (against only nine in 1957), including five which had not returned a Conservative during the present century. Constituencies previously regarded as safe Liberal seats were won in many parts of the province—e.g. the traditional Liberal seat of Quebec East, where Mr. Louis St. Laurent had a majority of over 17,500 at the last election, returned a Conservative for the first time since 1872.

All Conservative Ministers were re-elected, mostly with large majorities. Mr. John Diefenbaker had a majority of over 11,000 at Prince Albert (Saskatchewan); Dr. Sidney Smith, the Secretary for External Affairs, had a majority of over 6,000 at Hastings-Frontenac (Ontario); Major-General Pearkes had a majority of nearly 14,000 at Esquimalt-Saanich (British Columbia); Mr. Donald Fleming had a 19,000 majority at Toronto-Eglinton; Mr. Gordon Churchill had a 20,000 majority at Winnipeg South-Centre; and Mrs. Ellen Fairclough (the only woman member of the Cabinet) had a majority of nearly 14,000 at Hamilton West (Ontario). The only other woman member in the new House was also returned for the Conservatives—Miss Margaret Aitken, who had a 15,000 majority at York-Humber (Ontario).

The Liberals suffered their worst defeat in Canadian political history, their representation falling to its lowest point since Confederation. As stated above, they lost three provinces to the Conservatives—including the traditional Liberal stronghold of Quebec—and are now without representation in six provinces; Newfoundland alone returned the Liberals as the majority party (five out of seven seats). The Liberals polled nearly 400,000 fewer votes than in 1957, their percentage of the total falling from 40 per cent to 33 per cent.

Among prominent Liberals defeated were three former Ministers—Mr. George Marler (ex-Minister of Transport), Mr. James Gardiner (ex-Minister of Agriculture) and Mr. James Sinclair (ex-Minister of Fisheries) - and the Liberal Chief Whip in the former House, Dr. Pierre Gauthier. All were defeated by Conservative candidates—Mr. Marler at St. Antoine-Westmount (Montreal), Mr. Gardiner at Melville (Saskatchewan), Mr. Sinclair at Coast-Capilano (British Columbia) and Dr. Gauthier at Portneuf (Quebec). Mr. Jean-Paul St Laurent, son of the former Liberal Prime Minister, was defeated by a Conservative at Temiscouata (Quebec). Mr. Louis St. Laurent (76) did not seek re-election for reasons of health.

Mr. Lester Pearson, the new leader of the Liberal Party, was re-elected for Algoma East (Ontario) with a majority of 2,500 in a three-cornered contest. Other prominent Liberals re-elected included Mr. Lionel Chevrier (Montreal-Laurier), a former Minister of Transport; Mr. Paul Martin (Essex East, Ontario), former Minister of Health; Mr. J. W. Pickersgill (Bonavista-Twillingate, Newfoundland), former Minister of Citizenship and Immigration; and Mr. Jean Lesage (Montmagny-L'Islet, Quebec), former Minister of Northern Affairs.

The severe reverse suffered by the C.C.F. involved the defeat of the party's leader, Mr. M. J. Coldwell, and its deputy leader, Mr. Stanley Knowles, both of whom lost their seats to the Conservatives—Mr. Coldwell at Rosetown-Biggar (Saskatchewan), a constituency he had represented since 1935, and Mr. Knowles at Winnipeg North-Centre, hitherto regarded as a safe Labour seat. The C.C.F. lost nine of its 10 former seats in Saskatchewan and all five in Manitoba, its eight members in the new House comprising four from British Columbia, three from Ontario, and one from Saskatchewan. The total C.C.F. vote fell by 36,000, and its percentage of the total poll from 11 per cent to 10 per cent.

In a post-election statement, Mr. Coldwell said that he would not run for Parliament again and that his electoral defeat "ends my work in the House of Commons, to which I have given the best years of my life."

The Social Credit Party was eliminated in the Canadian Parliament for the first time since 1935. All its 19 former seats (13 in Alberta and 6 in British Columbia) were won by Conservatives, the party leader—Mr. Solon Low—being defeated at Peace River (Saskatchewan) in a four-cornered contest. The Social Credit vote fell by 255,000 as compared with 1957, its percentage of the total vote dropping from six per cent to two per cent.

The Social Credit Party, born of the depression of the 'thirties, won control of the Alberta Legislature in 1935 and returned 17 members to the Federal Parliament in the same year. It returned 10 members to the Federal House of Commons in the elections of 1940 and 1949, and reached its peak representation in 1957 with 19 members.

Based on the economic theories of Major C. H. Douglas, the British writer, the Social Credit Party was founded by the late Mr. William Aberhart, a Calgary school-teacher who became the first Social Credit Premier of Alberta in 1935. The party has had its principal stronghold in Alberta since that time, and has also obtained a considerable following in British Columbia.

On the basis of 96 per cent of complete returns, the total number of votes was 6,957,089 (about 78 per cent of the electorate), the highest figure for any Canadian general election, and about 260,000 more than in 1957. A total poll of well over 7,000,000 is expected when the remaining four per cent of returns are known, including overseas and Service-men's votes.—(Montreal Star - Toronto Globe and Mail) **(Prev. rep. 16016 B ; 1957 Elections, 15676 C ; 15613 A.)**

A. NETHERLANDS. — Split in Communist Party.

A dispute in the Netherlands Communist Party, which has seven seats in the Lower Chamber of the States-General and four in the Upper Chamber, resulted in a split on April 15, when four of the seven deputies in the Lower House formed themselves into a separate parliamentary group led by Mr. Henk Gortzak.

On April 4 the party's executive had suspended its chairman (Mr. Wagenaar) and three other deputies—Mr. Gortzak, Mr. Brandsen (secretary of the Communist-dominated trade union [E.V.C.] and vice-president of the International Federation of Communist Trade Unions), and Mr. F. Reuter (chairman of the E.V.C.)—after accusing them of plotting to seize control of the party with a "rightist *bourgeois*" policy; at the same time Mrs. Lips-Odinot (also a member of the Lower Chamber) was expelled from the party's executive. Mr. Paul de Groot, the party's general secretary, accused the suspended members of being a "rightist group" who had committed "open treason," while the dissident members accused Mr. de Groot of having for a long time displayed an "authoritarian attitude."

In addition to Mr. Gortzak, the "dissident" parliamentary group comprises Mr. Wagenaar, Mr. Brandsen, and Mrs. Lips-Odinot; the "official" group consists of Mr. de Groot, Mrs. Bakker, and Mr. Borst.—(Netherlands News Agency)

B. SOVIET UNION. — End of Sputnik II.

The second Russian earth satellite (*Sputnik II*), which was placed in orbit on Nov. 4, entered the denser layers of the atmosphere on April 14, disintegrated and was burned up. The Tass Agency announced that its fragments "were dispersed in a south-easterly direction over the Lesser Antilles, Brazil and the Atlantic Ocean." During its existence *Sputnik II* completed some 2,370 revolutions of the earth and travelled about 62,000,000 miles. It carried the dog "Laika," whose death was announced 11 days after the satellite was placed in orbit. *Sputnik II* was last seen late in the evening of April 13, when hundreds of people in Barbados reported seeing a "comet-like object with a tail of fire" burn up over the Caribbean; the crew of a Dutch tanker in the area saw the phenomenon at the same time.

The Tass Agency confirmed on Jan. 20 that *Sputnik I* had ceased to exist on Jan. 4, as previously announced by British and American astronomers.—(Soviet Embassy Press Department, London - Times) **(Prev. rep. 15950 C.)**

C. POLAND. — Repatriation Statistics.

It was announced in Warsaw during April that 137,038 Poles had been repatriated from foreign countries between the autumn of 1955 and Dec. 31, 1957, of whom 131,087 had returned from the Soviet Union and 5,190 from Western countries, chiefly Western Germany, Great Britain, and France. Of the nearly 94,000 Poles repatriated from the U.S.S.R. in 1957, almost 90 per cent came from Byelorussia, the Ukraine and Lithuania. It was stated that about 80 per cent of the repatriates had been settled in the western and northern territories of Poland.—(Polish Embassy Press Office, London) **(Prev. rep. 15499 A ; 14928 B ; 14510 A.)**

D. FRANCE. — New Chief of Staff and Inspector-General of Air Force.

The appointment of Air Force General Max Gelée as Chief of Staff of the Air Force, and of Air Force General Paul Bailly as Inspector-General of the Air Force, was officially announced in Paris on March 19. General Gelée had previously been Inspector-General and General Bailly Chief of Staff.
(Le Monde, Paris) **(Prev. rep. 15827 F ; 14309 D.)**

E. SOUTH AFRICA. — Death of Sir Ernest Oppenheimer. - The Oppenheimer Memorial Trust.

Sir Ernest Oppenheimer, mining magnate, financier, industrialist and philanthropist, and for 40 years an outstanding figure in South Africa's national life, died in Johannesburg on Nov. 25, 1957, aged 77. He was head of three great industrial "empires"—the Anglo-American Corporation of South Africa, De Beers Consolidated Mines Ltd., and Rhodesian Anglo-American Ltd.—and of the many subsidiary companies in these groups.

Born at Friedberg, Hesse (Germany), the son of a Jewish cigar merchant, Ernest Oppenheimer came to London at the age of 16 to work in the diamond merchant firm of Anton Dunkelsbuhler. When 22 years of age he was sent out to South Africa as the firm's representative in Kimberley, and rapidly established himself as a leader in the diamond industry. He also played a prominent part in municipal affairs, being Mayor of Kimberley in 1912-15 and helping to raise the Kimberley Regiment at the outbreak of the First World War. He was knighted for his services to the Empire in 1921.

In 1917, together with an American mining engineer (Mr. W. L. Honnold), Ernest Oppenheimer formed the Anglo-American Corporation of South Africa, of which he became chairman—a position he held throughout his life. Buying up important German diamond interests in South-West Africa in 1919, he emerged as one of the most powerful figures in the diamond industry, becoming chairman of the Consolidated Diamond Mines of South-West Africa and the Premier Diamond Mine. During the 'twenties the Anglo-American Corporation under Oppenheimer's leadership became heavily interested in the gold and copper-mining industries of Southern Africa in addition to diamond mining, and rose to a position of great prominence in the mining and financial worlds. Extending its activities to Rhodesia, the Corporation played a major part in developing the territory's copper, lead, zinc, and other mineral resources; to consolidate its important holdings in Northern Rhodesia, the Rhodesian Anglo-American Company (Rhoanglo) was formed in 1929 with Sir Ernest as chairman. In the same year Sir Ernest was invited to join the board of De Beers—the world's largest diamond-producing concern, in which he had become a major shareholder—and in the following year he became chairman of De Beers. He also formed the Diamond Corporation in 1930 to control world marketing of diamonds.

Sir Ernest was largely instrumental in saving the diamond industry from threatened collapse during the world economic depression of 1931. He consolidated his own organization, persuaded competitors to pool their resources to meet the emergency, and formed the Diamond Producers' Association which controlled the flow of diamonds to the market, bought up stocks which threatened to flood the market, and kept prices stable.

The companies headed by Sir Ernest at the time of his death control about 95 per cent of the world's supply of diamonds, and constitute the world's biggest single gold-producing group. They also control about half the production of the Rhodesian Copperbelt (which is itself about 15 per cent of the total world supply), about 45 per cent of South Africa's coal output, and much of its uranium, lead, zinc, and vanadium. In addition, they hold large interests in engineering, cold storage, land, and ranching. The Anglo-American Corporation group comprises over 80 companies, including the Rand Selection Corporation, the Anglo-American Investment Trust, De Beers, Rhoanglo, the African and European Investment Company, and large gold-mining producers in the Rand and the Orange Free State.

Apart from his vast industrial and financial interests, Sir Ernest Oppenheimer played an important part in South African political life as a leading member of the South African Party. A friend of General Smuts, he entered the Union Parliament in 1924 as Member for Kimberley and represented the constituency until 1938, when he left politics to devote himself to his business interests.

Among Sir Ernest's philanthropic benefactions, hundreds of them anonymous, were many for the Red Cross and St. John's, on whose directing committees he served for many years; he played a prominent part in the campaign for the prevention and treatment of blindness, and was chairman of the St. John's Committee for the Prevention of Blindness set up to deal with this problem. He also fostered research into cardiac diseases and endowed a Chair of Surgery at the University of the Witwatersrand, as well as a Chair of Engineering at Stellenbosch University. In the industrial field he was specially concerned with providing good housing and amenities for his employees, both Native and European, and gave a £3,000,000 loan to Johannesburg City Council so that slum and "shanty" areas could be pulled down and their African inhabitants re-housed in good conditions on the city's outskirts. A strong supporter of the Commonwealth, he gave £100,000 to Oxford University in 1954 towards the establishment of Queen Elizabeth House as a centre for Commonwealth studies (see 13664 D). Sir Ernest was an honorary D.C.L. of Oxford University.

Mr. Harry Oppenheimer succeeded his father in the chairmanship of the Anglo-American Corporation, De Beers, and their subsidiary companies. On Dec. 4 Mr. Oppenheimer announced that his father had set aside £1,000,000 as a memorial trust to be used for "educational, cultural and general charitable purposes . . . to be applied for the benefit of the peoples of the Union, South-West Africa, and the Rhodesian Federation." (Times - Cape Times)

A. SOUTH-EAST ASIA TREATY ORGANIZATION. — Manila Meeting of SEATO Council.

The fourth annual meeting of the SEATO Council was held in Manila from March 11-13 under the chairmanship of Señor Felixberto M. Serrano, acting Philippine Secretary of Foreign Affairs. The other Ministers attending were Mr. Richard Casey, Australian Minister for External Affairs; M. Pineau, the French Foreign Minister; Mr. Walter Nash, the New Zealand Prime Minister; Mr. Firoz Khan Noon, Prime Minister and Foreign Minister of Pakistan; Prince Wan Waithayakon, the Siamese Foreign Minister; Mr. Selwyn Lloyd, the British Foreign Secretary; and Mr. Dulles, the U.S. Secretary of State.

A communiqué was issued at the end of the meeting surveying the position in the treaty area and announcing the measures which the Council had decided to take. They included (*a*) recognition that Communist subversion in the treaty countries represented the most substantial current menace; (*b*) continued economic aid to the Asian treaty members; (*c*) an Australian grant to the Asian treaty members of a further £1,000,000 for purposes relating to SEATO defence, in addition to £2,000,000 previously contributed by Australia for these purposes; (*d*) initiation of new cultural projects; (*e*) establishment of contacts with other collective security organizations of the free world; and (*f*) the proposed setting-up of a defence college in the Philippines, open to members and non-members of SEATO.

The principal sections of the communiqué were worded as follows (cross-headings inserted):

Security of the Region. "The Council considered the continuing Communist threat to the region. The Ministers reaffirmed their determination to maintain national and collective defence against the possibility of Communist and Communist-inspired armed aggression, while at the same time earnestly working for international disarmament with adequate safeguards covering both nuclear and conventional elements.

"SEATO has become a bulwark which has enabled the countries protected thereby to proceed in peace with their programmes of national development. Members of SEATO recognize that a threat to security or freedom in any region of the world is a threat to security and freedom everywhere.

"Some criticism of the aims and objectives of SEATO continues to be heard. The Council agreed that every country has the right to follow the policy it prefers. It noted with regret that some countries nevertheless continue to criticize the collective security arrangements of the free world, though such arrangements are in accordance with the U.N. Charter.

Subversion. "The problems of Communist subversion in the treaty countries were discussed at length. It was recognized that this represented the most substantial current menace.

"The Council was of the opinion that collective security measures had resulted in the diversion of the emphasis of Communist activities from the military to the non-military field. Communist and Communist-inspired activity has continued within the treaty area. In countries protected by the treaty there has been a noticeable change of emphasis by the Communists to activity in the economic, political and cultural fields, and also to activity within youth and labour organizations.

"The Council welcomed the counter-subversion measures being taken by members, and particularly the success of a seminar on countering Communist subversion held at Baguio (Philippines) last November. The Council recognized that, in view of the insidious character of Communist subversion, there was particular danger arising from some non-Communist Governments' failing to distinguish between the aims and ideals of the free world and the purposes of international Communism.

Economic Activities. "The Council heard statements on the economic progress and problems of the treaty area, and what further steps could be taken inside and outside SEATO to attain the economic objectives set forth in the Manila Treaty.

"A principal means of attaining these objectives continues to be through extensive bilateral and other economic arrangements between the SEATO countries. During the past year over $700,000,000 for economic purposes was provided for countries covered by the Manila Treaty, principally by the United States. This aid is a major factor in preserving peace and genuine independence for countries of the region.

"Australia announced that she would make available to the Asian members of SEATO a further £1,000,000 for purposes generally related to SEATO defence, in addition to £2,000,000 previously contributed by Australia for these purposes.

"The United States announced that $2,000,000 was being made available to the Asian members of SEATO for vocation and on-the-job training. Australia, France, New Zealand, and the United Kingdom also offered to help on various aspects of skilled labour training.

"The United States also announced that the major portion of its economic aid was now being directed to the region of Asia.

"The Council approved in principle a project submitted by Siam to establish a SEATO graduate school of engineering in Bangkok, and several members announced that they would be pleased to participate in providing the necessary funds.

Cultural Activities. "The Council agreed to continue and expand its programme of cultural activities. It expressed its satisfaction at the holding in Bangkok under SEATO auspices of a round-table conference on the impact of modern technology upon traditional cultures in South-East Asia. [This meeting had been held from Jan. 27 to Feb. 2.] A number of SEATO fellowships have been awarded and some members are conducting bilateral cultural exchanges.

"The Council agreed to continue its fellowship programmes and to initiate new cultural projects, the most important being a scholarship programme and the appointment of professors at universities of the Asian members, and of travelling lecturers.

Relations with Other Organizations and Countries. "The Council expressed its interest in the development of relations with other collective defence organizations of the free world . . . It authorized the Secretary-General [of SEATO] to enter into contact with the Secretary-General of other collective security organizations of the free world.

"The Council considered that contacts between SEATO and non-member States had proved useful in many respects, and directed that . . . such contacts be continued and expanded in the coming years.

Work of Military Advisers. "The Council noted with approval the work of their military advisers and of the Military Planning Office, which has completed its year's work. Plans in fulfilment of the defensive role of SEATO have been developed to resist aggression in the treaty area. Since the last Council meeting, four major SEATO military exercises have been held, as well as three multilateral or bilateral exercises. These have served effectively to increase the degree of co-operation between the forces of the SEATO Powers and to make them more ready for speedy action in the event of any sudden attack. The Council authorized a further programme of combined exercises.

"The Council learned with regret of the relief of Brigadier General Alfredo M. Santos, who has been the first Chief of the SEATO Military Planning Office [see page 15453]. He is returning for reassignment in the Philippines.

"The United States and the Philippines announced that they intend to co-sponsor a defence college, to be located in the Philippines, open to members and non-members of SEATO. The Council took note of this announcement with particular interest.

SEATO Budget. "The Council approved a Budget totalling $850,360 for the financial year 1958-59, to cover the cost of the Secretariat-General and Military Planning Office in Bangkok and to finance certain joint programmes.

Next Meeting. "The Council accepted . . . an invitation from the New Zealand Government to hold its next annual meeting in Wellington.

Conclusion. "The Council considered that the work of the present meeting had helped to consolidate the work already achieved by SEATO. They placed on record their determination to continue to work together for the security and progress of South-East Asia in accordance with the principles and purposes of the U.N. Charter. The Council members again emphasized the defensive character of SEATO and reaffirmed the principle that international disputes should be settled peacefully in accordance with the U.N. Charter."

The SEATO Council also discussed the situation caused by the rebellion in Sumatra, but no mention of this was made in the final communiqué. Mr. Dulles, questioned at a press conference, said that non-SEATO countries had been discussed but added: "We do not think it is polite or appropriate to name other nations in our communiqué." He added that the Ministers had agreed that the alliance should not project itself into Indonesia's affairs as long as the conflict remained purely internal; only if developments threatened the security of the SEATO countries would it be "appropriate to consider measures to combat that peril."

In addition to the Council sessions, Mr. Selwyn Lloyd, Mr. Dulles, and M. Pineau had a tripartite meeting at the British Embassy on March 12 during which they discussed the question of a "summit" meeting. M. Pineau also explained a French proposal—made shortly before the SEATO meeting—for the creation of a Western Mediterranean Defence Community to include France, Italy, Spain, Morocco, Tunisia, and Great Britain, and possibly the United States also.

(New York Times - Le Monde, Paris - Times)

(Prev. rep. SEATO, 15992 E; 15452 A.)

B. LIECHTENSTEIN. — General Election.

Elections to the Liechtenstein Parliament were held on March 22-23, the Progressive Citizens Party (the Government party) obtaining 54.5 per cent of the votes and nine seats, and the Patriotic Union Party 45.5 per cent and six seats. The electorate (confined to men) numbered 3,863 out of a total population of 14,757, the poll being 98 per cent. The former Parliament, elected on Sept. 1, 1957, had been dissolved by Prince Franz Josef II (the ruler of the principality) after the seven members of the Patriotic Union Party had refused to participate in the parliamentary sessions, alleging that "irregularities" had occurred in the September elections.

(Neue Zürcher Zeitung)

A. WEST INDIES. — First Federal Election. - Sir Grantley Adams becomes Prime Minister of West Indian Federation. - Membership of Council of State. - Opening of Federal Parliament.

Elections were held on March 25 in the ten constituent territories of the West Indian Federation to elect the first Federal House of Representatives. They were contested by two main parties: (*a*) the Federal Labour Party, whose leaders include Mr. Norman Manley, Q.C. (Chief Minister of Jamaica and leader of the Jamaican People's National Party), Dr. Eric Williams (Chief Minister of Trinidad and leader of the Trinidad People's National Movement), and Sir Grantley Adams, Q.C. (Premier of Barbados and leader of the Barbados Labour Party); and (*b*) the Democratic Labour Party, which is anti-socialist and whose leaders include Sir Alexander Bustamante and Mr. Albert Gomes, respective leaders of the Opposition parties in Jamaica and Trinidad.

The elections resulted in the Federal Labour Party winning 25 seats, the Democratic Labour Party 19, and the Barbados National Party one; the final position of the parties, however, will not be definitely known pending the result of two recounts in Jamaican constituencies and an election petition in St. Vincent. Although the elections were held in a festive atmosphere and amidst much popular enthusiasm, only some 26 per cent of the electorate of about 1,500,000 went to the polls.

Under the Constitution of the West Indies [see 15995 A] the 45-member House of Representatives comprises 17 from Jamaica, 10 from Trinidad and Tobago, 5 from Barbados, and two each from the other islands of the Federation except Montserrat, which returns one member. There were 111 candidates for the 45 seats. As simultaneous membership of the Federal Legislature and a Territorial Legislature is prohibited under the Constitution, several West Indian political leaders—including Mr. Manley and Dr. Williams—did not contest the Federal elections in order to retain their membership of their respective Territorial Legislatures.

Sir Grantley Adams was elected the first Prime Minister of the West Indian Federation, by 25 votes to 19, when the new Federal House of Representatives met on April 18 at Port of Spain, Trinidad. He received all the votes of the 24 Federal Labour members present and the vote of the Barbados National Party member (Mrs. Florence Daysh), and was opposed by the Democratic Labour Party. Mr. Erskine Ward, formerly Chief Justice of British Honduras, was elected Speaker of the House of Representatives, while Mr. Allen M. Lewis, Q.C., of St. Lucia, was elected President of the Senate, which also met on the same day. [The 19-member Senate is appointed by the Governor-General—see page 15995 A, second column.]

Sir Grantley Adams (60) was born in Barbados, the son of a headmaster. Graduating in Classics at Oxford, he was called to the English Bar in 1924, knighted in 1952, and took silk in the following year. One of the leading politicians and lawyers in the West Indies, he has been a strong advocate of Federation for many years. He was a member of the British delegation to the U.N. General Assembly in Paris in 1948.

The 10-member Council of State—the executive organ of the Federation [see page 15996 B, second column]—was appointed by the Governor-General of the West Indies (Lord Hailes) on April 20 on the advice of Sir Grantley Adams.

The Council of State comprises Mr. R. L. Bradshaw (St. Kitts) as Minister of Finance; Mr. C. D. Lacorbiniere (St. Lucia), Minister of Trade and Industries; Mr. F. B. Ricketts (Jamaica), Minister of Natural Resources; Mr. W. A. Rose (Trinidad), Minister of Communications and Works; Mrs. Phyllis Allfrey (Dominica), Minister of Social Affairs; two Ministers without portfolio (Mr. V. B. Vaughan, of Barbados, and Mr. N. H. Richards, of Antigua); and three Senators—Mr. A. G. Byfield (Jamaica), Mr. J. L. Charles (St. Lucia), and Mr. J. W. Liburd (Nevis). Defence and foreign relations remain responsibilities of the British Government under the Federal Constitution.

The first Parliament of the West Indian Federation was officially inaugurated at Port of Spain on April 20 by Princess Margaret, representing H.M. the Queen. The Princess, who was received with great enthusiasm, read a message from her Majesty expressing "warmest greetings" to the West Indian people and congratulating them on "the achievement of closer association with each other on which they have decided, and which holds so much promise for the future." In reply, Sir Grantley Adams reaffirmed the loyalty of the West Indian people to the Throne and stressed that the Federation would need the help and encouragement of Great Britain in its further progress towards full nationhood.

The ceremony was attended by delegations from all the islands of the Federation and by all leading West Indian politicians, including Mr. Manley, Dr. Williams, and Sir Alexander Bustamante. Britain was represented by Mr. Profumo (Under-Secretary of State for the Colonies) and by an all-party delegation which included Mr. Creech Jones, who, as Colonial Secretary in the Labour Government, played a major part in the early formative days of the Federation. Canada was represented by Dr. Sidney Smith (Secretary for External Affairs) and Mr. Gordon Churchill (Minister of Trade), and the United States by five members of the U.S. Congress.

A flag has been officially adopted for the West Indian Federation—the "Sun and Seas" flag—consisting of white wavy lines on a background of Caribbean blue, with an orange sun in the centre. (Times - Daily Telegraph - Manchester Guardian - Montreal Star) **(Prev. rep. 15995 A.)**

B. KOREA. — U.N. Reply to Chinese and North Korean Proposals. - Request for Clarification on Question of Free Korean Elections.

The 16 countries represented on the U.N. Command in Korea sent a joint Note to the Chinese Government on April 9 stating that "careful study" had been given to the Chinese and North Korean statements of February last [see 16103 A] and the proposals contained therein. The Note continued:

"The Governments concerned reaffirm that their aim is the establishment of a unified, independent and democratic Korea, in accordance with relevant U.N. resolutions. To this end, as they have often stated, they wish to see free elections held under U.N. supervision for a [Korean] National Assembly. They are glad to note that the North Korean authorities and the People's Republic of China also favour free elections, and they welcome the announcement that Chinese forces are to be withdrawn from North Korea.

"There appears, however, to be some doubt as to the precise interpretation to be placed on the North Korean proposals. A variety of statements is reported to have been made, for example, by North Korean representatives in Peking and Moscow, to the effect that the 'purpose of supervision by a neutral nations organization was to see that all political parties and public figures in both North and South Korea would have freedom of action, speech, publication, assembly and association' but that 'such supervision should not intervene in the elections.'

"These interpretations appear to call for some clarification, and the Governments of the countries concerned would be glad to know whether, when the North Korean authorities speak of a 'neutral nations organization' to supervise the elections, they accept that these should be held under U.N. auspices and that there should be adequate supervision not only of the preliminaries but also of the elections themselves.

"They would also be glad to know whether it is accepted that representation in the new National Assembly shall be in proportion to the indigenous population. [There are about 21,500,000 inhabitants in South Korea and about 7,000,000 in North Korea].

"If the People's Republic of China will seek from the North Korean authorities clarification of the points mentioned above, with such other details of the Korean proposals as may be relevant, they will be given careful consideration."

The Note was presented in Peking by the British Chargé d'Affaires on behalf of the 16 countries concerned. A copy was sent to the United Nations. (New York Times) **(Prev. rep. 16103 A.)**

C. ARAB FEDERATION.—Adoption of Constitution.

The draft Constitution of the Arab Federation received final approval in Baghdad on March 17 after joint discussions between Iraqi and Jordanian parliamentary representations extending over nine days. The Constitution was approved by the Jordanian and Iraqi Cabinets on March 18-19 and by the Parliaments of the two countries on March 27.

The Constitution of the Arab Federation is based on the principles proclaimed by King Faisal and King Hussein in their joint declaration of Feb. 14 [see 16017 A]. It provides *inter alia* (1) that King Faisal will be Head of the Federation and King Hussein deputy Head; (2) that fixed revenues from taxes and duties will be allocated for Federal expenditure, Iraq paying 80 per cent during the first year and Jordan 20 per cent; (3) that membership of the Federation will be open to any other Arab State, in which case consequential changes will be made in the arrangements for the Head of State; (4) that Iraq and Jordan will individually observe the treaties, agreements and international pacts to which they were bound before joining the union [thus preserving Iraq's membership of the Baghdad Pact]; (5) that each country will retain sovereignty over its territory, and its prevailing system of government; (6) that the Federation will have a Chamber of Deputies of 40 members (20 from Iraq and 20 from Jordan), as well as a Council of Ministers; (7) that the competence of the Federation will extend to foreign affairs, defence, financial and economic policy, and "any other matter which the Council of Ministers may propose in future"; (8) that the Iraqi and Jordanian armies will be collectively known as the Arab Army, with King Faisal as Commander-in-Chief and King Hussein in command of the forces in Jordan; (9) that King Faisal, as Head of the Union, would have power to declare war after approval by the Council of Ministers.

Turkey officially recognized the Arab Federation shortly after its formation in February.—(Times - Manchester Guardian - Turkish Embassy, London) **(Prev. rep. 16017 A.)**

A. KASHMIR. — Dr. Graham's Proposals for Settlement of Kashmir Question. - Rejection by India. - Statements by Mr. Nehru and Mr. Noon. - Political Activities of Sheikh Abdullah. - Terrorist Activities in Indian-held Kashmir. - Indian Allegations of Pakistani Complicity. - The Mangla Dam Dispute. - Integration of Indian and Kashmiri Finances and Public Services.

In accordance with the Security Council's resolution of Dec. 2, 1957, Dr. Frank P. Graham, the U.N. Representative for India and Pakistan, visited the sub-continent from Jan. 12 to Feb. 15 for discussions with the two Governments on the Kashmir question. Arriving in New Delhi on Jan. 12, Dr. Graham had introductory talks with Mr. Nehru, Mr. Krishna Menon (Defence Minister) and Mr. M. J. Desai (Commonwealth Secretary) and then proceeded on Jan. 17 to Karachi, where he met Mr. Firoz Khan Noon (the Pakistani Premier and Foreign Minister), Mr. S. A. Baig (Foreign Secretary), and Mr. Din Mohammad (Adviser to the Pakistani Government on Kashmir Affairs). He subsequently paid two further visits to Delhi (Jan. 23-Feb. 1 and Feb. 7-13) and two to Karachi (Feb. 1-7 and Feb. 13-15) before leaving for Geneva to draft his report.

In his report, published on April 3, Dr. Graham gave details of a five-point plan for the settlement of the Kashmir dispute which he had submitted to the two Governments. This envisaged declarations by India and Pakistan appealing to their peoples to maintain an atmosphere favourable to negotiations, and reaffirming the inviolability of the cease-fire line; the evacuation of the Pakistani forces from Kashmir, and the stationing of a U.N. force on the Pakistani side of the Kashmir border; discussions between the U.N. Representative and the two Governments on the possibility of a plebiscite; and a meeting between the two Prime Ministers at the earliest practicable date. These recommendations were accepted by the Pakistani Government in principle, but were rejected by India on the grounds (*a*) that they by-passed the question of Pakistan's failure to implement the resolution of Aug. 13, 1948, of the U.N. Commission for India and Pakistan (UNCIP), and (*b*) that they would "place the aggressor and the aggressed on the same footing."

The most important passages from Dr. Graham's report are given below:

"In the debates in the Security Council, held between September and December 1957, the Governments of India and Pakistan affirmed that they continued to be engaged by the resolutions of UNCIP of Aug. 13, 1948 [see page 9664], and Jan. 5, 1949 [see 9757 A]. In my initial discussions with the two Governments, I addressed myself to certain obstacles which appeared to stand in the way of progress in the implementation of these two resolutions. Foremost among these was the procedure for the withdrawal of the Pakistan troops and the withdrawal of the bulk of the Indian Army, as provided for in Part II of the resolution of Aug. 13, 1948 . . . I therefore embarked on discussions with the two Governments to ascertain their views on how these difficulties might be overcome. In following this approach, I was of course fully aware of the fact that the Government of India had not accepted the resolution of the Security Council of Dec. 2, 1957, and of their position regarding the actions contemplated in the resolution of Aug. 13, 1948, but I believed that they would be interested in finding ways and means to facilitate the implementation of those elements which were standing in the way of the withdrawal of Pakistan troops from the State.

"In my conversations with the two Governments I could not fail to note that while the objective envisaged in Part II-A—namely, the withdrawal of Pakistan troops from the State—was clear enough, the method and machinery to be pursued to this end would be likely to create its own problems. As I envisaged the situation that would obtain after withdrawal of Pakistan troops, I foresaw, as provided by the first UNCIP resolution, an area administered by the local authorities under the surveillance of the U.N. Commission, or as it had now developed, of the successor organ, the U.N. Representative for India and Pakistan.

"It should be noted that the position of this territory is of a peculiar nature. Its sovereignty rests with the State of Jammu and Kashmir, but the full exercise of that sovereignty would be limited under the resolution by (*a*) the surveillance of a U.N. organ, and (*b*) the commitment by India that her forces would remain within the cease-fire line. Furthermore, the degree of U.N. concern with the administration was left undetermined by the Commission by using the term 'surveillance.' Such problems as logistics and supply . . . have never been fully considered. . .

"Thus it would appear that the execution of Section A in Part II might create more serious difficulties than were foreseen at the time the parties agreed to that clause. The determination as to who are the 'local authorities' might not be an easy matter. Whether the U.N. Representative would be able to reconstitute the *status quo* which had obtained some ten years ago, would seem to be doubtful. I therefore came to the conclusion that prior negotiations with the parties on these problems would not only be essential but imperative. Otherwise the evacuated territory might be left in an unsettled condition.

"Since I was aware that the Government of India were concerned about the security of the evacuated territory, and more particularly were apprehensive that the Pakistan Army, after its withdrawal, might return to the territory, I felt it my duty to give serious consideration to ways and means to allay this concern. I therefore proposed that the feasibility of placing a U.N. force on the Pakistan side of the Pakistan and Kashmir border should be explored. If this conception in principle were to meet with approval, agreement might be sought from the Pakistan Government for receiving such a force, and negotiations might be initiated within the U.N. on the size, composition, and functioning of such a force.

"Other suggestions were also discussed informally with the two Governments. In view, however, of the urgency of what I considered the most immediate requirement of the situation—namely, a resumption of direct negotiations under U.N. auspices—I decided to make my formal proposal with as little detail as possible . . .

"Thus, on the day of my departure from the sub-continent on Feb 15, 1958, I submitted to the representatives of both Governments the following recommendations:

"(1) That they should consider the possibility of a renewed declaration in line with the Jan. 17, 1948 resolution of the Security Council and of Part I of the Aug. 13, 1948, resolution, under which they appeal to their respective peoples to assist in creating and maintaining an atmosphere favourable to further negotiations, and in which they undertake to refrain from statements and actions which would aggravate the situation.

"(2) That they reaffirm that they will respect the integrity of the cease-fire line, and will not cross or seek to cross the line on the ground or in the air, thus further assisting in creating a more favourable atmosphere for negotiations.

"(3) The withdrawal of Pakistan troops from the State of Jammu and Kashmir is provided for in Part II of the Aug. 13, 1948, resolution. Pending a final solution, the territory evacuated by the Pakistan troops is to be administered by the local authorities under the surveillance of the Commission. Part II of this resolution also provides for the withdrawal of the bulk of the Indian forces from the State in stages to be agreed upon with the Commission.

"In an effort to speed the implementation of these actions provided for in Part II, the U.N. Representative is suggesting that a prompt study be undertaken, under his auspices, of how the territory evacuated by the Pakistan troops could, pending a final solution, be administered in accordance with the provisions of the resolution. With a view to increasing the security of the area to be evacuated, the U.N. Representative recommends that consideration be given to the possibility of the stationing of a United Nations Force on the Pakistan side of the Pakistan and Kashmir border, following the withdrawal of the Pakistan Army from the State.

"(4) If progress is to be made in the settlement of the Indo-Pakistan question, there is need for an early agreement between the two Governments on the interpretation that should be placed on Part III of the Aug. 13 resolution and those parts of the Jan. 5 resolution which provide for a plebiscite. In this connexion the U.N. Representative would call attention to the communiqué of the Prime Ministers of India and Pakistan issued in New Delhi in August 1953, which recognized that a plebiscite had been agreed to and expressed the opinion that a solution should be sought 'causing the least disturbance to the life of the people of the State' [see 13162 A].

"The U.N. Representative will be considering with the two Governments the means and timing under which agreement might be sought on these questions.

"(5) The U.N. Representative, believing that further negotiations on the questions which he has been considering with the Governments of India and Pakistan would be useful, and believing that it would facilitate progress if these negotiations could be undertaken at the highest level, proposes to the Governments that a Prime Ministers' conference be held under his auspices in the early spring. If the latter recommendation would not be agreeable to either or both Governments, the U.N. Representative recommends to the parties that they keep the general proposal, or any reasonable variation thereof, under consideration, and that such a conference be held at the earliest practicable date.

"The Government of Pakistan agreed to these recommendations in principle. They informed me that they were willing to make a renewed declaration as suggested by me, and that they were prepared to reaffirm that they would respect the integrity of the cease-fire line. They informed me further that they were prepared to withdraw Pakistan troops from Kashmir simultaneously with the withdrawal of the bulk of the Indian forces from the State in stages to be agreed upon with the Commission, as provided in Part II of the Aug. 13, 1948, resolution. They also agreed with my recommendation that a prompt study be undertaken under the auspices of the UNCIP of how the territory evacuated by the Pakistan troops could, pending a final solution, be administered by the local authorities in accordance with the provisions of the resolution.

"The Government of Pakistan also informed me that they were agreeable to my recommendation to consider the possibility of the stationing of a U.N. force on the Pakistan side of the Pakistan and Kashmir border, following the withdrawal of the Pakistan Army from the State. In the matter of the interpretation that should be placed on Part III of the Aug. 13 resolution, and those parts of the Jan. 5, 1949, resolution which provide for a plebiscite, the Government of Pakistan indicated that they were prepared to abide by

the terms of the Prime Ministers' communiqué of August 1953. Finally, the Government of Pakistan agreed to my proposal for a conference at Prime Ministers' level, or any reasonable variation thereof, to be held under my auspices, adding that they hoped that this conference would be held as soon as possible.

"The Government of India declared themselves unable to agree to my recommendations. They based their position on the ground that my recommendations were made without regard to the failure to implement the Security Council resolution of Jan. 17, 1948, and Clauses (*b*) and (*c*) of Part I of the UNCIP resolution of Aug. 13, 1948, for which they held Pakistan responsible. In their view the sole onus of performance was on Pakistan and the United Nations, which both had the responsibility and the capacity for taking steps towards a peaceful approach to the situation, and for making a contribution to resolving the difficulties between India and Pakistan.

"While, therefore, the inability of India to accept my recommendations primarily followed from their contention that my approach was not feasible, since in their view it tended to by-pass the implementation of what they considered to be the preliminary question, they also informed me that they did not look with favour on the substance of my recommendations. Thus, they felt that a new declaration regarding a peaceful atmosphere and the cease-fire line might denote a displacement of the previous engagements. They further contended that such a declaration would imply that Pakistan had not violated their previous engagements and that the consequences of them would thereby stand condoned.

"The Government of India could also not see their way to accept the study I had recommended in my third recommendation, as they felt that it would tend to by-pass and evade what they considered to be the main issue—namely, the illegal occupation of Indian Union territory by Pakistan. In their view that territory was an integral and inseparable part of India, and the recommendation was based on a misconception that Jammu and Kashmir were a no-man's-land. Further, the study, in their view, would not be relevant since, according to the UNCIP resolutions and the assurances given on behalf of the Security Council to the Government of India, they alone, with the United Nations, were concerned in this matter and Pakistan would not seem to have any place whatsoever in those arrangements.

"With regard to the recommendation on the stationing of a U.N. Force on the Pakistan side of the Kashmir border, the Government of India were taking cognizance of a concern of the U.N. Representative in this matter which they understood to be conditioned by the previous conduct of Pakistan. They would on their part, however, consider it as highly improper, and indeed an unfriendly act, to promote a suggestion which would involve the stationing of foreign troops in a neighbouring sovereign State with whom they desired nothing but the most friendly relations. Since, however, this was a matter for decision by the Government of Pakistan in their sovereign competence, they would not be in a position to object to this proposal, though they would regret it.

"With regard to recommendation (4), the Government of India informed me that they regretted that they could not enter into any such discussions in view of their preliminary objections.

"Finally, the Government of India declared themselves unable to accept my last recommendation since it would, in their view, place the aggressor and the aggressed on the same footing. They therefore considered it contrary to the Charter and to all considerations of international ethics and equity.

"I should, however, inform the Council that the Government of India, at the same time as they declared themselves unable to accept my recommendations, also informed me that they have been and are anxious to promote and maintain peaceful relations with Pakistan. They stated that they firmly hold the view and belief that there should be a constructive and peaceful approach to every problem, and that they firmly adhered to their determination to pursue paths of peace, while placing their faith in the United Nations and its Charter.

"In keeping with this spirit expressed by India, which I know is shared by Pakistan, I still express the hope that the two Governments will keep under consideration the proposal for a high-level conference. I trust that, in their further consideration, they will find it possible promptly to make, without prejudice to their respective positions on the Kashmir question, preparations for holding ... such a conference at the earliest practicable date, covering questions of time, place, auspices and agenda. The agenda ... might include the basic differences which the parties find to stand in the way of a settlement, and such other matters as the parties might find would contribute to 'progress toward the implementation of the UNCIP resolutions of Aug. 13, 1948, and Jan. 5, 1949, and toward a peaceful settlement.'

"However wide the differences and deep the distrust, and however bad the situation in the opposite views of each other's position, no situation is completely and for ever beyond the redemptive power of the development of reciprocal faith, and the creative interchange of views and proposals for a peaceful settlement, as alternatives to the deepening differences in an age of unprecedented peril and hope. Better than talking at long distances across the sub-continent is, on occasion, to talk directly to each other at the highest possible level. The holding of well-prepared direct talks with the desire for a settlement is more than talk; it is an act of potentially creative faith which might lead to steps for a fair and peaceful settlement."

Mr. Nehru's Statement on U.N. Mediator's Proposals. - Denunciation of "Anti-Indian" Campaign in Pakistan.

India's attitude to Dr. Graham's proposals was explained by Mr. Nehru in a statement to the *Lok Sabha* on April 9.

After saying that the "facts of life" demanded that India and Pakistan must live together co-operatively, Mr. Nehru expressed regret at the strained relations between the two countries. It had been argued that once Kashmir and the Canal Waters issues had been solved, a good atmosphere would thereby be created; he did not think, however, that strained feelings between the two countries were due to these issues, but rather that these issues were the outcome of such feelings.

After referring to the "bitter dislike" of India exhibited in Pakistan, to the "anti-Indian campaign" waged in the Pakistani press, and to the "atmosphere of bitterness and cold war" created by statements of some Pakistani leaders, Mr. Nehru declared: "If that is the basis of their foreign and internal policies, then it does not matter what you settle. If by chance the Kashmir issue is out of the conflict, it will no doubt have a good effect, but their basic policy will continue in some other form." Mr. Nehru went on to accuse "noted personalities" in Pakistan of having trained people to commit sabotage in Jammu and Kashmir, where at least 100 bomb outrages had taken place.

Referring to Dr. Graham's suggestion that India and Pakistan should issue a new declaration promising to maintain an atmosphere of peace, Mr. Nehru said the Government of India were "perfectly prepared" to do so but had drawn Dr. Graham's attention to the type of declarations that had been made in Pakistan. Moreover, the bomb explosions which were taking place in Jammu and Kashmir were - he alleged - organized in Pakistan.

As regards Dr. Graham's second suggestion that India and Pakistan should make a joint declaration to observe the integrity of the cease-fire line, Mr. Nehru said: "I do not know if anybody has accused us during these ten years of a breach of the cease-fire line ... We gave our word that we would not take any offensive, and we have not done so. On the other hand you see what I have referred to as organized sabotage across the cease-fire line in Kashmir. ..."

With regard to Dr. Graham's third suggestion for the withdrawal of Pakistani troops from that part of Kashmir now held by them, and the stationing of a U.N. force on the Pakistani border of Kashmir, Mr. Nehru said: "Obviously Pakistan is an independent sovereign State and if she wants to have any foreign forces on her soil India cannot say 'no' to it. We cannot prevent it, but on our part we do not like the idea of a foreign force anywhere; more especially in this connexion, we did not see any reason why a U.N. force should stay in Pakistan on the Kashmir border. It is for Pakistan to agree or not to agree."

With regard to Dr. Graham's final suggestion that the Indian and Pakistani Prime Ministers should meet under his auspices, Mr. Nehru said: "We told Dr. Graham that we are always prepared to meet, but that this way of meeting under a third party's presence, even though the third party may be so eminent a person as Dr. Graham—was not a desirable way ... I need not go into it, but it is obvious that first of all it would place us in a position of equality with that of Pakistan. We have always challenged that position. Pakistan is the aggressor in Kashmir and we are the aggrieved party. Secondly, for the two Prime Ministers to sit with him would almost appear as if they would plead with Dr. Graham ... as advocates of a certain cause which they represent. This kind of approach would not lead to the problem being considered properly, or solved ... If my opinion is asked, I should say that the meeting should take place when the omens are favourable and when the atmosphere is helpful, otherwise it is not likely to do any good."

Statement by Mr. Firoz Khan Noon. - Attack on India and Britain.

Mr. Firoz Khan Noon had previously made a statement on Kashmir in the Pakistan National Assembly on March 8.

After denouncing India's "brown colonialism" as "the worst the world has ever known," and declaring that Kashmir was "only a beginning towards Indian domination of Asia," Mr. Noon bitterly attacked Britain, asserting that she had granted freedom to Ghana, Malaya, and other countries only because she could no longer hold them "under subjugation" and because she needed their votes to strengthen her position in the United Nations. Alleging that India's armed strength was four to five times greater than Pakistan's, he said that Britain had recently sold India 73 *Canberra* bombers, 300 *Centurion* tanks, and 173 *Hunter* fighters. "Are we such fools as to sit here and believe that England is supplying these arms to India to fight against China?" he asked. "They [the British] have said that we can buy too. We, being a poor country, cannot afford to go on buying arms. They just mean to create rivalry. If we fall a prey to the spirit of rivalry, the result will be that we shall be doing nothing except pouring our money into their factories ... If this is the attitude of the British under a Conservative Government, God help us if a Labour Government comes into power, because their leader has said already that Kashmir belongs to India and that they are neutral. They hope to come into power at the next election, and then, if we even say that we will walk out of the Commonwealth, they will kick us out and embrace India ...

"America has given us arms and aid. We are grateful to them. But I hear rumblings that from 1959 they will probably want to stop our military aid. I am sure that if they do that it will be under

pressure from India. If they do that, it will be time for us to reconsider the situation. I can tell the world this—that if our people find that their freedom is in jeopardy and is threatened by India, they will break all pacts in the world in order to save their freedom, and will shake hands with the people of whom they have made enemies for the sake of others . . . We are taxing ourselves now, we will tax ourselves more. We will prefer guns to butter, but we will keep our freedom . . . Even if we have to spend half our foreign exchange on paying for armaments to defend our freedom, we will do so."

After alleging that "under Hindu domination there can be no freedom for anyone, let alone Moslems," Mr. Noon accused the Kashmir Government of starting a "reign of terror" with the Indian Government's encouragement. "If the democracies of Europe and America do not solve the problem of the freedom of Kashmir to the satisfaction of the Kashmiri people," he declared, "the only solution for the Kashmiris will be to walk into the Communist camp. Some of the European countries have got the impression that no Moslem will enter the Communist camp. I can tell the world today that the Moslems will enter the Communist camp rather than remain under Hindu domination . . . Then God help Mr. Nehru, and God help those who are against Communism . . .

Mr. Noon concluded: "All that I say now to my friends is to be patient in Kashmir as well as here, because Dr. Graham is dealing with the Kashmir case and I have not lost hope yet. If Dr. Graham fails to solve the problem by April, then the nation will have to revise its whole policy. I tell you now that we must gird up our loins, economize, save money, tax ourselves, and build up our defence forces. . . ."

In a further statement on April 15, in reply to Mr. Nehru's *Lok Sabha* speech, Mr. Firoz Khan Noon offered to sign a "no-war" declaration with India provided that India agreed to settle all outstanding issues between the two countries by negotiation, mediation, or, if necessary, arbitration.

"It is well known," Mr. Noon said, "that cross-currents of hatred between India and Pakistan are primarily due to the repudiation by India of all her international obligations and commitments in respect of the Kashmir dispute, and the manner in which the Canal Waters dispute has been allowed to develop. I am sure the two countries could settle down to a state of perpetual friendship if only India would agree to a settlement of the Kashmir and Canal Waters disputes in accordance with the accepted universal standards of justice. I hope sincerely that Mr. Nehru will realize that it is the existence of these disputes alone which is forcing the two countries to waste their wealth in an armaments race . . . Our hand of friendship will always be extended, and it is for India to reciprocate the gesture. Let us live in peace and not make ourselves the laughing-stock of the world."

Political Activities of Sheikh Abdullah.

Following his release from prison on Jan. 8, Sheikh Abdullah (the former Premier of Kashmir) confined his political activities to addressing prayer meetings inside mosques, and did not associate himself with any political party.

In his speeches and press statements he consistently reaffirmed his demand for a plebiscite which would enable Kashmir to choose between accession to India or Pakistan and independence; maintained that the people of Kashmir were not bound by the Constituent Assembly's decisions, because that body had lost its representative character when he was arrested in 1953; accused Mr. Nehru and the Indian Government of being under the influence of Hindu communalists; and attributed his arrest to the Indian leaders' "communal bias." Particular offence was caused in India by a speech in which Sheikh Abdullah declared that those who did not support Kashmir's right to self-determination were "our enemies, though they be our neighbours," whilst those who did, "be they in the East or West, are our friends."

The Prime Minister of Kashmir, Bakshi Ghulam Mohammed, said on Feb. 2 that Sheikh Abdullah's speeches had fully justified his arrest in 1953. It was possible that he had a following of 10,000 to 20,000 people, but the other 5,000,000 Kashmiris were "solidly behind the National Conference." Sheikh Abdullah had been given the fullest freedom of speech since his release, but if the security of Kashmir was endangered the Government would deal with the situation "with an iron hand."

Sheikh Abdullah sent a letter to Mr. Nehru on April 13 asking him to grant Kashmir the right of self-determination, otherwise "the conscience of the world will force India to yield to our demand."

Bomb Explosions in Kashmir. - Indian Allegations of Pakistani Complicity.

A series of bomb explosions occurred in Kashmir from June 18, 1957, onwards, and were attributed by the Indian Government to Pakistani agents allegedly working in collaboration with the Kashmir Political Conference (a pro-Pakistani organization) and the Plebiscite Front (the organization of Sheikh Abdullah's followers). Mr. Nehru stated on Feb. 19, 1958, that 38 explosions had occurred in Kashmir in which six people had been killed and 17 injured.

In an earlier statement on Sept. 13, 1957, Mr. Nehru had mentioned explosions up to Sept. 8 and had stated that from various sources, including statements of people arrested, it was clear that the explosive devices had come from Pakistani sources across the cease-fire line. He said that some of the devices employed had been complicated and had borne Army markings; they could not have been made locally and could only have come from Army stocks. He also alleged that bombs had been placed in mosques and temples, apparently in order to cause communal disturbances.

The Kashmir Prime Minister stated on March 3 that 71 persons had been arrested during the preceding 12 months on charges of being Pakistani agents, and 21 for being in possession of bombs and other explosive material.

The Mangla Dam Controversy.

Another controversy between India and Pakistan arose over the Mangla Dam project, which provides for the building in the Pakistan-held part of Kashmir of (*a*) a dam almost two miles wide and 360 feet high on the River Jhelum, above the Upper Jhelum Canal; (*b*) a power station to supply power for the exploitation of bauxite deposits; and (*c*) a reservoir covering an area of 100 square miles. The project, which will cost about Rs. 1,000,000,000, will also enable an additional 6,000,000 acre-feet of water per year to be transferred through the Upper Jhelum Canal to the Chenab River for irrigation purposes in West Pakistan.

The "Azad Kashmir" Government announced on June 25, 1957, that it had issued the necessary notification for the acquisition of land in the Mirpur area for constructing the reservoir, which would affect about 122 villages with a total area of about 42,000 acres. Sardar Ibrahim Khan, President of the "Azad Kashmir" Government, said on Aug. 22 that as a first step towards the construction of the dam, the town of Mirpur would be demolished and the displaced population rehabilitated in West Pakistan within four years. According to reports in the Pakistani Press, about 100,000 people were expected to be affected by the scheme.

A letter protesting against the Mangla Dam project was sent to the Security Council on Aug. 21 by the permanent Indian representative at the U.N., Mr. Arthur Lall.

The Indian letter described the project as "a further instance of consolidation by the Government of Pakistan of their authority over the Indian territory of Jammu and Kashmir which they continue to occupy by force," and as involving "exploitation of the resources of the territory to the disadvantage of the people of Jammu and Kashmir and for the benefit of the people of Pakistan." It was asserted that the project constituted a violation of (1) the Security Council's resolution of Jan. 17, 1948, which called upon India and Pakistan to "refrain from making any statements and from doing or causing to be done or permitting any acts which might aggravate the situation"; (2) assurances given to the Indian Prime Minister by the chairman of the U.N. Commission for India and Pakistan (U.N.C.I.P.) that "the Pakistani Government will not be allowed to consolidate their position in a territory they had unlawfully occupied"; (3) the U.N.C.I.P. resolution of Aug. 13, 1948, under which "Pakistani troops are required to vacate the territory unlawfully occupied by them"; and (4) the U.N.C.I.P. resolution of Jan. 5, 1949. Mr. Lall did not call for any action by the Security Council, but asked that his letter should be brought to the notice of its members.

Pakistan's permanent representative at the U.N., Mr. Ghulam Ahmed, replied to Mr. Lall on Oct. 3 in a letter to the president of the Security Council.

The Pakistani reply stated that the project, which was being executed co-operatively by the Government of Pakistan and the "Azad Kashmir" authorities, would greatly improve the economy of "Azad Kashmir" by providing irrigation and hydro-electric facilities, and would in no way adversely affect any existing interest. After referring to the building of new roads and bridges on the Indian side of the cease-fire line and to the construction of the Banihal tunnel, which had opened a new line of communication between India and Kashmir, Mr. Ahmed declared that "if the above measures carried out by the Government of India in Indian-held Kashmir cannot be deemed to aggravate the situation in terms of the resolution of Jan. 17, 1948, my Government fails to understand how a development measure undertaken in the 'Azad Kashmir' area can be described as a violation of the resolution."

The Government of Pakistan had previously signed an agreement with a British firm—Messrs. Binnie, Deacon and Gourley—to act as consultant engineers on the Mangla Dam project. Another British firm, Messrs. Preece, Cardew and Rider, was to act as electrical engineers, and an American firm, Messrs. Harza Engineering Co., as civil engineers. A second letter protesting against this agreement was sent by Mr. Lall to the president of the Security Council on Jan. 20, 1958.

Mr. Nehru stated on Feb. 18 that the Indian Government had informed the British and U.S. Ambassadors of its "distress" that engineering firms of permanent member-countries of the Security Council should become parties to a contract which, he alleged, was in "direct violation of the resolutions of the Security Council and the U.N.C.I.P."

Integration of Indian and Kashmiri Public Services and Finances.

The Indian Home Minister, Pandit Pant, announced in the *Rajya Sabha* on Feb. 17, 1958, that the Kashmir Public Service would shortly be integrated with that in the rest of India, and that the Comptroller and Auditor-General would be in charge of the accounts of Kashmir, over which he had previously had no control. An Order by President Prasad extending the jurisdiction of the Comptroller and Auditor-General of India to Kashmir was published in Srinagar on March 28, thus completing the process of the State's financial integration with India and enabling Kashmir to be treated on a par with other Indian States in its financial relations with the Union concerning its share of Central taxes and grants-in-aid.

Re-election of Kashmir Head of State.

Yuvraj Karan Singh, son of the former Maharaja, was re-elected *Sadar-i-Riyasat* for the next five years by the Kashmir State Assembly on Nov. 4, 1957, without opposition. (Indian and Pakistani High Commissioners' Offices, London - The Statesman, Calcutta - The Hindu, Madras)

(Prev. rep. Kashmir Dispute, 15921 A.)

A. SOVIET UNION. — Denunciation of SEATO. - Proposal for Asian Collective Peace Pact.

A lengthy denunciation of the South-East Asia Treaty Organization was made by the Tass Agency on March 8, shortly before the opening of the annual meeting of the SEATO Council in Manila—see 16131 A. [A similar denunciation of the Baghdad Pact Organization was made by Tass shortly before the recent Ankara meeting of the Baghdad Pact Council : see 16025 B, 16023 A.] The Tass attack on SEATO was coupled with a proposal for a "collective peace pact in Asia."

The Tass statement alleged that the "Colonial Powers" were "using the SEATO bloc in their attempts to interfere in the internal affairs of the South-East Asian countries, so as to retain their economic and political positions in the area and to keep the peoples of these countries in a state of dependence." It went on :

"Seeking to camouflage this interference, the SEATO leaders intend to use the Manila session to elaborate plans for combating so-called subversive activities in South-East Asia. It is well known, however, that what the ruling circles of the U.S.A. and other SEATO countries usually mean by 'subversive activities' is the national liberation movement of the peoples of the South-East Asian countries, and the struggle of these peoples against the remnants of Colonial repression and for the consolidation of national independence . . . To bring pressure to bear on the South-East Asian countries, extensive use is also made of joint and regional military manoeuvres of SEATO armed forces."

After saying that any discussion of the Indonesian situation by SEATO "cannot be regarded otherwise than as gross interference in that country's affairs," the statement alleged that such interference was also the purpose of SEATO naval exercises held close to the Indonesian archipelago. It was further alleged that a number of SEATO countries were rendering the Sumatran rebels direct assistance in arms and money, and that "the Colonial Powers belonging to SEATO were using as their military base a part of Indonesian territory, West Irian, which is unlawfully held by the Netherlands."

The statement went on to assert that the Manila meeting would "consider strategic plans which the Colonial Powers intend to push through with a view to stationing nuclear and rocket weapons on the territories of certain Asian countries." After referring to the "dire consequences of preparations for a nuclear missile war in Asia" it continued :

"The efforts of the imperialist States to strengthen SEATO, primarily in military respects, are connected with the U.S.A.'s attempt to extend its network of overseas military bases. The aggressive circles of the West thereby wish to turn the territories of the Asian SEATO members into *places d'armes* which would certainly become targets for retaliation against the aggressor . . . The danger of a nuclear war in Asia is all the greater since the American units in South Korea and Taiwan [Formosa] already have rockets with nuclear warheads at their disposal, and aircraft of the U.S. Strategic Air Force are making patrol flights in those parts of Asia with hydrogen bombs aboard.

"All peace-loving peoples cannot fail to be seriously alarmed by the Western plans to use the SEATO Council session in Manila for the actual merging of the three aggressive blocs—NATO, the Baghdad Pact, and SEATO . . . Implementation of these schemes would signify the final turning of SEATO into an adjunct of the principal aggressive bloc—NATO. Whereas the SEATO pact stipulates that joint actions by its members call for preliminary consultations, the lining-up of SEATO and the Baghdad Pact with NATO would give the United States an opportunity to extend automatically the commitments of the North Atlantic bloc countries to the SEATO members . . ."

After describing Western promises of economic aid to Asian countries as "empty," and alleging that they were "chiefly directed at stepping-up the militarization of Pakistan, Siam, and the Philippines," the statement went on : "The Soviet Union believes that a radical improvement in the international situation . . . should be sought in the creation of a system of collective security in Europe and Asia . . . The conclusion of a collective peace pact in Asia would be an important step in this direction.

"Great significance is attached in the Soviet Union to the movement which has started in Asia against the deployment of atomic and hydrogen weapons on that continent . . . In full conformity with the aspirations of the Eastern peoples, all the countries of Asia can and must set up a peace zone where there would be no place for nuclear or rocket weapons . . ."

The Soviet denunciation of SEATO as an "aggressive" organization, coupled with the proposal for a peace pact and a nuclear-free zone in Asia, were described as mere propaganda by Mr. Selwyn Lloyd (U.K. Foreign Secretary), Mr. Walter Nash (Prime Minister of New Zealand), Mr. Richard Casey (Australian Minister of External Affairs) and Señor Serrano (Philippine Foreign Secretary) in statements issued in Manila on March 9. Mr. Casey said that the timing of the Tass statement "brands it quite clearly," while the British delegation recalled that the Soviet Union had issued a similar propagandist statement on the eve of the recent Ankara meeting of the Baghdad Pact Council.

Señor Serrano said that the Tass statement indicated that Russia feared SEATO, which had become an effective instrument in the area's struggle against Communism ; he added that the Philippines would make every effort to bring about close co-ordination between SEATO, NATO, and the Baghdad Pact, and would support any measure which might strengthen those organizations. - (Soviet Embassy Press Department, London - Times - Daily Telegraph) **(Prev. rep. SEATO 16131 A ; Soviet Attack on Baghdad Pact, 16025 B.)**

B. INDIA - NORTH VIETNAM. — President Ho Chi-minh's Visit to Delhi. - Discussions with Mr. Nehru. - Proposals for Reunification of Vietnam.

President Ho Chi-minh of North Vietnam visited India from Feb. 5-14 as the guest of the Government. During his stay in Delhi he had conversations with Mr. Nehru, and subsequently visited Bombay, Bangalore, and Calcutta, the Bhakra Dam, and industrial centres and community development projects before returning to Hanoi.

A joint communiqué issued on Feb. 12 stated that President Ho Chi minh and Mr. Nehru had reaffirmed their faith in the "five principles of peaceful co-existence" and had "expressed the hope that a high-level meeting would be held at an early date to consider ways of ending nuclear tests, achieving progressive disarmament, and lessening world tensions."

The communiqué continued : "The President expressed his appreciation of the valuable contribution made by the International Supervisory Commission, and by India as the chairman country, for the fulfilment of the purposes and provisions of the Geneva Agreements . . . The President and the Prime Minister reaffirmed the hope expressed at Geneva in 1956 that 'the International Supervisory Commission will persevere in their efforts to maintain and strengthen peace in Vietnam on the basis of the fulfilment of the Geneva Agreements . . . with a view to reunification of the country through free, nation-wide elections under the supervision of the International Commission.' In this connexion they stressed the need for promoting mutual understanding between the two Governments in Vietnam in accordance with the purposes and provisions of the Geneva Agreements . . . They were confident that the personal contacts established will further strengthen the friendly relations between their two countries and peoples . . ."

Addressing the Indian Council of World Affairs on Feb. 7, President Ho Chi-minh advocated discussions between the Governments of North and South Vietnam in preparation for the holding of free elections on the basis of universal suffrage and secret ballot, under the supervision of the International Commission. The single Parliament thus elected should choose a national coalition government, and the two armies should be gradually merged. "Pending reunification," he stated, "the parties and people's organizations which support peace, unity, independence, and democracy must be granted legal status ; normal economic, cultural, and social relations established ; and free communication between the two zones guaranteed."—(The Statesman, Calcutta - Indian High Commissioner's Office, London - The Hindu, Madras)

C. DIAMONDS. — World Sales in 1957.

Sales of diamonds effected through the Central Selling Organization on behalf of South African and other producers reached the record figure of £76,772,112 in 1957, of which £52,818,096 came from the sale of gems and £23,954,016 from the sale of industrial diamonds. Total diamond sales in 1956 had amounted to £74,546,010. The Organization handles an estimated 95 per cent of world diamond production. (Financial Times) **(Prev. rep. 15289 C.)**

A. UNITED KINGDOM. — Coal Industry. - Economy Measures to counteract Accumulation of Stocks. - Suspension of Saturday Working. - Measures against Persistent Absenteeism. - Production Statistics.

The rapidly worsening position of the coalmining industry, evidenced by mounting financial losses, decreasing consumption, and—for the first time since the war—excessive accumulation of stocks, aroused much concern in recent weeks on the part both of the National Coal Board and the National Union of Mineworkers. On March 19 the N.C.B. announced that, in view of the need for further economies, it proposed (1) to suspend Saturday morning working after April 30 ; (2) to suspend recruitment of miners, except in a few special pits ; (3) to close down a further number of uneconomic pits ; (4) to introduce compulsory retirement for miners at the age of 65.

The proposals were discussed between the N.C.B. and the N.U.M. executive on March 25. Sir James Bowman (chairman of the N.C.B.) explained that, largely as a result of decreased productivity and higher absenteeism, deep-mined coal had cost 9s. more a ton to produce in January 1958 than in January 1957 ; as a result, British coal was being undersold by Polish and American coal abroad and by oil fuel at home. The N.U.M., on the other hand, proposed through its president, Mr. Ernest Jones : (*a*) that opencast mining should be gradually ended and that existing contracts should not be renewed when they expired ; (*b*) that the N.C.B. and the union should jointly ask the Government to restrict imports of fuel oil into Britain. With regard to (*a*) Mr. Jones argued that it had always been understood that opencast production should be considered as a "cushion against unemployment" and be discontinued or curtailed when any threat to miners' employment arose. In respect of (*b*) he explained that the N.U.M. was deeply concerned at the stepping-up of oil imports in recent years and at the place oil now occupied in the national economy.

To these arguments, Sir James Bowman replied (*a*) that to abandon or reduce opencast working (which had recently yielded profits of up to 17s. a ton) would only worsen the Board's financial position and add to its difficulties ; (*b*) that the N.C.B. could not reasonably ask the Government to cut oil imports unless it was in a position to offer coal at competitive prices. He added that the number of uneconomic pits to be closed would be few, and that they would be selected from mines with the worst records for productivity and attendance.

The N.U.M. executive thereupon agreed to reconsider the Board's proposals, and on April 1 announced that "in view of the industry's critical financial position" it felt that it must ask miners' acceptance of most of them ; a policy statement to this effect would be placed before a special delegate conference from the coalfields on April 11. The statement added (1) that the executive proposed to examine carefully the N.C.B.'s proposals with regard to uneconomic pits, to make sure that they did not cause local unemployment ; (2) that it was convinced of the necessity for a cut in oil imports and, if necessary, would put its case before the Minister of Power without the co-operation of the N.C.B.

On March 4 the Yorkshire area council of the N.U.M., representing 138,000 miners at 108 pits, had resolved to end Saturday working when the present agreement expired on April 30. The decision, resulting from the council's "growing alarm" at the rise in coal stocks, was expected to result in a loss of about 12,000,000 tons of coal a year. Subsequently miners in the Scottish and South Wales areas also decided to end Saturday working.

Other recent developments in connexion with the coalmining industry are summarized below :

Quarterly Statistics. The following table shows the average weekly rate of coal production and consumption, and of manpower, output, and absenteeism in the first quarter of 1958 :

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Exports and Bunkers† Tons
January* ..	4,094,620	234,860	4,329,480	4,507,000	114,600
February ..	4,266,650	234,025	4,500,675	4,712,500	107,500
March ..	4,355,675	278,475	4,634,150	4,667,000	81,000

	Wage-earners on colliery books	No. of shifts worked at coal-face	No. of shifts worked per wage-earner	Output per manshift at coal-face Tons	Output per manshift overall Tons	Percentage of absenteeism
January*	711,200	278,340	4.33	3.334	1.172	13.84
February	712,000	276,975	4.87	3.476	1.245	10.69
March	709,050	276,625	4.79	3.499	1.255	14.84

*Average of five weeks. †Including fishing vessels but excluding coastwise bunkers.

New Price Structure for Industrial Coal. In order to encourage industrial users of larger grades of coal to substitute smaller sizes wherever possible, the N.C.B. introduced a new price structure from March 17 under which pithead prices of large coal were increased by up to 5s. a ton and prices of small coal reduced by up to 3s.

Dismissals for Absenteeism. Mr. Edwin Hall, Lancashire area secretary of the N.U.M., announced on Jan. 20 that, in order to combat the high incidence of absenteeism in the Lancashire area, the North-Western Division of the N.C.B. and the union had agreed to set up a system of "attendance committees" at each of the 71 pits in the area. Men reported by these committees for "persistently failing to work a full five-day week" would be dismissed and would receive no protection of any sort from the union.

Similar steps against absenteeism were announced by the West Midland Divisional Coal Board on Feb. 21. They included the drawing-up by colliery managements of lists of the worst offenders, and the issue by the Board of "warnings of dismissal," effective unless improvement was shown within three months.

The National Coal Board rejected on Jan. 15 a claim submitted by the National Union of Mineworkers for a reduction in the hours of surface workers (numbering about 385,000) from 42 weekly to 40, as well as for a general sick-pay scheme for all miners. The N.U.M. thereupon resolved (1) to refer the claim to the National Reference Tribunal for arbitration ; (2) to put forward a claim for a weekly increase of 10s. for surface workers (raising their basic minimum wage to £9 weekly, and estimated to cost £11,000,000 in a full year). This claim, however, was also rejected outright, whereupon the N.U.M. decided to submit it to the National Reference Tribunal for arbitration. (Ministry of Power - Times - Daily Telegraph) **(15960 A.)**

B. UNITED STATES. — Launching of Third Earth Satellite (Explorer III).

The third American earth satellite, *Explorer III*, was successfully launched into orbit by the U.S. Army at Cape Canaveral on March 26. Launched by the Army's *Jupiter-C* missile, it reached orbital velocity of slightly more than 18,000 m.p.h. 7½ minutes after leaving the ground, and completed its first orbit of the earth in about 121 minutes.

Explorer III is a 31-lb. tube with a length of 80 inches and a diameter of six inches—virtually a "twin" of *Explorer I* launched on Jan. 31 [see 15993 A]. Like the latter, it is a four-stage rocket, the last stage remaining attached to the satellite and moving with it through space. The chief innovation in *Explorer III*, compared with *Explorer I*, is that it contains a new device for recording and transmitting information on cosmic rays, inner and outer temperatures, etc. This device, a magnetic tape-recorder, was described by the *New York Times* as "no bigger than a pack of cigarettes" ; it was stated that it was "designed to provide data in chunks five times as large as provided by cosmic-ray recorders in *Explorer I*" and was "able to play back two hours' worth of information in a mere six seconds." The instrument was designed by a graduate student at the University of Iowa—Mr. George F. Ludwig, an ex-pilot. The two transmitters in *Explorer I* and *Explorer III* are identical, one being a 60-milliwatt transmitter using a frequency of 108.03 megacycles and the other a 10-milliwatt transmitter on 108 megacycles.

It was officially stated after the launching that the life of *Explorer III* was expected to be "rather short" owing to an "apparent deviation from the planned orbit." [It was explained that in the final stage it had directed itself too far from the horizontal, resulting in an orbit considerably closer to the earth than originally planned.] Although Dr. von Braun at first estimated its life at not more than two weeks, the Naval Research Laboratory in Washington said on March 23 that latest calculations indicated "a life expectancy of from four to six months." The laboratory said that *Explorer III* was orbiting the earth in 115.7 minutes, with an apogee (farthest point from the earth) of 1,738 miles and a perigee (nearest approach to the earth) of 110 miles. *Explorer I* is orbiting the earth in 118 minutes, with an apogee of 1,800 miles and a perigee of 187 miles.

As the Russian *Sputnik II* went out of existence on April 14 (see 16130 B), all three satellites at present orbiting the earth are American—*Explorer I*, launched on Jan. 31, *Vanguard I*, launched on March 17, and *Explorer III*, launched on March 26. As stated in 16080 C, the attempt to launch *Explorer II* was unsuccessful.—(New York Times)

(Prev. rep. 16080 C ; 15993 A.)

C. SOVIET UNION. — Reduction of Working Day.

A joint statement was issued on April 21 by the central committee of the Soviet Communist Party, the Council of Ministers of the U.S.S.R., and the All-Union Central Council of Trade Unions announcing that the working day would be reduced to seven hours in heavy industry generally and to six hours for underground workers in the coal and iron-ore industries. After stating that a steady rise in labour productivity had made these measures possible, it was announced (1) that the six-hour day had already been introduced in the Donets and Lvov-Volhynia coal basins ; (2) that the introduction of the seven- or six-hour day in the coalmining, iron and steel, coke, chemical, and metallurgical industries was "nearing completion" ; (3) that it would be possible during 1958 and 1959 "to go over to a shorter working day in all branches of heavy industry and to start introducing the seven-hour day in other branches of the national economy" ; and (4) that the wages of lower-paid workers would be raised "to reduce the gap between maximum and minimum wages." (Soviet Embassy Press Department, London)

(Prev. rep. 15086 A ; 14879 B.)

A. SOUTH AFRICA. — The Johannesburg "Treason Trial." - Preliminary Hearings. - African National Congress banned in Native Reserves.

The Special Branch of the South African police carried out a series of raids throughout the country at dawn on Dec. 5, 1956, during which they arrested 140 prominent opponents of the Government's *apartheid* policy on charges of treason, searched their houses and the offices of the political organizations with which they were associated, and seized numerous documents; 16 more persons were subsequently arrested on similar charges. All the accused were granted bail on Dec. 20, on condition that they did not attend public gatherings and reported to the police every week.

Among the 156 arrested persons (comprising 103 Africans, 23 Europeans, 22 Indians, and eight Coloureds) were Mr. L. B. Lee-Warden, M.P., the British-born Natives' Representative for Cape Western; Mr. Fred Carneson, a former member of the Cape Provincial Congress; Professor Z. K. Mathews, acting principal of Fort Hare University College; the Rev. D. C. Thompson, a Methodist minister, and chairman of the South African Peace Council; Mr. A. J. Luthuli, Mr. Oliver Tembu, and Mr. Walter Sisula, president-general, general secretary, and a former secretary of the African National Congress respectively; Mr. Moses Kotane, formerly secretary-general of the Communist Party; Dr. H. M. Moosa, formerly secretary of the South African Indian Congress; Mr. E. P. Moretsele, secretary of the Congress of Democrats; Mr. L. Levy and Mr. L. Massina, president and general secretary respectively of the Congress of Trade Unions; Mr. Jack Hodgson, formerly secretary of the Springbok Legion, an ex-servicemen's organization; and Mrs. Helen Joseph, secretary of the Federation of South African Women. Two of the lawyers who had been briefed for the defence, Mr. D. Nokwe (the only practising African barrister in the Transvaal) and Mr. J. Slovo, were arrested on Dec. 13, 1956.

The preliminary hearing of the charges against the accused opened in Johannesburg on Dec. 19, 1956, before the Chief Magistrate of Bloemfontein, Mr. F. C. A. Wessel, and were not concluded until Jan. 30, 1958. During the first three days of the hearing large crowds of Africans assembled outside the court, and on Dec. 20 four Europeans and 18 Africans were injured when the police made baton charges and opened fire on the demonstrators.

The formal charges against the accused—which were read for the first time when the Crown concluded its case on Jan. 21, 1958—alleged that they were guilty of high treason, or alternatively of contravening the Suppression of Communism Act, and that between Jan. 1, 1952, and Nov. 30, 1956, they "did wrongfully and unlawfully and with hostile definition against H.M. the Queen and her Government in the Union of South Africa disturb, impair, or endanger the existence or security of the said Government by committing hostile acts or by inciting or instigating members of the public to commit hostile acts."

The "hostile acts" were listed as follows: (1) organizing or taking part in campaigns against the Native Resettlement Act, the Bantu Education Act, the Group Areas Act, the Bantu Authorities Act, the Natives (Abolition of Passes and Co-ordination of Documents) Act, the Public Safety Act, and other existing laws; (2) conspiring to overthrow the Government by extra-parliamentary, unconstitutional, illegal, and violent means; (3) convening a "Congress of the People" at Johannesburg on June 25-26, 1955; (4) adopting a "Freedom Charter" at that meeting; (5) advocating the establishment of a Communistic State; (6) inciting members of the public to commit acts of violence against the police and Europeans; (7) spreading feelings of hostility between Europeans and non-Europeans; (8) making speeches and distributing documents to stir up discontent, promote disturbances, and further the aim of changing the form of government; and (9) recruiting "freedom volunteers" to assist in the implementation of the "Freedom Charter." The alternative charges were of performing acts "calculated to further the achievement of any of the objects of Communism," and of advocating "the achievement of any of the objects of Communism or any act or omission which is calculated to further the achievement of any such objects."

Mr. J. C. van Niekerk, Q.C., led for the prosecution and Mr. V. C. Berrange, Q.C., for the defence.

Mr. J. C. van Niekerk, opening the case for the prosecution on Dec. 20, 1956, said that "the basis of the high treason charge will be incitement and preparation for the overthrowing of the existing State by revolutionary methods and the establishment of a so-called people's democracy on the pattern of the East European Communist satellite States and China." The accused were known to be actively connected with associations grouped as the "National Liberation Movement," and plans had been made for co-ordination of these various multi-racial organizations to work for the "Freedom Charter." At a meeting of the South African Indian Congress in July 1954, the formation of a "world democratic freedom front" to fight for "freedom of the oppressed peoples" had been discussed. Evidence would show that the South African Peace Council was the mouthpiece of Communism in South Africa and a distributor of Communist literature and propaganda to all the other organizations involved, and that members of the Peace Council were also members of these organizations, including the African National Congress, the South African Indian Congress, and the Congress of Democrats.

The "Freedom Charter," Mr. van Niekerk continued, proposed that the ownership of the mines and other industries should be taken over by "people's committees," that the workers should take over the factories, and that the people should control the banks. A call had been issued for "freedom volunteers," who took an oath to "fight *apartheid*" and to "die fighting." As evidence of revolutionary activities, he referred to the resistance to the Sophiatown evictions in 1955 [see 14246 A] and to a boycott of bus services by the African community at Evaton (near Johannesburg); Mr. van Niekerk also quoted statements by the accused that "minority rule" should be replaced by "more democratic" forms of government and that it was now time for the "people of South Africa" to govern the country. He laid particular emphasis on a bulletin alleged to have been issued by the Congress of Democrats in 1956, which declared that "the Congress must have money to buy machine-guns to fight with."

Mr. V. C. Berrange, for the defence, said on Jan. 9, 1957, that the accused would ask the court to hold that they were the victims of "political kite-flying," and that the prosecution was "testing the political breezes to ascertain how far the originators can go in their endeavours to stifle free speech and criticism of the policies of the Government." The accused persons constituted a cross-section of the population; among them were M.P.s, priests, lawyers, journalists, students, clerical workers, and labourers. "They come of all races," he contined, "but all of them hold one thing in common, in spite of the fact that they have different political affiliations a belief in the brotherhood of man . . ."

Mr. Berrange went on to say that many months ago the Minister of Justice, in a debate in the House of Assembly, had been prophesying the arrest of 200 persons on charges of treason. Mr. Berrange continued: "The defence will seek to show that the preparations for the fulfilment of this prophecy had been made even before that by the security police. We shall show that as a prelude for these proceedings, and for the purpose of creating favourable conditions, the security police set out deliberately to create a fantastic atmosphere of treason around everything that the accused have worked for. They did this by endeavouring to intimidate the public with their attendance at open and legitimate meetings, by conducting mass raids and country-wide searches, and by flourishing Sten guns, fixed bayonets, and truncheons. The most fantastic allegations of plots to poison water supplies and to bomb power-stations have been made by Ministers of the Crown, which were made to provide a certain justification for the activities of the police . . .

"The defence will allege that this trial has been instituted in an attempt to silence and outlaw the ideas held by the accused and the thousands whom they represent. The defence will also show that the political activities of the accused, the views that they hold, and the ideas they have expressed, are matters of public record, and that no attempt has ever been made to conceal their aims from the world or the manner in which they hope to achieve them. The defence will therefore contend that this case is a political plot of a type which characterized the period of the Inquisition and the Reichstag fire trial . . ."

The evidence for the prosecution, which totalled nearly 2,500,000 words, included over 10,000 documents and reports by police witnesses of speeches alleged to have been made by the accused. Witnesses for the prosecution included Dr. Arthur Murray, Professor of Philosophy at Cape Town University, who gave expert evidence on Communism. Mr. Berrange stated on Jan. 21, 1958, that no evidence would be called by the defence.

After the Crown had concluded its case, Mr. Berrange applied on Jan. 29, 1958, for the discharge of all the accused, on the ground that the prosecution had failed to prove the commission of any offence. He maintained that not one witness for the prosecution had failed to admit that the accused had repeatedly advocated that violence must be avoided, and that they had emphasized the idea of racial harmony. The "Congress of the People" had been a peaceful gathering to which all recognized political organizations, including the Nationalist Party, had been invited to send delegates. "If that which the Crown has established be evidence of treason, subversion, or Communism as defined in our law," Mr. Berrange declared, "then there is an end in this country to all that is implicit in the term democracy."

Replying for the prosecution, Mr. Oswald Pirow, Q.C., protested against Mr. Berrange's allegation of "political kite-flying" and stressed that the proceedings had been set in motion by the Attorney-General, who was a public servant. Mr. Pirow maintained that the Crown had produced more than enough evidence to show that there was a dangerous Communist conspiracy to overthrow the State and to replace it with a "people's republic."

The Crown had previously withdrawn its case on Dec. 17, 1957, against 61 of the accused, including Mr. Luthuli. The judge ruled on Jan. 30, 1958, that there was sufficient reason for putting the remaining 95 accused (58 Africans, 17 Europeans,

18 Indians, and two Coloureds) on trial for high treason. All the accused pleaded " not guilty " and elected to be tried by a judge and jury. The charges against Mr. Lee-Warden and two of the accused Indians were subsequently withdrawn on Feb. 12, no reason being given for this decision.

A fund to meet the costs of the defence and of bail, and to assist the dependants of the accused, most of whom had lost their employment, was launched on Dec. 13, 1956, by the then Archbishop of Cape Town (the late Dr. Clayton), the Bishop of Johannesburg, two former judges (Mr. R. Feetham and Mr. F. Lucas), and other public figures. A similar fund was launched in London by Christian Action, its sponsors including Canon L. J. Collins, of St. Paul's Cathedral, the Bishop of Birmingham, Earl (Bertrand) Russell, Lord Faringdon, and Father Trevor Huddleston.

A proclamation issued by the Governor-General on March 17, 1958, banned the African National Congress from the Zeerust area (where a series of disturbances had taken place since April 1957 as a result of attempts by the chiefs to carry out Government instructions to make African women carry passes) and a number of other African reserves. The Minister of Native Affairs was empowered to extend the ban to other areas and organizations, and to order Congress property to be disposed of or destroyed. Congress members in the named reserves who did not resign, and persons who became members or took part in Congress activities, became liable to a fine of up to £300, imprisonment for up to three years, or both.—(Cape Times)

A. JAMAICA. — Constitutional Reform Proposals.

Final recommendations on constitutional reform in Jamaica, made by the bipartisan committee appointed in 1956, were presented in the Jamaica House of Representatives on April 1. The principal recommendations—providing *inter alia* for a two-Chamber legislature—were as follows :

Legislative Council. This body the Upper Chamber—would consist of 21 members, to be appointed by the Governor after consultations with the leaders of all parties represented in the House of Representatives ; the Chief Minister or Premier would have the right to recommend not fewer than three of the members. The Legislative Council would elect its President and Deputy President ; would be able to initiate any legislation except money Bills ; and could hold up any measures passed by the House of Representatives for six months, except money Bills, which might be delayed for one month only. It would have no official members.

House of Representatives. This Chamber would have 45 members, all elected. It would elect its Speaker and Deputy Speaker.

Council of Ministers. This body would be known as the Cabinet and would consist of up to 15 members, of whom not more than 12 could belong to the House of Representatives. It would be presided over by the Chief Minister, who might be designated Prime Minister.

Legislation. No Bills would be reserved for the Sovereign's assent except those relating to defence or international relations—i.e. subjects reserved to the West Indian Federal Government on the achievement of Dominion status. The Governor would have no reserved powers but would have a power of veto, to be exercised on the advice of the Cabinet.

Privy Council. The existing Privy Council would be retained to advise the Governor on the exercise of the Royal prerogative, and to be responsible for disciplinary matters relating to the Civil Service.

Judiciary. The Chief Justice would be appointed by the Governor after consultation with the Premier, whilst puisne judges would be appointed on the advice of the Judicial Service Commission.

Civil Service Commission. This body would be responsible for the appointment and promotion of Civil Servants.

The recommendations followed the introduction of a Cabinet system and virtual self-government in the island in November, 1957. (Times) **(Prev. rep. Jamaica, 15821 B.)**

B. UNITED KINGDOM. — Trade Unions. - New General Secretary and President of N.U.R.

Mr. Sydney Greene (47) was appointed general secretary of the National Union of Railwaymen on Feb. 25, and Mr. C. W. Evans (52) president of the union, in succession respectively to Mr. James Campbell and Mr. Tom Hollywood, both of whom died from severe injuries received in a motor accident at Stalingrad on Nov. 7-8, 1957, while visiting the Soviet Union with a trade union delegation.

Mr. Jim Campbell (62) was one of the leading personalities in the trade union movement and a member of the T.U.C. General Council. Formerly in the service of the old Glasgow & South-Western Railway, he was active in the N.U.R. for many years and succeeded Mr. Figgins as general secretary in 1953. Mr. Hollywood (55), an engine-driver, was a member of the National Executive Committee of the Labour Party. The bodies of Mr. Campbell and Mr. Hollywood were flown from Russia to Britain for burial.

Mr. Greene had been acting general secretary of the N.U.R. since Mr. Campbell's death.—(Times - Daily Herald)

(Prev. rep. 12843 D.)

C. TELEVISION. — New British Invention for Tape-recorded Television. - The " Vera " Apparatus.

It was disclosed on April 8 that engineers at the B.B.C.'s research laboratories had developed a new method whereby television programmes could be recorded on magnetic tape in much the same way as sound programmes are recorded. The apparatus—Vision Electronic Recording Apparatus (Vera)—was demonstrated to press correspondents by Sir Harold Bishop the B.B.C.'s Director of Engineering, who described it as " a very substantial advance " in the technique of television recording.

The Radio Correspondent of *The Times* gave the following explanation of the difference between the new and the existing systems :

" Until recently the only way of recording television pictures for later reproduction was by photographic film, using a film camera to photograph the images on the face of a television tube. The film had to be developed before the pictures could be re-broadcast ; apart from the delay, in some cases a degree of distortion was introduced. Moreover, the film could only be used once, and it was expensive.

" Vera records the picture information in the form of electrical impulses provided by the television camera. Because a band of frequencies some 300 times as wide as that required for high-quality sound recording has to be inscribed on the tape, it has to be run across the recording head very much faster than is necessary for normal sound recording, and 15,000 ft. are used to record a television programme lasting for a quarter of an hour The frequency band is divided and recorded simultaneously in two parts, together with the sound component of the programme, on conventional half-inch magnetic tape which can be used time and time again."

At the demonstration witnessed by press correspondents, a complete broadcast in vision and sound was immediately reproduced on a T.V. screen by the " Vera " apparatus within one minute. Mr. Cecil McGovern, deputy director of B.B.C. Television, estimated that the reproduction would have taken three to four hours by the existing method of filmed tele-recording, depending on the circumstances of processing ; he pointed out that the new method would be particularly advantageous for newscasts, outside broadcasting, and the T.V. talks department.

The British " Vera " apparatus is regarded as superior to a similar but much more expensive method of tape-recorded T.V. which had been in use in the United States for about two years. Whereas the British equipment costs £85 an hour to run, the American costs three times as much ; moreover, the capital cost of the equipment (about £5,000) is much less than in America. Sir Harold Bishop explained that the magnetic tape used in Britain was of half-inch width and obtainable from any manufacturer, whereas a specially wide tape was needed for the American system. He said that there was no fundamental reason why " Vera " could not be used for recording colour television when it was brought into service.

(Times - Daily Telegraph - Radio Times)

D. ADEN. — Agitation in Lahej Sultanate.

The Governor of Aden (Sir William Luce) ordered the arrest of three leading personalities in the Sultanate of Lahej on April 18 on charges of contact with foreign Powers [unnamed] and of trying to make trouble in the Western Aden Protectorate. The Sultanate of Lahej is the most important of the 17 sultanates, emirates and sheikhdoms which make up the Western Protectorate.

The three men concerned were Muhammed Ali Jiffri, president of the Lahej Legislative Assembly and legal adviser to the Sultan ; his younger brother, Abdullah Ali Jiffri, Director of Education in the Sultanate ; and Alwai Jiffri. All were described in official quarters as " agitators " and " conspirators." Abdullah Ali Jiffri was taken into custody but the other two remained at large.

Muhammed Ali Jiffri was instrumental in 1951 in forming the South Arabian League—an organization advocating the creation of a new South Arabian State to include Aden Colony and the Protectorates, and unity with the United Arab States. Alwai Jiffri is closely associated with M. A. Jiffri in the League's political activities and is president of its Yeshbum branch.

Intensive searches for Muhammed Ali Jiffri and Alwai Jiffri were made by two companies of The Buffs, who were reinforced on April 19-20 by other British troops flown to Aden from Kenya.—(Times - Manchester Guardian - Observer)

E. ARGENTINA. — Compensation Agreement signed with Primitiva Gas Company.

It was announced on April 5 that the Argentine Government had signed an agreement with the Primitiva Gas Company of Buenos Aires for compensation payments to that company in accordance with the decree of Nov. 25, 1957. The first payment (about £206,000) will be made within 30 days.—(Times)

(Prev. rep. 15897 A.)

A. AUSTRALIA. — Defence Reorganization. - The Morshead Committee Report. - Cabinet Changes.

A reorganization of Australian defence planning and administration was announced in the House of Representatives on March 19 by the Prime Minister, Mr. Menzies. The Government's decisions were partly based on the recommendations of a sub-committee set up in November 1957 under the chairmanship of Lieut.-General Sir Leslie Morshead. This committee, which also included the chairman of the Public Services Board (Sir William Dunk), the Secretary of the Defence Department (Mr. E. W. Hicks), and the Assistant Secretary of the Prime Minister's Department (Mr. E. J. Bunting), had been asked "to review the organization of the Defence group of departments and to advise the Cabinet."

The principal recommendations of the Morshead Committee were (*a*) that the separate departments of Defence, Navy, Army, and Air should be amalgamated into a single Department of Defence under a Minister of Defence; (*b*) that the Minister of Defence should be assisted by two "Associate Ministers" who would hold Defence assignments in addition to their own non-Defence ministerial portfolios; (*c*) that the Associate Ministers should be allotted duties on a "functional" and not a "Service" basis, so that each of them would be in charge of certain functions (e.g. personnel or logistics) for all Services; (*d*) that the separate Departments of Supply and Defence Production should be amalgamated into a single department under one Minister.

Mr. Menzies announced that, while rejecting a complete amalgamation of the Defence department and the three Service departments into a single department, the Government had come to the following conclusions:

(1) An administrative direction would be issued "to establish the complete superiority of the Department of Defence in the field of policy and to enable it by authority, if persuasion failed, to secure the elimination of overlapping between the various departments, and the creation wherever possible of common services and standards."

(2) The Chiefs of Staff would in future meet regularly for the formulation of purely military views, while continuing as hitherto to sit on larger committees in which important non-military considerations, either political or financial, were also taken into account.

(3) To avoid the possibility of the Minister of Defence receiving military advice representing a form of compromise between the individual Service views of the Chiefs of Staff, an independent Chairman would be appointed to head the Chiefs of Staff Committee; he would not himself be one of the Chiefs of Staff, and his duty would not be towards his former Service but to the Minister in respect of the overall defence picture. He would also act as military liaison officer with SEATO, ANZUS, and ANZAM. Otherwise, his appointment would not affect or reduce the proper authority of each Chief of Staff in relation to his own Service.

(4) The membership of the Defence Committee would be expanded to include the Chairman of the Chiefs of Staff Committee. [The Defence Committee was created about a year ago to co-ordinate inter-Service military ideas with the special knowledge possessed by the External Affairs Department, the financial considerations of the Treasury, and the broad policy preoccupations of the Prime Minister's Department].

(5) There would be increased consultation between the Minister for Defence and the Service and Supply Ministers, as well as between the permanent heads of the Defence, Service, and Supply Departments.

(6) The Departments of Supply and of Defence Production would be amalgamated into a single Department of Supply, which—like the Service Departments—would operate within and be subject to the general policy authority of the Department of Defence.

(7) Paramount responsibility for the elimination of overlapping, co-ordination of activities, and development of common services would rest with the Department of Defence, the Minister of Defence being given final authority to direct the introduction of reforms.

(8) The control of the research and development programme by the Department of Defence would be strengthened, whilst at the same time ensuring that the Services were more intimately associated with research and development at all relevant stages.

Mr. Menzies gave the following reasons why the Government had not adopted the Morshead Committee's recommendation for the complete amalgamation of the Service departments under a single Defence Minister, helped by Associate Ministers:

(*a*) The task of overall Defence administration and responsibility was far too great for one Minister.

(*b*) The appointment of Assistant Ministers or of Parliamentary Secretaries on a paid basis to assist the Minister would not be feasible in the light of Sections 44 and 46 of the Constitution, which provided that persons holding any "office of profit under the Crown" were incapable of sitting as members of the House of Representatives, and in the case of contravention were liable to penalties. The only offices of profit under the Crown which a member might take without forfeiture were those of Ministers of State. Under Section 64 of the Constitution, Ministers of State were appointed to administer such Departments of State as the Governor-General in Council might establish.

(*c*) For similar reasons Associate Ministers of Defence would first have to be appointed Ministers of State for some other department, and would receive their salary in respect of that department. As they had no department of their own they would be without the normal administrative organization for the performance of their work, and there would be no clear vertical line of authority connected with ordinary departmental organization; similarly, there would be difficulties in the status of an Associate Minister in relation to the Chiefs of Staff.

(*d*) Moreover, as the Associate Ministers would be responsible only for limited spheres (e.g. logistics or personnel), the Minister of Defence would be himself responsible, politically and in Parliament, for all other matters covered by the activities of the Defence Services and their administration. This would necessitate his becoming in part a detailed Services administrator, thus giving him less time to consider the important problems of strategic thinking and overall planning which were the vital business of the Defence Department.

Replying on March 27 to criticism of the Government's plans, expressed by both Government and Opposition members, the Minister for Defence (Sir Philip McBride) emphasized that the Morshead Committee had recommended only the integration of the administrative structure of the Services, but not any integration of the Services themselves a major step which had not been taken in any other country. He also stated that the Government were considering establishing common telecommunications, medical, transport, and education services for the armed forces.

Mr. Menzies announced on March 24 (*a*) that Mr. Athol Townley, Minister for Immigration, Supply, and Defence Production, would become Minister of the new unified Supply Department; and (*b*) that Mr. A. R. Downer would succeed Mr. Townley as Minister for Immigration. Mr. Downer (48) has been a member of the House of Representatives since 1949, representing a South Australian constituency.

Mr. Townley had taken over the portfolios of Supply and Defence Production, in addition to the Immigration portfolio, following the appointment of Mr. Howard Beale as Ambassador to Washington in February [see 16099 B].

It was announced in Canberra on April 9 that Lieut.-General Sir Henry Wells, recently Chief of General Staff of the Australian Army, had been appointed the first Chairman of the Chiefs of Staff Committee.—(Australian News and Information Bureau - Parliamentary Statement on Defence Organization, Canberra) **(Prev. rep. 15504 A.)**

B. UNITED KINGDOM. — Mr. Macmillan's Reply to Mr. Khrushchev on Suspension of Nuclear Tests.

Mr. Macmillan's reply to Mr. Khrushchev's letter of April 4 on the suspension of nuclear tests (see 16125 A) was delivered in Moscow on April 21. After expressing the hope that satisfactory arrangements would soon be made for a meeting of Foreign Ministers preparatory to a summit conference, Mr. Macmillan wrote:

"It seems to me that the question of nuclear tests must be one of the subjects, together with other problems of disarmament, which will be discussed. Any practical agreement in this sphere must depend, of course, upon an agreed system of inspection and control. I wonder, therefore, whether we could not press forward now with the proposal which has already been made—namely, that technical experts should meet in order to work out the kind of arrangements which would be necessary for such a system."

As stated in 16125 A, President Eisenhower had replied to Mr. Khrushchev on April 8.—(Times) **(Prev. rep. 16125 A.)**

C. PORTUGAL.—Second Six-Year Development Plan.

Details of Portugal's second six-year development plan were announced on April 11. It provides for an investment of 21,000 million escudos (about £260,000,000) in metropolitan Portugal and 9,000 million escudos (about £100,000,000) in the Portuguese overseas territories—about double the expenditure under the first development plan. Individual projects include a suspension bridge across the Tagus at Lisbon; 15 vessels for the Portuguese merchant navy, together with 10 cod-fishing vessels and 57 trawlers; increased electrification; new airports at Madeira and Horta (Azores); an increase in oil-refining capacity; and a free port zone at Montijo, near Lisbon. The plan as a whole lays emphasis on industrial and agricultural development and on improvements to communications.—(Times - New York Times)

APRIL 26—MAY 3, 1958

A. WESTERN GERMANY. — Arming of West German Forces with Nuclear Weapons. - Parliamentary Approval for Government Decision. - Bundestag Debate. - Social Democratic and Free Democratic Opposition to Nuclear Arms for Bundeswehr. - Protest Demonstrations. - Social Democratic Plans for National Referendum.

A four-day debate on foreign affairs and defence took place in the *Bundestag* on March 20-25. The debate—the longest in the history of the *Bundestag*, and characterized by impassioned speeches on both sides - dealt in particular with the question of whether or not the *Bundeswehr* should be equipped with nuclear weapons, and whether the Federal Government should accept the "Rapacki plan" for an atom-free zone in Central Europe comprising Western and Eastern Germany, Poland, and Czechoslovakia.

Prior to the debate, the Federal Defence Minister, Herr Strauss, had visited the U.S.A. during the first fortnight of March for discussions with the U.S. Defence Department, and had announced in Washington on March 5 that his Government would accept a U.S. offer of *Matador* pilotless bombers for the West German armed forces. [The *Matador* has a range of about 600 miles and can carry atomic as well as conventional warheads.] After his return to Bonn, Herr Strauss confirmed on March 18 that the Federal Government intended to buy two groups of *Matadors*, each with six launching ramps and 20 missiles. It was also authoritatively reported from Bonn that the Defence Ministry had ordered 300 *Nike* rockets in addition to the *Matadors*. All these missiles will be delivered with conventional warheads only, nuclear warheads remaining under U.S. control in accordance with NATO policy.

The Bundestag Debate.

The four-day debate was opened by Dr. Erich Mende, chairman of the Free Democratic Parliamentary Group.

Dr. Mende criticized the "negative attitude" of the Federal Government, and expressed the view that the Soviet Union might perhaps regard German reunification as a long-term process consisting of several stages. The first stage which might be discussed at a Summit Conference would be concerned with the principles of a peace treaty for the whole of Germany, and a decision on Germany's military and political status. Possibly the question of frontiers might also be discussed at this stage, although it could only be finally decided by an All-German Parliament in connexion with a peace treaty.

As regards the second stage, Dr. Mende said that his party agreed with the whole House that Eastern Germany was not a legitimate German State and that formal bilateral negotiations between Western and Eastern Germany must be rejected. Nevertheless, he was not opposed to discussions with the East German regime if the four Powers were to delegate to the two German States such questions as the adjustment of their economic and social systems, land reform, and electoral legislation for all-German elections. Such discussions, while not implying any abandonment by the Soviet Union and the Federal Republic of their respective principles, might help to "loosen the situation."

During the third phase the agreements reached could be formally laid down, and if there were any difficulties in working out details the four great Powers could still deal with these questions themselves. The fourth and final phase would consist of ratification of the treaty by an All-German Parliament created by free elections.

As regards the creation of an atom-free zone, Dr. Mende pointed out that the second Rapacki Plan [see 16090 A] contained certain control clauses, as had been previously demanded by the Western Powers; it should therefore receive serious consideration.

Dr. Adenauer said that the decisive question was whether or not the Federal Republic wanted to remain a member of NATO. This was not an opportune time to discuss the Rapacki Plan and other proposals because, with "seven Rapacki-like proposals and 21 other suggestions" for the agenda of the Summit Conference, nobody knew yet what was really intended. Stressing the "striking parallel" between the present situation and the *Bundestag* debates of December 1954 on German adherence to NATO, the Chancellor recalled that at that time the Soviet Union had suddenly brought up again the question of German reunification, with the clear intention of preventing the Federal Republic's entry into NATO. Now that a NATO reorganization in armaments and strategy was pending, the Soviet Union was again trying, by large numbers of letters and Notes, to create disunity and doubts among the Western countries and thus prevent these changes.

After stressing that the Federal Government wished "most urgently" for a Summit Conference to be held, Dr. Adenauer pointed out that the Soviet Union—the potential enemy of NATO—was equipped with nuclear weapons and guided missiles. If an important section of NATO did not have equally strong arms, NATO itself would "lose its importance and its purpose." If the Federal Republic were to refuse to participate in these developments in armament techniques, contrary to a request by NATO, the Federal Republic would for all practical purposes have left the North Atlantic Treaty Organization.

A country with the economic potential of Western Germany, and in her geographical position, could not remain in isolation; if a world catastrophe occurred, she would be involved irrespective of whether she was armed or unarmed "In the interests of our self-preservation," he added, "we have the duty to do all we can to prevent any such catastrophe. This we can do only if we remain in NATO and strengthen the Organization—but not if we weaken it by refusing to fulfil obligations arising from our membership."

After referring to Soviet penetration in the Middle East, Dr. Adenauer said that of the three Powers possessing nuclear weapons the Soviet Union was the only one with aggressive tendencies; being a dictatorship, it could start a war of aggression without taking account of any democratic inhibitions. The declaration of the Moscow Congress of Communist parties in November 1957 had expressly stated that the aim of Communism was world domination. The Soviet Union's aggressiveness had been increased by her possession of nuclear weapons, as shown not only by her policy in the Middle East but also by her attitude in the efforts to bring about controlled disarmament. In this connexion the Chancellor referred to the Soviet rejection of all the disarmament proposals made by the Western Powers in the United Nations and its Disarmament Commission. As regards the Soviet claim of having demonstrated her wish for disarmament by reducing her own forces, Dr. Adenauer said that during the past few years the Soviet Union had greatly increased not only her nuclear armaments but also her conventional weapons; the reduction of her forces, therefore, meant no reduction of her fighting power and could not be interpreted as a sign of peaceful intentions.

Dr. Adenauer went on to reject the argument put forward by those who opposed the equipment of the *Bundeswehr* with nuclear weapons—namely, that the only choice was between "atomic death and the renunciation of nuclear weapons." He emphasized that there was a third possibility—the prevention of any atomic war through general controlled disarmament. This was the aim of the Federal Government's policy, and only in this manner could the world be safeguarded against the horror of atomic war.

If NATO disintegrated through the Federal Government's refusal to take part in the reorganization of NATO forces from the point of view of strategy and equipment, the situation would become infinitely more dangerous. It would lead to a situation in which the United States, "perhaps with Britain," would have to face the Soviet Union alone, whilst Germany would lose all political influence and become "an object of the policy of other countries."

NATO, the Chancellor continued, was not only a military defensive alliance but a great political alliance aiming at the economic and cultural co-operation of its members, and pointing the way from a confused international situation to a better future. He stressed that in the London disarmament negotiations all Western proposals had been made with the agreement of all NATO members, and that the replies to the Soviet letters were likewise the result of full consultations within NATO. The final communiqué of the Paris Conference had expressly reaffirmed that all member-countries of NATO demanded German reunification in peace and freedom.

In conclusion, the Chancellor stressed that he was prepared to negotiate with the Soviet Union on German reunification at any time. Much progress could be achieved in relaxing world tensions and improving German-Soviet relations if the Germans living in the Soviet zone were allowed to live in freedom; this was not a question of "excessive nationalism" but one of humanity.

Dr. von Brentano (the Federal Foreign Minister) emphasized that the question of German reunification and the restoration of a democratic order in Germany based on the freely-expressed will of the German people should be discussed at a Summit Conference. The Federal Government would continue to press for the inclusion of this subject on the agenda, although the Soviet Government had so far shown no signs of willingness to negotiate on this question. The Federal Government were convinced that no useful discussion of the question of European security was possible at a Summit Conference so long as the Soviet Union declined to discuss German reunification.

The Government still adhered to its view that the process of reunification must begin with free elections in the whole of Germany, and not with the formation of a provisional all-German Government. This did not imply, however, that in the negotiations with the Soviet Union there was no room for discussion of other questions of international security connected with reunification. The Government had always been fully conscious of the close connexion between these problems, and was ready to integrate itself in a system of European security which would safeguard Germany's security and contain guarantees for the security of the other members.

After reiterating the Federal Government's rejection of the Soviet proposal for a Confederation between the Federal Republic and the German Democratic Republic, Dr. von Brentano deprecated the contradictory attitude of the Soviet Union, which on the one hand declared its willingness to talk about a peace treaty with Germany, but on the other hand demanded that the question of German reunification should not be discussed at a Summit Conference. With regard to the Rapacki Plan, he asked whether those who supported an atom-free zone for the whole of Germany realized that this might imply an American withdrawal from Germany. The choice lay between "total security or total insecurity," and they could only expect other countries to protect Germany's security if Germany in turn was willing politically and morally to contribute to the security of those countries. He appealed to the Opposition to reach some agreement with the Government on these questions.

Dr. Arndt, for the Social Democrats, accused the Government of wishing to create a *fait accompli* before a Summit Conference; this, he asserted, was the "true meaning" of the "almost irrevocable step to equip the *Bundeswehr* with atomic weapons," and the Opposition wanted to expose the "incalculable effects" of such a decision.

Recalling the Social Democratic opposition to Western Germany's adherence to NATO, Dr. Arndt said that there had been no mention of nuclear armaments for the *Bundeswehr* when Germany joined NATO, and before the 1957 elections the Christian Democrats had denied that its equipment with nuclear weapons was contemplated. He asserted that the Government, by making "veiled announcements and ambiguous denials," had followed a policy of "advancing step by step" and "gradually sliding down" until, with the proposed purchase of *Matador* missiles from the United States, it had now "out-manoeuvred" Parliament without revealing the full implications of such a decision.

Dr. Arndt declared: "We cannot make a contribution to the Summit Conference by demonstratively arming the *Bundeswehr* with nuclear weapons. Our appeal to the Powers to stop the atomic armaments race would be politically and morally insincere if in the same breath we advocated atomic weapons for ourselves. Any prospect of braking this race towards universal suicide is dependent upon limiting the number of countries possessing atomic armaments."

Continuing, Dr. Arndt said that while there was general agreement on comprehensive disarmament as the ultimate aim, to demand disarmament as the beginning of a relaxation of tension would only prevent such a relaxation under present conditions. To bring about a relaxation of tension it was necessary to start patiently with regionally restricted measures and limited risks; and this led necessarily to the conclusion that a beginning should be made in Central Europe. To equip Western Germany with atomic weapons would entail the danger of an increased concentration of Soviet atomic weapons in Eastern Europe, and especially in Eastern Germany, and would also result in intensified Soviet pressure on the European peoples and the population of Eastern Germany. German reunification could be achieved only by way of a limitation of armaments, and a decision for equipping the *Bundeswehr* with nuclear weapons would almost certainly be a decision against reunification.

Finally, Dr. Arndt declared that atomic explosives were "not proper arms but means of mass destruction which will only lead to suicide and the extinction of all human life." The Federal Constitution permitted only defensive wars, but no such war could be conducted by using atomic weapons, which were aimed solely at the destruction of all human life in a given area. It was his party's conviction that they could not and should not use such means. Instead, they felt that Western Germany should contribute to the creation of a "zone of relaxation" in Central Europe, thereby helping to facilitate a Summit Conference and to bring about an initial "reduction of horror."

Herr Strauss (the Federal Defence Minister) called on the Opposition to join in the active defence of Germany, and criticized the Opposition's attitude of relying on the Americans for atomic weapons while refusing such weapons to the German forces. The *Bundeswehr* could not be treated in isolation from the Western alliance, and nuclear armaments for the West German forces implied no more or no less than what Germany's allies were doing and what everybody must be prepared to do, however unpopular. German soldiers could not be equipped with weapons a thousand times weaker than those of an aggressor. To refuse the *Bundeswehr* such purely defensive weapons as the *Nike Ajax*, the *Nike Hercules*, and the *Nike Zeus* would deprive Germany of any active protection against air attacks.

Herr Strauss emphasized that the nuclear warheads would remain in American custody and could only be used on the orders of the NATO High Command in the event of aggression. To prevent aggression, it was essential that any aggressor should know that such a decision might be taken—but this presupposed that such weapons were in existence. He added: "We do not wish atomic weapons to be in German hands or dependent on German decisions. We do not wish to have them for the *Bundeswehr* but for the NATO units of all the European allies—a decisive difference." The solidarity of NATO could only be maintained if all member-countries, including Germany, shouldered the burdens arising from that solidarity, even if such action was unpopular.

The Federal Government did not wish to engage in the production of atomic weapons, and favoured the abolition of such weapons under a system of control and of equality of conventional forces. It was not prepared, however, to weaken the defensive potential of the NATO alliance to such an extent that the aggressor might hope one day to conquer Western Europe without the risk of a third World War. Any weakening of the alliance, or its dissolution, would be "a deadly sin against the elementary interests of German policy."

Herr Ernst Lemmer (Federal Minister for All-German Questions) gave a warning that by making a wrong decision now they might destroy the existence of the Federal Republic. For Western Germany to take certain steps in anticipation of hoped-for developments on the Soviet side might only make things more difficult, as they had no certainty that such steps would lead to any change in Soviet policy. As regards the East German regime, Herr Lemmer reiterated that the Federal Government would continue to refuse it recognition and would also refuse any formal contacts with it—which, he felt, was in harmony with the feelings of the East German population. Nevertheless, the Federal Government would not refuse an invitation to an East-West conference for the settlement of the German question on the ground that the East German regime might also send a delegation. What they would refuse, even at such a conference, was a "fusion" with such a delegation into an "all-German team." For the same reason they could not agree to a Confederation with Eastern Germany.

Herr Erler (Social Democrat) said that there should be no rejection of limited and regional disarmament, and that the "all or nothing attitude" must be dropped. Soviet troops must be withdrawn if people were to breathe freely again, but they would never be withdrawn if other foreign troops remained. A suspension of nuclear tests could be a first step towards achieving some measure of disarmament.

Turbulent scenes occurred when **Herr Helmuth Schmidt** (Social Democrat) accused the Government of trying to make the *Bundeswehr* an instrument of power policy; he declared that it would one day be recognized that the decision to arm the two Germanies with nuclear weapons had been as disastrous as the "enabling laws" passed by the *Reichstag* for the Hitler regime. Herr Schmidt asserted that many of the speeches in the debate had been "in the manner of the Kaiser," and alleged that when the Government spoke of nuclear weapons for the *Bundeswehr* they meant "military power."

Professor Carlo Schmid (Social Democrat) deprecated the suggestion that any proposal to negotiate meant submission, or that it was right to be prepared for negotiations only if one was certain of achieving one's aims. In the present situation negotiations were particularly difficult in view of the fact that they had to be held with someone who held "the heart of Germany as a lien." The real problem was not whether the Federal Republic should remain in NATO but whether a reunited Germany should be a member of NATO, and whether the Federal Republic should form part of an atom-free zone comprising Germany, Poland, and Czechoslovakia. He denied that favouring such a plan would affect Germany's membership in NATO; instanced in this connexion the case of Denmark and Norway, which had rejected atomic weapons for themselves without impairment of their NATO membership; and referred to a recent conference of Scandinavian Foreign Ministers which had advocated discussions of regional disarmament in Europe "on the basis of recently announced plans" i.e. the Rapacki plan.

Professor Schmid expressed the opinion that acceptance of such a plan would not necessitate the conclusion of a formal treaty between Western and Eastern Germany, and that it would be sufficient to accept the plan unilaterally. This would involve a risk, but there were no politics without risk.

Negotiations, he declared, were the only way to German unification and European security, with eventual free elections. Nor could they insist on demanding for a unified Germany absolute freedom to decide on the alliances she wished to join, since this would make reunification impossible. The present policy, he feared, would destroy all hopes of a solution, whereas the Rapacki plan was a good basis for starting negotiations. In this connexion Professor Schmid referred to his talks with Polish leaders in Warsaw, and said that it had not been easy for the Poles to defend the plan *vis à-vis* the Soviet leaders. All Poles he had seen, irrespective of their political views, had told him that in the present situation the alliance with the Soviet Union was the only guarantee of Poland's security, although they had emphasized that this alliance would not prevent them from carrying out a Polish policy and pursuing their own objectives. It was therefore important for the Federal Republic to seize the initiative and reassure the Poles with regard to Germany's future, while using "flexible methods" in pursuing their aim of peaceful reunification.

Dr. von Brentano, in reply, agreed that they would have to make concessions in their negotiations with the Soviet Union. He rejected Professor Schmid's proposal for consideration of the Rapacki plan, however, because that plan was "not a good beginning," would "block rather than facilitate" further developments, and would upset the political equilibrium in such a way as to "prevent the next step." The Government could not agree with the Opposition's reasoning that it was right to keep the Americans for Germany's protection but at the same time to "wash their hands of the whole matter" and "remain outside," leaving it to the Americans to "do the unpleasant jobs."

Dr. Gustav Heinemann (Social Democrat), a prominent Evangelical leader and a former Minister of the Interior in Dr. Adenauer's Government, refuted the Chancellor's assertion that the decision facing Parliament was the survival of NATO, since nobody was demanding that Germany should leave NATO. The Government claimed that the Federal Republic's membership of NATO was placed in jeopardy if the *Bundeswehr* was not equipped with atomic weapons. The Opposition replied that the NATO treaty did not demand nuclear armaments, and that the Federal Republic could retain her membership with a conventionally armed *Bundeswehr* in the same way as other countries remained members without possessing atomic weapons.

Dr. Heinemann called upon the House to take a stand against "weapons of mass suicide," for which as Christians they could not take responsibility. There was no Christian justification for these weapons, which were wrong and solved nothing. If the Government said that they only wanted to have these means of mass destruction as a deterrent, and not to engage in an atomic war, this was not

correct because any deterrent could only be effective if one was prepared to make use of it. Dr. Heinemann stressed that he was neither an idealistic pacifist nor an advocate of total disarmament for Western Germany; but he believed in a better form of security than that offered by the Government - namely, security brought about by negotiation.

In conclusion, he gave a warning against letting "blind anti-Communism" gaining sway over them, which once before had "led the German people into disaster and crimes." The long-standing "hereditary" hostility with France had now at last been overcome, but it should not be replaced by a "deadly hostility" against Germany's eastern neighbour.

Dr. Gerstenmaier (Christian Democrat), president of the *Bundestag* and also a prominent Evangelical leader, took a stand diametrically opposed to Dr. Heinemann's. He said that since the war they had tried to renounce "any sort of national power policy," and had also been prepared to renounce any German rearmament on reasonable conditions. They had been forced to adopt rearmament, however, not because they had changed their minds or their principles, but because of the "rough realities" of world history. Faced with this situation, they had had only "the alternative of waiting indifferently for further developments in the conflict between East and West or of taking up a position in conformity with our democratic needs." They had chosen the latter course in 1950, and since then the situation in this respect had not changed.

Continuing, Dr. Gerstenmaier said that Germany remained divided because the Soviet Government did not want reunification; the impression given by the Opposition that Germany could have unity if she wanted it was "entirely wrong." Nevertheless, it was essential to make continuous efforts with a view to removing totalitarian pressure in Eastern Germany —"a question even more important than formal reunification"— and to work actively, through direct contacts between Bonn and Moscow, for a relaxation of tension between East and West.

Dr. Gerstenmaier said they were all agreed that reunification was likely to be the result of a relaxation of tension, and it was therefore important that discussions on reunification should be continued at a Summit Conference. He thought that if there could be an agreement between the U.S.S.R. and the Western Powers on the political and military status of a unified Germany, the negotiations on the terms of reunification would assume a different character and might be brought nearer a successful conclusion.

Summing up the present situation, Dr. Gerstenmaier made the following three points: (1) The Soviet Government prevented any advance in the question of German reunification by demanding an absolute right of veto for the East German regime. (2) Marshal Bulganin's proposal for a peace treaty with Germany was "mutilated" by separating peace treaty negotiations from the question of reunification. (3) Mr. Khrushchev tried to prevent any joint development of the European security and German problems, which were inter-locked, and to retain the *status quo* in Germany by keeping the two questions separate. They in Western Germany could not accept this, nor could they agree that the Federal Republic should be removed from the protective community of the free world without any equivalent security guarantees. They must also insist that any all-German Parliament created by free elections should have a free hand in considering and ratifying a peace treaty.

As long as Germany was divided and there was no European security system or other equivalent, the Federal Republic's membership of NATO was vital not only for Western Germany but for Germany as a whole. One essential point had been overlooked by the Opposition namely, that the equipment of the *Bundeswehr* with atomic weapons would be completed at the earliest in the autumn of 1959, that is in 1½ to 2 years. This, however, would only be the case if no disarmament agreement was forthcoming; there would be no atomic weapons for the German forces if a Summit Conference were to reach "satisfactory, practical, and controllable disarmament arrangements during the next 12 or 18 months."

In conclusion, Dr. Gerstenmaier declared that what was involved was not a question of Christian principles but of the efforts they regarded as commensurate with the preservation of the fundamental rights enshrined in the Federal Republic's Basic Law.

Dr. Mende said that the Opposition agreed with the Government that there was a Soviet danger. In the view of the Free Democrats, that danger was a spiritual as well as an economic, social and military one. The Free Democrats were willing to defend freedom by all means, but held that the equipment of the *Bundeswehr* with atomic weapons was not necessary because the atomic balance of the great Powers constituted a safe guarantee that neither of the two leading Powers would incur the risk of atomic war. The Free Democrats' opposition to atomic weapons for the *Bundeswehr* was also based on the fact that there had been offers from the other side to renounce atomic weapons on their part. Finally, they felt that freedom had lost its meaning where life was extinct, and that there was no sense in defending values if that defence resulted in the destruction of the values to be defended. For years they had lived in the period of the "atomic deterrent," and the value of that deterrent would not be increased if a "small German atomic potential" were added to those of the "two giants." On the other hand, any actual use of atomic weapons was an entirely different matter and was bound to end in the destruction of the German people.

In conclusion, Dr. Mende said that Western Germany would not be making any unilateral sacrifices by accepting the Rapacki plan, since the creation of a 250-mile-wide atom-free zone in Western Germany would be paralleled by an atom-free zone in Eastern Europe of double that width. The Federal Republic should "take the Soviet Union at its word" and not reject the Bulganin offer of 1957 expressing willingness for the withdrawal of Soviet forces from Central and Eastern Europe on condition that Allied forces were simultaneously withdrawn from Western Germany.

Herr Erich Ollenhauer, leader of the Social Democratic parliamentary group, announced in the closing stages of the debate (March 25) that his party had decided to submit a Bill for a referendum on the question of whether the *Bundeswehr* should be equipped with atomic weapons, and whether there should be launching sites for atomic weapons on German territory. He also announced that his party reserved the right "to take further measures" since the Federal Government's decision to arm the *Bundeswehr* with nuclear weapons, in conjunction with the continued division of Germany and the absence of a peace treaty with a unified German State, threatened to lead to "a national emergency."

Dr. Mende, on behalf of the Free Democrats, demanded that all parties should co-operate in view of the "deadly danger" and that an all-party "Government of national emergency" should be formed under a Chancellor who "possesses the will and the capability to conduct a generally acceptable German policy." Such a Government should approach the four Powers with the aim of (1) ensuring that the question of a treaty with a unified Germany was included on the agenda of a Summit Conference, (2) securing the participation of German representatives in an advisory capacity at such a conference; (3) accepting, in agreement with the Federal Republic's allies, the Polish offer of an atom-free zone in Central Europe, (4) safeguarding the Federal Republic's contractual obligations and reaching agreement with the Allies so that the special position of a divided Germany was duly taken into account within the alliance; and (5) maintaining the broadest possible basis of confidence for the Government's measures by close co-operation with Parliament.

The Bundestag Resolution.

At the conclusion of the debate on March 25 the *Bundestag* adopted a five-point resolution, as follows:

(1) Requesting the Federal Government, in any international negotiations in which it was participating, or on which it could exert some influence, to advocate general controlled disarmament both in respect of nuclear and conventional weapons; and to reaffirm the Federal Republic's willingness to accept such a disarmament agreement, with a view to contributing to a relaxation of tension and the solution of international questions, including the German question.

(2) Expressing the view that as long as Communism pursued its world revolutionary aims, peace and liberty could be safeguarded only by the joint defence effort of the free world; reaffirming that the tasks of the *Bundeswehr* were confined to the maintenance of peace and to defence; and requesting the Federal Government "to continue the building-up of Germany's defence within the North Atlantic Defence Community until a general disarmament agreement has been reached." The resolution added: "In conformity with the requirements of this defence system, and having regard to the armament of the possible enemy, the armed forces of the Federal Republic must be equipped with the most modern weapons so that they may be able to carry out the obligations assumed by the Federal Republic within NATO, and to make an effective contribution to the safeguarding of peace."

(3) Requesting the Federal Government to do all in its power to bring about a fruitful discussion of the German question at the forthcoming Summit Conference.

(4) Reiterating that free elections must form the basis of German reunification; and rejecting the proposals for the conclusion of separate peace treaties with Eastern and Western Germany, as well as negotiations with the present regime in the Soviet Zone or a Confederation with that regime.

(5) Reaffirming that German reunification in conjunction with a security system was the most urgent task of German policy.

The resolution was moved by the Government coalition parties (the Christian Democratic Union, the Christian Social Union, and the German Party) and adopted by 270 votes to 165, with 26 abstentions. One Free Democrat voted with the Government parties and one with the Social Democratic opposition, the other Free Democrats abstaining.

A number of motions by the Social Democrats and the Free Democrats were rejected, whilst others were sent to the Foreign Affairs Commission of the *Bundestag* for further consideration.

Those rejected included motions opposing the equipment of the *Bundeswehr* with atomic weapons and, alternatively, demanding that a decision on this question be deferred until after a Summit Conference. The motions referred to the Foreign Affairs Commission included a motion to enter into negotiations with Poland and the other countries concerned for the realization of the plan for an atom-free zone in Europe; another requesting the Federal Government to report by May 31 on "positive steps" it intended to propose to the U.S., British, French, and Soviet Governments with a view to bringing about controlled disarmament, closer relations with the East German people, and German reunification;

and a third requesting the Federal Government to take suitable measures to protect the population against atomic attack, and to ensure that atomic energy was used only for peaceful purposes.

Following the *Bundestag's* vote the Defence Committee approved the purchase of 24 *Matador* missiles and six mobile launching ramps from the U.S.A. on March 27, thereby authorizing the Defence Ministry to conclude the formal contract and arrange for the training of crews. It was announced on the same date that a number of German personnel were already in the U.S.A. for training; that the first anti-aircraft rocket units equipped with *Nike* missiles would be ready early in 1959; and that units armed with *Corporal* missiles were expected to be ready by the end of that year. Other missiles to be ordered from the U.S.A. would include the *Honest John* and *Redstone* rockets.

Anti-Nuclear Campaign by Opposition Parties and Trade Unions.

The Social Democratic Party issued a resolution on March 27 calling on the German people to demand that the Federal Government should reverse its decision to arm the *Bundeswehr* with nuclear weapons and devote all its efforts to peace negotiations and a relaxation of tension.

The resolution claimed that the Federal Government had no mandate for the introduction of nuclear weapons; said that the vital interests of the people demanded that the Government be replaced; and stated that the Social Democrats would support a new Government which abandoned nuclear armaments and concentrated seriously on peace negotiations for all Germany. After declaring that there was no longer any justification for Dr. Adenauer remaining in office, Herr Ollenhauer said that the *Bundestag* debate had been "a beginning and not an end," and that the struggle against nuclear armaments would be continued. Herr Ollenhauer claimed that both a referendum and political protest strikes were constitutional methods of achieving these aims.

The executive of the German Trade Union Federation decided on March 28, after an emergency meeting in Hamburg, to organize demonstrations against the Government's decision throughout the country. It expressed its support for the "struggle against atomic death" movement; called on the Government to hold a national referendum; and said that it would support those workers who refused, for reasons of conscience, to build missile sites.

Large protest demonstrations took place on March 29-30 in a number of big cities, including Hamburg, Bremen, and Frankfurt (all Social Democratic strongholds); there were also brief protest strikes by dockers in Hamburg on March 28 and by employees of the Volkswagen works at Brunswick and Wolfsburg on March 27-28. Protest demonstrations also took place at many universities, the students of the Hamburg engineering college marching in silent procession through the city carrying placards with slogans such as "Remember Hiroshima" and "Beware, Atomic Death Threatens!" Nearly 70 university professors, including Professor Max Born, the physicist and Nobel prizewinner, signed an appeal calling for widespread demonstrations against nuclear weapons.

The Free Democratic Parliamentary Group issued a joint statement with the Federation of Trade Unions on April 2 claiming that the majority of the people were opposed to the arming of the *Bundeswehr* with atomic weapons, and calling for a referendum to demonstrate the people's feelings.

The Federal Ministries of Justice and the Interior reported to the Cabinet, however, that such a referendum would be incompatible with the Constitution, which made no provision for a referendum except in the case of territorial adjustments between the *Länder*. The Social Democrats accordingly announced that, in the event of any constitutional difficulties in connexion with a Federal referendum, they intended to introduce proposals for State referenda in all the 11 *Länder* of the Federal Republic. A Bill providing for a national plebiscite on atomic weapons for the West German forces was introduced by the Social Democrats in the *Bundestag* on April 18, but on April 24 it was referred to the Legal Commission of the *Bundestag*—which, in practice, meant that it had no chance of being adopted.

East European Protests at Atomic Weapons for West German Forces.

A communiqué denouncing the arming of the West German forces with nuclear weapons was issued by the Foreign Ministers of Poland, Czechoslovakia and Eastern Germany after a meeting in Prague on April 10-12.

The communiqué said that the *Bundestag* resolution had "aggravated the tension in Europe" and caused "justified concern and indignation" at a time when the nations were making "efforts to lessen international tension and demanding a check to the atomic armaments race." It added that the "revival of German imperialism and militarism constitutes the main danger to European peace," and described the German Federal Republic as "the only European country where a policy of revenge is being deliberately supported and where territorial claims are openly put forward."

After reaffirming their countries' support for the "Rapacki plan," the three Foreign Ministers welcomed "the momentous decision of the Supreme Soviet concerning the immediate suspension of nuclear weapon tests." They expressed the hope that the United States and Great Britain would take similar action "despite their present negative attitude."

It was subsequently announced in Warsaw that the Polish diplomatic representatives in the NATO countries had made *démarches* to the Governments concerned on the subject of arming the *Bundeswehr* with atomic weapons.

In Belgrade, a spokesman of the Yugoslav Foreign Ministry stated on March 28 that the *Bundestag* decision had "aroused justified concern in Yugoslavia, which twice in the recent past has been the victim of German aggression." The West German decision "sharpens and aggravates the international situation and seriously threatens the prospect of a further relaxation of international tension precisely at the moment when concrete efforts are being made to reach agreement among nations." The spokesman added that the Yugoslav Government was "considering the possibility of bringing this question before the United Nations."—(Frankfurter Allgemeine Zeitung - Die Welt, Hamburg - Welt der Arbeit, Cologne - Polish Embassy Press Office, London - Tanjug Agency, Belgrade)

A. MAURITIUS. — Constitutional Reforms. - Report of Electoral Boundary Commission.

The Mauritius electoral boundary commission under the chairmanship of Sir Malcolm Trustram Eve, Q.C., issued its report on Feb. 25. It recommended (1) that the Colony should be divided into 40 single-member constituencies; (2) that the Governor should appoint up to 12 members of the Legislative Council to ensure that its representation was broadly proportionate to the communities in the electorate; and (3) that he should be free to select these members from candidates who were unsuccessful in the elections, if they had received reasonable support, as well as from non-candidates, so long as the result of an election was not frustrated.

Reporting on its consultations in Mauritius, the commission stated that all important sections of opinion in the island, including the Labour Party, the *Parti Mauricien*, and groups representing the Moslem community, had accepted the three principles agreed at the London Conference of March 1957, viz.:

(1) That the electoral system should be on the basis of universal suffrage.

(2) That any system of voting should provide an adequate opportunity for all the main sections of opinion in Mauritius to elect their representatives to the Legislative Council in numbers broadly corresponding to their own weight in the community.

(3) That the electoral system should facilitate the development of voting on grounds of political principle and party rather than on race or religion.

In the commission's view, it was necessary to constitutional development that for, say, the next three elections "there should be a certainty that the proper proportions are obtained in the Legislative Council by election, or, failing that, by election plus Governor's appointments."

In accordance with its terms of reference, the commission proposed geographical boundaries for 40 constituencies of approximately equal voting strength, and in none of which the electorate would be below 5,000. The average constituency would have about 7,000 electors. The proportions of the electorate, broadly corresponding to the three main sections of the population, would be: Indo-Mauritian Hindus, just under half; general population, just under one-third; Indo-Mauritian Moslems, just over one-seventh. The commission was satisfied that its recommendations would secure adequate representation to the Indo-Mauritian Hindus and the general population, though certain doubts were expressed about the Moslems.

The commission agreed that a system of three-member constituencies would give a worse opportunity to the Moslems than that proposed; it also held that merely communal voting would be contrary to the third principle of the London agreement. The Commission therefore recommended single-member constituencies, subject to the guarantees asked for in the use of the Governor's power of appointment.

The British Colonial Secretary (Mr. Lennox-Boyd) announced on the same day that he had accepted the commission's report and had given an assurance that the Governor's appointments would be made in accordance with the principles sought. Mr. Lennox-Boyd expressed satisfaction that a solution had been found which was in entire accord with the three main principles set out in the London agreement.—(Times)

A. UNITED KINGDOM. — Wolfenden Committee Report on Homosexual Offences and Prostitution. - House of Lords Debate.

The report of the Departmental Committee on Homosexual Offences and Prostitution (known as the Wolfenden Committee after its chairman, Sir John Wolfenden) was published on Sept. 4, 1957, Cmd. 247). The committee, whose members included two High Court judges, two M.P.s, doctors, lawyers, ministers of religion, and three women, had been appointed on Aug. 24, 1954, with the following terms of reference: "To consider the law and practice relating to homosexual offences and the treatment of persons convicted of such offences by the courts, and the law and practice relating to offences against the criminal law in connexion with prostitution and solicitation for immoral purposes; and to report what changes, if any, are in their opinion desirable."

The Wolfenden Committee recommended *inter alia* that homosexual behaviour between consenting adults in private should no longer be a criminal offence; that maximum penalties for homosexual offences against young persons, however, should be increased; that maximum penalties for soliciting in the streets by prostitutes should also be increased; and that the requirement that annoyance to other persons must be established before a prostitute could be convicted should be eliminated.

The report was signed by Sir John Wolfenden (Vice-Chancellor of Reading University), Mrs. Mary Cohen, Mrs. Kathleen Lovibond, Lady Stopford, Sir Hugh Linstead, M.P. (Conservative, Putney), Mr. W. T. Wells, Q.C., M.P. (Labour, North Walsall), Mr. James Adair (formerly Procurator-General at Glasgow), Dr. Desmond Curran, Canon V. A. Demant, Mr. Justice Diplock, Lord Lothian, Mr. Victor Mishcon, and Dr. Joseph Whitby. Two of the original members of the committee, Mr. Goronwy Rees and the Very Rev. R. F. V. Scott, had resigned in 1956 and did not sign the report.

The committee's findings and recommendations are summarized below under cross-headings.

The Problem of Homosexual Offences.

Introduction. The function of the law in matters of moral conduct, the report suggested, was "to preserve public order and decency, to protect the citizen from what is offensive or injurious, and to provide sufficient safeguards against exploitation and corruption of others, particularly those who are specially vulnerable because they are young, weak in body or mind, inexperienced, or in a state of special physical, official, or economic dependence." The report continued: "It is not, in our view, the function of the law to intervene in the private lives of citizens, or to seek to impose any particular pattern of behaviour further than is necessary to carry out the purposes we have outlined. It follows that we do not believe it to be a function of the law to attempt to cover all the fields of sexual behaviour. Certain forms of sexual behaviour are regarded by many as sinful, morally wrong, or objectionable for reasons of conscience, or of religious or cultural tradition; and such actions may be reprobated on these grounds. But the criminal law does not cover all such actions at the present time; for instance, adultery and fornication are not offences for which a person can be punished by the criminal law. Nor, indeed, is prostitution as such . . ."

Problems of Homosexuality. The Committee found evidence for the view that there were varying degrees of homosexual propensity. This indicated, in their opinion, that homosexuals could not be regarded as quite separate from the rest of mankind; it also had implications for possible treatment. Distinguishing between active and latent homosexuality, the report observed that "among those who work with notable success in occupations which call for service to others, there are some in whom a latent homosexuality provides the motivation for activities of the greatest value to society."

The Committee dismissed the concept of homosexuality as a disease, with the implication that the sufferer could not help it and therefore carried a diminished responsibility for his actions. It was often the only symptom, being associated with full mental health in other respects, while alleged psychopathological causes had been found to occur in others besides the homosexual. It had been suggested to the Committee that associated psychiatric abnormalities were less prominent, or even absent, in countries where the homosexual was regarded with more tolerance. Discounting the widely-held belief that homosexuality was peculiar to particular professions or classes or to the "intelligentsia," the report pointed out that the evidence showed that it existed among all callings and classes and among persons of all levels of intelligence.

It was difficult to assess the extent of the problem, as any figures of offences known to the police were bound to reflect police efficiency. Many of the Committee thought it unlikely that there had been an increase in homosexual behaviour proportionate to the "dramatic rise" in the number of offences known to the police. Its incidence among a population of more than 18,000,000 adult males, however, must be large enough to constitute a serious problem.

Offences among Consenting Adults. The report examined and dismissed a number of arguments against legalizing adult acts in private, its conclusions being as follows: (1) There was no evidence for the view that such conduct was the cause of the "demoralization and decay of civilizations," although like other forms of debauch it might unfit men for certain forms of employment. (2) There was no reason to believe that such behaviour inflicted any greater damage on family life than adultery, fornication, or lesbianism. (3) The evidence indicated that the fear that legalization of homosexual acts between adults would lead to similar acts with boys had not sufficient substance to justify the treatment of adult homosexual behaviour in private as a criminal offence; on the contrary, the evidence suggested that such a change in the law would be more likely to protect boys than to endanger them. The Committee accepted the evidence of expert witnesses that there were two recognizably different categories among adult male homosexuals—those who sought adult partners, and paedophiliacs, who sought as partners boys who had not reached puberty. The latter category would continue to be liable to the sanction of the criminal law. (4) The Committee did not share the fear that such a change in the law would lead to "unbridled licence," as the law seemed to make little difference to the amount of homosexual behaviour which actually occurred.

The report continued: "Unless a deliberate attempt is made by society, acting through the agency of the law, to equate the sphere of crime with that of sin, there must remain a realm of private morality and immorality which is, in brief and crude terms, not the law's business. To say this is not to condone or encourage private immorality. On the contrary, to emphasize the personal and private nature of moral or immoral conduct is to emphasize the personal and private responsibility of the individual for his own actions, and that is a responsibility which a mature agent can properly be expected to carry for himself without the threat of punishment from the law. We accordingly recommend that homosexual behaviour between consenting adults in private should no longer be a criminal offence."

Offences by Males under 21. The majority of the Committee agreed that an adult for the purposes of their recommendation should be a person of 21, although a minority considered that the age should be fixed at 18. Medical witnesses had held that the sexual pattern was normally fixed by the age of 16; the Committee considered, however, that a boy of 16 was incapable of forming mature judgments about actions which might set him apart from the rest of society, whilst to set the age at 18 would lay youths between 18 and 21 open to undesirable attentions and pressures.

Any indecent homosexual act by a male under 21 would continue to be an offence. The Committee recommended, however, that, apart from cases of indecent assault or violation of public decency, proceedings should be taken only if the behaviour had been accompanied by conduct of a patently criminal or vicious nature (e.g. bullying at a school or institution, the abuse of his position by a superior in one of the Services, or an element of prostitution or blackmail), or if it appeared that the offender would benefit from being placed on probation with a view either to treatment or general supervision. Proceedings in such cases should be instituted only by the Director of Public Prosecutions or with the consent of the Attorney-General.

Revision of Penalties. The Committee recommended the following maximum penalties: (*a*) sodomy with a boy under 16 - life imprisonment, as at present; (*b*) indecent assault (i.e. acts of gross indecency committed against the will of the partner, or with a boy under 16)—10 years' imprisonment, as at present in England and Wales; (*c*) gross indecency committed by a man over 21 with a youth between 16 and 21—five years' imprisonment; (*d*) gross indecency committed in any other circumstances—two years' imprisonment. These proposals had the effect of increasing the maximum penalty that could be awarded for homosexual behaviour with a person under 21, and the Committee felt that this might serve in some measure to protect the young.

The Committee considered that the amount of blackmail which took place as a result of homosexual acts had been considerably exaggerated. They recommended that, except for grave reasons, there should be no prosecutions for offences revealed by investigating blackmail, and that the law relating to blackmail should be strengthened. The report also recommended that the law relating to living on the earnings of prostitution should be made to apply to the earnings of male prostitution; that procuring or attempting to procure for such purposes should continue to be an offence; and that if possible the law should be amended to apply the term "brothel" to premises used for homosexual as well as heterosexual acts.

Police Practice. The Committee had found that police practice varied in different parts of the country; in some the police appeared to exercise "discretion," whilst in others a firm attempt was made to apply the full vigour of the law. "What we have found," the report stated, "is that there may from time to time arise particular local campaigns against this kind of offence, either as a result of a deliberate drive by the police or by reason of local public indignation. We would not wish to imply that it would never be proper for police officers to follow up offences on mere suspicion. But where no clear public interest is involved, we would deprecate any out-of-the-way prying which could soon give rise to suspicions of 'witch-hunting' and so bring, if not the law, at least the police, into disrepute."

In some cases, it was pointed out, the police had investigated offences several years old. The Committee considered that no public interest was served by pursuing such stale offences, and recommended that, except for cases of indecent assault, prosecution for any homosexual offence more than 12 months after it was committed should be barred by statute.

Proceedings. The Committee expressed concern at the wide disparities between the sentences imposed by different courts for homosexual offences, but could suggest no remedy. The report recommended that charges of gross indecency between males should be summarily triable with the consent of the accused, as the sentence usually imposed was one that would be within the competence of a magistrate's court. This would also avoid a tendency to plead guilty to a charge of importuning, to enable the magistrate's court to dispose of the case when the facts seemed to sustain a charge of gross indecency. Men charged with importuning, on the other hand, should be entitled to claim trial by jury, since a conviction might have serious consequences, and behaviour establishing a *prima facie* case of importuning might be attributable to innocent causes.

The Committee recognized that in the Services and other establishments subject to discipline it might be necessary to regard homosexual behaviour, even by consenting adults in private, as an offence. They also recommended that heads of approved schools in England and Wales (who at present are required to report to the police and the Home Office all cases of certain offences) should enjoy the same discretion in such cases as those responsible for any other educational establishment.

Medical Treatment. The Committee saw no reason why the courts should be required to obtain medical reports on all persons convicted of homosexual offences. They recommended, however, that the courts should be required to obtain such reports on offenders under 21, or if the circumstances were such as to suggest the existence of some mental abnormality. They deprecated the fact that the courts sometimes suggested that an offender was being sent to prison for medical treatment, since to hold out hopes of treatment which did not materialize created a sense of grievance and made the offender less responsive. If the primary consideration in the mind of the court was successful treatment, offenders could be required to undergo this without being sent to prison; if, on the other hand, the seriousness of the offence made a prison sentence necessary, this should be awarded on its own merits.

The prison medical service was found by the Committee to be understaffed and incompletely integrated with the National Health Service. If the most effective use was to be made of the limited number of qualified psychiatrists, it was essential that there should be a two-way flow between the two services.

Whilst expressing the view that a special institution for homosexual offenders would be undesirable, the Committee gave consideration to the possible use of oestrogens (which affects the strength, though not the direction, of physical desire) in the treatment of convicted homosexual offenders. Their use, the report pointed out, was prohibited in prisons in England and Wales, even when the prisoner himself wished for treatment, but not in Scotland. The Committee considered that oestrogen treatment should be permitted where the prisoner expressed a wish for it and the prison medical officer believed it would be beneficial. For many reasons, the Committee did not believe that the practice of castration, which was followed in some countries with the offender's consent, would "commend itself in this country."

Research and Education. The Committee recommended research into the aetiology of homosexuality and the effects of various forms of treatment. Such research, however, would necessarily take a long time; preventive measures which might be taken in the meantime included better education of medical students, clergy, and probation officers on the subject, and more care in the selection of teachers, youth leaders, and others in similar positions.

The report suggested that the Press might do much towards the education of public opinion by ensuring that reports of court cases concerning homosexual offences were treated as matrimonial cases had been treated for some years past. There was little doubt that the influence of detailed reports of such cases was almost wholly bad; the Committee had encountered several cases in which men had got into touch with homosexual offenders whose convictions had been reported in the Press, with the result that further offences had been committed.

The Problem of Prostitution.

Penalties for Street Offences. Turning to the question of prostitution, the Committee again emphasized that they were concerned only with the law and not with morals. Although prostitution was an evil of which any society claiming to be civilized should seek to rid itself, the law by itself could not effect this until education and the moral sense of the community had brought about a change of attitude. The aspect of prostitution which caused the greatest public concern was the visible and obvious presence of prostitutes in considerable numbers in the streets of some parts of London and of a few provincial towns. "It has indeed been suggested to us," the report stated, "that in this respect some of the streets of London are without parallel in the capital cities of the world."

The law as it stood made liable to a fine of 40s. every common prostitute "loitering or being in any thoroughfare or public place for the purpose of prostitution or solicitation to the annoyance of the inhabitants or passengers," with an alternative punishment of up to 14 days' imprisonment in certain urban areas of England and Wales. In Scotland, annoyance need not be proved. The Committee had found a wide measure of agreement that the present law was defective, and that "the present system whereby a prostitute is repeatedly brought before the courts and automatically disposed of on pleading guilty and paying a fine of 40s., which she regards as an indirect and not very onerous form of taxation or licence, is making a farce of the law."

Discussing the question whether "annoyance" should be established as a necessary part of the nuisance caused by soliciting, the report stated: "In our view, both loitering and importuning for the purpose of prostitution are so self-evidently public nuisances that the law ought to deal with them, as it deals with other self-evident public nuisances, without calling on individual citizens to establish the fact that they were annoyed. We accordingly recommend that the law be reformulated so as to eliminate the requirement to establish annoyance." Although the present laws applied only to urban areas, there was evidence that public nuisance was caused by women who loitered at certain places outside urban areas, notably where there were Service camps. The laws relating to these offences should therefore be made of general application.

After stressing that the present maximum fine of 40s. was quite inadequate, and that repeated fines of the same amount were futile as a deterrent, the Committee expressed its belief that a system of progressively higher penalties must be introduced if the problem was to be effectively dealt with. They accordingly recommended that the maximum penalty for a first offence should be a fine of £10, for a second offence £25, and for a third and subsequent offences three months' imprisonment.

"Our decision to make this recommendation has not been lightly reached," the report continued. "We are well aware that in the majority of cases the prostitute must pay the fines from the proceeds of her prostitution, and that if the fines are increased she will attempt to recoup herself either by passing on the cost to her clients or by seeking more customers. If the prostitute resorted to the first of these alternatives, then increased fines would tend to curb demand as well as supply. But the second possibility cannot be overlooked, and that would cause the prostitute to be more active on the streets, with the result that increasing the fine would defeat its own object. For this reason, therefore, the sanction of imprisonment must be available."

In recommending imprisonment the Committee had in mind not only straightforward deterrence, but the possibility that individual women faced with the threat of ultimate imprisonment might be more willing to accept, and the courts more anxious to try, probation in suitable cases. At present, probation could be imposed on an offender over 14 only if she were willing; as the alternative to probation was a fine of 40s., the prostitute frequently declined even to see the probation officer. This was regrettable, for many women might be led to renounce a life of prostitution by the help the probation service could give them. The Committee attached special importance to the use of probation in the case of the young prostitute, but since the co-operation of the probationer was essential to success they did not recommend compulsory probation. They recommended, however, that the courts should be empowered to remand for not more than three weeks, in custody if need be, any prostitute convicted for a first or second street offence, so as to enable a full social or medical report to be furnished.

Possible Consequences of Amending the Law. "It will be apparent," the report stated, "that we are not attempting to abolish prostitution or to make prostitution in itself illegal. We do not think that the law ought to try to do so, nor do we think that if it tried to do so it could by itself succeed. What the law can and should do is to ensure that the streets of London and our big provincial cities should be freed from what is offensive or injurious, and made tolerable for the ordinary citizen who lives in them or passes through them.

"It must be accepted that so long as prostitution exists, the prostitute will seek customers and the potential customer will seek prostitutes. If the prostitute is not allowed to find her customers in the streets, then presumably she and her customers will find other means of meeting each other. It has been suggested to us that to drive prostitutes from the streets is to encourage the closer organization of the trade, with greater opportunities for exploiting prostitutes and greater dangers that new classes of 'middlemen' (e.g. taxi-drivers and hotel porters) will arise. We think it possible, indeed probable, that there will be an extension of the 'call-girl' system, houses or flats to which men go and to which prostitutes are summoned by telephone message or some other arrangement, and perhaps a growth in the activities of touts. These are dangers; but where they involve exploitation of the prostitute we should expect the laws which already cover this kind of exploitation to be rigorously enforced and even extended in their range. Another possible consequence is an increase in small advertisements in shops or local newspapers offering the services of 'masseuses,' 'models,' or 'companions'; but we think that this would be less injurious than the presence of prostitutes in the streets . . ."

The report continued: "There must be set against these disadvantages the clear advantage that the ordinary citizen would be able to go about his business without the constant affront to his sense of decency which the presence of these women affords. So even if this can be achieved only by risking the dangers we have outlined, we still feel the time has come to rid the streets of this nuisance, and that the risk must therefore be taken. Moreover, we think the measures we have proposed, even if they can be made effective only at the risk of other evils, might serve, perhaps to a large extent, to discourage newcomers to the ranks of the prostitute. We attach great importance to this. Not only does the present law fail to discourage; its inadequacies afford an encouragement, in that the very presence of the prostitutes in the streets provides an example which some young women, to whom a life of prostitution had not yet become a fully formed intention, might be tempted to follow. Again, while it is fully recognized that the prostitute could

not exist in the absence of a demand for her services, demand and supply are not entirely unrelated, and the mere presence of the prostitutes in the streets stimulates a demand for their services. Many men, especially younger men, who now avail themselves of the services of prostitutes would be less inclined to do so if those services were less readily and obviously available. In short, therefore, we feel that the possible consequences of clearing the streets are less harmful than the constant public parading of the prostitute's wares."

Organized Vice. Some witnesses had suggested that the most satisfactory way of clearing the streets was to institute licensed brothels. The Committee considered that this would be a retrograde step, and would make nonsense of their view that prostitution could be eradicated only through measures directed to a better understanding of the nature and obligations of sex relationships and to a raising of the social and moral outlook of society as a whole.

The number of males found guilty in England and Wales of living on the earnings of prostitution, the report stated, had been 125 in 1954 and 127 in 1955. The number of women convicted of exercising control, direction, or influence over a prostitute's movements was negligible, and had not exceeded five in any recent year. In its simplest and most usual form, "living on the earnings of prostitution" consisted of an arrangement by which a man lived with a prostitute and was wholly or mainly kept by her. Evidence suggested that such an arrangement was usually brought about at the instance of the woman, and seemed to stem from a need on the part of the prostitute for some element of stability in the background of her life.

The Committee had no doubt that behind the trade of prostitution there lay a variety of commercial interests, but the evidence had disclosed nothing in the nature of "organized vice" in which the prostitute was an unwilling victim. The popular impression of vast organizations in which women were practically enslaved, the report suggested, might be due to "the indiscriminate use of words which suggest an entirely passive role for the woman concerned." This did not mean that there was not organization in the sense of encouragement to willing girls and women to enter or continue upon a life of prostitution. The Committee had learned of an arrangement between several prostitutes and a car-hire firm, which made large sums of money out of the use of its cars by the prostitutes, and of another group of prostitutes who lived in rooms at various addresses of which one particular man was landlord. In both cases, however, the association between the prostitute and the "exploiter" was entirely voluntary and operated to mutual advantage.

Penalties for Living on Earnings of Prostitution. Although it had been suggested that the present penalties for living on the earnings of prostitution should be increased, the majority of the Committee felt that the maximum of two years' imprisonment was adequate. They had been informed of "flat-farmers" who made big profits from letting flats to prostitutes, sometimes charging £200 as key-money and rents of £20 to £25 a week. The Committee recommended that a landlord who could be shown to be letting premises at exorbitant rents or demanding exorbitant key-money in the knowledge that they were to be used for the purposes of prostitution should be deemed to be "living on the earnings of prostitution," and that the same should apply to any agent knowingly taking part in the transaction.

Use of Premises for Immoral Purposes. The Committee did not recommend the adoption of the Scottish system whereby conviction of a tenant for permitting premises to be used as a brothel automatically terminated the tenancy. In England, the report pointed out, leases providing for payment of a substantial premium and thereafter of a nominal rent were much more common, so that automatic termination of a lease might result in a disproportionate penalty.

It would be going too far, the Committee considered, to apply in its entirety the law relating to brothels to premises used habitually for prostitution. "As long as society tolerates the prostitute, it must permit her to carry on her business somewhere," the report commented. "That she ought not to be allowed to carry it on in public will be apparent from what we have said, and the law rightly frowns on the brothel. The only remaining possibility is individual premises. We have therefore reached the conclusion that it would not be right to amend the law in such a way as to make guilty of a criminal offence a person who lets premises to a prostitute who uses them, even with his knowledge, for the purposes of habitual prostitution." On the other hand, the Committee was very conscious of the difficulties experienced by reputable landlords who were anxious to eradicate prostitution from their properties. They therefore recommended that the magistrates' courts, on convicting a tenant of knowingly permitting premises to be used for the purposes of habitual prostitution, should be empowered to make an order either terminating the tenancy or requiring the tenant to assign the lease to some person approved by the landlord.

The Committee considered that too rigorous an enforcement of the law relating to the congregation of prostitutes in public houses might aggravate the situation on the streets. It suggested that action should be confined to cases where prostitutes gave offence to other customers or to residents in the neighbourhood.

"Marriages of Convenience." After investigating allegations that foreign prostitutes contracted marriages of convenience abroad so as to be able to operate in Britain without having to register as aliens or being liable to deportation, the Committee found that, while there had been such cases, the problem had been much exaggerated. Of 372 prostitutes arrested for the first time in the West End of London in 1953 and 1954, only 17 had been of foreign birth, and only five had contracted what seemed to be marriages of convenience.

Reservations. A number of reservations were entered by members of the Committee. (1) Mr. Adair dissociated himself from the recommendation to legalize homosexual acts committed in private by consenting males, on the ground that such conduct was contrary to the best interests of the community and could have serious effects on the whole moral fabric of social life. He also proposed that further steps should be taken to prevent annoyance by prostitutes' small advertisements, and against "middlemen" and landlords not covered by the Committee's recommendations.

(2) Mrs. Cohen, Dr. Curran, Lady Stopford, and Dr. Whitby opposed the retention of sodomy as a special offence, on the ground that this would prevent the growth of a more rational public opinion.

(3) Dr. Curran stated that he could see no logical ground why male importuning should be treated differently from female solicitation.

(4) The three women members of the Committee—Mrs. Cohen, Mrs. Lovibond, and Lady Stopford—recommended that the maximum penalty for living on the earnings of prostitution should be increased to five years' imprisonment, as the proposed increase in penalties for street offences might encourage the closer organization of the trade and result in new classes of "middlemen."

House of Lords Debate on Wolfenden Report.

Speaking in a debate on the Wolfenden Report, held on Dec. 4, 1957, in the House of Lords, the Lord Chancellor (Viscount Kilmuir) stated that there could be no prospect of early legislation on the Committee's proposal to legalize homosexual behaviour in private between consenting adults. He considered that the substance of the Committee's recommendations on prostitution commended themselves to public opinion, although there were reservations on certain points.

Lord Pakenham (a Roman Catholic Labour peer), who opened the debate, said that by and large they could accept the Committee's view that the law should not intervene to stop a man doing wrong unless he was harming someone else. He did not say that it was always wrong for the law to protect people from themselves or their associates, but experience had shown that this could not be done without interfering with private life so drastically as to undermine social responsibility. If he thought that a repeal of the existing law would appreciably expand homosexual conduct, that, in his opinion, would be a decisive argument against change; but having studied the causes of crime for some years, he confessed complete uncertainty as to whether there would be any effect in that direction.

If the general proposition was accepted that the State should not interfere except where third parties were directly damaged, could they say that this particular sin was so heinous as to require treatment almost unparalleled? Some passed a life of agony trying to resist sinful impulses, or at least to canalize them where they could do least harm to others. Some were denied by nature the normal fulfilment of marriage. Some at least might be prepared to seek medical and spiritual assistance if the criminal taint were withdrawn, whereas they felt unable at present to lay bare their secret. The general conceptions of the law raised a powerful presumption in favour of the Committee's recommendations.

Lord Moynihan, who welcomed the report as a serious attempt to better present conditions, said that in practice changes in the law relating to prostitution would be far more difficult than any change allowing consenting adults to practise homosexuality. He suggested that the possibility of raising the age of consent of young girls, at present 16, should be considered.

The Archbishop of Canterbury (Dr. Fisher) said that the report was right in saying that while the law should protect and control those under 21 and protect unwilling people over that age, homosexuality between consenting adults in private should not come within the ambit of the law. There was one great benefit in obeying that principle. He had reason to believe that often great pressure was put on a consenting adult to continue when, if left to himself, he would like to get free. He had heard of a young man, who wished to get free, being pursued by his partner from Australia to Britain, and so brought back into the practice. Another young man, half wishing to get free of the habit, was recommended to fresh partners when he moved from the provinces to London, and later when he went overseas. There were "groups or clubs of homosexuals with an organization of their own and a language of their own, a kind of freemasonry of their own, from which it is not at all easy to escape."

The Archbishop continued: "So long as homosexual offences between consenting adults are criminal and punishable by law, this pressure will mount and homosexualism will remain. It has all the glamour and romance of chosen and select rebels against the conventions of society and the forces of the law. At the heart of this kind of freemasonry are men of passionate sincerity who are made strongly homosexual by nature, who believe that what is wrong for others is right for them, and that society is not merely hostile but unjust and cruel. Into this kind of nightmare world there can be no entrance for the forces of righteousness until the offences are made no longer criminal, so there is no longer a question of betraying companions to criminal offences. At once the free air of normal morality will begin to circulate." Those involved would be set free to talk without giving anyone away to the law; they would seek

advice, and would be free to seek protection by the police from molestation by their former companions. It would be all the more easy to convince them of the restraints of common sense and Christian morality when they were "delivered from the fears, the glamour, and even the crusading spirit of the rebel against law and convention."

"There is a great general moral indignation against homosexual sins because they are unnatural," Dr. Fisher observed. "There is a queer lack of general moral indignation against fornication and adultery, because they are supposed to be natural and therefore in some sense not wrong. In my judgment, the threat to general public moral standards from homosexual offences done in private is far less, and far less widespread, than the damage openly done to public morality and domestic health by fornication and adultery."

Continuing, Dr. Fisher said that there were obtrusive conclusions of the utmost gravity about prostitution which the report left completely untouched and for which it had no remedy. What was called "kerb crawling" was a public thing, yet the Committee made no recommendation on how to deal with it. The report recognized that if the streets were cleared there would be various other ways of arranging the trade "under the counter," and to drive a thing underground was sometimes the worst way of dealing with it. The root of the confusion on this subject was that prostitution was not a private occupation but a trade, and it had to be dealt with like any other trade. The fewer prostitutes, fornicators, and adulterers in the community, the better equipped the nation would be to get on with its job.

Hitherto prostitutes had been made to bear the brunt of legal action against the trade. It had been agreed that they were undesirable and must be kept out of sight, but it had been taken for granted that their customers had every right to a reasonable supply of prostitutes and should not in any way be restrained from resorting to them. That was an old-fashioned view, dating from the time when women had no rights and man in the sexual field claimed for himself unlimited rights. By far the quickest way to restrain this trade was to get at, restrain, and punish the customer--i.e. the man. Very many men would be strongly restrained if there was a fear that they would find themselves in the police courts and their names made public. "I do not believe," Dr. Fisher concluded, "that the lawyers would be utterly unable to find some way of getting at the men along with the prostitutes if the community said they were to find the way."

Lord Brabazon said that the glamour of love, odd as it might seem to some, was just as much present between two homosexuals as between a man and a woman. To have on the Statute Book imprisonment for life for one act of homosexuality between two men was almost going back to the time when men were hanged for stealing five shillings. He asked the Government to consider at least whether they could meet one point of the recommendations--that only the Director of Public Prosecutions should be entitled to start proceedings against homosexuals, and that prosecutions in cases of blackmail should be avoided.

Viscount Kilmuir said that before reaching any final conclusion on the report, the Government wished to take careful account of public opinion. He could not do more than indicate the lines on which the Government was thinking, but as the report had been available for three months it was right that he should indicate its preliminary views. The most far-reaching and widely discussed proposal was that homosexual behaviour in private between consenting adults should no longer be a criminal offence. It would obviously be a serious step to reverse a provision of the criminal law which had stood for a long time, and any Government would be bound to think long and carefully before deciding to do so.

"There are occasions when it may well be the duty of a Government to lead rather than to follow public opinion," the Lord Chancellor continued. "But in a matter of this kind the general sense of the community, particularly as expressed in the statutes left undisturbed for long periods, is an important feature, and the community is entitled to its view as to what affects society as a whole. The Government does not believe that the general sense of the community is with the Committee in these recommendations. We think the problem requires further study and consideration. Certainly there can be no prospect of early legislation on this subject.

"The argument has been put forward forcibly, in different forms from different quarters, that for the State to remove the sanctions of criminal law from homosexual behaviour, even between consenting adults in private, is tantamount to suggesting that there is nothing socially harmful in such behaviour, and would inevitably have the consequence that young people would be encouraged to indulge and that society would be corrupted. I believe that this is not an argument which can be lightly dismissed. For every genuine invert there are many perverted by money, or by desire for fresh sensation, or by imitation. That is my conviction after much study of the subject.

"Even if it were thought right to accept the Committee's recommendation in principle, which we do not, difficult consequential problems would arise. There would be the problems of definition. What is 'in private' for this purpose? What is 'consent'? Again, the Committee points out that problems would arise in relation to the armed forces and other establishments whose members are under a disciplinary code. It is essential to face these difficulties, as well as to face the difficulties of those who are affected. That is why the Government takes the position I have stated, and cannot hold out hope of legislation on this point." So little was known about the nature and origins of homosexuality, the Lord Chancellor added, that further research was clearly desirable, and the Government would give attentive thought to the Committee's recommendations on this subject, which had repercussions far beyond the sphere of the criminal law.

Turning to the question of prostitution, Lord Kilmuir said that there was little doubt that the substance of the Committee's recommendations commended themselves to the majority of public opinion, although there were reservations on certain points. It was reasonable and proper that the streets should be free from what was offensive and injurious and made tolerable for the ordinary citizen, and the Government had to consider what practical alternative could be found. It was not a conceivable proposition that prostitution should be stopped by law, and no-one had suggested that. Speakers had made the point that nothing was done against the man who consorted with prostitutes, but it was not easy to see how this criticism could be met without overstepping the proper bounds of the criminal law. Proceedings could already be taken against men for importuning for immoral purposes, and he would willingly examine an extension of the law on these matters.

He had considered the suggestion that bigger fines would prove a sufficient deterrent, and that many prostitutes would be unable to pay them, with the result that they would be committed to prison. The difficulty of that argument was that it took no account of the statutory requirement under the Magistrates' Courts Act that the court, in fixing a fine, must have regard to the means of the offender. In any case, it would not be proper to "legislate for imprisonment by a side wind," and one must either take it or reject it. The Government would consider with the greatest care and sympathy those recommendations which were designed to dissuade or reclaim the newcomer to the ranks of the prostitutes, and were sympathetically disposed towards the recommendations about the use of premises for prostitution.

Lord Lothian (a member of the Wolfenden Committee) said that in spite of the controversy over the main recommendation, the Government should not let the other proposals pass unnoticed. A more constructive attitude towards the homosexual offender should be taken in prison, and the prison medical service should be augmented.

The Bishop of Rochester (Dr. Chavasse) maintained that there was no more contagious influence in the world than that emanating from homosexual practices. There were such things as sodomy clubs, which drew in those who would otherwise be immune and turned them into corrupters of others. There had been one in Oxford between the wars, and he was informed that there had been another at Cambridge which "shamelessly sported a tie." He could not agree with the Primate that the best way of getting rid of them was to allow them to indulge in this practice and exist. He felt, with half the people in the Church, that no change in the present lines of the law should be made, for the sake of homosexuals themselves and to protect people from their corruption.

The Committee's recommendation to legalize homosexual behaviour in private between consenting adults was supported by **Lord Huntingdon, Lord Jessel** and **Lord Strabolgi**, but opposed by **Earl Winterton, Lord Denning**, the **Bishop of Carlisle** (Dr. Bloomer), **Lord Lawson**, and **Lord Mathers**.

The Church Assembly adopted on Nov. 14, 1957 a motion, which had been proposed by the Bishops of Exeter and St. Albans (respectively Dr. Mortimer and Dr. Gresford Jones), approving "the principles on which the criminal law concerned with sex behaviour should be based, as stated by the Wolfenden Committee." The specific recommendations relating to homosexuality were approved by 155 votes to 138 after a debate characterized by considerable differences of opinion on the Wolfenden proposals. It was unanimously agreed that the Committee's proposals on the subject of prostitution required further study.—(Cmd. 247 - Times - Daily Telegraph - Manchester Guardian)

A. EGYPT. — "Assassination Plot" Sentences.

Sentences of life imprisonment with hard labour were passed by a Cairo military court on April 28 on two of the defendants accused of plotting to assassinate President Nasser (see page 16086, second column)—M. Mortada el-Maraghy, the former Minister of the Interior, and M. Hussein Khairy, both of whom were sentenced *in absentia*. The other three defendants were each sentenced—also *in absentia*—to 15 years' hard labour on similar charges.—(Times - Le Monde)

(Prev. rep. 16085 A.)

B. ARGENTINA. — Diplomatic Relations broken with Dominican Republic.

Argentina broke off diplomatic relations with the Dominican Republic on April 10, the Dominican Ambassador in Buenos Aires being ordered to leave the country within 48 hours. The decree published by the Provisional Government alleged that ex-President Perón (now resident in Ciudad Trujillo) had been permitted to continue a defamatory campaign against Argentina with the connivance of Dominican Ministers and officials.—(Bank of London and South America)

A. RHODESIA AND NYASALAND FEDERATION. — Federal Electoral Bill enacted after British Government's Approval. - Statements by African Affairs Board and Federal Government. - House of Commons Debate. - Representations by British Council of Churches.

The U.K. Colonial Secretary, Mr. Lennox-Boyd, announced in the House of Commons on Feb. 18 that the Government would advise the Queen to give her assent to the Electoral Bill passed by the Federal Assembly of Rhodesia and Nyasaland on Jan. 9. A memorandum from the Federation's African Affairs Board giving its reasons for regarding the Bill as a "differentiating measure" had previously been published by the Commonwealth Relations Office on Feb. 11, together with a statement by the Federal Government defending the Bill.

Memorandum by African Affairs Board. This pointed out that the income and education qualifications for general voters under the Bill were either (*a*) an income of £720 a year; (*b*) £480 a year plus completed primary education, or (*c*) £300 a year plus four years' secondary education. The average income of Africans in employment in 1956 was approximately £70 a year (the average income of adult Africans all told being far lower than this), whilst the average European income for the same year had been about £1,100. "From this it is apparent," the memorandum continued, "that although the income qualification applies to all persons irrespective of race, the practical effect of a qualification of £720 will be to exclude only a minor proportion of Europeans, but to prevent all but exceptionally wealthy Africans from getting the vote. The Board have no corresponding figures for education, but the general standard of European education is far higher than the African, and the education qualifications required for voters certainly also differentiate in favour of Europeans as against Africans in getting a vote." The Board also pointed out that the number of members elected only by Africans (i.e. two each of the African members for Northern Rhodesia and Nyasaland) would remain the same, whereas the number of members elected predominantly by Europeans would be greatly increased; it maintained, in consequence, that African electors would suffer a serious proportionate loss of influence.

Statement by Federal Government. This observed that no conditions or disabilities had been directly laid upon Africans, and that the Board's argument taken to its logical conclusion would mean that no Electoral Bill falling short of virtual manhood suffrage could escape being regarded by the Board as a "differentiating measure." The statement also denied that African voters would suffer a loss of influence, as many more Africans would be able to vote for the additional African members. It maintained, therefore, that "the system offers a workable solution, within the framework of existing constitutional arrangements, to the twin problems of preserving political control in civilized and responsible hands and of associating the emergent African with the processes of government."

The Colonial Secretary's announcement of Feb. 18 was made at the opening of a debate which had been requested by the Opposition, and in which Mr. Creech Jones (the former Labour Colonial Secretary) was the principal Opposition spokesman.

Mr. Lennox-Boyd, referring to the African Affairs Board's request, said with regard to the Board's first objection (i.e. that the qualifications for the general roll had been fixed at a level permitting Europeans in general to qualify, but only the exceptional African) that the Federal Parliament had tried to meet this objection by providing for a special roll for which Africans could qualify in comparable numbers. As regards the Board's second objection (i.e. that African electors would suffer a serious proportionate loss at the next election, compared with the influence they were able to exert at previous elections), this was based simply on the fact that the four newly-elected African members would not be returned on a purely racial basis, and that the proportion of the races on the rolls which elected them remained uncertain. If that were a valid objection to the Bill, it would never be possible to take the first step away from the existing racial basis of representation. It was the common roll principle which, in the belief of the Federal Parliament and the Government, held the only prospect of fair and genuine partnership between the races.

In calculating the proportionate influence of Africans, it should be remembered that in the next Assembly the number of Africans would be doubled, whilst the number of ordinary members of unspecified race had been increased by only two-thirds. In the election of the specially elected European members and the four elected African members from Southern Rhodesia, the addition of the special votes to the ordinary votes would give Africans in that territory an enormously increased say. In the two Northern territories there was no change in the method of returning the four existing Africans, whilst the number of Africans eligible to vote for the four new African members ran to thousands, perhaps tens of thousands. From the beginning there would be a gain in respect of the Africans who would have an opportunity to take part in the election of their representatives, and it was confidently expected that these numbers would increase substantially year by year. The Africans on the special roll in Southern Rhodesia might be between 20,000 and 30,000, instead of 1,000 as at present. In Northern Rhodesia and Nyasaland, perhaps between 20,000 and 30,000 Africans would for the first time be entitled to participate directly in the election of their representatives.

According to the estimate of the Federal Minister of Law, the balance at the next election, but at no subsequent election, would be six to four in favour of the Europeans. The number of Africans in the Federal Parliament would be increased from six to 12, and the fact that a minimum of one-fifth of the House would be African would ensure that the major parties would have due regard to the African point of view.

Denying that the Bill involved a breach of faith, Mr. Lennox-Boyd said that it was not only untrue that the Government had undertaken not to make any major changes in the Constitution before 1960, but it was plain from the Constitution itself that, provided certain conditions were fulfilled, it could be amended. He agreed with the Federal Government that the common-roll system would be of the greatest value in encouraging political discussion based on party political and not on racial lines. He therefore hoped that those who had had some doubts about the Bill would give unanimous support to "this brave attempt in the field of partnership."

Mr. Creech Jones (Lab.) described the Bill as "a negation of partnership." He declared: "It is ironical in a genuine partnership to give one-twenty-fifth of the population 42 out of the 57 seats in the House of Representatives, and to give the Europeans full control of the Cabinet in the Federation. On the general roll for election to the Chamber there will be . . . 81,000 Europeans and 2,500 Africans. Is it not obvious, in the present state of African development, that the conditions necessary for an African to get on the roll make it virtually impossible for them to qualify? How can you ever hope for fast progress by the Africans to reach the high standard of qualification for the general roll when they are repressed by segregation principles, colour bars, denial of trade union rights, and a whole series of other discriminatory clauses, with poor facilities for education?"

Mr. Creech Jones contended that the Africans had no influence in the election of the ordinary members, and that no elected European need pay the slightest attention to African opinion. On this basis, no African would ever represent a constituency in Nyasaland or in Northern or Southern Rhodesia. To be enfranchised, native electors needed to be able to speak, read, write, and comprehend English, and it was "monstrous" to debar a man from playing a part in the political life of his own country merely because he could not speak a foreign language. The whole political machine was in the hands of Europeans, possibly for ever, and served "certain European communal interests."

It was therefore important (Mr. Creech Jones concluded) to ask the Federal Government to withdraw the Bill, to reconsider it, and to recommend that the next election should be on the old basis, so that the whole question might come under review at the 1960 conference. Political arrangements of this kind were discriminatory, and defeated the purpose declared in the preamble to the Constitution that of partnership between the races

Mr. Clement Davies (Liberal) said that any legislation for Africa concerned not only part but the whole of Africa, since all Africa would be watching it. The Government had described the African Affairs Board as a safeguard for Africans against changes which might affect their rights, and it was a vital matter when that Board said that the Bill was disadvantageous to Africans. How much regard could be had for "paper safeguards?"

A motion approving the British Government's support for the Bill was passed by 305 votes to 256. The Bill accordingly received the Royal Assent on Feb. 20 and was promulgated in the Federation on Feb. 22. An official statement was issued in Salisbury announcing that proclamations would be published bringing into effect the Federal Electoral Act and the Federal Citizenship Act as from March 1, and that regulations would be issued creating the necessary electoral registration machinery.

Representations by British Council of Churches.

Prior to the House of Commons debate there had been correspondence on the Federal Electoral Bill between the International Department of the British Council of Churches and the Secretary of State for Commonwealth Relations, Lord Home.

In a letter to Lord Home, published on Feb. 17, the Council expressed "the greatest disquiet" at the Electoral Bill, saying that in the view of many Africans it "very gravely imperilled" the African Affairs Board, since that body would "probably be elected mainly by those responsible to predominantly European constituencies" as a result of the Bill. The Department called on the Government to reject the view that the British Parliament's responsibility was restricted to judging the constitutional competence of the Federal Parliament to enact such legislation, and to declare that the wisdom and justice of such legislation was clearly within its purview. It also expressed the hope that the British Government would not approve the Bill unless the Federal Government gave pledges that when, with the progress of African education, more and more Africans qualified for inclusion on the rolls, no step would be taken to frustrate this development.

In his reply, published on Feb. 18, Lord Home said that the Council's concern about the future composition of the African Affairs Board was based on "a theoretical rather than a practical possibility." The two members of the African Affairs Board from Southern Rhodesia would continue for a time to be elected by a majority of European voters, but this majority would be much

smaller once the proposals of the Federal Electoral Bill were in force. The Governors of the Northern Territories, as hitherto, would continue to select two specially appointed European members for African interests. The choice of the two other African members would be made by all the Africans returned to the Assembly, voting with the three Europeans representing African interests.

If the Electoral Bill became law, there would be four potential candidates for one place from Nyasaland, two of whom would be elected by a body designated by the Governor as representative of Africans, and two by the combined general and special rolls, on which it would be possible for Africans to have a large majority from the start. There would also be four potential candidates for one place from Northern Rhodesia, of whom two would be elected by a body designated as representative of Africans, and two by the combined general and special rolls, on which Africans could have a majority—if not at first, then at a subsequent general election.

Since eight of the 15 members who would make the choice were themselves likely to have been chosen by Africans or to have been appointed to represent African interests, and because all the candidates for one place would very possibly have been returned by Africans alone or by an African majority, it did not appear that the changes made in the Constitution Amendment Act need have any very considerable effect on the composition of the Board.

Appointment of Federal Delimitation Commission for Southern and Northern Rhodesia.

The appointment of a Federal Delimitation Commission for Southern Rhodesia and Northern Rhodesia, for the purpose of dividing those territories into Federal electoral districts based on the enlarged membership of the Federal Assembly, was announced on March 3. Mr. Justice H. J. Clayden was appointed chairman of the Commission. On the same date the Government announced the members of the Educational Qualifications Board to be established under the Electoral Act.—(Times - Daily Telegraph - Manchester Guardian - Federal Information Department, Salisbury)

(Prev. rep. 15987 A.)

A. LUXEMBURG. — New Cabinet.

M. Joseph Bech (71), the Prime Minister and Foreign Minister of Luxemburg, resigned the Premiership on March 29 to devote himself entirely to the country's foreign affairs in the light of the current negotiations on the permanent seat of the European Communities. M. Bech has been Foreign Minister of Luxemburg for nearly 32 years.

On the same date M. Pierre Frieden (65), Minister of Education and the Interior in M. Bech's Government, was appointed Prime Minister in succession to M. Bech. The composition of M. Frieden's Cabinet was announced on March 31 as follows :

M. Pierre Frieden (Christian Social)	Prime Minister, Education, and Interior.
M. Joseph Bech (Christian Social)	Foreign Affairs and Foreign Trade.
M. Victor Bodson (Socialist)	Justice and Public Works.
M. Nicolas Biever (Socialist)	Labour and Social Security.
M. Paul Wilwertz (Socialist)	Economics.
M. Pierre Werner (Christian Social)	Finance and Defence.
M. Emile Colling (Christian Social)	Agriculture and Public Health.
M. Henri Cravatte (Socialist)	Secretary of State at the Ministry of Economics.

All the members of the Frieden Cabinet sat in M. Bech's Ministry except M. Cravatte, the new Secretary of State for Economics—a post formerly held by M. Wilwertz. The latter had been appointed Minister of Economics in M. Bech's Cabinet on Jan. 20 *vice* M. Michel Rasquin, following M. Rasquin's appointment to the Commission of the European Economic Community (see page 15958).

Like its predecessor, the new Cabinet comprises four Christian Social Ministers and four Socialist Ministers. (Luxemburg Embassy, London) **(Prev. rep. 13696 B.)**

B. CHILE. — Further Extension of I.M.F. and U.S. Exchange Stabilization Credits.

It was announced in Santiago and Washington on March 31 that the "stand-by" arrangement with the International Monetary Fund, under which Chile could purchase up to $85,000,000 from the Fund in support of her programme of exchange reform and economic stabilization, had been extended for a further year—i.e. to March 31, 1959. The U.S. Treasury credit of $10,000,000 and the $80,000,000 credit granted by eight U.S. banks for currency stabilization purposes were also extended for a year.—(I.M.F., Washington - New York Times)

C. INDIA - RUMANIA. — M. Stoica's Visit to Delhi. - Nehru-Stoica Communiqué. - Rumanian Co-operation in establishing Assam Oil Refinery.

M. Chivu Stoica, the Rumanian Prime Minister, accompanied by M. Emil Bodnaras (a Deputy Premier) and M. Bumaciu (the Foreign Minister), visited India from March 7-22 for discussions with Mr. Nehru and other members of the Indian Government, especially Mr. K. D. Malaviya, the Minister for Mines and Oil. In addition to his stay in Delhi, he also visited industrial establishments and rural development areas, as well as Calcutta and other cities.

A joint statement was issued by Mr. Nehru and M. Stoica on March 9 saying that they had had "frank and friendly discussions in regard to the present world situation, as well as on matters of mutual interest, including increased economic and cultural co-operation between the two countries." Both Prime Ministers expressed support for a practical approach to disarmament, the removal of lack of confidence among nations, the proposals for a Summit meeting, and the lessening of world tensions. They also called for the immediate cessation of nuclear tests; expressed their "sympathy with and support for peoples in their struggles against colonialism and to win or consolidate their independence"; stressed the importance of assistance to under-developed countries; and declared that economic co-operation among countries should be based on "equality, mutual advantage, and respect for each other's economic and political independence."

The statement went on to say that the two Prime Ministers would "continue their endeavours to ensure that the People's Republic of China takes its rightful place in the U.N.," and that they welcomed the withdrawal of Chinese "volunteers" from North Korea. The two Prime Ministers welcomed the growing economic and cultural co-operation between their two countries, and Mr. Nehru expressed his Government's appreciation of the assistance given by the Rumanian Government, especially with regard to the development of the Indian oil industry.

M. Stoica said in Calcutta on March 21 that during his talks in Delhi agreement had been reached in principle on the supply by Rumania of an oil refinery—understood to be the State-owned refinery in Assam which will be erected near Gauhati, on the planned pipeline from the oilfields in Upper Assam. Mr. Malaviya told the *Rajya Sabha* on April 21 that the Government of India had accepted an offer by the Rumanian Government to collaborate in setting up an oil refinery in Assam, subject to consideration of detailed terms. (Indian High Commissioner's Office, London - The Statesman, Calcutta) **(Prev. rep. Assam Oil Refinery, 16028 A.)**

D. NETHERLANDS. — Post-war Naval Programme.

The 10-year post-war reconstruction programme of the Royal Netherlands Navy was completed on April 10 with the commissioning of the 2,500-ton anti-submarine destroyer *Amsterdam*, the last of eight warships of this type. Like the other vessels of her class, she is equipped with the latest electronic devices for locating and destroying submarines and has an armament of four quick-firing 12-cm. guns, six 40-mm. machine-guns, depth charges, and torpedoes. The Royal Netherlands Navy, with 130 vessels, is larger today than ever before and includes an aircraft carrier, two cruisers, 12 destroyers, 22 frigates, five submarines, six patrol vessels, and smaller craft.—(Netherlands News Agency) **(13402 C.)**

Note. The principal units of the Royal Netherlands Navy are the 13,000-ton aircraft carrier *Karel Doorman* (ex-H.M.S. *Venerable*), purchased from the British Royal Navy in 1948; the 8,000-ton cruisers *De Ruyter* and *Zeven Provincien*, both commissioned in 1953; the above-mentioned eight anti-submarine destroyers (*Amsterdam, Drenthe, Friesland, Groningen, Limburg, Overijssel, Rotterdam* and *Utrecht*); and four other destroyers of the same displacement (*Gelderland, Holland, Noord Brabant*, and *Zeeland*).

E. MOROCCO. — Admission to World Bank and International Monetary Fund.

Morocco became a member of the International Bank and the International Monetary Fund on April 25, her quota in the I.M.F. being $35,000,000 and her subscription to the capital stock of the Bank 350 shares with a par value of $35,000,000. This brought the membership of both institutions to 67; the total of members' quotas in the Fund to $9,078,000,000; and the total subscribed capital of the Bank to $9,405,000,000.—(International Bank, Washington)

(Prev. rep. 16120 B.)

F. AUSTRALIA. — Dollar Loan.

A $25,000,000 loan of the Commonwealth of Australia bearing interest at 4½ per cent p.a. and maturing in 1978 was issued in New York on April 22 and was immediately oversubscribed.—(Australian News and Information Bureau)

A. UNITED KINGDOM. — Labour Party. - Joint Campaign with T.U.C. for Disarmament and Suspension of Nuclear Tests. - Labour-T.U.C. Declarations on Disarmament and Disengagement in Europe. - Mr. Strachey's Pamphlet on Nuclear Disarmament. - Rejection of Unilateral British Renunciation of H-Bomb.

The Labour Party and the Trades Union Congress issued a joint statement on March 6 announcing their intention of conducting a national campaign for disarmament and the immediate suspension of nuclear tests. The policy of the Labour Party and the T.U.C. on these questions was summarized as follows :

(1) The British Government should make a serious effort to bring about summit talks in the near future.

(2) The Government should immediately give a lead to other nations by suspending British thermo-nuclear tests.

(3) Simultaneously, the Government should press for a general agreement to end all nuclear tests, if necessary as a separate measure, distinct from any wider disarmament measures.

(4) Agreement on suspension of tests must lead within a reasonable period to real progress on the basic problem of general disarmament.

(5) A general disarmament agreement should include a declaration banning the use of all nuclear weapons.

(6) Patrols by aircraft based in Britain carrying H-bombs should be discontinued forthwith.

(7) No physical steps should be taken to set up missile bases in Britain before a fresh attempt had been made to negotiate with the Soviet Union.

The joint Labour-T.U.C. declaration was worded as follows (cross-headings inserted) :

" The Labour Party and the Trades Union Congress have considered with profound concern the steadily increasing momentum of the international arms race. Three great Powers now have nuclear weapons. If the race continues, other States will be similarly equipped. The situation is one of unprecedented menace to the peoples of the world. The position of Britain, as a small crowded island, is particularly vulnerable . . . The issue before us now is the survival of mankind itself, and the peoples of West and East alike are looking to their Governments to break the vicious circle.

" We believe that the British Government has the duty and opportunity to play a major part in this situation. We therefore make the following joint declaration on policies which we consider the Government should follow in the hope of ending the deadlock. As a first step towards this the Government should make a serious effort to bring about summit talks in the near future.

Nuclear Weapon Tests. " We believe that it would be possible to achieve an initial agreement on the suspension of nuclear weapon tests, and that such an agreement would help to create an atmosphere favourable to wider international agreement. This subject is . . . of prime importance because of the dangers to health and to posterity arising from the tests ; and agreement on it should be relatively easy to reach because the most dangerous thermo-nuclear tests, at any rate, can be detected without difficulty.

" The Soviet Government has expressed its willingness . . . to negotiate such a suspension of tests independently of disarmament. We believe that it is of the first importance to test the sincerity of these offers without delay. We therefore consider that the British Government should press now for an international agreement on the suspension of thermo-nuclear tests. This should be extended to cover other nuclear tests if an efficient system can be devised for checking that they do not in fact take place.

" Further, we consider that, as an example, the British Government should at once suspend thermo-nuclear tests unilaterally for a limited period, in the hope that this will hasten permanent international agreement on tests and lead on to a general disarmament convention.

Disarmament. " Obstacles to agreement on the more advanced stages of disarmament must not prevent limited agreements which prove practicable at an earlier date . . . Nor must agreement on such limited measures be made dependent on the settlement of political problems, although we anticipate that the lessening of international tension on any one point will make progress on the other issues easier.

" The stages of disarmament will have to include agreement on the reduction of conventional arms and forces, on stopping the production of fissile material for military purposes, and on the reduction and ultimate destruction of stocks of nuclear weapons — all under international inspection and control. Looking at the prospects for early limited accord, again in the light of Soviet offers, we believe that an international declaration banning the use of all nuclear weapons, coupled with an agreement on the reduction of conventional arms and forces, would be of great value in the creation of mutual confidence during the disarmament process.

" Because of Soviet preponderance in conventional arms and forces, the Western Governments have so far considered it necessary to reserve freedom to use nuclear weapons first. It seems to us logical and sane to attempt to meet the Soviet proposals for a ban on the use of nuclear weapons by negotiating the removal of this particular preponderance.

" We believe that the early conclusion of a non-aggression treaty between East and West would similarly help to build confidence.

" A number of proposals have recently been put forward for disengagement in Central and Eastern Europe, ranging from a plan for a nuclear-free zone [i.e. the Rapacki Plan] to more elaborate schemes for a neutral area. We urge that attempts should be made to reach agreement with the Communist Powers on some proposal of this kind, provided always that the balance of security is maintained . . .

Aircraft carrying Nuclear Weapons. " We consider that the Government has failed to show that it is necessary for British-based aircraft to carry nuclear weapons on either patrols or training flights. Any military advantage that there may be in such patrols is far outweighed by the risk that a war might be started by accident The very fact that such flights are carried out serves to increase the general atmosphere of international mistrust and tension.

" There is also the danger of radio-activity resulting from a crash, and we consider that training flights should be made with dummy weapons. In short, flights with nuclear weapons by British-based aircraft should be limited forthwith to those necessary for the transport of weapon stocks.

Missile Bases. " There has been much public concern about the new agreement to set up in Britain bases for launching missiles of American origin [see 16063 A] . . . We believe not only that these bases must be effectively under British control, but also that no physical steps should be taken to set them up before a fresh attempt has been made to negotiate with the Soviet Government."

Mr. Strachey's Pamphlet on Nuclear Disarmament.

Mr. John Strachey, the former Labour Secretary of State for War, issued a 5,000-word pamphlet on April 7, entitled *Scrap All the H-Bombs*, in connexion with the Labour-T.U.C. declaration of March 6. While stressing that it was Labour's policy " to scrap all H-bombs and A-bombs," whether Russian, American, or British, he emphasized that " Britain must not scrap her own nuclear deterrent unless and until the other nations scrap theirs." Mr. Gaitskell stated in a foreword that although the pamphlet was not an official statement of policy, the party's National Executive Committee regarded it as " a most useful background document which helps to explain the Labour-T.U.C. declaration and sets forth clearly many of the considerations which led to the formulation of Labour's policy."

Mr. Strachey wrote *inter alia* that unilateral renunciation of the H-bomb by Britain " would neither receive nor deserve the confidence of the British people " ; moreover, by weakening Britain's influence in the world " it might well make the Russian-American struggle still more dangerous." After urging that Britain should give a lead to the world by suspending her own nuclear tests, following the similar action announced by the Russians, Mr. Strachey continued :

" The next step is clearly to get all H-bomb tests suspended and to establish an effective system of inspection and control to prevent any nation from secretly resuming them. But even the suspension of all tests by all the three nuclear Powers would be no more than the first step towards general disarmament. Up till now the West has felt that it was impossible to ban nuclear weapons without reducing ordinary weapons too. For obviously, as the Russians have a far bigger army than anyone else, such one-sided disarmament would be greatly to their advantage. So the Labour Party-T.U.C. declaration sensibly suggests that the way to get rid of this objection is to negotiate a substantial reduction of ordinary weapons at the same time. For then the banning of nuclear weapons should still leave the two sides with an approximately equal degree of strength . . ." Mr. Strachey went on to emphasize that " watertight international inspection and control " were indispensable to any agreement on disarmament.

Discussing the possibility that America might once again become isolationist—that is, " wash her hands of Europe and allow Russia to dominate and even occupy it if she wanted to do so "—Mr. Strachey wrote : " Most of us would regard this as a major disaster. Yet we must face the fact that with neither nuclear weapons nor American support we could not possibly resist Russian pressure nor, ultimately, Russian occupation. Of course, it is also possible that even if we disarmed completely and, as would be inevitable, withdrew from NATO, America would still continue her alliance with Western Europe in some form, though without Britain. This would simply mean that the cold war continued while the British Government ceased to have any influence whatever on American policy . . . The fact is that a helpless Britain would lose her power to influence events in general. She would in particular lose her power to have a restraining influence on Russia. For the Russians notoriously take very little account of people who have no power with which to back up their opinions . . ."

Mr. Strachey rejected the pacifist case for total disarmament, arguing that it would be impossible for Britain to " contract out " of the world situation. He wrote in this connexion : " What the elimination of British strength, and the consequent collapse of NATO, might well actually do would be to produce the one situation in which Russia would be sufficiently encouraged to make rash forward moves in this or that part of the world where tensions ran high, and so touch off a third World War between Russia and America. Even if the Americans had withdrawn from Britain, the first act of a third World War might well be a race between the Russians and Americans to occupy us and establish their bases here. And then the other one would probably attack the occupiers' bases with

H-bombs. It is very easy to foresee that a disarmed and would-be neutral Britain might be totally destroyed by H-bombs aimed at her, or by the fall-out of H-bombs not aimed at her, in such a war. The essential thing to grasp is that there is no safety whatever for us in trying to contract out of a world war."

Similarly, Mr. Strachey rejected the "halfway house" argument that Britain should scrap her own nuclear weapons and rely on the protection of the American deterrent. "It would be a really nauseating piece of hypocrisy," he declared, "to protest that we were too holy to possess H-bombs ourselves, while all the time saying under our breath that anyhow we didn't need them because the American H-bombs would always protect us. Nor is there any practical advantage. So long as we are members of NATO and allies of the Americans, we are part of the Western Alliance. We should be just as much in the front line in a third World War if we did not have our own H-bomb as if we did . . ."

Labour-T.U.C. Statement on Disengagement in Europe.

A further joint statement was issued on April 23 by the Labour Party and the T.U.C. on the question of disengagement in Europe. It urged that the British Government should seek the support of other Western Governments in an attempt to reach an agreement with the Soviet Union on the following lines :

(1) Gradual withdrawal, under effective international control, of all foreign forces from Eastern and Western Germany, Poland, Czechoslovakia, and Hungary.

(2) Establishment of effective international control over the level and type of national armaments and armed forces agreed for those countries.

(3) German reunification within a framework to be agreed and guaranteed by the four Powers (Britain, France, the U.S.A., and the U.S.S.R.), including free elections, leaving the ways and means to be settled by the Germans themselves.

(4) Negotiation of a European security treaty backed by the four Powers to guarantee the territorial integrity of countries in the area.

(5) Withdrawal of the countries in the area from NATO and the Warsaw Pact.

The joint declaration on this subject ran as follows :

"The Labour Party and the T.U.C. recognize that the dangers which to-day threaten mankind are particularly intense in Central and Eastern Europe, along the boundary dividing the military forces of NATO and the Warsaw Pact. In our declaration of March 6 on disarmament and nuclear war we therefore urged . . . that attempts should be made to reach agreement with the Communist Powers on a plan for disengagement in the area. Such is the importance and complexity of this subject that we now set out in more detail what we consider the approach of the Western Governments should be.

"In the present situation there is a risk that, with major opposing forces at close quarters, a border incident could at any time touch off general war. Still graver dangers exist in the possibility of further political unrest in Eastern Europe. If, for example, a revolution developed on the Hungarian pattern in Eastern Germany, West German forces might become involved, almost inevitably bringing NATO into conflict with the Communist powers.

"An agreement on disengagement or mutual withdrawal which would lessen and eventually eliminate these fearful possibilities might well be as acceptable to the Soviet Government as to Governments in the West. We believe that Soviet intransigence on European political questions, and particularly on Germany, must to some extent be viewed in the context of official Western pronouncements. The latest Western declaration on Germany, issued on July 29, 1957, still insists that a unified Germany must have the right to enter NATO. Yet it is by now perfectly clear that negotiations for a European settlement with the U.S.S.R. will prove fruitless without a guarantee that Germany shall not add its weight to either side. We cannot conceive such a guarantee except within the framework of a disengagement plan. Conversely, we cannot conceive complete, and therefore fully effective, disengagement without reunification of Germany.

After making the five proposals listed above, the statement went on : "We fully realize that no plan for disengagement will be acceptable if it changes the balance of military security to the disadvantage of either side. Proposals for the withdrawal of NATO forces from part of their present area must, for example, be consistent with the retention of NATO itself, including the continued presence of U.S. forces on the Continent. However, we believe that, pending summit talks, no steps should be taken towards the ultimate equipment of West German forces with nuclear weapons, since this would make it more difficult both to reach agreement on disengagement and to carry out such an agreement.

"We are aware of the difficulties of the task ahead, and recognize that the full implementation of proposals of this kind may be a long and gradual process. We believe, however, that points (1) and (2) above offer scope for early progress in negotiation, and that such progress would facilitate an advance on the other problems.

"We welcome the initiative taken by Mr. Rapacki, the Polish Foreign Minister, in tabling his proposal for a nuclear-free zone in Central Europe. This proposal contains certain weaknesses, particularly in that it excludes Hungary, omits the problem of German reunification, and suggests only gradual reduction, as opposed to total withdrawal, of foreign forces from the area. Nevertheless, we regard the Rapacki Plan as an advance, and we consider that it should be included . . . at summit talks."

Three members of the Labour "shadow Cabinet"—Mr. Gaitskell, Mr. Bevan, and Mr. George Brown visited General Norstad (Supreme Allied Commander in Europe) at his headquarters near Paris on April 7. No statement was issued, but it was understood that General Norstad and the three Labour leaders discussed current military problems in Europe, including nuclear weapons and tests, and that the Labour Party's "disengagement" proposals had been explained to the Supreme Commander. (Daily Herald - Times - Manchester Guardian) **(Prev. rep. Labour Party Conference, Debate on Nuclear Disarmament, 15891 A, pages 15892-93.)**

A. LITERATURE. — Book Selections, April 1958.

Selected books published in Great Britain and the United States are given below :

Great Britain. Durrell, Lawrence "Balthazar." A Novel. (Faber and Faber, 15s.)

Eytan, Walter—"The First Ten Years : Israel between East and West." (George Weidenfeld and Nicolson, 21s.)

"Germany and the Revolution in Russia, 1915-1918." Documents from the Archives of the German Foreign Ministry. Edited by Z. A. Zeman. (Oxford University Press, 25s.)

Gunther, John—"Inside Russia Today." (Hamish Hamilton, 25s.)

Heyerdahl, Thor—"Aku-Aku : The Secret of Easter Island." Translated from the Norwegian. (George Allen and Unwin, 21s.)

Jiménez, Juan Ramón "Platero and I." The Story of a Man and his Donkey, by the 1956 Nobel Prizewinner for Literature. Translated from the Spanish. (Nelson, 21s.).

Mitchell, R. J., and Leys, M. D. R.—"A History of London Life." (Longmans, 25s.)

Parkinson, C. Northcote—"Parkinson's Law, or The Pursuit of Progress." Illustrated by Osbert Lancaster. (John Murray, 12s. 6d.)

Pitt, Barrie—"Zeebrugge : St. George's Day, 1918." (Cassell, 18s.)

Rolt, L. T. C.—"Thomas Telford." A Biography. (Longmans, 25s.)

Russell of Liverpool, Lord—"The Knights of Bushido : A Short History of Japanese War Crimes." (Cassell, 18s.)

"The Dream of the Red Chamber : A Chinese Novel of the Early Ching Period." The *Hung-lou-meng*, translated from the German Version. (Routledge, 50s.)

"The Stories of Sean O'Faolain." (Rupert Hart-Davis, 21s.)

Woodrooffe, Thomas—"The Enterprise of England : An Account of her Emergence as an Oceanic Power." (Faber and Faber, 25s.)

Weissberg, Alex—"Advocate for the Dead : The Story of Joel Brand." Translated from the German. (André Deutsch, 15s.)

White, T. H.—"The Once and Future King." *The Sword in the Stone, The Queen of Air and Darkness, The Ill-Made Knight* and *The Candle in the Wind*, published in one volume. (Collins, 25s.)

United States. Conant, James B.—"Germany and Freedom : A Personal Appraisal." (Harvard University Press, $3.00)

Ferber, Edna—"Ice Palace." A Novel of Alaska. (Doubleday, New York, $4.95)

Gunther, John—"Inside Russia Today." (Harper and Bros., New York, $5.95)

Maritain, Jacques—"Reflections on America." (Charles Scribner's Sons, New York, $3.50)

Redding, Saunders—"The Lonesome Road : The Story of the Negro's Part in America." (Doubleday, New York, $5.75)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 16099 A.)**

B. INDIA. — Indian Navy. - Vice-Admiral Carlill appointed Honorary Vice-Admiral.

Vice-Admiral R. D. Katari took over as Chief of Naval Staff on April 22 from Vice-Admiral Sir Stephen Carlill, the last British officer to command the Indian Navy. It was announced in Delhi on April 20 that Sir Stephen Carlill had been appointed an Honorary Vice-Admiral in the Indian Navy —the first such appointment—in recognition of the great services rendered by him to the Indian Navy's development. (The Statesman, Calcutta) **(Prev. rep. 16015 B.)**

C. UNITED STATES. — Further Restrictions on Oil Imports. - Presidential Order.

A presidential Order of March 29 reduced the ceiling on imports of foreign crude oil outside the Pacific coast by another 14.8 per cent for April, May and June, the West Coast imports quota remaining unchanged. The Order also stipulated that contracts for Government purchases of imported crude oil or crude-oil products should contain a clause under which the oil company would promise to comply with the "voluntary" oil import programme.—(New York Herald Tribune)

(Prev. rep. 15987 B ; 15779 C.)

A. FRANCE. — Development of Saharan Resources. - First Cargo of Algerian Oil. - Concessions granted to British and U.S. Oil Companies. - Discoveries of Natural Gas and Minerals. - Project for Inland Sea in Sahara.

The first cargo of Algerian oil—15,000 tons—left Philippeville on March 4 in the tanker *Président-Mény* for the French port of Martigues-Lavera (Marseilles). A 120-mile pipeline linking the Hassi-Messaoud oilwells with the railhead at Touggourt had been completed on Dec. 3 and came into use on Dec. 30, 1957, the first trainload of oil leaving Touggourt for Philippeville on Jan. 9. Strict precautions were taken against sabotage or ambush by the Algerian insurgents, especially as a goods train using the same route had been blown up by a mine on Jan. 8 ; observation and fighter planes flew over the train taking the oil cargo to Philippeville, and armoured vehicles accompanied it on nearby roads and tracks. For security reasons the oil was not conveyed on trains consisting entirely of tank cars, and in consequence the average amount leaving Touggourt daily was only 300 tons.

Oil Deposits of the Sahara.

The first official estimates of the oil deposits in the Sahara were given by the French Ministry of Industry and Commerce on Jan. 17, 1958. The statement said (*a*) that at Hassi-Messaoud, "assuming that the nature of the rock containing oil in the area where wells have been sunk is constant, the reserves which can be recovered are of the order of 100,000,000 to 150,000,000 tons" ; (*b*) that at Edjelé the oil reserves were estimated at 30,000,000 tons. It was planned to build a permanent pipeline from Hassi-Messaoud to Bougie, on the Algerian coast (a distance of about 400 miles), and also to construct another pipeline from Edjelé and the nearby oilfield at Tiguentourine to the coast, although it had not yet been decided whether that pipeline would run through Libya or through Tunisia.

M. Lejeune, Minister for the Sahara, had said in October, 1957 that "from 1960 onwards Saharan production will account for a large part of France's oil consumption, which in 1956 reached 18,000,000 tons. It is already possible to envisage the possibility of an annual production of 14,000,000 tons in 1960—6,000,000 tons from deposits already discovered and 8,000,000 tons from the extension of these oilfields or from others not yet discovered." [The development of oil production in the Sahara on this scale would radically transform France's balance of payments, as the country's annual expenditure on foreign oil is about £200,000,000.]

Saharan Oil Concessions.

On Feb. 21 the French Government granted the right to prospect for oil over an area of 11,000 square miles in the Sahara to seven groups of companies, five of which included important British and U.S. interests. The British companies, Royal Dutch-Shell and British Petroleum, greatly expanded their investments in Algerian oil, whilst two U.S. companies, Phillips and Cities Service, acquired prospecting rights for the first time. The major U.S. oil companies had hitherto taken no part in the development of the Sahara's oil resources, as they had refused to accept the French Government's condition that French companies must maintain a majority interest in each group that was formed.

The concessions formed part of areas surrendered by two French companies, the *Compagnie Française des Pétroles d'Algérie* (C.F.P.A.) and the *Société Nationale de Recherches and d'Exploitation des Pétroles en Algérie* (S.N. Repal), on the expiry of their leases in September. Under French law concessions to explore for oil are granted for five years, at the end of which time the company must hand over half the area allocated to it for reallocation—the company being allowed to decide which part of the area it wished to retain.

The concessions were granted to the following companies :

(1) The State-controlled *Société Nationale des Pétroles d'Aquitaine*, which already exploits the Lacq natural gas deposits south of Bordeaux— 3,000 square miles.

(2) The *Société des Pétroles de Valence*, in which British Petroleum has a 50 per cent interest—1,800 square miles. [British Petroleum had previously held only a 2 per cent interest in the *Compagnie d'Exploration Pétrolière*, which received a concession in April 1957.]

(3) The *Compagnie de Recherches et d'Exploitation de Pétrole au Sahara* (C.R.E.P.S.), in which the French Government holds 51 per cent and Royal Dutch-Shell 35 per cent of the shares—1,000 square miles. The C.R.E.P.S. already holds prospecting rights over 60,000 square miles, and in 1956 made the first discoveries of oil in the Sahara at Edjelé and Tiguentourine.

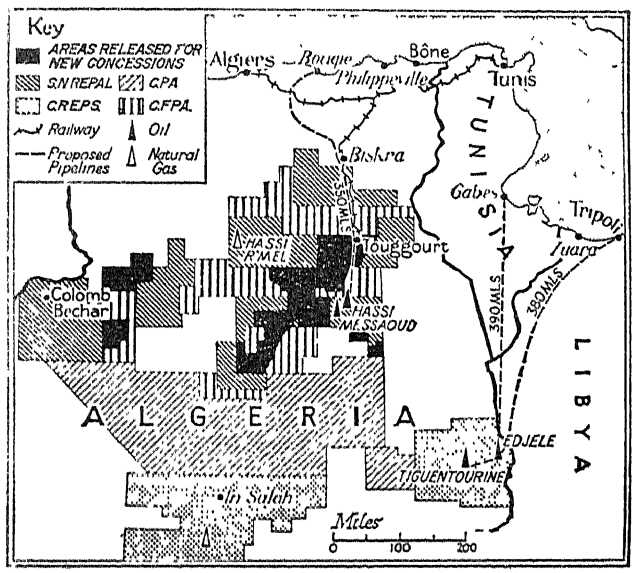
(4) The *Compagnie des Pétroles d'Algérie* (C.P.A.), in which Royal-Dutch Shell has a 65 per cent and the French Government a 24 per cent interest—1,000 square miles. The C.P.A. has a concession of 60,000 square miles in the southern Sahara, where it has been prospecting without success.

(5) A Franco-American group including Phillips Petroleum France (the French subsidiary of the Phillips company) and two French companies, France-Afrique and Omnium.

(6) Another Franco-American group including Afropec (the French subsidiary of Cities Service) and two French industrial and finance groups, Prepa and Francarep.

(7) Petrosarep, a subsidiary of Petrofrance.

In addition to the C.R.E.P.S. and C.P.A., three other main groups are prospecting for oil in the Sahara : (1) The C.F.P.A., 35 per cent of whose shares are held by the *Compagnie Française des Pétroles* (in which the French Government has a 35 per cent interest), holds a concession of 50,000 square miles. (2) The S.N. Repal, in which the Algerian Government has a 50 per cent and the French Government a 48 per cent interest, has prospecting rights over 75,000 square miles These two companies discovered the Hassi-Messaoud oilfield during a joint exploration programme. (3) The *Société Française de Recherches et d'Exploitation du Pétrole*, in which the French Government has a 65 per cent interest, has prospecting rights over 25,000 square miles in the Tindouf area, on the Moroccan border. No oil has so far been discovered in this area.



Oil Concessions in the Sahara. (*Economist*)

Sale of "Oil Certificates" to Private Investors.

The French Government issued a decree on Sept. 21, 1957, laying down the terms under which the State would issue for sale to private investors negotiable certificates representing the Government's own shares in companies prospecting for and producing oil in France and the Sahara.

The decree provided that the certificates would carry the same rights as the shares against which they were issued, entitling the purchasers to dividends on the shares, the proceeds of the shares in case of liquidation, and rights or new shares allocated to existing shareholders in the case of an increase of capital, etc., except that the voting rights in the oil companies would remain vested in the Government. Similar certificates could be issued by specially authorized public bodies or private companies holding participations in oil-prospecting or producing companies.

The actual issue of the certificates would be in the hands of the *Caisse des Dépôts et Consignations* or other institutions which had been specially designated by the Government. The proceeds of the sale of the certificates would be paid into a special Treasury account to be used exclusively for the financing of oil development plans, with special priority in each case for the programme of that company against whose shares the particular certificates had been issued. Such shares could not be disposed of by the holder (i.e. the State or other public or private body) until the certificates issued against them had been returned to the issuing house.

The Government's shares, the value of which was estimated at nearly 100,000,000,000 francs, were expected to be put on the market gradually. The first sale of "oil certificates" against shareholdings of the Government in two leading French oil companies opened on Oct. 7, 1957. The offer referred to (*a*) 1,000,000 certificates each representing one-quarter of a share of the *Compagnie Française des Pétroles* ; (*b*) 320,000 certificates each representing one share of the *Société Nationale des Pétroles d'Aquitaine* belonging to the *Bureau de Recherches du Pétrole* (a public body), The total proceeds were expected to be around 20,000,000,000 francs (about £17,000,000), which would be spent by the Government on future oil prospecting and development.

Discoveries of Natural Gas and Minerals in the Sahara.

M. Collot, chairman of S.N. Repal, announced on Sept. 18, 1957, that a natural gas deposit had been discovered at Guerrara (80 miles N.W. of Ouargla) and that other boreholes would be drilled for oil in this area. This was the first deposit of petroleum gas found in this part of the Sahara.

Prospectors from the Algerian Mineral Research Bureau were reported on Jan. 9, 1958, to have discovered a large industrial diamond and five smaller diamonds in river deposits in the Hoggar *massif* (900 miles south of Algiers). Two platinum nuggets weighing 1,260 and 500 milligrams were dug up in the same area in January, and considerable traces of nickel, copper, and asbestos were also discovered.

First Meeting of Joint Organization for the Sahara.

The High Commission of the Joint Organization for the Sahara (O.C.R.S.), whose objects are officially described as "to define and co-ordinate the Organization's programmes for joint action and to control their application," met for the first time in Paris on Jan, 21-23, 1958. The Commission consists of eight representatives of the National Assembly, four of the Council of the Republic, two of the Assembly of the French Union, two of the Economic Council, five of the Oases department of Algeria, three of the Saoura department, and two each from Mauritania, Niger, the French Sudan, and Chad.

M. Marius Moutet (a Socialist senator) was elected president of the Commission; Colonel Merred (Oases department), M. Mitterrand (the U.D.S.R. deputy), and M. Condat (a U.D.S.R. deputy, and president of the Niger Territorial Assembly) vice-presidents; and M. Cornet (an Independent Republican member of the Assembly of the French Union), M. Ahmed Mangue (Chad), and M. Charver (of the Economic Council) secretaries. The Commission also elected its permanent delegation, consisting of M. Louvel (an M.R.P. deputy) as president and representatives of the National Assembly, the Council of the Republic, the French Sudan, Mauritania, and the Oases and Saoura departments.

Project for Inland Sea in Sahara.

The setting-up of a "Technical Research Association for the Study of an Inland Sea in the Sahara" had been announced in the *Journal Officiel* on June 14, 1957. This project, which was first put forward in 1877, envisages the construction of a maritime canal about 130 miles long from the Gulf of Gabès (on the east coast of Tunisia) to the Shatt Djerid (a large salt lake on the Algerian-Tunisian border, lying below sea level) and the flooding of the whole region of salt swamps, which extends into southern Algeria. An inland sea would thus be created with an area of over 3,000 square miles and an average depth of nearly 80 feet. The objects of the scheme are to transform the climate of southern Tunisia and Algeria and make agricultural development possible by creating a large evaporating surface, and to open up a waterway which would provide an outlet to the sea for oil from Hassi-Messaoud and Edjelé and for iron and phosphates from the mines at Tebessa and Gafsa. The project would involve the shifting of 500,000,000 cubic metres of earth, or six times the amount dug for the Suez Canal, and would cost about 100,000,000,000 francs.—(Le Monde - Le Figaro - Financial Times - Economist)

A. OKINAWA.—Left-wing Gains in General Election.

Elections to the Legislature of the U.S.-occupied Ryukyu Islands (of which Okinawa is the largest), held on March 16, resulted in big gains for the left-wing parties at the expense of the conservative and pro-American Democratic Party, which had previously had a majority. Results were as follows, those of the last (1956) elections being shown in parentheses: Social Masses Party 9 (6); Democrats 7 (17); *Minren* 5 (2); Independents 8 (4).

The *Minren* (Council for the Protection of Democracy) is an alliance of left-wing Socialist organizations, including the Okinawa People's Party and the new Okinawa Socialist Party [see below]: the People's Party is alleged by the U.S. authorities to be pro-Communist, but this is denied by its leaders. Both the Social Masses Party (a right-wing Socialist organization) and the *Minren* advocate the reversion of the islands to Japanese rule, but whereas the latter demands the immediate withdrawal of the U.S. forces, the former favours the fixing of a time-limit of 10 to 20 years for the ending of the U.S. occupation. In the elections the *Minren* increased its vote from 15,000 to 81,000, whilst the Democratic vote fell from 193,000 to 81,000.

The formation of a new political party—the Okinawa Socialist Party—from former supporters of the Social Masses Party was announced on Feb. 12. The leader of the new party, Mr. Kaneshi (mayor of Naha, the capital of Okinawa), stated that it would become an integral part of the *Minren* and would eventually merge into a single organization with the People's Party. The Japanese Socialist Party recognized the Okinawa Socialist Party as part of its own organization on Feb. 25. (New York Times - New York Herald Tribune)

B. UNITED STATES. — Release of Ezra Pound.

The treason charges brought in 1945 against the American poet Ezra Pound (72) were quashed by the Federal District Court in Washington on April 18. Pound, much of whose poetry was violently anti-semitic, lived in Europe mainly in Italy for 40 years before the Second World War. He was arrested by U.S. troops in Italy for having broadcast Fascist and anti-American propaganda for the Mussolini regime. Indicted *in absentia* in 1943, he was brought to trial in 1945 but found by psychiatrists to be insane; he was accordingly committed to St. Elizabeth's hospital (the Federal mental institution), where he had been kept ever since.

The superintendent of the hospital (Dr. Winfred Overholser) presented an affidavit to the court testifying that Pound was permanently and incurably insane and would never be competent to stand trial. The affidavit was accepted by the presiding magistrate (Chief Judge Bolitha J. Laws) and Pound was accordingly released.

Dr. Overholser stated that Pound would "die insane in the hospital without trial of the charges against him if the indictment remained pending"; that there was a "strong probability" that Pound's pro-Fascist broadcasts in Italy were the result of insanity; and that it was doubtful whether any prosecution could show criminal responsibility if he were brought to trial. Further confinement could serve no therapeutic purpose and would only be "a needless expense and burden on the hospital." As Ezra Pound was not violent, his release would "not endanger the safety of other persons."

An important part in securing Pound's release was played by the well-known American poet Robert Frost, who had personally intervened with the Justice Department on Pound's behalf and headed an informal committee of literary figures seeking Pound's release. Mr. Frost admitted that Pound had been "very wrongheaded" but said that leading American writers and poets could not "bear the thought of letting Ezra Pound come to his end where he is." Among other well-known literary figures urging Pound's release were John Dos Passos, Van Wyck Brooks, Ernest Hemingway, W. H. Auden, T. S. Eliot and Archibald Macleish.

Mrs. Dorothy Pound (the wife of the poet) was appointed legal guardian of her husband, who was placed in her care after his release. It was understood that he would be allowed to live in Italy. (New York Times)

(Prev. rep. Ezra Pound, 7723 E; 7274 B.)

C. JAPAN. — Release of War Criminals.

The last 10 of the Japanese "Class A" war criminals who had been sentenced to life imprisonment by the International Military Tribunal in 1948 for conspiracy to wage aggressive war were unconditionally released on April 7. All of them had previously been released on parole, either for health reasons or on completing 10 years of their sentences (the last, General Sato, on March 31, 1956.

Of the 25 men tried before the International Tribunal, seven were condemned to death and hanged, and 16 were sentenced to life imprisonment. Those pardoned were General Sadao Araki, Marshal Shunroku Hata, Naoki Hoshino, Okinori Kaya, Marquis Koichi Kido, Admiral Takasumi Oka, General Hiroshi Oshima, Lieut.-General Kenryo Sato, Admiral Shigetaro Shimada, and Teiichi Suzuki, the other six having died in prison or since their release. Of the two other defendants at the Tokio trial, one died while serving a 20 years' sentence, whilst Mamoru Shigemitsu, who was sentenced to seven years' imprisonment, was released in 1950 and served as Foreign Minister from 1954-56. [For details of the Tokio trials see 10073 A]. Mr. Shigemitsu died on Jan. 25, 1957.

The decision to pardon the 10 war criminals was taken after consultations between the Japanese Foreign Ministry and the Governments of the U.S.A., Britain, Canada, France, the Netherlands, Australia, New Zealand, Pakistan, and the Philippines. All these countries were represented on the International Tribunal except Pakistan, which was consulted as a successor State to the former Government of undivided India. The U.S.S.R., China, and India, which had also been represented on the tribunal, were not approached as they had not signed the San Francisco Peace Treaty. Article 11 of this treaty provided that clemency might be granted to persons sentenced by the tribunal only by a decision of a majority of the Governments represented on it, and on the Japanese Government's recommendation (see 11681 A).

84 "Class B" and "C" war criminals who had been convicted by U.S. tribunals were reported on April 7 to be still held in Sugamo prison, Tokio. The last Japanese war criminal sentenced by a Netherlands tribunal had been released on Aug. 9, 1956, whilst the last 14 sentenced by Australian tribunals were freed on July 4, 1957. The Chinese Government released 1,059 war criminals in three groups during July and August, 1956.—(Japanese Embassy Press Office, London - Times - New York Times)

(Prev. rep. 14179 D.)

A. GHANA. — Political Developments.

The Earl of Listowel was sworn in as Governor-General of Ghana at a ceremony in Parliament House, Accra, on Nov. 13, 1957, in the presence of the Cabinet, members of Parliament, judges, chiefs, and ambassadors. An address of welcome to the new Governor-General was moved in the Assembly by Dr. Nkrumah and seconded by Mr. Dombo, Deputy Leader of the Opposition. In his reply, Lord Listowel appealed to the people of Ghana to make their country "a shining example not only to the people of Africa but to its neighbours in the Commonwealth and to the rest of the world."

Before leaving London on Nov. 11 Lord Listowel had expressed the opinion that Ghana had "weathered her difficulties very satisfactorily," and that recent trends were not so disturbing as many people had been led to imagine. He added that the new emergency powers sought by the Government [see below] were not unreasonable in view of the threats of violence it had had to face.

Recent internal developments in Ghana are described below under cross-headings.

Cabinet Changes.

The following Cabinet changes were announced on Oct. 31, 1957: (1) Mr. Kojo Botsio (Minister of Trade and Development) became Minister of State with responsibility for parliamentary business and co-ordination of Government policy and legislation. (2) Mr. P. K. Quaidoo (Parliamentary Secretary to the Ministry of Trade and Development) succeeded Mr. Botsio as Minister of Trade. (3) Dr. Nkrumah, the Prime Minister, took over the development functions previously exercised by the Minister of Trade and Development, together with the responsibility for industrialization policy. The ruling Convention People's Party (C.P.P.) announced on the same day that Mr. Botsio had been appointed secretary of its central committee.

Mr. Akiwumi, an Accra district magistrate, was unanimously elected Speaker of the National Assembly on Nov. 15, 1957, in succession to Sir Emmanuel Quist, who had announced his resignation.

The Emergency Powers Act. - Security Measures.

The Ghanaian Government published on Nov. 9, 1957, an Emergency Powers Bill to replace the Emergency Powers Orders-in-Council which had been continued in force for a period of 12 months after independence and were due to expire in March 1958. The main provisions of the Bill were as follows:

(1) "If the Governor-General is satisfied that a state of emergency (general, local or limited) exists he may, by proclamation, make such regulations as appear to him to be necessary or expedient for securing public safety, the defence of Ghana, the maintenance of public order, the suppression of mutiny, rebellion, and riot, and for maintaining supplies and services essential to the life of the community."

(2) The Government might make a provision in a general emergency for the detention of persons or their deportation or exclusion from Ghana, and in a local emergency for their detention or their exclusion from the emergency area. All detention, exclusion, or deportation orders must be signed by the Governor-General.

(3) In an emergency the Government might take possession or control of any property or undertaking, acquire any property other than land, and order any premises to be entered and searched.

(4) Parliament must be informed of the reasons for an emergency: within 10 days in the event of a national emergency, and as soon as practicable in the event of a local or limited emergency. Any emergency regulations would lose their effect if not approved by Parliament within 28 days. [These safeguards were not contained in the Emergency Powers Orders-in-Council.]

(5) The Governor-General was no longer empowered to suspend the Constitution or any of its provisions, or to extend the life of Parliament beyond its normal term, even during a general emergency.

Moving the second reading in the National Assembly on Dec. 2, Mr. Edusei (Minister of the Interior) said that the Bill had been introduced to deal with people who, if the opportunity arose, would resort to violence; he referred in this connexion to the recent disturbances in Ashanti, Transvolta, and Accra. Despite strong protests by the Opposition, who maintained that any disorders could be dealt with by the police through normal legal processes, the Bill passed its third reading without amendment on Dec. 12.

Mr. Kofi Baafo, the Minister of Information, had previously stated on Nov. 9 that the Cabinet did not consider it necessary to introduce special legislation authorizing local deportations, as had been proposed by Mr. Edusei [see 15760 A]. An announcement by Mr. Edusei on Dec. 11 that he hoped to introduce a Preventive Detention Bill, empowering the Government to imprison without trial any person suspected of activities prejudicial to State security, was likewise not implemented by the Government.

The Emergency Powers Act was invoked for the first time on Dec. 30, 1957, when the Government proclaimed a local state of emergency in Kumasi. The post of Zerikin Zongo (head of the local Moslem community) had been vacant since the deportation of Alhaji Lalemie in August [see 15760 A], and in the Government's view the tension between the supporters of three rival claimants to the position threatened "a serious breach of the peace." One of the claimants (Malam Mutawakilu, a former chairman of the Kumasi branch of the C.P.P.) was recognized by the Government as Zerikin Zongo on Jan. 8, but tension nevertheless continued in the city; rifle shots were fired at the regional commissioner's residence on Jan. 17 and 26, though without causing any serious damage, and 36 people were arrested on Feb. 2 in connexion with various incidents. A Government motion for the continuance of the state of emergency in Kumasi was approved by the Assembly on Feb. 19, 1958.

Deportation orders had been issued on Oct. 30, 1957, against Laremba Gao, head of the Gao community in Kumasi, and Hamidu Moshie, tribal head of the Moshie community in Nkawie (Ashanti), on the ground that they had been associated with the organization of violence. Both had entered Ghana from French Equatorial Africa, and were of French nationality. On Dec. 4 four Lebanese and Syrian businessmen were ordered to leave the country, and another Lebanese merchant (then visiting the Lebanon) was forbidden to return; official quarters stated that the deportations had no political significance but were connected with a "clean up" of trade in Ghana. Nine Africans living in Kumasi, all of whom were leading members of the Opposition United Party, were ordered to leave Ghana on April 5; some were stated to be of French and the remainder of Nigerian nationality. These deportations brought the total number of persons deported since the attainment of independence to 24.

Disturbances in Togoland. - Sentences on Togolese M.P.s.

Two Opposition M.P.s, Mr. S. G. Antor and Mr. Kojo Ayeke, were arrested on Nov. 30, 1957, on charges of conspiring to attack certain people with armed force. Both were leaders of the now defunct Togoland Congress, which agitated against the integration of British Togoland with Ghana.

The charges arose from riots which had occurred at Ho, Kpandu, and other centres in Southern Togoland during the Independence Day celebrations on March 6, 1957, when five people were killed and 23 injured. A Government statement (March 10, 1957) revealed that before the disturbances began two military training camps, together with quantities of ammunition and explosives, had been discovered in the bush by the police. In a speech at Ho on Oct. 26 Dr. Nkrumah said that special measures taken in the Ho and Kpandu districts earlier in the year could not be relaxed until the Government was "satisfied beyond all doubt that there will be no further attempt by evil men to seduce the people of this region from their peaceful and lawful pursuits."

At the trial in Accra of Mr. Antor, Mr. Ayeke, and seven other men, the prosecution alleged that the aim of the conspiracy had been to show that the integration of British Togoland with Ghana was a failure, and to persuade the U.N. to intervene. Mr. Antor and Mr. Ayeke, who were described as the organizers of the plot, were found guilty on March 11, 1958, and sentenced to six years' hard labour; of the other accused, four were sentenced to three years' imprisonment and the remaining three were acquitted. All the convicted men gave notice of appeal.

The Avoidance of Discrimination Bill.

The Assembly gave a second reading on Dec. 11, 1957, by 40 votes to seven, to the Avoidance of Discrimination Bill, which prohibited the formation of political parties on a racial, tribal, or religious basis.

The Bill laid down (1) that it would be an offence for any organization, membership of which was substantially restricted to one community or religion, to have as one of its objects exposure of any other organization or part of the community to hatred or contempt on racial or religious grounds; (2) that no organization formed for the primary benefit of any community or religion might allow the use of any name or symbol associated with that organization for political purposes; (3) that the Minister concerned might require alteration of the rules of such an organization if it discriminated as to membership by reason of race or religion.

Relations between the Government and Chiefs.

In reply to an appeal by the Joint Provincial Council (the council of chiefs of southern Ghana) to the Government to reconsider its decision to withdraw recognition of the Okyenhene of Akim Abuakwa, Dr. Nkrumah stated on Nov. 22, 1957, that it would be prepared to do so if the Okyenhene undertook not to take part in or encourage activities likely to cause unrest in his State. The Joint Provincial Council unanimously recommended on Nov. 27 that chiefs should not take part in party politics, identify themselves openly or actively with any political party, or preside at political rallies.

The terms of reference of the commission of inquiry into the administration of Akim Abuakwa, published on Nov. 6, required the commission to inquire (i) whether there had been any abuse of power by the Okyenhene and his councillors; (ii) whether chiefs had been appointed or deposed for improper reasons; (iii) details of the State Council's revenue and expenditure; (iv) whether members of the State Council and chiefs had received the emoluments to which they were entitled; and (v) whether payments had been made by the Council for improper purposes.

On Feb. 2, 1958, the Government announced its decision to create eight new States in Ashanti, to recognize the chiefs of these areas as paramount chiefs, and to withdraw recognition from two of the existing States, whose chiefs would cease to be paramount chiefs. At an emergency meeting on Feb. 17 of the Asanteman Council (the council of paramount chiefs in Ashanti), the Asantehene accused the Government of seeking to usurp his powers to elevate or reduce chiefs. A resolution was adopted denouncing the Government's action as unconstitutional, on the grounds (*a*) that under an Ordinance of 1952 the Governor should give the Council an opportunity of expressing its views before recognizing or withdrawing recognition of a person as paramount chief; and (*b*) that under the Ghana Constitution Order in Council, 1957, the office of chief, as existing by customary law and usage, was guaranteed.

An inquiry into the affairs of the Asanteman Council and the Kumasi State Council (the body of chiefs in the Kumasi area of Ashanti) was ordered by the Government on Feb. 17, 1958.

Mr. Justice Sarkodee Addo, the commissioner, was directed to inquire (i) whether there had been any abuse of power by either of the Councils; (ii) whether any financial transactions had been entered into between the Councils and political parties; and (iii) whether stool property [see below] had been dealt with improperly by the Councils or any of their officers. Allegations that Government funds voted for the development of Kumasi State had been used for Opposition propaganda had previously been made by C.P.P. supporters.

The London *Times* commented as follows (Feb. 5) on the relations between the Government and the chiefs:

"The official policy of this Government is to tolerate the chieftainship as an institution but to 'take the chief out of politics.' This is not an easily realizable objective. The chieftainship is embedded in the fabric of African society. The chief is by tradition the religious, political, and military head of his people. In the course of years these functions have been modified. The military power went with the British. The introduction of elected local government councils in 1954 deprived the chiefs of most of their direct political and administrative influence. Yet their power in some parts of the country is still great. They were . . . priest-kings, and there are still many offices vital to the life of the community which cannot be performed except by the chief in his priestly capacity. There is no private ownership of land. The chief is the trustee of the land on behalf of his people and is therefore immensely powerful in ability to allocate it and grant concessions in matters such as forestry. Most important of all, he is a perhaps indispensable link in the close-knit family and clan system which still persists in Africa in the bush and stretches out its tentacles into the towns . . . In Ashanti the system reaches even farther, for the paramount chiefs are grouped together in the Asanteman Council, which is a statutory body, and all owe their allegiance to the head of the Ashanti nation and guardian of the Golden Stool, the Asantehene.

"The present rulers in Accra pay lip-service to this system—they can hardly do otherwise. But instinctively they regard it as reactionary, obstructive, and obscurantist. Many of them are Western-trained and have been outside the influence of this traditional social fabric for many years . . . The chiefs have reacted by plunging into politics, mostly in opposition to the Government . . . A determined central Government has many opportunities of weakening the chieftainship, but the fact that the chief derives his authority from beneath, not from above, makes him a prickly opponent both practically and constitutionally."

Mr. Edusei introduced into Parliament on Dec. 4 (with the support of the Opposition) a Bill repealing an Act passed by the Legislative Council in 1921 for the banishment to Nigeria of five Africans who had been found guilty of desecrating the Golden Stool of Ashanti. [This stool, which is said to have descended from heaven, is greatly reverenced by the Ashantis, who believe that it contains the soul of their people and that their welfare is dependent on its safety]. Mr. Edusei stated that the Asantehene and his Council no longer opposed the return of the one person remaining in exile.

Municipal Elections in Kumasi.

Municipal elections held in Kumasi on Feb. 12, 1958, resulted in a victory for the C.P.P., which won 17 of the 24 seats on the municipal council. Although the C.P.P. won 20 seats in the 1954 municipal elections, 12 of its supporters on the council joined the Opposition National Liberation Movement on its formation later the same year. In the parliamentary elections of 1956 both the Kumasi seats were won by Opposition candidates.

New National Anthem.

The Government approved on March 14 a new national anthem to replace *God Save the Queen*. The words were taken from nine entries in a national competition, with additions by the panel of judges. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Lord Listowel, 15636 D; Cabinet, Relations between Government and Chiefs, 15817 A; Security Measures, 15838 A.)**

Note. The hymn written by Mr. Hector Hughes (a British Labour M.P.), referred to in 15427 A, was not intended as a definitive National Anthem for Ghana but was written specially for the Independence Day celebrations.

A. RHODESIA AND NYASALAND FEDERATION. — Immigration in 1957. - Land Settlement Schemes for British Ex-Servicemen.

The number of immigrants into the Federation of Rhodesia and Nyasaland in 1957 was 24,217, against 26,201 in 1956.

Of the 1957 total, 10,347 came from the British Isles, 10,000 from South Africa, 1,954 from other European countries, 908 from other African countries, 580 from Asia, 256 from America, and 122 from Australasia. 16,341 of the immigrants went to Southern Rhodesia, 6,801 to Northern Rhodesia, and 985 to Nyasaland.

The Parliamentary Secretary to the Federal Ministry of Home Affairs (Mr. B. D. Goldberg) visited London in September-October 1957 to discuss immigration problems with H.M. Government and Service departments and organizations. In a statement on Sept. 3 he announced that the Federation was anxious to attract Servicemen discharged because of the reorganization of the U.K. defence services, and that the Federal Government visualized three ways of helping such men: (*a*) land settlement schemes; (*b*) nomination schemes whereby residents of the Federation who had friends or relatives among ex-Servicemen could assist them to find employment; and (*c*) recruitment of men with specialist qualifications for the civil and armed services of the Federation.

A scheme whereby at least 50 "axed" British servicemen could be set up on farms in Southern Rhodesia in the first year was announced by Mr. Goldberg in London on Oct. 10. He stated that an area of some 250,000 acres, about 70 or 80 miles from Broken Hill, would be divided into farms of 2,000-3,000 acres to form a Rhodesian land settlement scheme; that both Rhodesians and British ex-servicemen would be settled there in the ratio of two Rhodesians to one British; and that the ex-servicemen would first serve for two years with an approved farmer in Southern or Northern Rhodesia. During this period of apprenticeship their pensions—supplemented by an amount paid to them by the farmer, plus accommodation—would enable them to carry on without touching the gratuity which they had brought with them; after two years they would be allocated farms of their own, sufficiently developed to grow a crop in the first year. At first they would farm a small acreage of tobacco, but could later go in for mixed farming. The minimum capital needed would be £3,000, whilst the Federation would provide another £4,000 as a long-term loan repayable over 25 years.

At a meeting in London on the same day (Oct. 10) representatives of the British South Africa Company, the Willoughbys Consolidated Co. Limited, and the London and Rhodesian Mining and Land Company expressed their willingness to make land available for the scheme. The British South Africa Company was also prepared to lend a substantial sum to assist the scheme.

In addition to his discussions in London, Mr. Goldberg also visited the Scandinavian countries, Holland, Scotland, Northern Ireland, and the Irish Republic for talks with Ministers and Government officials on immigration matters. (Federal Information Department, Salisbury) **(15565 A.)**

B. SUDAN. — American Economic Aid.

The Sudanese Council of Ministers approved on April 1 an agreement providing for U.S. economic and technical aid to the Sudan, which had been signed on the previous day by the Sudanese Foreign Minister (Mr. Mahgoub) and the U.S. Chargé d'Affaires in Khartoum. It was pointed out that similar agreements had been concluded with the U.S.A. by many other African and Asian countries—e.g. Ceylon, Egypt, Ethiopia, Ghana, India, Iraq, Libya, Morocco, Pakistan, Saudi Arabia, and Tunisia—and that the Sudanese agreement was in complete harmony with the declared policy of the Sudanese Government that it would not accept any aid likely to prejudice the country's sovereignty and independence. (Sudan Information Centre, Khartoum) **(16093 A; 15655 A.)**

C. ARGENTINA. — President Frondizi inaugurated.

Dr. Arturo Frondizi was inaugurated on May 1 as President of the Argentine Republic, and Señor Alejandro Gomez as Vice-President. President Frondizi and Vice-President Gomez will each serve for a six-year term of office.—(New York Times) **(Prev. rep. 16100 A.)**

MAY 3—10, 1958

A. UNITED STATES. — Space Exploration Research Programme. - The Moon Rocket Project. - Report and Recommendations of U.S. Scientists. - President Eisenhower's Congressional Message for Creation of Space Agency. - The Advanced Research Projects Agency.

A long-range programme of space research envisaging the exploration of the moon and the planets was recommended to the U.S. Government on March 19 by a technical panel of leading American scientists. Plans to explore space in the vicinity of the moon, by means of unmanned moon rockets, were announced by the White House and the Department of Defence on March 27 ; at the same time an " Introduction to Outer Space," drawn up by the President's Science Advisory Committee, was issued and given the widest possible publicity at the express wish of President Eisenhower. On April 2 the President sent a special message to Congress calling for the creation of a National Aeronautics and Space Agency as a matter of high priority, and urging the enactment of the necessary legislation at the earliest possible moment. These developments are described below under cross-headings.

Report and Recommendations on Outer Space Research. - Proposals for Lunar and Planetary Investigations.

The above-mentioned recommendations were contained in a report drafted by the Earth Satellite Panel of the U.S. National Committee for the International Geophysical Year, and presented to the U.S. Administration on March 19. The report fell into three main sections : (i) a description of the " crucial experiments " which would have to be carried out as a prelude to space flight ; (ii) the lunar, planetary, and interplanetary investigations to be undertaken once space flight had been mastered ; and (iii) the problems of space flight. It was envisaged that the lunar and planetary investigations would be carried out initially by unmanned vehicles and later by manned spaceships, in which connexion the report said that " ultimately there will be manned vehicles capable of landing on the moon." The report (cross-headings inserted) is summarized below :

Introduction. " The interests of human progress and our own national welfare," the report began, " demand that a long-term programme of space exploration be formulated and pursued by the United States with the utmost energy." After stating that " the basic goal of this exploration must be the quest of knowledge about our solar system and the universe beyond," the report pointed out that the scientific programme proposed had been formulated with the following ideas in mind :

" (1) Technology of space flight will probably develop gradually. Therefore, the payloads and distances travelled will be relatively small at first, and the scientific experiments and observations will be correspondingly modest in the early stages.

" (2) The scientific programme should be designed to give information at each stage which will help in the planning of later flights.

" (3) Manned space flight will occur in the course of the programme, but before this occurs certain crucial experiments must be performed which are aimed specifically at the design of a manned vehicle.

" (4) In the quest for outer space we must not lose sight of the tremendous implications to life on earth which the occupation of space will have."

Biological Experiments. - The Problem of Weightlessness. The report continued : " Biological experiments should be instituted at the earliest opportunity in the satellite programme, since they will be crucial to the eventual attainment of manned space flight. There appear to be two main areas of concern : the biological effects of prolonged exposure to the radiation in space, ranging from cosmic rays to the various solar emissions ; and the subtle and complicated effects of prolonged weightlessness.

" With regard to the first, a programme of exposure of biological samples and live animals to cosmic radiation at high altitude by balloons has been under way for some time, and at the altitudes attainable by balloons (over 100,000 feet) the cosmic radiation is essentially the same as at satellite altitudes. There are other kinds of radiation, such as solar ultra-violet and X-rays, which do not penetrate the balloon altitudes, but these can be reproduced conveniently in a laboratory. Thus the use of a satellite for study of radiation effects on biological specimens does not appear too rewarding.

" For the study of prolonged weightlessness, on the other hand, there is no known substitute for a vehicle floating freely in space. Biological specimens and live animals have been successfully flown and recovered from high-altitude rockets, having been exposed to a few minutes of weightlessness. The second Soviet satellite carried a dog, thereby lengthening the duration of the period of weightlessness *ad mortuum* . . . These first attempts to study weightlessness will have to be greatly expanded in the future.

Lunar Investigations. " One of the major justifications for launching a rocket to the moon," the report continued, " is the knowledge which would be obtained about our nearest neighbour in space . . . In this context the investigation of the moon is but a step to the investigation of the planets. There are several potentially fruitful experiments and observations on the moon, some of which could be done by impacting the moon directly, some of which could be done by a circum-lunar orbit (which would be a special kind of satellite), and some of which would require the lowering of instruments to the surface. Ultimately there will be manned vehicles capable of landing on the moon.

" The early experiments which should take priority are, in general, those which give information about the moon as a whole, rather than about the particular point of impact. These will reveal most about the processes by which it was formed, its past history, and so forth, and will be most useful in planning for subsequent experiments.

" The three quantities to be measured which pertain to the moon as a whole are the lunar gravity or mass, its magnetic field, and its atmosphere. Of these, probably the last is the only one which requires landing on the moon. A further experiment is the determination of the structure of the moon by seismic prospecting techniques—this will certainly require the landing of an instrumented package."

The report went on to suggest a number of ways in which accurate measurements could be taken of the lunar mass and gravity, the lunar magnetic field, and the lunar atmosphere. It stated in the latter connexion :

" It is customary to think of the moon as having no atmosphere at all. Astronomical observations have given no sure indication of a lunar atmosphere . . . Nevertheless, there is a possibility that enough gas is trapped in the crust of the moon so that there is a steady leakage of this gas. The heavier gases would stay on the surface for awhile, so there would be a very tenuous but constantly replenished atmosphere. A measurement of the constituents of this atmosphere would reveal information about the rate at which these gases were being released by the crust . . . It is possible to design a lightweight mass spectograph which could give an indication of both the atmospheric density and the atomic mass distribution of the lunar atmosphere . . . "

Planetary Investigations. - Entry into Planetary Atmospheres. Discussing the problems of planetary investigations, as distinct from lunar investigations, the report pointed out that " the requirements for landing an instrument package gently on to the surface of the moon are roughly equivalent in difficulty to those for placing the same weight of instruments on a collision course with Mars or Venus." Though the detailed problems to be solved were different, particularly with respect to guidance, the propulsion requirements might actually be considerably less for inter-planetary journeys than for flights to the moon. It was emphasized in this connexion that " the velocity necessary to escape from the Earth-Moon system is less than 0.01 per cent greater than the initial velocity required to reach the moon."

After stressing that one of the major problems in inter-planetary flight would be that of tracking, and making various suggestions in this connexion, the report continued : " A logical prelude to actually landing on a planet (though probably not a necessity for Mars and Venus) would be the observation of the behaviour of an instrumented ' re-entry body ' as it plunged into the planet's atmosphere. From a knowledge of its approach trajectory and a time-history of altitude, deceleration, and vehicle surface heating, the atmospheric data necessary to design subsequent entry vehicles would probably be determined . . . Present estimates indicate that the penetration of the atmosphere of Mars or Venus, given a slanting approach, would be even easier than for a satellite returning to Earth. The atmosphere on Mercury is essentially non-existent. It is for the larger outer planets that such atmospheric entry bodies or ' probes ' would be most useful."

Landing on the Planets. " Each planet is unique in its characteristics," the report continued, " and so the objectives and techniques for a landing vehicle on each planet would be different. Mercury, small and sun-scorched, poses many of the same problems as our moon. Venus and Mars, the most intriguing planets as well as the closest, will undoubtedly merit attention first, and the problems associated with placing instruments on their surfaces are so similar to placing instruments on our earth's surface that development of landing schemes and experiments should be fairly straightforward, once the guidance and propulsion problems have been overcome.

" The large outer planets [Jupiter, Saturn, Uranus, and Neptune] are entirely different from the inner planets, and there may be no such thing as ' landing ' on their inner cores, which very possibly are nowhere solid but may consist of a liquid centre merging with a deep gaseous envelope. One might, instead, design a vehicle which would enter the atmosphere of such a planet and then settle to a certain density level where it would float, like an inextensible balloon. As for Pluto [the outermost planet of the solar system], we can only guess what its atmosphere and surface are like.

" Restricting the discussion to Venus and Mars, the significance of obtaining observations on the surfaces of these two planets is too obvious to require emphasis. Moreover, the number of things which one would wish to find out about these sister planets is overwhelming. The most compelling question is undoubtedly : what forms of life, if any, do they have ?

" For the purpose of paving the way for subsequent landings on these two planets by manned spaceships, the following are probably the most important features to be determined :

(1) Atmospheric density and composition near the surface.

(2) The range of atmospheric temperatures and winds near the surface.

(3) Terrain features such as mountains, valleys, snow fields and, at least in the case of Venus, possible rivers and seas. It must be remembered that the surface of Venus is unobservable in the visible or infra-red, due to the continuous cloud check, so one must land to explore its surface and fly over it at relatively low altitude to map it by radar. Mars could probably be roughly mapped by aerial reconnaissance without having to penetrate its atmosphere, but it might be impossible to identify some features without a closer look.

(4) Surface composition. One would expect the surfaces of these planets to be infinitely varied, as is the surface of the earth. Still, one would learn a great deal about the conditions to be encountered on landing if one had previous knowledge of the chemical composition of some representative soils, their hardness and depth, their moisture content, etc."

Manned Space Flight. The report concluded: "Although it is impossible to predict how quickly man will follow his exploring instruments into outer space, the inevitable culmination of his efforts will be manned space flight and his landing on the nearer planets. It is clear that he can develop the ability to do this, and it is hard to conceive of mankind stopping short when such a tempting goal is within reach.

"The attainment of manned space flight, however, cannot now be very clearly justified on purely rational grounds. It is possible, at least in principle, to design equipment which will do all the sensing needed to explore space and the planets. Mobile vehicles could be designed to land and crawl across the face of these distant worlds, measuring, touching, looking, listening, and reporting back to earth all the impressions gained. They could be remotely controlled, and so could act like hands, eyes, and ears for the operator on earth. Moreover, such robots could be abandoned without a qualm when they ran out of fuel or broke down.

"Though all this could be done in principle there may be a point at which the complexity of the machine to do the job becomes intolerable, and a man is found to be more efficient, more reliable, and above all more resourceful when unexpected obstacles arise. It is, in a sense, an article of faith that man will be required to do the job of cosmic exploration personally—and furthermore, that he will want to do the job himself, whether required to or not.

"With man's first venture into outer space, a new programme of research and exploration will begin. The programme described above will therefore be the prelude to the drama to follow."

The chairman of the committee which drew up the report was Dr. Richard W. Porter (45), an authority on electronics and a key figure in the U.S. earth satellite project. Dr. Porter, a former president of the American Rocket Society, is electronics consultant to the General Electric Company, for whom he developed and designed the first military and commercial applications of amplidyne generators (devices for regulating and controlling electrical power).

The Moon Rocket Programme.

It was announced at the White House on March 27 that President Eisenhower had approved "several projects for launching a number of small unmanned space vehicles," to be carried out by the new Advanced Research Projects Agency of the Defence Department [see below]. The announcement stated (1) that the programmes would include "both scientific earth satellites and efforts to develop our capability of exploring space in the vicinity of the moon"; (2) that the moon projects would be known as "lunar probes," on which preparatory work had been "proceeding for some time"; (3) that, since numerous test launchings would probably be required for the lunar programme, "it is not intended to offer a timetable for the successful accomplishment of these undertakings or to speculate on probable dates." The Defence Department was asked to co-ordinate its activities with the National Advisory Committee for Aeronautics, the National Academy of Sciences, and the National Science Foundation in carrying out these projects.

The Secretary of Defence (Mr. McElroy) announced on the same day that an initial allocation of $8,000,000 had already been made by the Advanced Research Projects Agency so that the agencies concerned could begin work on the moon project. Mr. McElroy disclosed (1) that the Army Ballistic Missile Agency (at Huntsville, Alabama) had been given authority to undertake one, and possibly two, lunar probes, in which modified *Jupiter-C* rockets would be used; (2) that a programme for three lunar probes had been assigned to the Air Force Ballistic Missile Division (at Los Angeles), which would use "a *Thor-Vanguard* system and a third stage to be developed"; and (3) that the Naval Ordnance Test Station (at China Lake, California) had been ordered to develop "a mechanical ground scanning system for use in lunar probes."

Dr. Herbert York, Chief Scientist of the Advanced Projects Research Agency, disclosed at the same time that "much groundwork has been done on these projects" during the past few months; he added that the three military agencies mentioned by the Secretary of Defence were "thus not starting from scratch."

Report of President Eisenhower's Science Advisory Committee. - "Introduction to Outer Space."

A 4,000-word statement entitled *Introduction to Outer Space*, drawn up by the President's Science Advisory Committee headed by Dr. Killian, was published on March 26 on the instructions of President Eisenhower. The President emphasized that it was "not science fiction" but "a sober, realistic presentation by leading scientists" of the problems of the space age, written in non-technical language. After saying that he had found the report "so informative and interesting that I wish to share it with the people of America and indeed with all the people of the earth," President Eisenhower expressed the hope that it would be "widely disseminated by all news media."

The 18 authors of the report included the following eminent scientists in addition to Dr. Killian: Dr. Robert F. Bacher, Professor of Physics, California Institute of Technology; Dr. Hans A. Bethe, Professor of Physics, Cornell University; Dr. Detlev W. Bronk, president of the National Academy of Sciences; Dr. George B. Kistiakovsky, Professor of Chemistry, Harvard University; Dr. Edward M. Purcell, Professor of Physics at Harvard, and Nobel prizewinner; Dr. Isidor Rabi, Professor of Physics, Columbia University, and Nobel prizewinner; Dr. Jerome B. Wiesner, director, Electronics Research Laboratory, Massachusetts Institute of Technology; Dr. Herbert York, Chief Scientist, Advanced Research Projects Agency; and Dr. Jerrold R. Zacharias, Professor of Physics, Massachusetts Institute of Technology.

It was stated in *Introduction to Outer Space* that manned expeditions to the moon and the nearer planets "might come within one or two decades" or not until the 21st century, depending on "how rapidly we want to expand and accelerate our programme." The report is summarized below, with cross-headings inserted:

Objectives of Space Flight. It was stated that the report sought to provide "brief and introductory answers" to the questions: "What are the principal reasons for undertaking a national space programme? What can we expect to gain from space science and exploration?" In this connexion four factors had to be distinguished "which give importance, urgency, and inevitability to the advancement of space technology," as follows:

"The first of these factors is the compelling urge of man to explore and discover; the thrust of curiosity that leads men to try to go where no-one has been before. Most of the surface of the earth has been explored, and men now turn to the exploration of outer space as their next objective.

"Second, there is the defence objective. We wish to be sure that space is not used to endanger our security. If space is to be used for military purposes, we must be prepared to use space to defend ourselves.

"Third, there is the factor of national prestige. To be strong and bold in space technology will enhance the prestige of the United States among the peoples of the world and create added confidence in our scientific, technological, industrial, and military strength.

"Fourth, space technology affords new opportunities for scientific observation and experiment which will add to our knowledge and understanding of the earth, the solar system, and the universe."

Basic Laws of Space Flight. In simple and non-technical language, the report went on to describe the basic scientific laws of space flight. "While they have been well known to scientists ever since Newton," it stated, "they may still seem a little puzzling and unreal to many of us; our children, however, will understand them quite well." The following description was given:

"We all know that the harder you throw a stone, the farther it will travel before falling to earth. If you could imagine your strength so fantastically multiplied that you could throw a stone at a speed of 15,000 m.p.h., it would travel a great distance; in fact, easily cross the Atlantic Ocean before the earth's gravity pulled it down. Now imagine being able to throw the stone a little faster, say about 18,000 m.p.h., what would happen then?

"The stone would again cross the ocean, but this time it would travel . . . so far that it would overshoot the earth, so to speak, and keep falling until it was back where it started. Since in this imaginary example there is no atmospheric resistance to slow the stone down, it would still be travelling at its original speed, 18,000 m.p.h., when it got back to its starting point. So around the earth it goes again. From the stone's point of view, it is continuously falling, except that its very slight downward arc exactly matches the curvature of the earth, and so it stays aloft—or as the scientist would say, 'in orbit'—indefinitely.

"Since the earth has an atmosphere, neither stones nor satellites can be sent whizzing round the earth at tree-top level. Satellites must first be lifted beyond the reach of atmospheric resistance. It is absence of atmospheric resistance plus speed that makes the satellite possible. It may seem odd that weight or mass has nothing to do with a satellite's orbit. If a feather were released from a ten-ton satellite, the two would stay together, following the same path in the airless void. There is, however, a slight vestige of atmosphere even a few hundred miles above the earth, and its resistance will cause the feather to spiral inward toward the earth sooner than the satellite.

"It is atmospheric resistance, however slight, that has set limits on the life of all satellites launched to date. Beyond a few hundred miles the remaining trace of atmosphere fades away so rapidly that tomorrow's satellites should stay aloft thousands of years, and, perhaps, indefinitely. The higher the satellite, incidentally, the less speed it needs to stay in orbit once it gets there (thus, the moon's speed is only a little more than 2,000 m.p.h.), but to launch a satellite toward a more distant orbit requires a higher initial speed and greater expenditure of energy.

"Rocket engineers rate rockets not in horsepower but in thrust. Thrust is just another name for push, and it is expressed in pounds of force. The rocket gets its thrust or push by exhausting material backward. It is this thrust that lifts the rocket off the earth and accelerates it, making it move faster and faster.

"As everyone knows, it is more difficult to accelerate an automobile than a baby carriage. To place satellites weighing 1,000 to 2,000 lb. in orbit requires a first-stage rocket engine, or engines, having a thrust in the neighbourhood of 200,000 to 400,000 lb. Rocket engines able to supply this thrust have been under development for some time. For launching a satellite, or other space vehicle, the rocket engineer divides his rockets into two, three, or more stages, which can be dropped one after the other in flight, thus reducing the total weight that must be accelerated to the final velocity desired.

"To launch some of the present satellites has required rockets weighing up to 1,000 times the weight of the satellite itself. But it will be possible to reduce take-off weights until they are only 50 to 100 times that of the satellite. The rocket's high ratio of gross weight to payload follows from a fundamental limitation in the exhaust velocities that can be achieved by chemical propellants.

"If we want to send up not a satellite but a device that will reach the moon, we need a larger rocket relative to its payload in order that the final stage can be accelerated to about 25,000 m.p.h. This speed, called the 'escape velocity,' is the speed with which a projectile must be thrown to escape altogether from the gravitational pull of the earth. If a rocket fired at the moon is to use as little fuel as possible, it must attain escape velocity very near the beginning of its trip. After this, peak speed is reached; the rocket will be gradually slowed down by the earth's pull, but it will still move fast enough to reach the moon in two or three days.

Lunar Exploration. "Moon exploration will involve three distinct levels of difficulty. The first would be a simple shot at the moon, ending either in a 'hard' landing or a circling of the moon. Next in difficulty would be a 'soft' landing. And most difficult of all would be a 'soft' landing followed by a safe return to earth.

"The payload for a simple moon shot might be a small instrument-carrier similar to a satellite. For the more difficult 'soft' landing, the carrier would have to include, as part of its payload, a 'retro-rocket' (a decelerating rocket) to provide braking action, since the moon has no atmosphere that could serve as a cushion.

"To carry out the most difficult feat, a round-trip to the moon, will require that the initial payload include not only 'retro-rockets' but rockets to take off again from the moon. Equipment will also be required aboard to get the payload through the atmosphere and safely back to earth. To land a man on the moon and get him home safely again will require a very big rocket engine indeed one with a thrust in the neighbourhood of one or two million pounds. While nuclear power may prove superior to chemical fuels in engines of multi-million-pound thrust, even the atom will provide no short cut to space exploration.

"Sending a small instrument-carrier to Mars, although not requiring much more initial propulsion than a simple moon shot, would take a much longer travel time (eight months or more), and the problems of navigation and guidance are formidable.

"Fortunately, the exploration of the moon and near-by planets need not be held up for lack of rocket engines big enough to send men and instrument-carriers out into space and home again. Much that scientists wish to learn from satellites and space voyages into the solar system can be gathered by instruments and transmitted back to earth. This transmission, it turns out, is relatively easy with today's tiny electronic equipment.

"For example, a transmitter with a power of one or two watts can easily radio information from the Moon to the Earth. And messages from Mars, on the average some 50 million to 100 million miles away at the time the rocket would arrive, can be transmitted to Earth with less power than that used by most commercial broadcasting stations. In some ways, indeed, it appears that it will be easier to send a clear radio message between Mars and the Earth than between New York and Tokio.

Financial Considerations. "This all leads up to an important point about space exploration. The cost of transporting men and material through space will be extremely high, but the cost and difficulty of sending information through space will be comparatively low.

"Since rocket-power plants for space exploration are already in existence, or being developed for military needs, the cost of additional scientific research, using these rockets, need not be exorbitant. Still, the cost will not be small either. This raises an important question that scientists and the general public (which will pay the bill) must both face. Since there are still so many unanswered scientific questions and problems all around us on Earth, why should we start asking new questions and seeking out new problems in space? How can the results possibly justify the cost?

"Scientific research, of course, has never been amenable to rigorous cost accounting in advance. Nor, for that matter, has exploration of any sort. But if we have learned one lesson, it is that research and exploration have a remarkable way of paying off—quite apart from the fact that they demonstrate that man is alive and insatiably curious. And we all feel richer for knowing what explorers and scientists have learned about the universe in which we live.

"It is in these terms that we must measure the value of launching satellites and sending rockets into space. These ventures may have practical utility, some of which will be noted later.

Scientific Uses of Earth Satellites. "A satellite in orbit can do three things: (1) it can sample the strange new environment through which it moves; (2) it can look down and see the Earth as it has never been seen before; (3) it can look out into the universe and record information that can never reach the Earth's surface because of the intervening atmosphere.

"The satellite's immediate environment at the edge of space is empty only by earthly standards. Actually, 'empty' space is rich in energy, radiation, and fast-moving particles of great variety. Here we will be exploring the active medium, a kind of electrified plasma, dominated by the sun, through which our earth moves. Scientists have indirect evidence that there are vast systems of magnetic fields and electric currents that are connected somehow with the outward flow of charged material from the sun. These fields and currents the satellites will be able to measure for the first time. Also for the first time, the satellites will give us a detailed three-dimensional picture of the Earth's gravity and its magnetic field . . .

"There are also special questions about cosmic rays which can be settled only by detecting the rays before they shatter themselves against the earth's atmosphere. And, of course, animals carried in satellites will begin to answer the question: What is the effect of weightlessness on physiological and psychological functions? (Gravity is not felt inside a satellite because the earth's pull is precisely balanced by centrifugal force; this is just another way of saying that bodies inside a satellite behave exactly as they would inside a free falling elevator).

Meteorological Applications. "The satellite that turns its attention downward holds great promise for meteorology and the eventual improvement of weather forecasting. Present weather stations on land and sea can keep only about 10 per cent of the atmosphere under surveillance. Two or three weather satellites could make a cloud inventory of the whole globe every few hours. From this inventory meteorologists believe that they could spot large storms (including hurricanes) in their early stages and chart their direction of movement with much more accuracy than at present. Other instruments in the satellites will measure for the first time how much solar energy is falling upon the earth's atmosphere and how much is reflected and radiated back into space by clouds, oceans, the continents, and the great polar ice fields . . . With the insight gained from such studies, meteorologists hope they may improve long-range forecasting of world weather trends.

Investigation of Stellar Radiation, Radio Waves, etc. "Finally, there are the satellites that will look not just around or down, but out into space. Carrying ordinary telescopes as well as special instruments for recording X-rays, ultra-violet and other radiations, these satellites cannot fail to reveal new sights forever hidden from observers who are bound to the earth. What these sights will be, no-one can tell. But scientists know that a large part of all stellar radiation lies in the ultra-violet region of the spectrum, and this is totally blocked by the earth's atmosphere. Also blocked are other very long wave-lengths of 'light' of the kind usually referred to as 'radio waves.' Some of these get through the so-called 'radio window' in the atmosphere and can be detected by radio telescopes, but scientists would like a look at the still longer waves that cannot penetrate to earth.

"Even those light signals that now reach the earth can be recorded with brilliant new clarity by satellite telescopes. All existing photographs of the moon and the near-by planets are smeared by the same turbulence of the atmosphere that makes the stars twinkle. Up above the atmosphere the twinkling will stop and we should be able to see for the first time what Mars really looks like. And we shall want a really sharp view before launching the first rocket to Mars.

Possibility of Inter-continental Television. "Meanwhile, back on Earth, satellites will be entering into the everyday affairs of men. Not only will they be aiding the meteorologists, but they could surely—and rather quickly—be pressed into service for expanding world-wide communications, including inter-continental television.

"At present all trans-oceanic communication is by cable (which is costly to instal) or by shortwave radio (which is easily disrupted by solar storms). Television cannot practically be beamed more than a few hundred miles because the wavelengths needed to carry it will not bend around the earth and will not bounce off the region of the atmosphere known as the ionosphere. To solve this knotty problem, satellites may be the thing, for they can serve as high-flying radio relay stations. Several suitably-equipped and properly-spaced satellites would be able to receive TV signals from any point on the globe and to relay them directly—or perhaps *via* a second satellite—to any other point. Powered with solar batteries, these relay stations in space should be able to keep working for many years.

Study of the Moon. "While these satellite observations are in progress, other rockets will be striking out for the Moon with other kinds of instruments. Photographs of the back or hidden side of the Moon may prove quite unexciting, or they may reveal some spectacular new feature now unguessed. Of greater scientific interest is the question whether or not the Moon has a magnetic field. Since no-one knows for sure why the Earth has such a field, the presence or absence of one on the Moon should throw some light on the mystery.

"But what scientists would most like to learn from a close-up study of the Moon is something of its origin and history. Was it originally molten? Does it now have a fluid core, similar to the Earth's? Just what is the nature of the lunar surface? The answer to these and many other questions should shed light, directly or indirectly, on the origin and history of the Earth and the surrounding solar system.

"While the Moon is believed to be devoid of life, even the simplest and most primitive, this cannot be taken for granted. Some scientists have suggested that small particles with the properties of life—germs or spores—could exist in space and could have drifted on to the Moon. If we are to test this intriguing hypothesis we must be careful not to contaminate the Moon's surface, in the biological sense, beforehand. There are strong scientific reasons, too, for avoiding radioactive contamination of the Moon until its naturally acquired radioactivity can be measured."

Study of the Inner Planets. "The nearest planets to Earth are Mars and Venus. We know enough about Mars to suspect that it may support some form of life. To land instrument-carriers on Mars and Venus will be easier, in one respect, than achieving a 'soft' landing on the Moon. The reason is that both planets have atmospheres that can be used to cushion the final approach. These atmospheres might also be used to support balloons equipped to carry out both meteorological soundings and a general photo survey of surface features. The Venusian atmosphere consists of what appears to be a dense layer of clouds, so that its surface has never been seen at all from earth.

"Remotely-controlled scientific expeditions to the Moon and the near-by planets could absorb the energies of scientists for many decades. Since man is such an adventurous creature, there will undoubtedly come a time when he can no longer resist going out and seeing for himself. It would be foolish to try to predict today just when this moment will arrive. It might not arrive in this century, or it might come within one or two decades. So much will depend on how rapidly we want to expand and accelerate our programme. According to one rough estimate, it might require a total investment of about a couple of billion dollars, spent over a number of years, to equip ourselves to land a man on the Moon and return him safely to earth."

Military Applications of Space Technology. "The development of military rockets has provided the technological base for space exploration . . . The subject of ballistic missiles lies outside our present discussion. We ask instead, putting missiles aside, what other military applications of space technology can we see ahead?

"There are important foreseeable military uses for space vehicles. These lie, broadly speaking, in the fields of communication and reconnaissance. To this we could add meteorology, for the possible advances in meteorological science which have already been described would have military implications. The use of satellites for radio relay links has also been described, and it does not take much imagination to foresee uses of such techniques in long-range military operations.

"The reconnaissance capabilities of a satellite are due, of course, to its position high above the earth and the fact that its orbit carries it in a predictable way over much of the globe. Its disadvantage is its necessarily great distance, 200 miles or more, from the surface. A highly magnifying camera or telescope is needed to picture the earth's surface in even moderate detail. To the human eye, from 200 miles away a football stadium would be a barely distinguishable speck. A telescopic camera can do a good deal better, depending on its size and complexity. It is certainly feasible to obtain reconnaissance information with a fairly elaborate instrument—information which could be relayed back to the earth by radio.

"Much has been written about space as a future theatre of war, raising such suggestions as satellite bombers, military bases on the moon, and so on. For the most part, even the more sober proposals do not hold up well on close examination or appear to be achieveable at an early date. Granted that they will become technologically possible, most of these schemes nevertheless appear to be clumsy and ineffective ways of doing a job.

"Take one example—the satellite as a bomb-carrier. A satellite cannot simply drop a bomb. An object released from a satellite doesn't fall. So there is no special advantage in being over the target. Indeed, the only way to 'drop' a bomb directly down from a satellite is to carry out aboard the satellite a rocket-launching of the magnitude required for an inter-continental missile. A better scheme is to give the weapon to be launched from the satellite a small push, after which it would spiral in gradually. But that means launching it from a moving platform halfway around the world, with every disadvantage compared to a missile base on the ground. In short, the earth would appear to be, after all, the best weapons-carrier.

"This is only one example; each idea has to be judged on its own merits. There may well be important military applications for space vehicles which we cannot now foresee, and developments in space technology which open up quite novel possibilities . . ."

The "Space Time-table." In conclusion, the report suggested "the approximate order in which some of the scientific and technical objectives mentioned in this review may be attained." The time-table was not broken down into years but listed "various types of space investigations and goals under three broad headings - early, later, and still later," as follows:

(1) *Early* (1) Physics; (2) Geophysics; (3) Meteorology; (4) "minimal moon contact"; (5) experimental communications; (6) space physiology.

(2) *Later* (1) Astronomy; (2) extensive communications; (3) Biology; (4) scientific lunar investigations; (5) "minimal planetary contact; (6) human flight in orbit.

(3) *Still Later* – (1) automated lunar exploration; (2) automated planetary exploration; (3) human lunar exploration and return.

(4) Finally, *Much Later Still* human planetary exploration.

President Eisenhower's Request for Space Agency. - Creation of Advanced Research Projects Agency.

In a special message to Congress on April 2, President Eisenhower urged that legislation be enacted "at the earliest possible date" to set up a new civilian-controlled body—a National Aeronautics and Space Agency - which would give "high priority to an imaginative and well-conceived space programme." After stressing that the U.S.A. and the U.S.S.R. had already successfully placed a number of earth satellites in orbit, the Presidential message said that it was "now within the means of any technologically advanced nation to embark upon practical programmes for exploring outer space." Congress was therefore urged to take the necessary legislative action to ensure that the United States would "successfully meet the challenges of the space age."

President Eisenhower recommended that "aeronautical and space science activities sponsored by the United States should be conducted under the direction of a civilian agency, except for those projects primarily associated with military requirements." The proposed new agency would be appointed by the President "by and with the advice and consent of the Senate," and its members would be drawn from "Government agencies with the most direct interest in aeronautics, space science, and space technology." To ensure that military factors were considered, at least one member should be appointed from the Defence Department. The National Aeronautics and Space Agency should be given "that authority which it will need to administer successfully the new programmes under conditions that cannot now be fully foreseen." When formed, the N.A.S.A. would absorb the National Advisory Committee for Aeronautics and would co-operate with the Advanced Research Projects Agency [see below], the National Science Foundation, and the National Academy of Sciences in carrying out its tasks.

The creation of a new "outer space" agency in the Department of Defence had previously been announced on Feb. 7. Known as the Advanced Research Projects Agency (A.R.P.A.), it will have authority to devise and test outer space vehicles, rockets, and missiles and to supervise research and development in these matters. Mr. Roy W. Johnson, a vice-president of the General Electric Company, was appointed by Mr. McElroy as the first Director of the new agency.

Congressional Committees for Space Programmes.

A new bipartisan Senate committee was set up on Feb. 8 to frame legislation for outer space programmes and to consider various proposals for the administration of such programmes. Chosen by Senator Lyndon B. Johnson (the Senate majority leader) and Senator William F. Knowland (the Senate Republican leader), it includes the chairmen of six standing Senate committees among its 13 members.

The committee consists of the chairmen and senior Republican members of the Appropriations, Armed Services, Atomic Energy, Foreign Relations, Government Operations, and Interstate and Foreign Commerce Committees, except that Senator Lyndon B. Johnson (Dem.) represents the Appropriations Committee instead of its chairman, Senator Carl Hayden (Dem.). The 13th member is Senator Stuart Symington, formerly Secretary of the Air Force, Assistant Secretary of War, and chairman of the National Security Resources Board. Senator Lyndon Johnson is chairman of the committee.

A bipartisan committee on astronautics and space exploration was subsequently set up by the House of Representatives, parallel to the new Senate committee. Its chairman is Representative John W. McCormack, the House Democratic leader. (New York Times - New York Herald Tribune) **(Prev. rep. U.S. Earth Satellites, 16137 B; 16080 C; 15993 A.)**

A. NEW ZEALAND. — New Chief of Air Staff.

The N.Z. Minister of Defence, Mr. P. G. Connolly, announced on April 28 that Air Commodore M. F. Calder had been appointed Chief of Air Staff, A.O.C. Royal New Zealand Air Force, and First Member of the Air Board (with rank of air vice-marshal) from July 1, 1959, in succession to Air Vice-Marshal Kay, retiring.—(N.Z. Directorate of Information)

A. UNITED KINGDOM. — The Unemployment Situation. - Increase in Areas of Local Unemployment. - Government Statements. - Remedial Legislation.

Figures of registered unemployed in Great Britain in 1957 were slightly higher than the corresponding figures for the previous year (see 15361 A), fluctuating between 382,000 in January and 335,000 in December. The latter figure represented 1.5 per cent of the total employed population, compared with 1.2 per cent at December 1956, when the number of unemployed totalled 296,000. During the first three months of 1958, however, the unemployment figures rose sharply to 433,000 in March—the highest figure for five years, representing 2 per cent of the total employed population. Detailed figures for 1957 and the first quarter of 1958 are given below :

	Wholly unemployed (including casuals)		Temporarily stopped		
1957	Males	Females	Males	Females	Total
January 14 ..	237,454	105,035	30,281	9,835	382,605
February 11 ..	248,073	109,302	14,278	8,407	380,060
March 11	230,873	104,480	20,298	7,294	362,945
April 15	221,872	99,378	14,639	6,370	342,259
May 13	201,412	92,531	13,566	5,963	313,472
June 17	170,278	76,704	11,968	5,773	264,723
July 15	162,110	67,971	9,336	4,889	244,306
August 12 ..	181,516	76,986	4,061	3,064	265,627
September 16 ..	179,201	80,066	3,767	3,372	266,406
October 14 ..	184,162	82,868	4,693	3,499	275,222
November 11 ..	209,081	92,776	9,887	4,779	316,523
December 9 ..	224,597	94,859	10,630	5,383	335,469
1958					
January 13 ..	268,304	105,753	14,084	7,386	395,527
February 17 ..	280,876	111,944	20,656	11,071	424,547
March 17	285,372	110,355	21,609	15,735	433,071

The incidence of unemployment in the first quarter of 1958 was not spread uniformly among the geographical regions but was much greater in some areas than in others. While Scotland, Wales, Merseyside, and—in particular—Northern Ireland showed a considerable rise in unemployment, the figures for other areas showed little change or even an improvement compared with March 1957 ; e.g. in the Midlands, where the percentage of registered unemployed fell from 1.8 to 1.4 over the 12 months. The number of unfilled vacancies on the books of employment exchanges in March was 217,000, about 8,000 more than in February but 62,000 fewer than in December ; that is, there were approximately two unemployed persons for every unfilled vacancy.

In Great Britain, the highest incidence of unemployment in March 1958 was in Scotland (78,908, or 3.6 per cent, including 18,910 unemployed in Glasgow) ; Wales (34,815, or 3.7 per cent, including 3,560 in Swansea) ; and North-West England (71,142, or 2.4 per cent, including 20,482 in Liverpool). Figures for other areas were : London and South-East England, 72,272 (1.3 per cent) ; Eastern England, 24,321 (2 per cent) ; Southern England, 17,530 (1.6 per cent) ; South-West England, 26,935 (2.4 per cent) ; Midlands, 29,087 (1.4 per cent) ; North Midlands, 22,004 (1.5 per cent) ; East and West Ridings, 27,798 (1.5 per cent) ; Northern England, 28,259 (2.2 per cent).

In Northern Ireland, 50,822 people were unemployed in March (18,083 in Belfast and 4,388 in Londonderry), representing 10.7 per cent of the total labour force. In December 1957 there were 36,246 unemployed in Northern Ireland (7.6 per cent), the incidence of unemployment thus rising by over three per cent during the first three months of 1958.

The industries showing the biggest growth of unemployment during 1957 were building and contracting and the textile industries. On the other hand there was a large reduction in unemployment in the motor-vehicles and cycles industry—from 23,000 at the beginning of the year to only 2,400 in December. The only other change of importance was an increase towards the end of the year in the numbers unemployed in the iron and steel, tinplate, and steel-sheet industries, following the closing of some of the older establishments in these industries in South Wales.

Unemployment during the first quarter of 1958 was most marked in the engineering and shipbuilding industries (34,854 in March) and particularly in shipbuilding and ship-repairing, where 11,013 workers were unemployed as at March 17. The second biggest group was textiles, with 27,887 unemployed at that date.

Unemployment Position in Scotland, Wales, Northern Ireland, and Merseyside.

Apart from Northern Ireland, the biggest pockets of unemployment in the United Kingdom were in Scotland, Wales, and North-West England (particularly on Merseyside) as stated. The situation in these areas and in Northern Ireland is summarized below :

Scotland. The Scottish Council (Development and Industry) issued a statement on Feb. 17 expressing alarm at the fact that unemployment in Scotland had risen to over 70,000, and announcing that a special survey of the Scottish economy would be undertaken "as a matter of urgency." It was pointed out that 3.4 per cent of the insured population in Scotland were unemployed, in contrast with improving figures in London and South-East England. A deputation from the Scottish Council saw the Chancellor of the Exchequer and the Secretary of State for Scotland on April 30. The Minister of Labour (Mr. Iain Macleod) had previously visited Clydeside on March 14 to discuss the serious incidence of unemployment in Greenock (where 2,700 people were out of work, representing 8 per cent of the insured population), Port Glasgow, and Gourock—an area forming a single industrial unit based on shipbuilding and marine engineering.

The General Council of the Scottish T.U.C. issued a statement on April 13 calling for immediate Government action to relieve unemployment in Scotland, which was approximately 20 per cent of total unemployment in Great Britain. After noting that Mr. Macmillan had declared a few days earlier that the Government had prepared plans "which could be put into effect as and when remedial action is required" [see below], the statement said that the position in Scotland "calls for remedial action by the Government now." Only a fraction of the present increasing unemployment in Scotland was attributable to seasonal causes, and there was "ample evidence" that Scottish unemployment would continue to grow. It was pointed out that unemployment in certain parts of Scotland was much higher than the national average of 2 per cent—e.g. it was 5.2 per cent in Dundee, 8.1 in Greenock, 11.6 in Wick, 12.8 in Fraserburgh, 13.5 in Peterhead, and as high as 33 per cent in Stornoway, in the Outer Hebrides.

The Scottish T.U.C. listed five major projects which could be put in hand almost immediately and which, if proceeded with, could "change the face of Scotland's economy" : (1) location of a new steel strip mill (planned by the Iron and Steel Board) at Grangemouth ; (2) the projected atomic energy scheme at Crimond, Aberdeenshire ; (3) construction of the Forth and Tay road bridges ; (4) construction of a proposed new graving dock at Greenock ; (5) more Government-financed factory building, and special-purpose factories on amortization terms, to encourage new industries to Scotland.

Wales. The worst-hit areas in Wales were Caernarvonshire, owing to the decline in slate quarrying, and the Swansea-Llanelly area, primarily owing to the closing-down of the old steel and tinplate works at Pontardawe, Briton Ferry, and Gorseinon [see 15986 E ; 15593 A]. In Caernarvonshire, where some 3,000 workers were unemployed in March (about 9 per cent of the local labour force), two large slate quarries normally employing 2,000 men were working for only one week in four or five. In the tinplate area of South-West Wales, about 7½ per cent of workers were unemployed in the Llanelly area and 5.6 per cent in Swansea. [More than 20 old tinplate and sheet steelworks in the area have been closed down since January 1957 ; they were concentrated mainly in a small triangular area extending from Swansea, the apex, 11 miles westward to Llanelly and about the same distance east to Pontardawe. Some 9,000 workers are at present unemployed in this area.].

A committee for the relief of unemployment in Caernarvonshire was formed on Feb. 15 at a conference at Pwllheli attended by representatives of local government authorities and religious, social and cultural organizations. Mr. Goronwy Roberts (Labour M.P. for Caernarvonshire) stated at the meeting that 12 per cent of the insured population in the area were out of work—the highest average in the country. It was announced that the Minister of State for Wales (Lord Brecon) would be asked to press for a public inquiry into the scheme to build a nuclear power station on the northern coast of the Lleyn Peninsula ; proposals would also be submitted for a trading estate and a new factory.

Northern Ireland. The figure of 50,000 unemployed in March 1958—the highest for five years—represented over 10 per cent of the insured population of Northern Ireland. The N.I. Prime Minister (Lord Brookeborough) visited London on March 4 to discuss the situation with Mr. R. A. Butler and, it was understood, to urge a relaxation of the "credit squeeze" which was holding up public works programmes and housing schemes in Ulster.

On his return to Belfast, Lord Brookeborough announced that the following measures would be taken by the N.I. Government as a result of his talks in London : (i) a £60,000 programme of road-building and tree-clearing to give employment to 400 men ; (ii) a £100,000 scheme for clearing main watercourses, on which 400 men would also be employed ; (iii) the placing of contracts for new factory building costing £2,000,000. In addition, the British Government had agreed that assistance to new enterprises establishing themselves in Ulster might be increased from 25 per cent to 33⅓ per cent where the circumstances warranted. Lord Brookeborough also announced that Imperial Chemical Industries had decided (subject to market developments) to build a plant in Northern Ireland for the spinning of Terylene fibre ; this, however, would take several years to complete. It was hoped to start production in 1963-64 and to give eventual employment to at least 2,000 people.

The turbo-alternator generator factory built by the British Thomson-Houston Company at Larne (see 14622 A) was opened by the Duke of Gloucester on Oct. 24, 1957. Ancillary developments connected with the project included the building of several hundred new houses for workers, as well as new quays at Larne harbour. Over 1,500 people are at present employed, and the figure is expected to rise to over 3,000. The Larne factory is designed to produce turbo-alternators for generating electric power of 30,000 kilowatts and upwards ; it was built over two years at a cost of £8,000,000.

Merseyside. Unemployment on Merseyside stood at about 26,000 in March 1958—approximately 3¼ per cent of the local insured population, or 1½ per cent above the national average. It was attributable principally to two causes - a recession in the ship-building and ship-repairing industries, and increasing unemployment among juveniles.

Other Pockets of Unemployment. The recession in shipbuilding and ship-repairing also affected Barrow-in-Furness (4½ per cent unemployed in March), Tyneside, and Falmouth. There were nearly 1,700 unemployed in the Isle of Wight in the same month (5·6 per cent)—partly owing to discharges from the Saunders-Roe factories [see page 16020, second column], but mainly through seasonal influences.

House of Commons Debate on Unemployment.

The unemployment position was debated by the House of Commons on Feb. 24, when Mr. James Griffiths (Lab.) moved an Opposition motion expressing "concern at recent increases in local unemployment" and calling on the Government "to take appropriate action to remedy the situation." The Minister of Labour (Mr. Macleod) moved an amendment stating that "this House, while recognizing the concern felt at recent increases in local unemployment, welcomes the intention of the Government to continue the practical steps being taken to deal with pockets of unemployment in particular localities."

Mr. Macleod said that it would be "idle to deny that although most of the increase in unemployment has come from seasonal causes, some of it can be linked to Government policies." He added: "We believe these policies to be right, and therefore it is difficult for us to accept . . . the first part of the Opposition motion which suggests that these policies are wrong." The main features of the January figures were, first, that unemployment was at 1.8 per cent; this, although higher than in recent years, was only one-tenth of one per cent higher than the average for the past ten years. The second main feature was that employment remained at record levels, being higher at the end of December 1957 than in any previous December. It had to be borne in mind that January and February were the seasonal peaks of unemployment.

The February figures showed that unemployment had increased by 28,000, and the percentage to 1.9. This appeared to be a real and not a seasonal increase, and the areas which had been causing most concern were Wales and Scotland. In North-West Wales, however, the outlook was not so bleak as the figures seemed to suggest; new projects were coming forward which would provide for substantial temporary construction work, and thereafter for a permanent labour force.

It was of the first importance to consider remedies in the light of the defence situation, which in 1957 had caused probably the most drastic changes in the employment position since demobilization. Nevertheless, in the 12 months ending December 1957, unemployment in the whole of the manufacturing industries rose by only 15,000, although the numbers employed in defence fell by 150,000.

Discussing the effects of the Admiralty's decision to close down or transfer certain naval establishments [see page 16078], Mr. Macleod said that the most baffling problem was that of Greenock, where there were 3,300 unemployed, or about 8 per cent of the local insured population. It was only with the greatest reluctance that the Government had finally decided to move the torpedo experimental establishment from the town; it would not be moved until the end of 1959, however, and the Government would meanwhile do everything possible to increase employment and attract new industries to the area.

After expressing his conviction that the future level of employment was going to be very high, Mr. Macleod said that the big question for the Government was whether the time had now come to relax the economic policies on which they had embarked. Pressure on the Government was growing, and equally the time for relaxation would come; when it came, no-one would be more pleased than the Government itself. The immediate present, however, was not the most suitable time. As a result of the Government's policies, there was today a better chance of achieving price stability than at any time since the war, and it would be "worse than folly to throw that chance away."

Mr. Goronwy Roberts (Lab.) said that the counties of Caernarvonshire, Anglesey, and Merioneth would "slowly die on their feet" unless decisive action was taken. Immediate measures should be taken to revive the slate and granite industries, to introduce new industries, and to build the two nuclear power stations proposed for North Wales, irrespective of the fact that much of the area lay within the Snowdonia National Park.

Among West Country members, **Sir Harold Roper** (C.) urged the revival of the granite and slate-quarrying industries in Cornwall, while **Miss Joan Vickers** (C.) asked that more contracts should be placed in Devonport dockyard, more shipping directed to Plymouth harbour, and a start made on the projected Tamar road bridge. Among Ulster Unionist members, **Mr. Chichester-Clark** pointed out that the unemployment percentage in Northern Ireland would mean 2,400,000 unemployed in Great Britain if translated into equivalent terms; he urged the vital need for investment in Ulster if the situation was to be remedied.

The motion as amended by Mr. Macleod was carried by 309 votes to 258—a Government majority of 51.

Mr. Macmillan's Pledge against Unemployment.

In a speech at Halifax on March 31, the Prime Minister emphasized that he would do all in his power to ensure that there was no recurrence of the large-scale unemployment such as occurred between the two world wars. He said in this connexion: "If the economic climate should change, we must be ready to take the necessary remedial action. We must have indeed we already have our plans ready now to put into effect as and when they are required."

Mr. Macmillan said in the course of his speech: "It is worth noting that anyone above the age of 25 has actually lived in a period when there were 2,750,000 unemployed in this country; when 60 per cent of all workers in the shipbuilding and allied industries were out of work, and nearly 50 per cent of all workers in the iron and steel trades. The young, of course, do not remember those days. Even the middle-aged have little experience of them. But the older ones among you have not forgotten and can never forget. I am determined, as far as lies in human power, never to allow this shadow to fall again upon our country . . ."

Legislation for Alleviation of Unemployment.

Plans for helping areas suffering from a high rate of unemployment were contained in the Distribution of Industry (Industrial Finance) Bill, which was published on April 28. The legislation had been foreshadowed by the Chancellor of the Exchequer in his recent Budget speech, together with other measures to overcome "patches of severe and persistent unemployment" [see page 16117, first column].

As stated by Mr. Heathcoat Amory in the Budget speech, the Bill extended the Treasury's powers under the Distribution of Industry Act, 1945, to deal with unemployment outside the scheduled development areas. Under the 1945 Act [see 7257 A] the Treasury can make grants or loans on the recommendation of the Special Advisory Committee "to industrial undertakings in development areas which are approved by the Board of Trade as complying with the requirements of the proper distribution of industry." The new Bill extended this provision in several ways.

First, it was not limited to "industrial undertakings" as laid down in the 1945 Act; other undertakings (inside or outside the development areas) which were designed to reduce unemployment also became eligible. Secondly, the existing requirements for the proper distribution of industry as laid down by the 1945 Act were lifted "so long as the Board of Trade is satisfied that the money is required for a purpose which is likely to reduce or contribute to the reduction of the rate of unemployment in any locality in which a high rate of unemployment exists and is likely to persist."

Neither localities nor levels of unemployment were specified in the Bill, the Treasury and the Board of Trade being given discretion in making the grants and loans authorized.

The Bill received an unopposed second reading in the House of Commons on April 30.

Financial Aid for Displaced Workers.

In a statement to the House of Commons on April 25, the Minister of Labour announced the following new measures under the resettlement and training scheme for helping unemployed workers to move from areas of persistent unemployment to those with better prospects: (1) a 10 per cent increase in maintenance allowances to men and women at Government training and rehabilitation centres; (2) an increase from £2 to £10 in the grant for incidental expenses for persons who had to move from one area to another, in addition to free removal of household goods and effects as hitherto; (3) payment of half the solicitors' and agents' fees when the sale of a house was involved, subject to a total grant of £50 in respect of the transfer as a whole. Mr. Macleod stated that no fewer than 92 per cent of all persons trained in Government centres in 1957 had been placed in employment.—(Ministry of Labour Gazette - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15361 A.)**

A. ITALY. — Project for British-built Nuclear Power Plant. - Collaboration Agreement with U.K. Firm.

A seven-year "collaboration agreement" implementing the "letters of intent" of Nov. 20, 1957, with regard to the supply of a British-designed and built nuclear power station for Italy, was signed in London on May 2 by Signor Enrico Mattei, president of *AGIP Nucleare*, and Sir Claude Gibb, chairman of the Nuclear Power Plant Company. It was stated that the power station would not be built in Northern Italy, as originally envisaged, but near Latina (50 miles south of Rome) and that the cost would probably be over £20,000,000. The actual contract was expected to be signed within a few weeks, and work started in June; the completion date was given as 1962.—(Times) **(Prev. rep. 15887 C; 15950 A.)**

B. SWEDEN. — Bank Rate reduced.

The Swedish Bank Rate was reduced from 5 per cent to 4½ per cent from May 3.—(Financial Times) **(Prev. rep. 15720 C.)**

A. FRANCE. — Constitutional Reforms. - National Assembly adopts Constitutional Amendments on Votes of Confidence and Dissolution of Parliament.

A "round-table" conference of representatives of all the parties supporting M. Gaillard's Government began discussions on Dec. 3, 1957 on amendments to the French Constitution designed to increase governmental stability, under the chairmanship of M. Lecourt (Minister of Justice). Their proposals, which were approved by the Cabinet on Dec. 26, involved the following changes in four Articles of the 1946 Constitution :

Article 17 provides that deputies may propose changes in public expenditure, but may not propose increases during the Budget debate. The round-table conference proposed that deputies should be prohibited altogether from introducing Bills or amendments entailing increased expenditure or a reduction in revenue.

Articles 49 and 50 provide that a Government must resign when an absolute majority of the National Assembly votes against a Bill which the Government has made a question of confidence, or votes in favour of a motion of censure. The conference proposed that the vote should take place, not on the Government's Bill, but on a motion of censure proposed by the Opposition. Only the supporters of this motion would vote, and if they failed to obtain an absolute majority the Government's Bill would automatically be adopted.

This proposal was intended to obviate two difficulties which had led to frequent changes of Government since the war. (1) Governments had often resigned when an important measure had been defeated by a relative majority of the Assembly, although under the Constitution they were not obliged to do so. (2) Government Bills had often been defeated by a combination of Left- and Right-wing deputies voting against a measure for opposite reasons ; e.g. M. Bourgès-Maunoury's Government fell when the Communists voted with the Social Republicans and Poujadists and a section of the Independents against the *loi-cadre* for Algeria [see 15847 A]. The conference's proposals were intended to make it almost impossible for such a combination of parties to agree on a single motion of censure.

Article 51 provides that the Assembly cannot be dissolved within 18 months of an election, but that if subsequently two Governments have been defeated on confidence or censure motions within 18 months, the Government may order a dissolution. [The last Assembly was dissolved under this Article in 1955 : see 14577 A.] The conference proposed that, except in the 18 months following an election, the Assembly might be dissolved either by the Government after its defeat on a motion of censure, or by the President (acting with the approval of the Council of the Republic) if he found himself confronted with a seemingly insoluble crisis. [The President possessed the right to dissolve the Assembly under the Third Republic, but it was exercised on only one occasion.]

These proposals encountered such widespread opposition inside the Government parties especially among the Independents, who demanded that the question of constitutional reform should be linked with that of electoral reform - that the Cabinet approved on Jan. 10, 1958 a revised procedure for votes of confidence. Under this, the Opposition was required to submit a motion of censure containing the outline of an alternative programme and the name of a suggested Premier. This motion (which would be voted on in the normal way) would have to be passed by an absolute majority, and deputies who abstained or were absent without a legitimate reason would be considered to have voted for the Government.

M. Gaillard put the case for constitutional reform and for the Government's specific proposals in a speech on Jan. 12 at Confolens, his constituency near Limoges.

Since the war, M. Gaillard pointed out, the United States had had two Presidents, Britain four Prime Ministers, and Western Germany one Chancellor, whereas France had had 25 Governments. He continued : "Democracy is only inconsequence and anarchy if those who hold power by the will of the majority do not also enjoy an authority corresponding to the responsibilities which they assume. But what authority can they wield if everyone believes, when they receive it, that they have only obtained it for a moment—that they are birds of passage, as we say ? If a Minister tries to assert himself the public services procrastinate, and wait for the next crisis and his successor. In this way a technocracy is being formed which is the very opposite of the democratic spirit . . . If you know the harm being done to France's foreign policy by the precarious position of her Governments, you would demand an end to this state of affairs. This is more necessary than ever at a time when our interests and our positions abroad are being attacked, and our allies and friends are doubtful about us."

After saying that the Government's proposals on votes of confidence and censure motions were "based on two simple and obvious ideas," M. Gaillard continued : "The overthrow of a Government which has been placed in office by a majority of the deputies should be possible only by the vote of such a majority. The reform of the Constitution must compel the Opposition—or rather the contradictory Oppositions which unite for a moment to destroy a Government, and then fight all the harder next day—to set their respective programmes and counter-projects against those of the Government, and to put forward their men to carry out their policy if they get a majority . . . In these all-important divisions we want the deputies to pronounce for or against the Government, not to abstain or stay away. If they do, the abstentionists will be presumed to have voted against the motion of censure, since it is a more serious matter to overthrow a Government than to keep one in office. Thus, by means of this general obligation to vote, the Government could be overthrown only by a majority of the deputies composing the Assembly, and such a majority could be brought together only on the basis of a new programme. They would commit themselves by such a vote, whereas at present they commit themselves to nothing.

"Finally, we wish the Prime Minister's right to dissolve the Assembly—at present hemmed in by so many conditions, which are fulfilled so rarely, that he can never use it—to become more effective. We also wish the Chief of State to recover his right of calling on the electors, in the event of a prolonged and insoluble governmental crisis, to pronounce on a situation which the Assembly cannot resolve. But this reform would be incomplete if, as a result of our electoral system, no coherent majority could emerge to assume the responsibility of power . . . The Government does not want the Assembly to wait once more till the last weeks of its mandate before voting on a new electoral law which everyone now recognizes to be necessary. On the contrary, it will ask for this discussion to be linked with that on constitutional reforms." [This section of M. Gaillard's speech referred to the abortive debates on electoral reform which led to the defeat of M. Faure's Government and the dissolution of the Assembly in 1955—see 14577 A.]

When the Government's proposals were submitted on Jan. 30 to the Universal Suffrage Commission of the National Assembly, which deals with constitutional questions, M. Barrachin (Independent) criticized them as unsatisfactory and moved their rejection. He proposed that a report submitted to the Assembly on the Commission's behalf in March 1957 by its *rapporteur*, M. Paul Coste-Floret (M.R.P.), should form the basis of the forthcoming constitutional debate in the Assembly. This motion was adopted by 25 votes to 19, the majority of the Independents and Radicals voting with the Communists, Social Republicans and Poujadists in favour. M. Coste-Floret's main proposals were as follows :

Article 17. Deputies might propose changes in public expenditure, but under conditions laid down in each annual Budget Bill.

Article 50. Any motion of censure must contain the outline of an alternative programme, to which the Government might reply with a confidence motion defining its policy. Both motions would be put to the vote, but the Government would be obliged to resign only if the censure motion received an absolute majority.

The debate on constitutional reform opened on Feb. 12 and continued until Feb. 21. A new series of proposals were submitted on Feb. 18 by three ex-Premiers, M. Paul Reynaud, M. René Pleven, and M. Edgar Faure, the most important of which were as follows :

Article 49. When the Government made a Bill a question of confidence, two votes would be taken, one on the Bill and the other on the question of confidence If a relative majority of deputies refused the Government a vote of confidence, it would resign. On the other hand, if the Government received a vote of confidence but its Bill was defeated, the Bill would be referred to the Council of the Republic as if it had passed. When it returned to the Assembly for a second reading the question of confidence might again be raised, but this time only one vote would be taken.

Article 50. Abstentions would not be permitted in a division on a motion of censure. Any deputy who within a year failed, without adequate reason, to take part in two divisions on motions of confidence or of censure would be considered to have resigned his seat.

Article 51. The Assembly could not be dissolved within 18 months of a general election. Subsequently, if a Government was defeated on a motion of confidence or of censure within two years of taking office, the Assembly would be dissolved. The President of the Republic, however, might delay the signing of the dissolution decree for 20 days to enable the formation of a new Government if he considered that, because of internal or external circumstances of exceptional gravity, a dissolution would represent a danger to the nation. Nevertheless, if no new Government had been formed within the 20-day period the Assembly would be dissolved.

The Government's proposals for constitutional reforms were strongly criticized during the debate by two former Prime Ministers—M. Queuille (*Gauche Democratique*), who attacked the suggestion that a Bill should be passed without a debate or amendments because it had been made a question of confidence, and M. Reynaud (Independent), who accused the Government of wishing "to make the Assembly the vassal of the Executive." By putting the question of confidence, M. Reynaud maintained, a Government would be able to force through any legislation, whilst the conditions attached to censure motions would make it impossible to overthrow it.

The Government's proposals were defended by M. Robert Lecourt (M.R.P.), the Minister of Justice.

M. Lecourt said that political instability was not a new evil, but went back for over 50 years. Whereas before 1910 Governments lasting two or three years had not been exceptional, there had been 10 Governments between 1910-14, 16 between 1920-28, and 31, none of

which had lasted over a year, between 1928-40. He continued: "The fall of the Cabinet has become the principal institution of the régime, the number of absentees and abstentionists being such that a relative majority is sufficient. The parliamentary system is based on the alternation in power of a majority and an Opposition, but for the last 50 years the Opposition has formed a permanent majority . . . The Opposition has the easy task of saying 'no,' without being obliged to define its policies, to act constructively, or to share the responsibilities or the unpopularity of office. When a Government is overthrown by a coalition of ill-assorted Opposition groups, none of these need worry about the solution of the crisis . . . The Government's plan links up the question of confidence with a motion of censure . . . by providing that the Assembly shall be informed on the two opposing policies . . . The 1946 Constitution laid down the rule that an absolute majority is needed for the fall of a Government. That rule has been evaded; it is intolerable that 200 deputies out of 600 can overthrow the Government because 100 of their colleagues have abstained. Everyone must vote on one side or the other. As for a dissolution, it must be the last resort, not something automatic, and it must therefore be entrusted to the President of the Republic."

M. Faure (R.G.R.) said that two sorts of crises occurred. Some were serious, and even inevitable if a certain level of political tension existed. Others were "artificial crises arising from the misjudgment of a Government which asks for too many votes of confidence, or from the Assembly's bad temper, or, still more, from the frame of mind which makes us live in a perpetual pre-crisis atmosphere. We are never free from the idea that the Government is about to fall, so after a certain time the Assembly is astonished to see that the Government is still there, and the Government is even more stupefied to find itself still in office." M. Faure stressed that the proposals which he had drawn up with MM. Reynaud and Pleven sought to avoid unnecessary crises, and to change the parliamentary atmosphere by removing the instability in relations between the Assembly and the Government.

In the ensuing debate the Faure-Pleven-Reynaud proposals were strongly criticized by **M. Teitgen** (M.R.P.) and **M. Coste-Floret** (M.R.P.), both of whom attacked as unconstitutional the proposal that a Bill which had been rejected by the Assembly should be referred to the Council of the Republic.

The Assembly agreed on Feb. 21 to refer the Faure-Pleven-Reynaud proposals to its Universal Suffrage Commission, together with all the amendments to the Government's plan which had been submitted. As a result of discussions between the Cabinet, the Government parties, and the Commission, agreement was reached on the following compromise:

Article 17. Deputies would be prohibited from introducing Bills or amendments entailing increased expenditure or a reduction in revenue.

Article 49. "Debates on *interpellations* shall end with a vote on a simple Order of the Day, except if a censure motion has been submitted; such a motion will require for its adoption an absolute majority of the members of the Assembly. If a censure motion has been adopted it will involve the resignation of the Cabinet."

Article 50. "A motion of confidence can only be submitted by the Prime Minister on a Cabinet decision, and only in connexion with a debate on legislation or a debate following a statement of Government policy.

"If the Government has announced its intention to make its continuation in office dependent on the adoption or rejection of a Bill, the latter must be placed on the agenda of the National Assembly and procedural or adjournment motions will not be permissible. The debate will deal with the proposed Bill as well as with any amendments that may be moved, voting on individual clauses or amendments being reserved on the Government's demand. At the end of the debate, and within not more than 24 hours, the Prime Minister may table a confidence motion on his Government's general policy, including the Bill as approved by the Government or a request to reject any provisions of which the Government disapproves.

"If no *motion de défiance* [a new constitutional term] is submitted in opposition to the Government's confidence motion, the President of the National Assembly shall rule that the confidence voted in the Government under Article 45 [i.e. at the Prime Minister's investiture] has not been withdrawn, and that the legislative proposals in connexion with which the Government has raised the question of its continuation in office have been either adopted or rejected, whichever may be the case.

"When a confidence motion has been submitted, one or more *motions de défiance* may be introduced within 24 hours; such motions will require the signature of at least the minimum number of deputies required for a parliamentary group [i.e. of 28 members—see 15914 C] and must lay down the principles of a governmental programme.

"Each *motion de défiance* will be voted upon in its turn at the same time as the motion of confidence, and in each division the deputies will be required to vote for one of the two, abstentions not being permitted. Of the two motions, that which receives the highest number of votes will be adopted. The adoption of a motion of confidence will involve, as the case may be, either the adoption or the rejection of the legislative proposals in connexion with which the Government has raised the question of its continuation in office.

"Any deputy who has either abstained or not taken part in the vote on a confidence motion will be liable to censure unless he is absent for a legitimate reason; the President of the Assembly and the Chairman at any particular session may, however, refrain from voting at any time.

"The adoption of a *motion de défiance* by the National Assembly will involve the resignation of the Cabinet."

Article 51. "When a *motion de défiance* or a *motion de censure* has been adopted by the National Assembly within two years of the investiture of a Prime Minister, the President of the Republic will dissolve the Assembly if the Prime Minister has given notice before the vote that the adoption of the motion would be followed by a dissolution. If, however, the President considers that a dissolution would represent a danger to the nation, because of internal or external circumstances of exceptional gravity, he may decide against it.

"These provisions will not apply during the first 18 months of the life of a Legislature unless a second ministerial crisis has arisen [i.e. at least two Governments have been overthrown] within that period.

"During the last [i.e. the fifth] year of the life of a Legislature, the Cabinet may at the request of the Prime Minister propose to the President of the Republic a dissolution of the National Assembly [i.e. at any time and without any special procedure], but the President will be free to decide whether or not to accept this advice." [During the period after the first 18 months and before the fifth year of a Legislature, dissolution may therefore only take place within the procedure outlined above.]

Article 90. "Any constitutional reform Bill must be submitted to a referendum unless it has been adopted by the National Assembly at its final reading."

The Government's revised Bill incorporating the above constitutional amendments also provided (in Article 6) that they would not come into force until after a new law had been adopted regulating the voting procedure in elections to the National Assembly, and revising the Assembly's Rules.

When the Assembly resumed its debate on March 11, the new text of Article 17 was adopted by 352 votes to 165, only the Communists opposing. The proposals for the revision of Articles 49-51, however, encountered considerable criticism from M. Paul Reynaud as well as from the Communists and the Social Republicans.

M. Reynaud thought that the new provisions were not sufficiently effective. Observing that the provisions on censure motions were meant to ensure that the Communists would only be able to vote for a Communist motion and the Poujadists for a Poujadist motion, he said that in this way the Government would be able to defeat them one after the other. Deputies of the Centre, however, who neither agreed with the Government's Bill nor with the censure motions, would be forbidden to abstain. "This does not sufficiently take into account the ingenuity of deputies," M. Reynaud declared. "Agreement could easily be reached on a colourless and tasteless censure motion such as: 'The National Assembly, affirming its desire for peace and the raising of the people's living standards, regrets that the Government . . . etc.' Result: 400 votes." M. Reynaud also maintained that the proposals concerning a dissolution were insufficient; he asserted in this connexion that the only effective means of exerting pressure on the Assembly was the threat of a dissolution, and that this threat was itself a condition of governmental stability. Moreover, he objected to the proposal that a Prime Minister should warn the Assembly that a vote of censure would be followed by a dissolution, maintaining that no Prime Minister would endanger his career by threatening the Assembly.

M. Ballanger (Communist) moved that the new text of Article 49 be deleted from the Bill. The Assembly rejected this by 318 votes to 183.

M. Triboulet (Social Republican) moved that Articles 49-50 should remain in their original form, but should be preceded by the words: "Motions of confidence and of censure can be introduced only in connexion with the Government's general policy, international treaties, budgetary receipts, and total expenditure." This amendment, he claimed, would prevent Governments from abusing the procedure of votes of confidence to force legislation through the Assembly, and would also reduce the danger of ministerial crises.

M. Triboulet's amendment was adopted on March 12 by 281 votes to 210, with the support of the Social Republicans, the Communists, and a number of Independents, including M. Reynaud. M. Gaillard then announced that he would make the adoption of the remainder of the Government's Bill (i.e. the revised versions of Articles 50, 51 and 90) a question of confidence, and would also treat as a confidence question the reconsideration of the new version of Article 50 without M. Triboulet's amendment, which the Government refused to accept. The Government received this confidence vote on March 18, when 282 deputies supported the Government, 196 opposed, 16 abstained, and 70 did not take part in the voting.

Most of the Socialists and M.R.P. deputies supported the Government, as well as 73 Independents (out of 91), 24 Radicals (out of 43), 10 R.G.R., 9 *Gauche Démocratique*, 7 *Paysans d'Action Sociale*,

5 U.D.S.R.-R.D.A. (including M. Pleven and M. Mitterrand), 2 *Paysans*, and one Social Republican (M. Chaban-Delmas). The opposition comprised the majority of the Communists, *Progressistes*, and Poujadists, as well as 11 Social Republicans and 7 *Paysans*. The abstentions included 10 Radicals (among them M. Mendès-France), whilst those not taking part in the vote included members of all parties from Right to Left.

The Assembly resumed discussion of the remaining Articles of the Bill on March 21, when it adopted the modifications to Article 50 of the Constitution by 298 votes to 206, those to Article 51 by 313 votes to 202, and Article 6 of the Bill by 301 votes to 222. No further vote was required on the modifications to Article 90, as no amendments to the Government's text had been submitted. During the debate the following additional amendments were proposed :

(1) That participation in the work of an organism of the French Union, or of an International European organization, should be accepted as a legitimate reason for absence from a division on a motion of confidence. Moved by **M. Giscard d'Estaing** (Independent). Adopted by 298 votes to 206.

(2) That abstentions should be permitted in votes on a motion of confidence. Moved by **M. Ballanger** (Communist). Amendment rejected.

(3) That the President of the Republic should be empowered to dissolve the Assembly. Moved by **M. Triboulet.** Amendment rejected.

(4) That the Assembly should automatically be dissolved in the event of a governmental crisis. Moved by **M. Giscard d'Estaing.** Amendment rejected.

(5) That if two crises occurred within 18 months, or if several nominees for the Premiership failed to obtain a *vote d'investiture* during the same crisis, the President of the Republic might dissolve the Assembly. Moved by **M. Triboulet.** Amendment rejected.

(6) That the Bill should come into force only after the abrogation of the present electoral law and the adoption of a new one. Moved by **M. Auxionnaz** (Radical). Adopted by 270 votes to 263.

The Bill as a whole was passed in the early hours of March 22 by 308 votes to 206. The Socialists, the M.R.P., and the majority of the Radicals and Independents voted in favour, the Communists opposed, and the Poujadists abstained. (Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 14418 A.)**

A. SOUTHERN RHODESIA. — Sir Edgar Whitehead defeated in By-election. - Dissolution of Territorial Assembly. - Split in United Federal Party. - Mr. Garfield Todd to revive United Rhodesia Party.

Mr. J. M. Macdonald, the United Federal Party member for the Hillside constituency, resigned his seat in the Southern Rhodesia Parliament on Feb. 22 to enable Sir Edgar Whitehead (the new Prime Minister of Southern Rhodesia) to enter Parliament through a by-election. Sir Edgar Whitehead was subsequently adopted as candidate for Hillside but was defeated in the by-election on April 16, obtaining 604 votes against 691 for Mr. Jack Pain, of the Dominion Party.

A statement was issued on April 18 by the Governor of Southern Rhodesia announcing that the Territorial Parliament would be dissolved and a general election held on June 5. The statement added that the Governor had received the report of the Commission for the re-delimitation of constituencies and that its recommendations would be published on April 23.

Sir Roy Welensky (the Federal Prime Minister, and president of the United Federal Party), commenting on the Hillside by-election, said that the majority of voters "obviously believe that following the recent governmental crisis in Southern Rhodesia there should be a general election as soon as possible." He added, however, that he could see no reason why an early general election in Southern Rhodesia should mean an earlier general election in the Federation. Mr. Winston Field, the Dominion Party leader in the Federal Assembly, similarly described the by-election result as "an indication that the public accepts our contention that there should have been a general election after the Cabinet crisis in Southern Rhodesia."

Following a meeting of the United Federal Party caucus in the Territorial Assembly on April 23, it was announced that Mr. Garfield Todd—the former Prime Minister of Southern Rhodesia, and Minister of Labour and Social Welfare in Sir Edgar Whitehead's Cabinet—had left the U.F.P. and would resuscitate the United Rhodesia Party, which had been merged with the U.F.P. in 1957. It was also announced that six of Mr. Todd's supporters in the Territorial Assembly (Mr. Ben Baron, Mr. H. H. Holderness, Mr. A. D H. Lloyd, Mr. Ralph Palmer, Mr. Eric Palmer, and Mr. M. M. Buchan) had also left the U.F.P. together with Mr. Garfield Todd.

Mr. Lloyd (M.P. for Bulawayo), who acted as spokesman for the United Rhodesia Party group, said after the caucus meeting that 14 of the 22 M.P.s present had supported Sir Edgar Whitehead, six had sided with Mr. Todd, and one (Mrs. Muriel Rosin) had reserved her decision. He also said that the dissenting members had all been prepared to accept Sir Edgar as leader, but that some members of the caucus had not been prepared to accept the Todd group. The U.R.P. group accepted Mr. Todd as their leader and would fight the coming territorial election on the U.R.P.'s policies, which would be revised to bring them up to date ; actually, he pointed out, the U.R.P. had never been dissolved after the fusion with the Federal Party. Mr. Lloyd added that it was not the intention of the U.R.P. to fight the next general election, and that it stood for the fullest co-operation with the Federal Government, though from an independent point of view.

A statement signed by the seven members of the "Todd group" said that the fusion of the United Rhodesia and Federal parties as it had developed "clearly indicates the danger of the subjection of Southern Rhodesian policy to outside influences. Our record in the United Federal Party shows that we were steadfastly loyal to that party so long as it was not prepared to compromise on fundamental issues. We are now satisfied that the spirit of compromise within that party is destructive of the best interests of Southern Rhodesia."

Sir Roy Welensky announced in a press interview on April 24 that there would be no change in the U.F.P.'s policy in the Federal field following Mr. Garfield Todd's departure from the Southern Rhodesian section of the party. After saying that "we follow the policy of evolution, not revolution, that was introduced to this country by my great predecessor Lord Malvern," Sir Roy commented as follows on the split in the United Federal Party :

"In recent times we have seen the advent of a leftist movement here. I am of the opinion that it is premature in a society like ours. What these gentry ignore is that 25 years ago the African already enjoyed the benefits of a State medical scheme, which was paid for in the main by his employers and the taxpayers generally. We believe in the steady progressive advance of all our people, making certain that economic development and political progress march hand in hand. I personally strongly believe that to grant full political rights to a section of the community who are as yet incapable of making a major contribution to the economy of the country, perhaps through no fault of their own because they missed the march of civilization, is a cardinal error and will in the long run drag down the standard of living instead of raising it. I feel that if this happens you create large blocks of voters to whom the demagogue must appeal because he will promise anything."

In a further statement on April 28 Sir Roy said : "Mr. Garfield Todd was maintaining a party within a party. He had to go . . . The party defeat in Hillside was proof that although Sir Edgar Whitehead had healed the breach among the party leaders, the electorate was still against Mr. Todd."

Mr. Garfield Todd resigned from Sir Edgar Whitehead's Cabinet on April 23, his portfolios of Labour and Social Welfare being subsequently taken over by Sir George Davenport.

Proclamations dissolving the Territorial Parliament and calling a general election were published on April 24. With the breakaway of the "Todd group" and the decision of Mr. H. D. Wightwick (Independent member for Umtali) to join the Dominion Party, the state of the parties at the dissolution was : United Federal Party 17 ; United Rhodesia Party 7 ; Dominion Party 5 ; Independent Labour 1.—(Federal Information Department, Salisbury - Times - Daily Telegraph) **(Prev. rep. 16028 B ; 16008 A.)**

B. FRANCE. — Commutation of Death Sentences on German War Criminals.

The death sentences imposed in 1955 on the former S.S. general Kurt Oberg (62) and the former S.S. colonel Helmut Knochen (48) for war crimes in occupied France were commuted by President Coty on April 22 to life imprisonment with hard labour. Oberg and Knochen were found guilty in 1955 of responsibility for the execution of about 1,000 French hostages, the deportation of 114,000 French Jews, of whom all but 10,000 perished, and the deportation of 80,000 other French citizens to forced labour in Germany. Oberg was head of the Gestapo in France during the occupation, his crimes earning for him the epithet of the "butcher of Paris."

Four other Nazi war criminals previously sentenced to death also had their sentences commuted to life imprisonment at the same time : A. Fuchs (a former S.S. guard at the Struthof concentration camp), A. Heimann (former head of the Gestapo at Grenoble), and two of Heimann's assistants. (Le Monde, Paris) **(Prev. rep. 14298 A ; 14042 A.)**

C. MOROCCO. — Trade Agreement with U.S.S.R.

A trade and payments agreement between Morocco and the Soviet Union was signed in Moscow on April 19. Each country will accord the other most-favoured-nation treatment in their commercial relations, and a list of goods for delivery during the first year was also agreed providing for a considerable expansion of trade between the two countries. Soviet supplies to Morocco will consist of oil and oil products, machinery, sawn timber, chemicals, etc., while Morocco will export citrus fruits, wool, raw hides, cork, tinned fish, and other commodities to the Soviet Union.—(Le Monde, Paris)

A. SOVIET UNION - UNITED STATES. — Soviet Complaint to Security Council at U.S. Bomber Flights. - U.S. Proposal for International Arctic Inspection System. - Soviet Veto in Security Council.

The Soviet representative at the United Nations (M. Arkady Sobolev) sent a letter to the U.N. Secretary-General on April 18 asking for an immediate meeting of the Security Council to consider the taking of "urgent measures to end the flights by U.S. military aircraft carrying atomic and hydrogen bombs towards the frontiers of the Soviet Union." At a press conference in Moscow on the same day, the Soviet Foreign Minister (M. Gromyko) alleged that U.S. planes carrying A-bombs and H-bombs had "repeatedly flown across the Arctic areas in the direction of the frontiers of the U.S.S.R."

M. Gromyko alleged that such flights took place on the instructions of the U.S. Air Command "whenever the screens of American radar installations of the so-called Advance Warning System show vague shapes which American observers take for guided missiles or ballistic rockets." He went on: "Subsequent checks have shown that the reasons for these actions by American bombers have been either electronic interference or meteoric showers. American generals plead that so far U.S. aircraft have returned to their bases from half-way as soon as it has become clear that the alarm was false. But what would happen if these generals . . . did not realize in time that the meteor they were seeing was not a guided missile, and American aircraft proceeded with their mission and approached the Soviet frontier? Is it not clear that the interests of security would require instant measures on the part of the U.S.S.R. to eliminate the threat to the Soviet people? And what would happen if the Soviet Air Force acted as the American Air Force is now doing? Soviet radar screens also show meteors and electronic interference. If, in these circumstances, Soviet planes carrying atom and hydrogen bombs were to fly in the direction of the United States, the two air fleets, sighting each other somewhere over the Arctic wastes, would draw the natural conclusion that an enemy attack had indeed taken place, and mankind would find itself plunged into the vortex of an atomic war . . ."

In reply to these allegations, the U.S. State Department said that the United States would welcome a U.N. debate on the "false" charges made by the Soviet Union.

After pointing out that the U.S Air Force was maintained in a state of constant alertness to prevent any possibility of a surprise attack on the United States and the free world, the statement added: "Should there be a real alert based on a warning of a possible attack, the force would be launched under a procedure which makes certain that no Strategic Air Command plane can pass beyond proper bounds, far from the Soviet Union or its satellites, without additional unequivocal orders which can come only from the President of the United States. The procedures are in no sense provocative and could not possibly be the accidental cause of war."

The U.S. Air Force issued the following statement on the same day (April 18):

"A portion of the Strategic Air Command force is maintained on a 15-minute alert status . . . The alert force, however, cannot proceed beyond a certain established line unless it receives additional information. This additional information to proceed to the target can be given only on authority of the President. In the event that the initial alert should have been caused by other than a hostile attacking force, the aircraft automatically returns to base from the fall-safe point (a previously designated geographic point) in the absence of orders to proceed to target. As the name implies, the concept of 'fall-safe' is insurance that in the event of a communications failure no bombers will proceed to target."

The following explanation of the "fall-safe" system, referred to in the Air Force statement, was given by the *New York Times* in its issue of April 19:

"U.S. strategic bombers have been on a 15-minute alert since last November, three months after the Soviet Union announced the successful firing of an inter-continental ballistic missile. Previously . . . the alert margin had been two to six hours. That was the amount of time Air Force intelligence officers estimated that it would take for enemy aircraft to come within striking distance of the United States after being sighted on defence radar screens and by sea and air spotters. On that basis about 3,000 aircraft—many stationed at nearly a hundred overseas bases—were controlled from the Strategic Air Command headquarters at Omaha.

"The United States built a 3,000-mile electronic fence known as the Distant Early Warning System—or DEW line—across northern Alaska and Canada, on the premise that the Soviet air threat was directed over the North Pole. But the additional premise of that expensive network . . . was that the air threat consisted of Soviet jet nuclear bombers—not, for some time at least, of 5,000-mile ballistic missiles designed to hurtle hundreds of miles above the atmosphere and reach their targets in 30 minutes.

"The United States expected Soviet missile development. But when the Russians made their announcement that they had successfully fired an inter-continental missile, the Strategic Air Command prepared for a new, accelerated defence flight schedule. Last November it was officially started.

"The new programme is called Fail Safe. The name is derived from a provision that the bombers may respond to prepared signals or sightings of unidentified objects on radar. But they do not complete their missions without a second signal that can be ordered only by President Eisenhower . . .

"The centre of these operations is a vast underground establishment at Offlitt Air Force Base, Omaha, the Command's headquarters. In the main chamber of the underground base, technicians receive signals, radio and telephone reports of sightings from all over the world. Few chances are taken. In case of doubt, the signal to proceed is given to sizeable fleets of bombers to head for their targets.

"There is one major precaution. Each mission requires two signals. One signal is to proceed to a spot, possibly over the Atlantic — or over the Arctic wastes of Canada, or in the South Pacific. The second signal has never been given. That is the signal a plane crew must have before it can proceed from its first assembly point to its strategic destination. If it does not get that signal, the crew returns to its base.

"Nor can any enlisted man or junior officer mistakenly set off the second signal. For that is coded. The codes are always changed. A few high officers, under varying specifications, can complete the delicate mechanism of telephoned and radioed communications that can be set off only by the Joint Chiefs of Staff in Washington, on orders of the President."

Security Council Debate. - Withdrawal of Soviet Resolution.

The Security Council met at the request of the Soviet delegate on April 21, when M. Sobolev presented a resolution calling upon the United States "to refrain from directing its military aircraft, armed with atomic and hydrogen bombs, towards the frontiers of other States with a view to creating a threat to their security or of military demonstrations." In the course of the debate, however, it became apparent that nine of the 11 members of the Security Council would oppose the resolution the U.S.A., Great Britain, France, Canada, Japan, Colombia, Panama, Iraq, and Nationalist China. [Sweden, the 11th member, took no part in the debate.] M. Sobolev eventually withdrew his resolution after making two unsuccessful attempts to adjourn the discussion to the following day.

M. Sobolev reiterated the arguments put forward by M. Gromyko in his Moscow statement, asking *inter alia* what would happen if the U.S. aviators were "incapable of ascertaining in time that a meteor is not a guided missile, and a flight of geese not a bomber aircraft?" After describing the U.S. flights as "a direct provocation against the cause of peace," he referred to "the feeling of alarm and outrage gripping the European peoples, who consider these acts of the American Air Force as manifestations of progressive insanity." M. Sobolev declared that the "flights of American bombers are drawing the dreadful threat of atomic war upon Britishers, Frenchmen, inhabitants of Western Germany, and the peoples of all countries which are entangled in the toils of the network of military obligations to the United States, and which are permitting American atomic and rocket bases to be situated on their territory."

Mr. Cabot Lodge (U.S.A.) said that the U.S. Strategic Air Command was "the mainstay of all nations which wished to maintain their independent existence"; it could "accomplish its mission of deterrence" only if it were known it was "so trained, so equipped and so situated that it cannot be destroyed on the ground," and it was therefore "mandatory" that this high state of efficiency should be maintained "through constant practice." Denying that the flights constituted any "provocation" to the U.S.S.R., Mr. Lodge emphasized that "all these training exercises are designed to maintain the force within areas which by no stretch of the imagination could be considered provocative to the Soviet Union." He also stressed that the flights "could not possibly be the accidental cause of war," since "a procedure is followed which ensures that no aircraft can pass beyond its proper bounds, far from the Soviet Union or its satellites, without additional unequivocal orders and these orders can come only from the President of the United States personally."

Mr. Lodge laid great emphasis on the fact that the United States had been forced "reluctantly" to build up its present defence system by "the aggressive policies of the Soviet Union" and its "continued resistance to countless efforts on our part, over a period of more than ten years, to . . . settle the differences which divide us." In particular, the Soviet Union had "refused to join hands . . . in setting up a true inspection system" which would ensure that no surprise air attack could be launched in secret. Among specific examples he cited were: President Eisenhower's "open skies" proposal for mutual aerial inspection; the Western proposals in the U.N. Disarmament Sub-Committee suggesting alternative inspection systems, starting in the Arctic region; and proposals for the immediate establishment of groups of technical experts who would study the question of inspection systems.

Mr. Matsudaira (Japan), while noting Mr. Lodge's assurances, said that the Japanese Government and people "could not but view with uneasiness a situation in which bombers armed with atomic and hydrogen bombs have to make flights in time of peace." The Soviet resolution, however, did not meet the requirements of the case, since the only sure way to improve international relations

was to reach a settlement of the disarmament problem "under the aegis of the United Nations." He therefore urged a resumption of negotiations and, in particular, a meeting of the U.N. Disarmament Commission "without delay."

M. Sobolev, speaking later in the debate, maintained that the "only way" to deal with the disarmament problem was at a "summit" conference of Heads of Government. He then proposed that the discussion be adjourned until the following day to enable him to study the statements made in particular, that of Mr. Lodge "so as to give a well-founded answer." **Mr. Cabot Lodge,** as chairman of the Security Council during the current month [i.e. April], maintained that since the Soviet Union had requested the meeting on an urgent basis, the matter should be dealt with in a spirit of urgency and a vote taken on the Soviet resolution on the same day [i.e. April 21]. Although this view was supported by a majority of Council members, **M. Sobolev** formally moved an adjournment to April 22 - the motion being defeated by four votes (U.S.A., France, Colombia, and Panama) to two (U.S.S.R. and Sweden), with five abstentions (Britain, Canada, Japan, Iraq, and Nationalist China). A second attempt by Mr. Sobolev was similarly unsuccessful, the U.S.S.R. again being supported only by Sweden; Canada and Britain joined the four countries which voted against the first resolution, while Japan, Iraq, and Nationalist China abstained.

M. Sobolev thereupon withdrew his resolution as a protest against Mr. Lodge's decision to take a vote on the same day; he accused Mr. Lodge of "side-stepping free discussion" and of "a procedure which is tantamount to an attempted gag on . . . the debate." Mr. Lodge, supported by the British, French, Colombian and other members, maintained that as president of the Council he had "carried out the regular order in the democratic way," adding that "the fact of the matter is that the Soviet representative did not have the votes."

American Proposal for Arctic Inspection Zone. - Soviet Veto in Security Council.

On April 27 the U.S. delegation presented a resolution proposing the establishment of an international zone of inspection in the Arctic to safeguard against the possibility of a surprise attack. With the exception of the Soviet representative, this proposal was supported by all members of the Security Council and also by the U.N. Secretary-General, Dr. Hammarskjöld, who urged its acceptance as an important step towards the relaxation of international tension. The resolution was nevertheless defeated by the Soviet veto - the 83rd cast by the U.S.S.R. in the Security Council - when a vote was taken on May 2.

The U.S. resolution noted the growing capabilities of massed surprise attack, particularly in the Soviet Union and the United States, and recommended: "That there be promptly established the northern zone of international inspection against surprise attack, comprising the area north of the Arctic Circle with certain exceptions and additions, that was considered by the U.N. Disarmament Sub-committee during August, 1957."

The resolution asked the five members of the U.N. sub-committee (the U.S.A., U.S.S.R., Great Britain, France and Canada) together with Denmark, Norway, and any other States with territories north of the Arctic Circle who wished such territories to be included in an inspection zone, "to designate representatives to participate in immediate discussions with a view to agreeing on the technical arrangements required."

The resolution was debated in the Security Council on April 29, when it was introduced by Mr. Cabot Lodge on behalf of the U.S. Government.

Mr. Cabot Lodge explained that the proposed inspection zone covered (*a*) all territory north of the Arctic Circle under the sovereignty of the United States (i.e. Alaska), Canada, the Soviet Union, Denmark (i.e. Greenland), and Norway; (*b*) all territory of the United States, the Soviet Union and Canada west of longitude 140 degrees W., east of longitude 160 degrees E., and north of latitude 50 degrees N.; (*c*) all the remainder of the Kamchatkan peninsula; and (*d*) all the Aleutian and Kurile islands.

Mr. Lodge emphasized that the proposal was made entirely apart from the general question of disarmament, nor was it intended as a "wedge" to bring the disarmament problem before the Security Council. Although the U.S.A. was convinced that general disarmament discussions should be renewed urgently, it was nevertheless ready to go ahead with the Arctic proposal "without awaiting agreement on disarmament as a whole." After re-emphasizing that U.S. flights were necessary in present circumstances to guard against surprise attack, and noting that the U.S.S.R. had expressed similar fears, Mr. Lodge said that the best way to lessen these mutual fears was to institute inspection procedures acceptable to all parties. For geographical reasons, inspection in the Arctic area could be "at least the first line of approach to the problem of a surprise attack," and the proposed inspection zone "encompasses a principal area through which the bulk of any attack might pass." The U.S.A. believed that mutually acceptable arrangements could be devised on these or similar lines, and that the proposals afforded "a reasonable basis for a discussion which could lead to agreement."

Mr. Lodge concluded: "If we can proceed gradually, and first experiment with limited measures of aerial and ground inspection, it should facilitate the subsequent expansion of inspection. Once this limited inspection system has proved its value and begun to rebuild mutual confidence, any suspicions that ulterior motives underlie proposals for aerial inspection arrangements should be removed once and for all. We urge all members of the Council, and all countries concerned, to join in making this beginning . . . This session of the Security Council could mark the turn in the road for which humanity has been looking. . . ."

Mr. Jarring (Sweden) announced that his Government would vote for the American resolution. He submitted an amendment stating that discussions on the proposed Arctic inspection zone "might serve as a useful basis for the deliberations on the disarmament problem at a summit conference."

M. Sobolev (U.S.S.R.) described the U.S. proposal as a "diversionary manoeuvre" aimed at diverting the Security Council's attention from the Soviet complaint about U.S. bomber flights; the purpose of the American resolution, he asserted, was not to reduce tension, but "to obtain intelligence data concerning a considerable part of the territory of the Soviet Union." After declaring that the threat to peace caused by U.S. flights "still continues to loom over the world," M. Sobolev said that "the U.S. proposal to single out the question of an Arctic zone of inspection from the general problem of disarmament does not bear witness to a readiness to put an end to this dangerous playing with atomic fire, nor to a willingness to solve the problem of disarmament."

M. Sobolev objected to the proposed membership of the group of countries asked to join the Arctic inspection system, on the ground that it was "even more lopsided than the membership of the Disarmament Commission." The disarmament problem, he declared, could not be solved "by an arithmetical vote in an organization in which the majority of members are linked to each other by military pacts," but only by negotiating on a basis of equality. The only "realistic" way to tackle the disarmament question as a whole—including prevention of surprise attacks, the immediate suspension of nuclear tests, the creation of an atom-free zone in Central Europe, and the prohibition of the use of outer space for military purposes—was at a summit conference. M. Sobolev then reintroduced the Soviet resolution of April 21, together with a new clause which (*a*) noted "with satisfaction" that talks were in progress "for the purpose of calling a conference of Heads of Government to discuss a number of urgent international problems, including the problem of working out measures to prevent the danger of a surprise attack," and (*b*) expressing the hope "that this conference will be held at the earliest possible date."

Sir Pierson Dixon (U.K.) said that it would be "formalistic and unreal" to claim that no progress could be made on any disarmament question except by discussions at "summit" level. On the contrary, it would surely be encouraging to the Heads of Government if, when they met, they had before them a practical plan for international inspection in a particular part of the world. M. Sobolev's speech was "disheartening" to the prospects of progress towards a settlement, and the British Government earnestly hoped that the U.S.S.R. would support the American resolution.

Mr. Matsudaira (Japan) welcomed the U.S. resolution and said that its adoption could pave the way to agreement on other inspection systems to safeguard against surprise attack in other parts of the world. Speeches in support of the U.S. resolution were also made by **M. Georges-Picot** (France), **Mr. Ritchie** (Canada), and the Iraqi, Colombian, Panamanian, and Chinese Nationalist members.

Dr. Hammarskjöld, who spoke at the end of the debate, noted that his intervention was "most unusual" but emphasized that the U.N. Secretary-General "has not only the right but the duty to intervene when he feels that he should do so in support of the purposes of the Organization and the principles laid down in the Charter." After welcoming both the U.S. proposal for Arctic inspection and the Soviet Union's recent decision to suspend nuclear tests, Dr. Hammarskjöld declared: "Such initiatives . . . are steps which could make a dent in the disarmament problem. They might have a major impact if treated in good faith—which is not the same as to let down one's guard. And they could, if followed through, provide a first frail basis for the development of some kind of trust. . . Each Government is in close contact with the opinion of the man-in-the-street in its own country. For that reason, I am sure all Governments are in a position to confirm my statement that the peoples are eagerly and anxiously expecting leadership to bring them out of the present nightmare. The Government taking a fruitful initiative will be hailed as a benefactor by the peoples. . ."

After expressing the hope that every one of the Governments represented on the Security Council would "try the line of trust as a way out of the disintegration and decline under which we now all suffer," the Secretary-General ended: "I trust that my intervention will not be misinterpreted as a taking of sides, but merely as an expression of profound feelings which are current all over the world, and which have a right to be heard here outside the framework of government policies." [Despite this appeal, Dr. Hammarskjold's intervention was strongly criticized by *Pravda* on the ground that it allegedly constituted partiality towards the U.S. resolution.]

When the Security Council re-convened on May 2, the U.S. resolution—incorporating the Swedish amendment—received ten votes in favour and one against (U.S.S.R.) and was thus defeated by the Soviet veto. The Soviet resolution was then defeated by nine votes to one, with Sweden abstaining.—(U.N. Information Centre, London - New York Times - Soviet Embassy Press Department, London - Times)

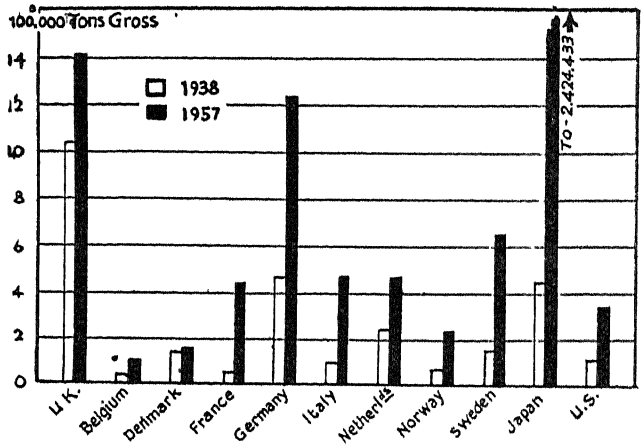
(Prev. rep. Disarmament Negotiations, 15941 A.)

A. SHIPPING. — World Launchings in 1957. - Construction in First Quarter of 1958.

Statistics published by Lloyd's Register of Shipping on Feb. 19 gave the gross tonnage of merchant ships launched throughout the world in 1957 (excluding the U.S.S.R. and China) as 8,501,404, compared with 6,670,218 tons launched in 1956. Vessels under 100 tons, barges, etc., were excluded.

The principal shipbuilding country was again Japan, which launched 2,432,561 tons (28.6 per cent of the total), followed by the United Kingdom (1,431,701 tons, or 16.63 per cent), Western Germany (1,231,152 tons, or 14.84 per cent), Sweden (660,623 tons, or 7.77 per cent), Italy (485,025 tons, or 5.71 per cent), the Netherlands (476,309 tons, or 5.60 per cent), and the United States (359,006 tons, or 4.22 per cent).

MERCHANT SHIPBUILDING 1938-1957



The chart shows the comparative tonnage of merchant shipping (figures from Lloyd's Register of Shipping) launched in the principal shipbuilding countries in the years 1938 and 1957. The Japanese figure for 1957 is too great to be accommodated on the chart. (*Manchester Guardian*)

The total included 3 ships of over 40,000 tons (all launched in Japan) and 4 of 30,000-40,000 tons (3 launched in France and 1 in Italy). Oil tankers aggregated 3,850,701 tons, of which 1,378,678 tons were launched in Japan, 535,333 tons in the U.K., 389,093 tons in the U.S.A., 248,400 tons in Western Germany, 244,534 tons in France, and 225,003 tons in Italy.

The countries for which the largest amounts of new tonnage were launched were: Liberia (1,742,503 tons), United Kingdom (1,309,937 tons), Japan (919,882 tons), Norway (910,828 tons), Western Germany (454,884 tons), the Netherlands (424,765 tons), Panama (367,477 tons), Italy (325,995 tons), the U.S.A. (319,997 tons), France (309,647 tons), Sweden (303,777 tons), and Denmark (218,996 tons).

Notable ships launched in 1957 included the liner *Pendennis Castle* (29,000 tons, see 15989 A) and the 51,000-ton tankers *Universe Commander*, *Universe Challenger*, and *Universe Admiral*, launched at the Kure shipyards (Japan) for Mr. Daniel K. Ludwig, of New York. With the *Universe Leader*, launched at Kure for Mr. Ludwig in 1956, the *Universe* ships will rank as the largest cargo ships built to date. Other large tankers launched in 1957 included the *Agrigentum* (34,000 tons) launched by the Ansaldo Company at Sestri Ponente, Genoa, and the *Oklahoma Getty*, *Minnehoma*, and *Tidewater*, (each about 33,700 tons) launched at St. Nazaire for the Tidewater Oil Company. The largest tanker launched in the U.K. during the year was the *Esso Durham* (23,500 tons), built by Vickers-Armstrong Ltd., Walker-on-Tyne, for the Esso Petroleum Company. Of ships over 20,000 gross tons launched throughout the world in 1957, all were tankers except the *Pendennis Castle* and the passenger liner *Federico C.*, launched in Italy.

Lloyd's Register shipbuilding returns for the first quarter of 1958, published on April 23, gave the gross tonnage under construction throughout the world (with the usual exceptions, as above) as 10,065,419 tons, of which 22.49 per cent was building in the United Kingdom and 77.51 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 342 of 2,263,854 tons (steamers 1,070,410 tons, motorships 1,193,444 tons), including 2 steamers of over 40,000 tons each, 3 of 30,000-40,000 tons, and 7 of 25,000-30,000 tons, and 15 steamers and 3 motorships of 20,000-25,000 tons. Of the total, 283 ships (1,897,422 tons) were building for the U.K., 19 (39,085 tons) for other British Commonwealth countries, 10 (107,400 tons) for Norway, 8 (77,623 tons) for Liberia, 3 (25,800 tons) for Belgium, 1 (19,000 tons) for Denmark, 1 (18,750 tons) for Panama, 1 (12,000 tons) for the Irish Republic, 4 (11,600 tons) for Cuba, 1 (6,100 tons) for Greece, 2 (2,700 tons) for Poland, 3 (2,054 tons) for the U.S.S.R., 1 small vessel each for Iceland and Kuwait, and 4 (43,450 tons) for unspecified countries.

The principal shipbuilding areas were: the Clyde (100 ships of 633,373 tons), the Tyne (41 ships of 421,700 tons), Belfast (17 ships of 298,490 tons), the Tees (25 ships of 277,923 tons), Sunderland (26 ships of 217,862 tons), and Liverpool (15 ships of 145,187 tons).

Ships building abroad numbered 1,390 of 7,801,565 tons (steamers, 3,378,329 tons, motorships 4,423,236 tons), divided as follows: Japan 163 (1,457,791 tons), Western Germany 254 (1,058,069 tons), Italy 100 (884,343 tons), the U.S.A. 49 (797,496 tons), the Netherlands 174 (695,364 tons), Sweden 68 (563,559 tons), France 64 (557,046 tons), Norway 72 (315,746 tons), Spain 116 (276,770 tons), Denmark 35 (235,639 tons), British Commonwealth countries 70 (224,575 tons), Finland 67 (201,841 tons), Poland 66 (168,477 tons), Belgium 18 (152,872 tons), Yugoslavia 26 (142,288 tons), Portugal 29 (50,218 tons), Turkey 9 (7,637 tons), Peru 1 (4,297 tons), and Argentina 2 (4,000 tons). In addition, 4 small vessels were building in the Irish Republic, 2 in Indonesia, and 1 in Brazil. The overall total included 2 steamers of over 40,000 tons in Japan, 1 in France, and 1 in the U.S.A.; 1 steamers of 30,000 40,000 tons in the U.S.A., and 1 each in Western Germany, Italy, Japan, and the Netherlands; and 10 steamers of 25,000-30,000 tons in Japan, 5 in the United States, 2 in Western Germany, and 1 in France.

Tankers building throughout the world numbered 363 of 5,052,802 tons, including 76 (1,069,238 tons) in the U.K., 51 (798,700 tons) in Japan, 28 (652,383 tons) in the U.S.A., 31 (556,981 tons) in Italy, 23 (361,955 tons) in Sweden, 23 (341,181 tons) in the Netherlands, 16 (296,135 tons) in France, 54 (294,944 tons) in Western Germany, and 16 (199,025 tons) in Norway.

Other recent developments in connexion with shipping and shipbuilding are summarized below:

Pacific Service by P. & O. and Orient Lines. Sir Donald Anderson, deputy-chairman of the P. and O. Line, announced in Canberra on March 17 that the company's new 45,000-ton liner (see 15989 A) the largest merchant ship to be built in the U.K. since the *Queen Elizabeth* —would be named *Canberra*. Together with the new Orient liner *Oriana* (see 15989 A), the ship would be the nucleus of a British passenger fleet (to be formed by the P. & O. and Orient companies) which would enter the north, central, and south Pacific trades under the name of "Orient and Pacific Lines." Sir Donald explained that although the two companies assumed that British emigration to Australia would continue, and would need "passenger ships to carry immigrants under the most up-to-date conditions," they considered that ships of the size and cost of the *Canberra* and *Oriana* "could not be operated at a profit on the U.K.-Australia trade alone"; they therefore "looked to obtain adequate earnings by extending voyages across the Pacific." He added that the *Canberra* would accommodate 2,250 passengers and have a speed of 27½ knots.

Japan to build Nuclear-Powered Ships. The Mitsubishi Nippon group announced on Jan. 7 that plans had been completed for an atomic tanker of 80,000 tons, powered by a pressurized water reactor, and for an atomic-powered passenger liner of 20,000 gross tons for the Japan-Brazil trade. The keels of both ships (to be built respectively at Yokohama and Kobe) would be laid shortly.

Increase in Laid-Up Tonnage. The continued rise in the amount of laid-up tonnage, both British and foreign, caused serious concern in the shipping industry during the last quarter of 1957 and the first quarter of 1958. Figures published by the Chamber of Shipping of the United Kingdom on March 28 showed that 127 British ships of 610,745 gross tons and 55 foreign ships of 356,910 gross tons were laid up on March 1 at U.K. ports "for reasons other than repair." These figures compared with 141 ships (778,703 tons) laid up on Feb. 1, 108 ships (537,814 tons) on Jan. 1, and only 16 ships (32,160 tons) laid up on Jan. 1, 1957.

The approximate amount of tonnage laid up in overseas countries was estimated as: U.S.A., at least 500,000 tons, including 29 tankers; Western Germany, 375,000 tons; Norway 266,000 tons; Denmark, 129,000 tons; Sweden, 98,000 tons; Greece, 244 ships (tonnage not available). Ten per cent of the Italian fleet was estimated to be laid up, while in France orders for 100,000 tons of new shipping had been cancelled.

The total number of ships laid up in Dutch ports on April 1 was officially given as 54, aggregating 328,000 tons, compared with only 20, aggregating 167,000 tons, laid up on Feb. 1, 1958. Of the 54 ships laid up at the beginning of April, 19 were Dutch vessels.

A Shipbuilding Conference spokesman stated on April 22 that during the first quarter of 1958 cancellations of tonnage already ordered from British shipyards exceeded in size the amount of new tonnage ordered during the quarter. No orders were booked at all for overseas shipowners; only 39 ships, aggregating 41,000 gross tons, were ordered by British owners; whilst orders for 14 ships aggregating 183,000 tons were cancelled, six of these (representing about 129,000 tons) being for tankers.

Colonel Denis Bates, chairman of the Cunard Line, announced on April 28 that the company had decided to postpone construction of its new 28,000-ton liner (see 15704 A) ordered from John Brown and Co. to replace the *Britannic* on the New York service. Colonel Bates explained that the decision had been taken "because of the decline in our fortunes last year," when gross profits were over £2,000,000 less than in 1956.

(Prev rep. 15989 A)

MAY 10—17, 1958

A. SOUTH AFRICA. — Nationalist Victory in General Election. - Cabinet Appointments.

The Nationalist Party was returned to power with an increased majority in the South African general elections, held on April 16 The elections were the first "all-white" elections in South Africa, as the Cape Coloured voters had been placed on a separate electoral roll under the Separate Representation of Voters Act (see 14997 A, 14805 A) The elections in the four Cape Coloured constituencies were held on April 3, prior to the general elections proper.

The new House of Assembly (the 12th of the Union) contains 163 members, of whom four represent the Cape Coloureds and three are Natives' Representatives. The position in the new House is shown below, comparison being given with party strengths at the dissolution of the former House on March 11 :

	New House	Old House (at dissolution)
Nationalist Party	103	96
United Party	53	52
Labour Party	—	4
Independents	—	4
Natives' Representatives	3	3
Cape Coloured Representatives ..	4	—

Notes. (1) As the four Cape Coloured representatives all support the United Party, the U.P.'s effective strength in the new House is therefore 57. The representatives of the Cape Coloured electors are Europeans, as laid down in the Separate Representation of Voters Act.

(2) The three Natives' Representatives (two Liberals and an Independent, all Europeans) were not affected by the dissolution, as they are separately elected. Their terms of office expire later in the year.

The final state of the parties (figures at dissolution in parentheses) was as follows, divided between the four Provinces and South-West Africa and including also the Natives' and Cape Coloured Representatives :

	Nat.		U.P.		Lab.		Lib.		Ind.	
Cape Province .	33	(31)	19	(23)	—	(—)	—	(—)	—	(—)
Transvaal ..	48	(44)	20	(18)	—	(3)	—	(—)	—	(3)

Whereas the Nationalists won seven seats and the United Party's representation (excluding the Cape Coloured seats) was practically unchanged, the Labour Party was without representation in the Union Parliament for the first time in South African political history. As all Liberal and Independent candidates were also defeated, the Natives' Representatives constitute the only "third force" in the new Parliament. As shown in the table above, the Nationalists have an overall majority of 43 in the new House, against a majority of 33 in the former House - i.e. an overall gain of ten seats.

Of the 156 seats in the Union Parliament (excluding those allotted to Cape Coloured and Natives' Representatives), 24 were filled by unopposed returns, all for the United Party—10 in Cape Province (including six in the Cape Peninsula), seven in the Transvaal (mostly on the Rand), and seven in Natal. Of the 132 contested seats in the Union and South-West Africa, the U.P. contested every constituency ; the Nationalists contested 125 ; the Liberals, standing for the first time as an organized party, put up three candidates (one each in Cape Town, Pietermaritzburg, and the Rand); and the Labour Party presented only two candidates, at Rosettenville and Benoni respectively. Unlike the last (1953) elections, there was no electoral agreement between the Labour Party and the U.P. to refrain from putting up candidates against each other.

The ten Independent candidates included two members of the former Conservative group (now disbanded)—Mr. Bailey Bekker and Mr. Frank Waring, who opposed the U.P. at Vonbrandis (Transvaal) and in the Cape Town Gardens constituency. Two other former Conservatives stood as Nationalist candidates—Dr. A. H. Jonker and Mr. Blaar Coetzee.

All members of the Government were returned in the elections on April 16, in most cases with increased majorities. Mr. J. G. Strydom, the Prime Minister, was re-elected for Waterberg with a majority of 4,774, an increase of 1,857 compared with the last general election. Among leading Nationalists re-elected (constituencies in parentheses) were Dr. T. E. Dönges, Minister of the the Interior (Worcester) ; Mr. Eric Louw, Minister of External Affairs (Beaufort West) ; Mr. F. C. Erasmus, Minister of Defence (Moorreesburg) ; Dr. H. F. Verwoerd, Minister of Native Affairs (Heidelberg) ; Mr. J. F. Naude, Minister of Finance (Pietersberg) ; Mr. B. J. Schoeman, Minister of Transport (Maraisburg) ; Dr. A. J. R. van Rhijn, Minister of Economic Affairs and former Administrator of South-West Africa (Windhoek) ; Mr. P. O. Sauer, Minister of Lands and Irrigation (Humansdorp) ; Mr. J. H. Serfontein, Minister of Posts and Telegraphs (Fauresmith-Boshof) ; Mr. C. R. Swart, Minister of Justice (Winburg) ; Mr. J. H. Conradie, Q.C., Speaker of the House of Assembly (Gordonia) ; and Mr. P. M. K. le Roux, the Government Chief Whip (Oudtshoorn).

Other re-elected Nationalist members included Dr. J. A. Hertzog, the eldest son of the late General Hertzog (Ermelo), and Professor L. I. Coertze, formerly Dean of the Law Faculty at Pretoria University (Standerton). The two former Conservatives who stood for the Nationalists were both successful—Dr. Jonker at Fort Beaufort and Mr. B. Coetzee at Vereeniging, the latter seat being won from the United Party.

Sir de Villiers Graaff, leader of the United Party, lost his seat (Hottentots-Holland) to the Nationalists by 898 votes, while Mr. S. J. Marais Steyn, U.P. leader in the Transvaal, was defeated by Mr. Coetzee at Vereeniging as stated above. Among prominent U.P. members to be re-elected were Mr. H. G. Lawrence, a former Minister of Justice (Salt River) ; Dr. D. L. Smit, a former Minister of Native Affairs (East London City) ; Mr. J. W. Higgerty, Chief Whip of the United Party (Vonbrandis) ; and Mr. C. B. van Ryneveld, the cricketer, who captained South Africa in the Test matches against England in 1956-57 (East London North).

The 24 U.P. members returned unopposed included Mr. S. F. Waterson, a former Minister of Economic Affairs and onetime High Commissioner in London (Constantia), and Major P. V. G. van der Byl, a former Minister of Native Affairs (Green Point). In the elections as a whole, the U.P. achieved its greatest successes in the large urban areas—Cape Town, Johannesburg, Durban, Port Elizabeth, and East London. Outside Natal, it was virtually eliminated in the *platteland* (rural areas) except in the Albany, Queenstown, and King William's Town constituencies.

Two of the unopposed U.P. members—Colonel R. D. Pilkington Jordan and Mr. A. L. Kowarsky—resigned their seats after the election to enable Sir de Villiers Graaff and Mr. Marais Steyn to sit in the new Parliament. Sir de Villiers Graaff was offered Colonel Pilkington Jordan's former constituency (Rondebosch), while Mr. Marais Steyn was offered the constituency (Yeoville) for which Mr. Kowarsky was returned.

Mr. Alex Hepple, leader of the Labour Party, polled only 974 votes at Rosettenville and forfeited his deposit, the U.P. candidate winning the seat with a 4,900 majority in a three-cornered contest ; at the last general election Mr. Hepple had a majority of 6,200 in the same constituency. Mr. Leo Lovell, the only other Labour candidate, was defeated by the United Party at Benoni in a three-cornered contest.

Party gains and losses were as follows : (*a*) Nationalists, 10 gains and 3 losses—a net gain of seven seats ; (*b*) United Party—10 gains and 9 losses -a net gain of one seat ; (*c*) Labour Party -no gains, 4 losses.

The Nationalists won 6 seats from the United Party (Hottentots-Holland, Fort Beaufort, Kimberley South, Vereeniging, Boksburg, and Edenvale) and 4 new seats created by re-delimitation of constituencies ; one seat was lost to the U.P. (Gardens) and two by delimitation. The U.P. won 4 seats from Independents (Hospital, Durban Point, Orange Grove, and Johannesburg North), 3 from Labour (Benoni, Rosettenville, and Durban-Umlazi), one from the Nationalists (Gardens), and 2 new seats ; it lost 6 seats to the Nationalists (those mentioned above) and 3 by delimitation. Three of the four Labour seats were lost to the U.P. (see above) and one by delimitation.

Prior to the elections, many constituencies were re-delimited and various new constituencies created under the provisions of the Electoral Laws Amendment Act of 1952 (see page 13006), which also formed the basis for re-delimitation at the last (1953) general elections. This Act provided for delimitation of constituencies on the basis of the total number of registered White European voters over the age of 21, as shown by periodical registrations of voters and supplementary registrations every two or three years. The 1958 elections were held on the basis of a general registration which took place in August 1956, plus a supplementary registration which closed on Feb. 28, 1957. On the basis of the 1956 registration, the Transvaal had 655,711 voters, Cape Province 510,297, Natal 157,510, and the Orange Free State 133,856—a total of 1,456,874. Together with the supplementary registration (i.e. new voters coming on the register for the first time on reaching the age of 21), the total electorate was well over 1,500,000. Polling was heavy in most constituencies.

Voting figures in the 132 contested constituencies were as follows :

Nationalists	647,468
United Party	503,635
Independents	3,552
Liberals	2,934
Labour Party ..	2,607
Minor groups ..	1,205

In view of the large number of uncontested seats, various estimates of the aggregate voting strength of the two major parties were made by South African newspapers; e.g. the *Cape Times* claimed that the U.P. would have polled 687,000 votes and the Nationalists 654,000 had all seats been contested. On the other hand, *Die Burger* estimated that the Nationalist vote would have aggregated 703,000 and the U.P. vote 671,000 had every seat been contested. In arriving at these figures, *Die Burger* credited the Nationalists with 2,000 votes in each constituency where there was no Nationalist candidate, while the *Cape Times* credited the Nationalists with an average of 1,150 votes in each of those constituencies, assuming a poll of 80 per cent.

As stated above, the Cape Coloured electors voted on April 8 to elect four European M.P.s to represent their interests in the new Parliament. Independents supported by the United Party were returned for three of the Cape Coloured constituencies (Peninsula, Boland, and Karoo) and a U.P. candidate for Outeniqua.

Between 29,000 and 30,000 Cape Coloureds were eligible to vote, the electorate being confined to males. The average poll in the four constituencies was 51.6 per cent, varying between 41.9 per cent in Boland (the lowest) to 65.6 per cent in Outeniqua (the highest). All three Nationalist-supported candidates forfeited their deposits in the constituencies for which they stood. The successful candidates included Mr. Abe Bloomberg (Peninsula), a former Mayor of Cape Town and a U.P. member of the former House.

Aggregate votes in the four Cape Coloured constituencies were: U.P. and Independent U.P., 11,710; Independent Nationalists, 528; South African Coloured Peoples' Organization (SACPO), 909; Independents, 1,035.

Statements by Mr. Strydom and Sir de Villiers Graaff.

In a post-election broadcast on April 17, Mr. Strydom declared that "the answer that has been given to our opponents here, and to all those who libel our country beyond our borders, is that the electorate of South Africa are solidly behind the Government and our policy, and that no interference in our domestic affairs will be tolerated."

Mr. Strydom said that the Government would continue its aim of fostering "the growing good relations and co-operation between the two language groups—English- and Afrikaans-speaking." He added: "As far as the colour question is concerned, we shall continue resolutely on the course we have taken—that is, to develop and maintain the traditional way of life of our country, namely *apartheid* or separation between White and non-White. This we shall do because we are convinced that it is the only way to maintain ourselves as a White race, while at the same time doing justice to the non-Whites and to avoid racial clashes in South Africa."

The Prime Minister expressed his thanks to the "thousands of English-speaking people and others, not enrolled members of our party, who on April 16 gave the Government this overwhelming majority."

Speaking on April 22 at a victory rally in Pretoria, Mr. Strydom declared that the ultimate goal of the Nationalist Party was a republic. He appealed for the greatest possible co-operation between the two language-groups, and reiterated that the *apartheid* policy would be implemented in a manner "fair to both Europeans and non-Europeans."

Sir de Villiers Graaff issued the following statement on April 24 :

"The principles of the United Party are indestructible. As a result of Government mismanagement, irresistible economic factors and moral considerations are working for the United Party, which fills us with confidence and assurance for the future of our cause. For these reasons our faith remains unshaken. We shall continue to fight for unity, reason, and justice . . .

"There has been much speculation in various newspapers on whether the United Party or the Nationalist Party has the majority of the electorate behind it. If there is any uncertainty the Nationalist Party is to blame. They shirked making the general election a true test of public opinion by refusing to contest no fewer than 31 of the seats, where at least one-fifth of South African voters are registered.

"What is indisputable is that the result of the election is anomalous. The Nationalist Party with approximately half the voters has nearly twice as many seats as the United Party, which has the support of at least the other half of the voters. One thing is clear. The United Party is a vastly stronger force in the country than a superficial glance at its representation in Parliament would indicate. . .

"Opinion is hardening to the view that, apart from a delimitation which had a disproportionate effect upon the results, our party's defeat at the polls was in the main due to ruthless exploitation of the racial situation in South Africa and to an emotional appeal to sectional sentiment. It was certainly not due to approval by the electorate of the Government's actual record and administration over the past ten years.

"Against this background the role of the United Party . . . is clear. Not only must we play the part of the public's watchdog against the impact of the extremism inherent in the Nationalist Party, but we must also work unceasingly . . . for the triumph of logic, reason, and moderation in the councils of our nation . . ."

Abortive Strike Campaign by African National Congress.

The African National Congress had planned to call a stay-at-home strike of all African workers on election day, accompanied by demonstrations, as a means of voicing African grievances. The projected strike and demonstrations were called off on April 14, however, after strong measures by the Government to prevent possible disturbances, and after Mr. Strydom and Mr. Swart (the Minister of Justice) had emphasized that full protection would be given to all non-White workers who refused to obey the strike call.

In a statement on April 10, Mr. Strydom expressed his conviction that the great majority of the African workers were peace-loving and did not wish to leave their work. In view of the "efforts of Communists and Leftists to organize a strike of non White workers," a departmental committee had been set up "to take all necessary steps to ensure that . . . the mass of peace and order-loving non-White workers will be able to continue with their work, and to keep essential services running." Mr. Strydom added that "drastic action" would be taken against "any disturbances of the peace by agitators of labour unrest."

On the following day the South African Government banned all meetings of more than ten Africans in certain areas of the Cape, the Transvaal, and the Orange Free State to prevent irresponsible elements from causing labour unrest. Security police raided the Johannesburg offices of the African National Congress and the Transvaal Indian Congress and removed documents and pamphlets calling on Africans to take part in the projected strike. The Commandant-General of the Union Defence Forces (General Klopper) announced that the armed forces would provide transport for African workers who refused to take part in the stay-at-home movement, while the Commissioner of Police (Major-General Rademeyer) gave warning that any agitators intimidating or coercing law-abiding Africans would be immediately arrested. As a result of these measures the strike was called off.

Cabinet Appointments.

Two new Cabinet appointments were announced by Mr. Strydom on April 25 : (i) Mr. M. D. C. de Wet Nel (deputy chairman of the Native Affairs Commission) as Minister of Education, Arts and Science in succession to the late Mr. J. H. Viljoen, who died on Dec. 5, 1957 ; (ii) Mr. P. M. K. le Roux (the Government Chief Whip) as Minister of Agriculture in place of Mr. S. P. le Roux, retiring. Mr. de Wet Nel is M.P. for Wonderboom (a Pretoria constituency) and Mr. P. M. K. le Roux is M.P. for Oudtshoorn, Cape Province.

Johannes Hendrikus Viljoen (64), born in the Hoopstad district of the Orange Free State, was a teacher until his election to Parliament in 1933 as United Party M.P. for Hoopstad. He supported General Hertzog's unsuccessful motion for South African neutrality on the outbreak of war in 1939, went into opposition with General Hertzog and Mr. Havenga, and became Assistant Whip of the Afrikaner Party, which was formed from supporters of the Hertzog-Havenga group in Parliament. In 1950 he became Minister of Mines in Dr. Malan's Cabinet, and in the following year played an important part in the negotiations which led to the formation of the Nationalist Party. He was subsequently appointed Minister of Education, taking over the Health portfolio in addition in 1956. In 1957 he was in charge of two controversial measures aiming at *apartheid* in the nursing profession and the universities.

It was also announced that Dr. J. H. O. du Plessis (Nationalist member for Stellenbosch) had been appointed Administrator of Cape Province in succession to the late Mr. P. J. Olivier, and that Mr. A. E. Trollip (a former United Party member for Bezuidenhout) would succeed Mr. D. G. Shepstone as Administrator of Natal.—(Cape Times - Die Burger - State Information Office, Pretoria)

(Prev. rep. Elections, 13005 A ; Cabinet, 15023 C.)

A. UNITED STATES. — Cabinet Appointment.

Dr. Arthur Flemming (53), president of Ohio Wesleyan University, was nominated by President Eisenhower on May 7 as Secretary of Health, Education and Welfare in succession to Mr. Marion B. Folsom, who had resigned for reasons of health. Dr. Flemming has served on many Government Commissions and was Director of Defence Mobilization from 1953 to 1957.—(New York Times) **(Prev. rep. 15385 C.)**

B. AUSTRALIA. — Dollar Loan. - Corrigendum.

The interest rate on the recent Australian $15,000,000 loan in New York was 4¼ per cent, not 4½ per cent as incorrectly stated in 16150 F.—(Ed. K.C.A.)

A. YUGOSLAVIA. — Re-election of President Tito. - Congress of Yugoslav League of Communists. - Insistence on Ideological and Political Independence of Yugoslavia. - Reply to Soviet Criticisms of Draft Programme. - Soviet and Chinese Propaganda Campaign against Yugoslavia. - Yugoslav Rejoinders.

Marshal Tito was unanimously re-elected President of Yugoslavia for a third four-year term at the inaugural meeting of the newly-elected Federal National Assembly on April 19. In a speech to the Assembly, President Tito gave a comprehensive survey of the Government's home and foreign policy since 1954, in which he suggested that representatives of Yugoslavia and other neutral countries should take part in any "summit" meeting between the great Powers.

President Tito declared that Yugoslavia's foreign policy had been based throughout on the fundamental principles of ensuring the independence and free Socialist development of the country; of co-operation with all countries on the basis of mutual respect for independence, sovereignty, equality, territorial integrity, and non-interference in internal affairs; the harmonious solution of international problems; and the development of the U.N. as an efficient instrument for peace, international co-operation, and mutual aid. After paying tribute to the Soviet Government's initiatives for reducing international tension during 1954-56, he said that international relations had seriously deteriorated since then because of the Suez and Hungarian crises, the "pressure" exerted on Syria, "foreign interference" in Indonesia, and the decision to arm the West German forces with nuclear weapons, with the result that "the mutual distrust which exists recalls from time to time the most acute phases of the cold war." President Tito welcomed the Soviet initiative in favour of summit talks, and also mentioned with approval the Polish proposal for an atom-free zone in Central Europe, Mr. Macmillan's suggestion of a non-aggression pact, and the appeals issued by Mr. Nehru.

In view of the mistrust between the great Powers (Marshal Tito continued), "we consider that it would be useful if representatives of countries which do not belong to any of the military alliances also took part in such a meeting—countries which have proved that they are loyal to the policy of peace and international understanding . . . The participation of such countries as India, Sweden, and Yugoslavia at a summit meeting would contribute constructively to a *rapprochement* of views and to the working-out of solutions acceptable to all . . . Such a high-level meeting would certainly have much better prospects of success if various methods of pressure were abandoned beforehand—for instance, the armaments race—and if nuclear tests for war purposes were discontinued, the erection of launching sites stopped, and so on. The unilateral cessation of nuclear tests by the Soviet Union is undoubtedly a good example for the improvement of the international atmosphere."

Continuing, President Tito said that Yugoslavia's relations with all her neighbours had been normalized and were developing favourably, except with Albania. Political, economic, and cultural relations with the U.S.S.R. were developing successfully, and agreements had been concluded on Soviet economic aid to Yugoslav industry. A "sensible improvement" had also occurred in relations with the other Socialist countries, notably with Poland. Moreover, relations between Yugoslavia and the Western countries had been strengthened, and served as an example of co-operation between countries with different political systems. Yugoslavia was grateful for the economic aid which she had received from the U.S.A. without any political conditions attached, and for the U.S. military aid which she had also received until it was ended at her own request in 1957. There were no outstanding problems between Yugoslavia and Britain, and favourable conditions existed for the further development of Anglo-Yugoslav economic and cultural co-operation. Relations with France had been seriously impaired by the *Slovenija* incident [see 16080 A], but the Government hoped that they would improve in the interests of both countries.

The membership of the new Federal Executive Council, announced on the same day, was identical with that of the former Council except that M. Todorovich succeeded M. Vukmanovich as a Vice-President and as chairman of its economic committee. M. Vukmanovich, who commanded the Macedonian partisans during the war under the name of "Tempo," had been appointed president of the Central Council of the Yugoslav Trade Union Federation on April 7 in place of M. Salaj. His appointment, which coincided with a number of other changes in the trade union leadership, was believed to be connected with a miners' strike which occurred in January (the first strike known to have taken place in Yugoslavia since the war), as a result of which the League of Communists had issued a statement in March condemning "bureaucracy" and "luxurious living" by factory directors and managers.

Draft Programme of League of Communists. - Soviet Criticisms.

The seventh congress of the Yugoslav League of Communists, which met at Ljubljana from April 22-26, was boycotted by almost all the foreign Communist parties which had been invited to send delegations. This renewed deterioration in relations between the Yugoslav Communists and the other Communist parties was due to Soviet criticisms of the League's draft programme, which was to have been submitted to the congress for approval, and particularly of the references to international relations contained therein.

After commenting that "Marxist thought in the last few decades has not kept step with the advance of contemporary society," the programme maintained that the extension of State ownership and control in certain of the Western, Asian, African, and South American countries afforded "the most obvious proof that mankind is indomitably moving into the era of Socialism along a variety of different roads." One result of this process, however, was that in both capitalist and Socialist countries the State machine tended to play an increasingly independent role. In Socialist countries the bureaucratic State "leads perforce to greater centralization of power, to an ever closer merging of the State and party apparatus . . . whereby they tend to become independent and impose themselves as a force over and above society."

"Socialist thinking," the programme continued, "should no longer be primarily concerned with questions relating to the overthrow of capitalism," but with the problems of the development of Socialist society and the "withering away" of the State. It suggested that the State should become an apparatus of experts subordinated to elected bodies, such as the Yugoslav workers' councils, "within which Communists should strive to keep the work and decisions in harmony with the needs of the development of Socialism." The view that "Communist parties have a monopoly over every aspect of the movement of society towards Socialism, and that Socialism can only find its representatives in them and through them," was "theoretically wrong and harmful in practice."

The fact that "the working class of one country or another may for a certain period of time be the vanguard of the struggle for Socialism, or may dispose of greater material power, does not entitle it to a monopoly position in the labour movement, least of all to a monopoly in the sphere of ideology," the programme declared. In this connexion the programme mentioned Stalin's "anti-Yugoslav action of 1948" as an example of "hegemonistic aims put above the actual interests of Socialism." It declared that "so long as marked differences in the level of economic development of specific countries create substantial differences between the position of the working people in each of these countries," it would be possible for "a given State, in consequence of the hegemonistic position it has acquired for one reason or another, to resort in one form or another to economic exploitation of the other country."

In the section dealing with international relations, the programme attributed the instability of the international situation to the rivalry between Power blocs and the "division of the world into spheres of influence," which, it stated, was already evident at the Teheran, Yalta, and Potsdam conferences. "The logical consequence of this policy," the programme added, "is the straining of international relations generally, the formation of military-political blocs, and reinforced armaments."

The views expressed in the Yugoslav programme (which was circulated to other Communist parties) were strongly criticized in an article published in *Kommunist*, the theoretical journal of the Soviet Communist Party, the text of which was broadcast in Serbo-Croatian by the Soviet radio on April 19.

After asserting that the threat to peace proceeded from "capitalist monopolies which have a vested interest in war," *Kommunist* protested against "Yugoslav reproaches to both sides concerning the arms race," which put "the peaceful policy of the Socialist countries on a level with the aggressive policy of the ruling circles of the imperialist States." The Yugoslav programme, it argued, ignored "the class essence, the political character of the bourgeois State, and distracts the attention of the proletariat from the historic task of the revolutionary conquest of power." Although the transition to Socialism might take place either forcibly or peacefully, "even the peaceful way is one form of revolutionary development." The Yugoslav League of Communists had been led by its theories to renounce the "leading role" of the Communist Party and to consider the "withering away" of the State as an immediate task, ignoring Lenin's view that the State was necessary "right up to the transition of victorious Socialism into complete Communism." In consequence the Yugoslavs had adopted an attitude of "petty-bourgeois nationalism," and had failed to recognize that "in certain conditions proletarian internationalism demands the subordination of the interests of the proletarian struggle in one country to the interests of the struggle on a world-wide scale."

In an attempt to meet Soviet criticisms, the League of Communists had introduced a number of amendments into the draft programme even before the publication of the *Kommunist* article. The most important of these were the omission of the reference to the Teheran, Yalta, and Potsdam conferences and the insertion of a statement that "the Warsaw Pact and similar measures of the Socialist countries form a natural defensive reaction to the establishment of the North Atlantic Pact, as well as to the rearmament of Germany." The reference to Stalin's "hegemonistic aims" was also omitted, and a reference to the fact that Stalin's anti-Yugoslav policy had been condemned by the 1956 congress of the Soviet Communist Party was inserted instead.

The League of Communists had invited 51 Communist, Socialist, and other parties and organizations to send delegations to the Ljubljana congress. The invitations were rejected by a number of Western Socialist parties, but accepted at first by most of the other organizations. On April 5, however, the Soviet Communist Party reversed its decision to send a delegation, this example being followed by the Communist parties of China, Bulgaria, Rumania, Czechoslovakia, Poland, Hungary, Eastern Germany, Albania, Mongolia, Sweden, and Great Britain.

Among the organizations represented at the congress were the Danish, Norwegian, and Indonesian Communist parties, the Italian, Japanese, and Chilean Socialist parties, the Algerian National Liberation Front, and the National Union of the United Arab Republic. The diplomatic representatives of the U.S.S.R., China, Bulgaria, Rumania, Poland, Hungary, Eastern Germany, Mongolia, and North Vietnam attended the congress as "observers"; the Czechoslovak Ambassador was refused admission to the congress as he was unable to produce his credentials.

Great offence was caused in Yugoslavia by a speech made by M. Khrushchev on April 10 after his return from a visit to Hungary, one passage of which was regarded as an indirect attack on the Yugoslav leaders.

After praising the Hungarian Communist leaders as "faithful friends of ours, struggling against opportunism and treachery, nor slurring over the question of class struggle," M. Khrushchev continued: "They do not grovel for the friendship of those who would like to throw them some of their stale goods in order to entice them to their side. Guided by the revolutionary Marxist-Leninist teaching, they know one thing—do not adapt yourselves to imperialists. Nobody can sit on two stools at the same time; he will inevitably come a cropper on a certain part of his anatomy, and rightly so."

Although expressing "serious reservations" about the section of the Yugoslav programme dealing with international relations, and with certain of its theoretical conclusions, the organ of the Polish United Workers' Party (*Trybuna Ludu*) adopted a more friendly attitude towards the League of Communists in an article published on April 23. It emphasized that the Polish party stood for the independence of all parties and non-interference in their internal affairs, as distinct from friendly criticism, and expressed the desire for a strengthening of co-operation between the Polish and Yugoslav parties and "a *rapprochement* of views on the basis of the creative ideas of Marxism-Leninism."

Congress of Yugoslav League of Communists. - Speeches by President Tito, M. Rankovich and M. Kardelj. - Replies to Soviet Criticisms. - "Cominform" Policy denounced by M. Rankovich.

The Ljubljana congress was opened on April 22 by President Tito, who, although conciliatory in his references to the Soviet Union, reaffirmed the Yugoslav Government's policy of ideological and political independence.

In the section of his speech dealing with international relations, **President Tito** said that Stalin's "inflexible and unnecessarily menacing foreign policy," which had prevented the Western Powers from achieving their aims by diplomatic means, had led them to make "a show of force," whilst the Atlantic Pact, which was aimed at "world domination," had in turn inevitably led to the formation of the Warsaw Pact. Since Stalin's death the Soviet Union had altered its methods, and had endeavoured to settle international problems by negotiation. This change, however, had been erroneously interpreted as a sign of weakness, and the Western Powers had turned down the Soviet proposals and continued to build up their military forces. After repeating his proposal that countries outside the Atlantic and Warsaw Pacts should take part in a summit conference, President Tito said that he was "not too optimistic" about the results of such a conference, but that an agreement even on one question—e.g. the cessation of nuclear tests—would lead to a relaxation of tension and the possibility of a settlement of other outstanding problems.

Since the talks between the Yugoslav and Soviet leaders in August 1957, he continued, relations between the two countries had been developing very successfully "until today. [The text of the speech circulated beforehand said that Soviet-Yugoslav relations were "today" developing very successfully, this being officially described as a printing error.] "Certain comrades" in some East European countries, however, still showed "signs of distrust" towards Yugoslavia and were suggesting that she should be "educated and again brought into the camp. "This is not the way to promote confidence and good relations between Socialist countries," President Tito declared, "and it would be very useful if these comrades finally abandoned such absurd tendencies, which are only harmful and prevent the proper development of our relations." Repudiating the allegation that the Yugoslavs were not "internationalists," he observed that "internationalism means respect for equal relations and a comradely attitude towards those countries which are building Socialism."

"During the last few years of the Stalin period," President Tito went on, "the workers' movement . . . not only stagnated but even retrogressed. The reasons for this were to be found, in the first place, in the dependent policies conducted by the various parties whose leaders had been accustomed to receiving and implementing directives from outside, regardless of whether these directives were the right ones or not for the country concerned. This was typical up to the 20th Congress of the Communist Party of the Soviet Union . . . It is particularly important that the old forms of co-operation are being gradually abandoned and that bilateral relations are being adopted. This does not in any way mean that there is a weakening of the Socialist world, or of its unity and effectiveness, but precisely the opposite. It makes possible the mobilization of all the forces of Socialism . . . Because of this attitude of ours regarding co-operation between Communist parties and progressive movements in the world in general, we could not sign the declaration of the 12 Communist and workers' parties of the Socialist countries in Moscow [see 15938 C]."

In the concluding section of his speech, President Tito strongly protested against the "propaganda campaign" against Yugoslavia which, he alleged, had been organized by certain foreign Socialists, and particularly by some members of the British Labour Party, in connexion with the trials of M. Djilas and four former Serbian Socialist leaders [see 16067 A; 15822 A].

In a speech to the congress on April 23, M. Rankovich (a Vice-President of the Federal Executive Council) replied to the Soviet criticisms of Yugoslav policy, and particularly to M. Khrushchev's speech of April 10. During this section of his speech, the text of which had been circulated beforehand, all the observers from the Communist countries walked out with the exception of the Polish Ambassador.

M. Rankovich said: "No attempt from abroad to destroy the struggle of the Communists and people of Yugoslavia for independence and Socialism, or to turn them in another direction, can succeed. We pursued this course faithfully in 1948, when we were asked to abandon this road in the name of what was called 'higher interests,' and to renounce our independence and our Socialist development. Many responsible and eminent leaders of the U.S.S.R. and other East European countries have expressed their admiration of the fact that, in spite of strong pressure from the Stalinists and the Cominform policy, we succeeded in maintaining and consolidating our independence . . . Now, however, we are again hearing voices from various sides making barely disguised allusions to the effect that we are 'sitting on two stools,' to our 'bowing and scraping before the imperialists' in order to get some of their 'tainted goods,' and so on. They say that only the countries of the Socialist bloc do not bow before the imperialists but pursue an independent policy and a policy of peace - meaning that Yugoslavia, as a Socialist country which does not belong to the camp, is by this very fact 'bowing and scraping' before the imperialists and is not pursuing an independent policy or a policy of peace. How absurd that is!" [This passage was followed by a prolonged ovation, which included the singing of patriotic songs.]

"Neither the Communists nor the peoples of Yugoslavia who followed their lead sat on two stools," M. Rankovich continued. "They did not sell out to Fascism or reconcile themselves to it, nor did they sell out to anyone in 1948, even when there was a rattling of arms on the Yugoslav borders . . . If we Yugoslav Communists had had such flexible spines they would have bent in 1948 under the powerful pressure of the great propaganda machine turned upon us from several countries. And not only propaganda . . . If a blunder has been made as regards our unity, that does not give anyone the right to interfere in the internal affairs of our country, or to pin their hopes on alleged disunity in the League of Communists and among its leaders. The experience of the past shows that the discredited method of playing off one people against another cannot succeed . . . All propaganda moves to play off the leaders of one country against the leaders of another are senseless. They can only serve to provoke mutual suspicion and distrust . . .

"Unfortunately, it is evident that some highly responsible people in our neighbourhood, instead of learning a lesson from the past, are beginning to sharpen the rusty old weapons of the Cominform again, openly reviving the long-discredited charges against the Yugoslav Communists about having 'departed from the principles of Marxism-Leninism,' 'serving the bourgeoisie,' etc., while initiating a policy of pressure against Yugoslavia and its Socialist institutions. In this we see nothing but an absurd, barren attempt to isolate the League of Communists . . . We considered, and still consider, that divergences of an ideological nature need not affect the friendly development of relations between States, and especially between countries which are building Socialism . . ."

M. Kardelj (also a Vice-President of the Federal Executive Council) submitted a report on the draft programme on April 24, in which he dealt with the specific criticisms raised by the Soviet Communist Party.

On the subject of co-operation between Communist parties, **M. Kardelj** said: "The programme provides that such co-operation should be completely voluntary and based on equality; that it should preclude the imposition of an attitude by the majority; and that it should recognize the exclusive right of each individual party to appraise the suitability or the ideological or tactical correctness of any action. When stressing such principles of co-operation, we are guided primarily by experience from the past, when one organizztion for mutual co-operation—the Cominform—was turned into an instrument of pressure against Yugoslavia. Much has changed since then, and we do not claim that the conditions for the repetition of such actions exist today. However, the

contradictions of the transitional period and the powerful influence of the present international situation on relationships between Socialist countries can still be a source of mistakes and negative tendencies, which is why co-operation should be of such a kind as to make it impossible, or at least more difficult, for such tendencies to assert themselves . . ."

Dealing with Yugoslavia's attitude towards military blocs, M. Kardelj said: "The Warsaw Pact, as an international factor, will no doubt have a defensive role as long as the reactionary forces in the world endeavour to exploit the Atlantic Pact and similar organizations as an instrument in the anti-Communist crusade . . . The division of the world into blocs cannot be destroyed by discussions on the mechanical, unilateral disbanding of these blocs, but only by removing those causes in international relations which have led to their creation. This primarily means by struggle against the domination of power politics in international relations—that is, through the struggle for active co-existence, based on constant efforts for disarmament and the promotion of democratic relations between peoples. We consider that certain of the proposals of the Soviet Union and other Socialist countries during the last few years act precisely in that direction. All Governments whose interests lie in peace should act in the same direction, irrespective of whether or not they belong to one or other of the military pacts. The independent foreign policy of Socialist Yugoslavia, which is not committed to any military pact, operates in that direction. We think that Yugoslavia, by conducting such a policy, can contribute not only to the consolidation of peace but also to the strengthening of the Socialist forces. Conversely, by abandoning this position Yugoslavia would only contribute to intensifying the antagonisms in Europe, and would thereby be inflicting harm upon the genuine interests of international Socialism."

The League of Communists, M. Kardelj emphasized, would accept criticisms of its programme from abroad if they were not in conflict with the League's principles. They would not, however, "recognize the right of anyone to determine what in that programme is Marxist and what is not, what should go into our programme and what should not . . ."

The congress concluded on April 26 with a speech by President Tito, in which he again referred to relations with the Soviet Unions.

"Certain manifestations of dissatisfaction have appeared at this congress," President Tito said, "because certain fraternal parties reported that their delegates would attend the congress and then cancelled the trip for very unconvincing reasons. Such reactions are not the result of any exaggerated sensitivity, but of memories of the dark past . . . We should like to solve our misunderstandings and disagreements in a different way in future, through comradely understanding . . . The negative and incorrect Press articles and the biassed speeches about Yugoslavia in some Socialist countries cannot be regarded as optimistic prospects for our future relations. It is time they understood us properly, or attempted to do so, because . . . any expectation in any quarter that we shall renounce our positions of principle, both in international and in domestic matters, is just a waste of time . . ."

It was reported at the congress that the membership of the Yugoslav League of Communists was 755,055. The new Central Committee elected an Executive Committee (formerly known as the Politburo) of 15 members, of whom President Tito, M. Kardelj, M. Rankovich, M. Vukmanovich, and General Gosnjak formed the Secretariat.

Intensification of Anti-Yugoslav Propaganda Campaign.

The Ljubljana congress was followed by an intensification of the propaganda campaign against Yugoslavia in the other Communist countries. The most violent attack on the Yugoslav programme yet published appeared on May 5 in the Peking *People's Daily*, the official organ of the Chinese Communist Party.

The article said that the Cominform resolution of 1948 on Yugoslavia [see 9381 A] had been "basically correct," although "mistakes" had been made in dealing with the problem and the 1949 resolution [see 10404 A] had been "incorrect." Describing the Yugoslav draft programme as "a wild attempt to induce the working people of various countries to take the road of surrender to capitalism," the article commented that it was "by no means accidental" that it had appeared at a time when "the imperialists, led by the United States, are stepping up their sabotage of the world Communist movement."

A vigorous reply to the Chinese attack was published on May 9 in the Yugoslav weekly *Kommunist*, which denounced the "filthy insinuations" of the Peking *People's Daily*.

Pointing out that the criticisms in the *People's Daily* were virtually identical with those in the 1948 Cominform resolution, *Kommunist* recalled that 12 of the 17 signatories of that resolution from Communist countries had since fallen into disgrace. M. Kostov (Bulgaria) and MM. Slansky and Geminder (Czechoslovakia) had been hanged; M. Chervenkov (Bulgaria) had been removed from the Premiership; Mme. Ana Pauker (Rumania) and M. Berman (Poland) had been expelled from the Communist Party; M. Luca (Rumania) and General Farkas (Hungary) were in prison; MM. Rakosi and Gerö (Hungary) were in exile; M. Malenkov (U.S.S.R.) had been expelled from the Communist Party's Central Committee; and M. Bares (Czechoslovakia) had been removed from his party functions. *Kommunist* added: "Stalin's attempt to make an arbitrary appraisal of the social and political order in Yugoslavia met with inglorious failure. Under present conditions such attempts are all the more doomed to failure."

The *People's Daily* (the article continued) "demands . . . that we Yugoslav Communists renounce not only the principles on which we are today conducting our Socialist internal and foreign policy, but also every independent development of Marxist thought . . . If this is the price of co-operation, than what is involved is a problem exactly 10 years old; and for Yugoslav Communists that price is unacceptable today just as it was 10 years ago . . . We can pass over, with indignation but nevertheless quietly, the filthy insinuations about the connexion of the League of Communists and its policy with the political plans of American or other imperialists. History has already given its judgment on whom such accusations and such methods really benefit. . ."

The article in the *People's Daily* was reprinted on May 6 in *Pravda* and broadcast on May 9 by the Serbo-Croatian service of Moscow radio. Other articles criticizing the Yugoslav League of Communists, though in milder terms, appeared in *Rude Pravo* (the organ of the Czechoslovak Communist Party) and in *Neues Deutschland* (organ of the East German Socialist Unity Party). The Polish Press, on the other hand, maintained a neutral attitude, publishing both the Chinese and Soviet criticisms of Yugoslav policy and extracts from *Kommunist's* reply to those criticisms.

Following a meeting of the Central Committee of the Soviet Communist Party on May 6-7, at which the Soviet Ambassador in Belgrade (M. Zamchevsky) was present, *Pravda* published a long editorial on May 9 which suggested that Soviet economic aid to Yugoslavia might be ended.

Pravda accused President Tito of "white-washing" the Western Powers and "grossly distorting historical facts" by attributing the post-war international tension to "the policy of the U.S.S.R. in the Stalin period." It described his expressions of gatitude for U.S. economic aid as "kowtowing to American ruling circles," and declared that Yugoslavia was "in favour with the American monopolists" because the Yugoslav leaders were "endeavouring to smear the Soviet Union and weaken the unity of the international Communist and working-class movement." Commenting on the reference in the draft programme to the possibility of exploitation of one Socialist country by another, it asked whether Yugoslavia felt that her economic relations with the Soviet Union fell into this category, and added: "If so, it would be possible to free Yugoslavia from such exploitation."

M. Zamchevsky returned to Belgrade on May 10. On the following day, a few hours before President Voroshilov was due to arrive for a State visit to Yugoslavia, it was officially announced in Belgrade that the visit had been postponed, no reason being given.—(Tanjug Agency, Belgrade - Times - Manchester Guardian) **(Prev. rep. 15938 C.)**

A. UNITED KINGDOM. — Islington By-election.

Polling took place in North Islington on May 15 in the by-election caused by the death of Mr. Wilfred Fienburgh (Labour), who died on Feb. 3 from severe injuries received in a motor accident. The seat was held by the Labour Party, voting being as follows:

Reynolds Gerald (Labour)	13,159
Bartle, Ronald (Conservative)	5,698
*McKie, James (Independent Labour Party)	576
No change. Labour majority	7,461

*Forfeited deposit.

Figures at the general election were: W. Fienburgh (Lab.) 22,100, E. Mackinnon (C.) 14,522—Labour majority, 7,578.

The Labour candidate received 67.8 per cent of the votes in the by-election, the Conservative candidate 29.3 per cent, and the I.L.P. candidate 2.9 per cent; at the general election the Labour candidate received 60.3 per cent and the Conservative candidate 39.7 per cent in a straight fight. The Labour proportion of the poll thus increased by 7.5 per cent and the Conservative proportion fell by 10.4 per cent. Only 35.7 per cent of the electorate went to the polls, compared with 64.7 per cent at the general election. The total electorate numbered 54,476, a decrease of 2,098 since the general election.

Mr. Wilfred Fienburgh (38) was assistant secretary of the Civil Service Clerical Association before entering the Labour Party Research Department in 1947, specializing in economic affairs. He served in the Rifle Brigade during the war, held the rank of major on the General Staff on demobilization, and entered Parliament for North Islington in 1951.

Mr. Gerald Reynolds (30) is local government officer to the National Executive Committee of the Labour Party. He unsuccessfully contested Worthing at the 1951 general election. (Times - Daily Herald) **(Prev. rep. By-elections, 16089 C.)**

A. FINLAND. — Resignation of von Fieandt Cabinet. - New Non-party Cabinet formed by Dr. Kuuskoski.

The non-party Government of Dr. von Ficandt resigned on April 18 after being defeated on its price policy for agricultural products.

On March 19 the Cabinet had decided to reduce the retail price of butter by 40 marks a kilogram, while at the same time increasing the price of milk, cheese, and flour mixtures—the last-named measure resulting in a considerable increase in the price of bread and other bakery products.

The Government's decision to make these price changes was the result of a prolonged political dispute which had threatened to disrupt the Government. On the one hand, the existing legislation on farmers' incomes necessitated higher prices for farm products to bring farmers' incomes into line with general pay increases; on the other, it was recognized that an increase in the retail price of foodstuffs was bound to lead to a further rise in the cost of living. The higher prices for milk and cheese were accordingly meant to satisfy the farmers, whereas the reduction in the butter price was intended to compensate consumers and at the same time to stimulate home consumption. The resulting increase in State subsidies to butter producers (by some 4,200,000,000 Fmk. annually, to make up for the retail price reduction) was covered from the budgetary point of view by the decision to increase the sales price of Government-imported cereals to the higher price level for home-produced wheat and rye, thus giving the Government an extra revenue of 4,500,000,000 Finnmarks annually. As a compensation for the resulting increase in the bread price, the Government decided to grant poorer families a special allowance.

A debate opened in the Diet on April 15 on (1) an Agrarian motion demanding the cancellation of the increase in the bread price; (2) a Social Democratic motion demanding changes in legislation on farmers' incomes, which was described as harmful to the poorer elements of the population; (3) a motion by the Popular Democratic Union (Communists) demanding the Government's resignation and a complete changed in the country's economic policy; (4) a motion by the President of the Diet expressing confidence in the Government. After a four-day debate, dominated by the forthcoming general elections to be held in July, the Diet adopted the Social Democratic censure motion by 143 votes to 50, with five abstentions and two deputies absent. The Government thereupon resigned the same day.

Defending the Government's policy during the debate, Dr. von Fieandt pointed out that whilst the law on farmers' incomes had been unanimously voted at the time, it was not regarded as entirely satisfactory; the previous Government had therefore appointed a special committee to draft amendments. He dwelt on the difficulties of supplying consumers with farm products at reasonable prices while at the same time assuring a fair standard of living to the farming population; stated in the latter connexion that whereas the cost-of-living index had increased by 18.2 per cent since May 1956, the price of farm produce as a whole had risen by only 5.8 per cent; and stressed that the Government had increased family allowances to compensate poorer families for the higher bread price, and had also introduced a Bill providing for special grants to families with many children. Dr. von Fieandt dwelt on the compromise nature of the Government's decision, and emphasized that the precarious position of the Treasury made any further subsidies impossible.

The Social Democrats' censure motion was supported not only by the Communists but also by the Agrarians.

After consulting the leaders of the various parties, and ascertaining that it would be impossible to form a majority government under present circumstances, President Kekkonen called on Dr. Reino Kuuskoski (director of the National Pensions Institution, and a former Minister of Justice) to examine the possibility of forming a Cabinet. Only the dissident Social Democrats [see below], however, were willing to serve under Dr. Kuuskoski, whilst the Agrarians, the majority of the Social Democrats, the Swedish and Finnish national parties, and the National Coalition Party all declined to do so. Dr. Kuuskoski thereupon decided to form a non-party government of officials, businessmen, and trade union representatives, his Cabinet being announced on April 26 with the following membership:

Dr. Reino Kuuskoski ..	Prime Minister.
Mme. Tyyne Leivo-Larsson	Deputy Premier and Minister without portfolio.
*M. P. J. Hynninen	Foreign Affairs.
Dr. J. O. Söderhjelm ..	Justice.
M. Harras Kyttä	Interior.
M. Lars Björkenheim ..	Defence.
M. I. O. Nurmela	Finance.
M. Kustaa Vilkuna	Education.
M. Pauli Lehtosalo	Agriculture.
M. Matti Lepistö	Deputy Minister of Agriculture.
*M. Paavo Kastari	Communications and Public Works.
M. Eero Antikainen ..	Deputy Minister of Communications and Public Works.
M. Lauri Kivekäs	Commerce and Industry.
M. Valdemar Liljeström ..	Social Affairs.

*Held same post in previous Government.

Dr. Kuuskoski, M. Vilkuna, M. Kastari, M. Lehtosalo, and M. Lars Bjorkenheim all belong to the Agrarian Union; Mme. Leivo-Larsson, M. Lepistö, and M. Liljeström are members of the dissident Social Democratic Party in the Diet; whilst M. Kyttä belongs to the Finnish National Party. M. Antikainen (chairman of the Finnish T.U.C.) and M. Liljeström (chairman of the Metalworkers' Union) represent the trade union movement; industry is represented by M. Kivekäs and M. Söderhjelm; and commerce by M. Nurmela. It was emphasized, however, that all the members of the new Government were serving in a personal capacity and did not represent the parliamentary groups to which they belonged.

In a broadcast on April 26, Dr. Kuuskoski said that in view of the unstable political and economic conditions, the Cabinet would act as a caretaker Government pending the elections in July. It would deal with outstanding business in conformity with the law and the decisions of Parliament; try to ensure the solvency of the State and apply strict economies; and reduce expenditure caused by unemployment, while working out an unemployment insurance scheme. In foreign affairs it would continue the country's traditional policy of neutrality and maintain good relations with all States, especially the Soviet Union and the Scandinavian countries.

On May 2 the new Government introduced a Bill asking for special powers to fix the prices and selling conditions for imported rye and wheat to be sold by the State cereal depot. The Bill laid down that in fixing such prices regard must be had to maintaining the cost of living within reasonable limits, as well as to the furtherance of home cereal production.

Split in Social Democratic Party.

Following their expulsion from the Social Democratic Party, the three deputies belonging to the minority opposed to M. Tanner's leadership—M. Simonen, M. Liljeström, and M. Lepistö—decided on March 27 to form an "Independent Social Democratic" group in the Diet. During April they were joined by another deputy, Mme. Malkamäki, who had been rejected by the Social Democratic Election Board as a candidate for the general elections, in conformity with the party leadership's earlier decision to reject all candidates belonging to the minority. The Trade Union Federation decided to support the new party, whereupon the Social Democrats threatened on April 10 to form a new trade union confederation unless the T.U.F. abandoned party politics, ceased its support for the dissident Social Democrats and their newspapers, readmitted members and trade unions which it had expelled, and admitted newly-formed trade unions to membership—in particular the Electricians' Union and the Port Workers' Union.—(Finnish Ministry of External Affairs, Helsinki) **(Prev. rep. 15950 D; 15876 A.)**

B. UNITED KINGDOM. — Royal Empire Society renamed Royal Commonwealth Society.

The chairman of the Royal Empire Society (Earl de la Warr) announced on May 8 that the society would henceforth be known as the Royal Commonwealth Society, the change of name having been approved by H.M. the Queen by Order-in-Council.

After explaining that the decision had been taken on advice received from the Society's branches in all parts of the Commonwealth, Lord de la Warr said: "The bulk of the Society's members are overseas, and there is no question that in Dominions like Australia and Canada our work will be tremendously strengthened when we make this change. As an Empire Society we could not exert the influence we should be able to do. The change is going to enable us to do a great deal more in the new Commonwealth countries such as Ghana and Malaya . . . All we are doing is recognizing reality. Our old name was holding up our development in the new Commonwealth territories. We just would not have made any headway—particularly with younger people."

Lord de la Warr also pointed out that the former chairman of the Society (Sir Charles Ponsonby) had travelled extensively throughout the Commonwealth in 1957 and had found overwhelming evidence that the word "Empire" was holding up the work of the Society, and a strong demand for its replacement.

Of the 29,000 members of the Society, some 22,000 are overseas. There were 3,000 replies to a circular letter seeking opinions on the change of title, the ratio in favour being 12 to one. In addition, many overseas branches—including most of the Australian branches—had passed resolutions favouring the change of name. (Times - Daily Telegraph)

A. UNITED KINGDOM.—The H-Bomb Controversy. - House of Commons Questions on Nuclear Bomber Flights over Britain. - Statements by Mr. Macmillan and Mr. Butler. - Nuclear Disarmament Campaign. - The Aldermaston March. - Mr. Macmillan's Reply to Scientists' Petition. - University Referenda.

During recent months the Prime Minister was closely questioned by a number of Opposition M.P.s on the subject of flights over Britain by H-bomber patrols of the R.A.F. and the U.S. Air Force. Particular attention was drawn to the danger of radioactivity in the event of the crash of an aircraft carrying a nuclear weapon, and to the risks involved in flights over Britain by aircraft carrying such weapons. Mr. Macmillan and Mr. Butler gave assurances on these and a number of related matters in reply to numerous questions in the House of Commons in December 1957 and February and March 1958.

House of Commons Questions. - Government Statements.

In reply to questions on Dec. 3, 1957, by Mr. Roy Mason and other Labour M.P.s, Mr. Macmillan said that it was "clearly necessary for all forces, whether American or British, to operate with their weapons on board; it is the only way they can learn to handle them." He emphasized, however: (1) that the weapons were not armed; (2) that the process of arming them was "quite an operation"; and (3) that U.S. bombers based in Britain could not be used for military operations except with the agreement of the British Government. Mr. Macmillan added that "all these cases are covered by the Churchill-Attlee understandings."

Further questions were asked on Dec. 12 by Mr. Arthur Henderson, Mr. Shinwell, Mrs. Barbara Castle, and other Labour members.

Mr. Henderson asked the Prime Minister "what change in the international situation led to the decision by H.M. Government, in conjunction with the U.S. Government, to place the U.S. and R.A.F. bomber squadrons in the United Kingdom in a state of readiness as from Oct. 1"; while **Mr. Shinwell** asked what representations had been received from the U.S. Government "suggesting that the R.A.F. be placed in a state of readiness in conjunction with the U.S. bomber force."

Mr. Macmillan replied: "The state of readiness of our air forces and those of the United States are matters for our respective Governments, though naturally there is close co-operation between us. No representations have been received in respect of the readiness of our air forces, and H.M. Government have made none to the U.S. Government. Naturally it is the aim to continue to improve the state of readiness. The present state of readiness is a manifestation of that aim, and is not connected with any change in the international situation."

Mrs. Castle asked the Prime Minister to what extent U.S. aircraft carrying hydrogen bombs on patrol in Britain were also carrying the apparatus which would enable the bombs to be armed in flight.

Mr. Macmillan replied: "U.S. aircraft carrying nuclear weapons also carry the apparatus for arming them. I have the assurance of the U.S. Government that the pilots have specific instructions not to arm weapons until they are directly ordered to do so in order to carry out an operation of war, and that in that event the arming would not take place until the latest moment necessary for the execution of the operation. I must repeat that such an order could be given only after agreement between the two Governments."

Mrs. Castle: "Does not that answer reveal that the Prime Minister gave a misleading impression to the House [on Dec. 3] when he said there was not really any danger in patrol and training flights because these bombs were not armed? Did he not give the impression that the arming of these bombs was a long and difficult process? Is it not now clear that these bombs can be armed in flight in a matter of minutes by remote control from the crew cabin? Does not this mean that the bombs are armable within a few minutes during patrol flight?"

Mr. Macmillan: "I do not think I gave any wrong impression to the House . . . I tried to describe the operation by saying that these bombs were in existence but were not fused, thinking of the experience we had with minor weapons which were kept in a certain position until fuses were put into them. This is exactly the same, except that the fuse is a much more complicated and elaborate instrument than the older fuses of which I was thinking. I tried to give, and did give, an exact description to the House."

Mr. Butler, Home Secretary and Lord Privy Seal, made the following statement to the House on Feb. 4, 1958, on the carrying of nuclear bombs in British and U.S. aircraft:

"It is necessary for the maintenance of the deterrent that aircraft of the R.A.F. and U.S.A.F. should from time to time carry nuclear weapons over the United Kingdom. Such flights take place infrequently and dummy bombs are used whenever possible. When real bombs are carried it is only on special operational exercises and on training exercises which involve moving aircraft from one airfield to another with their weapons.

"Bombs carried on such flights are never ready for instantaneous use. As the Prime Minister explained on Dec. 12, aircraft carrying nuclear weapons also carry the apparatus for arming them. The process of arming would require an elaborate technical procedure by the crew of the aircraft, and in no circumstances could bombs be armed by accident.

"As regards danger from a crash of an aircraft carrying a nuclear weapon, the risk from radiation, if any, would be small. Contamination of the ground, if it existed at all, would be limited to the immediate vicinity of the crash and could be dealt with in due course by special military teams.

"For these reasons it has not hitherto been considered necessary to add any special instructions relating to aircraft carrying nuclear weapons to the standard instructions issued to local services, such as the police and fire brigades, on action to be taken in relation to crashed aircraft. These standard instructions are kept continually under review and will be added to and amended if necessary.

"As regards U.S. aircraft operating from bases in this country, the position is that in accordance with the understanding reached by Lord Attlee and confirmed afterwards by Sir Winston Churchill, the operational use of these bases in an emergency would be a matter for joint decision by H.M. Government and the U.S. Government. It would not be in the interests of this country for me to disclose details of operational procedure."

On March 13 the Prime Minister answered 14 questions from Labour M.P.s, as well as a number of supplementaries, arising out of the incident in South Carolina in which a nuclear bomb was dropped from a U.S. aircraft [see 16180 C].

Mr. Macmillan said: "The cause of the recent accident in the United States was quickly known. Consequently, the U.S. authorities were able to inform us almost immediately of the new arrangements which should prevent any repetition. These new arrangements are known to all concerned. As regards the result of the accident, preliminary reports appear to confirm the statements which the Minister of Defence, the Lord Privy Seal, and I have made about the possible damage from an accident of this sort. With regard to the carriage of nuclear weapons by aircraft using U.K. bases, the position is as stated by the Lord Privy Seal on Feb. 4. Nuclear weapons are only carried on special operational exercises, or on training exercises in which it is necessary to transport the weapons with their aircraft from one airfield to another. Bombs carried in these exercises are never ready for instantaneous use. The process of arming the bombs requires an elaborate procedure by the crew of the aircraft, and the bombs cannot be made ready for use accidentally."

Campaign for Nuclear Disarmament. - Appeal for Suspension of Nuclear Tests. - The Aldermaston March.

In addition to the Labour Party-T.U.C. decision to launch a national campaign for disarmament and the immediate suspension of nuclear tests [see 16151 A], similar campaigns were announced during the first few months of 1958 by a number of unofficial organizations of varying size and importance. The largest of these organizations was launched in February under the name of the Campaign for Nuclear Disarmament, with Earl (Bertrand) Russell as its president and Canon L. J. Collins (of St. Paul's Cathedral) as chairman of its executive committee. Disclaiming any political ties, the organization was launched "to demand a British initiative to reduce the nuclear peril and to stop the armaments race, if need be by unilateral action by Great Britain."

The other members of the executive committee included Mr. Michael Foot, editor of *Tribune* and former Labour M.P.; Mr. Ritchie Calder, the scientific journalist; Mr. J. B. Priestley, the novelist and playwright; Mr. James Cameron, of the *News Chronicle*; Mr. Howard Davies, treasurer of the United Nations Association; Mr. Kingsley Martin, editor of the *New Statesman*; and Lord Simon of Wythenshawe.

During the first week of April the Campaign for Nuclear Disarmament organized a 50-mile protest march from London to the Atomic Weapons Research Establishment at Aldermaston, Berkshire. About 4,000 marchers—many of them students and young people—left Trafalgar Square on April 4 after hearing speeches by Canon Collins and other leaders of the movement; although many of the marchers dropped out *en route*, over 5,000 people were present when the march ended at Aldermaston on April 7. After a number of speeches outside the A.E.R.E., the marchers dispersed after adopting a resolution (by show of hands) to be sent to 10, Downing Street, and to the American and Soviet Embassies. Apart from some scuffles at Aldermaston, the march was uneventful and was completed without incident. The marchers included Mr. Frank Allaun, Labour M.P. for Salford East, and Dr. Donald Soper, the Methodist leader, while the speakers at Aldermaston included Pastor Martin Niemöller, president of the Evangelical Church in Hesse and a leading figure in the West German "anti-nuclear" campaign.

At the beginning of May the Campaign for Nuclear Disarmament sent an appeal to the Prime Minister, signed by several bishops and heads of universities and colleges, calling upon the Government to suspend further tests of atomic and hydrogen weapons and not to support proposals for the supply of atomic weapons to Western Germany.

The 71 signatories included the Bishops of Birmingham and Llandaff, the Moderator of the Church of Scotland (Dr. Macleod), the Vice-Chancellor of Glasgow University (Sir Hector Hetherington), the Principal of St. David's College, Lampeter (Canon J. R. Lloyd Thomas), the Principal of University College, Bangor (Sir Emrys Evans), Lord Boyd-Orr, Sir Compton Mackenzie, Dame Peggy Ashcroft, and Mr. Denis Matthews, the pianist.

Prime Minister's Reply to Petition by Scientists.

The text was published on May 2 of the Prime Minister's reply to a petition by 618 British scientists, including 69 Fellows of the Royal Society, urging that "an international agreement to stop the testing of nuclear bombs be made now." The petition was forwarded to Mr. Macmillan by Earl Russell, who said in a covering letter that he personally felt it "intolerable that Britain should continue its present series of tests despite the suspension by the Soviet Government"; Lord Russell added that "a unique opportunity now exists to reduce the nuclear peril which confronts us all."

Among Fellows of the Royal Society signing the petition were Lord Boyd-Orr, Sir Charles Darwin, Sir Alfred Egerton, Sir James Gray, Sir Julian Huxley, Sir Joseph Hutchinson, Sir Ben Lockspeiser, and Professors Max Born, J. D. Bernal, J. B. S. Haldane, Lancelot Hogben, and C. F. Powell, in addition to Earl Russell.

Mr. Macmillan replied to Earl Russell as follows:

"I note that there is a significant difference between the terms of the petition which the scientists signed and those of the covering letter which accompanied it. The petition calls for an international agreement to stop the testing of nuclear bombs now. You, in your covering letter, ask for an immediate end to the present series of British nuclear tests.

"I, no less than the signatories to the petition, have a deep concern for the welfare of all human beings. The whole British people share that concern . . . which is not confined to those who participate in demonstrations or sign petitions to urge the ending of our tests now. It is this very concern which leads me and my colleagues to doubt the wisdom at the present time of the suspension of British tests, and to fear that such a step now would increase and not lessen the danger of war, with the wholesale slaughter that modern war would mean.

"The position of H.M. Government, which has been frequently explained in the House of Commons and elsewhere, is that unilateral declarations of intention to suspend tests are in themselves of little value, and that the suspension of tests should not be considered in isolation from other aspects of disarmament.

"What is needed in this field, as in other disarmament matters, is an international agreement including adequate measures of inspection and control. H.M. Government hope that it will be possible to reach a disarmament agreement, which would include the suspension of nuclear tests, or at least to make progress toward such an agreement, at a meeting of Heads of Governments. H.M. Government wish to see such a meeting take place in conditions which offer a chance of success. For that reason they are at the moment, in concert with their allies, conducting negotiations with the Soviet Union with a view to arranging a meeting of Heads of Governments.

"I cannot accept that it is the view of a large majority of the British people that the present series of British tests should be suspended. I know of no scientific evidence for the assertion to this effect in your letter. On the contrary, I believe that the people of this country recognize that, in the absence of a disarmament agreement, it is essential to rely upon the nuclear deterrent in order to prevent aggression . . . I believe also that the British people would not consider that they were taking a moral stand, or contributing to a genuine solution of these problems, if this country were simply to abandon its contribution to the nuclear deterrent and leave to the United States the sole burden of protecting the free world against possible aggression . . .

"It must never be forgotten that the whole purpose of our policy is to save countless millions from death and suffering. This must be balanced against possible future hazards associated with nuclear tests . . ."

A petition signed by 204 professors, readers, lecturers, and research workers at London University had previously been sent to the Prime Minister by Professor D. V. Glass, Professor of Sociology in the University. It called for international negotiations on disarmament and asked that, pending such negotiations, the British Government (1) should suspend patrol flights of aircraft equipped with nuclear weapons, (2) should make no further tests of H-bombs, and (3) should not establish missile bases on British territory. The text of letters exchanged between Mr. Macmillan and Professor Glass on this matter was released on March 28.

University Referenda on Nuclear Disarmament.

A referendum on nuclear disarmament, in which all Oxford undergraduates were asked to reply to seven questions, was organized at Oxford University in the first fortnight of March by the University Committee of the Campaign for Nuclear Disarmament. The questions, and the replies received, were as follows:

(1) *Does Britain's possession of the H-bomb decrease the risk of total war?*
Yes, 37 per cent; No, 47 per cent; Doubtful, 12 per cent; No response, 4 per cent.

(2) *Does the argument that Britain's possession of the hydrogen bomb gives her greater influence in negotiations provide a sufficient reason for indefinite retention of the bomb?*
Yes, 32 per cent; No, 55 per cent; Doubtful, 7 per cent; No response, 6 per cent.

(3) *Should Britain press for agreement on nuclear disarmament without necessarily linking it with an agreement on general disarmament?*
Yes, 47 per cent; No, 42 per cent; Doubtful, 7 per cent; No response, 5 per cent.

(4) *Should Britain stop testing bombs (a) unconditionally; (b) until new attempts have been made to reach agreement with the Soviet Union?*
(a) Yes, 40 per cent; (b) Yes, 60 per cent; No, 31 per cent; Doubtful, 5 per cent, No response, 4 per cent.

(5) *Should Britain stop the establishment of missile bases on her territory (a) unconditionally; (b) until new attempts have been made to reach agreement with the Soviet Union?*
(a) Yes, 31 per cent; (b) Yes, 49 per cent; No, 10 per cent; Doubtful, 6 per cent; No response, 4 per cent.

(6) *Should Britain suspend patrol flights of aircraft carrying nuclear weapons over her territory even at the risk of straining the Anglo-American alliance?*
Yes, 38 per cent; No, 50 per cent; Doubtful, 8 per cent; No response, 4 per cent.

(7) *Should Britain do everything within her power, including, if need be, renunciation of her own nuclear arms, to stop any further countries acquiring or developing nuclear weapons?*
Yes, 53 per cent; No, 20 per cent; Doubtful, 10 per cent; No response, 7 per cent.

Of the 8,233 undergraduates in the University (7,043 men and 1,190 women), 4,015 replied to the questions asked representing 49.8 per cent of the men students and 55.1 per cent of the women students. The "anti-bomb" percentage was in general 15 to 20 points higher at the women's colleges than at male colleges.

Similar undergraduate polls were conducted during March at the Universities of London, Glasgow, Liverpool and Nottingham. (Times - Daily Telegraph - Manchester Guardian)

A. SWITZERLAND. — Federal Franchise for Women.

The Swiss National Council (the Lower House of Parliament) adopted on March 20, by 95 votes to 87, a Government proposal to amend the Federal Constitution so as to give women the right (i) to vote in Federal elections; (ii) to be elected as members of the National Council and the Federal Council (the Government), and (iii) to be appointed judges of the Supreme Federal Court.

The decisive amendment was to Article 74 of the Federal Constitution, the revised version of which, however, makes it clear that women's franchise in cantonal and municipal affairs would be a matter for each Canton to decide. [This also affects the eligibility of women to sit in the Council of States (the Upper House of the Federal Parliament), since the members of that House are elected by the Cantons according to cantonal law.] Because of the resulting increase in the Federal electorate, the Government's proposal also provided that the minimum of signatures for demanding a referendum should be increased from 30,000 to 60,000, and for a legislative initiative from 50,000 to 100,000; this change was approved by the National Council.

The Council of States had previously endorsed the Government's proposals on Oct. 2, 1957, by 19 votes to 14, but in view of small textual amendments made by the National Council the Bill had to be referred back to the Council of States for its consent. When this is given, the proposed revision of the Constitution will be subject to a referendum in which the electorate will be asked to reply to the question: "Do you agree that women should possess the franchise in Federal matters?"

In its message of Feb. 23, 1957, proposing the granting of the franchise to women, the Federal Council had pointed out that, apart from Liechtenstein, Switzerland was the only country in Europe in which women were not yet enjoying full political rights. Several proposals had been made in recent years to extend the cantonal franchise to women in the Cantons of Geneva, Basle, and Zürich, but all had been rejected by the male electorate. The first change in this attitude occurred on Nov. 3, 1957, when a proposal to give women in the Canton of Basle City the right to vote in municipal elections was approved in a referendum by a three-to-two majority, though only 35 per cent of the electorate took part; this change, however, has not yet been implemented because of the need to revise the cantonal legislation on municipalities and, thereafter, to obtain in each municipality the consent of its voters in a referendum.—(Neue Zürcher Zeitung)

A. CEYLON. — The Language Controversy. - Federal Party's Campaign against Use of Sinhalese Symbol on Buses. - Abrogation of Agreement between Government and Federal Party. - Civil Disobedience Campaign by Federalists.

Following a period of renewed tension between the Sinhalese and Tamil communities in Ceylon, the Prime Minister (Mr. Bandaranaike) announced on April 9 that the Government would not proceed with the implementation of the agreement on the official language question which it had concluded with the Federal Party on July 26, 1957. Developments leading up to this decision are described below.

Considerable opposition to the agreement had been expressed by the United National Party and by Sinhalese communal and Buddhist organizations during the second half of 1957.

On Sept. 7 Mrs. Rajaratna, who put forward the demand for the abrogation of the agreement, was returned in a by-election in the predominantly Sinhalese constituency of Welimada, receiving 80 per cent of the votes. A ceremony to invoke the intervention of the gods to prevent division of the country, at which the agreement was denounced as a threat to religion and the nation, was held on Oct. 8 at the Temple of the Tooth in Kandy, one of the most sacred Buddhist shrines; during the ceremony fighting broke out outside the temple, and the police had to use batons to disperse the crowds. Opponents of the agreement had planned a Colombo-to-Kandy march to attend the ceremony, but the projected march (organized by Mr. Jayewardene, vice-president of the United National Party) was turned back by the police on Oct. 4 to prevent a possible breach of the peace. Threats by Sinhalese organizations to launch a civil disobedience campaign if the agreement were not repudiated by Oct. 1 failed to materialize, however, and for some months thereafter the situation remained peaceful.

Discussions on the implementation of the agreement meanwhile continued between the Government and the Federalist leaders. Progress was delayed by the Federalists' insistence that the two Bills involved—the Tamil Language Bill and the Regional Councils Bill -should be ready at the same time, and that the latter should include a detailed statement of the Councils' powers *vis-à-vis* the Central Government.

The agreement had provided that the Northern Province should form one regional area, and the Eastern Province two or more; that regions should be permitted to collaborate, amalgamate, or divide themselves; that regional councillors should be directly elected; that the Councils should have powers over specified subjects, including agriculture, co-operatives, lands and colonization, education, health, industries, fisheries, housing, social services, electricity, water schemes, and roads; that they should be empowered to decide to whom lands should be allotted and who should be employed under colonization schemes; and that they should receive block grants from the Government and should have powers of taxation and borrowing.

The situation suddenly deteriorated at the end of March 1958, when the Federal Party organized a campaign in the Tamil-speaking Northern and Eastern Provinces against the use of the Sinhalese symbol "Sri" on the number-plates of Government-owned buses. Their supporters took to daubing tar on this symbol, whilst Sinhalese-speakers retaliated by defacing Tamil letters on road signs and shop windows. On April 2 Tamil demonstrators stoned the police station at Bogawantalawa (90 miles from Colombo), whereupon the police opened fire, killing two plantation workers of Indian origin. Their funeral was attended by nearly 80,000 plantation workers and led to a *hartal* (general stoppage of work) in the Northern and Eastern Provinces on April 5. Two days earlier two Sinhalese had been fatally stabbed and many people injured in a clash between Tamil and Sinhalese demonstrators near Ratnapura, 60 miles east of Colombo.

Speaking in the House of Representatives on April 8, Mr. Bandaranaike said that during discussions with the Federalist leaders in March he had reached an understanding with them about the Tamil Language and Regional Councils Bills, which were being delayed only by the preparation of the schedule to the latter on the division of powers between the Councils and the Government. During the discussions, however, the Federalist leaders had said nothing about the use of the "Sri" symbol in Tamil districts. The Transport Board had sent new buses to these districts because complaints had been received that most of those plying on the northern routes were old ones, and nothing had happened until trouble was deliberately created. During the previous campaign in 1957 against the use of the "Sri" symbol [see 15643 A] the Sinhalese had not retaliated in any way, but the new campaign had proved to be "the last straw"; moreover, the situation had been taken advantage of by "certain elements who always emerge on such occasions." After paying tribute to the attitude of the Indian community, and particularly of Mr. Aziz (president of the Democratic Workers' Congress), who had refused to support the "anti-Sri campaign," Mr. Bandaranaike said that the Government would not allow what had happened to stand in the way of just action towards the minorities, although the position had been made much more difficult and embarrassing.

Before the Cabinet met on April 9 to discuss the situation, a large number of Buddhist monks demonstrated near the Prime Minister's residence and presented to Mr. Bandaranaike demands for the abrogation of the Government's agreement with the Federalists, the implementation of the Official Language Act, the banning of the Federal Party, and the repatriation of stateless Indian labourers. Later the same day Mr. Bandaranaike announced in a broadcast that the Government had decided not to proceed with the implementation of the agreement.

Mr. Bandaranaike stated that the Cabinet had decided that the "Sri" symbol which had been defaced on certain buses should be restored, and that legal action should be taken against anyone who tampered with this symbol or committed similar illegal acts in any part of Ceylon. After declaring that the Federalists' action had "created a new situation," he continued: "While assuring the Tamil people that the Government will do what it always intended to do in justice to them, I must say that this recent action on the part of the Federal Party has not made it possible to proceed with the implementation of the agreement as contemplated, in view of the feeling created in the country by the Federal Party's action. Further consideration of the problem has now become necessary." The Prime Minister concluded by appealing to all Ceylonese to help in removing the tension in the country, and not to be misled by "mischievous or misguided elements."

Support for the Government's action was expressed by Mr. Dudley Senanayake, leader of the (Opposition) United National Party.

The Federal Party issued a statement on April 10 calling upon all Tamil-speaking people to embark on a non-violent civil disobedience movement of such magnitude as to make the prisons inadequate to accommodate them, in order to secure an honourable place in the community for themselves and their language. The statement accused the Government of surrendering to pressure from the Buddhist monks and failing to prevent or control Sinhalese hooliganism; it declared that the only alternatives before the Tamils were "to fight back for sheer survival or to be for ever content to remain a subject race."

About 100 Tamils, including Mr. Chelvanayakam (the Federal Party leader), seven other M.P.s, a Senator, and the wives of two M.P.s, were arrested on April 10-14 for defacing the number-plates of buses, but were subsequently released on bail. Federal Party spokesmen said that they also planned to court arrest by refusing to pay taxes and by travelling on Government buses without tickets, and that when arrested they would refuse to pay fines and insist on going to prison. The campaign, however, was not supported by the Democratic Workers' Congress or the Ceylon Workers' Congress, which together represent about 1,000,000 Tamil-speaking Indian estate workers.—(Ceylon Government Information Department - Times - Manchester Guardian - The Hindu, Madras)

B. UNITED KINGDOM. — Motor Industry. - Production and Exports in 1957 and First Quarter of 1958.

Figures published by the Society of Motor Manufacturers and Traders on Jan. 21, 1958 showed that the British motor industry produced 1,150,964 vehicles in 1957, compared with 1,006,203 in 1956. The 1957 output comprised 860,842 private cars and 290,122 commercial vehicles, as compared with 707,594 private cars and 298,609 commercial vehicles in 1956.

Exports of motor vehicles and agricultural tractors in 1957 totalled 664,520 valued at £324,231,676, compared with 555,986 valued at £250,947,338 in 1956. The 1957 total comprised 462,272 cars (a record), 123,288 commercial vehicles, and 114,965 tractors.

The largest oversea market for private cars was again the United States, which took 94,867 valued at £39,588,284, followed by Australia (49,056), South Africa (42,001, nearly twice as many as in 1956), New Zealand (32,900), Canada (28,872), Sweden (20,269) and Belgium (17,611). The largest number of commercial vehicles (15,908) went to Australia, followed by South Africa (13,171), New Zealand (8,060), and British West Africa (7,162). Australia also headed the list for agricultural tractors, with 20,302, followed by South Africa (9,647) and New Zealand (9,117).

The Society announced on April 24 that about 365,000 motor vehicles were produced in the first quarter of 1958, the output of cars in March (109,000) having exceeded the 100,000 mark for the first time in any month. Over 132,000 cars and nearly 36,000 commercial vehicles were exported, the total value of exports of cars, commercial vehicles, agricultural tractors, and spares being approximately £129,000,000. A. WESTERN GERMANY - SOVIET UNION. — Signing of Trade, Shipping, and Consular Agreements. - Arrangements for Mutual Repatriation of Nationals.

Following negotiations which had extended over nearly nine months, and which were repeatedly suspended, agreements on trade, shipping, and consular relations were initialled in Moscow on April 8 between the German Federal Republic and the Soviet Union. Informal arrangements were also concluded on the repatriation of certain groups of German nationals in the U.S.S.R. and of Soviet nationals in Western Germany.

Talks between a German delegation led by Dr. Rudolf Lahr and a Soviet delegation headed by M. Semeonov (a Deputy Foreign Minister, and formerly High Commissioner in Eastern Germany) had opened in Moscow on July 23, 1957, following lengthy Note exchanges in which the German Federal Government insisted that the question of repatriation of German nationals from the Soviet Union should be included on the agenda of the talks—a proposal which the Soviet Government rejected [see page 15631]. In a Note of July 6, however, the Soviet Government said that while the number of German nationals still in the Soviet Union was "quite insignificant," and while the repatriation question would be better left to the Red Cross organizations of the two countries, this "does not exclude the possibility that some practical questions might arise . . . with regard to the carrying-out of measures for the repatriation of individual German citizens from the Soviet Union or of the return of displaced Soviet nationals from the Federal Republic, and these questions could be the object of specific discussion during the forthcoming talks." This statement was regarded by the Federal Government as implying that the U.S.S.R. would no longer insist on the exclusion of the repatriation question from the agenda.

Nevertheless, when the talks opened on July 23 the Soviet delegation refused to discuss repatriation, and the discussions were suspended on July 31 after the West German Government had recalled Dr. Lahr for consultations. Following an exchange of Notes between M. Gromyko and Dr. von Brentano (the two Foreign Ministers) the talks were resumed on Aug. 14, but in view of continued Soviet insistence on excluding the subject of repatriation Dr. Lahr was again recalled to Bonn on Aug. 16. The talks were again resumed on Aug. 26, but a further breakdown occurred when M. Semeonov, in a letter to Dr. Lahr published on Sept. 3, stated that the Soviet Union was prepared to discuss a trade and consular agreement but maintained her original assertion that no repatriation problem existed. M. Semeonov added that if Western Germany insisted on its proposal to suspend the talks on trade and consular questions because of the Soviet attitude on the repatriation question, the Federal Government "would have to bear full responsibility for the breakdown of the talks and the attendant consequences."

After a prolonged deadlock, which coincided with the Federal elections in Western Germany, the talks were resumed on Nov. 14, 1957, and from then onwards continued without interruption.

The agreements initialled on April 8, 1958, comprised (*a*) a three-year trade and payments agreement; (*b*) a protocol on trade exchanges in 1958; (*c*) a general agreement on commerce and navigation; (*d*) a consular convention; (*e*) an agreement on repatriation. In addition, the two delegations made verbal declarations giving further details of the repatriation arrangements, but it was stated in Bonn that it had been agreed that these declarations would not be published in the Soviet Union.

The joint communiqué gave the following details of the various agreements:

Long-term Trade and Payments Agreement. This was concluded for the three-year period 1958-60, and laid down lists of goods for Soviet-West German trade exchanges, as well as the procedure for trade and payments between the two countries. Aimed at making the commercial relations between the two countries "more stable and lasting," it provided for a considerable annual expansion of mutual trade, which by 1960 would amount to some 1,200,000,000 roubles, or about 1,260,000,000 Deutschemarks—approximately double the 1957 figure. The total volume of deliveries agreed for the period 1958-60 would amount to 3,000,000,000 roubles, or about 3,150,000,000 DM. The lists of goods would be specified and extended each year by supplementary agreements between the two countries, and it was therefore expected that total trade exchanges would exceed the above-mentioned amounts within the three years.

The lists of goods annexed to the agreement provided that the Soviet foreign trade organizations in the German Federal Republic would place large orders for various kinds of machinery and equipment for supply to the U.S.S.R. within the three-year period. These orders would include equipment for the mining and steel industries, heavy forges, automation machinery, heavy machine-tools for the metallurgical industries, equipment for chemical industries (in particular for the manufacture of artificial fibres), equipment for whaling ships and floating factories, cables, chemical products, certain steel products, and other goods, including certain consumer goods. In return, the Soviet Union would supply Western Germany with timber, cellulose, oil and oil products, wheat, coal, asbestos, manganese and chrome ores, machinery and equipment, cotton, flax, hemp, tobacco, certain chemical products, and a number of raw materials.

Trade Protocol for 1958. This laid down the exact lists of commercial exchanges for the current year.

Agreement on General Questions of Commerce and Navigation. This provided for most-favoured-nation treatment in Customs and other matters connected with the export and import of merchandise. It also regulated shipping questions, and provided for the setting-up of a Soviet trade representation in Western Germany, defining its legal status.

Consular Convention. This placed consular relations between the two countries on a treaty basis, ensuring the effective protection of nationals of both countries, as well as of their trade and shipping interests. It was stated that its practical effect would be confined at present to the consular departments of the Federal German Embassy in Moscow and the Soviet Embassy in Bonn, but it would form the basis of the activities of any consulates which might be set up in future.

Repatriation. The communiqué said: "During the talks on questions relating to the reciprocal repatriation of nationals of the two countries, it was agreed that the Soviet authorities would give favourable consideration to applications by individual German nationals for exit permits from the U.S.S.R. to the German Federal Republic. Conversely, the German Federal authorities would give the same treatment to applications from Soviet nationals now in the Federal Republic and wishing to leave for the Soviet Union. Both sides declared . . . that they supported the principle of reuniting families separated by the Second World War, and agreed that they would act in accordance with their respective legislation. They also agreed that co-operation between the two Red Cross societies would be continued."

The verbal Soviet declaration on the repatriation question said that, in addition to the arrangements mentioned in the communiqué, the Soviet authorities would examine and decide "in a positive way" the "practical questions arising in connexion with applications of those German nationals who possessed German nationality on June 21, 1941 [the date of the Nazi invasion of the Soviet Union], were still in the Soviet Union, and wished to leave for the German Federal Republic with their wives and children." The sole "decisive criterion" for these people would be their possession of German nationality at the above date.

It was stated that this arrangement would not cover (*a*) persons of non-German ethnic origin who had settled in the Memel area after 1918; (*b*) persons who, coming from Eastern European countries, had settled in the former Reich between 1939 and 1941 but were now Soviet nationals. [These persons—the so-called "treaty settlers" of German descent—were collected between 1939 and 1941 from the Baltic States, Bessarabia, Volhynia, and other parts of what is now the Soviet Union, brought to Germany and German-occupied Poland under the Molotov-Ribbentrop pact, and given German nationality in addition to Russian.] Nevertheless, individual applications from persons belonging to these groups would be "sympathetically" considered by the Soviet authorities if the persons concerned had families or near relatives in the Federal Republic, or if they and their families were ethnic Germans. In the case of mixed marriages, the decision would be taken by the Soviet authorities "in accordance with concrete circumstances, taking into account the interests of the family and of individual family members."

The above arrangements, however, would not apply to persons against whom criminal proceedings were pending in the Soviet Union or who were serving a sentence imposed by a Soviet court. The Soviet authorities expected that the repatriation measures arising from the above arrangements would be completed by the end of 1959.

It was added (*a*) that the Soviet delegation had "taken note" of the statement made by the German delegation that the German Federal Republic was likewise willing to examine "in a positive manner" the practical questions arising from applications by Soviet nationals in Western Germany wishing to be repatriated to the Soviet Union; and (*b*) that this arrangement would apply to all Soviet nationals who were at present in Western Germany owing to the war, as well as to their spouses and children.

The Soviet declaration reiterated that both sides would try to reunite families separated by the war; would act in accordance with their legislation; and had agreed to continued co-operation between the Soviet and West German Red Cross societies.

The verbal German counter-declaration took note of the Soviet statement and confirmed the willingness of the German Federal Republic to accede to applications by Soviet nationals wishing to leave Western Germany for the Soviet Union.

It was stated in Bonn that the repatriation agreement would affect first and foremost East Prussians and other inhabitants of the former Reich, as well as inhabitants of the Memel area before 1918; it was estimated that from 80,000 to 100,000 Germans had been deported to Russia after the Second World War from East Prussia and the Oder-Neisse territories. Of the "treaty settlers," whose number was estimated at about 200,000, only a minority would benefit from the agreements; the so-called "administrative settlers" who received German nationality as a result of the war would not be affected, except in very special cases. The Federal Foreign Ministry estimated that about 20,000 people might benefit from the agreement, although the figure would depend, firstly, on how many applied for repatriation, and secondly on the attitude of the Soviet officials.

M. Mikoyan's Visit to Western Germany. - Signing of Trade and Consular Agreements.

M. Mikoyan, the First Vice-Chairman of the Soviet Council of Ministers, arrived in Bonn on April 25 to sign the Soviet-German trade agreements and consular convention at the Federal Foreign Ministry. Dr. von Brentano signed for the German Federal Republic. During his stay in Bonn (April 25-26) M. Mikoyan had discussions with Dr. Adenauer, Dr. von Brentano, Professor Erhard (Federal Minister for Economic Affairs), and Dr. Gerstenmaier, president of the *Bundestag*.

After visiting Duisburg and the Hanover Trade Fair, where he invited senior executives of Krupp's to send representatives to Moscow, M. Mikoyan went to Stuttgart and Frankfurt. He left the latter city on April 28 for an official visit to Eastern Germany before returning to Moscow.

Speaking on April 25 at a dinner given in his honour by Dr. von Brentano, M. Mikoyan said that the Soviet Union was ready to guarantee that if the territory of the Federal Republic were free of nuclear and rocket weapons, the Soviet Union would refrain from using such weapons against objectives in Western Germany, even in the event of a military conflict in which the Federal Republic participated. He repeated this statement at a press conference on April 26 and also expressed the view that the opportunities presented by the "Rapacki Plan" were seriously under-estimated in Western Germany.

A communiqué issued in Bonn on April 28 stated that M. Mikoyan and the German Ministers had re-emphasized that they would do all in their power to ensure the implementation of the agreements signed in Moscow, and also of the verbal agreement on repatriation. It had also been agreed that talks would be held later in the year to place cultural, scientific, and technical relations between the two countries on a firmer footing. Soviet-West German relations in general and the present international situation had also been discussed, and both sides had emphasized that their respective Governments would do their utmost to ensure that existing problems were solved in a spirit of mutual understanding and by peaceful means, on the basis of non-interference in each other's internal affairs.

Earlier Repatriation of German Scientists from U.S.S.R. - Soviet-German Red Cross Agreements.

It was announced in Moscow on Jan. 20, 1958, that the Soviet Government had agreed to repatriate 21 German scientists, engineers and technicians (including a number of rocket experts) who had been detained in the U.S.S.R. since the end of the war and had been working for the Soviet Government. Exit visas were accordingly granted to the 21 scientists and their families, and the repatriates —54 persons in all— arrived back in Western Germany on Feb. 12-14, except for two who elected to remain in Eastern Germany.

A spokesman of the first group to return said that most of them had been connected with the V-1 and V-2 rocket projects during the war and had been taken in 1945-46 to the Soviet Union, where they had worked under contract until 1956. In the latter year they had been offered repatriation to Eastern Germany, and those who refused were sent to Suchumi, on the Black Sea, where they had lived in reasonable comfort. Their main task had been to provide the Soviet authorities with German scientific and technical knowledge, but neither they nor any of the other detained German scientists had worked on the Soviet earth satellite project.

A Red Cross delegation led by Dr. Weitz (chairman of the West German Red Cross) had visited Moscow in February 1957 for discussions with the Soviet Red Cross and especially with its chairman, Professor Miterev. The discussions dealt with the question of extending the family reunion scheme to Germans detained in the Soviet Union, but only limited progress was made on this question, since the Soviet Red Cross intimated that further decisions would be dependent on the conclusion of a consular agreement between the Federal Republic and the Soviet Union, as had been proposed by Marshal Bulganin. During Dr. Weitz's stay he agreed to a Soviet proposal that Soviet citizens living in the Federal Republic -numbering nearly 14,000 -should be given another opportunity to return to Russia if they wished; Dr. Weitz pointed out in this connexion that any Russian living in Western Germany, whatever nationality he might now possess, was free to return to the Soviet Union.

Professor Miterev and a Soviet Red Cross delegation paid a return visit to Munich in May 1957. An agreement was signed on May 20 between the Soviet and West German Red Cross Societies whereby both sides undertook to press their respective authorities to consider all requests for repatriation on purely humanitarian lines, and pledged their mutual support in trying to locate missing persons.
(Frankfurter Allgemeine Zeitung - Soviet Embassy Press Dept., London - Times) **(Prev. rep. 15625 A, page 15631)**

A. UNITED NATIONS. — Creation of Economic Commission for Africa.

The U.N. Economic and Social Council, meeting in New York, unanimously decided on April 29 to establish an Economic Commission for Africa, as recommended at the 12th session of the U.N. General Assembly [see page 16053, second column]. The E.C.A. was the fourth regional economic commission to be set up by the United Nations, the others being the Economic Commissions for Europe (E.C.E.), for Asia and the Far East (ECAFE), and for Latin America (ECLA).

The following decisions were taken by the Economic and Social Council in connexion with the setting-up of the Economic Commission for Africa:

Membership. This would be open to all African member-countries of the United Nations and all countries administering non-self-governing territories in Africa—i.e. to Belgium, Ethiopia, France, Ghana, Italy, Liberia, Libya, Morocco, Portugal, South Africa, Spain, Sudan, Tunisia, the United Arab Republic, and the United Kingdom.

Associate membership—with the right to participate in discussions but not to vote—would be open to the Nigerian Federation, Gambia, Kenya and Zanzibar, Sierra Leone, the Somaliland Protectorate, Tanganyika and Uganda. Applications would also be considered from other territories desiring associate membership. In addition, the U.N. specialized agencies and other inter-governmental bodies would be invited to participate in meetings, without voting rights.

Functions and Scope of E.C.A. The functions of the E.C.A. were defined as follows in a resolution drawn up by the Sudan in consultation with the other independent African nations: "To initiate and participate in measures for facilitating concerted action for the economic development of Africa, including its social aspects, with a view to raising the level of economic activity and the levels of living in Africa, and for maintaining and strengthening the economic relations of countries and territories in Africa, both among themselves and with other countries of the world."

It was laid down that the work of the Commission would encompass the whole of the African continent, together with Madagascar and other African islands.

Co-operation with Other Regions. The Council accepted a Polish proposal (by 11 votes to 2, with 5 abstentions) that the Economic Commission for Africa should establish "appropriate liaison and co-operation" with other regional economic commissions of the United Nations. The proposal was supported by Brazil, Costa Rica, Finland, France, Greece, Indonesia, the Netherlands, Poland, Sudan, the U.S.S.R., and Yugoslavia, and opposed by Mexico and the United States; the five abstentions were Canada, Chile, Nationalist China, Pakistan, and the United Kingdom.

The Sudanese representative (Mr. Yacoub Osman), as spokesman for the eight independent African nations, had previously proposed that membership of the E.C.A. should be open to (*a*) the independent African countries; (*b*) countries administering non-self-governing territories in Africa; and (*c*) the Soviet Union and the United States. The U.S. delegate (Mr. Christopher Phillips) believed, however, that the Commission's membership should be limited to African countries and those administering African territories; on the other hand, the Soviet delegate (Mr. Arkadev) felt that his country's participation would benefit the work of the Commission, and also stated that the Soviet Union would have no objection to U.S. participation. On a vote (taken on April 29), the Economic and Social Council decided against U.S. and Soviet membership by 12 votes to 5, with Finland abstaining.

The 12 majority votes were those of Brazil, Canada, Chile, Nationalist China, Costa Rica, France, Greece, Mexico, the Netherlands, Pakistan, the United Kingdom, and the U.S.A.; the five countries supporting Soviet and U.S. membership were Indonesia, Poland, Sudan, the U.S.S.R., and Yugoslavia.

Five African nations—Ethiopia, Ghana, Morocco, the Sudan, and the United Arab Republic—offered sites for the Commission's headquarters. Addis Ababa (the capital of Ethiopia) was chosen on a secret ballot, receiving 11 votes against three for Tangier, two for Cairo, and one each for Accra and Khartoum.—(U.N. Information Centre, London)

B. ANTARCTICA. — Joint Australian-American Co-operation in Maintenance of Wilkes Base.

It was announced in Canberra and Washington on May 7 that Australia and the United States had agreed to co-operate in maintaining the Wilkes Base (one of the U.S. scientific stations in the Australian Antarctic Territory) after the ending of the International Geophysical Year in December 1958. It was stated that the U.S.A. would contribute all buildings, facilities and supplies at the base; that Australia would provide the administrative services needed for its continued operation; and that scientists from both countries would take part in a programme of technical studies, research, and scientific observations.—(Australian News and Information Bureau - New York Times) **(Prev. rep. 16055 A.)**

A. UNITED KINGDOM. — Appointment of Select Committee into House of Commons Procedure.

A private member's motion for the appointment of a Select Committee to inquire into the procedure of the House of Commons was accepted by Mr. R. A. Butler (Leader of the House) on Jan. 31, after a debate in which many Members made suggestions for improvements in the methods of business in the House—e.g. press-button voting, devolution of functions to committees, and improved facilities for M.P.s.

The motion was introduced by Mr. Albert Oram (Lab.), who moved the appointment of a Select Committee "to consider the procedure in the public business of the House and to report what alterations, if any, are desirable for the more efficient despatch of such business."

Mr. Oram suggested that a Select Committee should examine the following matters, *inter alia*: whether it might not be possible for the House to meet more frequently in the mornings, rather than start its business in the afternoons [at present the House only sits in the morning on Fridays]; whether more use should not be made of committees for complex legislation; whether members might not impose on themselves a measure of "self-discipline" by making their speeches shorter; and whether there should not be a change in the present procedure whereby Privy Councillors were given precedence in debates as a matter of tradition.

Mr. Wedgwood Benn (Lab.), who seconded, said that the trouble was that M.P.s were faced with such a complexity of public business that they were "swamped," both collectively and individually. Legislation today was so complicated and complex that it was impossible for them to keep abreast of all important issues. He strongly refuted arguments—such as those advanced by Sir William Haley in a recent article in *The Times*—that Parliament to-day was unable to attract people of outstanding ability, but only "little men."

Sir Robert Boothby (C.), speaking as an M.P. of many years' standing, believed that the power and status of Parliament were considerably lower than when he first entered the House in 1924. This was not because M.P.s were "little men" but because of the complexity of the problems with which they had to deal and the pressure of public business, which it was almost impossible to handle under the present procedural rules.

He believed Sir William Haley's article in *The Times* had "got home" when it said: 'To-day mediocrity has little to offset it. The cheap jibes, the incessant accusations and counter-accusations, the mocking 'Ministerial cheers' and the inane cries of 'Resign,' the desperate fighting over things that do not matter, which probably hides from the participants themselves their poverty of ideas about those issues that do matter . . .' Sir Robert Boothby asked whether Members could "put their hands on their hearts and say that there was no element of truth in the article?"

The real dangers (Sir Robert continued) were those of growing bureaucracy and the rigidity of the party machines—the danger that the House would gradually cease to have any effective control over the Executive, particularly in public finance and expenditure and in administration. He did not agree that the function of the House was merely to criticize; it should exercise some control over the Executive. Under the present party system there was a growing tendency in the country to regard Members merely as "fuglemen of Abbey House and Transport House" [the respective headquarters of the Conservative and Labour parties]. As the present was an age of specialization, he believed that about five Standing Committees should be set up to deal with special subjects, with the possible exception of Finance Bills.

Mr. Glenvil Hall (Lab.) suggested that speeches could be limited by a system of coloured lights such as used in other Assemblies, e.g. that of Southern Rhodesia, which seemed to work well; **Mr. Peter Kirk** (C.) thought that a permanent Foreign Affairs Committee would help to keep the Government in touch with the views of back-bench members and with feeling in the country generally; **Mr. Geoffrey de Freitas** (Lab.) urged an all-party Standing Committee on Defence; and **Mr. Hugh Delargy** (Lab.) believed that some of the ancient ceremonial should be re-examined—e.g. the summoning of the House by Black Rod, which members found a disconcerting interruption of their debates.

Mr. Gresham Cooke (C.) thought that the present procedure laid a great strain on the health and strength of M.P.s and Ministers; many middle-aged men were deterred from entering the House because they could not face the irregular hours and bad working conditions. He thought that the time of a division could be cut from 14 minutes to seven minutes by electronic voting; he also suggested proxy voting, as in the French Parliament.

Mr. Butler, replying to the debate, agreed that the matter was ripe for further examination. The physical conditions in which Members had to do their work would not be tolerated in any other Commonwealth Parliament, and were completely different from those in the U.S. Senate or House of Representatives. Discussing the various ideas put forward, he agreed that more matters might be referred to Select Committees or Standing Committees as a method of devolution. The House, however, was already overcrowded in standing committee, and if they adopted this system they would have to limit the amount of legislation brought in. Moreover, the appointment of Standing Committees on Defence, Finance, Economics, or Foreign Affairs—"standing committees *à l'américaine*"—would be absolutely opposed to British constitutional development.

In conclusion, Mr. Butler accepted Mr. Oram's motion on behalf of the Government.

An all-party Select Committee was set up on Feb. 28 to examine this question, consisting of nine Conservatives, six Labour members and one Liberal.

The members were: Mr. Ronald Bell (C.), Mr. Wedgwood Benn (Lab.), Mr. F. Blackburn (Lab.), Sir Herbert Butcher (Nat. L. and C.), Lady Davidson (C.), Mr. Clement Davies (L.), Mr. Denzil Freeth (C.), Mr. A. Green (C.), Mr. Leslie Hale (Lab.), Mr. G. R. Mitchison (Lab.), Mr. A. Oram (Lab.), Mr. Charles Pannell (Lab.), Mr. J. Ramsden (C.), Mr. James Stuart (C.), Mr. A. Tiley (C.) and Mr. D. Vosper (C.).

The committee held its first meeting on March 20 under the chairmanship of Mr. James Stuart.

B. BRITISH COMMONWEALTH. — The Queen Mother's Visit to Australia and New Zealand.

At the invitation of the Governments of New Zealand and Australia, Queen Elizabeth the Queen Mother paid official visits to the two Dominions from Feb. 1 to March 7, spending a fortnight in New Zealand and three weeks in Australia. Her Majesty had last visited these countries in 1927 as Duchess of York. At her own request, the emphasis during the tour was on informal engagements rather than on ceremonial occasions.

The Queen Mother left London for Auckland (N.Z.) on Jan. 28, flying *via* Montreal, Vancouver, Honolulu and Fiji. During her fortnight's visit to New Zealand (Feb. 1-14) and her three weeks' visit to Australia (Feb. 14-March 7) her Majesty attended governmental and civic receptions, visited schools, hospitals, and other social institutions, met representatives of women's organizations, attended social, cultural and sporting events, and paid visits to large numbers of school-children assembled to greet her in both countries.

Among the places visited by the Queen Mother in New Zealand were Wellington, Auckland, Hamilton, Napier, New Plymouth, Palmerston North, Blenheim, Dunedin, Christchurch and Invercargill. Australian cities visited by her Majesty included Canberra, Sydney, Melbourne, Brisbane, Adelaide, Hobart, Launceston, Ballarat, Kalgoorlie, and Perth. Her Australian tour included visits to the Universities of Melbourne (where she received the honorary degree of Doctor of Laws), Sydney, and Queensland.

The Queen Mother arrived back in London on March 13, flying *via* Mauritius, Uganda and Malta.—(Times - Australian News and Information Bureau - N.Z. Government Office)

(Prev. rep. 14053 B.)

C. UNITED STATES. — A-Bomb Accident in South Carolina. - Air Force Statement.

An unarmed atomic bomb was accidentally dropped from a B-47 jet bomber on March 11 a few miles from Florence, South Carolina, and fell in the garden of a private house, making a crater 35 ft. deep and 75 ft. wide; the house was wrecked and its six occupants injured, one being taken to hospital. Five other houses and a church were damaged.

A statement was issued by Strategic Air Command H.Q., Omaha, explaining that the accident was due to "a mechanical malformation of the plane's bomb-lock system." Although there was no atomic explosion, as the bomb was un-triggered, there had been an explosion of the T.N.T. in the bomb's triggering device. The area had been cordoned off and placed under surveillance as a precautionary measure, but there was no need for any general evacuation. The statement added: "The potential danger in an incident of this type is possible contamination of a small area if a high-explosive charge completely destroys the weapon. Decontamination is a simple washing procedure and the area affected is relatively small."

Following an immediate thorough examination of the area, it was announced on March 12 by the Defence Secretary (Mr. McElroy) that it had been "established that there was no contamination from any scattering of nuclear material." On March 26 the U.S. Air Force ordered all bomber crews to "lock in" nuclear bombs while on practice missions as a precaution against accidents. (New York Times)

D. BRAZIL. — Ocean Outlet for Brasilia.

It was announced in April that the Federal Government would build a large port on the Maraú peninsula to serve as the natural sea outlet for Brasilia, the future capital of the country. Land would be taken over for this purpose by the State of Bahia and the port, when completed, would be capable of taking vessels of the deepest draught. The Federal Government would build road and rail communication to link Brasilia and the new port of Maraú, at the base of the peninsula of the same name.

Maraú is approximately 1,000 kilometres due east of Brasilia, about 75 kilometres north of Ilhéus (the cocoa port), and 180 kilometres by sea south of the port of Salvador (Bahia). When completed, the port will be the nearest straight-line ocean outlet to the new capital.

(Brazilian Government Bulletin) **(15868 A; 15437 A.)**

MAY 17—24, 1958

A. LEBANON. — Insurrection in Beirut and Tripoli. - Syrian Infiltrations into Lebanon. - Lebanese Protests to Security Council and Arab League. - U.S. Arms Supplies for Lebanon. - Soviet Warning to United States.

Serious anti-government disturbances involving heavy loss of life broke out in the Lebanon during the second week of May, originating in Tripoli and spreading to Beirut, Sidon, and the northern and north-eastern areas near the Syrian border. The disturbances were fomented primarily by Moslem opponents of the Government's pro-Western policy and sympathizers of President Nasser and the United Arab Republic, aided by infiltrators who crossed the border from Syria and attacked Lebanese frontier posts. [Generally speaking, the pro-Western policy of President Chamoun and M. Sami Solh is supported by the Lebanese Christians but opposed by considerable sections of the Moslem population—notably the Sunni Moslems, one of whose principal strongholds is Tripoli.] A secondary cause of the disorders was the apparent fear of Opposition groups that the Government might introduce constitutional amendments to enable President Chamoun to stand for a second term of office [see 16108 A]. An additional complication arose from the outbreak of fighting between pro-government and anti-government Druse tribesmen in the south-eastern Lebanon.

In the absence of authentic information, and in view of conflicting statements issued by the Lebanese Government, it was virtually impossible to obtain a clear picture of developments in the country. By May 20, however, it appeared (i) that the Lebanese Army had re-established control in most of Beirut and Tripoli, though insurgents were believed to be still holding out in both cities; (ii) that the Lebanese forces were gradually re-establishing control in the northern border areas, some of which were reported to be still in insurgent hands. In a despatch from Beirut on May 19, however, the Special Correspondent of *The Times* said that "with reliable information hanging far behind events, the situation in the Lebanon can only be described . . . as confused." Similarly, the *Manchester Guardian* correspondent in the Lebanese capital cabled on the same day: "Since even official sources in the Lebanon now contradict each other, it is impossible to present a clear picture of events, but the insurrection continues and the insurgents are still in control of a large sector of Beirut and of a part . . . of Tripoli."

The disturbances began after the murder on May 8 of a newspaper proprietor (M. Nassib Matni) who had campaigned strongly against the pro-Western policy of M. Sami Solh's Government and in support of the United Arab Republic. In Tripoli- a nationalist stronghold — various Opposition groups called an immediate general strike in protest against the murder of M. Matni, leading to clashes with the police on May 9 in which 40 people were injured. On May 10-11 Tripoli was the scene of serious rioting in which 16 people were killed and over 100 injured; the demonstrators erected street barricades, publicly displayed portraits of President Nasser, wrecked the library of the U.S. Information Service and left it ablaze, and smashed a number of business premises; in addition, the city's hydro-electric plant was put out of action by a bomb explosion, temporarily depriving Tripoli of electric light.

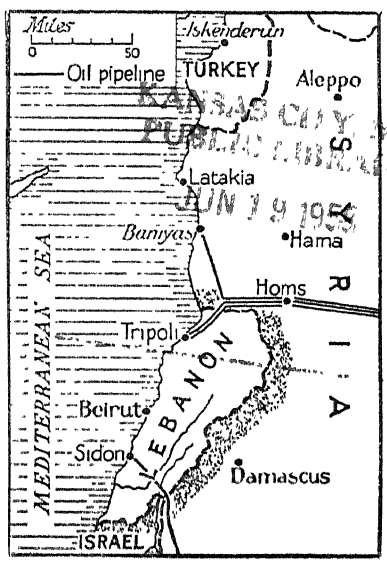
The disorders spread on May 12 to Beirut, where bomb explosions occurred in different parts of the city (one near the Presidential palace) and serious clashes took place between rioters and the police in which several people were killed and about 20 injured. As in Tripoli, the mob attacked the premises of the U.S. Information Service, breaking through a police cordon, throwing books and furniture into the street, and setting the library ablaze. Anti-American demonstrations also took place near the U.S. Embassy, and stones were thrown at a busload of American citizens being driven to Beirut airport.

Further bomb outrages occurred in Beirut on May 13, in which Captain Shehab (a nephew of the Lebanese C.-in-C., General Shehab) was killed when a grenade was thrown into his car, and on May 15, when six people were killed and 50 injured; in the worst incident a bomb was thrown from a lorry into a crowded restaurant, killing four people and wounding 35. Outside the capital, minor disturbances took place at Tyre and Sidon, and the Iraq Petroleum Company's pipeline was sabotaged near the Syrian border (the damage was repaired three days later).

The Lebanese Government announced on May 12 that the Belgian Consul-General in Damascus (M. Louis de San) had been arrested on the Syrian border while trying to cross into the Lebanon in a diplomatic car which, when examined by Customs officials, was allegedly found to contain 33 sub-machine guns, 28 pistols, a time-bomb, and a large quantity of ammunition. On the following day some 500 armed men from Syria attacked the Customs post where M. de San had been arrested—apparently as a reprisal—and killed the six officials on duty before being driven back across the border by Lebanese troops.

Syrian armed bands again crossed the northern Lebanese border on May 15 and attacked frontier posts, being engaged by Lebanese troops supported by jet fighters. Beirut reports stated that there had been heavy fighting in the northern border area; that 1,000 rioters, mostly from Syria, were in control of a small airfield north of Tripoli; and that the armed forces had repulsed an attempt to storm a Government building at Baalbek. It was also announced that a number of infiltrators and saboteurs from Syria had been arrested and expelled.

During the next three days reports from Beirut spoke of battles in the mountain areas against rebel bands, infiltrators from Syria, and dissident Druse tribesmen; it was claimed that Lebanese forces supported by tanks, armoured cars and aircraft had recaptured the border town of Halba—previously occupied by the insurgents—and were re-establishing control in the northern and north-eastern areas. It was also announced that a mule caravan carrying arms and ammunition from Syria had been attacked and destroyed by Lebanese fighters.



(*Economist*)

In Tripoli, fierce street fighting was reported on May 18 after a lull of several days; little factual information was available, but foreign press correspondents said that the insurgents were fighting from behind barricades and offering desperate resistance to Lebanese troops engaged in mopping up rebel strongholds. Further bomb explosions were reported from Beirut, and a curfew was imposed at Sidon after two tank lorries of the (American) Aramco Oil Company had been set on fire by demonstrators.

Fighting had meanwhile broken out in the mountains south-east of Beirut between rival forces of Druse tribesmen—some supporting the Druse leader Kamal Jumblatt, who is opposed to the Government, and others supporting the Emir Majid Arslan, Minister of Defence in the Government. After the dissident tribesmen had unsuccessfully tried to besiege President Chamoun's summer palace at Beit-ed-Din, a truce was concluded on May 18 between Kamal Jumblatt and the Emir Majid Arslan, and the rival factions agreed to disperse.

The Lebanese Army had taken over security duties in Beirut, Tripoli, and other affected centres on May 12, a curfew having previously been imposed in these cities. Strategic points, Government buildings, and foreign diplomatic missions were strongly guarded by tanks and armoured cars, and the streets were patrolled by lorry-borne troops.

Lebanese Accusations against United Arab Republic. - Protest to Security Council. - Statements by President Chamoun and Dr. Malik.

In a press statement on May 13, the Lebanese Foreign Minister (Dr. Charles Malik) accused the United Arab Republic of direct responsibility for the disturbances and of "massive interference" in Lebanese internal affairs. After announcing that a protest had been made to Cairo, Dr. Malik emphasized that the Government were "absolutely determined to defend the integrity, freedom, and independence of the Lebanon to the end" and would "not make the slightest concession to those who plan the destruction of the Lebanon."

Dr. Malik described the disturbances as "the latest manifestation of a concerted movement to undermine the Lebanon as a free and sovereign State and to bring about radical political changes." After speaking of the "unbroken arms smuggling which has been going on across our frontiers for months," he mentioned a number of significant incidents, all of which had occurred during the previous two days:

(1) The arrest of M. de San while attempting to cross from Syria into the Lebanon (see above). Dr. Malik alleged that Customs officials had found in M. de San's car not only arms and ammunition but also instructions to unknown individuals in the Lebanon to undertake bombing and assassination.

(2) The Syrian attack on the Customs house where M. de San had been detained.

(3) The capture of three boatloads of Palestinians from the Gaza Strip while approaching the Lebanese coast with the obvious intention of landing. The vessels were laden with arms and ammunition, and the crew of one of them had "thousands of Egyptian pounds" in their possession. Dr. Malik thought it significant that there were 11 Palestinians in each boat, suggesting a certain type of unit.

(4) The arrest in Beirut of 24 foreigners, many of whom had identity cards in their possession showing that they belonged to the Syrian Army or had served in it.

At a press conference in Beirut on May 21, President Chamoun repeated the accusations of "massive interference" by the United Arab Republic in Lebanese affairs; like Dr. Malik, he emphasized that the Lebanon was "determined never to become subservient to the United Arab Republic's policy or its orientation." It was announced on the following day that the Lebanese Government had decided to take its complaint against the United Arab Republic to the Security Council.

The Lebanese Foreign Office announced on May 21 that a protest had been delivered to the Arab League against U.A.R. interference in Lebanese affairs, and that an immediate session of the League's Council had been requested. It was suggested that this meeting should be held in a "neutral" centre—either in Benghazi or Khartoum.

The Ministry of the Interior announced on the same date that about 4,000 foreigners—mostly Syrians—had been expelled from the Lebanon in the past week or had left of their own accord; 2,800 of these had been expelled for not having valid identity cards. About 100 Syrians had been arrested in the same period, many of whom belonged to the Syrian Army. The U.A.R. Ambassador in Beirut had previously protested at the expulsions, while official U.A.R. spokesmen in Cairo and Damascus had repudiated the allegations of interference in Lebanese affairs as "untrue" and "designed to create confusion."

U.S. Arms for Lebanese Forces.

A spokesman of the U.S. State Department disclosed on May 14 that the United States was supplying Lebanon with small arms and equipment "such as rifles, ammunition, pistols, and tear-gas—the stuff you would ordinarily need to suppress a riot." After recalling that such equipment had been sent to the Lebanon since 1956 under U.S. aid programmes, he paid tribute to the "courageous efforts of the legally constituted Government of the Lebanon to maintain security and stability," and expressed the State Department's hope for the rapid re-establishment of normal conditions. The arms and equipment were flown to the Lebanon during the week-end May 17-18, at the urgent request of the Lebanese Government.

It was further announced by the State Department on May 16-17 (*a*) that arrangements were being made to supply American tanks to the Lebanon, in response to a request made by the Lebanese Government at the time of Ambassador Richards' mission to the Middle East (see 15655 A); (*b*) that consideration would be given to the despatch of U.S. troops should President Chamoun call for them because his security forces could not guarantee the protection of American lives and property; and (*c*) that 18 *Globemaster* transport planes, each capable of seating 200 persons, were being flown from the Donaldson Air Base (South Carolina) to Western Germany and would be available to evacuate U.S. nationals from the Lebanon if necessary. Another 22 *Globemasters* were being held in readiness at the Donaldson base.

As regards (*a*), it was explained that the United States had been making arrangements to fulfil the Lebanese request for tanks "for several months past," and it was expected that these arrangements would be completed in the near future.

The following statement on the Lebanese crisis was issued by the State Department on May 17:

"Some time ago the United States concluded an agreement with the Lebanon to furnish the Lebanese Government with certain arms and equipment for use in defending the territorial integrity and independence of the Lebanon. Recently the Government of Lebanon asked the U.S. Government to expedite the implementation of agreed programmes and in some instances to augment these programmes. In making this request, to which the United States agreed, the Lebanese Government indicated that the integrity of the Lebanon was threatened by persons acting under alien influence.

"The U.S. Government has profoundly admired the valiant efforts of Lebanon in recent days to maintain its internal security and defend its national integrity. Lebanese political leaders of varying shades of opinion, stressing the importance of using only peaceful means to achieve political objectives, have been unanimous in stating to U.S. representatives that they deplored the resort to violence, the attacks on persons and property, and the efforts to disrupt public order in the Lebanon.

"The additional assistance which the Lebanon is receiving from the United States has as its sole purpose the augmentation of the capacity of Lebanese security forces to control and prevent these subversive efforts and to facilitate the restoration of peace and quiet, which the Lebanese people desire and to which they are entitled."

Commenting on this and earlier statements, a State Department spokesman said that "present indications" were that the Lebanese security forces would be "able to maintain constitutional order" and that consideration of the despatch of U.S. troops would be unnecessary.

The U.S. Navy Department had announced on May 14 that the size of the American amphibious force in the Mediterranean was being temporarily doubled; a Navy spokesman said that the action was not connected with the Lebanese crisis.

Soviet Warning to Western Powers.

The Tass Agency issued a statement on May 17 saying that U.S. or other Western intervention in the Lebanese crisis could have "serious consequences not only for the future of the Lebanese State and its independence but also for peace in the Middle East." It added that "leading circles" in the U.S.S.R. were "confident that no Power will intervene in the internal affairs of the Lebanon, regardless of the form which such interference takes, or permit the formation of a dangerous military centre in that area."

The Tass statement alleged that the U.S. Sixth Fleet had "received orders to proceed immediately to the shores of the Lebanon"; that "troops of the American Command in the Mediterranean are being urgently reinforced"; and that "preparations are being made to land U.S. Marines on the Lebanese coast." It said that "press reports and statements of senior officials show that all this is being done under the false pretext that the massive outbursts of the Lebanese people against foreign intervention . . . have allegedly been inspired by the United Arab Republic."

British Rejoinder to Tass Statement. - Statement by Mr. Selwyn Lloyd.

A Foreign Office spokesman in London described the Tass statement as "a collection of untruths and unsupported innuendoes." The spokesman said it was "remarkable" that Tass had avoided all mention of the Lebanese Foreign Minister's press statement of May 13 [see above], in which Dr. Malik had publicly accused the United Arab Republic of "massive interference" in the Lebanon's internal affairs.

The following statement on the Lebanese crisis was made by Mr. Selwyn Lloyd in the House of Commons on May 19, in reply to questions:

". . . H.M. Government are in close touch with the U.S. Government, and with their other allies. The Government have recently consulted the other signatories of the Tripartite Declaration and we are all agreed that it remains valid as a declaration of policy. The situation does not, however, at present seem to be the sort which the Tripartite Declaration was designed to meet.

"The recent announcement of the Lebanese Foreign Minister indicates that subversion and incitement from outside the Lebanon is playing an important part in the current disorders.

"On the question of referring the situation to the Security Council, I consider that that is primarily a matter for the Government of the Lebanon . . . There is much to be said for this course."

Mr. Arthur Henderson (Lab.) asked whether, in view of the allegations contained in the Tass statement, the Foreign Secretary would "make it clear that the Western Governments have no intention of intervening militarily in the Lebanon."

Mr. Selwyn Lloyd replied: "The situation is uncertain and obscure, and I cannot make such a statement. What I will say is that no action will be taken contrary to the Charter or the established rules of international law."

The British Admiralty stated on May 19 that a NATO naval exercise taking place in the Western Mediterranean had been switched to the Eastern Mediterranean so that British and American warships could be available, if needed, to help in evacuating British and U.S. nationals from the Lebanon.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Le Monde, Paris - Soviet Embassy Press Department, London) **(Prev. rep. Lebanon, 16108 A.)**

A. SOVIET UNION. — Launching of Sputnik III.

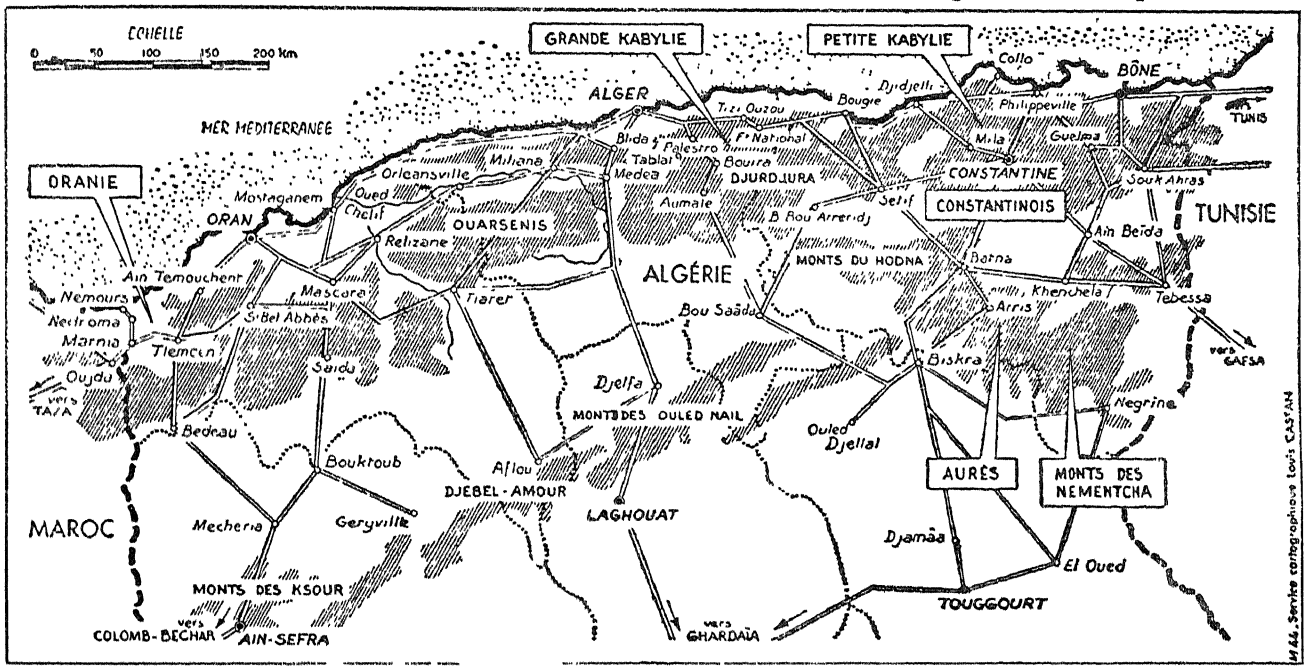
The third Russian earth satellite (*Sputnik III*) was launched on May 15 under the International Geophysical Year Programme. The biggest of the three *Sputniks* launched to date, it weighs well over two tons—one ton six cwt. for the weight of the satellite itself, plus nearly a ton of instruments on board. It was orbited at an angle of 65 degrees to the Equator, and is accompanied by its carrier rocket.

Sputnik III (of which diagrams were given in *Pravda*) is a cone-shaped object 5 ft. 8 in. in diameter at the base and 11 ft. 7 in. high, excluding the protruding antennae. The instrument load—nearly twice as heavy as in *Sputnik II*—includes apparatus for measuring pressure and composition of the upper layers of the atmosphere, concentration of positive ions, intensity of the Earth's magnetic field, intensity of cosmic and solar radiation, etc. Powered by solar energy batteries, its radio transmitter sends out signals on 20.005 megacycles with a duration of 150-300 milli-seconds.

First reports placed the apogee of *Sputnik III* at 1,165 miles, and its period of revolution round the Earth at 100 minutes.—(Soviet Embassy Press Department, London) **(Prev. rep. 16137 B; 16130 B.)**

Note. The earth satellites at present encircling the globe are *Sputnik III* and the American *Explorer I*, *Explorer III* and *Vanguard I*.

A. ALGERIA. — The Nationalist Uprising. - Military Operations, September 1955-November 1957. - Rebellion extended to Oran Department and Southern Algeria. - Strong Reinforcement of French Troops. - General Salan appointed C.-in-C. - The Melouza Massacre. - Large-Scale Terrorist Activities in Algeria and Metropolitan France.



(*Le Monde*, Paris)

Developments in Algeria up to the end of the third year of the Algerian war (Nov. 1, 1957), together with related developments in metropolitan France, are described below under cross-headings in continuation of 14431 A. The further developments in North Africa and metropolitan France subsequent to that date will be described in following issues.

The military situation in Algeria deteriorated seriously between September 1955 and the spring of 1956, considerable sections of the Aurés and Nementcha mountains, the Grande and Petite Kabylie, and the Constantinois (the area between the Tunisian frontier and the Petite Kabylie) passing entirely under nationalist control. In the Oran department, where only a few minor incidents had occurred during the first 11 months of the rising, rebel forces began operating on Oct. 1, 1955, and by May 1956 were largely in control of a sector adjoining the Moroccan border.

Between March and July 1956, however, the strength of the French forces in Algeria was increased from 190,000 to 400,000, and by September, 1956, the Minister-Resident (M. Lacoste) was able to report a marked improvement in the situation, especially in the Constantinois, the Grande and Petite Kabylie, and the Moroccan frontier area. In view of the increased odds against them, the insurgents, who had been operating in bands up to 3,000 strong, split up into smaller units which carried on a guerrilla struggle. They also moved into areas which had hitherto remained peaceful, notably the area between Algiers and Oran and the mountain ranges of southern Algeria, until by the spring of 1957 military operations were in progress across the whole of northern Algeria and along the line of the Saharan Atlas. From July 1957 onwards the rebels extended their activity south of the Saharan Atlas into the Sahara desert.

Details of the insurgent forces, the main developments in the struggle, and the most important engagements are given below.

The Insurgent Forces.

The insurgents' "National Liberation Army" was divided into two main groups, corresponding to the political division inside the nationalist movement between the National Liberation Front (F.L.N.) and the Algerian National Movement (M.N.A.)—see 15645 A. The rivalry between the F.L.N. and M.N.A. bands led to a number of armed clashes between them in the Kabylie and the Orléansville area in the spring of 1956; in consequence the M.N.A. forces moved southward into the Ouled-Naïl Mountains and the Djebel-Amour, but as the F.L.N. forces also penetrated these areas fighting between them was renewed in the spring of 1957. It was nevertheless reported that many units of the National Liberation Army were not firmly committed to either faction.

The Algerian Communist Party formed its own military organization in April 1956; this at first co-operated with the M.N.A. in the Orléansville area, but was subsequently incorporated into the F.L.N. forces. The insurgents had also been joined at the outbreak of the rebellion by some groups which had taken to the mountains for non-political reasons; e.g., in the Tunisian border area certain Berber tribal leaders previously engaged in banditry or cattle-stealing subsequently joined the Liberation Army or took to smuggling arms across the frontier, while among the Kabyles, rival clans joined the insurgents or rallied to the French in order to procure arms with which to carry on their traditional vendettas.

The number of fully armed insurgents was estimated in the spring of 1956 to be between 15,000 and 20,000; M. Mollet (then French Prime Minister) stated on April 16, 1956, that they appeared to be far more numerous because "auxiliaries engaged in all sorts of tasks" had to be taken into account. Insurgent casualties were heavy, especially from the summer of 1956 onwards; French official statements gave the total number of rebels killed in action as 4,885 between Nov. 1, 1954, and March 31, 1956, and 17,784 from the beginning of the fighting to the end of 1956, as against 1,892 French soldiers killed during the same period. Although the rebels' losses showed a further sharp increase during 1957, the size of their forces also continued to increase, being estimated at 25,000 by a French parliamentary mission which visited Algeria in May 1957. This growth in numbers was attributed on the one hand to the widespread support for the insurgents among the Moslem population, which enabled them to replace their losses without difficulty, and on the other hand to the increased supply of arms reaching the insurgents during the first six months of 1957.

A *Manchester Guardian* correspondent who spent some time with an insurgent unit in the summer of 1957 reported on July 31 that "the Algerian National Army is now an efficient, disciplined force, with a unified command and strategy," and that most of its officers were professional soldiers who had served in the French Army. It had its own medical and dental services, hospitals, and Red Crescent organization (the Moslem equivalent of the Red Cross). The troops received regular pay, plus family allowances, and full records were kept of those killed and wounded to ensure that the next-of-kin were informed and "to arrange for war pensions when Algeria becomes independent." Expenses were met from contributions from sympathizers, and from other sources such as the sale of cattle taken from large landowners' estates.

The French parliamentary mission which visited Algeria in May 1957 reported that "the rebels' politico-administrative organization" had made "very great progress"; that it involved the "systematic establishment of a clandestine administration in every village, canton, and *douar*"; and that the tax-collector was "the rebellion's

most valuable agent." These conclusions were confirmed by the *Manchester Guardian's* correspondent, who wrote: "What has come into being in Algeria during these last three years is not simply a new kind of army but also the rudiments of a new form of State – with its clandestine (or semi-clandestine) local authorities, courts of justice, police, schools, medical services, communications, and taxation . . . 'Free Algeria' is divided into six *wilayat*, which are at the same time military commands and administrative regions. At every level, from the *wilaya* down to the local underground cell, there is close interlocking between the military organization and the political; and at every level there are *commissaires politiques* within the Army, specially responsible for liaison with the civilian population."

The growth of nationalist influence among French Moslem troops fighting in Algeria caused grave concern during the early months of 1956. Groups of Moslem soldiers deserted to the insurgents while in action on several occasions (see below), and on Aug. 21, 1956, a Moslem lieutenant was sentenced to 10 years' imprisonment for supplying military information to the Liberation Army. In view of these developments, most of the Moslem units serving in Algeria were transferred to France or Germany during the summer of 1956 and replaced by French troops.

In February 1957 a letter was addressed to President Coty by 52 Algerian Moslem officers stationed in Europe, including two colonels, stating that the French Government's policy was transforming their attachment to France into "treason to the Algerian people," and appealing to the President to find "an honourable solution to the crisis of conscience with which the body of Algerian officers are confronted." Following the unauthorized publication of this letter, Lieutenant Rahmani (the officer regarded as primarily responsible) was arrested; though released in May he was rearrested in September and charged with "attempted demoralization of the Army and the nation." Similar charges were brought against 17 other signatories of the letter; five of them, however, succeeded in escaping to Tunis, where they announced their intention of joining the Liberation Army.

A number of cases of nationalist penetration of the police were also discovered. At the end of May 1957 an inspector and seven policemen, accused of planning to assist a rebel attack on the town, were arrested at Tlemcen, and 15 policemen at Tebessa. Other groups of policemen, including officials of high rank, were arrested in Algiers, Oran, Mostaganem, Bougie, Bouira, and Blida between November 1956 and September 1957 on charges of supplying information to terrorist groups.

The Arms Traffic.

M. de Gouyon, chairman of the Defence Commission of the Assembly of the French Union, stated on April 24, 1956, that about one-third of the insurgents were equipped with sporting guns or weapons dating from the Second World War, another third with arms captured from the French forces, and the remainder with weapons of foreign origin. The arms traffic, he added, took two main forms: a "semi-official" traffic from Spain and Libya, and an international underground traffic. Spanish arms, as well as others smuggled from Britain and the U.S.A., were reaching Algeria through Tetuan and Melilla; other weapons, mostly of Czechoslovak origin, were imported from Egypt *via* Tripoli and Benghazi; and others were smuggled in from French Equatorial and West Africa.

During the first six months of 1957 official French sources alleged that increased supplies of arms were reaching the insurgents from Tunisia, and to a lesser extent from Morocco. After a tour of inspection in Algeria, M. Bourgès-Maunoury (then Minister of National Defence) stated on Feb. 12, 1957 that the rebels were receiving the greater part of their arms supplies across the Tunisian and Moroccan borders. He added: "In view of the inadequacy of the means employed by the Moroccan and Tunisian forces to end this state of affairs, and the size of the forces which we should need to ensure completely effective supervision, it has seemed indispensable to us to establish a system of defence in depth. All through the winter the units on the frontier have worked continuously on the construction of a network of fortifications and barbed-wire entanglements, the efficacy of which has plainly made itself felt in recent weeks."

The defence system along the Tunisian frontier was completed on Sept. 15, 1957, as far as El-Ma-El-Abiod, about 175 miles from the coast; it was proposed to extend it to Bir-El-Ater, about 50 miles farther south. It consisted of four separate barbed-wire barriers, two of which were electrified, with minefields and observation posts placed along it at intervals; M. Morice (Defence Minister in M. Bourgès-Maunory's Government) stated in July that the area between the defence line and the frontier would be occupied by French troops withdrawn from Tunisia. A similar defence system was installed along the Moroccan frontier from the coast to Sidi-Aïssa, a distance of about 90 miles, which it was also proposed to extend farther south. At a press conference on Aug. 24, 1957, M. Morice stated that about 1,500 weapons had been crossing the frontier every month, and expressed the hope that this figure would be reduced by 80 per cent. when the two defence lines were complete.

A motor yacht, the *Athos*, was seized off the Algerian coast on Oct. 16, 1956, with a large cargo of arms (see 15277 C). Two more ships loaded with arms, the *Juan-Illueca* and the *Svance*, were seized by the Spanish Navy off the Moroccan coast on June 16 and 26, 1957, respectively; the former was carrying 800 tons of arms, including quantities of ammunition, and the latter 300 tons.

The Sudanese owner of the *Athos* was sentenced to 10 years' imprisonment by the Oran military court on June 21, 1957, and five Algerians found on board to terms ranging from five to 20 years. On appeal, however, the sentences were annulled on technical grounds, and after a new trial those on three of the Algerians were reduced to 10 years and that on the owner to three years.

Military Operations, September 1955–May 1956.

Military operations during this period are summarized below:

September 1955 – January 1956. By September 1955 strong insurgent forces were active in the Aurès and Nementcha mountains, in the Kabylie, and in the Constantinois, and considerable areas were virtually under insurgent control. A deputation of local mayors which visited Paris to appeal to the Government for stronger military measures described the situation in the Constantine department as follows: "The country is entirely controlled by the rebels south of a line through Meskiana, Khenchela, Tebessa, and Souk-Ahras; in the north, the Collo-Philippeville-El Milia triangle is practically in the hands of the fellaghas; Europeans can no longer venture outside the towns." The statement added: "The small town of Collo is isolated by the fellaghas. There is an atmosphere of fear, even of panic, in the towns, where all life stops every evening. The markets are closed and business is paralysed. . . "

Insurgent activities, which had hitherto been almost entirely confined to the eastern half of Algeria, spread in the autumn of 1955 to the Oranie (the area between Oran and the Moroccan border). During the night of Oct. 1-2, 1955 [a date apparently chosen to coincide with the uprisings in Morocco—see 14473 A], 10 to 15 uniformed and well-armed bands attacked an Army camp near Nedroma and murdered or kidnapped a number of French officials and Moslem "collaborators"; thenceforward strong insurgent forces remained active in this area. There was a sharp increase in terrorism in and around Algiers at the end of December 1955, and two military posts in the immediate neighbourhood of the city were attacked during the night of Jan. 1-2, 1956.

February-May 1956. During February and March 1956 the insurgents became increasingly aggressive, notably in the Constantinois, the Oranie, and the neighbourhood of Algiers. Agricultural activity in the Oranie was virtually brought to a standstill by rebels operating in the immediate neighbourhood of Marnia, Nedroma, and Nemours, and many roads were closed to traffic by official order. In the Constantinois the insurgents frequently attacked convoys and military posts, and raided villages and small towns. Algiers itself was raided during the early hours of March 16 by several armed bands which burned down a garage in the centre of the city and a factory in the suburbs.

A disturbing feature of the situation during this period was the assistance which the insurgents received on several occasions from Moslems serving in the French Army. At Sebaiah (near the Moroccan frontier) 65 out of 80 Moslems in a mixed unit, led by their n.c.o.'s, went over to the rebels during an engagement on the night of Feb. 19-20. An insurgent force attacked a post near Souk-Ahras during the night of March 7-8 with the assistance of 75 Moslem soldiers in the garrison, who deserted to them with the unit's equipment. Moslem troops also assisted insurgents who attacked a post in the Aurès during the night of May 29-30, and several similar incidents were reported in other areas.

In the Kabylie the military situation was complicated by the feuds between the Berber tribes. As the insurgents extended the area under their control, the Ourabah tribe of the Soummam river valley (between the Grande and Petite Kabylie) rallied to the French and were allowed to form self-defence units. A pro-French village in this area was besieged by 300 insurgents from Feb. 17-23, but the defenders, helped by French forces, succeeded in repelling the attack. During the night of April 20-21 about a dozen Ourabah villages were raided by rival tribes, several being burned down and about 70 people murdered.

In the Orléansville area, which had hitherto been unaffected by the revolt, M.N.A. units became active in March. On April 4 an Army lorry loaded with arms and ammunition was seized a few miles outside Algiers by the officer-cadet in charge, a Communist named Maillet; in consequence the Communist military organization—the "Liberation Fighters," which included both Moslems and Europeans—was enabled to begin operations in the area round Orléansville, where the Communists exercised considerable influence. Maillot himself was killed in a later action on June 5. Following negotiations between the Communist Party and the F.L.N., the "Liberation Fighters" were incorporated in the National Liberation Army from July 1, 1956.

Towards the end of March the French launched a series of successful offensives in the Constantinois. Infantry and naval commandos were landed during the night of March 26-27 on the

Collo peninsula, supported by aircraft and by gunfire from the cruiser *Georges-Leygues*, to eliminate the rebel bands which had controlled the area for several months; as stated above, the town of Collo had been isolated since September 1955, receiving its food supplies by sea. Sixty insurgents were killed in another operation between Guelma and Souk-Ahras during March 30-April 3; rebel bands were wiped out in combined operations in the Bône area on April 14 and 24; and 82 insurgents were killed in an operation north of Constantine on April 15.

While the French offensive continued, the insurgents avoided pitched battles in this sector and concentrated on terrorist activities. During the night of May 8-9, however, they launched their largest concerted operation to date, attacking 46 villages and military posts in the Constantinois and the Petite Kabylie and some 20 posts in the Grande Kabylie. All the attacks were repulsed, often after fierce fighting, and over 200 rebels killed; the fighting was particularly intense at Rouached (between Constantine and Mila), which was raided by a force about 1,000 strong.

In the Oranie the insurgents, operating in bands several hundred strong, increasingly took the offensive during April and May. Tlemcen was virtually besieged during the first half of May by a force estimated at 3,000 men, which withdrew on May 14 only after strong French reinforcements, supported by aircraft, had been sent to the town. Bands believed to number about 1,000 men burned down 59 farms in the neighbourhood of Aïn-Temouchent between May 6-10, with the assistance of armed auxiliaries recruited among local labourers and unemployed, and the port of Nemours was raided on May 15.

Strengthening of French Forces in Algeria.

The French armed forces in Algeria, which numbered about 100,000 in June 1955, were increased to about 400,000 by the end of June 1956. The reinforcements consisted partly of troops transferred from France, Western Germany, and French West Africa, and partly of reservists recalled for active service under decrees issued on Aug. 25, 1955 [see 14431 A] and April 13, 1956. The latter decree provided for the recall of about 200,000 reservists if required, and authorized the incorporation in the Army, wherever necessary, of reservists who had done their military training in the Navy or Air Force. General Bailly, then Chief of Staff of the French Air Force, stated on April 13, 1956, that the number of Air Force personnel in Algeria, Morocco, and Tunisia had been increased from 21,500 in June 1955 to 39,000 at the beginning of April 1956, and would reach 64,000 in October 1956.

The recall of reservists under a decree of Aug. 25, 1955, led to a succession of protest demonstrations in France during the autumn of 1955, both by men who had been recalled and by conscripts whose release had been postponed. The most serious incident occurred at Rouen, where about 200 men mutinied on Oct. 6, 1955, and occupied the barracks for two days; the mutineers were supported by large crowds of civilian demonstrators, about 50 of whom were injured in street fighting with the police. The new call-up under the decree of April 13, 1956 was followed by further demonstrations, and between April and July 1956 reservists repeatedly held up troop-trains by pulling the communication-cord or uncoupling coaches; serious riots occurred at railway stations on several occasions, notably at St. Nazaire on May 28, 1956, when about 5,000 civilian demonstrators clashed with the police.

The Government announced on Sept. 26, 1956, that an acceleration in the rate of embodiment of newly called up national servicemen had made it possible to release about 200,000 men between October and December; those released were either conscripts who had been serving continuously since May 1954 or reservists who had been recalled earlier in the year. After his visit to Algeria in February 1957 M. Bourgès-Maunoury stated on Feb. 12 that the military leaders in Algeria had been informed "that they should and could count henceforward on stable effectives at the present level, derived from the normal call-up of age-groups." In order to maintain this number, conscripts were retained with the colours for over two years, instead of the normal 18 months; M. Morice (Defence Minister in the Bourgès-Maunoury Government) said on July 27 that there were 450,000 troops in Algeria, and that it was hoped gradually to reduce the term of service to two years.

General Lorillot, Supreme Military Commander in Algeria, was appointed Chief of Staff of the Army on Nov. 13, 1956. He was succeeded in Algeria by General Salan, who had served as C.-in-C. in Indo-China from January 1952 to May 1953.

Military Operations, June 1956 - May 1957.

Military operations in Algeria during the 12 months ending May 1957 are summarized below:

June-December 1956. The arrival of reinforcements enabled the French Army to carry out a series of major operations in the Kabylie and the Oranie during the first six months of June 1956. About 230 insurgents were killed during a French offensive in the upper Soummam valley on May 31-June 1, as a result of which 210 villages in the Petite Kabylie, formerly under insurgent control, came once more under French control. A second operation in the Djurdjura mountains (south of Tizi-Ouzou) between June 5-8 resulted in the death of 68 insurgents and the reoccupation of a number of villages. M. Lejeune (then State Secretary for Defence) subsequently stated on July 8 that pacification was making good progress in the Petite Kabylie, where military posts were being established in or near the villages and new roads were being built. In the Oranie 67 insurgents were killed and 600 suspects arrested during a French operation in the Nemours-Marnia area between June 5-9.

The strengthening of the French forces throughout large areas of Algeria, and the intensification of the French campaign against the insurgents, led to a change in rebel tactics. On the one hand, they split up into smaller and more mobile bands, avoided pitched battles, and concentrated on ambushes, sabotage, and large-scale terrorism, the principal victims of which were other Moslems; on the other hand they extended their activities into new areas. The revolt from the beginning had spread along two mountain ranges which run across Algeria in roughly parallel lines—the Little Atlas (*Atlas tellien*) in the north, and the Saharan Atlas farther south. Beginning in the Aurès, it had spread east into the Nementchas and north along the Hodna Mountains into the Djurdjura, the Grande and Petite Kabylie, and the Constantinois. In the autumn of 1955 a new centre of insurgent activities had appeared in the Oranie. During the summer and autumn of 1956 the insurgents moved westward from the Grande Kabylie and eastward from the Oranie, along the line of the Little Atlas, to link up in the area between Algiers and Oran. A similar double movement took place in the Saharan Atlas westward from the Aurès to the Ouled-Naïl Mountains and the Djebel-Amour, and eastward from the Ksour Mountains.

In southern Algeria an insurgent force captured a military post 40 miles south of Bou-Saâda during the night of June 9-10, assisted by a section of the Moslem garrison, and during the following week M.N.A. units estimated at 1,500 men carried out a series of raids in the Ouled-Naïl Mountains around Djelfa. Near the Moroccan frontier, terrorist activities began at Colomb-Béchar on June 17, and two days later a post commanding the road from Aïn-Sefra to Colomb-Béchar was attacked. Insurgent activity in the Ksour Mountains began with an attack on a post in the Géryville area during the night of June 27-28, and the ambushing of a convoy on June 29, when 15 French soldiers were killed. The insurgent units operating in this area were believed to have been formed in southern Morocco from Algerians resident in the country or coming from France, reinforced by Moslem deserters from the French troops stationed in Morocco. The rebels' activities in the Ouled-Naïl and Ksour Mountains represented a serious threat to the two main roads leading to the Sahara, which run through Aïn-Sefra and Colomb-Béchar and through Djelfa, Laghouat, and Ghardaïa respectively.

The most important military operations during July took place in the Oranie, where 63 insurgents were killed in a battle near Nedroma on July 15. During operations south of Oran two French units were ambushed on July 18-19, a colonel and 25 soldiers being killed; in heavy fighting south of Tlemcen 64 insurgents were killed on July 22-23; and on July 25 eight French soldiers were killed in an ambush in the same district. Near the Tunisian frontier French troops carried out an operation in the Souk-Ahras area from July 4-12, killing 44 rebels. The insurgents ambushed a French convoy on July 12 near the port of Djidjelli, 12 soldiers being killed, while in the Aurès nine soldiers were killed on July 15 when a goods train was blown up by a land-mine between Batna and Biskra.

During August the insurgents achieved a number of successes in the mountains south of Algiers, between Palestra, Tablat, Blida, and Médéa, to which they were believed to have transferred part of their forces from the Grande Kabylie. In this sector, where 19 French soldiers had been killed in ambushes on May 18 and eight more on July 9, French forces carried out an operation from July 14-16 in which 25 insurgents were killed, 1,300 suspects arrested, and a rebel hospital and several camouflaged encampments discovered. Nevertheless, nine more French soldiers were killed in an ambush on Aug. 7; 27 more in three actions on Aug. 8-9; and all but five of a patrol of 50 men on Aug. 12, after they had been led into an ambush by a Moslem guide.

In the Petite Kabylie the insurgents lost 95 men during a French operation which ended on Aug. 17, and another 47 on Aug. 29 during operations which followed an ambush in which 11 *légionnaires* were killed. Rebel activity in the Oranie revived during the second half of August, 71 insurgents being killed in a battle near Nedroma on Aug. 29.

Insurgent forces became active early in September in the area east of Oran, between Mostaganem, Relizane, and Mascara, which had hitherto remained peaceful; this was regarded as an indication that the rebel bands moving eastward from the Grande Kabylie had linked up with those in the Oranie. Fourteen farms in the Mascara region were burnt down by the rebels during the night of Sept. 22-23, and several small French units were ambushed between Algiers and Oran in September and October. The French forces, on the other hand, killed 32 rebels in an engagement near Mostaganem during the night of Sept. 15-16, and 40 near the port of Tenès on Oct. 16.

Increased insurgent activity in the Grande Kabylie led to several engagements in September and October; 46 rebels were killed near Menerville (25 miles E. of Algiers) on Sept. 16 when French troops stormed their underground headquarters, and 35 more in another action on Sept. 19. A French offensive in the Grande Kabylie resulted in the death of 106 rebels during Oct. 9-11, and 25 more were killed in an operation in the Soummam valley on Oct. 16. The French suffered considerable casualties in two ambushes in this area, 17 soldiers being killed near Palestro on Sept. 21 and 24 near Tablat on Oct. 27.

Farther to the east, Zighout Youssef Ben Saïd (the insurgent commander in the Constantinois, who had organized the offensive of Aug. 20, 1955—see 14431 A) was killed near Philippeville on Sept. 22 with eight of his staff. In the Aurès two important engagements took place on Sept. 14, when 39 insurgents were killed near Batna, and on Sept. 27, when 105 were killed in fierce fighting near Mac-Mahon. One of the principal rebel leaders in the Aurès, Adjoul Adjoul, surrendered on Nov. 1.

The first major action in the Djebel-Amour occurred on Oct. 2 when a rebel force over 200 strong ambushed a convoy, nine French soldiers being killed. Reinforcements were rushed to the area, but on the following day the insurgents succeeded in cutting off their rearguard, 30 of whom were killed. The insurgents' casualties totalled 47 killed and 19 captured; prisoners stated that the band had come from the Ksour Mountains intending to attack the town of Aflou, where many leading nationalists were interned. In the southern Djebel-Amour, on the edge of the Sahara, a strong rebel force lost 70 killed and 56 captured on Dec. 9 when attacked by French parachute troops and aircraft. In other sectors of the Saharan Atlas, Hachour Zian (the M.N.A. leader in the Ouled-Naïl Mountains) and about 25 of his men were killed in two actions on Nov. 7-8, whilst nearly 50 insurgents were killed in an engagement near Bou-Saâda on Nov. 18. Numerous attacks on communications took place in the Colomb-Béchar area during the last three months of 1956, and at Touggourt (150 miles south of Biskra) two grenade attempts occurred on Dec. 31—the first terrorist incidents reported so far to the south.

In the area between Oran and Algiers the insurgents, operating in small and highly mobile groups, maintained their activity throughout November and December; particular anxiety was caused by the frequency of rebel raids in the Ouarsenis, between Miliana and Tiaret. French convoys were ambushed on several occasions, notably on Nov. 12, when 18 soldiers were killed in two attacks, and on Nov. 28, when 11 soldiers were killed near Orléansville. A rebel force attacked a military camp 60 miles south-west of Algiers on Dec. 13 with the complicity of Moslem n.c.o.'s of the garrison; subsequent inquiries established that there was an active F.L.N. group inside the camp. In the Oranie 30 insurgents were killed in a battle near Tlemçen on Nov. 29, and another 40 in the same area on Dec. 6-7.

A French convoy was ambushed with the loss of 12 killed on Nov. 22 in the Palestro area; in other sectors of the Grande Kabylie over 40 insurgents were reported on Dec. 10 to have been killed in two separate operations. A Senatorial commission which visited this area at the beginning of December reported that about 2,000 insurgents, divided into groups of 15 to 30, were operating in the Grande Kabylie, where the terrain was particularly suitable for guerrilla warfare. Although 23,000 soldiers were stationed there, pacification was making progress over only half of the area, and rebel activity had recently increased.

In eastern Algeria 30 insurgents were killed in a battle in the Collo area on Nov. 21, and several major engagements occurred near the Tunisian frontier, where three large and well-armed bands totalling about 1,200 men were reported to be active. Thirty-three rebels were killed in an action south of Tebessa on Nov. 27, and 17 more two days later when French troops intercepted an arms convoy coming from Tunisia. Another 47 insurgents were killed in heavy fighting in the same area on Dec. 22.

January-May 1957. Owing to strong French counter-action, insurgent casualties increased considerably during the early months of 1957; M. Lacoste, speaking in the National Assembly on March 21, claimed that between Jan. 27 and Feb. 20 the rebels had lost 2,512 men killed in action and 333 wounded or taken prisoner, whilst on April 2 it was announced that 806 insurgents had been killed and 85 captured during the single week March 23-29. Despite these losses, the insurgents remained extremely active; as stated above, official French sources estimated that there were at least 25,000 in arms at the beginning of May, and that their equipment had greatly improved in the preceding six months.

The most important military operations by both sides took place in northern Algeria, from the Moroccan frontier to the Kabylie; 46 insurgents were killed on Jan. 20-21 in operations in the Tlemçen sector of the Oranie, 92 on Jan. 26, and 36 on Feb. 17. After a lull in this sector, the insurgents raided 39 farms in the area between Tlemçen and Aïn-Temouchent during the night of April 1-2, 23 being set on fire. Another rebel force about 200 strong lost 65 men on April 17 in a battle between Marnia and Nedroma; retreating to the south, it was encircled on April 20 and almost wiped out, 95 men being killed.

In the densely forested mountains of the Ouarsenis rebel raids and ambushes became increasingly common; it was reported on Feb. 26 that 27 farms had been burned down in the previous two days, frequent attacks made on motorists, and telephone communications sabotaged. Nine soldiers and civilians were killed in an ambush on Jan. 26, and 14 soldiers on April 18. The insurgents also extended their activities to the Plain of Chélif (between Orléansville, Mostaganem, and Oran) for the first time since 1954. In the coastal area west of Algiers, the French lost 20 soldiers in an ambush near Cherchell on Jan. 9 and 27 more on Feb. 28, including the pilot of an observation plane which was shot down near Dupleix; in subsequent counter-operations in this area 64 members of the band responsible were killed between March 1 and March 4.

The wooded and mountainous country round Tablat (about 30 miles south of Algiers) was the scene of heavy fighting during May. In offensive operations between May 8-18 the French forces killed or captured 189 insurgents and seized large stocks of arms and ammunition, including a large supply of up-to-date weapons. The rebels launched a surprise attack on May 22 in which 15 French soldiers lost their lives; in the ensuing French counter-action 70 insurgents were killed. Another 86 rebels were killed in an engagement which followed an ambush on May 25.

A disquieting feature of the situation in the Kabylie was the revival of insurgent activities in the Soummam valley, which had remained peaceful since the previous summer; 63 insurgents were killed in this area on Jan. 3, and another 57 on Feb. 28. The rebels suffered heavy casualties in the Grande Kabylie in a series of French operations during the first three months of 1957—notably on March 23, when 137 were killed.

In the Constantinois, where rebel activity had greatly declined since the spring of 1956, the insurgents again took the offensive and on Jan. 7 raided Souk-Ahras, a town of 20,000 people. In a series of ambushes 21 French soldiers were killed and 18 wounded on April 3 north of Constantine; 11 were killed on April 15 in the El-Milia area, south of the Collo peninsula; and 35 killed and 27 wounded in the same area on May 11. In an action on Jan. 24, in which 19 insurgents were killed, the French claimed to have wiped out the rebels' general staff for the Bône area. Other French successes included an engagement east of Constantine on April 2-3, in which 41 insurgents were killed, and one in the El-Milia area on April 24 (25 rebels reported killed). A number of engagements took place in the Tebessa area, where rebel units frequently crossed the frontier while retreating into or returning from Tunisia; 85 insurgents were killed on Jan. 26, and 65 more on March 6.

Fighting meanwhile continued along the whole length of the Saharan Atlas. In a battle south of Bou-Saâda 68 insurgents and 12 French soldiers (including the crew of a helicopter which was shot down) were killed on April 9, Bou-Saâda itself being raided by a rebel force during the night of April 15-16. In the Ouled-Naïl Mountains 60 rebels were killed on April 4 near Djelfa, whilst in the Djebel-Amour they lost 72 killed on Feb. 27 and 50 on March 3-4. A rebel band was wiped out near Aflou on May 21, losing 99 killed, and three days later 43 members of another band were killed in the same area. In the Moroccan frontier zone 22 insurgents were killed in an engagement near Aïn-Sefra on Jan. 22.

The Melouza Massacre.

One of the worst atrocities of the Algerian war occurred on May 28, 1957, when 303 men and youths living in villages near Melouza (at the western end of the Hodna Mountains, between Bordj-Bou-Arreridj and Aumale) were massacred at the village of Kasbah. Three days later (during the night of May 30-31) armed men murdered 35 Moslem workmen in the village of Wagram, near Saïda. Both massacres were attributed by the French authorities to the F.L.N., which, however, denied all responsibility and appealed to the U.N. to sponsor an international inquiry.

According to reports from French sources, a large insurgent force (variously described as 150 and 400 strong) entered the village of Beni-Ileman, near Melouza, in the morning of May 28, rounded up all males over 15 in the village and in neighbouring hamlets, and took them to Kasbah, where they were held prisoners until the evening. They were then machine-gunned, cut down with hatchets, or bludgeoned to death. Various reasons for the massacre were given by French sources: that the victims had protested against the assassination of a family suspected of being pro-French, that they were M.N.A. supporters, or that they had welcomed French troops. On May 31 the French authorities published an F.L.N. directive, said to have been discovered on April 17, that all villages which asked for French protection should be burned down and all their male inhabitants over the age of 20 murdered.

About 200 inhabitants of Melouza and neighbouring villages were arrested on June 3, and were reported to have confessed to taking part in the massacre; according to subsequent French statements, it was said to have been carried out by a band of 50 insurgents and 100 auxiliaries recruited in the Melouza area. French spokesmen stated that the band responsible consisted of Kabyle tribesmen who had taken advantage of a long-standing feud between the Kabyle population of Melouza and the Arab inhabitants of Beni-Ileman.

President Coty issued on June 1 an "appeal to the civilized world" worded as follows:

"These abominations are not just the work of a few bandits. The killers continue to carry out the orders of their leaders, the same leaders who only yesterday boasted over a foreign radio of having caused the treacherous assassination in Paris of another Moslem guilty of loving France [i.e. M. Chekkal—see below], as they have already caused the murder of 5,000 defenceless Moslems, men and women, old men and children. I ask all civilized peoples whether they do not think the time has come to make it known that they will refuse a hearing to the supporters and agents of this hideous terrorism, which tramples underfoot all divine and human laws, in complete contempt for the conscience of humanity . . ."

F.L.N. spokesmen in Tunis categorically denied that the F.L.N. was responsible for the massacre; accused the French troops of conducting a "veritable campaign of extermination of Algerian populations"; and described both the Melouza and Wagram massacres as "an odious plot intended to discredit the F.L.N. in the eyes of the civilized world." On June 2 the F.L.N. representative

in New York (M. Yazid) appealed to the U.N. Secretary-General to propose to President Coty that the U.N. Secretariat should organize an inquiry into the methods used by the belligerents in Algeria; he promised the full co-operation of the F.L.N. and the National Liberation Army. M. Yazid repeated his request for an international inquiry on June 12, and gave an assurance that if it were proved that the massacre had been committed by F.L.N. supporters the movement would not hesitate to execute them.

The M.N.A. issued a communiqué on June 3 attributing the massacre to the "pseudo-patriots of the F.L.N."; its secretary-general, M. Moulay Merbah, sent a message to Dr. Hammarskjöld proposing that the International Red Cross should institute an inquiry.

Military Operations, June-October 1957.

The principal military operations during the summer and early autumn of 1957 are summarized below:

Northern Algeria and the Saharan Atlas. The insurgents suffered two major reverses in eastern Algeria during June. On June 15 French troops attacked a large force which had recently crossed the border near Tebessa; in fierce fighting, which continued throughout the day, the rebels lost 205 killed, the largest number of casualties in any single battle to date. The biggest French air operation since the beginning of the rebellion was carried out on the following day, when about 100 aircraft bombed and machine-gunned rebel bases in the mountains east of Djidjelli, insurgent casualties being estimated at about 100 killed. This attack formed part of a large-scale French operation in the Collo peninsula, which had remained an insurgent stronghold for nearly two years despite repeated French offensives.

125 insurgents were killed in heavy fighting on June 4-5 in the Fort-National area, and 48 in an engagement near Tlemçen on June 14. The rebels had previously raided Tlemçen on June 4, and on June 21 ambushed two French units near Bougie and Bou-Saâda; French casualties totalled 34 killed in these two attacks.

For the greater part of July military operations were virtually confined to the Saharan Atlas, this being attributed to the rebels' desire not to interfere with the harvesting of crops. 70 insurgents were killed on July 2 in an engagement in the Djelfa sector; 98 on July 22 near Mac-Mahon, in the Aurès; and 101 on July 24 in fighting near Géryville.

A revival of insurgent activity south of Algiers occurred at the end of July. Near Aumale the rebels attacked a French post during the night of July 27-28 and, assisted by Moslem members of the garrison, killed 14 French soldiers. In the Djebel Bou-Zegza (about 25 miles south-east of Algiers) French parachutists on Aug. 3 a encircled strong insurgent force equipped with modern weapons, including a transmitting post from which false signals had been sent out to mislead French aircraft. On the following day the rebels broke through the French lines, and an engagement took place in which the French lost 21 killed and 18 wounded and the insurgents 16 killed. Strong reinforcements were rushed to the area, and on Aug. 14 the French authorities claimed to have wiped out the rebel band, which had lost 126 men during the four days' fighting.

Heavy fighting occurred in many areas during the first fortnight of August. A French communiqué of Aug. 13 claimed that the insurgents had lost 800 men killed, wounded, or captured in 200 French operations in all parts of Algeria during the previous ten days, despite their tactics of systematically avoiding pitched battles. French casualties were given as 50 killed and 25 wounded. Another communiqué of Aug. 16 claimed that in the Kabylie alone 1,037 insurgents had been killed and 711 captured since May 1, including many rebel officers and n.c.o.'s. The rebels' casualties remained heavy throughout August; in particular, they were reported to have lost 98 killed in a battle near Tebessa on Aug. 13 and 107 in three engagements in the Aurès on Aug. 31.

Because of the intensity and progressive success of the French counter-measures, the rebels concentrated during August on ambushes, hit-and-run raids, and acts of terrorism, incidents of this kind being reported from all parts of Algeria—notably from the area east of Oran and the Constantinois. A French military vehicle was ambushed on Aug. 7 on the main road from Orléansville to Miliana, 10 soldiers being killed, and on Aug. 24 strong rebel bands which raided Mascara and Tiaret were driven out only after fierce street fighting. Four police officers were killed when their car was ambushed outside Constantine in the night of Aug. 17-18, and Constantine itself was raided by rebel commandos on Sept. 25.

French military operations continued throughout September. Two rebel bands were wiped out near Mascara on Sept. 5-6 and near Tlemçen on Sept. 13, losing 106 and 36 killed respectively; 51 insurgents were killed in a battle near Nedroma on Sept. 12; and in the Kabylie the insurgents lost 83 men on Sept. 5 near Bougie, and 59 in an operation in the Soummam valley on Sept. 23. From Oct. 1-4 the French forces carried out an operation in the Plain of Chélif, during which 51 insurgents were killed and 64 captured. After a period in which heavy rains and flooding prevented all military activity, the French authorities announced on Oct. 14 that 149 insurgents had been killed and 92 captured in the Aurès and the Constantinois during the previous three days. The rebels increased their activity during the second half of the month, successfully ambushing several French units; the French authorities, however, denied claims by F.L.N. spokesmen that they had launched a "general offensive" on Oct. 20 and had inflicted heavy casualties on the French forces in four engagements.

An important development during September and October was the increasing number of insurgents who surrendered voluntarily. A band of 21 men gave themselves up in the Tebessa area on Sept. 7 without resistance (the first time a rebel band had surrendered in a body), while another 108 rebels surrendered between Oct. 9-12 in the Aurès, the Constantinois, and the Sétif area.

The Sahara. Isolated rebel activity in various parts of the Sahara started in July 1957, when a rebel force raided the town of Laghouat (250 miles south of Algiers) during the night of July 13-14 and blew up the power station, cutting off electricity and water supplies to the whole area and causing damage estimated at 450,000,000 francs. Seven French soldiers were killed near Laghouat on Aug. 13 in a rebel attack.

In the Libyan border area (where some of the main oil deposits were found in 1956—see 15697 A) an oil well at Edjelé which was being prepared for exploitation caught fire on Aug. 7; the French authorities attributed the fire to a sudden escape of natural gas during the construction work, but F.L.N. spokesmen in Cairo claimed that it was due to sabotage, though it was not certain whether this claim was true. Farther south, a French civilian convoy bringing supplies to a military post, and using a track passing through Libyan territory with the consent of the Libyan authorities, was attacked south of Ghat on Sept. 16, its crew being kidnapped and the lorries burnt. On Oct. 3, according to the French military authorities, a Foreign Legion patrol on reconnaisance in the same area was attacked near the Libyan frontier by a uniformed force which withdrew when French aircraft appeared; the Libyan authorities, on the other hand, alleged that a strong French force had attacked a Libyan military post. The French Government accepted on Oct. 9 a proposal by the Libyan Government that a mixed commission should investigate the incident and delimit the frontier in this area.

In the central Sahara near Timimoun, 60 Moslem soldiers of the camel corps mutinied on Oct. 17, murdered eight French soldiers in charge of the patrol, and joined a rebel band.

As stated by M. Pineau on Nov. 27 in the U.N. General Assembly's debate on Algeria, the French Government and military authorities claimed during the autumn of 1957 that they had gained complete superiority over the rebels and had almost won the war (see 16047 A). The F.L.N. leaders, however, while admitting the failure of urban terrorism and conceding their defeat in the "battle for Algiers," asserted that they were gaining rather than losing ground outside the towns; they also expressed optimism about their ability to extend their activities in the Sahara.

Terrorist Activities in Algeria and France.

One of the worst features of the situation was the resort to mass terrorism on the part of the rebels, both in Algeria and in Metropolitan France. In Algeria this was directed largely, and in Metropolitan France almost exclusively, against other members of the Algerian Moslem population.

Terrorism in Algeria. Following the reinforcement of French troops in Algeria in the summer of 1956, and the resultant tightening of French military control, the insurgents resorted increasingly to terrorist acts against the civilian population. As a "reprisal" for the execution of two nationalists on June 19, 1956 (the first executions since the outbreak of the rebellion), 14 Europeans were murdered in Algiers alone between June 20-24. The principal victims of rebel terrorism, however, were Moslems and not Europeans. According to official figures published on Oct. 1, 1956, attacks on individuals totalled 732 in June, 660 in July, and 647 in August; 493 Moslems were murdered in June, 544 in July, and 444 in August; in Algiers alone 29 civilians were murdered in June, 21 in August, and 16 between Sept. 1-29. On Sept. 30 two time-bombs exploded simultaneously in two Algiers cafés, injuring 64 people, whilst 26 people were killed by two bomb explosions at Nedroma on Nov. 30.

M. Amédée Froger (74), mayor of Boufarik and president of the Federation of Algerian Mayors, was shot dead outside his house in Algiers on Dec. 28, 1956. One of the leading spokesmen of right-wing opinion among the French settlers, he had campaigned against the dissolution of the Algerian municipal councils (see 15645 A). [Details of the riots which occurred at his funeral will be given in a subsequent article.]

During 1957, owing to the increasing effectiveness of French security measures, terrorism in Algiers was largely suppressed, although three major incidents occurred in February and June. On Feb. 10, 1957, several bombs exploded at two sports grounds in Algiers where football matches were being played, killing 10 people and injuring 37; at one stadium a section of the European spectators rioted after the explosion, attacked Moslem spectators indiscriminately and lynched two men before the police could intervene. On June 3 three bombs exploded simultaneously in different parts of the city, nine people being killed and 85 injured, whilst 10 people were killed and about 80 injured on June 9 when a bomb exploded in a crowded dance hall. [The riots which followed the funerals of the victims will be described in a forthcoming article.]

During the summer and autumn troops and police carried out a series of raids on the Casbah (the Moslem quarter of Algiers), as a result of which the F.L.N.'s terrorist organization in the city was largely broken up. Yacef Saadi, the F.L.N. leader for Algiers, surrendered on Sept. 24 after his hiding-place had been surrounded by soldiers. "Ali the Knife," his successor in the leadership, and

23 other rebels were killed on Oct. 8 when a store of explosives blew up in a house which was being searched by troops. The last member of Yacef Saadi's staff still at Liberty was arrested on Oct. 15, whilst Si Sallah, the leader of the F. L.N. organization in Oran, was killed in a fight with the police on the following day.

Several Moslems prominent in political or religious life were murdered during 1957, including M. Ali Chekkal (60), the former vice-president of the Algerian Assembly, who was shot dead on May 26 as he was leaving a Paris sports ground after a football match. As the best-known Moslem politician who continued publicly to support the connexion between France and Algeria, M. Chekkal had repeatedly been threatened with death and had been under police protection day and night. The assassin, a young Algerian workman, was arrested immediately after the crime; under interrogation he maintained that he had acted on his own initiative, and denied that he belonged to any political organization.

M. Adda Chentouf, a member of the Regional Commission for Oran, and a former member of the Algerian Assembly, was shot dead at Mascara on May 29; his death followed the murder of several other Moslem members of the local government bodies recently set up in Algeria by the French Government. The Grand Mufti of Mostaganem, Si Henni Hadj Ahmed, was assassinated on Aug. 7, and Sheikh Ben Tekkouk, a leading member of the Senussi sect in the Mostaganem area, was murdered on Aug. 22.

Terrorism in France. Acts of terrorism by Algerian Moslems against other Algerians living in Metropolitan France became increasingly frequent from 1956 onwards; the French Press brought almost daily reports about killings in the street, or the finding in Algerian lodging-houses of dead Algerians who had been shot or had had their throats cut. Seventy Algerians were murdered in France during 1956, and over 550 killed and 2,200 wounded in the first 10 months of 1957. In August 139 were killed and 300 wounded, while in October 53 were killed and 77 wounded in the Paris area alone. About 300,000 Algerians (almost all of whom are men) live in France, and about 120,000 of them live in Paris, which contains more male Algerian Moslems than any other city; by comparison, the Moslem population of Algiers is 180,000, but this figure includes women and children. Many Algerian workers are also to be found in the Northern industrial areas and in the Marseilles region.

About two-thirds of the victims were believed to be members of the M.N.A. or the F.L.N. who had been attacked by supporters of the rival nationalist organization. Most of the attacks were attributed to members of the F.L.N., which was reported to have built up a powerful organization in France, and was known to possess a large supply of arms and cars; it was also known to be imposing compulsory levies (believed to total about 1,000,000,000 francs a year) on Algerian workers in France, eliminating those who refused to pay. Political opponents were "tried" and sentenced to death by secret F.L.N. "courts"; an Algerian lodging-house at Lille which had been used for this purpose was burnt down by M.N.A. supporters on Aug. 26, 1957.

Almost all the leaders in France of the *Union des syndicats de travailleurs algériens* (U.S.T.A.), the trade union federation affiliated to the M.N.A., were murdered during September and October 1957, including its general secretary, M. Ahmed Bekhat (shot dead in Paris on Oct. 26), its assistant general secretary (M. Abdallah Filali), and its secretary in the Paris region (M. Ahmed Semmache). These murders were attributed to supporters of the F.L.N. and its trade union organization, the *Union générale des travailleurs algériens* (U.G.T.A.).

In addition to M.N.A. and F.L.N. supporters, Algerians who had refused to contribute to nationalist funds or to take part in political strikes were also among the terrorists' victims. The situation was further complicated by the fact that criminal elements were extorting money from other Algerians by posing as representatives of nationalist organizations; by gang warfare between rival groups of these "racketeers"; and by warfare between the "racketeers" and the genuine nationalists.

During the first ten months of 1957 nine Frenchmen were killed in France and about 30 wounded as a result of Algerian terrorism. Most of the victims were killed or injured accidentally during shooting affrays between Algerians; on Oct. 18, however, a police officer was killed and two others seriously wounded when their car was ambushed in a Paris suburb. M. Borgeaud, a Radical senator for Algiers and a leading spokesman for the settlers' interests, was shot at in a Paris street on Oct. 31 but escaped unharmed.

French and Rebel Casualties.

No official figures of the number of casualties during the first three years of the war were issued by the French authorities. *Le Monde*, however, published the following estimates on Oct. 30, 1957, based on statistics given in earlier official statements: French forces, 3,700 killed, 6,000 wounded, 650 missing; insurgent forces, 30,000 killed, 13,000 captured. It was pointed out that the insurgent casualties were only an approximation, as official statistics made no distinction between combatants and Moslem civilians killed in the course of military operations. The number of victims of terrorist activities was estimated at 950 Europeans and 6,200 Moslems killed, 2,500 Europeans and 4,100 Moslems injured, and 130 Europeans and 2,100 Moslems missing.—(Le Monde, Paris - Le Figaro, Paris - Times - Manchester Guardian)
(Prev. rep. 16080 A; 16047 A; 15882 A; 15847 A; 15645 A; 14969 A; 14913 A; 14431 A.)

A. UNITED KINGDOM. — Further Cut in Bank Rate. - Gold and Dollar Reserves in April.

The Bank Rate was reduced from 6 per cent to 5½ per cent on May 22—the second reduction since it was raised to 7 per cent on Sept. 19, 1957.

A Bank of England spokesman described the latest reduction as a "technical adjustment" based on the same general considerations as the reduction from 7 per cent to 6 per cent in March. It implied no change in financial policy and was not to be taken as a "green light" to the economy, nor was it an anti-recession move. The exchange reserves had continued to gain ground steadily during the past two months and, as in March, a reduction in Bank Rate could have been justified on market grounds some time ago; but it had "again been felt wise on more general grounds to proceed slowly and cautiously."

The Treasury had announced on May 2 that the sterling area's gold and dollar reserves rose during April by $144,000,000 after taking into account (*a*) the receipt of $11,000,000 from the E.P.U. in respect of the U.K.'s surplus in March, and (*b*) the payment of $3,000,000 to creditor countries in the Union under bilateral settlements. As a result, the gold and dollar reserves stood at $2,914,000,000 on April 30.

It was pointed out in the Press that the further rise in the reserves reflected the U.K.'s current payments surplus on its oversea payments, owing mainly to the strong favourable movement in the terms of trade and a resulting reduction in the import bill. In addition, sterling area commodities were being bought by other countries on a fairly significant scale at the present time of year. The covering of outstanding "bear" positions and the switching of funds to London from other centres had also contributed to the rise in the reserves.

Provisional figures for the E.P.U. April settlement showed that Britain had a surplus of £2,000,000, three-quarters of which would be settled during May in gold or dollars and one-quarter by a reduction in the U.K.'s debt to the Union.

Sterling continued to remain strong throughout April, the sterling-dollar spot rate centring mostly round 2.81¼ and 2.81⅜, and reaching its highest point since July 7, 1954, on April 18 and 19 at 2.81⅞. The lowest point was 2.81⅛ on April 23, after which the rate again rose steadily to reach 2.81⅝ on April 30. Transferable sterling in Zürich also remained firm, varying between 2.79275 and 2.79575.

B. UNITED STATES. — Troops leave Little Rock.

President Eisenhower issued a statement on May 8 announcing that troops of the Arkansas National Guard would be withdrawn from the Little Rock Central High School as from the beginning of the summer recess on May 29. The President added:

"Following that date, I trust that State and local officials and citizens will assume their full responsibility for seeing that the orders of the Federal Court are not obstructed. The faithful execution of this responsibility will make it unnecessary for the Federal Government to act further to preserve the integrity of our judicial processes."

As stated in 15803 A, the Arkansas National Guard had been "federalized" at the time of the integration crisis in September last; it will revert to its normal status of a State Guard at the end of May. The *New York Times* stated that about 400 National Guardsmen remained on duty at the Central High School, where there had been no incidents for several months.—(New York Times - New York Herald Tribune)
(Prev. rep. Little Rock, 15916 C.)

C. UNITED KINGDOM. — Sir Vivian Fuchs's Return from Antarctica. - Award of Gold Medal of Royal Geographical Society.

Dr. Vivian Fuchs and the other 19 members of the Commonwealth Trans-Antarctic Expedition returned to England on May 12 and were received by the Queen at Buckingham Palace on May 15. Her Majesty conferred the accolade of knighthood on Dr. Fuchs and presented him with a clasp to the Polar Medal; 14 other members of the Expedition were awarded the medal, and the other five who already possessed it (like Dr. Fuchs) received clasps.

Sir Vivian and his companions were given a civic reception on their arrival at Southampton, and were warmly welcomed by large crowds both in Southampton and London. A Government reception was given in their honour at Lancaster House on May 19.

The Royal Geographical Society had announced on March 17 that its special Gold Medal would be awarded to Dr. Fuchs. The last award of the society's Gold Medal was made in 1910 to Robert E. Peary, of the U.S. Navy, the first man to reach the North Pole. Previous recipients were Captain Scott (in 1904) and Sir Ernest Shackleton (in 1909).—(Times).
(Prev. rep. 16055 A.)

A. UNITED KINGDOM. — Miscellaneous Legislation.

Miscellaneous Government-sponsored legislation enacted during the period 1956-58 is summarized (in alphabetical order) below, the dates of the House of Commons second reading and of the Royal Assent being shown in parentheses ; the dates of the second reading in the House of Lords are also given where Bills were first dealt with by that House.

The Aliens Employment Act made permanent provision for the employment of aliens in a civil capacity under the Crown, either at home or abroad ; it revoked Defence Regulation 60 D, which had conferred a temporary and limited authority for this. Under the Act, aliens may only be employed under the Crown in Britain (*a*) if a responsible Minister issues a certificate of authority, and the Treasury consents ; (*b*) if no suitable British candidate for the job is available, or the alien has special qualifications or experience. The Treasury must lay before Parliament annually a list of certificates in force and the number of aliens covered by each. (H.C. second reading June 20, 1955 ; enacted Dec. 21, 1955).

The Cayman Islands and Turks and Caicos Islands Act enabled the two island groups to be administered separately from Jamaica (of which they were formerly dependencies) and to possess their own legislative bodies under the new constitutional arrangements in the West Indies—see page 15998, first column. (Enacted Feb. 20, 1958).

The Christmas Island Act enabled the British Government to transfer the administration of Christmas Island to Australia—see 15590 A. (Introduced in H.L. April 17, 1958 ; enacted May 14, 1958).

Under an Order in Council dated Dec. 13, 1957, Christmas Island was detached from Singapore on Jan. 1, 1958, and administered as a separate dependency of the U.K. pending its transfer to Australia, which will take place in 1958. An *ex gratia* payment of 20,000,000 Malayan dollars (nearly £2,500,000) was made to the Singapore Government to compensate it for the loss of revenues from the island's phosphate deposits, which are worked jointly by Australia and New Zealand.

Parallel Australian legislation for the acquisition of sovereignty over Christmas Island was enacted in Canberra on Feb. 25, 1958.

The Commonwealth Institute Act enabled the Trustees of the Imperial Institute (to be renamed the Commonwealth Institute) to dispose of its existing buildings [see 14897 A] and erect new ones on a site in Kensington, the Government providing £725,000 towards the capital cost. (H.C. second reading, Feb. 11, 1958 ; enacted March 13, 1958).

The Copyright Act amended the U.K. law of copyright, as codified by the Copyright Act of 1911, in order to take account of changes in international copyright law and of developments since 1911 in film-making, gramophone recording, sound and television broadcasting, etc. The main provisions of the Act, which embodied most of the recommendations of a departmental committee on copyright which reported in 1952, are summarized below :

(1) The general law of copyright as set out in the 1911 Act was re-enacted, authors and artists being given copyright protection during their lifetime and for 50 years after their death.

(2) The provision in the 1911 Act that the work of authors and artists who had been dead for 25 years might be re-published by any publisher who agreed to pay a statutory royalty of 10 per cent to the copyright owners was repealed. British copyright law was thus made to conform to the Berne Union, which gives authors and artists absolute protection for 50 years after death.

[This clause of the Act precluded the issue of cheap reprints—unless published by the copyright owners themselves—until the author had been dead for 50 years ; e.g. the works of Kipling (d. 1936) may not now be published (except by the original publishers) until 1986, whereas under the 1911 Act they could have been issued by other publishers in 1961.]

(3) Journalists or artists on newspaper or magazine staffs would retain all rights in their work except the actual newspaper or magazine rights (e.g. they could publish their work in book form, dispose of film rights, etc.). Similarly, "free-lance" and other authors having works commissioned by newspaper or magazine publishers would retain all rights therein except the actual newspaper or magazine rights, unless they had otherwise agreed.

(4) The makers of a film would have a 50 years' copyright in it from the date of registration ; the copyright of any script, music, etc., specially written for the film would expire together with the copyright of the film itself, even though the writer or composer might not have been dead for 50 years. Where the story, music, etc. already enjoyed copyright in its own right—i.e. where a novel was filmed—this would not be affected, and would continue independently of the film until 50 years after the author's or composer's death.

(5) The Act reduced from 50 years to 25 years the existing copyright in "gramophone records, perforated rolls, and other contrivances by means of which sound may be mechanically reproduced," as well as the period during which the recording companies enjoyed "performing rights" in respect of the playing of records in public. It stipulated also that "performing fees" would not be payable in respect of records played as an amenity and without charge in residential premises, clubs, public houses, etc.

(6) New copyrights, valid for 50 years, were created in sound broadcasting and television programmes. Performing and other rights in their respective programmes were vested in the B.B.C. and the I.T.A., which were empowered to set up separate or joint agencies to collect fees. As in the case of gramophone records, the Act stipulated that fees would not be payable in respect of public performances unless a separate charge was made for admission.

(7) A Performing Rights Tribunal, consisting of a chairman appointed by the Lord Chancellor and from two to four other members appointed by the Board of Trade, would be set up to adjudicate in disputes between persons seeking licences to give public performances of sound or television broadcasts, gramophone records, etc., and the owners of the copyrights.

(8) Teachers and educational authorities were safeguarded against infringement of copyright in respect of quotations from textbooks in examination papers, etc.

(9) The rights of libraries to make photostat or similar copies of copyright works, and of students to make copies or transcriptions, were certified by the Act.

(H.L. second reading Nov. 15, 1955 ; H.C. second reading June 4, 1956 ; enacted Nov. 5, 1956).

The appointment of Mr. Clive Burt, Q.C., as chairman of the Performing Rights Tribunal set up under the Act was announced on May 17, 1957.

The Crown Estates Act implemented the main recommendations of the Committee on Crown Lands [see 14296 A]. It provided for the replacement of the former four Commissioners of Crown Lands by up to eight Crown Estate Commissioners, subject to the general direction of the Lord Privy Seal and the Secretary of State for Scotland, and responsible to Parliament. (H.C. second reading, July 20, 1956 ; enacted Nov. 5, 1956).

The appointment of Sir Malcolm Trustram Eve as First Commissioner and Chairman, and of Mr. R. M. J. Harris as Second Commissioner and Deputy Chairman, was announced on Dec. 14, 1956. They had both been Commissioners of Crown Lands.

The Crown Estate Commissioners announced on Feb. 1, 1958 the forthcoming establishment of a Directorate of Forestry, to be responsible for Crown woodlands. It will be based on Windsor, and Sir Eric Savill, Surveyor to the Windsor Estate, will concurrently become Director of Forestry.

The Customs Duties (Dumping and Subsidies) Act empowered the Board of Trade (1) to impose or vary Customs duties on imported goods which it considered had been dumped or subsidized—i.e. which were being sold in Britain at less than the "fair market price" in the country of origin or export ; (2) to make Orders allowing drawback of duty on such goods subsequently re-exported. (H.C. second reading, Jan. 22, 1957 ; enacted April 17, 1957).

The Dentists Act (1) provided for the setting-up of a General Dental Council (on the lines of the General Medical Council, but with fewer members) to enable the dental profession to become self-governing ; (2) authorized certain auxiliary workers, in view of the shortage of qualified dentists, to perform extractions, etc., for schoolchildren under the direction of registered dentists, and under regulations to be made by the new General Dental Council. (H.C. second reading, Nov. 4, 1955 ; enacted March 15, 1956).

The Department of Scientific and Industrial Research Act replaced the former Advisory Council for Scientific and Industrial Research by an executive council—known as the Research Council—having control over the Department of Scientific and Industrial Research, subject to the over-riding responsibility of the Privy Council and the Lord President of the Council. (H.C. second reading June 20, 1956 ; enacted Aug. 2, 1956).

The membership of the Research Council was announced on Nov. 7, 1956, consisting of eminent scientists (including a number of university professors), leaders of industry and commerce, and trade union representatives. Its chairman is Sir Harry Jephcott, chairman of Glaxo Laboratories.

The Food and Drugs (Scotland) Act applied to Scotland the main provisions of the Food and Drugs (Amendment) Act [see 14491 A]. (H.C. second reading July 6, 1955 ; enacted March 15, 1956).

The Friendly Societies Act extended the field of activities open to friendly societies by removing certain obsolete restrictions. *Inter alia*, it permitted a friendly society (*a*) to pay marriage endowment and unemployment benefits to its members ; (*b*) to invest its surplus funds in a housing association of another friendly society, without losing exemption from income tax. (H.C. second reading July 8, 1955 ; enacted Dec. 21, 1955).

The House of Commons Disqualification Act is a revised version of the Bill which was introduced by the Government in July 1955 (see 14381 A). This Bill, after receiving an unopposed second reading in the House of Commons on Nov. 9, 1955, had been sent to a Select Committee in February 1956 for consideration and re-drafting. The Select Committee (chairman, Sir Patrick Spens, C.) stressed in its report—published on Aug. 29, 1956—that it attached great importance to two principles : (*a*) that qualification for membership of the House of Commons should be on as wide a basis as possible ; (*b*) that any restrictions on membership should be contained in legislation and be set out in a form which would be readily available to persons likely to be affected, and could be easily interpreted by them.

The new Act substantially followed a draft presented by the Select Committee with its report, its main provisions being as follows :

(1) The general descriptions of disqualifying offices contained in earlier legislation were replaced by a definite and detailed list of offices that ought not to be held by Members of Parliament.

The list included judicial offices; appointments on commissions, tribunals, and other bodies; and other official posts. A special section included offices barred to members for particular constituencies (e.g. a Recorder of a borough would be disqualified from sitting for that borough or any part of it). A further schedule set out a list of Ministerial posts which would not disqualify a member from sitting in the House.

The Act provided for the list of disqualifying offices, etc., to be kept up-to-date by Orders in Council, which would require affirmative resolutions of the House of Commons.

(2) Because of the new arrangements for a detailed and exhaustive list of disqualifying offices, the onus of satisfying themselves before nomination that they were not subject to any disqualification was placed on candidates.

(3) The former statutory disqualification of Crown pensioners and Crown contractors was repealed.

[The Select Committee had pointed out that there had been no evidence for the past 100 years of any corruption in connexion with M.P.s and Government contracts, and that the difficulty of drafting a clause which would disqualify some contractors while avoiding anomalies made it preferable to omit this category of disqualification altogether.]

(4) The former provision that members of the Reserve or Auxiliary Forces would be disqualified on their embodiment or recall was repealed.

(H.C. second reading, Dec. 19, 1956; enacted April 17, 1957).

The House of Commons (Redistribution of Seats) Act amended the 1949 Act of the same name. It (1) lengthened the interval between general reviews of Parliamentary constituencies (previously required to be held every three to seven years) to a minimum of 10 years and a maximum of 15; (2) provided that there should be separate "average constituency populations" in England, Wales, Scotland, and Northern Ireland; (3) relieved the four Boundary Commissions of their existing obligation to observe strict mathematical equality between constituencies and required them, when drawing constituency boundaries, "to pay strict regard to local ties and sentiment." The Act does not affect the number of seats in the House of Commons.

[As the last general review of constituency boundaries was completed in November 1954, the effect of the Act is to ensure that the next general review cannot be completed before November 1964 (instead of by 1961, as provided under the 1949 Act) and need not be completed before November 1969. Under the Act, it will also be possible for, say, Scotland and Wales to increase their representation slightly in the House of Commons.]

(H.C. second reading Feb. 11, 1958; enacted May 14, 1958).

The Import Duties Act provided for the codification of all U.K. tariff legislation (based mainly on the Import Duties Act of 1932) into one comprehensive document, to be drafted in accordance with a standard international classification (the "Brussels nomenclature") which was agreed to by a number of European countries at Brussels in 1950 and completed in 1955. The new classification (under which the present level of duties will, in general, be maintained) will come into force on Jan. 1, 1959. (H.C. second reading, Dec. 2, 1957; enacted Feb. 20, 1958).

The Isle of Man Act removed Treasury control over the expenditure of Isle of Man customs duties and—in accordance with the agreement of Oct. 30, 1957 [see 15870 E]—left the Tynwald free to legislate on loans, harbours, the fixing of customs duties, and similar matters. (H.C. second reading, Nov. 27, 1957; enacted Feb. 20, 1958).

The Magistrates Courts Act (1) enabled persons summoned to appear on summary offences before magistrates' courts (except juvenile courts) to plead "guilty" in writing if they wished; (2) permitted prosecutors to be absent in such cases. (Second readings, House of Lords March 12, 1957; House of Commons April 8; enacted June 7, 1957).

The Milford Haven Conservancy Act (see 15908 A) received the Royal Assent on April 29, 1958, after passing through its remaining stages in both Houses.

The National Health Service (Contributions) Act gave effect to the new rates of N.H.S. contributions—see 16084 B. Enacted on April 30, 1958.

The Naval Discipline Act implemented the main recommendations of the Select Committee on the working of the Naval Discipline Act of 1866 [see page 15620]. It (1) abolished capital punishment in the Royal Navy except for offences "committed with intent to assist the enemy"; (2) required the findings of a court-martial to be unanimous before a death sentence was imposed; (3) increased the maximum penalty for absence without leave from 10 weeks to two years; (4) created new offences of (*a*) low or dangerous flying; (*b*) careless talk, covering peacetime as well as wartime, as in the other Services. (H.C. second reading March 20, 1957; enacted July 31, 1957).

The Occupiers' Liability Act implemented recommendations of the Law Reform Committee concerning the duty of an occupier of premises to his visitors in respect of injury due to the state of the premises. It (1) made the occupier responsible for exercising "all reasonable care" to ensure the visitor's safety when "using the premises for the purposes for which he is invited or permitted by the occupier to be there," including the giving of adequate warning of any danger which the visitor might encounter; (2) stipulated, however, that the occupier should not be responsible for damage caused to a visitor by the faulty execution of constructional, maintenance, or repair work done by a contractor employed by the occupier, provided that he had taken "reasonable steps" to ensure that the work was properly done; (3) made the occupier responsible for exercising care in respect of any third party whom he was bound by contract to permit to enter his premises; (4) provided that a landlord who was responsible to his tenant for maintaining or repairing the premises should "have the same duty of care towards his tenant's lawful visitors" as if he were the occupier himself. (H.C. second reading March 6, 1957; enacted June 6, 1957).

The Overseas Service Act enabled the Government to implement the policy on the Overseas Civil Service set out in the White Paper of May 1956 [see 14966 A] and to meet the various financial obligations (e.g. for payment of pensions, contributions to salary, and compensation) assumed under agreements with former Colonial territories. (H.C. second reading Jan. 21, 1958; enacted March 13, 1958).

The Rating and Valuation (Scotland) Act, based largely on the recommendations of a committee under Lord Sorn which reported in September 1954, corresponded to the similar Bill for England and Wales enacted in 1955 [see 14491 A]. It (1) provided for the abolition of owners' rates in Scotland and the proportionate reduction of rents; (2) introduced changes in valuation, rating, and equalization grants; (3) exempted churches, church halls, and (at local authorities' discretion) charitable organizations from payment of rates. (H.C. second reading Dec. 16, 1955; enacted Aug. 2, 1956).

The Recreational Charities Act gave statutory recognition for income tax and other purposes to the charitable nature of certain trusts and institutions which exist to provide recreational and similar facilities, but the status of which had been made doubtful by a recent decision of the House of Lords (*Commissioners of Inland Revenue v. Baddeley*). The Act laid down that the facilities must be provided either (*a*) for the public as a whole; or (*b*) "to improve the conditions of life" of persons who needed them "by reason of their youth, age, infirmity or disablement, or poverty or social and economic circumstances." (Second readings, House of Lords Jan. 21, 1958; House of Commons, Feb. 11; enacted March 11, 1958).

The Sugar Act enabled the Government to implement its undertakings to Commonwealth and British sugar growers whilst restoring to importers and exporters the freedom to trade competitively, thus preparing the way for the re-opening of the London sugar market. The Act provided for (1) the dissolution of the Sugar Commission and the ending of State trading in sugar; (2) the establishment of a Sugar Board to take over the Government's undertakings under the Commonwealth Sugar and other agreements, and to sell the sugar concerned to refiners and traders at current commercial prices; (3) the financing of the Sugar Board including the meeting of deficits incurred in sugar trading by means of a surcharge on all sugar and molasses entering the U.K. internal market (i.e. excluding sugar imported for re-export); (4) the making of further regulations affecting the British Sugar Corporation, the U.K. sugar industry, and the importation of sugar. (H.C. second reading Nov. 10, 1955; enacted July 5, 1956).

The White Fish and Herring Industries (No. 2) Act (1) extended the period of the White Fish Subsidy [see 13085 A] until May 1961, or two years later if required; (2) provided for the payment of a similar subsidy for a like period to the herring industry; (3) authorized the payment of Government grants (estimated to total £250,000-£500,000) to meet up to 25 per cent of the cost of converting coal-burning trawlers to oil fuel. (H.C. second reading, March 12, 1957; enacted April 17, 1957).

The Wireless Telegraphy (Blind Persons) Act provided for £1 of the £3 combined wireless and television licence to be remitted wherever a blind person was a member of the household. (H.C. second reading July 9, 1955; enacted July 27, 1955).

The Workmen's Compensation and Benefit (Supplementation) Act provided for the payment from the Industrial Injuries Fund of a supplement of 17s. 6d. a week to totally disabled persons who still drew weekly payments under the Workmen's Compensation or Industrial Diseases (Benefit) Acts. About 13,000-14,000 persons were expected to qualify, the initial cost being put at £650,000, decreasing later. (H.C. second reading May 15, 1956; enacted July 5, 1956).

Private Members' Legislation.

The following Private Members' Bills were enacted between 1956 and 1958 (sponsors names in parentheses):

The Advertisement (Hire Purchase) Act. (The late Lieut.-Colonel Schofield, C.). The Bill laid down that advertisements of hire-purchase goods giving price figures must state clearly (1) the amount of deposit (if any) or its percentage of the total price; (2) the number and amount of instalments and the period over which each is payable; (3) the number of instalments (if any) payable before delivery of the goods; (4) the cash price of the goods. Where the advertisement does not contain price figures, however, it need only show the relationship between the deposit and the total purchase price. Maximum penalty for contravention: first offence, £50; second offence £100. (H.C. second reading, Feb. 1, 1957; enacted July 17, 1957).

The Arundel Estate Act. (The Duke of Norfolk). As enacted, this Bill enabled the Duke to break the entail imposed on the Arundel estates by an Act of 1627 (under which the estates were settled in tail male and successive owners debarred from disposing of them) and put the owner in the same position as an ordinary landowner.

Other clauses which would have had the effect of vesting Arundel Castle in trust for the Earl Marshal of England (a post held for many generations by the Duke's family), with endowments for its upkeep and compensation for the Duke's successors affected by the ending of the entail on the estates, were strongly opposed by Labour members in the House of Commons and were dropped from the Bill in the Committee stage. (H.L. second reading, May 1, 1957; H.C. second reading July 17; enacted July 31, 1957).

The Cheques Act. (Mr. Graham Page, C.). The main purpose of this Act was to abolish the need to endorse cheques paid direct by the payee into his own bank. It (1) relieved banks of any liability for paying an unendorsed cheque (thus making endorsement by the payee unnecessary, unless he wished to negotiate the cheque); (2) abolished the necessity for receipts on the backs of cheques by providing that an unendorsed cheque, once it became a paid cheque, should be considered evidence of the payee having received the money. It was nevertheless provided that the drawer of a cheque might still, if he wished, require the payee to complete a receipt on the back.

Under the Act, endorsements will still be necessary in the case of (*a*) cheques cashed or exchanged across the counter; (*b*) negotiated cheques (i.e. cheques made over to a third party); (*c*) cheques payable to joint payees and tendered for the credit of an account to which all of them are not parties; (*d*) bills of exchange and promissory notes, drafts and other instruments drawn on the G.P.O. or payable at a Post Office, Inland Revenue warrants, travellers' cheques, and instruments payable by banks abroad. (H.C. second reading April 12, 1957; enacted July 17, 1957).

The Road Transport Lighting (Amendment) Act. (Mr. Gresham Cooke, C.). This Act, drafted in conjunction with Ministry of Transport officials, sanctioned the use of amber-coloured reflectors on the pedals of bicycles and tricycles as an additional safety precaution. (H.C. second reading, Dec. 6, 1957; enacted April 30, 1958).

The Sanitary Inspectors (Change of Designation) Act. (Sir Wavell Wakefield, C.). This provided for sanitary inspectors to be known in future as "health inspectors." (H.C. second reading June 15, 1956; enacted Aug. 2, 1956).

The Small Lotteries and Gaming Act. (Mr. Ernest Davies, Lab.). This legalized small lotteries, whist and bridge drives, etc., run by registered charitable and non-profit-making societies, sports clubs, or churches. [Previously, lotteries and "games of chance" involving the transfer of money had been illegal under statutes dating back to Henry VIII]. The Act stipulated, however: (1) that no prize could exceed £100 and not more than half the proceeds be distributed; (2) that not more than £750 must be raised by the sale of tickets; (3) that tickets must all be of one price, not exceeding 1s.; (4) that tickets must not be sold to or by children under 16 or sent through the post, except to members; (5) that lotteries must not be advertised, except to members; (6) that expenses must not exceed 10 per cent of the proceeds. (H.C. second reading Nov. 25, 1955; enacted July 5, 1956).

The Thermal Insulation (Industrial Buildings) Act. (Mr. Gerald Nabarro, C.). This Act applied to industrial buildings where fuel is used for space heating. It required (*a*) all existing buildings to be insulated against loss of heat from a date to be fixed by the Minister of Power, but not earlier than Jan. 1, 1962; (*b*) insulation to be provided in all new buildings begun after Dec. 31, 1958. It also authorized the Minister of Power to make regulations prohibiting the use of non-fireproof material for insulating purposes. (H.C. second reading March 15, 1957; enacted July 17, 1957).

Major legislative measures such as the Rent Act (15917 A), the Clean Air Act (15374 A) and the Road Traffic Act (15753 A) are given in previous issues.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14491 A.)**

A. ITALY. — The Bishop of Prato Case.

The hearing opened on Feb. 24 before the Florence court of an action for libel and slander brought against the Bishop of Prato (Mgr. Pietro Fiordelli) and the parish priest of Prato (Don Danilo Ajazzi). The action was brought by Signor Mauro Bellandi (a grocer) and his wife Loriana, who had entered into a civil marriage on Aug. 12, 1956, but had not been married in church, although both had been baptized as Roman Catholics. The allegedly defamatory statements were made by the Bishop in a pastoral letter issued on the day of their civil wedding, which he did not recognize as valid. In this letter, Mgr. Fiordelli referred to Signor and Signora Bellandi as "public sinners," said that their civil marriage was "no more than the beginning of a scandalous concubinage," and ordered that all the sacraments should be denied them, that their house should not be blessed, that they should not be given religious burial, and that their parents should be denied holy water at Easter for neglecting their religious upbringing. The pastoral letter was read in the parish of Prato, affixed to the church door, and published in the parish magazine.

The couple subsequently brought an action against the Bishop of Prato and Father Ajazzi, but the local court ruled that there was no case to answer in civil law as the Church possessed its own jurisdiction. Signor and Signora Bellandi then applied to the Court of Appeal in Florence, which ruled that Mgr. Fiordelli and Father Ajazzi must answer the charge. The case—which had meanwhile aroused national controversy—was the first court arraignment of a bishop in Italy since the conclusion of the Lateran treaties between the Italian Government and the Holy See in 1929.

Neither the Bishop nor Father Ajazzi appeared in court, but the former sent a letter in which he gave his reasons for not attending. In it he claimed that his denunciation of two baptized Roman Catholics of his diocese who had undergone only a civil marriage ceremony was "an act of my spiritual power . . . taken in the exercise of my episcopal jurisdiction." His presence in court, he declared, might have been taken as a recognition that the civil magistracy could deal with "an act concerning the spiritual government of the faithful." The liberty of this spiritual government had been guaranteed in the Lateran Treaties and solemnly proclaimed in the Italian Constitution.

Mgr. Fiordelli's letter continued: "In face of the great publicity with which this deplorable act was intentionally surrounded, in view of the grave scandal caused by it among my faithful, and as I failed to overcome the stubborness of the two people about to get married, I was forced to announce publicly the painful situation in which their action would place them before the Church, and the penalties they would incur. About my conduct in the spiritual government of the faithful I am answerable to my conscience as a bishop, to the Supreme Pontiff, and to God."

[Article 7 of the Italian Constitution, to which the Bishop referred, lays down that Church and State are "each in its own field" independent and sovereign. The Concordat of 1929 allows the Holy See and its bishops to publish freely, and affix to religious buildings, instructions, ordinances, pastoral letters, diocesan bulletins, "and other matters regarding the spiritual government of the faithful." Religious marriage ceremonies conducted according to canon law and properly registered were recognized in the Concordat as having "the civil effects"—i.e. they were recognized as valid marriages under civil law. Previously Italians had to be married before the civil authorities, and were free to have a religious ceremony in addition if they wished.]

On behalf of Signor and Signora Bellandi, counsel argued that the State had granted no immunity from its laws to priests under the Concordat. This immunity had been granted only in certain exceptional cases, such as to the Pope himself, to the Cardinals in conclave, to Bishops in council, and to acts of the Holy See, and Mgr. Fiordelli's pastoral letter came into none of these categories. Counsel for the plaintiffs also said that his clients were not objecting to the ecclesiastical censure as such but to the manner and the terms in which it was expressed; whereby, it was alleged, the Bishop had taken the affair beyond the purely religious sphere.

The public prosecutor [who is an official party in all slander and libel actions under Italian law] asked for the acquittal of the two defendants, on the grounds (i) that the Bishop had been acting within the limits imposed by his mandate; (ii) that he therefore lacked criminal intent; and (iii) that his denunciation of Signor and Signora Bellandi thus did not constitute an offence. Counsel for the Bishop argued that the State, by concluding the Concordat, had set limits to its interference in ecclesiastical affairs; to attribute to the State the task of controlling matters relating to faith was to negate its own existence and to transgress the limits which it had imposed on itself. In such an eventuality it was not the Church which was invading the political field but the State which was introducing itself into religious matters.

Counsel for Signor Bellandi, on the other hand, contended that the State could not recognize the right of the Church to decide for itself how far its actions were subject solely to its own spiritual jurisdiction. He rejected as "absolutely impossible" the defence's argument that a distinction could be drawn between a man's religious reputation and his lay reputation.

On March 1 the court found Mgr. Fiordelli guilty of defamation of the plaintiffs and sentenced him to a fine of 40,000 lire (about £24), payment being suspended for five years. The Bishop was also sentenced to bear the entire costs of the proceedings and to pay damages to the plaintiffs, which would be assessed in a civil court. Father Ajazzi was acquitted because, in the view of the court, he had executed the order of a superior in the belief, though erroneous, that this order was a legitimate one.

The written judgment of the court giving the reasons for its decision was issued on April 1.

It rejected the Bishop's contention that he was responsible only "to his own conscience, the Supreme Pontiff, and God" for an act concerning his spiritual power. Such a principle, it was stated, would only be valid if the act in question had been performed by the Holy See. Moreover, it should not be overlooked that all persons in Italian territory, whether Italian nationals or foreigners, were subject to Italian penal jurisdiction under the criminal code, not excluding those holding episcopal office. To understand fully the character of the relations between Church and State, and the limitations between the two Powers, it was also necessary to remember that the Concordat required bishops to swear an oath before the Head of State.

Dealing with the question whether the Bishop of Prato's letter constituted a defamatory statement, objectively considered, the judgment said that there was no doubt that the expressions used were such as to be regarded, according to the common feelings of the great majority of men, as an expression of discredit. In defamation the "subjective" element arose from the deliberate desire of one person to harm the reputation of another, regardless of the cause; that this had been Mgr. Fiordelli's intention appeared clear from his whole behaviour, and the court could not agree that the Bishop had exercised a proper right by making the statement in question.

As regards the effects of such a defamatory statement, the Court held that whenever acts by the ecclesiastical authorities offended the rights of the citizen as guaranteed by the Constitution, the protection provided by the laws of the State must operate in defence of those rights. No provision had been made for a case of this kind in the 1929 Concordat, but it could not be validly argued that "if at any time the Church and her competent organs, exercising their spiritual and jurisdictional power . . . harm the rights of a citizen recognized and protected by the law of the State, the State will have to remain idle just because the law of the Concordat does not provide for this particular situation."

Rejecting the Bishop's argument that he had acted within his religious rights under the Lateran treaties, the Court found that Mgr. Fiordelli's expressions had not been "of the kind that are strictly reserved to the religious field" but had been "relevant in the social-ethical field."

The Court nevertheless granted the Bishop extenuating circumstances on general grounds, and also because he had acted for "reasons of a moral and social character."

The court's judgment caused deep concern and consternation at the Vatican, and it was announced on March 2 that the Pope, who was reported to be "grief-stricken," had cancelled the celebration of the 19th anniversary of his coronation (arranged for March 12 in St. Peter's) because of the "bitterness, grief, and outrage to the Church" arising from Mgr. Fiordelli's conviction.

The Archbishop of Bologna (Cardinal Lercaro) ordered all churches in his archdiocese to go into mourning until Palm Sunday, and to sound a funeral peal for five minutes each day. Vatican Radio declared that the verdict had brought not only "stupor" but also "bitterness and deep regret at the fact that an innocent man has been punished for having exercised a right and done his duty." The Catholic Action newspaper *Il Quotidiano* compared the Court's finding to the persecution of Roman Catholics in China.

On the other hand, nine bishops in Lombardy issued a pastoral letter on March 5 aimed at easing public tension in the dispute; it urged both the clergy and the faithful "to work for peace and rectify the false ideas that have led to the anti-clerical campaign." After interpreting the Bishop of Prato's conviction as a "victory for atheistic Communism," the letter added: "We want to co-operate in re-establishing serenity in public opinion, especially among honest and objectively-minded citizens . . . We cannot accept the accusation that the Church and Catholics are threatening the prestige and authority of the State." The Archbishop of Pisa (Mgr. Camozzo) also issued a statement in which he said: "We respect the magistrature . . . We do not think that bishops are exempt from the penalties of the law for common offences."

The Italian Prime Minister, Signor Zoli (Christian Democrat), declared on March 4 that though he was "sorry as a Catholic," as a Prime Minister he thought that "justice must take its course" in the case of the Bishop of Prato. The independent liberal newspaper *Corriere della Sera* (Milan) appealed for a "sense of moderation" lest a religious struggle in Italy should play into the hands of the Communists. Similar appeals were made by the organs of the Social Democratic Party and the Republican Party—*Giustizia* and *Voce Repubblicana* respectively—whilst news agencies close to the Christian Democratic leadership stressed that the case of the Bishop of Prato should on no account bring about an atmosphere of religious strife in the forthcoming general elections.

It was announced on March 4 that counsel for Mgr. Fiordelli had lodged an appeal against the sentence, and that a formal appeal had also been filed on behalf of Father Ajazzi to obtain his acquittal on different grounds. It was stated that although Mgr. Fiordelli had maintained his non-recognition of the competence of the court, his counsel had acted under a provision entitling the defence to appeal independently of the defendant.—(Corriere della Sera, Milan - Times)

A. CHESS. — Botvinnik regains World Title.

The Russian chessmaster, Mikhail Botvinnik, regained the title of world champion on May 9 from his compatriot, Vassily Smyslov, at the end of 23 games played in Moscow. Botvinnik had seven wins and Smyslov five, with 11 games drawn. (Soviet Embassy Press Dept., London) **(Prev. rep. 15513 A.)**

B. NETHERLANDS. — Parliamentary Approval for Delta Plan. - Progress of Zuider Zee Reclamation.

The project for closing the sea inlets of the south-western Netherlands (see map, page 14292), known as the Delta Plan, was approved by the Upper House of the States-General on May 8, 1958. The Lower House had previously approved the plan on Nov. 5, 1957, by 106 votes to eight.

As shown in the map referred to, the Delta Plan provides for the building of four great sea-dykes connecting the islands of Goeree-Overflakkee, Schouwen-Duiveland, North Beveland, and Walcheren. The biggest hydraulic engineering project in Dutch history, it will take an estimated 25 years to complete at a cost equivalent to £250,000,000. When completed, the islands of Zeeland and South Holland will no longer be isolated from the mainland, and the estuaries of the Rhine and Scheldt, when drained out, will be available for agriculture, land settlement, and industrial development. [As explained in 14922 A, the project does not affect the channel of the Western Scheldt, which affords access from the North Sea to the Belgian port of Antwerp.] The four dykes will have a total length of 19 miles and, when completed, will make impossible a repetition of inundations such as the Zeeland disaster of 1953, when over 1,800 people lost their lives. The existing network of dykes, with a combined length of 437 miles, will be retained as a secondary line of defence against the sea. The Delta Plan will involve the extinction of oyster and mussel beds from which some 2,000 people derive a livelihood; the persons affected will receive compensation under the Government's legislation.

The first stages of the work began in July 1956, when a start was made on closing the Haringvliet the sea inlet between Goeree-Overflakkee and the mainland of South Holland province. Although not part of the actual Delta Plan, it forms an important preparatory work and will take about 12 years to complete. In addition to the enclosing dyke (which will run from Hellevoetsluis to the sand-dunes at the mouth of the Haringvliet) it will also involve the construction of 16 drainage sluices, each about 20 yards in width. Work on the Delta Plan proper began early in 1958, when a start was made on building a dyke to link Walcheren and North Beveland.

The Zuider Zee Reclamation Scheme.

A further important stage in the Zuider Zee reclamation scheme (see 14292 A) was reached on Sept. 13, 1956, with the closing of the East Flevoland polder—one of the five polders (areas of reclaimed land) forming part of the overall reclamation project. The new polder is enclosed by a 66-mile dyke running from Harderwijk into what was formerly the middle of the Zuider Zee.

The Zuider Zee scheme—the biggest land reclamation project undertaken anywhere in the world—began in the 1920's and is scheduled for completion by 1980. When finished, it will have increased the size of the Netherlands by seven per cent and the country's arable area by over 500,000 acres, or ten per cent. Of the five polders projected (see map, page 14292) three are completed and work on the remaining two is in progress. The five polders are:

(1) The North-West polder (Wieringermeer). This was completed in 1930 and covers an area of 50,000 acres. Adjoining the province of North Holland, it includes the former island of Wieringen.

(2) The North-East polder, covering 119,000 acres and including the former island of Urk. The main part of the work was carried out between 1938 and 1942, and the polder was completed after the war. A new town (Emmeloord), ten villages, farms, and roads have arisen on what was formerly the sea-bed. The population of the polder has grown from 3,000 in 1949 to over 20,000 at the present time, of whom some 9,000 live in Emmeloord.

(3) The South-East polder (East Flevoland), completed in 1956 as stated above. Covering 133,000 acres, it includes the new town of Lelystad (see page 14292, second column) and 11 new villages. Lelystad, built on a site formerly in the middle of the Zuider Zee, is designed as the chief town of the five polders when the project is finally completed; it already has a considerable population.

(4) The South-West polder (South Flevoland), which will cover an area of 111,000 acres when completed.

(5) The Markerwaard, covering an area of 150,000 acres when completed, and comprising the western part of the Zuider Zee. Work on this project reached an important stage on Oct. 17, 1957, when Marken—the last remaining island in the Zuider Zee—was linked to the mainland by a new dyke.

The Zuider Zee—now known as the Ijsselmeer (Ijssel Lake)—has been a freshwater lake since 1932, when it was sealed off from the North Sea by the dyke and motor-road (*Afsluitdijk*) connecting the provinces of North Holland and Friesland. (Netherlands News Agency - Algemeen Handelsblad)

C. FIJI. — New Governor.

It was announced in London on May 20 that Mr. K. P. Maddocks (51), deputy Governor of the Northern Region of Nigeria, would succeed Sir Ronald Garvey as Governor of Fiji in October, when Sir Ronald's term of office would have expired.—(Times) **(Prev. rep. 12296 A.)**

MAY 24—31, 1958

A. INDIA. — The Chagla Commission Report. - Mr. Krishnamachari resigns from Finance Ministry. - New Cabinet Appointments. - Death of Dr. Kalam Azad.

The Government of India appointed on Jan. 17 a one-man Commission of Inquiry consisting of Mr. Justice M. C. Chagla (Chief Justice of the Bombay High Court) in connexion with certain transactions of the Life Insurance Corporation of India relating to the purchase of shares in six companies controlled by a Mr. Haridas Mundhra. The shares had been purchased in June 1957, but their acquisition subsequently aroused serious concern because of the doubtful financial position of some of the companies involved, the continued fall in the prices of their shares, the reputation of Mr. Mundhra himself, and the fact that he remained in control of the companies.

The six companies were (1) Angelo Bros. Ltd., Calcutta; (2) the British India Corporation Ltd., Kanpur; (3) Smith Stanistreet and Co. Ltd., Calcutta; (4) Jessop and Co. Ltd., Calcutta; (5) Richardson and Cruddas Ltd., Calcutta; and (6) the Osler Electric Lamp Manufacturing Co. Ltd., Calcutta. Mr. Justice Chagla was asked to inquire into "(i) whether the purchases were in accordance with normal business principles or practices; (ii) the propriety of the purchases; (iii) the person or persons responsible for the purchases; (iv) any other circumstances which to the Commission appear to be relevant."

During the inquiry, which was held in public, a number of witnesses were heard and large numbers of documents submitted. The principal witnesses included Mr. T. T. Krishnamachari (the Indian Finance Minister); Mr. H. M. Patel (Principal Secretary to the Ministry of Finance, and first chairman of the Life Insurance Corporation from Sept. 1, 1956, to June 5, 1957); Mr. G. R. Kamat (Mr. Patel's successor as chairman, and previously deputy chairman of the L.I.C.); Mr. Vaidyanathan (managing director of the Corporation); Mr. Bhattacharya (chairman of the State Bank); Mr. D. L. Mazumdar (secretary of the Company Law Administration in the Ministry of Finance); Mr. R. P. Shroff (president of the Bombay Stock Exchange); and Mr. Haridas Mundhra.

Mr. Justice Chagla's report, published on Feb. 13, was strongly critical of the share purchases from the point of view of sound business, and was also highly critical of the way in which they had been effected in disregard of statutory obligations. It placed the principal responsibility for the transactions on Mr. Patel, but added: "The Finance Minister [Mr. Krishnamachari] must fully and squarely accept the responsibility for what Mr. Patel . . . did; and if the transaction is improper and unjustified, although Mr. Patel may be actually responsible for the transaction, constitutionally the responsibility is that of the Minister." The report is summarized below under cross-headings.

The Facts of the Case.

After reviewing the setting-up of the Life Insurance Corporation on Sept. 1, 1956, and the principles of the Corporation's investment policy which the former Finance Minister (Mr. Deshmukh) had enunciated during the parliamentary debates, the report mentioned the relevant provisions of the Life Insurance Act of 1956 on its status and management. It described the executive machinery of the Corporation which enabled it to carry out its functions as an autonomous body, with complete independence in managing its own day-to-day administration and investing its funds in the interests of the policy-holders, subject only to "such directions in matters of policy involving the public interest as the Government might give to it in writing."

The Report mentioned that under the regulations governing the Corporation's administration, the power to invest had been conferred upon its Executive Committee but could only be exercised after taking into consideration the advice of its Investment Committee. The latter Committee functioned under the chairmanship of the chairman of the Corporation, its other members comprising three official members (including the Corporation's managing director) and three unofficial ones, including the presidents of the Calcutta and Bombay Stock Exchanges. The Investment Committee had laid down special rules of guidance for making investments, and "as long as there was no departure from the principles laid down by the Investment Committee, there was no danger that any investments might be made by the officials of the Corporation which would not be sound and prudent investments."

The report then dealt in detail with the transactions in question, starting with an offer by Mr. Mundhra to Mr. Patel made in Bombay on June 21, 1957, in which Mr. Mundhra proposed (i) that the Life Insurance Corporation should buy shares worth 8,000,000 rupees (£600,000) and further shares worth 3,000,000-4,000,000 rupees direct in the market; (ii) that the L.I.C. should give him (Mundhra) a loan of 10,000,000 rupees, against which he undertook to give the Corporation business worth the same amount; and (iii) that it should buy newly-issued preference shares in British India Corporation and Jessop and Co. to the extent of 12,500,000 rupees, against which he would offer to the Corporation fire insurance business to the extent of 1,500,000 rupees annually. In his letter Mr. Mundhra mentioned that his total liabilities to banks and brokers amounted to 52,400,000 rupees, while his free assets were 15,500,000 rupees; he pointed out that it was essential to avoid any selling pressure from the brokers to whom he was owing money, to clear their accounts, and to take delivery of the shares, so as to relieve pressure on the stock markets and upon himself personally.

Mr. Kamat had rejected any transaction except the possible purchase of shares of the various companies; after further discussions on June 23 - 24 with Mr. Patel, Mr. Kamat, and Mr. Bhattacharya, Mr. Mundhra had submitted revised proposals with regard to the sale of his own shares to the Life Insurance Corporation. In a letter to Mr. Patel dated June 24 he had accordingly offered shares in his various companies having a value at the prices mentioned of 11,949,500 rupees. Mr. Mundhra had also confirmed that he was arranging to take delivery of the shares from his brokers and to deliver them to the L.I.C.; that he would place with the Corporation general insurance business to yield a minimum premium of 1,500,000 rupees per annum; and that, in order to safeguard the L.I.C. against defective scrips, he would make himself personally responsible for any defect in the shares that might be found prior to their registration in the Corporation's name.

Various changes in the kind of shares had been demanded by Mr. Patel in these discussions, and as a result the Corporation had agreed on June 24 to buy 7,000,000 Ordinary shares of the British India Corporation, 6,000 Preference shares and 78,000 Ordinary shares of Jessop and Co., and 7,500 Preference shares of Smith Stanistreet—all at prices which Mr. Vaidyanathan obtained from the Calcutta Stock Exchange. On June 25 the Corporation, having obtained the latest-known prices for the other shares, had also agreed to purchase 19,000 Preference shares and 150,000 Ordinary shares of Richardson and Cruddas, 25,000 Ordinary shares each of Smith Stanistreet and Angelo Bros., and 6,000 4½ per cent Preference shares and 100,000 Ordinary shares of the Osler Electric Lamp Manufacturing Company—bringing the total payment to be made by the Corporation to Mr. Mundhra as a result of the transaction to 12,685,750 rupees.

In view of Mr Mundhra's inability to give delivery of 9,675 Ordinary shares of Angelo Bros. and 505 Preference shares of Jessop and Co., the Corporation had agreed on Aug. 9, 1957, to purchase instead another 8,700 Ordinary shares of Richardson and Cruddas and 5,300 Ordinary shares of Jessop and Co. The price of all the shares had been paid by the Central Bank (the L.I.C.'s bankers) to Mr. Mundhra against delivery of the share certificates.

The report then mentioned that both before and after the deal of June 24 there had been certain other transactions entered into by the L.I.C. with regard to shares of companies in the Mundhra group, viz.: (1) On March 9, 1957, the Corporation had purchased 10,000 Ordinary shares of Jessop and Co. through a firm of brokers, after consulting the Investment Committee; (2) on April 5, 1957 (also after consultation with that committee) it had bought 50,000 Ordinary shares of Jessop and Co. direct from Mr. Mundhra; (3) on April 25, 1957, a further 50,000 Ordinary shares of Jessop and Co. had been purchased direct from Mr. Mundhra; (4) on Sept. 3, 1957, 3,900 Preference shares of Richardson and Cruddas had been bought through brokers; (5) on Sept. 14, 1957, 1,000 Ordinary shares of Richardson and Cruddas had been bought, also through a firm of brokers; and (6) on Sept. 20 and 23, 1957, 10,500 Ordinary shares of Richardson and Cruddas had been bought through brokers. In none of the transactions under (3) to (6) had the Investment Committee been consulted.

Mr. Mundhra's Antecedents.

In considering the propriety of the deal concluded on June 24, and whether it was entered into in accordance with sound business principles, Mr. Justice Chagla commented about Mr. Mundhra and his activities: "We are dealing with a statutory corporation set up by the Government of India which in its business transactions must maintain certain standards. It would be clearly wrong for the Corporation to utilize its funds to help an individual or the concerns of an individual. It would be even more wrong for the Corporation to deal with an individual who was suspected to be a lawbreaker and possess a doubtful financial reputation, and whose antecedents were of a most questionable character. Mundhra is a man who has a flamboyant personality and is a financial adventurer whose only ambition is to build up an industrial empire by dubious methods. He is not very particular about the means he employs so long as the end is achieved. Starting from scratch with no education and no means, he succeeded in acquiring control of several large concerns. He is not an industrialist in the real sense of the term. His interest does not lie in developing or enlarging the industrial output of the country but . . . in being a financial wizard who can swallow up concern after concern . . . The record makes it perfectly clear that all that I have said about Mundhra, and more, was known to the Finance Ministry."

The report then referred to a letter written by Mr. Krishnamachari (then Commerce Minister) to Mr. Deshmukh (then Finance Minister) on Aug. 23, 1955, in which the former pointed out that Mr. Mundhra had been operating in "a big way" in acquiring control of British-owned concerns in India, and suggested an inquiry into possible amendments to the Companies Act to prevent similar activities by

Mr. Mundhra in future. The report also mentioned that on Feb. 17, 1956, Mr. Rama Rau (then Governor of the Reserve Bank) had drawn Mr. Patel's attention to Mundhra's activities, about which he (Mr. Rau) had been "rather disturbed." Attached to this letter was a note by Mr. Ram Nath (Deputy Governor of the Reserve Bank) explaining Mundhra's operations in detail, and saying that Mundhra did not appear to possess "either the experience or the background necessary for successfully working the large enterprises whose control has now passed into his hands." Mr. Ram Nath also quoted a remark of a judge who had characterized Mr. Mundhra's attitude as "thoroughly dishonest," and who had given a warning that "the entire edifice built up by Mundhra was liable to collapse."

Criticisms of Purchase of Mundhra Group Shares.

After dealing with further statements on the unfavourable reputation of Mr. Mundhra (including one by Mr. Nehru himself when he acted as Finance Minister), the Report pointed out that the transaction of June 24 was "the largest single transaction ever entered into by the Corporation, and also the first transaction—apart from two earlier ones—in which the Corporation had dealt direct with the owner of the shares and had not purchased the shares through brokers." In an extensive review of the transaction Mr. Justice Chagla strongly criticized it on the following grounds:

(1) "*Prima facie* the transaction entered into by the Corporation was a transaction with an individual of doubtful reputation about whom the Finance Ministry entertained most serious suspicions, and effected for the purpose of relieving him of his financial difficulties—or to put a more charitable construction on the transaction, to relieve the financial difficulties of the various concerns in which he had succeeded by dubious methods in acquiring a controlling interest . . . A large number of shares of these concerns had been purchased by Mundhra of which he could not take delivery and which were held for him by his brokers. The prices of these shares were going down, and many of the brokers were demanding additional margin from Mundhra. The brokers were themselves in difficulties because they had obtained monies from the banks on the strength of these shares in order to hold on to them . . ."

(2) Mr. Patel's contention that Mundhra's difficulties constituted a "drag on the market" was not correct, as the ordinary investing public had already "practically lost all interest in the Mundhra concerns" because of their reputation. It could also not be said "by any stretch of the imagination" that a large number of the shares purchased by the Corporation in this transaction had been good equity shares, or could be regarded by any person with any knowledge of shares as "blue chips" [i.e. first-class investments].

(3) No precaution was taken to see that the shares were obtained from the brokers. He (Mr. Justice Chagla) had been unable to understand why it was necessary, in order to raise the prices of the shares, to buy such a large quantity of them from Mundhra direct if the same purpose could have been achieved much more effectively by buying them in the open market. The report drew attention to the fact that when Mundhra had not been in a position to deliver some of the shares, it was open to the Corporation to pay him less; instead, they had bought other shares of Mundhra concerns in order to make up roughly the amount of 12,500,000 rupees. "This action," Mr. Justice Chagla commented, "reinforces what I have already said—that the object of this deal seemed to be to help Mundhra financially by paying him a definite amount as the price for the shares of his concerns purchased by the Corporation."

(4) The haste with which the transaction was effected. The report said in this connexion: "It did not seem to have occurred to any one of those concerned that there was a statutory Investment Committee which might be consulted when so large an amount was being invested in concerns of doubtful financial stability . . . An early meeting could easily have been convened within two or three days. Mr. Kamat . . . was new to the ways of the Stock Exchange. He was not familiar with all the concerns. He had not studied their balance sheets . . . The obvious thing for Mr. Kamat would have been to take a little time to consider whether the large investment he was making was a sound and prudent one . . . Even the price had to be fixed in a hurry . . . Therefore it is clear that there was some compelling reason, some motivating force, which was driving all these actors into this precipitate action."

The reason given by Mr. Patel for an immediate decision—viz., that the Finance Minister was in Bombay—was not convincing; it would have been quite sufficient if the Minister had been consulted and his general approval obtained, and the Corporation could then have made the investment after following the normal procedure. Another reason suggested by Mr. Patel—that there was a danger of a crisis and that the decision had been taken so hastily to avert it—was also rejected by Mr. Justice Chagla. According to reports submitted and testimony given by leading share-brokers in Calcutta, there had been no special crisis at the time in question, and the "so-called drag of Mundhra shares" had been going on in the Calcutta market for two years or more. Mr. Justice Chagla therefore concluded that "what required the transaction to be put through with such haste was . . . the threatening financial difficulties of Mundhra himself, [who] had made no secret of his own extremely difficult financial situation."

(5) The "amazing manner" in which the price to be paid by the Corporation for the shares had been fixed. "One should have thought," Mr. Justice Chagla commented, "that when one is entering into a transaction of this magnitude the most important term in the contract would be the price, and yet everyone concerned . . . seemed to have attached the least importance to this aspect of the matter." In none of the letters exchanged between Mundhra and Mr. Patel, and between the Corporation and Mundhra, had it been clearly stated on what basis the price was to be fixed. In negotiating the deal Mr. Patel had not been prepared to accept the price quoted by Mundhra and had only been willing to pay the prevailing market rate, but he had not been clear in his mind as to what the prevailing market rate was i.e. which date should be taken into account. Mr. Patel, Mr. Vaidyanathan, and Mr. Kamat had all given different interpretations of this during their testimony, and it was clear from their evidence that none of them had made it clear what price was to be paid before the meeting with Mundhra on June 24, nor had they taken "the elementary precaution" of putting the agreed basis down in writing.

After discussing in detail the Stock Exchange prices for the shares in question on June 21 and June 24, 1957, and comparing them with the prices actually paid by the Corporation, Mr. Justice Chagla pointed out that not only had the price been fixed on a basis which was "unwarranted by any business principle" but "in some cases even more than that basis had been paid." It had been urged that this was a "package deal." Admittedly there were such deals in which the dealer was prepared to sell certain good shares provided the buyer also bought other shares which were not so good; but in that case the buyer might agree to take all the shares provided he got a substantial concession in the price to be paid for the good shares. In the present case, however, "good, bad, and indifferent shares" had been bought without any concession being made to the Corporation with regard to the price it was paying for what might be considered reasonably good shares.

(6) The transaction was also "open to challenge" on the ground that it was "not really a transaction effected by the Corporation in the exercise of its statutory duty and discretion." "The evidence is clear beyond doubt," the report added, "that the transaction was brought about as a result of interference by the Government, and the transaction may be characterized as a dictated transaction. There can be no doubt that the leading part in bringing about this transaction was taken by Mr. Patel."

(7) The transaction had been effected without consulting the Investment Committee. Mr. Justice Chagla commented: "I find no justification whatsoever in the Corporation investing this large amount without seeking the advice of a statutory body which has been set up for the very purpose of advising the Corporation with regard to the investments it wishes to make. In making this investment the Corporation had also contravened the clear directions given by the Investment Committee . . ." In this connexion the Report referred to the rules laid down by that Committee on the selection of investments, one of which was that the L.I.C. should not invest or keep invested in the shares or debentures of any one company more than 30 per cent of that company's capital, except with the prior permission of the Central Government. Exceptions from this rule were only possible on the advice of the Investment Committee.

(8) Dealing with the question "whether the investment was sound and prudent from a business point of view," Mr. Justice Chagla quoted a memorandum submitted to him by the Bombay Shareholders Association laying down criteria for making investments in large blocks of shares of limited companies. One of these criteria was the "integrity, reputation, and credit of the controlling management," and the Corporation's investments in the Mundhra shares had certainly failed to conform to this. The president of the Bombay Stock Exchange (Mr. Shroff) had testified that, knowing what he did about Mundhra and his activities, he would have hesitated to buy any shares in which Mundhra had a controlling interest. A leading Bombay Stock Exchange broker (Mr. Govardhandas) had also testified that he "would not ask any of his investors to touch any of the Mundhra scrips with a pair of tongs."

The report then compared in detail the depreciation of the shares in the Mundhra companies with the depreciation ratios of some of the leading stocks in the market. It concluded that whatever might be said about Jessop and Co., Angelo Bros., and Smith Stanistreet, the purchase by the L.I.C. of Richardson and Cruddas, British India Corporation, and Osler Manufacturing shares "did not constitute a sound and prudent investment."

Responsibilities for the Transaction.

The principal conclusions in the remaining sections of Mr. Justice Chagla's report are summarized below:

"There can be no doubt that the leading part in bringing about this transaction was taken by Mr. Patel. Even the letters written by Mr. Mundhra offering to sell the shares and containing other offers are addressed to him, and he asked Mr. Mundhra to communicate these offers to him rather than to Mr. Kamat of the L.I.C. It is also clear on the evidence that at the meetings held with Mundhra in the Reserve Bank, his was the dominating personality. Even alterations made in the offer of Mundhra contained in the letter of June 23 are in his handwriting.

"The evidence of Mr. Vaidyanathan is clear and categoric. He says that when the Finance Secretary asked them to do something, they looked upon it as a directive from Government. He even went to the extent of saying that he looked upon Mr. Patel as Government, and Government had got the right to supersede the Investment Committee. He made no secret of the fact that the decision to buy shares was solely that of Mr. Patel, and the Corporation had nothing to do with it. We have, therefore, the spectacle of the will of the Chief Executive Officer of the Corporation completely paralysed in the presence of the Secretary to the Government—so paralysed that he completely abdicated his own duties and functions and merely carried out the direction of Mr. Patel as an order of Government.

"With regard to Mr. Kamat, it is true that the evidence discloses that he discussed various details with Mr. Patel and Mundhra. But even he, wittingly or unwittingly, was influenced by the fact that the suggestion to buy these shares was being made by a senior I.C.S. official and Secretary to Government. If he had not been so influenced, he would never have agreed to enter into this transaction without satisfying himself as to the soundness of the investment. He frankly admitted that if he had had the knowledge about Mundhra which he now has, he would never have entered into this transaction.

"There is a conflict between the testimony of the Finance Minister and Mr. Patel. Whereas, according to Mr. Patel, the question of investing in Mundhra concerns was discussed with the Minister and his general approval obtained before the transaction was put through, the Minister has not stated that he gave his approval to this transaction (of June 24)."

In this connexion the report pointed out that there had been a meeting in Bombay on June 22 between Mr. Krishnamachari, Mr. Iengar (Governor of the Reserve Bank of India), Mr. Bhattacharya (chairman of the State Bank of India), and Mr. Patel, at which a number of financial matters were discussed. According to Mr. Patel's evidence, he had brought up at this meeting the proposals he had received from Mundhra; they had been briefly discussed and it had been agreed that he (Mr. Patel) should take up with the L.I.C. the question whether they could appropriately accept any of the proposals. Mr. Patel had also testified that after it had been agreed in principle with Mundhra to buy his shares worth about 10,000,000 rupees, he had mentioned the fact to the Minister and had obtained the latter's general approval.

According to Mr. Krishnamachari, all that had happened in Bombay between himself and Mr. Patel was that the latter had said that some kind of offer had been made by Mundhra; that some of the Mundhra concerns had been mentioned; and that he (Mr. Krishnamachari) had told Mr. Patel that there were rumours about some of the concerns and that he should look into the matter. He (the Minister) had not gone very much behind the matter and had been quite clear that he had given no instructions to Mr. Patel; nor had it occurred to him that he was called upon to give any directions. According to the Minister the whole matter had appeared to him as one which was casually mentioned by Mr. Patel; he [Mr. Krishnamachari] had taken no interest in it, nor had the Government given any direction to the Corporation.

Of the two witnesses present at the meeting on June 22, Mr. Iengar's evidence had been negative. Mr. Bhattacharya had stated in evidence that Mr. Patel had mentioned to the Minister that a letter had been received by him from Mr. Mundhra in which the latter proposed the sale of certain shares of his concerns to the L.I.C. The Minister had said, "You might look into it." In regard to the second meeting, Mr. Bhattacharya had said that Mr. Patel had told the Minister that a principal was willing to sell shares and that the L.I.C. was willing to buy. The Minister had said that if the L.I.C. was buying, there was no harm in it, and had added that Mr. Patel should be careful because there were some rumours about certain scrips being spurious.

The report continued: "Mr. Patel has rightly said that the decision arrived at to buy Mundhra shares was a decision of some importance, and that it was impossible that he should proceed to finalize it on his own. He further said that he was acting in his official capacity as Finance Secretary, and if he felt that his view of the matter was not acceptable to the Minister, then obviously he would not have advised the Corporation to go into the matter. It is difficult to believe that when the Minister was in Bombay and easily available, and when Mr. Patel was 'advising' the Corporation to enter into the largest transaction it had so far entered into in its history—and that, too, with a man whose antecedents Mr. Patel knew—he would act on his own responsibility without obtaining the approval of the Minister.

"I quite understand that there are occasions when Secretaries have to act on their own responsibility . . . In day-to-day administration, in cases of emergency, the Secretary must take the responsibility and must act in a manner which according to him would ultimately meet with the approval of his Minister. But this was neither a case of day-to-day administration nor a case of emergency. The Government were going out of their way to ask the Corporation to invest a large amount, which was done without consulting the Investment Committee; and that, too, for the specific purpose of removing the drag on the Calcutta Stock Exchange created by the Mundhra shares. Why should Mr. Patel act on his own responsibility with regard to so unusual and doubtful a transaction? . . ."

Mr. Justice Chagla recalled that in a *Lok Sabha* debate on Dec. 16, 1957, Mr. Krishnamachari stated that he had asked the L.I.C. to carry out a policy of "blue chips." But he had made it equally clear that he had not imposed any other policy on the Corporation. Therefore, according to him, if the Corporation were buying these shares in pursuance of some other policy, then it would be on their own responsibility and not pursuant to any directions given by Government. Mr. Patel, however, had clearly stated in evidence that his understanding of Government policy had not been that of the Minister.

From various letters submitted during the inquiry, it was apparent that Mr. Krishnamachari must have been in possession of all the facts before Sept. 4, 1957; when he did come to know of the transaction, he had never repudiated Mr. Patel's action. The Report added: "Therefore there is clearly acquiescence on the part of the Minister in the part played by Mr. Patel . . . The lack of repudiation on the part of the Minister would go to support Mr. Patel's story that the Minister had approved in Bombay of the transaction."

Mr. Justice Chagla continued: "In my opinion . . . it is clear that constitutionally the Minister is responsible for the action taken by his Secretary with regard to this transaction. It is clear that a Minister must take the responsibility for actions done by his subordinates . . . The doctrine of ministerial responsibility has two facets. The Minister has complete autonomy within his own sphere of authority. As a necessary corollary, he must take full responsibility for the actions of his servants. It is true that this may throw a very great burden on the Minister, because it is impossible to expect that in a highly complicated system of administration . . . the Minister could possibly know, let alone give his consent to, every action taken by his subordinates. But it is assumed that once the policy is laid down by the Minister, his subordinates must reflect that policy and must loyally carry it out. If any subordinate fails to do so, he may be punished or dismissed; but, however vicariously, the responsibility of his action must be assumed by the Minister . . . The Minister must fully and squarely accept the responsibility for what Mr. Patel did . . ."

In conclusion, Mr. Justice Chagla enumerated a number of "lessons" which could be derived from the inquiry.

Resignation of Mr. Krishnamachari.

Simultaneously with the presentation of Mr. Justice Chagla's report to Parliament, it was announced on Feb. 13 that Mr. Krishnamachari had tendered his resignation as Finance Minister and that the Finance portfolio had been taken over by Mr. Nehru. The correspondence between Mr. Nehru and Mr. Krishnamachari was published at the same time.

Mr. Krishnamachari's Letter of Resignation. After recalling that he had repeatedly asked for the acceptance of his resignation since the appointment of the Chagla Commission, Mr. Krishnamachari said that "certain statements and criticisms . . . made in the course of this inquiry in regard to myself and others" had made it "increasingly difficult" for him to continue as Finance Minister. The letter continued: "In my evidence before the Chagla Commission I stated what I knew about the facts of the situation. But since my evidence was not a deposition, but answers to specific questions, it is likely that I may not have mentioned one or two facts relevant to the inquiry which I might have done if I had submitted a written deposition. Some of these aspects came out later in the evidence of others, and I had no chance at that stage to deal with them. An important factor in this connexion is that I took no direct or immediate interest in the investments or the investment policy of the L.I.C. until after the Budget of May 15, 1957. It is true that I was not satisfied with the mechanism that was directing the L.I.C. investments, and it was because of this that I had endeavoured to draft a Bill for setting up a new body for the purpose of controlling L.I.C. investments . . ."

Mr. Krishnamachari said that nothing in the nature of a policy decision or policy advice to the L.I.C. had been communicated until late in May 1957, when he had suggested that the L.I.C. might buy steel and cement shares and thereby help the sagging market. Apart from the casual mentioning to him in June of some kind of offer made by Mundhra, the only other fact brought to his notice about L.I.C. investments was a letter from Mr. Kamat of July 12 giving a summary of the Corporation's investments; that summary, however, had only covered two of the six investments which were the subject of Mr. Justice Chagla's inquiry.

Mr. Krishnamachari continued: "Our economy is under great strain and has been so almost from the time I took over as Finance Minister on Sept. 1, 1956. The strain in varying degree is likely to continue until the end of the Plan period . . . While the future is hopeful . . . we cannot avoid . . . a greater measure of economic discipline being injected into the economy and the administration . . . Since we have to seek foreign loans, the safeguards necessary to ensure that the economy is under control will have to be continued, and perhaps expansion in certain directions by the private sector or increased spending by the public sector will have to be curtailed. These measures can only be taken by a Finance Minister whose moral and political prestige is high. Such prestige is engendered by the support he receives from his chief, his colleagues, and his party, but the evaluation of this prestige is . . . in the hands of the public . . . Those who have not approved of the Government's broad policies might endeavour to use the L.I.C. inquiry in their campaign against these policies, although the inquiry has nothing to do with any basic policy. This campaign will affect public opinion in India and abroad. A Finance Minister in these critical times can function adequately only from a position of strength and not from one of weakness. For these considerations my usefulness to you as Finance Minister will be considerably less than it would have been if the unfortunate events of the last few weeks had not occurred. This is the main factor that compels me to reiterate my request to be relieved."

Mr. Nehru's Reply. In accepting Mr. Krishnamachari's resignation, the Prime Minister wrote: "In a matter of this kind we have to maintain the highest standards and conventions, and it was only right that a public inquiry should be held, whatever its results might be . . . The Government was naturally interested in all the facts being brought out and the truth established. It was no party to the dispute. But, curiously, Government policies were referred to in the course of the inquiry without the Government having any chance to explain them. As you stated in your letter, some facts were mentioned and insinuations made in the course of the evidence, as well as in the addresses of counsel, which could not be explained or otherwise dealt with at any later stage. In effect there was rather a one-sided presentation of facts . . . I am not mentioning this by

way of complaint, but merely to point out that such an approach did not appear to me satisfactory. I have still a feeling that all the relevant facts connected with this unhappy matter have not been brought out.

"It is clear, however, that a number of steps taken in regard to these investments were not taken in the proper manner or with due safeguards. Whoever might be responsible for this, you rightly say that, according to our conventions, the Minister has to assume responsibility even though he might have had little knowledge of what others did and was not directly responsible for any of these measures. This whole upset has been as painful an ordeal to me as it has been to you . . . So far as you are concerned, I am myself convinced that your part in this matter was of the smallest and that you did not know even much that was done."

After praising Mr. Krishnamachari's "devotion to his work, broad vision, and keenness of intellect," and expressing his deep gratitude for Mr. Krishnamachari's "signal service" to India's second Five-Year Plan, Mr. Nehru concluded: "Although we part now, insofar as government is concerned . . . I have no doubt that in the future there will be many ways of co-operating with each other . . ."

Parliamentary Debate on Chagla Report.

The report of Mr. Justice Chagla was debated by the *Lok Sabha* on Feb. 18-20, 1958.

Mr. Krishnamachari, in a personal statement, dealt at length with the question of his direct responsibility and his constitutional responsibility in the matter. He recalled that both Mr. Patel and Mr. Bhattacharya had testified (1) that no specific approval for the transaction had either been sought from or given by him; (2) that when the matter was mentioned to him, all he had said was that he saw no harm or had no objection if the L.I.C. wanted to buy, but had urged caution; (3) that they had not suggested that either the number of shares or the prices had ever been mentioned to him. When Mr. Patel and Mr. Bhattacharya had told him that shares of Jessops and of Richardson and Cruddas had been offered to the L.I.C., he had had no reason to believe that the normal procedures for L.I.C. investments would not be followed—e.g. purchase at market prices, consultation with the Investment Committee, and compliance with the Insurance Act. He could see no reason why these normal steps had not been taken, "particularly when I had administered a special caution."

Mr. Krishnamachari refuted the assumption that there must have been some prior understanding with Mr. Mundhra to which he (the Minister) had been privy, and that his prior concurrence or subsequent acquiescence could be inferred from the absence of any subsequent repudiation. As he had had no knowledge of the possible impropriety in regard to these transactions for months after they had taken place, he could not see how he could have repudiated the purchase of the shares. Moreover, repudiation was not a normal administrative process, and condemnation of official action could take place only after an inquiry.

Refuting the charge that he had not given the House full information on previous occasions when questions had been asked in the *Lok Sabha*, Mr. Krishnamachari pointed out that in the autumn of 1957 he had been away from Delhi for nearly two months and had not received the full facts until shortly before the parliamentary debate on Dec. 16. In this connexion he recalled that Mr. Patel—the person who had been fully aware of the details of all the transactions—had been abroad at the time and had not returned until after the debate.

In the course of his statement Mr. Krishnamachari reiterated his belief that the Commission would not have reached its conclusions about him in the way it had if a different procedure had been followed, and if he had been re-examined to clarify points on which there were differences between his own version and those of the other witnesses. Moreover, while the Corporation and Mr. Patel had been represented at the inquiry, he (the Minister) had not.

Mr. Nehru pointed out that the L.I.C. transactions had come within his knowledge only two months earlier. He continued: "This has been a painful ordeal for some of us, and these two months have made us sadder, a little older, and perhaps a little wiser. But that experience . . . has been purchased at a fairly considerable cost, for it has cost us the services of an able and distinguished Finance Minister at a time when we most needed them. Let me say at the very outset that whatever the penalties that we or others have paid or may suffer, this inquiry had demonstrated to India and to the world the democratic way in which we function. It has established the dignity and majesty of this Parliament and of the procedures we follow in maintaining high standards of public life and administration. This is an example to be remembered by all of us in India."

Mr. Nehru announced that the Government agreed with Mr. Justice Chagla that the transaction resulting in the purchase of the shares of the six Mundhra companies had not been entered into in accordance with business principles, and had also been opposed to propriety on several grounds. They also agreed with Mr. Justice Chagla that there were several factors for which they could find no explanation—e.g. how the price for the shares had been fixed, and why the Investment Committee was not consulted. Attempts would be made to elicit further information on these aspects of the transaction; and so far as the officers responsible for them were concerned, appropriate proceedings on the basis of the Commission's findings would be initiated. The Government accepted the broad principles of ministerial responsibility in this matter, although to say—as the Commission had done—that the Minister was always responsible for all the actions of officers working under him would be "taking this much too far."

After referring to the success which the L.I.C. had achieved in general under its management, and paying tribute to the high standards of the senior Civil Service, Mr. Nehru dealt with the question of employing Civil Servants in nationalized undertakings. He also spoke of the part which the Government should play in the working of autonomous corporations, and stated that the Government would continue its policies in regard to widening the public sector of the economy.

After a lengthy debate, the House adopted a motion submitted by Mr. Nehru expressing approval of his statement that (i) the Government accepted the Commission's findings that the transaction resulting in the purchase of shares of the six companies was not entered into in accordance with business principles and was also opposed to propriety on several grounds; (ii) that the Government proposed to initiate appropriate proceedings, on the basis of the findings of the Chagla Commission, in respect to the officers responsible for putting through the transaction; and (iii) that the Government proposed to examine carefully the principles recommended by the Commission for adoption by the Government and the Life Insurance Corporation.

Further Measures Resulting from Chagla Report. Proceedings against Mr. Mundhra.

The following measures were announced by the Government as a result of the findings of Mr. Justice Chagla:

(1) It was announced on March 13 that a four-man committee had been appointed to make a full and complete investigation into the management of Jessop and Co. Ltd., Calcutta, which in the Government's view was "being managed in a manner highly detrimental to the scheduled industries in which it was engaged and to public interest." Mr. S. Moolgaokar (a director of Tata Industries, Bombay) was appointed chairman of the committee.

The Ministry of Commerce and Industry announced on May 15 that after considering the committee's report, which showed an "extremely unsatisfactory" financial position of Jessop and Co. Ltd., and after examining the firm's operations, the Government had decided to place the undertaking under sound management. Acting under the Industries (Development and Regulation) Act, 1948, the Government had therefore appointed a Board of Management for a three-year period under Mr. B. P. Singh Roy, president of the Federation of Indian Chambers of Commerce and Industry.

(2) The appointment of a Board of Inquiry to consider action to be taken against the officers connected with the purchase of shares belonging to the Mundhra group by the L.I.C. was announced by Mr. Nehru on March 18. Mr. Justice Vivian Bose (of the Supreme Court) was appointed chairman of the Board, its other members being Mr. Sukumar Sen (Chief Election Commissioner) and Mr. W. R. S. Sathianathan (Chief Secretary, Madras Government). The officers whose conduct will be investigated are Mr. Patel, Mr. Kamat and Mr. Vaidyanathan.

(3) Mr. P. A. Gopalakrishnan became the new chairman of the Life Insurance Corporation in succession to Mr. Kamat on April 10. Mr. Gopalakrishnan was previously Joint Secretary to the Cabinet.

Mr. Mundhra was arrested in New Delhi on Feb. 18 on a charge of having made a fraudulent statement to the managing director of the British India Corporation. He was released on bail on Feb. 20, the bail being allowed on a personal bond of 1,000,000 rupees and two sureties of 50,000 rupees each.

Ministerial Changes.

A reshuffle of the Indian Government was announced on March 13, the new appointments being as follows:

Cabinet Ministers: (*a*) Mr. Morarji Desai, Minister of Finance *vice* Mr. Nehru; (*b*) Mr. Lal Bahadur Shastri, Minister of Commerce and Industry *vice* Mr. Desai; (*c*) Mr. S. K. Patil, Minister of Transport and Communications *vice* Mr. Shastri; and (*d*) Mr. Hafiz Mohammed Ibrahim (a new member of the Cabinet), Minister of Irrigation and Power *vice* Mr. Patil.

Ministers of State: (*a*) Dr. K. L. Shrimali, Minister of Education; (*b*) Mr. Humayun Kabir, Minister of Scientific Research and Culture; (*c*) Mr. B. Gopala Reddy, Minister of Economic Affairs.

Deputy Ministers: (*a*) Mr. S. V. Ramaswami, Railways; (*b*) Mr. Ahmed Mohiuddin, Civil Aviation; (*c*) Mrs. Tarakeshwari Sinha, Economic Affairs; (*d*) Mr. P. S. Naskar, Rehabilitation.

No new Cabinet appointment was made for the Ministry of Education and Scientific Research previously headed by Dr. Abul Kalam Azad, who died on Feb. 22 (see below). The post of Minister of State for Economic Affairs was a new portfolio.

It was further announced on May 12 (*a*) that Mr. Asoka Kumar Sen (the Minister of Law), who had previously held the rank of Minister of State, had been appointed a Cabinet Minister; (*b*) that Mr. B. Gopala Reddy would henceforth be

known as Minister of Revenue; and (c) that Mrs. Sinha would be designated Deputy Minister of Finance.

With a number of changes in the titles and functions of Ministers of State and Deputy Ministers previously announced, and the appointments of March 13 and May 12, the membership of the Indian Government became as follows:

Cabinet Ministers.

Mr. Jawaharlal Nehru ..	Prime Minister, External Affairs and Atomic Energy.
Pandit Govind Ballabh Pant	Home Affairs.
Mr. Morarji Desai	Finance.
Mr. Jagjivan Ram	Railways.
Mr. Gulzarilal Nanda	Labour, Employment and Planning.
Mr. Lal Bahadur Shastri ..	Commerce and Industry.
Sardar Swaran Singh ..	Steel, Mines, and Fuel.
Mr. K. C. Reddy	Works, Housing, and Supply.
Mr. Ajit Prasad Jain ..	Food and Agriculture.
Mr. V. K. Krishna Menon ..	Defence.
Mr. S. K. Patil	Transport and Communications.
Mr. Hafiz Mohammed Ibrahim	Irrigation and Power.
Mr. Asoka Kumar Sen ..	Law.

Ministers of State.

Mr. S. N. Sinha	Parliamentary Affairs.
Dr. B. V. Keskar	Information and Broadcasting.
Mr. D. P. Karmarkar ..	Health.
Mr. S. K. Dey	Community Development.
Mr. M. C. Khanna	Rehabilitation.
Dr. P. S. Deshmukh	Food and Agriculture.
Mr. K. D. Malaviya	Mines and Oil.
Mr. Nityanand Kanungo ..	Commerce.
Mr. M. M. Shah	Industry.
Mr. Raj Bahadur	Transport and Communications.
Mr. B. N. Datar	Home Affairs.
Dr. K. L. Shrimali	Education.
Mr. Humayun Kabir ..	Scientific Research and Culture.
Mr. B. Gopala Reddy ..	Revenue and Civil Expenditure.

Deputy Ministers.

Sardar Surgit Singh Majithia, Mr. Kotta Raghuramaiah ..	Defence.
Mr. Abid Ali	Labour.
Mr. Anil Kumar Chanda ..	Works, Housing, and Supply.
Mrs. Lakshmi Menon	External Affairs.
Mr. A. Mathai Thomas .., Mr. M. V. Krishnappa ..	Food and Agriculture.
Mr. J. L. Hathi	Irrigation and Power.
Mr. Satish Chandra	Commerce and Industry.
Mr. S. N. Mishra	Planning.
Mr. B. R. Bhagat .. .., Mrs. Tarakeshwari Sinha ..	Finance.
Dr. Mono Mohan Das ..	Education and Scientific Research.
Mr. Shah Nawaz Khan .., Mr. S. V. Ramaswami ..	Railways.
Mrs. Violet Alva	Home Affairs.
Mr. R. M. Hajarnavis ..	Law.
Mr. Ahmed Mohiuddin ..	Civil Aviation.
Mr. P. S. Naskar	Rehabilitation.

Mr. Hafiz Mohammed Ibrahim, the new Minister of Irrigation and Power, was previously Finance Minister of Uttar Pradesh, whilst Mr. B. Gopala Reddy, the new Minister of Revenue and Civil Expenditure, was Minister of Finance in Andhra Pradesh. Mr. Ibrahim had been nominated a member of the Congress Working Committee on March 11. Mr. Ramaswami, Mr. Mohiuddin, Mr. Naskar and Mrs. Sinha entered the Government for the first time.

Death of Dr. Abul Kalam Azad.

Dr. Abul Kalam Azad, the Minister of Education and one of India's leading statesmen, died on Feb. 22, 1958, as stated above. He was 69 years of age.

Maulana Kalam Azad was a member of a distinguished Moslem family of *sufis* (mystics) and divines, and a descendant of Sheikh Jamaluddin, who rose to prominence in the reign of the Mogul Emperor Akbar. He was born in Mecca in 1888, his father having migrated from India to Arabia after the Indian Mutiny. After studying Arabic, Persian and other Islamic literature at Al-Azhar University in Cairo he travelled widely in the Middle East and Europe, subsequently settling in Calcutta. A modernist in outlook, and an Islamic scholar of wide repute, he founded in 1912 the Urdu weekly *Al-Hilal*, which exerted an important influence on Moslem opinion both inside and outside India.

An opponent of communalism, Dr. Azad took an active part in Gandhi's first non-co-operation campaign during the First World War, and also campaigned actively in support of Turkey, as a result of these activities *Al-Hilal* was banned by the authorities and Dr. Azad served several terms of imprisonment. He was elected president of the Indian National Congress in 1923, took a leading part in non-co-operation movements during the 'twenties, and was imprisoned for two years. Re-elected to the Congress presidency in 1930, he was prominent in the civil disobedience campaigns of 1930-32 and served further prison terms for these activities. In 1940 he was elected president of Congress for the third time and continued to hold that post until 1946, despite the fact that he was imprisoned for three years (1942-45) in connexion with the "Quit India" movement, in which he played an active role.

Dr. Azad was one of the principal spokesmen of the Congress Party during the negotiations with the Cripps Mission in 1942, and again with the British Cabinet Mission in 1946. In 1947 he joined the Interim Government as Minister of Education, a post he held in the Government of India until his death; the portfolios of Natural Resources and Scientific Research were added in 1952. He had been Deputy Leader of the Congress Party in the *Lok Sabha* since 1951, and represented the Punjab constituency of Gurgaon. A distinguished scholar, he was the author of many theological and cultural works and of a well-known commentary on the Koran.

An Azad Memorial Fund was set up by the Congress Party on Feb. 28 as a national memorial to the late Dr. Kalam Azad. It will take the form of scholarships to enable Indian students to study in Western Asian countries and Egypt, and *vice versa*, and of the endowment of Chairs at Indian universities to promote cultural relations between India and the countries concerned. It was also decided to publish the collected works and speeches of Dr. Kalam Azad in about 15 volumes.

Pandit Pant (the Home Minister) was elected Deputy Leader of the Congress Parliamentary Party in succession to the late Dr. Azad on May 1.

Withdrawal of Mr. Nehru's Resignation Offer.

Mr. Nehru told a meeting of the Congress Parliamentary Party on April 29 that he had requested President Prasad to release him temporarily from the Premiership so that he might be able for a period to "free myself from this daily routine" and to "think of myself as an individual citizen of India and not as Prime Minister."

Recalling that he had let it be known some weeks earlier that he was feeling "rather tired and stale" and would like a change after 10½ years of heavy work as Prime Minister, Mr. Nehru said that physically he remained "fit and active" and believed that he still had "some years of efficient service before him." The work of Prime Minister, however, allowed of no respite and afforded "little time for quiet thinking." Mr. Nehru added that he was "greatly concerned at the international situation" and that in addition there were internal Indian problems which required "constant attention and fresh thinking" if they were not to "get into ruts of thought and action."

Making it clear that he was not thinking of permanent retirement, Mr. Nehru said: "I am anxious to fit myself for the great tasks ahead, and I feel that it might help me to do so if I am away from the centre of activity and responsibility." The time had come when he should place "this rather personal matter before the party and seek its guidance"; although he had already approached the President, "the final decision must rest with the party."

Mr. Nehru's statement aroused deep concern among Congress members. At an extraordinary meeting of the Parliamentary party on May 1, wide support was expressed for a resolution which (i) declared that the Congress Party "cannot contemplate acceptance of any suggestion which would mean the severance, even though for a temporary period," of the ties binding Mr. Nehru to the party and the Government; (ii) expressed awareness of the great strain borne by Mr. Nehru; but (iii) refused to accept "any period devoid of his leadership."

Mr. S. N. Sinha, the parliamentary Chief Whip, told Mr. Nehru: "You are condemned to hard labour for the rest of your life; there will be no respite for you." After recording the party's "grief and desolation" at Mr. Nehru's suggestion, he urged him to take a few months' holiday and on his return to appoint a Minister without portfolio to relieve him of the burdens of routine administration.

Requesting that the resolution should not be passed, Mr. Nehru declared that he had made his proposal only after "months of thought" and that the resolution, if adopted, would suggest that he had acted casually, whereas he would do nothing which was in his opinion harmful to the country. He wanted no holiday but a period of contemplation "for my soul's good," during which he could ponder "what was wrong with the Congress Party and with public life generally."

On May 3, however, Mr. Nehru announced at another party meeting that he had withdrawn his decision to retire temporarily from office.

Mr. Nehru said that many colleagues and party members had spoken and written to him since he had announced his earlier decision; all this had "brought up before me, more forcibly than I had pictured in my mind before, the possible consequences of the

action I proposed to take." The desire to retire and "take stock" had come to him "with peculiar force in the shock of the circumstances created by Maulana Azad's death," but he was "deeply moved by what has been said today and by what was said two days ago."

It was announced on May 9 that Mr. Nehru would take a brief holiday from May 20 in the Kulu Valley (Punjab), a well-known Himalayan mountain resort. He would return to Delhi on May 31 and would then make a trek to the Lahaul Valley (in the high Himalayas) from June 5 - 23.
(Hindustan Times, Delhi - The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London)
(Prev. rep. Cabinet, 15533 A; L.I.C., 14943 D.)

A. LONDON. — St. Paul's Cathedral. - Consecration of New High Altar.

The new High Altar of St. Paul's Cathedral was consecrated on May 7, in the presence of H.M. the Queen and the Duke of Edinburgh, as a memorial from the people of Britain in memory of the 335,451 men and women of the Commonwealth overseas who gave their lives in the two World Wars. The dedication service marked the restoration of the East end of the Cathedral after 17 years' work by architects and craftsmen, following the heavy damage sustained in the air attacks of the Second World War.

The congregation of 3,000 included the Prime Minister, members of the Government, the High Commissioners of the Commonwealth countries, and many members of the Diplomatic Corps. It also included many former members of St. Paul's Watch, which did outstanding work during the air raids when the Cathedral was hit by high-explosive bombs and showered with incendiaries.

The new High Altar replaces the former altar which was virtually destroyed by enemy action. Designed as an integral part of the reconstructed East end, it is of white marble enriched with gold Sienna marble and covered by a canopy of gilded oak, surmounted by a figure of the Risen Lord; the canopy is supported by eight 20-ft. Corinthian columns. The Goldsmiths' Company have agreed to bear the whole of the cost (£8,800) of the ornaments for the new High Altar, including the candlesticks and the Cross.

The total cost of the restoration of St. Paul's Cathedral is estimated at about £1,000,000, including the rebuilding of the East end, the new High Altar and canopy, the building of the American Memorial Chapel (see below), completion of work on the north transept (to be finished in 1959), the restoration of the Chapter House, and the rebuilding of the choir school, still to be undertaken. Grants from the War Damage Commission have amounted to about £400,000, the balance of £600,000 having already been raised from subscriptions—including £400,000 from a campaign launched in October 1954, £20,000 for the Commonwealth Memorial Fund (in response to an appeal organized by Sir Jocelyn Lucas, M.P.), and between £80,000 and £90,000 for the American Memorial Fund.

The *London Gazette* announced on June 18, 1957 that the Queen had approved that St. Paul's Cathedral should become the Church of the Order of the British Empire—the only important Order of British chivalry hitherto without a spiritual home. A permanent chapel for the Order will be built in the crypt, near the ancient altar of St. Faith; the designer is Lord Mottistone, surveyor of the fabric of St. Paul's.

An American Memorial Chapel will be dedicated in St. Paul's Cathedral in November 1958. (Times - Church Times)

B. UNITED KINGDOM. — Metric System Inquiry.

It was announced on May 28 that a study group under the chairmanship of Sir Hugh Beaver had been set up by the British Association for the Advancement of Science to report on "the practicability, implications, consequences both international and domestic, and cost of a change-over to the metric system or the decimalization of weights, measures, and coinage by the United Kingdom."

The other members of the Beaver Committee will be Dr. A. H. Hughes (deputy chairman and assistant managing director, Arthur Guinness Son and Co.), Dr. R. Beeching (director of Imperial Chemical Industries), Mr. M. G. Bennett (general treasurer, British Association), Professor C. F. Carter (Professor of Applied Economics, Queen's University, Belfast), Mr. Hugh Conway (joint managing director, Short Brothers and Harland, Ltd.), Mr. A. C. Hartley (consulting engineer), Lord Simon of Wythenshawe, Mr. F. S. Walker (chairman of Lever Brothers, Port Sunlight, Ltd.), and Mr. C. P. Jones (Rolls-Royce Ltd.).

It was stated that the committee had been asked to obtain the necessary information "by taking evidence, visiting firms and organizations, or any other means"; that interim reports on the progress of its investigations would be submitted at quarterly intervals to the Council of the Association; and that a full report was expected in about 18 months' time.—(Times)

C. UNITED KINGDOM. — New College to be built at Cambridge University (Churchill College).

It was announced on May 15 that a new college would be built at Cambridge University, called Churchill College, as a permanent memorial to Sir Winston Churchill's services to Britain and the world. In view of Sir Winston's deep interest in the advancement of technological education, and his support for science during the Second World War, the college would have a strong bias towards scientific and technological studies and 70 per cent of its members would study these subjects. A minimum initial size of 200-250 members and 30-40 Fellows was envisaged, with provision for an expansion to 500-600 members and 50-60 Fellows if funds permitted. A feature of Churchill College would be a ratio of 1: 2 of post-graduate to undergraduate members (considerably higher than that of any existing college) and the provision of a number of visiting Fellowships.

Churchill College will be built on a 40-acre site west of the Cam at a cost of about £3,500,000, an appeal for this sum being launched simultaneously with the announcement. Sir Winston himself gave £25,000 from his 80th Birthday Trust (see 13905 A), from which large sums have already been disbursed to a variety of foundations, while the Gulbenkian Foundation in Lisbon (see 15031 A) gave £50,000 as a "tribute to the greatest living Englishman."

The trustees of the project, in addition to Sir Winston Churchill, are Marshal of the R.A.F. Lord Tedder (Chancellor of Cambridge University), Lord Adrian (Vice-Chancellor, and Master of Trinity College), Lord Chandos (chairman of Associated Electrical Industries), Lord Godber (chairman of Shell Transport and Trading Co. Ltd.), Lieutenant-General Lord Weeks (former chairman of Vickers), Sir John Cockcroft (head of the Atomic Energy Authority), Sir Alexander Fleck (chairman of Imperial Chemical Industries), Sir Alexander Todd (Professor of Organic Chemistry at Cambridge, and Scientific Adviser to the Lord President of the Council), Mr. Noel Annan (Provost of King's College), Professor Brian Downs (Master of Christ's College), and Mr. W. J. Carron (president of the Amalgamated Engineering Union).

It was announced on May 31 that firm promises of contributions totalling over £1,400,000, mainly in the form of covenants, had already been received from companies and business enterprises towards the building of Churchill College.
(Times - Daily Telegraph - Manchester Guardian)

D. PAKISTAN. — Assassination of Dr. Khan Sahib.

Dr. Khan Sahib, the leader of the Republican Party and former Chief Minister of West Pakistan, was stabbed to death on May 9 at his son's residence in Lahore. The assailant, Ata Mohammed, was a minor official in the Revenue Department in Bahawalpur but had been dismissed two years ago. He had approached Dr. Khan Sahib a few days before the attack and had sought his help to obtain re-employment, but Dr. Khan Sahib had told him that he was not in a position to help him.

It was announced in Lahore on May 10 that Allama Mashriqi (the *Khaksar* leader), his younger son, and four of his followers had been arrested for interrogation in connexion with Dr. Khan Sahib's assassination.

Dr. Khan Sahib (76), the elder brother of Khan Abdul Ghaffar Khan (the former leader of the Congress "Red Shirt" organization), was born in a North-West Frontier Province village near Peshawar. He studied medicine at St. Thomas's Hospital, London, joined the Indian Medical Service, and entered politics in 1930, becoming a close friend and associate of Mahatma Gandhi and working with the Indian National Congress in the struggle for Indian independence. In 1937 he became Chief Minister of the Congress Government in the North-West Frontier Province. Like the other Congress Ministers in British Indian provinces, he resigned in 1940 and was later placed under detention. In 1945 he resumed his post as Chief Minister, but following the accession of the Frontier Province to Pakistan in 1947 he was dismissed and detained by the Pakistani authorities until 1953. In October 1954 he entered the Pakistan Government of Mr. Mohammed Ali as Minister of Communications, and on the formation of the Province of West Pakistan in October 1955 became its first Chief Minister, remaining in office until March 1957. In April 1955 he became the founder and leader of the Republican Party.

Personal tributes to Dr. Khan Sahib were paid by the Prime Ministers of both Pakistan and India, respectively Mr. Firoz Khan Noon and Mr. Nehru.—(Pakistan High Commissioner's Office, London - The Statesman, Calcutta - Times)
(Prev. rep. 15677 A.)

E. COSTA RICA. — Membership of I.C.A.O.

Costa Rica became the 73rd member of the International Civil Aviation Organization on May 31.—(I.C.A.O., Montreal)
(Prev. rep. 15980 G.)

A. UNITED STATES. — Economic Recession. - Increase in Unemployment. - Anti-Recession Measures. - Extension of Unemployment Benefits.

A recession in the American economy, the first signs of which appeared in the autumn of 1957, led to a steep rise in unemployment during the first few months of 1958, as shown by the following mid-monthly figures :

December 1957	3,374,000
January 1958	4,494,000
February	5,173,000
March	5,198,000
April	5,120,000

The December figure of 3,374,000 unemployed, representing 5.2 per cent of the total labour force, was the highest end-year total since December 1949 ; contrary to the normal seasonal pattern, unemployment rose by 186,000 between mid-November and mid-December. As shown in the table, unemployment figures rose by 1,120,000 in January, by another 600,000 in February, and fractionally in March—the figure of 5,198,000 unemployed in the latter month being the highest recorded in the United States since the middle of 1941, and representing 7.5 per cent of the total labour force. In April, for the first time since November last, the figures showed a slight downward trend.

Unemployment was particularly high in Michigan, and especially in Detroit, as the result of a severe recession in the automobile industry. In Michigan as a whole there were 415,000 unemployed in March (14.3 per cent) and 450,000 in April ; the figures for Detroit were 230,000 in March and 265,000 in April—the latter figure representing 17.4 per cent of the city's labour force, or one worker in six. Owing to poor sales, several of the largest assembly plants in Michigan closed down for a week at the beginning of April, including the General Motors plants at Flint and Pontiac and Chrysler and Ford plants in the Detroit area. By the beginning of May the situation showed a slight improvement, the unemployment figure for Michigan being 350,000 and for Detroit 205,000 ; these figures were nevertheless 236 per cent higher than the comparable 1957 figure for Michigan and 327 per cent higher in the case of Detroit. Elsewhere, there were 242,000 unemployed in New York at the beginning of May (58 per cent higher than the corresponding period of 1957), 120,000 in Chicago, and 137,500 in Los Angeles.

The extent of the recession was reflected in the fact that the U.S. index of industrial production fell for seven successive months between August 1957 and April 1958.

From the peak figure of 147 in December 1956 (the Federal Reserve Board takes average output in the 1947-49 period as 100) the index remained fairly constant for the first eight months of 1957, standing at 145 in August. Thereafter it fell month by month until it stood at 133 in January 1958, 130 in February, and 128 in March—the lowest figure since the recession of 1954, and 12 points lower than the corresponding figure for March 1957. The main decline was in the "durable goods industries," notably in automobile production and household appliances.

Anti-Recession Measures. - Statements by President Eisenhower. - Congressional Legislation.

In a statement issued on Feb. 12, President Eisenhower expressed confidence that the United States was not "facing a prolonged down-swing in activity." He also expressed his conviction that from March onwards there would be a "pick-up in job opportunities" which should "mark the beginning of the end of the down-run in our economy, provided we apply ourselves with confidence to the job ahead."

At the same time the President released a "fact paper setting forth programmes and policies bearing on the current economic situation" in order to "dispel false impressions and make clear the activities of the Administration in these fields." The "fact paper" outlined governmental action taken in recent months to ease credit, to stimulate house-building and road construction, and to place defence procurement contracts with private industry etc., giving detailed figures of expenditure in these and other fields. The President also stated that he had directed the Postmaster General to present to Congress a $2,000,000,000 programme for modernizing post office buildings and equipment throughout the country during the next three to five years.

On March 8 President Eisenhower sent a letter to the Republican leaders in the Senate and House of Representatives (respectively Senator William F. Knowland and Representative Joseph W. Martin) urging the prompt enactment of "a number of Administration recommendations for new legislation which could be of great help in stimulating the economy and which are already pending before Congress."

Among these measures the President mentioned (*a*) the provision of additional funds for the Federal Housing Authority ; (*b*) adjustment of "those statutory interest rates which stifle private investment" ; (*c*) special assistance to areas of high and persistent unemployment ; (*d*) tax relief for small businesses ; (*e*) removal of the statutory limit on the life of the Small Business Administration, and provision of new authority for loans to small businesses ; (*f*) a $2,000,000,000 increase in the lending authority of the Export-Import Bank ; and (*g*) the $2,000,000,000 Post Office modernization plan referred to above.

The President also mentioned the following "additional actions" he had authorized since his statement of Feb. 12 with the aim of providing additional employment :

(1) Acceleration of projects for improving roads, national parks, etc., many of which were already in the planning and engineering stages ; this action would "result in the expenditure of nearly $200,000,000 several months earlier than previously planned."

(2) Increased appropriations of $186,000,000 for water resource and flood prevention projects.

(3) The release of an additional $200,000,000 to the Housing and Home Finance Agency "to stimulate construction of homes for citizens of modest means."

(4) The award of more defence procurement contracts to "labour surplus areas," with first priority to small business concerns in such areas.

The President added that "other programmes and measures are under study and, as circumstances may require, will be administratively set in motion or proposed to Congress."

The following anti-recession legislation was approved by Congress in April and May :

(1) A Bill authorizing additional Federal expenditure of $1,800,000,000 for the 41,000-mile network of inter-State roads [see 15093 C]. Together with previous Federal appropriations and State funds, expenditure on road construction will exceed $5,500,000,000 in each of the fiscal years 1959, 1960 and 1961 (i.e. 1958-59, 1959-60, and 1960-61). It was estimated that over 500,000 jobs would be created under this programme.

The Bill was signed by President Eisenhower on April 16, after unanimous approval by both Houses of Congress on April 3.

(2) A $1,850,000,000 emergency Housing Bill designed to stimulate the construction of 200,000 new housing units and to provide jobs for 500,000 persons during 1958. Signed by the President on April 1 after unanimous approval by both Houses of Congress (Senate, March 12 ; House of Representatives, March 19).

(3) A Bill making $375,000,000 of Federal funds available for urban and rural areas of high unemployment ; it authorized loans for industrial and rural development, including facilities to attract new industries to the areas concerned. Passed by the Senate on May 13 ; early action by the House was expected.

Extension of Unemployment Benefits.

President Eisenhower sent a message to Congress on March 25 requesting the enactment of legislation "to provide for the temporary continuation of unemployment compensation benefits to otherwise eligible individuals who have exhausted their benefits under State and Federal laws." The President stated (1) that such legislation should "not encroach upon the prerogatives which belong to the States" in matters relating to eligibility, disqualification, and the amount of benefits paid ; and (2) that it should, however, "provide for the payment, to individuals who have exhausted their regular unemployment compensation benefits, of temporary benefits for an additional period equal to one-half of the duration of their regular benefits."

Some 43,000,000 workers are covered by unemployment compensation benefits, which are separately administered by the States. In most of the States unemployed workers receive benefits for 26 weeks ; in ten States for only 20 weeks ; and in two for eight months. Under the President's proposals, workers who had used up their benefits in States paying for 26 weeks could collect benefits for an additional 13 weeks, if they remained out of work so long ; similarly, unemployed persons in States paying benefits for 20 weeks could collect benefits for another ten weeks. The White House estimated that some 3,000,000 unemployed workers had exhausted their benefits under the various State schemes.

An Administration Bill embodying the President's proposals was passed by the House of Representatives on May 1 by 370 votes to 17, with a few minor modifications. Senate approval was expected at an early date.

Increase in Employment Figures.

Despite the increase in unemployment, the total number of people employed in the United States continued to rise steadily from 61,988,000 in February to nearly 63,000,000 in April, a further rise being anticipated in May. The greater part of this increase was in agriculture (5,600,000 workers employed in April) and construction (2,700,000 employed) ; the only other categories to show an increase were in Government services (7,600,000 employed in April), finance, insurance and real estate (2,400,000), and miscellaneous services (6,700,000). Employment in mining declined from 862,000 in August 1957 to 766,000 in April, and in transport and other public services from 4,200,000 to 3,900,000. As stated above, however, the durable goods industries—and particularly automobile manufacturing and factory equipment—were by far the most important categories to show a decline in employment.—(New York Times - New York Herald Tribune)

(Prev. rep. 16034 A ; 15032 C.)

A. UNITED KINGDOM. — Steel Industry. - Production Figures. - Cuts in Steel Prices. - Proposed Campaign against Renationalization Threat.

Steel production in the first quarter of 1958 was slightly below production in the corresponding period of 1957, output having been adversely affected in the Midland and Scottish areas by a reduction in the demand for steel tubes and bars, and in South Wales by temporary causes as well as by the withdrawal of older steelworks capacity. The weekly average for March 1958, however, was 1,300 tons higher than the weekly average for March 1957, and the Iron and Steel Board stated on March 12 that steelmaking capacity in 1958 was expected to increase to about 23,200,000 tons, or 1,500,000 tons above the 1957 record of 21,700,000 tons. Detailed figures are given below :

	1958		1957	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings				
January	407,100	21,171,000	415,900	21,627,000
February	427,500	22,228,000	432,100	22,470,000
March	432,300	22,480,000	431,000	22,411,000
First Quarter .	421,100	21,899,000	425,500	22,128,000
Pig-Iron				
January	271,000	14,090,000	256,900	13,361,000
February	272,700	14,182,000	267,600	13,916,000
March	267,600	13,915,000	277,200	14,415,000
First Quarter ..	270,500	14,064,000	266,500	13,856,000

Imports of scrap and pig iron in the first quarter of 1958 totalled 98,000 tons, compared with 422,000 tons in the corresponding quarter of 1957. The Iron and Steel Board forecast that the import rate was likely to decline further as current contracts were worked off.

Recent developments in connexion with the steel industry are summarized below :

Steel Price Cuts. The first cuts in steel prices since 1939 took effect from March 31, when prices of most steel products for the home market were reduced by from 10s. to 30s. a ton (i.e. by one to three per cent). Announcing the reductions on March 27, the Iron and Steel Board explained that they had been made possible by the lower costs of imported materials, which had more than offset increases in domestic costs.

[It was estimated in the Press that the cuts might result in annual savings of £1,500,000 to the automobile industry, £600,000 to the constructional industry, £400,000 to the shipbuilding industry, and £350,000 each to the National Coal Board and British Railways.]

New Steel Plant for South Wales. Richard Thomas & Baldwins Ltd. announced on March 19 that they would shortly begin the installation of a new press and fabricating works at Gorseinon, near Swansea, one of the areas worst hit by the closure of old-type steel and tinplate works. The new plant (to employ 450-500 workers) was expected to be working fully in about 12 months.

Unemployment amongst Welsh Steelworkers. The Government announced on Feb. 3 that it would appoint an emergency team of four to examine measures to assist steelworkers made redundant by the closing of older steel and tinplate works in South-West Wales, where in many towns unemployment was six times above the average. The team would comprise representatives of the Ministry of Welsh Affairs, the Ministry of Labour, the Board of Trade, and the Iron and Steel Board. While primarily considering measures which could be taken by the steel industry itself, it would also review long-term plans.

The announcement followed discussions between a deputation of Welsh Labour M.P.s led by Mr. James Griffiths, and the Minister and Minister of State for Welsh Affairs (respectively Mr. Henry Brooke and Lord Brecon), the Minister of Power (Lord Mills), the Parliamentary Secretary to the Ministry of Labour (Mr. Robert Carr), and Sir Robert Shone and Sir Lincoln Evans, both of the Iron and Steel Board.

Denationalization of Steel Industry. The fourth annual report of the Iron and Steel Realization Agency, covering the year ended Sept. 30, 1957, was published on Feb. 22. It showed that the Agency had disposed during the year of its controlling interest in a further 10 steel companies (including the Steel Company of Wales) but still held control of 16 others, the largest being Richard Thomas and Baldwins and the Staveley Iron and Chemical Company. In the four years since the Agency was set up in 1953 it had reduced the book value of its securities from £252,000,000 to £44,000,000. The report added that, measured in terms of employment, steel production, and sales of products, five-sixths of the industry had been returned to private hands.

New Chairman of Iron and Steel Holding and Realization Agency. It was announced on May 31 that the Chancellor of the Exchequer had appointed Sir Herbert Brittain as chairman of the Iron and Steel Holding and Realization Agency in succession to the late Sir John Morison, at a salary of £2,000 a year. The post will be part-time and the appointment will be for a period of one year in the first instance.

The Labour Party's declared intention of renationalizing the steel industry if it came to power led many steel companies during January and February to consider what steps they should take to put the case for private ownership before the public.

Shareholders of Stewarts and Lloyds Ltd., the steel tube manufacturers, authorized the company's directors on Jan. 28 to "sound an alarm before it is too late" and wage an active campaign against renationalization. Mr. A. G. Stewart, the company's chairman, explained that the company would present its case "in whatever manner seems from time to time to be most effective," but would confine its campaign to the single issue of renationalization and avoid attacking the Labour Party as such. Shareholders of Dorman Long and Co. passed a resolution on Jan. 29 declaring that renationalization would "seriously prejudice the competitive power of the iron and steel industry in home and export markets," and instructing the company's directors to take "all practical steps to oppose it." The South Durham Iron and Steel Co. also announced on Jan. 29 that it had decided to join in the campaign against renationalization. Mr. Harold Peake, chairman of the Steel Company of Wales, declared on the same day, however, that he was "against indulging openly in politics" or "coming out at the present stage in a very bellicose way"; he appealed instead to Labour Party leaders to "come to a decision on what they would do with the steel industry if they got into office." Sir Walter Benton Jones, chairman of the United Steel Companies group, announced that the group would support the proposed anti-nationalization campaign, and on Feb. 5 Mr. R. F. Summers, chairman of John Summers and Sons Ltd., stated that his company was also considering "steps to convince the people that the industry's views on this vital subject are the right ones."

Mr. Alfred Robens, M.P. (a member of the Labour "Shadow Cabinet" and a former Minister of Labour) declared at Glasgow on Feb. 9 that "the first function of a Labour Government in the field of public ownership will be to renationalize the iron and steel industry," as public ownership of the industry was "vital to the economic planning of this nation's affairs." (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 15986 E.)

B. KOREA. — South Korean Elections.

The Liberal Party headed by President Syngman Rhee was returned to power in the South Korean general elections on May 2, though with a greatly reduced majority. Final returns for the new House of Assembly (233 seats) were as follows : Liberals 125, Democrats 79, Independents 28, Unification Party 1. The former House of Assembly had 203 seats, an additional 30 seats having been created owing to the increase in South Korea's population. Party strengths at the dissolution were : Liberals 131, Democrats 46, Independents and minor parties 26.

The opposition Democratic Party, led by Dr. John M. Chang (the Vice-President of the Republic), made important gains in the towns and particularly in Seoul, where it won 14 of the 16 seats ; all seven incumbent Liberal members for Seoul were defeated, the remaining two seats in the capital being won by Independent candidates. The Liberal Party maintained its position in the countryside generally ; as shown, its overall majority in the new House is 17, whereas it had a majority of 61 in the former House.

The elections were essentially a straight fight between the two major parties, nearly all other candidates being Independents. Both the Liberals and the Democrats are conservative in outlook and do not differ substantially in politics ; the main issues between them are, firstly, in their attitude to the 83-year-old President Syngman Rhee, and secondly, on the question of how Korea should be unified. Whereas the Liberals maintain that Dr. Rhee's personal prestige and authority make his continuation in the Presidency essential, and constitute a bulwark against Communism, the Democrats claim that the South Korean people desire a change from "personal leadership." On the unification question, the Democrats stand for nation-wide elections under U.N. auspices, whereas the Liberals propose elections only in North Korea to fill seats reserved in the Southern Assembly on a population basis.

The Liberals seek to revise the present constitutional arrangement whereby the Vice-President (i.e. Dr. John Chang) would have the right to assume the Presidency in the event of the death or incapacity of Dr. Syngman Rhee. For such a constitutional amendment, however, a two-thirds majority of the House of Assembly is necessary, and the Liberals failed to obtain such a majority in the general elections.

Unlike the turbulent elections of 1954, those of May 2 passed off quietly and with practically no incidents. About 80 per cent of the voters went to the polls out of a registered electorate of over 10,000,000.—(Times - New York Times)

(Prev. rep. Korean Presidential Election, 14930 A ; General Election, 13829 A.)

A. GREECE. — General Election. - Overall Majority for National Radical Union. - Left-wing Gains. - New Cabinet formed by M. Karamanlis.

The Greek Parliament was dissolved by King Paul on April 2, and general elections proclaimed for May 11, after it had passed the electoral Bill previously submitted by M. Karamanlis before his resignation from the Premiership (see 16054 A). The Bill was adopted by the necessary two-thirds majority on March 29, being supported by the National Radical Union and the Liberals and opposed by the Populists, the left-wing Union of the Democratic Left, and minor groups ; the latter included most of the 15 former N.R.U. deputies whose opposition to the legislation had led to the resignation of M. Karamanlis.

Since the end of the Second World War general elections in Greece have been held under a wide variety of electoral systems, ranging from "straight" proportional representation to the simple majority system. The elections of 1946 and 1950 were held by "straight" proportional representation ; those of 1951 by a system of "reinforced" P.R. whereby only parties polling a certain percentage of the total number of votes were eligible to participate in second and third allocations of seats ; the 1952 elections by the simple majority system ; and the 1953 elections by a complicated system combining both majority voting and proportional representation (see 14732 A).

The new electoral law laid down that the 1958 elections would be fought under a system of "reinforced" proportional representation whereby only parties polling 25 per cent of the total number of votes would be entitled to share in the second allocation of seats. In the case of coalitions of two parties the required percentage would be 35 per cent, while coalitions of three or more parties would require 40 per cent of the total votes to be eligible for second allocations. If only one party or coalition polled the required percentage, the party coming second would also be entitled to share in the second allocation of seats ; coalitions, however, would be barred if they failed to reach the required percentage, unless the percentage of the party coming second was lower than the average percentage of each of the parties included in that coalition (found by dividing the total number of votes polled by the coalition by the number of collaborating parties).

The number of seats remained at 300, divided into 55 constituencies returning varying numbers of deputies. The largest constituency was the City of Athens (excluding suburbs), with 16 seats, followed by Salonika, the Prefecture of Messinia, and the suburban municipalities of Athens (grouped into a separate constituency), each returning 10 members.

The elections were contested by three parties—the National Radical Union, the Liberal Party, and the Union of the Democratic Left (E.D.A.)—and two coalitions : the Populist Party Union and the Progressive Agrarian Democratic Union (PADE). The National Radicals, Liberals, and E.D.A. were all recognized as single parties by the Supreme Court, and therefore needed to poll 25 per cent of the total votes to share in the second allocation of seats under the electoral law. The Populist Party Union and the PADE were recognized as coalitions of more than two parties, and were thus required to poll 40 per cent of the total votes to share in second allocations of seats.

The National Radical Union, led by M. Constantine Karamanlis, won a majority of seats at the last (1956) elections ; it is the successor organization to the Greek Rally, which was founded by the late Field-Marshal Papagos. The Liberal Party is led jointly by M. Sophocles Venizelos and M. Giorgios Papandreou. The E.D.A. is regarded as the successor organization to the outlawed Greek Communist Party ; led by M. Passalides, it represents various shades of Left-wing opinion, some pro-Communist and others not. The Populist Party Union (right-wing) is led jointly by M. Constantine Tsaldaris, M. Panayotis Kanellopoulos, and M. Stephanis Stephanopoulos, while the PADE (left-centre) is led jointly by M. Spyros Markezinis, M. Alexander Baltadzis, M. Savos Papapolitis and M. Stellos Allamanis.

The principal electoral issues were Greece's relations with her NATO allies and the question whether or not U.S. missile bases should be established on Greek territory ; there were no differences on Cyprus, all parties supporting self-determination for the island and the Greek Cypriots' claim to *enosis*. In domestic matters, extensive reforms in various fields were promised by the different parties—notably tax reforms, and measures to deal with the problems of unemployment and under-employment. Party attitudes on the two main issues—NATO and missile bases—are summarized below :

The National Radical Union strongly upheld Greece's ties with the Western democracies, and with NATO in particular. On the question of missile bases, it took the view that the matter had not yet arisen as no relevant proposals had been made by SHAPE ; if and when such proposals were made, they should be considered on the sole ground of whether or not they served the national interest.

The **Liberal Party** similarly took the view that Greece should remain firmly attached to NATO and the West, on terms of full equality with the other member-countries. It believed that Greece should refuse to discuss the question of bases until the Greek Cypriots' demand for self-determination had been met.

The **E.D.A.** maintained that Greece's foreign policy should be that of "an independent and proud nation without traces of subservience," and that friendly relations should be promoted with all countries regardless of their political or social systems It strongly opposed the setting-up of U.S. missile bases on the ground that they would turn Greece into a "target for nuclear extermination."

The **Populist Party Union** supported the NATO alliance, but stressed that Greece should be treated on terms of full equality with her other partners ; it alleged in this connexion that Greece had been treated as a "minor partner" in relation to Turkey, both on the political and the military plane. Missile bases in Greece were considered strategically unnecessary, either for Greece or NATO.

The **P.A.D.E.** attitude to NATO and the Western alliance was broadly similar to that of the Populist Party Union. It opposed the establishment of missile bases on the ground that they would "imperil the existence of the nation."

The registered electorate numbered 5,032,736 (comprising 2,658,476 men and 2,374,260 women), of whom 3,796,050 voted in the general election on May 11. The Ministry of the Interior issued the following official figures giving complete returns from all but a few polling-stations :

	Seats	Votes	Percentage
National Radicals	173	1,559,997	41.2
E.D.A.	78	926,299	24.3
Liberals	36	787,061	20.7
P.A.D.E.	9	404,050	10.6
Populists	4	112,380	3.0

Except in the case of the National Radical Union, no direct comparison was possible with the last (1956) general election, as party alignments were different at that time. In 1956 the principal Opposition group was the Democratic Union, an organization embracing seven parties ranging from the Populists on the Right to the E.D.A. on the Left ; it also included the two Liberal parties then headed by M. Venizelos and M. Papandreou respectively. [The two Liberal groups merged into a single party in February 1957—see 15404 C.] The results in 1956 (revised figures) were as follows :

	Seats	Votes	Percentage
National Radicals	165	1,591,618	47.4
Democratic Union	132	1,619,437	48.1
Progressives	—	74,519	2.2
Independents and minor groups	3	75,793	2.3

As shown above, the elections of May 11 were won by the National Radical Union, which obtained an overall majority of 46 seats in the new Parliament. The biggest surprise of the election, however, was the high vote polled by the pro-Communist E.D.A., which was supported by nearly one-quarter of the electorate and will form the principal Opposition group in the new Parliament.

The E.D.A.'s success was attributed by Greek political commentators to a number of diverse factors, including the economic position ; considerable unemployment in certain areas ; restricted opportunities for employment ; curtailment of U.S. economic aid ; resentment at the alleged favouritism shown by the U.S.A. to Turkey *vis-à-vis* Greece in the Cyprus dispute, and also in NATO policy ; and widespread opposition to the establishment of missile bases in Greece, which was expressed by large sections of non-Communist opinions as well as by pro-Communists. It was also believed that the E.D.A. had attracted many votes from left-wing but non-Communist parties such as the EPEK and the Democratic Party, which collaborated with the (centrist) Progressive Party and the Agrarians to form the P.A.D.E. coalition.

Following the elections, M. Karamanlis formed a Government—recruited exclusively from the National Radical Union—which was sworn in on May 17. Its membership was :

*M. Constantine Karamanlis ..	Prime Minister and Minister of Defence.
*M. Evangelos Averoff	Foreign Affairs.
*M. Demetrios Makris	Interior.
*M. Constantine Papaconstantinou	Finance.
*M. Aristides Protopapadakis ..	Economic Co-ordination.
*M. Leonidas Dertilis	Commerce.
*M. Constantine Martis	Industry.
*M. Constantine Tsatsos ..	Minister in charge of the Prime Minister's Office.
M. Giorgios Voyatzis	Education.
M. Constantine Kallias	Justice.
M. Aristides Demetratos ..	Labour.
M. Solon Ghikas	Public Works and Communications.
M. Constantine Adamopoulos ..	Agriculture.
M. Andreas Stratos	Welfare.
M. Giorgios Adrianopoulos ..	Merchant Marine.
M. Avgoustos Theologitis ..	Northern Greece.

* Members of former Karamanlis Cabinet.

M. Karamanlis thus resumed the Premiership after a 12-week interregnum between his resignation on the electoral law issue and the general elections; among other leading Ministers, M. Averoff returned to the Foreign Ministry and M. Makris to the Ministry of the Interior. M. Demetratos, the new Minister of Labour, is a prominent trade union leader. (Hellenic News Agency, Athens) **(Prev. rep. 16054 A; General Elections, 14732 A.)**

A. EURATOM. — U.K. Representative appointed to Euratom Commission. - Negotiations for Technical Collaboration Agreement. - Co-operation with U.S.A.

Mr. Butler (Lord Privy Seal) announced in the British House of Commons on May 22 that Mr. Macmillan had suggested to the President of the Euratom Commission (M. Armand) that the head of the U.K. delegation to the High Authority of the Coal and Steel Community (Sir William Meiklereid) should also be accredited to the Euratom Commission until Euratom had selected its permanent headquarters. Mr. Macmillan had further proposed that the United Kingdom and Euratom should negotiate a technical collaboration agreement providing "the necessary framework for their collaboration" and enabling "smooth and effective co-operation both between institutions and between individual industrial concerns in Britain and the Euratom countries." The agreement would be complementary to the general co-operation on nuclear affairs within Western Europe as a whole, including Euratom and its six constituent members, which was the task of the newly-established European Nuclear Energy Agency of the O.E.E.C.

It was announced in Brussels on the same day that the Commission of Euratom had accepted the accreditation of Sir William Meiklereid, and had also expressed its willingness to enter into discussions with the U.K. Government for the conclusion of a co-operation agreement.

A joint working party of representatives of the Euratom Commission and the U.S. Government had previously concluded a series of meetings in Luxemburg on April 3.

It was stated that the working party had studied (*a*) the means whereby a joint Euratom-U.S. nuclear power programme might be developed, aimed at bringing into operation by 1963 a number of large-scale nuclear power plants within the European Atomic Energy Community; these plants would be primarily of the pressurized and boiling water type, and would have a total installed capacity of approximately 1,000,000 kilowatts; (*b*) the principal aspects of a joint research and development programme to be centred on these reactors, and designed to encourage maximum participation by the industries of the Community and of the United States.

It was reported from Washington on May 7 that agreement had been reached in principle on the proposed co-operative programme.—(Times - Daily Telegraph - Euratom Commission Press Service - New York Times) **(Prev. rep. Euratom. 15927 A; European Nuclear Energy Agency, 16039 A.)**

B. LIBYA. — British Financial and Military Aid.

The Prime Minister of Libya (Mr. Abdel Majid Kobar) visited London from April 28 - May 4 for talks with the British Government on the amount of financial assistance to be provided to Libya during the next five years under the 20-year Anglo-Libyan treaty of 1953. The first five years of the treaty had expired on April 1, 1958; during the first three years the British contribution to Libya amounted to £3,750,000 annually, and in the fourth and fifth years to £4,250,000 annually.

It was announced in London on May 5 that agreement had been reached on the British financial contribution to Libya for the next five years; that details would be given by Mr. Kobar to the Libyan Parliament; and that Britain had agreed to help in strengthening the Libyan Army, and would also help in establishing the nucleus of a Libyan Navy. The statement said that Mr. Kobar had had discussions on the international situation with Mr. Macmillan and Mr. Selwyn Lloyd, with particular reference to North Africa and the Middle East.

Mr. Kobar informed the Libyan Parliament on May 20 (1) that Britain had agreed to contribute £3,250,000 a year to Libya for the next five years (ending April 1, 1963); (2) that she had also undertaken to provide light arms and equipment for 5,000 Libyan troops and to continue free military training for the next five years; (3) that British assistance would be provided in forming a Libyan Navy. He added that Britain would no longer contribute £1,000,000 a year to the Libyan Development Agency (as she had done since 1953), but that the U.S.A. would instead contribute $5,500,000 to the Agency over the next five years.—(Times) **(Prev. rep. 14988 A; Anglo-Libyan Treaty, 13046 D.)**

C. UNITED STATES. — Keel-laying of World's First Nuclear-powered Merchant Ship.

The keel was laid at Camden (New Jersey) on May 22 of the world's first nuclear-powered merchant ship officially known as Nuclear Ship (n.s.) *Savannah*.

The *Savannah* was planned jointly by the U.S. Commerce Department and the Maritime Administration under a directive from President Eisenhower. A combined passenger-cargo vessel, she will be powered by a pressurized water reactor of advanced type which will operate for over three years on its initial fuel loading; the propulsion equipment will be a steam turbine connected to a single propeller shaft through double reduction gears.

The n.s. *Savannah* will be 595 feet long, have a 78 ft. beam, and will be able to carry over 60 passengers and 9,500 tons of cargo at a speed of 20½ knots. In addition to its nuclear reactor (to be built by Babcock and Wilcox, of Lynchburg, Virginia) the ship will have a small auxiliary diesel plant as a stand-by in case the nuclear plant should fail, or for entering harbour. The ship's entire power plant, both nuclear and conventional, will be remotely controlled from a single console in an air-conditioned room adjoining the machinery space.

The first reactor core (the fuel container) will also be built by Babcock and Wilcox, while a second one is being developed by the General Electric Company's plant at San José, California. From the reactor core the heat produced by fission will be transferred to circulating water under pressure to keep it turning into steam; this water, which is radioactive, will in turn heat up a separate water loop which is not radioactive. The steam generated thereby will rotate three turbines which drive the propeller, as well as the generators for the ship's electricity. The reactor core will be housed in a massive metallic cylinder, 26 feet high, which will absorb most of the reactor's radiation. This cylinder and the twin heat-exchangers will in turn be placed in a 50 ft. by 35 ft. container which will catch any rays not absorbed by the primary shield, and will contain the wastes in the event of a reactor rupture.

The n.s. *Savannah* due to go into service in 1960 is named after the s.s. *Savannah*, the first ship to cross the Atlantic partly under steam in 1819. (U.S. Information Service) **(Prev. rep. Atomic Submarines, 14338 D.)**

D. HIGH COMMISSION TERRITORIES. — Sir John Maud appointed U.K. High Commissioner.

It was announced in London on May 20 that Sir John Maud, Permanent Secretary to the Ministry of Power, had been appointed High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland, and concurrently U.K. High Commissioner in South Africa, in succession to Sir Percivale Liesching, retiring in October.

Sir John Maud (52) has had a distinguished academic and Civil Service career, becoming Dean of University College, Oxford, at the age of 26 and subsequently Master of Birkbeck College, London University. During the war he was Deputy Secretary at the Ministry of Food and was generally credited with devising many details of the wartime rationing system. As Permanent Head of the Ministry of Education after the war he was responsible for putting through the educational reforms under the 1944 Education Act. He moved in 1952 to the Ministry of Power. Sir John is an authority on local government and has written several books on the subject.

The appointment takes effect in January 1959.—(Times) **(Prev. rep. 13726 A.)**

E. RELIGIOUS LIFE. — Creation of United Presbyterian Church in the United States.

A new Protestant denomination with a membership of 3,000,000 came into existence in the United States on May 28 - the United Presbyterian Church in the U.S.A., formed by the merger of the Presbyterian Church in the U.S.A. and the United Presbyterian Church of North America. It is the fourth largest Protestant denomination in the country.

The membership of the leading Protestant denominations in the U.S.A. was given as follows in the 1958 Yearbook of American Churches: Methodist 9,422,894, Southern Baptist 8,700,481, National Baptist 4,557,416, United Presbyterian 2,968,664.—(New York Times) **(Prev. rep. 15694 B.)**

F. AVIATION. — New Speed and Altitude Records.

New world records for altitude and speed were set up by American airmen on May 8 and May 16, both using the same machine—a Lockheed *Starfighter* jet. The new altitude record of 91,249 feet (over 17 miles) was set up on May 8 by Major Howard C. Johnson (38) over Mojave, California, while the new speed record of 1,404 m.p.h. was set up on May 16 by Captain Walter W. Irwin (34), flying on a measured 10-mile course over the Edwards Air Base, California.
(New York Times) **(Prev. rep. 15988 D; 15937 B.)**

Note. The absolute altitude record of 19 miles was achieved by Major David G. Simonds in a balloon in August 1957 (see 15768 D); the new record by Major Johnson is for piloted aircraft.

MAY 31—JUNE 7, 1958

A. FRANCE - TUNISIA. — The Sakhiet Incident. - Tunisian Demand for Evacuation of French Forces. - French and Tunisian Complaints to Security Council. - Anglo-U.S. Mediation. - French Government accepts Results of Anglo-U.S. Good Offices Mission. - Government's Policy rejected by French National Assembly. - Resignation of Gaillard Cabinet.

A major crisis in the relations between France and Tunisia arose on Feb. 8 when French aircraft bombed the Tunisian frontier village of Sakhiet-Sidi-Youssef, which, the French authorities alleged, was being used as a base by the National Liberation Front (F.L.N.) for raids into Algeria and attacks on French aircraft. As a protest against the bombing, which caused a large number of civilian casualties, the Tunisian Government recalled its Ambassador in Paris, forbade all movements by French troops stationed in Tunisia, demanded their evacuation, and appealed to the Security Council to condemn the French "aggression." Following the decision of the French and Tunisian Governments on Feb. 17 to accept an offer by the British and U.S. Governments to use their good offices to bring about direct negotiations between them, the Security Council postponed consideration of both the Tunisian complaint and a French counter-complaint alleging Tunisian assistance to the Algerian rebels.

Negotiations conducted through the Anglo-American "good offices" mission continued during the next seven weeks. A number of concessions were made by President Bourguiba, who—in view of the French refusal to discuss Algeria—eventually agreed (i) to exclude the Algerian problem from the scope of the talks; (ii) not to insist on the immediate evacuation of the French naval base at Bizerta; and (iii) to accept neutral supervision of the airfields hitherto occupied by the French forces. The President refused, however, to co-operate with the French authorities in measures for the control of the Algerian frontier, as had been proposed by France. The French Government decided on April 12 to accept these concessions, coupled with the evacuation of French garrisons (except that at Bizerta) from Tunisia, as a basis for the resumption of direct negotiations. On April 15, however, this policy was rejected by the National Assembly, whereupon the Prime Minister, M. Gaillard, tendered his resignation.

Details of these developments are given below under cross-headings.

Franco-Tunisian Relations, December 1957 - February 1958. - French Protest at Border Incident.

After consultations in Paris, the French Ambassador in Tunis (M. Gorse) returned to Tunisia on Dec. 21 for discussions on the questions at issue between the two Governments. On his arrival he handed to President Bourguiba a letter from the French Government emphasizing the necessity of finding a speedy solution to the problem of Tunisian aid for the Algerian insurgents, which, the letter stated, "is at the root of most of our past difficulties." Although President Bourguiba did not reply to this message, he stated in a broadcast on Jan. 9 that if the French forces evacuated all their bases in Tunisia, except Bizerta, Tunisia would enter into an alliance with France without insisting on the termination of the Algerian war as a condition for such an alliance.

Relations again deteriorated, however, when a French patrol was ambushed by Algerian rebels on Jan. 11 near the Algerian-Tunisian border, about four miles west of Sakhiet-Sidi-Youssef; 16 French soldiers were killed and four taken prisoner. M. Gorse immediately lodged a strong protest and demanded the release of the prisoners, who were alleged by the French authorities to have been taken to Tunisian territory. The French protest was rejected on Jan. 14 by the Tunisian Government, which claimed that the Tunisian authorities had taken precautionary measures against any infiltration by the belligerents into Tunisian territory, and denied that the insurgents had withdrawn into Tunisia with their prisoners.

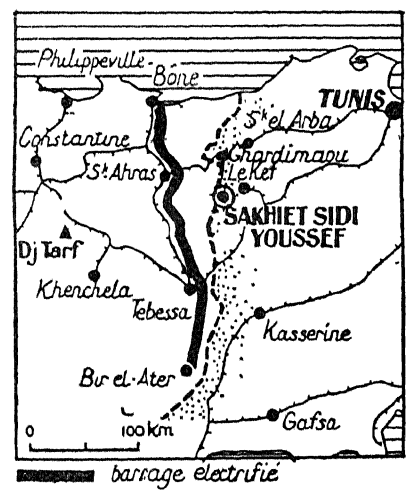
M. Gaillard decided on Jan. 15 to send his military adviser, General Buchalet, to President Bourguiba with a message threatening to break off negotiations if the prisoners were not released. When General Buchalet arrived in Tunis on Jan. 16, however, President Bourguiba refused to receive a military emissary in uniform, on the ground that his presence was an "act of intimidation"; he offered, however, to meet M. Larché (M. Gaillard's *chef de cabinet*), who had accompanied General Buchalet. This offer was rejected by M. Larché, and the two envoys returned to Paris on the following day with M. Gorse. After a representative of the International Red Cross had visited the four prisoners on Jan. 30, by arrangement with the F.L.N., and had confirmed that they were in fact in Algeria, President Bourguiba proposed on Feb. 6 that M. Gorse should return to Tunis and that negotiations should be resumed.

The Bombing of Sakhiet. - Tunisian Reactions.

On the morning of Feb. 8 a force of 25 French bombers, fighter-bombers, and jet-fighters raided Sakhiet-Sidi-Youssef (about half-a-mile from the frontier), dropping bombs and rockets for about an hour and machine-gunning the streets, which were crowded for the fortnightly market. It was subsequently announced that 69 people, including 11 women and 21 children, had been killed; that 130 people, including women and children, had been injured; and that over 100 houses, about 40 shops, and a number of public buildings had been destroyed or severely damaged, including the National Guard post, the police barracks, and the Customs and Post Office buildings, as well as buildings belonging to a mine on the outskirts of the village and a neighbouring school and hospital; most of the child casualties had occurred at and around the school. Two Red Cross lorries bearing supplies for Algerian refugees had also been destroyed.

A statement issued by the military authorities in Algiers on Feb. 8 alleged that French military aircraft had been fired on by anti-aircraft batteries in the Sakhiet area on Jan. 30 and Feb. 7; that the Tunisian authorities had been warned on Feb. 7 that another such incident would lead to reprisals; and that the raid had immediately followed a third incident early on Feb. 8 in which a French aircraft was hit. Military sources stated afterwards that 84 incidents had occurred on the Tunisian frontier since July 1, 1957, of which 26 had taken place in the Sakhiet area, and that 30 French aircraft had been fired on, 11 hit, and two forced down. M. Chaban-Delmas (the French Defence Minister) declared on Feb. 8 that the French aircraft had only exercised their "right of legitimate self-defence against anti-aircraft forces installed on Tunisian territory"; in a speech on the following day he described Sakhiet as "a nest of rebels and murderers."

General Salan, the French C.-in-C. in Algeria, stated in a report to the Ministry of Defence on Feb. 9 that aerial photographs and the reports of pilots taking part in the raid showed that Sakhiet itself had suffered "very little damage" and that "nine-tenths" of it was undamaged. Only military objectives had been attacked, including the *gendarmerie* and Customs posts, the former French barracks now used by the rebels in their attacks on French aircraft, and a rebel camp which was known to be installed at the nearby mine, with its buildings and four gun emplacements. It had become known from prisoners' statements that the school hit was an abandoned building which had served as a command post for the rebel staff. The pilots, he added, had denied seeing any Red Cross vehicles in the village.



The Algerian-Tunisian border, showing electrified barrier on the Algerian side. (*Le Monde*, Paris)

This account, however, was in important respects contradicted by reports given independently by Swedish and Swiss delegates of the League of Red Cross Societies, who entered Sakhiet immediately after the raid; by a party of French journalists (including representatives of *Le Figaro*, *France-Soir*, *L'Express*, *France-Observateur*, *L'Humanité*, and the French National Broadcasting Organization) who visited the village on Feb. 9; and by diplomatic representatives of Western and Arab countries who were taken there by the Tunisian Government on Feb. 10. These reports confirmed the large number of women and children killed and injured, the damage done to houses and shops, in addition to public buildings, and the destruction of Red Cross lorries. Mr. Lewis Jones, the U.S. Ambassador, stated afterwards that Tunisian accounts of the bombing were not at all exaggerated; Mr. Dearden, secretary to the British Embassy, estimated that three-quarters of the buildings in the village had been damaged; and M. Heibling, a Swiss Red Cross representative, expressed the opinion that it was impossible for the pilots not to have seen the red crosses on the lorries.

On being informed of the raid President Bourguiba summoned a Cabinet meeting, which decided to recall the Tunisian Ambassador in Paris, M. Masmoudi; to forbid all French troop movements unless approved by the Tunisian authorities, in order to prevent clashes with the civil population; to

demand the evacuation of all French forces from Tunisian bases, including Bizerta ; and to appeal to the U.N. Security Council. President Bourguiba announced these decisions in a broadcast on the evening of Feb. 8, in which he appealed to the population to remain calm.

"After today's raid," he said, "it seems very difficult for friendly relations to continue between Tunisia and the French Army, and still more difficult to envisage a joint defence plan or any co-operation whatever between the Tunisian and French armies . . . I ask you to remain calm, to keep watch over the security of our territory, and not to forget that we are all responsible for the lives and property of the Frenchmen in Tunisia. Our dispute is with France and the French Army, not with the Frenchmen living in our midst . . . We must continue to stand for peace, to believe in peace, and to defend it, so that the war may not spread, as a large number of military leaders and even civilians in responsible positions would like it to do." After stating that the Government gave the problem of the evacuation of French forces "absolute priority over all others," President Bourguiba continued : "It is no longer possible that an army which mocks at our national dignity after two years of independence should be tolerated any longer in Tunisia. The battle for the evacuation of Tunisian territory is beginning. We mean this evacuation to be complete, including Bizerta. We can no longer have any confidence in an army which has just given us so bloody a demonstration of its mentality."

A memorandum giving details of the raid and of the Tunisian Government's measures was handed to the U.N. Secretary-General, Dr. Hammarskjöld, on Feb. 10 by M. Mongi Slim, the Tunisian representative at the U.N. After describing the raid as "armed aggression by France against Tunisia, in flagrant contradiction of the spirit of the U.N. Charter," the memorandum stated that, "coming after some 50 other violations of the Tunisian frontier committed during the last few months by French troops, resulting in numerous other dead and wounded among Tunisian citizens, this new violation assumes the character of a premeditated action on the part of France and constitutes an act of particular gravity, seriously affecting relations between France and Tunisia and threatening international peace and security."

Before returning to Tunis, M. Masmoudi visited General de Gaulle, whom he afterwards described as "the incarnation of the real conscience of France," and Cardinal Feltin, the Archbishop of Paris. When he left Paris on Feb. 10 a number of prominent public figures visited him to express their sympathy, including M. Mendès-France, M. François Mauriac, and three left-wing Socialists, M. Daniel Mayer, M. Robert Verdier and M. Alain Savary.

In Tunis, the Constituent Assembly passed a resolution on Feb. 10 condemning the attack and proclaiming the will of the Tunisian people to stand behind President Bourguiba in the defence of the country. It also decided to send an inquiry commission to Sakhiet and to suspend examination of the draft Constitution until further notice, so that the deputies could return to their constituencies in view of the national emergency.

In accordance with the Tunisian Cabinet's decisions, the 15,000 French troops in Tunisia were strictly confined to their camps. Road blocks were erected by the Tunisians to prevent French troop movements, telephone communications between the camps and the outside world were cut off, and food supplies and services by local authorities stopped. At Ferryville, near Bizerta, several thousand Tunisian workers employed at the large French arsenal were stopped by Tunisian police from going to work, and on Feb. 10 the Tunisian Government announced that French warships already at Bizerta would be allowed to leave, but that any which tried to enter the harbour would be fired on ; if necessary the canal leading to the base would be blocked. On Feb. 14 the Constituent Assembly passed a law abrogating the extra-territorial status of Bizerta, which had hitherto been a French naval prefecture and as such had been exempted from Tunisian taxation.

The Tunisian Government also requested the French Embassy on Feb. 11 to close five of the seven French consulates in Tunisia. Local governors were empowered to expel from their districts French residents whose presence was considered likely to cause incidents, and by Feb. 25 over 600 French settlers had been removed from the frontier areas.

M. Gaillard's Statement on the Sakhiet Raid. - National Assembly Support for Government.

In a statement to the National Assembly on Feb. 11, M. Gaillard defended the bombing of Sakhiet, which, he alleged, was being used as a military base by the F.L.N. ; he revealed that the decision to carry out the raid had been made by the local commander on his own initiative. M. Gaillard was replying to a number of questions by Radical, Socialist and Communist deputies, all of whom had strongly condemned the attack.

"After the events of Sakhiet" [i.e. the incident on Jan. 11], he stated, "M. Bourguiba persuaded the F.L.N. to withdraw from its positions on the Algerian frontier. But a few days later they returned, notably to Sakhiet, which had been an active centre of the rebellion for some months. An old lead mine and its buildings 1,500 metres from the frontier provided a permanent shelter for several hundred *fellaghas*. In addition, heavy anti-aircraft machine guns installed in small forts systematically fired on French reconnaissance aircraft protecting our convoys. In the village of Sakhiet two watch-towers were occupied by the rebels, and in normal times the F.L.N.'s services and camps were installed side by side with those of the Tunisian troops. All our prisoners, up to the last few days, have confirmed the presence of two units of *fellaghas* at Sakhiet. The events of Jan. 11 had confirmed the importance of the F.L.N. infiltration. On our side our troops were permanently on the alert."

"Our airmen had strict orders not to cross the frontier," he continued, "but on numerous occasions they were fired on in the Sakhiet zone . 18 incidents of this kind occurred between Sept. 18 and Feb. 8, and two aircraft were forced down. Each time we protested to the Tunisian authorities, but without result. Twice, on Oct. 1 and 2, 1957, our aircraft were fired on from Sakhiet. In recent weeks incidents have become more frequent. On Feb. 7 the commander of the French frontier force warned the commander of the Tunisian post that we should be obliged to retaliate if any similar incident occurred. The very next day, on the morning of Feb. 8, an aircraft was fired on from Sakhiet and forced to land. The local command retaliated. B-26 bombers were to destroy the F.L.N. installations at the mine, and Corsair fighters were to destroy the two anti-aircraft machine-gun posts in the village . . .

"For months the present Government and the previous Government have authorized the Army to use its right of legitimate self-defence," M. Gaillard went on. "Hitherto it has done so only with the greatest restraint. The latest events, if they have resulted in the destruction of an important centre of *fellaghas*, have unfortunately caused some civilian casualties, but all the information which has reached me indicates that the majority of the victims belong to *fellagha* units. No-one on our side deliberately intended to attack civilians. We deplore that we have not been entirely successful, but whose is the moral responsibility for this deplorable result? Tunisia has more or less voluntarily adopted an attitude of belligerence towards us. There is no international law which compels a State which is being attacked from its neighbour's territory to put up with it indefinitely. For months our military units have shown a restraint of which few armies would have been capable. At Sakhiet they hit back, with the aim of attacking military objectives which represented a grave and permanent danger. Only the enemies of our country can believe that our retaliation had any other object."

M. Deixonne (Socialist) called for an assurance that no operation on such a scale would take place in future without the Government's consent ; he asked whether compensation would be offered to the civilian victims of the raid, emphasizing that the Socialists' vote on the motion of confidence which the Government had proposed would depend on the Prime Minister's reply. **M. Gaillard** replied that the more dangerous and complex the situation on the frontier became, the more closely would the Government keep watch over it ; the question of compensation was bound up with that of negotiations with the Tunisian Government, but "the hypothesis formulated by M. Deixonne could not be excluded *a priori*."

A resolution which, while regretting the civilian casualties at Sakhiet, expressed confidence in the Government was carried in the early hours of Feb. 12 by 335 votes to 179, with 49 deputies abstaining.

The Government was supported by the Socialists and Social Republicans, the majority of the M.R.P., R.G.R., *Gauche Démocratique* (dissident Radicals), U.D.S.R., and Independent deputies, and 21 of the Radicals. The opposition consisted of 148 Communists and *Progressistes*, 19 *Mendésiste* Radicals, four U.D.S.R. deputies (including M. Mitterrand), three Independents, two *Convention Africaine* deputies, two *non-inscrits*, and one M.R.P. Those abstaining, in addition to 31 Poujadists, included M. Edgar Faure (R.G.R.), M. Robert Schuman (M.R.P.), M. Paul Reynaud (Independent), and M. Arrighi (*Gauche Démocratique*).

The Foreign Minister, M. Pineau, told the Foreign Affairs Commission of the National Assembly on Feb. 14 that although the forces in Algeria had been authorized to retaliate in self-defence, the Government's permission was required for large-scale operations. The decision to bomb Sakhiet had been taken locally, without consulting M. Gaillard, M. Chaban-Delmas, or M. Lacoste (the Resident Minister in Algeria), but the Government considered itself morally obliged to accept responsibility.

M. Pineau added that there were two aspects of the Sakhiet bombing. One was the death of women and children, for which France had expressed her regret and offered compensation. The other was the continued armed conflict along the Algerian-Tunisian frontier. Although this was a matter in which France was accusing Tunisia of repeated violations of the Algerian frontier and interference in French affairs, France was prepared to accept a Franco-Tunisian frontier commission under neutral chairmanship, which, among other matters, might delimit a no-man's land along the frontier. France, however, could not begin conversations with Tunisia while her own troops in that country were being "threatened with suffocation." M. Pineau stated that the number of Algerian rebels operating on Tunisian territory was estimated at between 6,000 and 7,000 (a larger force than the Tunisian Army itself).

M. Pineau's statement on the background of the Sakhiet bombing was severely criticized by **M. Robert Schuman,** who asked how a local commander could launch a fleet of 25 aircraft, and who said that this looked more like a reprisal than like the right to hit back. **M. Jules Moch** (Socialist) and **M. Pleven** (U.D.S.R.) also strongly criticized the action taken by the local commander.

Tunisian and French Appeals to Security Council. - Acceptance of Anglo-American "Good Offices" Offer.

Grave disquiet was aroused by the Sakhiet raid both in Britain and in the United States.

In Washington, Mr. Dulles (the Secretary of State) informed the French Ambassador, M. Alphand, on Feb. 9 of the Government's concern at the incident, and on the following day had talks with M. Mongi Slim. The State Department issued a statement on Feb. 10 saying that the U.S. Government was "profoundly disturbed" by the raid in view of its possible effects on relations between two countries that were both friends of the U.S.A., and expressing the hope that France and Tunisia would find a means of reconciling their differences.

In London, Mr. Noble (Minister of State for Foreign Affairs) told the House of Commons on Feb. 12 that the British Government was actively discussing the situation with the French and Tunisian Governments, on whom it had urged the need for moderation and restraint. It was subsequently revealed on Feb. 17 that the British Government had offered shortly after the raid to use its good offices to bring about a renewal of conversations between France and Tunisia, and that similar offers had been made by Italy, the Lebanon, and the United States.

On Feb. 13 M. Mongi Slim formally requested the president of the Security Council (M. Sobolev, U.S.S.R.) to convene a meeting of the Council in order to condemn the "deliberate act of aggression" at Sakhiet and to take measures "to end a situation which threatens Tunisia's security and endangers international peace."

M. Slim said in an accompanying memorandum that the Tunisian Government had imposed restrictions on the French forces in the country "in exercise of its right of self-defence," and that it would decline to take responsibility for the consequences if the "occupation forces" attempted to violate these arrangements. In a second letter, submitted on Feb. 17, M. Slim explained that the "situation threatening Tunisia's security" was the presence of French troops in Tunisia, whilst the "situation endangering international peace" was the Algerian war and its repercussions on Tunisia's security, particularly the French encroachments on Tunisian territory.

A memorandum handed to M. Sobolev by M. Georges-Picot, the French permanent representative at the U.N. alleged that the F.L.N. general staff had been installed in Tunis since July 1957, with the Tunisian Government's permission; that the F.L.N. had bases and training camps in Tunisia; that the Tunisian authorities permitted and sometimes facilitated the movements of F.L.N. forces, and took an active part in supplying them with arms; and that the Tunisian radio gave "moral assistance" to the rebellion. "The counter-action of the French Air Force on the occasion of the event leading to the Tunisian complaint," the memorandum stated, "originated in the numerous provocations suffered by our troops. Whilst the French Government deplores the casualties suffered by the civil population, it finds it impossible to isolate this event from those which caused it."

In a Note delivered to the Tunisian Government on Feb. 13 by M. Bénard, the French *chargé d'affaires*, the French Government referred to the gravity of the situation caused by the blockade of the French forces in Tunisia, who in some places were suffering from a shortage of supplies; gave warning that it would hold the Tunisian Government responsible for any incident arising from the supply problem; and protested against the expulsion of French citizens from the frontier areas. The Note also referred to the possibility of the resumption of direct negotiations on the whole problem of Franco-Tunisian relations.

Although the Tunisian Government's reply (Feb. 14) rejected this suggestion, a number of developments during the next few days led to a certain relaxation of tension. In a broadcast on Feb. 13 President Bourguiba had already offered to withdraw the Tunisian complaint to the Security Council if France accepted U.S. mediation, and had stated that, in view of Bizerta's importance to Western defence, he would be prepared to discuss with all the NATO Powers except France the possibility of putting the base under NATO control. On Feb. 15 the French Government announced that, while refusing to accept arbitration, it would accept the good offices of a third Power, and that the French Red Cross would be asked to co-operate with the Tunisian Red Crescent in evaluating the damage caused to civilians at Sakhiet, with a view to compensation. On Feb. 16 President Bourguiba accepted a proposal by Dr. Hammarskjöld to allow the French troops to receive supplies, on the understanding that transport facilities would be used solely for this purpose. [Some of the outlying French garrisons had already received supplies by helicopter, with the tacit consent of the Tunisian authorities.] Finally, on Feb. 17 the French and Tunisian Governments formally announced their acceptance of the British and U.S. Governments' offer of their good offices.

In an interview with *Le Monde's* correspondent on Feb. 17, President Bourguiba said that to reach a settlement it would be necessary to deal with the Algerian problem; he commented that "a semi-internationalization between members of the Atlantic family is preferable to total internationalization before the Security Council." Emphasizing that it was impossible for French troops to remain in Tunisia, he continued: "We are convinced that among the French leaders are some who have not accepted the independence of Tunisia and Morocco . . . That is the difference between France and Britain. The British imprisoned Nehru . . . but after the proclamation of independence that was all over. With France, the difficulties begin with independence . . ." The French Army, he added, must leave Tunisia as quickly as possible; the smaller posts must be evacuated on the basis of "a reasonable timetable," whilst the evacuation of Bizerta might take until the end of the year.

When the Security Council met on Feb. 18, it was agreed to adjourn consideration of the French and Tunisian complaints *sine die*, pending the outcome of the Anglo-American offer of good offices.

At the beginning of the meeting, **M. Georges-Picot** said that in agreeing to put the Tunisian complaint on the agenda France did not endorse its wording, as what was involved was not an "act of aggression" but an isolated act for which France had already expressed regret and offered compensation. Confirming the offer of good offices, **Mr. Wadsworth** (U.S.A.) stated that the U.S. and British Governments might have "affirmative suggestions" to make. **Sir Pierson Dixon** (United Kingdom) said that whilst Britain's essential object was to bring the two parties together, she might also "wish to offer some positive suggestions to them." **M. Sobolev** agreed that the offer of good offices was in accordance with the U.N. Charter, and said that the Soviet Union proceeded from the assumption that good offices, whoever tendered them, should not be "utilized to exert pressure on any country for the purpose of imposing conditions running counter to its sovereignty or extracting benefits for the State playing the role of mediator." A proposal by **Mr. Matsudaira** (Japan) that consideration of the Tunisian and French complaints should be adjourned *sine die* was adopted unanimously; **M. Slim,** however, stated that his Government reserved the right to request an emergency meeting if the good offices did not appear to be yielding useful results.

The agreement to accept Anglo-American mediation was, however, followed by a number of incidents which gave rise to a renewal of tension between France and Tunisia.

As the French Embassy refused to comply with the Tunisian demand for the closing of five French Consulates, the Tunisian Government on Feb. 17 withdrew the consular rights of the Consulates at Gabès, Gafsa, and Medjez-el-Bab, and declared their staffs and those of the Consulates at Le Kef and Souk-el Arba *personae non gratae*. When the Consulates still remained open on orders from Paris, they were closed by the Tunisian authorities on Feb. 20, the Consuls being conducted to Tunis under police escort. A strong French protest against this measure was made to the Tunisian Government on Feb. 21, and a complaint lodged with the Security Council on the following day.

On Feb. 19 a French army lorry was blown up by a land mine which had been planted on the military airstrip at Remada (in Southern Tunisia), a French officer and soldier being wounded. The French troops stationed at Remada thereupon arrested the local representative of the Tunisian Government, as well as 11 other Tunisians whom they regarded as suspect, and released them only after several hours on orders from General Gambiez, the French C.-in-C. The situation nevertheless remained tense at Remada, where the French forces were reported to have sealed off the village, and calm was only restored after General Gambiez had personally flown to Remada in order to normalize the situation.

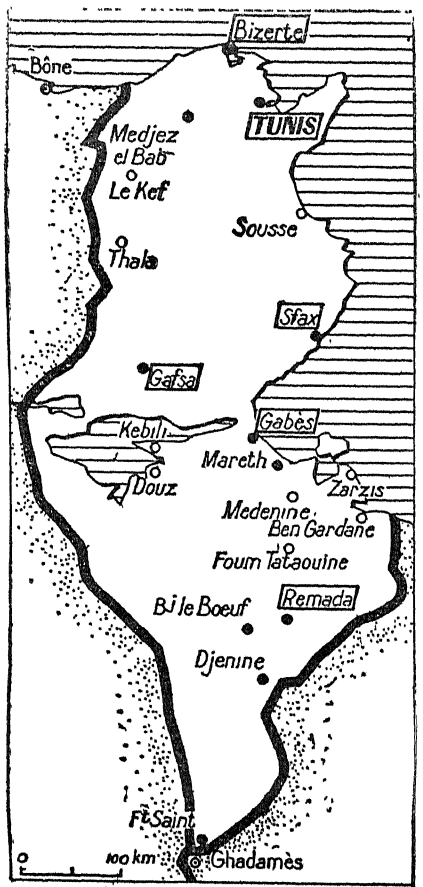
In various parts of Tunisia seven French residents were arrested on Feb. 19, and another nine on Feb. 27, on charges of illegal possession of arms, whilst 12 Frenchmen living in the Bizerta area were arrested and immediately expelled from the country on Feb. 28, no reason being given.

The Murphy-Beeley Mission.

Mr. Robert Murphy, Deputy Under-Secretary of State, was appointed mediator in the Franco-Tunisian dispute by the U.S. Government on Feb. 19, whilst Mr. Harold Beeley, Superintending Under-Secretary in charge of Middle Eastern and North African questions at the Foreign Office, was appointed as the British Government's representative in the negotiations on Feb. 21.

Mr. Murphy (63) acted during the war as U.S. diplomatic representative in North Africa and political adviser to General Eisenhower, then commanding Allied forces in the Mediterranean; he subsequently became political adviser at Supreme Allied Headquarters in Germany, and conducted the final stages of the negotiations for the settlement of the Trieste dispute.

The negotiations were complicated at the outset by disagreements on their scope. The French Cabinet decided on Feb. 22 that the Algerian problem should be excluded, and that they should be confined to three points: (1) the immediate problems of re-establishing freedom of movement for the French troops in Tunisia (which was a pre-condition for their re-grouping in accordance with Tunisian wishes), the question of the consulates, and the security of French settlers in Tunisia; (2) the control of the Algerian frontier through a Franco-Tunisian commission under a neutral chairman or a joint force; (3) the resumption of direct Franco-Tunisian negotiations. In order to prevent further incidents, the French Government had previously decided on Feb. 19 to establish a "no-man's land" along the whole length of the Algerian-Tunisian frontier, in which no-one would be allowed to live or to move about.



The French military posts in Tunisia.
(*Le Monde*, Paris)

The French Government also insisted that Bizerta should remain a French base. M. Gaillard declared in the National Assembly on Feb. 19 that the Government had no intention of foregoing the right to Bizerta which France held "under treaties and agreements," whilst M. Pineau said in the Council of the Republic on Feb. 25 that Bizerta was "a French port placed at the disposal of NATO just as Portsmouth is an English port placed at the disposal of NATO." He added that "if Bizerta were handed over to NATO, France would demand that the same should be done with Malta and Gibraltar."

President Bourguiba, on the other hand, told the *Agence France-Presse* on Feb. 22 (i) that the French troops in Tunisia would be allowed freedom of movement only when France had agreed to their complete evacuation; (ii) that he would never co-operate with France in controlling the frontier, and would continue to allow Algerians to enter Tunisia provided they did not disturb the French settlers there; (iii) that he had lost all faith in direct negotiations or any form of co-operation with France; and (iv) that he hoped "to find a solution for the Algerian problem through the good offices mission."

In a broadcast on Feb. 27 President Bourguiba denounced the French plan for a "no-man's land," asserting that it would involve moving hundreds of thousands of people, and that it was already having repercussions in Tunisia, where more Algerian refugees were beginning to arrive. A protest against the French plan was addressed to Dr. Hammarskjöld on Feb. 28 by M. Slim, who alleged that it would result in "the forcible eviction of approximately 250,000 Algerian inhabitants of the area."

M. Georges-Picot, in a subsequent letter to Dr. Hammarskjöld, described this charge as based on "false and tendentious" statements spread by the Tunisian radio, which had already caused about 450 families to flee to Tunisia; he stated that the only immediate step would be the removal of some 500 families, all of whom would be resettled within a short distance of their present homes.

Mr. Murphy arrived in London on Feb. 22. After talks with Mr. Macmillan and Mr. Selwyn Lloyd he proceeded on Feb. 24 to Paris, where he had a long conversation with M. Gaillard and M. Pineau. On the following day he went on to Tunis for talks with the Tunisian Government, which continued until March 2. He then flew to London *via* Paris, where he again saw M. Gaillard, returning to Paris with Mr. Beeley on March 4.

While they were in Paris, M. Gaillard put forward proposals for Franco-Tunisian co-operation in a Western Mediterranean defence pact and in the joint exploitation of the economic resources of the Sahara, in a speech to the National Assembly on March 7. According to *Le Monde*, these proposals were based on a plan for a "Western Mediterranean commonwealth" comprising France, Algeria, Tunisia, Morocco, and Libya, which Mr. Dulles had suggested to Mr. Selwyn Lloyd about a fortnight before; the French Government was reported to have proposed that Italy and Spain should also be included.

In his speech M. Gaillard said that it was necessary to ensure against violation of the Algerian frontier by means of the creation of a "forbidden zone" and supervision of the frontier on the Tunisian side. The main problem arising in connexion with the French forces in Tunisia was that of preventing the use of the French airfields as rebel bases, and unless a solution were found France could not abandon them. There could be no question of handing over Bizerta to another member of the Atlantic Pact without provoking "a major conflict with France inside NATO"; to hand it over to NATO itself was equally impossible. France, he added, would not resume normal relations with Tunisia until the "arbitrary measures" taken against the consuls and a number of French citizens had been reversed.

"It is on this basis that France hopes that the good offices will facilitate the successful resumption of direct conversations," M. Gaillard continued. "If the Tunisian President is seeking a prestige victory he is making a big mistake, for he would be getting away from the only solution of the problem: the achievement of unity between France and the *Maghreb*, the first manifestations of which must be economic co-operation and joint defence . . . It is time to establish economic co-operation for the purpose of exploiting the resources of the Sahara, in relation to which frontiers of sand seem completely out-of-date. It is time to organize, together with the countries on the shores of the Western Mediterranean, that north-south axis of joint defence which is the natural complement of the Atlantic Pact. Within this framework French Algeria, enjoying that large measure of administrative freedom guaranteed by the *loi-cadre*, will find her natural place."

Mr. Murphy and Mr. Beeley flew to Tunis on March 11 with the French Government's reply to the proposals previously submitted to them by President Bourguiba, taking with them details of M. Gaillard's plan. In a broadcast on March 13 President Bourguiba expressed dissatisfaction with the attitude of the British and U.S. Governments, declaring that if they failed to adopt a definite position "in favour of the victims of aggression and against the aggressor" he would be obliged to admit that he had "made a mistake" in adopting a pro-Western attitude. On the following day, however, a message was sent to President Bourguiba by President Eisenhower, in reply to a letter from the former, which was reported to have contributed greatly to the progress of the discussions. The two mediators subsequently returned to Paris on March 17 with the Tunisian Government's latest proposals, which contained a number of substantial concessions to the French point of view.

In an interview with a representative of the Columbia Broadcasting System, President Bourguiba disclosed on March 23 that he had agreed to accept supervision of the French military airfields in Tunisia by neutral observers after their evacuation by the French forces; to postpone discussions on the evacuation of Bizerta to a later date; and to exclude the Algerian question from the subjects to be discussed within the framework of the good offices mission. He had previously stated in a broadcast on March 13 that after the evacuation of Bizerta he would be prepared to send technicians to help operate the port as a base for the free world.

The French Cabinet considered the new proposals on March 21, and subsequently announced that its attitude was "essentially based on the question of Tunisian non-belligerency."

Enlarging on this point in the National Assembly on March 27, M. Gaillard said: "The Government intends to ensure Tunisia's non-interference in events in Algeria as effectively as possible. This presupposes that Tunisia shall respect the rules of neutrality. We have made certain proposals to ensure that it shall be impossible to cross the frontier, and are ready to examine any other suggestion which would lead to this result. As for the control of the airfields—which is an aspect of the same problem, but a minor aspect—we think that if they can also be neutralized, the presence of French

troops becomes a secondary problem. The essential thing is that they should not be used for hostile purposes. I must remind you that, as against four airfields which we still control, there are 20 which we do not . . ."

Mr. Murphy and Mr. Beeley visited London from March 29 to April 2 for discussions with Dr. Hammarskjöld on the possibility of establishing some form of international control of the Algerian frontier. After reporting on their talks to M. Gaillard and M. Pineau in Paris, they flew to Tunis on April 3 for further discussions with President Bourguiba, who, however, refused to consider any plan for frontier control. "Any such discussion is absolutely useless," he said on April 6 in an interview with the Italian radio," as in any case arms and men will continue to cross the frontier. The real problem, the only essential problem, is the Algerian war." Before returning to Paris on April 6, Mr. Beeley admitted that the mission had met with "a temporary defeat," whilst Mr. Murphy said that the first phase of the mission had ended, although discussions would continue. On April 9 they discussed the situation for six hours with M. Gaillard and M. Pineau, the British and U.S. Ambassadors in Paris (Sir Gladwyn Jebb and Mr. Houghton) also being present.

A meeting of the French Cabinet arranged for April 11 was postponed for 24 hours by M. Gaillard, after Mr. Murphy had handed him a letter from President Eisenhower appealing to him not to wind up the good offices procedure. Sir Gladwyn Jebb informed M. Pineau of the British Government's views on the same day. Five Independent [right-wing] members of the Government—MM. Boscary-Monsservin, Christiaens, Garet, Marcellin, and Ribeyre—also saw M. Gaillard, and at their own request were subsequently received by President Coty. The Independent and *Paysan* members of the Foreign Affairs Commission had adopted on the previous day a resolution opposing any internationalization of the Algerian problem, the continuance of the good offices mission, unilateral French control of the Algerian frontier without Tunisian control of the Tunisian side of the border, or any form of mediation by Dr. Hammarskjöld.

After a meeting lasting the greater part of the day, which was interrupted for five hours for private discussions between President Coty, M. Gaillard, and the right-wing Ministers, the Cabinet decided in the evening of April 12 (*a*) to resume direct negotiations with Tunisia on the basis established by the good offices mission ; (*b*) to reserve the right to raise the question of control of the frontier before the Security Council ; and (*c*) to recall Parliament on April 15 to debate its decisions. The results of the good offices mission which the Government accepted as a basis for negotiations were the following :

(1) All French troops in Tunisia, except those at Bizerta, would be evacuated in accordance with a timetable to be agreed on by the French military command and the Tunisian authorities.

(2) France recognized Tunisian sovereignty over Bizerta. The status of the base would be discussed between the two Governments before the regrouping of the French forces was completed, and would be defined by a special agreement.

(3) Neutral observers would ensure that the military airfields in southern Tunisia were used exclusively for peaceful purposes.

(4) The French consulates closed by the Tunisian authorities would be reopened, and in the interim the jurisdiction of the other French consulates would be extended.

(5) The Tunisian Government would examine individually the cases of the French citizens expelled from the frontier areas, and would decide if security conditions permitted them to return to their homes.

Fall of the Gaillard Government.

When the Government submitted its policy to the National Assembly on April 15, it was violently denounced by the right-wing deputies, who accused it of accepting a policy dictated by the U.S.A. In the ensuing division the Government was defeated by 321 votes to 255—the Communists, *Mendésiste* Radicals, Social Republicans, Poujadists, and the majority of the Independents voting against it.

M. Pineau, who opened the debate, pointed out that the points agreed on as a basis for negotiations did not include one essential element—a plan for the control of the Algerian frontier. In view of President Bourguiba's rejection of its proposals, however, the Government had been faced with only two alternatives : either to accept the positive results of the good offices mission and resume direct negotiations, or to refuse to negotiate. The Government had chosen the former course, for if it had chosen the latter the problem would again have been submitted to the Security Council, and possibly to the U.N. General Assembly. This would have meant a long delay, during which it would have been necessary to restore to the French troops in Tunisia their freedom of action, if necessary by force , such a solution would "inevitably have led to military intervention and practically to the reoccupation of Tunisia, at least in part."

The second reason for the Government's decision, M. Pineau continued, was that if the problem again came before the U.N. France would be in a stronger position than if she had refused to accept the results of the good offices mission. Finally, the Government considered that bilateral Franco-Tunisian discussions would be "less dangerous" than a debate before the U.N. "We can never accept that a solution of the Algerian problem should be imposed upon us from abroad," he declared. "Nothing in Mr. Murphy's and Mr. Beeley's suggestions involves us in the course which some people fear. Is it certain that this would be the same if we ran the risk, when it was not absolutely necessary, of extending the conflict to the whole of North Africa? "

M. Gaillard emphasized that the Government had been influenced in its decision less by the question of relations with Tunisia than by the Algerian problem, which could be settled only if the support which the rebels received from certain Arab States was not extended and transformed into international interference. If the rebels could provoke France into transforming the internal struggle into an international war, the intervention of other Powers, whether sympathetic, indifferent, or hostile to France, would become inevitable. "Firmness does not consist—as some people who claim a monopoly of patriotism maintain—in yielding to the temptation to extend the war and falling into the trap which has been prepared for us with that very purpose," M. Gaillard declared, "but in resisting this temptation."

After announcing that the Government hoped to submit to the Assembly plans for the intensification of the war effort in Algeria, he went on . "Despite the insinuations which are automatically made in such circumstances, the Government has at no time received any sort of ultimatum or been subjected to any sort of pressure from abroad. In this matter the Government has reached its decision freely, acting in what it believes to be the national interest, and you will be able to decide freely whether it has been right or wrong. The President of the U.S.A. has thought it his duty to tell me of his hopes—just as he has told M. Bourguiba—that the good offices mission should lead, not to the settlement of all the problems between ourselves and Tunisia, but, in his own words, at least to the establishment of a *modus vivendi*. It would be strange to consider such a message as anything unusual."

Summing up the results of the good offices mission, M. Gaillard said that it had led President Bourguiba to abandon his demand for the evacuation of Bizerta, had "replaced French occupation of one-sixth of the airfields in Tunisia by neutral control," and had permitted a return to normal relations which would not be a matter of indifference to the 90,000 French citizens living in Tunisia. The Government's failure to secure Tunisian support for its plan for the formation of a joint Franco-Tunisian force, or even for the inclusion of the question of control of the Algerian frontier in the agenda of the good offices mission, was no reason for rejecting what had been achieved. France had reserved her rights on this question, and her first step would be to inform the other NATO Powers of "the permanent aggression to which Algeria, a territory covered by the Atlantic Pact, is subjected from Tunisian territory." The question would be raised at the forthcoming meeting of Ministers of NATO countries, and if France's allies did not clearly demonstrate their solidarity with her on this matter "a crisis of extreme gravity" would arise.

"We have been criticized for not giving our troops in Tunisia orders to march," M. Gaillard continued. "Nothing would have been easier. The Government's orders have been quite the reverse. General Gambiez and his troops deserve our respect all the more because the so-called blockade was theoretical and often contemptible. We gave that order because we wished to make clear our intention to respect the independence of States to which we had agreed, whatever the disappointments which their ingratitude sometimes causes us, and because we did not wish to compromise in any way our chances of finding a French solution to the Algerian problem. Perhaps there is another policy. At the beginning of my speech I described what its results would be, not probably but certainly. In our opinion it would infallibly lead to the loss of Algeria."

M. Duclos (Communist) maintained that the Government, by refusing the Tunisian and Moroccan Governments' earlier offer of their good offices [see 15915 A], had made itself responsible for a state of affairs leading to "American intervention." **M. Le Pen** (*non-inscrit*, and a right-wing extremist), in a virulently anti-American speech, declared that "the most treacherous and the hardest blows against us have come from those who call themselves our allies. The Anglo-American alliance is being transformed into a political protectorate . . . Bourguiba is a puppet in the hands of the American Administration. To tell us that we risk driving him into the arms of the Soviets is a travesty of the truth. Of the two dangers threatening us, the Soviet and the American, the second is the more immediate . . . If we must leave NATO to safeguard our future, let us leave it. If our alliances are an embarrassment to us, let us abandon them."

M. Pierre André (*apparenté* to the Independents) asserted that "after forcing the Netherlands to give up Java and Britain to abandon Egypt, the United States are going to make us give up Bizerta and Oran." He demanded that France should retain not only the airfields but also the military bases in southern Tunisia, and should consent to evacuate them only on condition that Tunisia returned to "genuine neutrality." **M. Soustelle** (Social Republican) also alleged that the U.S. State Department was sacrificing everything in order to win the friendship of the Arab States, although this policy had met with nothing but setbacks. The good offices mission would have been justified only if its object had been to ensure Tunisia's neutrality, but this problem had been completely ignored; after the "failure of the mission" the only fact which could explain the Government's decision was President Eisenhower's letter. M. Soustelle declared that in order to compel Tunisia to respect international law, it was necessary to close the frontier and to reply to acts of aggression by "limited actions," as Israel had done in face of Egyptian aggression.

M. Maurice Schumann (M.R.P.) defended the Government's policy on the ground that its rejection would lead to grave consequences in Algeria. It was necessary to gain a few weeks' respite in order to ensure that France would enjoy U.S. and British support in her negotiations with Tunisia or at the United Nations. Deprecating the "xenophobia" shown by certain deputies, M. Schumann gave a warning that any isolation of France would inevitably result in the internationalization of the Tunisian and Moroccan problems. **M. Dixonne** (Socialist) also expressed the view that acceptance of the results of the good offices mission would guarantee that relations with Tunisia remained an internal problem; he described the Atlantic Pact as "our only shield against the threats of Soviet imperialism."

Replying to the debate, **M. Gaillard** announced that he would only ask for an ordinary vote supporting the Government's policy; anticipating a hostile majority, he stressed the dangers of a fresh Cabinet crisis. He declared: "If the Government assures you that it is in France's interest to accept its decision, it is for good reasons. The majority of you are going to refuse and start a crisis. How long will it last? What majority will a new Government be able to count on? What will be the social, financial, and economic consequences? What will happen in North Africa? And what new policy will the new Government carry out? That is your problem . . . I do not consider that I should put the question of confidence tonight according to the constitutional form. If the majority chooses another policy on Tunisia, even though the Government is not overthrown in the manner laid down by the Constitution, how could it remain in power and enter into negotiations requiring its full authority, an authority which can only come from you? . . . An ordinary vote is therefore preferable. I hope no-one will have the cowardice to abstain from voting."

The 255 votes cast for the Government comprised 95 Socialists and 3 *Mouvement Socialiste Africain* (-M.S.A.), 70 M.R.P. deputies, 29 Radicals (including MM. Bourgès-Maunoury and Daladier), 24 Independents (including M. Paul Reynaud), 14 U.D.S.R. and *Rassemblement Démocratique Africain* (including M. Pleven), six R.G.R. (including M. Edgar Faure), six *Convention Africaine*, five *Gauche Démocratique* (including M. Queuille), two *Paysans d'Action Sociale*, and one Social Republican (M. Chaban-Delmas, the Defence Minister).

The majority of 321 against the Government consisted of 148 Communists and *Progressistes*, 61 Independents, 30 Poujadists, 17 Social Republicans, 14 Radicals (including M. Mendès-France), 10 *Paysans*, nine *Gauche Démocratique* (including MM. Arrighi and Morice), 8 *non-inscrits*, 7 U.D.S.R. (including M. Mitterrand), 7 R.G.R (including General Corniglion-Molinier), 6 *Paysans d'Action Sociale*, 3 M.R.P. (including M. Bidault), and one *Mouvement Socialiste Africain* deputy.

Immediately after the vote, M. Gaillard tendered his Government's resignation to President Coty. Mr. Murphy flew to London with Mr. Beeley on April 17, and returned to Washington on April 20.—(Le Monde - Le Figaro - Times - Manchester Guardian - New York Times - U.N. Information Centre, London) **(Prev. rep. Franco-Tunisian Relations, 15883 A; French Cabinet, 15870 D.)**

A. UNITED STATES. — Civil Aviation. - New System of Transcontinental Air Corridors.

The U.S. Civil Aeronautics Board announced on May 28 that it had established an experimental system of transcontinental air routes on which all flights would be subject to ground control regardless of weather. From June 15 all flights between New York and Washington in the east and Los Angeles and San Francisco in the west would come under this control in three air corridors, which would be at heights between 17,000 and 22,000 feet and would each be 40 miles in width. Both civil and military aircraft would be guided by the new ground control, and all aircraft would be separated by at least 1,000 feet vertically and 10 minutes' flying time horizontally to prevent air collisions.

The introduction of this new safety measure followed two air collisions in the previous five weeks between military jets and commercial airliners, in which 49 lives were lost.

(New York Times - New York Herald Tribune)

B. SOVIET UNION. — Moscow Reconstruction Plan.

Plans for transforming the centre of Moscow into a garden city over the next 20 to 25 years were announced on May 11 by the Tass Agency. The project involves the eventual transfer of Government offices from the Kremlin to the south-western part of the city, and the conversion of the Kremlin itself into a museum.

The centre of Moscow will be turned into an area of parks and historical and architectural monuments, surrounded by a ring of boulevards. Old buildings, warehouses, and factories in the city centre will be pulled down in due course, and the area of greenery round the Kremlin will be extended from the present 74 acres to 370 acres. The Kremlin and St. Basil's Cathedral will eventually be situated in a zone of parks and gardens which will include the Red Square, Sverdlov and Dzerzhinsky Squares, and the Manège (another of Moscow's leading squares), and which will link the city centre with the south-western district and the new Moscow University in the Lenin Hills [see below]. The plan provides for a considerable opening-up of the Moskva River, which will be flanked by the new parks along one bank.

The new University of Moscow opened on Sept. 1, 1952 is situated in the Lenin Hills on the city's outskirts, overlooking the capital. The central 32-storey building (the highest in the Soviet Union) is surrounded by 26 auxiliary blocks and surmounted by a superstructure equivalent in height to another 15 storeys. The buildings house the scientific, technological and mathematical faculties of the University of Moscow, the other faculties remaining in the old buildings in the city centre. There are some 5,700 rooms, 148 lecture halls, and over 1,000 laboratories, together with accommodation for 13,000 students and a large professorial and lecturing staff. The whole is surrounded by parks containing sports grounds, a 100-acre botanical garden, and other amenities.

The Moscow reconstruction plan is in charge of Academician Ivan Zholtovsky, assisted by a team of architects and engineers.

(Soviet Embassy Press Department, London)

C. SOUTH VIETNAM. — M. Pineau's Visit to Saigon. - Discussions with President Diem.

M. Pineau, the French Foreign Minister, paid an official visit to Saigon on March 6-7 while on his way to the recent SEATO conference in Manila.

An official communiqué issued on the latter date announced (1) that M. Pineau had had talks with President Diem and other Vietnamese leaders, including the State Secretary for Foreign Affairs (Vu Van Mau); (2) that there had been agreement in principle on a number of questions such as French assistance in land reform, cultural relations, a trade agreement, and the Vietnamese payments position; and (3) that President Diem had accepted an invitation to visit France. The communiqué said that the talks had taken place in "the most friendly atmosphere" and had shown the desire of both Governments to find, "in a sincere sprit of understanding," solutions to those questions which were still pending between France and Vietnam.

The *Agence France Presse* reported from Saigon that the questions discussed included French economic and technical aid to Vietnam; the preparation of a trade and payments agreement; the status of the French cultural mission; the reduction of the small French military detachment in Vietnam which was liquidating the affairs of the former French Expeditionary Corps and handling the transit of supplies for the French base at Séno, in Laos; and the conditions under which nationals of either country, especially students, could enter the other.

Before leaving Saigon M. Pineau announced that the French Government had agreed to release 1,500,000,000 francs for South Vietnam under the French economic and technical aid programme.—(Vietnam Press Agency, Saigon - Le Monde)

D. SCIENTIFIC RESEARCH. — Discovery of Intense Radiation Belt in Outer Space.

The existence in outer space of a belt of extremely intense radiation, previously unsuspected, was announced on May 1 by the American scientist Dr. James Van Allen, in a report on the data obtained by the two *Explorer* earth satellites. Dr. Van Allen said that the *Explorers* had encountered radiation "1,000 times as intense as could be attributed to cosmic rays" at altitudes of 600 miles and beyond, the intensity being such that it had jammed the Geiger counters with which both satellites were equipped. He expressed the opinion that the belt of potentially dangerous radiation was confined to a spatial zone varying from a few hundred to 1,000 miles in depth.

The source of the radiation belt was unknown but was believed to be ionized gas, probably hydrogen, shot out by the sun. It was pointed out that the existence of this belt posed new obstacles to space flight, as scientists would have to design future space-ships in such a manner as to shield human occupants against the radiation.—(New York Times) **(Prev. rep. 16137 B.)**

A. UNITED KINGDOM. — Railways. - Settlement of Wages Dispute. - Acceleration of Rail Modernization Programme. - Proposed Economy Measures.

A dispute which threatened to cause a complete stoppage on British Railways came to a head on April 10 following the rejection by the Railway Staffs National Tribunal of claims for increases in wages and salaries put forward by the three railway unions. The unions concerned—the National Union of Railwaymen, the Amalgamated Society of Locomotive Engineers and Firemen, and the Transport Salaried Staffs Association—had previously submitted their claims to the British Transport Commission, which had rejected them on the ground that the railways' financial position did not allow them to be considered. The dispute was marked by the intervention of the Government, which agreed to permit further substantial investment in the railways to enable the Commission to hasten forward its modernization plans, and thus make possible economies which would allow some wage increases to be paid.

The claims were (*a*) by the N.U.R. for a "substantial" pay increase; (*b*) by the ASLEF for a 10 per cent pay increase and a reduction in working hours from 88 a fortnight to 40 a week; (*c*) by the T.S.S.A. for an "improvement to maintain the purchasing power of members' pay." At a meeting between the Commission and leaders of the three railway unions on Dec. 12, the Commission rejected the claims in view of the railways' financial position and asked the unions not to press them at present. The unions decided, however, to submit their case to the Railway Staffs National Tribunal, which on April 10, 1958, also rejected the wage claims by a majority of two to one; the ASLEF's demand for shorter working hours was rejected by the Tribunal unanimously.

The Tribunal's majority report (signed by Sir John Forster, the chairman, and Mr. A. J. Epsley, the B.T.C nominee) agreed that railwaymen's basic pay "appeared lower than basic pay in other nationalized industries and in certain private undertakings," but said that the Tribunal felt "unable to recommend any increase in wages at present" because of the B.T.C.'s deficits in 1956 and 1957. It explained that a 10 per cent increase for all the grades covered by the claims would raise the Commission's wage bill by about £30,000,000 a year, without taking into account other applications by the unions (e.g. the ASLEF demand for a shorter working week) which, if granted, would cost a further £17,000,000.

Dealing with the railways' financial position, the report said that the effect of the proposals announced in October 1956 [see 15438 A] had been to freeze for the time being the Commission's accumulated deficit at its end-1955 figure of £70,000,000, and to permit the borrowing of sums as required—but not exceeding £250,000,000—to meet deficits incurred between 1955 and 1962, during which period the Commission's modernization plans would be proceeding. In 1956 the Commission had had a deficit of £57,500,000 on its railway undertaking and a surplus of £3,100,000 on its other activities; to cover the net deficiency, the Commission had borrowed £54,400,000—roughly one-fifth of the maximum sum of £250,000,000 available to it. The year 1957 had been "unsatisfactory" for the railways, with considerably higher expenses, mainly as a result of the wage increases of March 1957 [see page 15736]. Moreover, freight traffic had tended to fall, and even taking into account the "non-recurrent windfall" resulting from the Suez crisis (when extra traffic was diverted to the railways) it was already clear that the Commission's deficit would exceed the 1956 figure. The borrowings against the deficits for 1956 and 1957, therefore, would "inevitably total a sum in excess of £110,000,000" and would "seriously deplete the £250,000,000 which had been calculated as necessary to cover the Commission's deficits for the period 1956-62, of which there would still be five years to run."

In view of the 'fierce" competition which the railways had to meet on both freight and passenger sides, the advisability of again raising freight charges or passenger fares (last increased in August and September 1957 respectively) was "open to serious question." Moreover, even if it were considered "practicable and commercially prudent" to do so, the additional receipts would be needed to keep the 1958 deficit within the maximum originally contemplated at the present level of costs, and would not be available for meeting increased costs, whether for wages or anything else. In this connexion the Commission had stressed that "increases in salaries and wages at the present time could only be met by drastic and damaging curtailment of the Commission's activities and services beyond those contemplated in the review . . . , contrary to the interests of the railways and their staff and of their customers and the country generally."

The majority report concluded: "It is impossible for us to forecast the extent of the annual deficits which may be incurred by the Commission this year and in the years up to 1962. But in the light of the circumstances outlined, and of the fact that to cover deficits incurred up to 1962 the Commission is, by statute, prevented from borrowing a sum in excess of £250,000,000, against which it has already been compelled, or will be compelled, to draw sums which together will exceed £110,000,000 for 1956 and 1957, we feel ourselves unable to recommend any increase of wages at the present time."

The railway unions' nominee on the Tribunal (Mr. Edwin Hall, secretary of the Lancashire branch of the National Union of Mineworkers) dissented from the majority finding and recommended (1) the immediate restoration of the purchasing power of wages and salaries covered by the claims to the level obtaining after the award of March 1957 (i.e. an immediate increase of about 3.2 per cent); (2) a further meeting between the Commission and the unions to discuss the question of the relationship between basic wages on the railways and those in other nationalized industries and public services.

Mr. Hall said in his minority report: "I cannot accept the view that the deficits incurred by the Commission in their attempts to modernize and subsequently reorganize the British railways should be partially recouped through the worsening of the standard of living of the employees. I cannot accept that when, under the Transport (Railway Finances) Act, 1957, the Government undertook to finance the Commission's deficits on its revenue account to the extent of a sum not exceeding £250,000,000, during the seven years from 1956 to 1962 inclusive, it was intended that the Act should be used as an instrument or reason to prevent the employees of the Commission from maintaining their then existing standard of living. Nor can I accept the Act as a reason for refusing to improve basic rates to ensure their reasonable comparability with those payable to employees of similar grades in other nationalized industries or public services.

"It would be impossible to obtain the efficient and willing co-operation of any staff whose basic wages are admittedly low as against similar grades in other nationalized industries or public services, and who could not rely upon an independent tribunal to restore their declining purchasing power." Mr. Hall concluded by stressing his view that the tribunal's terms of reference "did not make it competent to say how the Commission should obtain the necessary finance to meet the claim."

The Tribunal's majority decision aroused indignation among the executives and rank-and-file of the three railway unions. Mr. S. F. Greene, general secretary of the N.U.R., expressed on April 10 his executive's "disgust and concern" at the conclusions in the majority report; declared that the union's "powerful case" for an increase had not been "judged on its merits"; and said that the award implied that however good a case the railwaymen might put forward, they could not have a pay increase until 1961 or 1962, "and perhaps not then if the Commission cannot balance its accounts." Mr. W. J. P. Webber, general secretary of the T.S.S.A., also strongly criticized the Tribunal's refusal to recommend the granting of a wages claim which, he alleged, it had admitted to be justified. He pointed out that the unions had warned the Commission at the time that the £250,000,000 granted in 1956 was "too little," and had also dissented from the Commission's declaration to the Government that the railways did not want a subsidy of any kind. Mr. Albert Hallworth, general secretary of ASLEF, announced on April 11 that his executive also were "disgusted" at the award, and that he would meet leaders of the N.U.R. and T.S.S.A. to plan joint action by the railway unions.

Discussions between Sir Brian Robertson (chairman of the B.T.C.) and leaders of the three railway unions began on April 16, and on the following day Sir Brian undertook to suggest to Mr. Watkinson (Minister of Transport) that it would help if he and other interested Ministers would see the parties to the dispute before discussions were resumed. On April 18 it was announced that Mr. Macmillan had agreed to discuss the position with representatives of the railway unions and the B.T.C. on April 22. After the meeting on that date the following statement was issued from 10, Downing Street:

"There was a full and frank exchange of views on the situation in regard to the railway pay claim in the light of the findings of the Railway Arbitration Tribunal and of subsequent discussions between the Commission and the unions.

"The representatives of the trade unions urged that the Government should provide additional financial facilities to the Commission in order to make possible an immediate increase in salaries and wages.

"The chairman of the B.T.C. outlined the action already being taken by the Commission for effecting substantial improvements in the net revenue position, and said that further steps of a similar nature were being investigated. These included closing down unremunerative services and a thorough survey of their services with a view to further action of this kind.

"The chairman said that the co-operation of the unions would be sought in the measures proposed above. Even taking account of the above, the Commission's financial position would not justify at present an increase in railway wages and salaries. Nevertheless, the purpose of the Commission was to provide sufficient assurance of an improvement in the Commission's position to enable them to agree with the unions on a date by which railway wages and salaries could be reviewed. With that end in view, he had prepared certain proposals in relation to the railway modernization programme and other matters.

"The Prime Minister, in reply, said that the Government had held consistently to the view that arbitration awards should be accepted. They noted that . . . the Tribunal had said that the evidence before them showed that the basic rates of staff covered by the present claims were low in comparison with those . . . applying in other nationalized industries, public services, and certain private undertakings. The way out of the difficulty was not by subsidy but by a concerted effort to increase efficiency and productivity. The surest road to this was the great modernization programme on which the Commission had embarked, and a more intense programme for pruning the railway services by reducing or cutting out uneconomic services.

"He therefore made the following proposal: Provided that the British Transport Commission, together with the three railway unions, were prepared to effect the maximum economy in operation and to join in ensuring the most efficient use of manpower, the Government were prepared to re-examine at once the programme of modernization and to give any necessary support to the reductions in uneconomic services, as well as to consider other points put forward by the chairman of the Commission. The benefits from this should accrue in steadily increased standards of living for all those who worked on the railways, as well as in a better service to the public.

"The representatives of the British Transport Commission and of the railway unions thanked the Prime Minister for his reply, which they would consider together at an early meeting."

The text was published on May 6 of correspondence between Sir Brian Robertson and Mr. Watkinson, in which Sir Brian set out the Commission's economy and modernization proposals and Mr. Watkinson announced that the Government would authorize an additional investment of £25,000,000 over 1958 and 1959 to enable the Commission to carry out certain modernization measures submitted by it. The correspondence is summarized below:

Sir Brian Robertson to Mr. Watkinson.

Since there was at present "no scope for obtaining a large increase in receipts by raising fares and charges," the Commission did not contemplate any general increases in the near future. This did not, however, preclude (*a*) action by the Commission under the Freight Charges Scheme to improve its receipts from selected traffic; (*b*) limited increases in passenger fares on certain services. In connexion with (*b*) the Commission proposed to apply to the Transport Tribunal for an increase in its charging powers, but no increase in fares could in any event be made for four to five months.

No offer to improve wages and salaries would be possible in 1958 without "substantial reductions" in the working expenses of British Railways, whose receipts during the past six months had been "below expectations," mainly owing to the slowing-down in the general rate of economic activity. The Commission therefore proposed the following measures, *inter alia*:

(1) Drastic reduction of train mileage, including adjustments in freight services to correspond to the level of freight traffic, as well as reductions in passenger services, including certain express services and winter services.

(2) The scrapping of 100,000 freight wagons during the year, to reduce the size of the repair bill.

(3) Reduction of maintenance expenditure on buildings, rolling stock, etc., wherever this could be done without detriment to safety and good service.

(4) Elimination of unremunerative services, probably including the withdrawal of services over 30 lines, involving a total net saving of over £500,000 a year.

(5) Reduction of shipping services, including the suspension of the Newhaven-Dieppe passenger service during the winter and reductions in other services.

(6) Substantial further reductions in manpower, already cut by about 6,000 since March 1957.

Sir Brian added that he was sure that the railway unions, which had already given the Prime Minister "explicit assurances of their willingness to support measures for the improvement of efficiency and productivity in British Railways," would be ready to co-operate with the Commission in these proposals.

Mr. Watkinson to Sir Brian Robertson.

The Minister recalled that in connexion with the Government's action, taken in September 1957, to restrain inflation and control the level of public investment [see 15770 A], the Commission's investment programmes for 1958 and 1959 had been limited to £170,000,000 and £175,000,000 respectively. Since then, however, the railways had been able to show that they could accelerate the pace of modernization, particularly in 1960 and 1961; as a result, the phasing of the plan had been under study by the Commission, the Ministry of Transport, and the Treasury for some time. Following the Prime Minister's meeting with representatives of the Commission and the unions on April 22, a further study had been made by the Government and the Commission, and had shown that immediate selective increases in capital investment could make an improvement in the Commission's net revenue which would begin to accrue in 12 months. Mr. Watkinson further recalled that Sir Brian had submitted the following proposals, which were likely to yield a quick return:

(1) Allocation of £7,000,000 to avoid any slowing-down in the programmes of works and new plant in 1958 and 1959.

(2) Allocation of £6,000,000 for diesel locomotives and multiple-unit trains.

(3) Allocation of £12,000,000 for such projects as modernization of goods depots, provision of facilities for diesels, improvement of signalling systems, and expansion of automatic train control.

On the understanding that the unions would play their full part in ensuring the success of these measures, the Government were prepared (*a*) to authorize, within the total public sector programme envisaged in September 1957, an additional investment of £25,000,000 for the railways over the two years 1958 and 1959 to enable the Commission to accelerate the implementation of these measures; (*b*) to consider how far it might be practicable to provide for more rapid completion of the modernization programme in 1960 and subsequent years.

Mr. Watkinson added that the Government would examine on their merits, and as a separate matter, proposals put forward by the Commission for relieving the railways of certain inherited obligations (e.g. in respect of road bridges and level-crossings). It was also prepared to support the proposals for withdrawing or reducing certain unremunerative services.

Further talks between the Commission and leaders of the three railway unions broke down on May 7, following Sir Brian Robertson's refusal to agree to the unions' demand for an immediate rise of four per cent in all wages and salaries. In view of the gravity of the situation, and the railwaymen's threat of strike action, Mr. Macleod, the Minister of Labour (who had not previously taken a direct part in the negotiations) invited the parties to meet him on May 9 at the Ministry of Labour. After hearing arguments from both sides he promised to consult his Cabinet colleagues, and consultations between the Prime Minister, Mr. Watkinson, Mr. Macleod, and Mr. Butler accordingly took place at Downing Street on May 11.

On May 13 Sir Brian Robertson met the union leaders and made them a definite offer of a three per cent increase from the pay-week starting on June 30, 1958, coupled with a promise of an inquiry (either by an independent tribunal or otherwise) into the whole structure of railway wages and salaries at a later date. Sir Brian's offer was accepted by a delegate conference of ASLEF on May 14, by the T.S.S.A. executive on the same day, and by the N.U.R. executive (by 17 votes to six) on May 15.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Wage Increases, 15735 A; Rail Modernization Plans, 15438 A.)**

A. UNITED NATIONS. — Secretariat Changes.

It was announced at U.N. Headquarters on May 16 that the Secretary-General (Dr. Hammarskjöld) would assume personal direction of disarmament questions in the U.N. Secretariat, and that Mr. T. G. Narayanan would serve as his personal assistant in this connexion. Mr. Narayanan (an Indian) had been Director of the Security Council and Committee Services Division of the Department of Political Affairs since 1955. Other staff changes were announced as follows:

(*a*) Dr. Dragoslav Protitch (a Yugoslav, hitherto Under-Secretary for Political and Security Council Affairs) would become Under-Secretary for the Department of Trusteeship and Information from Non-Self-Governing Territories in succession to Señor Benjamin A. Cohen (Chile), retiring.

(*b*) M. Anatoly Dobrynin (a Soviet citizen, hitherto one of the two Under-Secretaries without portfolio) would succeed Dr. Protitch as Under-Secretary for Political and Security Council Affairs.

(*c*) Dr. Ralph J. Bunche (a U.S. citizen, hitherto the other Under-Secretary without portfolio) and Sir Humphrey Trevelyan (a U.K. citizen, hitherto Under-Secretary dealing with political questions specially assigned to him) would become joint Under-Secretaries for Special Political Affairs. Dr. Bunche would be responsible *inter alia* for questions concerning the peaceful uses of atomic energy and the U.N. Emergency Force, while Sir Humphrey would have special assignments in the political field and would also be responsible for the Divisions of Human Rights and of Narcotic Drugs.

(*d*) Mr. Geoffrey S. Murray (a Canadian) would join the Secretariat as director in the Department of Political and Security Council Affairs, serving as deputy to Mr. Dobrynin.

(*e*) Colonel Alfred G. Katzin (a South African, hitherto Deputy Under-Secretary) would become a special assistant to the Secretary-General on special assignments, with responsibilities for Headquarters development projects.

(*f*) Mr. Martin Hill (a U.K. citizen, hitherto Deputy Under-Secretary in the Department of Economic and Social Affairs) would become a deputy to the Under-Secretary in that Department, and Dr. Hammarskjöld's personal representative with the Specialized Agencies.

(*g*) Mr. George Ivan Smith (an Australian, hitherto Director of the U.N. Information Centre in London) would become Director of a new division in the Office of Public Information known as the External Relations Division.

The changes (which take effect on July 1) were made in accordance with recommendations submitted by Dr. Hammarskjöld in November 1957 and subsequently accepted by the 11th session of the United Nations General Assembly.
(U.N. Information Centre, London) **(Prev. rep. 15918 G.)**

A. NEPAL. — Formation of Non-party Government.

King Mahendra of Nepal announced on Feb. 1 his decision to form a Government of "Ministers from political or non-political parties without a Prime Minister." He also stated that, in order to end the country's political instability, he proposed (1) to appoint a commission to draft a new Constitution ; (2) to nominate an Advisory Assembly which would act as a Parliament, pending the holding of general elections ; and (3) to set up a new Electoral Commission. The new Government, which was not completed until May 19, consisted of General Subarna Shumshere (Finance, Planning, and Development) as chairman ; Mr. P. B. Shah (Foreign Affairs and Defence) ; Mr. Randhir Subba (Law, Commerce and Industry, Education, Health, Local Government, and Parliamentary Affairs) ; Mr. C. B. Pande (Transport and Communications) ; Mr. D. R. Regmi (Home Affairs) ; and Mr. B. M. Singh (Forestry, Agriculture, and Canals). Nepal had been without a Cabinet since the resignation of Dr. K. I. Singh on Nov. 14, 1957, the King having been responsible for the administration in the interim period.

The new Government was set up with the support of the three parties comprising the Democratic Front (the Nepali Congress, Nepali National Congress, and *Praja Parishad*) and of the right-wing *Gurkha Parishad*. The Nepalese Congress was represented by General Subarna Shumshere (its leader), the other three parties had one representative each in the Government, and there were two Independents nominated by the King. Dr. Singh's United Democratic Party declined to join the interim Government.

The Democratic Front had launched a civil disobedience campaign on Dec. 7 in support of its demand for the holding of elections within six months, and had broken off discussions with the Electoral Commission because the latter considered this to be impossible. The King announced on Dec. 17 that elections would take place in February 1959, and subsequently accepted the Democratic Front's demand for the dissolution of the Electoral Commission and the formation of a new one.

During the month ending April 12 popular nominations were accepted for the Advisory Assembly. Under this system the population of the 32 districts were required to assemble at their respective district headquarters and to nominate candidates, from whom the King would select the members of the Assembly. It was announced on March 27 that the British Government, at the request of the Nepalese authorities, had commissioned Sir Ivor Jennings (Master of Trinity Hall, Cambridge, and an authority on constitutional matters) to advise on the drafting of a democratic Constitution for Nepal. The Indian and Japanese Governments were also requested to nominate advisers to assist in this task.

Dr. Singh declared at a public meeting on April 26 that he had been compelled to resign by "American intrigues" and "conspiracy by traitors at home." He alleged that a high-ranking Army officer and a member of the King's personal staff had "conspired" with the Americans against him ; that the U.S.A. had "interfered" in the working of the Foreign Ministry ; and that pressure had been brought upon him to accept U.S. aid. These allegations were completely denied by the head of the U.S. Operations Mission in Khatmandu and by the Nepalese Government, which set up a special Tribunal on May 25 to try Dr. Singh on charges of inciting the Army against its commander and of creating bad feeling between Nepal and friendly foreign countries. When Dr. Singh appeared before the tribunal on May 29 he pleaded "not guilty" and denied the charges.

Legislation providing for the preparation of electoral laws on a basis of adult franchise, with secret ballot, was promulgated by King Mahendra on June 3.—(The Statesman, Calcutta - Times - Daily Telegraph) **(Prev. rep. 15905 A.)**

B. EASTERN GERMANY. — Food Rationing ended.

The immediate ending of food rationing in Eastern Germany was announced on May 28 by the Prime Minister, Herr Grotewohl, and approved on the same day by the *Volkskammer*. The commodities affected were fats, meat, and sugar, all of which had been rationed in Eastern Germany since 1939—i.e. for 19 years. [Food rationing was abolished in Western Germany in 1950.] Single prices were fixed for the de-rationed commodities, which were previously sold at two prices in the State shops—a relatively low price aided by State subsidies, and an off-the-ration price which was ten times higher.

Wage increases for some 3,000,000 lower-paid workers were announced to compensate for the higher prices of the de-rationed commodities, which were fixed at levels between the previous "subsidy" rate and the off-ration rate, and which are considerably above those prevailing in Western Germany. (Frankfurter Allgemeine Zeitung)

C. KASHMIR. — Re-arrest of Sheikh Abdullah. - Pakistani Protest to Security Council.

Sheikh Abdullah, the former Chief Minister of Kashmir, was re-arrested at his home at Sowra (a village near Srinagar) during the night of April 29-30, less than four months after his release from a four-year period of detention [see 15980 B]. He was taken to Kud prison, Jammu, where he had been detained previously. Kashapa Bandhu, a close associate of Sheikh Abdullah, and a certain Soofi Mohiuddin were also arrested at the same time.

The Kashmir Inspector-General of Police (Mr. Mehra) stated on April 30 that Sheikh Abdullah had been re-arrested under the Preventive Detention Act as his activities since his release had been considered a danger to the security of the State.

A Kashmir Government spokesman said that Sheikh Abdullah had "in his public utterances tried to arouse the passions of the people so as to create conditions of disorder and lawlessness designed to supplement the efforts of the Pakistan authorities to cause large-scale disorder by means of acts of violence, arson and sabotage . . ." The Sheikh had become "the spearhead of subversive elements" ; had "openly denounced the Constitution and the State's relationship with India in order to undermine the authority of the Government" ; and had "unleashed a campaign of hatred and vilification against other political parties" and "incited his supporters to acts of hooliganism and violence," leading to violent incidents in one of which 30 people had been seriously injured and one man had lost his life. Although he had refrained from making public speeches, he had used religious meetings for "injecting religious frenzy" and was obviously "seeking an opportune time to strike against the lawful authority for the fulfilment of his objectives."

Bakshi Ghulam Mohammed, the Chief Minister of Kashmir, claimed on May 5 that there was ample evidence to prove the Sheikh's "treasonable activities" in a court of law, but said that the Government had no intention of bringing him to trial as this would "provide a platform for propaganda by Pakistan and other anti-Indian forces." He reiterated a charge that the Sheikh had been receiving funds from Pakistan and distributing uniforms to a private force of volunteers.

Pakistan's permanent representative at the U.N. (Prince Aly Khan) sent a letter to the Security Council on May 6 describing the re-arrest of Sheikh Abdullah as "the most recent instance of the reign of terror in Indian-occupied Kashmir," and denying that the Sheikh was "planning large-scale disorders and subversion."

Prince Aly Khan said that the Sheikh had been arrested under a section of the Kashmir Security Act which required no trial, adding that this was "conclusive proof of the fact that the puppet Bakshi Government was unable to substantiate its allegations with any evidence which could be sustained in a court of law." After alleging that a previous visit by Bakshi Ghulam Mohammed to Delhi warranted the inference that the Sheikh had been re-arrested "with the approval of the Government of India," Prince Aly Khan said that the "real reasons" were the Sheikh's "refusal to drop his demand for a fair and impartial plebiscite" ; "his acknowledged popularity with the Kashmir masses" ; "his open denunciation of repressive measures adopted by the Bakshi regime" ; the failure of the Bakshi Government "to find any plausible excuse to bring him to trial under ordinary law" ; and "the danger of exposure by tourists during the tourist season of the real happenings inside Indian-held Kashmir."

A similar protest at the re-arrest of Sheikh Abdullah was made by the Prime Minister of Pakistan (Mr. Firoz Khan Noon) on May 4. Mr. Noon said that the Sheikh's "only sin" was that he had "continued to demand the implementation of the Security Council's resolutions providing for the unfettered exercise [by the Kashmiri people] of their right to self-determination, to which both India and Pakistan are committed."—(The Statesman, Calcutta - The Hindu, Madras - Indian and Pakistani High Commissioners' Offices, London - Times - U.N. Information Centre, London)

D. CANADA - UNITED KINGDOM. — Creation of Bank of London and Montreal for Caribbean Area.

It was announced on May 7 that the Bank of London and South America and the Bank of Montreal had agreed to establish a new bank—the Bank of London and Montreal—to develop financial and banking operations in the Caribbean area as a joint Anglo-Canadian venture. The new bank will be jointly and equally owned by the Bank of London and South America and the Bank of Montreal—the former contributing its 14 existing branches in the Caribbean, with their staffs and managements, and the latter putting in the dollar capital, which is expected to total Can.$20,000,000.

(Economist - Financial Times) **(Prev. rep. 16112 D.)**

A. UNITED KINGDOM. — Appointment and Report of Bank Rate Tribunal. - Parliamentary Debate.

The report of a Tribunal appointed " to inquire into allegations of improper disclosure of information relating to the raising of the Bank rate " was published on Jan. 21, 1958, as a White Paper (Cmnd. 350). The events preceding the Tribunal's appointment on Nov. 14, 1957, are summarized below.

On Sept. 24, 1957, Mr. Harold Wilson, M.P. (Labour), wrote to Mr. Enoch Powell (Financial Secretary to the Treasury) asking the Government to institute an inquiry into an alleged leakage of its intention to raise the Bank rate on Sept. 19 [see 15770 A]. In support of his request, Mr. Wilson referred to " very disquieting reports in a number of responsible newspapers and City circles " that there had been considerable selling in the gilt-edged market on Sept. 18-19 as a result of advance information. He added : " It is particularly important that the public should be reassured about the allegation that advance information was given to the Press on Wednesday [i.e. September 18]."

Following consultations with the Prime Minister, Mr. Powell stated in his reply to Mr. Wilson (Sept. 26) that the Government saw no ground for an inquiry since " careful investigation " had disclosed no evidence of any leakage. Mr. Powell also stated that the Press had not been informed in advance of the Government's intention to raise the Bank rate, and that " neither the chairman of the Stock Exchange nor the Stock Exchange Council have had any representations from their members suggesting irregularities."

On Oct. 4 Mr. Wilson again wrote to Mr. Powell saying that " both in the Press and the City there is widespread concern and more than a suspicion that an improper leakage took place and that the Government have something to hide." Mr. Wilson also claimed that he had received *prima facie* evidence " suggesting that the leak emanated from a political source," and expressed his willingness to arrange that this evidence should be placed before " any tribunal the Prime Minister may appoint."

Replying to Mr. Wilson on Mr. Powell's behalf on the same date, Mr. Macmillan said that if Mr. Wilson were prepared to make the new evidence available to him he would refer it to the Lord Chancellor, who would report on whether it afforded sufficient ground for further investigation.

Mr. Wilson, accompanied by Mr. James Griffiths (deputy Leader of the Opposition) called at 10, Downing Street on Oct. 7 to discuss the matter with Mr. Macmillan and the Lord Chancellor, Viscount Kilmuir. It was stated in the Press that, contrary to expectation, Mr. Wilson had not submitted any evidence to Mr. Macmillan, but that the discussion had been confined entirely to the question of what procedure should be adopted for the assessment of the evidence. The Labour Party representatives had apparently suggested that " some independent person " should carry out the investigation, while Mr. Macmillan had adhered to his earlier proposal that the Lord Chancellor should do so.

A further meeting took place on Oct. 9 between the Lord Chancellor, Mr. Gaitskell (Leader of the Opposition), and Mr. Wilson. It was announced afterwards that the Labour Party representatives had placed " certain information " before Viscount Kilmuir and that " the Lord Chancellor is considering this information and will report to the Prime Minister in due course."

Mr. Macmillan informed Mr. Gaitskell on Oct. 22 that after investigations involving interviews with 26 persons, Lord Kilmuir had reached the conclusion that there were no grounds for instituting a formal inquiry. As a result, he (Mr. Macmillan) did not propose to proceed further in the matter. In his letter Mr. Macmillan gave some details of the evidence which had been submitted by Mr. Wilson.

" The first two points [the letter stated] concerned reports of conversations which took place after the announcement of the increase in Bank Rate—one between a junior employee aged 18 of the Conservative Central Office and a Government official, and the other between two Government officials. These reports appeared to suggest that the Conservative Central Office employee in the one case, and one of the officials in the other, knew beforehand that Bank Rate was to be increased. After careful inquiry the Lord Chancellor has satisfied himself that neither of the persons concerned in these incidents had or could have had any advance information that Bank Rate was to be increased. He has equally satisfied himself that no such information was available either to the Conservative Central Office or to the Ministry in which the official is employed.

" Mr. Wilson also referred in his memorandum to certain misgivings about the possibility that information on Bank Rate had been given to the Press. In particular, he referred to reports that a certain journalist had been recalled to London by his headquarters at the crucial time. The Lord Chancellor is satisfied that these misgivings are groundless and he found no evidence that the recall of the journalist was in any way connected with any leakage of information."

Mr. Gaitskell, in a statement issued on the same date as the Prime Minister's letter, said that while the Opposition had eventually agreed to an investigation by the Lord Chancellor, it nevertheless maintained that it should have been conducted by an " independent judicial person." The fact that Lord Kilmuir had had no power to send for papers or take evidence on oath " inevitably reduced " the value of his inquiry. Mr. Gaitskell added :

" Moreover, there appears to have been no investigation into the question why certain individuals in the City were led, late on the Wednesday afternoon [Sept. 18], to make heavy sales of gilt-edged stocks. Whether there was or was not any direct leak of information about the Bank Rate itself, we know beyond any shadow of doubt that certain circles in the City as well as certain people in the Press were aware on the Wednesday afternoon that the Chancellor of the Exchequer was going to make a very grave statement on the Thursday morning [Sept. 19] which would ' put the screws on ' and intensify the credit squeeze. It seems to us highly questionable whether such advance information should have been made available to any outside person on a Wednesday, the day before an announcement on Bank Rate. Any worthwhile investigation should begin from the records of the firms concerned and involve disclosure of the nature and sources of information which led to the dealings."

In conclusion, Mr. Gaitskell said that the Opposition still believed that a full inquiry should have been held.

The matter was carried a stage further on Nov. 12 when Sir Leslie Plummer (Lab.) asked the Chancellor of the Exchequer (then Mr. Thorneycroft) to what persons outside Government service he had authorized the communication on Sept. 18 of any measures to be taken by him on Sept. 19 ; and whether he would state the names of members or ex-members of both Houses of Parliament (other than members of the Government) who were seen on any official business connected with the Treasury, or were briefed by him or his representatives on Sept. 18.

Mr. Thorneycroft stated in reply that there was no leakage of the increase in Bank Rate ; that there was no brief about the Bank Rate ; and that it would be quite inappropriate for him to state whom he saw, or for what purpose, on Sept. 18 or any other date.

Sir Leslie Plummer then inquired whether or not prior information of the Chancellor's intentions had been given to Mr. Oliver Poole [deputy chairman of the Conservative Party]. Mr. Thorneycroft replied that " prior information about Bank Rate was given to no-one who was not inside my department or among my own advisers." When Mr. Harold Wilson urged the Chancellor to state specifically whether he or any Treasury representative had seen Mr. Poole, " who has vast City interests," on Sept. 18, Mr. Thorneycroft declined to do so.

Mr. Macmillan announced on Nov. 13 that he had decided that Mr. Thorneycroft and Mr. Poole (who had both made strong representations to him on the matter) should be given an opportunity, before a tribunal of inquiry, " to rebut the attacks made on them " on Nov. 12 ; a resolution for this purpose would be moved in both Houses of Parliament.

In declining to give certain information (Mr. Macmillan stated), Mr. Thorneycroft had taken the view " that it would be contrary to precedent and damaging to the conduct of public business to disclose the confidential discussions which are frequently held in advance of an announcement of Government policy." However, in view of the interpretation which had been placed on his (the Chancellor's) replies, it had now been decided to give this information.

Continuing, Mr. Macmillan said that in a series of separate interviews on Sept. 18 Mr. Thorneycroft, Mr. Macleod (Minister of Labour), and Lord Mills (Minister of Power) had informed a number of " interested persons "—representatives of certain of the nationalized industries, of the T.U.C., of the employers' organizations, and of certain newspapers, as well as Mr. Poole in his capacity as deputy chairman of the Conservative Party—of a number of important economic measures to be publicly announced on the following day. At none of these interviews had there been any disclosure of the intention to raise the Bank Rate.

The request for the appointment of a judicial inquiry in order to clear his name had been made by Mr. Oliver Poole in a letter to the Prime Minister on Nov. 13, 1957.

In this letter Mr. Poole emphasized that he had received no prior information of the increase in Bank Rate and that " I neither made nor caused to be made any sales of Government or other securities " between the time when he saw the Chancellor on Sept. 18 and the time of the public announcement of the change in Bank Rate.

Mr. Macmillan accordingly moved the following motion in the House of Commons on Nov. 14, an identical motion being moved by Lord Home in the House of Lords: "That it is expedient that a tribunal be established for inquiry into a definite matter of urgent public importance, that is to say, whether there is any justification for allegations that information about the raising of the Bank Rate was improperly disclosed to any person and whether, if there was any such disclosure, any use was made of such information for the purpose of private gain."

In the course of his speech the Prime Minister explained that the proposed tribunal would be set up under the Tribunals of Inquiry (Evidence) Act of 1921, and that its powers in the matter of attendance of witnesses and production of documents would be the same as those of the High Court.

After the motion had been agreed to in both Houses, the Home Secretary (Mr. Butler) announced that the tribunal would consist of Lord Justice Parker as chairman, Mr. Edward Milner Holland, Q.C., and Mr. Geoffrey Veale, Q.C. Sir Hubert Parker has been a Lord Justice of Appeal since 1954 and was a member of the Franks Committee on administrative tribunals [see 16009 A, 14536 B]. Mr. Milner Holland, a former chairman of the General Council of the Bar, has been Attorney-General of the Duchy of Lancaster since 1951. Mr. Veale is Recorder of Leeds.

The Tribunal's Hearings.

At a preliminary sitting of the Tribunal on Nov. 21, 1957, Lord Justice Parker announced that the Attorney-General (Sir Reginald Manningham-Buller) and counsel acting with him would appear before the Tribunal and that their duties would be to present all relevant documents and evidence and to call and cross-examine witnesses. Sir Reginald Manningham-Buller stated that it was the "clearly recognized duty" of the Attorney-General to appear before such a tribunal, and that this had been the case in all previous inquiries held under the 1921 Act. He added that he would discharge this task "without any regard to any political considerations of any kind."

The Tribunal held its hearings (in public) at Church House, Westminster, from Dec. 2 to Dec. 20, 1957. In the course of the proceedings the Tribunal heard evidence on oath from 132 witnesses, considered a statutory declaration from one witness resident in Hongkong, and also considered written statements from 236 other persons.

The principal witnesses were: Sir William Haley, editor of the *Times*; Lord Drogheda, managing director of the *Financial Times*; Mr. Richard Fry, financial editor of the *Manchester Guardian*; Mr. Donald McLachlan, deputy editor of the *Daily Telegraph*; Mr. Paul Bareau, deputy city editor of the *News Chronicle*; Mr. Donald Tyerman, editor of the *Economist*; Mr. Frederick Ellis, city editor of the *Daily Express*; Mr. Francis Whitmore, city editor of the *Daily Telegraph*; Mr. Sidney Gampell, of Reuter's; Mr. Nigel Birch, then Economic Secretary to the Treasury; Miss Susan Chataway, a junior employee at the Conservative Central Office; Sir Leslie Plummer, M.P.; Mr. J. C. Pumphrey, a Foreign Office official; Mr. J. McIntosh, principal information officer at the Ministry of Labour; Sir John Braithwaite, chairman of the London Stock Exchange; Mr. William Mullens, the Government broker; Mr. J. H. Keswick, a director of Matheson and Co., the finance and merchanting house; Mr. W. J. Keswick (brother of the above), a director of the Bank of England and also of Matheson and Co.; Mr. Oliver Poole; Lord Bicester, a director of the Bank of England; Lord Kindersley, a director of the Bank of England, chairman of Lazard Bros. (the merchant bankers), and Governor of the Royal Exchange Assurance; Mr. Cameron Cobbold, Governor of the Bank of England; Mr. Humphrey Mynors, Deputy Governor of the Bank of England; Lord Mills, the Minister of Power; Mr. Harold Wilson, M.P.; Mrs. Dorothy Campbell; Mr. Macleod, Minister of Labour; and Mr. Thorneycroft, then Chancellor of the Exchequer.

The Tribunal's Report.

In its report—published on Jan. 21, 1958 as stated above—the Tribunal came to the unanimous conclusion that there was "no justification for allegations that information about the raising of the Bank Rate was improperly disclosed to any person." The detailed findings of the Tribunal are summarized below under the cross-headings used in the report.

Constitution and Procedure.

In a preliminary section on Constitution and Procedure, the report stated that the Tribunal had not thought it right to limit its inquiries strictly to the two questions enunciated in its terms of reference [see above], but had also considered "to what extent there was any prior disclosure [of the other financial measures announced on Sept. 19] and whether any information in regard thereto was used for the purpose of private gain." It added: "The further question whether, and if so, in what circumstances prior disclosure of intended Government measures to persons outside the Government and Civil Service may properly be made is of course a question for Parliament alone."

The report also stated that, at the request of the Treasury Solicitor, the Council of the Stock Exchange had caused to be prepared: (i) lists of sales and purchases of gilt-edged securities (limited to dealings of over £5,000 nominal) on Sept. 18 and the morning of Sept. 19 up to the time of the Bank Rate announcement; and (ii) a document showing the turnover in gilt-edged securities of the leading jobbers on Sept. 18 and the morning of Sept. 19, the turnover on other days between Aug. 22 and Oct. 3, 1957 (inclusive), and the turnover on Feb. 15, 1956 and Feb. 6, 1957—days preceding earlier changes in the Bank Rate.

Introduction.

The introductory section of the report gave a detailed account of the steps leading to the decision to increase the Bank Rate on Sept. 19, 1957. It noted that the other restrictive financial measures announced on that date "had been under consideration by Ministers for some time before any proposal to raise the Bank Rate had been made." It was pointed out in this connexion (*a*) that a statement announcing these measures had been in draft for some days prior to Sept. 19; and (*b*) that a final paragraph relating to the increase in Bank Rate was not added until the night of Sept. 18 or the morning of September 19.

Interviews with Ministers.

On Sept. 18 the then Chancellor of the Exchequer, Mr. Thorneycroft, had decided that it was essential to obtain "maximum support" for the financial measures (other than the Bank Rate increase) to be announced on the following day, and that accordingly "some advance explanation should be given to the Press and to those immediately affected." The Chancellor felt (the report continued) that failure to do this might have imperilled the whole operation and gravely weakened his position at the impending meeting of the International Monetary Fund in Washington. It was decided, however, that the Chancellor should share the duty in question with the Minister of Labour (Mr. Macleod) and the Minister of Power (Lord Mills). As a result:

(*a*) The Chancellor himself had seen Lord Drogheda, Sir William Haley, Mr. Oliver Poole, Mr. H. Fraser (Joint Director of the Research Department of the Conservative Central Office), Mr. D. Dear (Head of the Economic Section of the Research Department of the Conservative Central Office), Mr. Donald Tyerman, Mr. Paul Bareau, Mr. D. McLachlan, Mr. Sidney Gampell, Mr. Richard Fry, and Sir Norman Kipping, chairman of the Federation of British Industries.

(*b*) Mr. Macleod had seen the representatives of the T.U.C. (Sir Vincent Tewson, Sir Tom Williamson and Mr. T. Yates) and those of the British Employers' Confederation (Sir Colin Anderson and Mr. Pollock).

(*c*) Lord Mills had seen Lord Citrine, Sir Henry Jones, and Sir James Bowman, the respective chairmen of the Central Electricity Authority, the Gas Council, and the National Coal Board.

The report then dealt with those persons seen by the Ministers, divided into four groups.

Press Representatives. The Tribunal found (i) that although the Chancellor discussed the restrictive financial measures with the Press representatives in confidence "he did not discuss with, disclose to, or give them, either directly or indirectly, any information whatsoever about the proposed increase in the Bank Rate"; (ii) "that no unauthorized disclosure was made by any of these persons of the information as to the restrictive financial measures"; (iii) that "no use was made of the information for the purpose of private gain."

The report discussed in greater detail the cases of three of the newspapers whose representatives had seen the Chancellor, as follows:

(*a*) On Sept. 18 Mr. F. Whitmore (City Editor of the *Daily Telegraph*), had independently come to the conclusion that a statement of new Government measures was likely, and that these might comprise a higher Bank Rate. He had alluded to the latter possibility in an article appearing on Sept. 19. The report continued: "Subsequently to the increase in the Bank Rate, this statement was widely regarded as an indication of prior knowledge by the *Daily Telegraph*, and for this Mr. Whitmore has only himself to blame, because on the following day he elevated his casual reference to the possibility of a higher Bank Rate into an exclusive forecast. In fact this article was no more than an attempt by him to canvass the possible steps which the Chancellor might take before he left for Washington. Mr. Whitmore had no prior knowledge of any increase in the Bank Rate, and he had no communication direct or indirect with Mr. McLachlan [who also saw the Chancellor] prior to the publication of either of these articles."

(*b*) The later editions of the *Financial Times* for Sept. 19 had carried an article by the editor, Mr. Newton, concerning the possibility of new restrictive financial measures. From the evidence presented, however, the Tribunal found that "although Mr. Newton knew of the interview between the Chancellor and the Earl of Drogheda, the article did not result from this knowledge." Moreover, Mr. Newton had understood, as the result of a conversation between his newspaper's political correspondent and a Treasury official, that there was no official objection to the publication of the article in question.

(*c*) Following his interview with the Chancellor on Sept. 18, Mr. Bareau of the *News Chronicle* left for Southport to attend the Liberal Party Conference. On the following morning, on learning of the Bank Rate increase, he intervened in the conference to give this news. The report stated: "We are satisfied that this was the

first intimation that Mr. Barcau or the Conference had of an increase in the Bank Rate. It follows that there is no justification for the allegation to which attention was called in Mr. Harold Wilson's memorandum to the Lord Chancellor [on Oct. 9] that certain individuals at the Liberal Party Conference at Southport, including a prominent journalist, knew of the Bank Rate decision before the announcement."

Representatives of Conservative Party. At the conclusion of their interview with the Chancellor on Sept. 18, the representatives of the Conservative Central Office—Mr. Poole, Mr. Fraser, and Mr Dear—had asked whether they might have a document setting out the measures which the Chancellor had described. The Chancellor had accordingly instructed his Principal Private Secretary (Mr. Maude) to give them a copy of the statement to be made on the following day, but to remove the final paragraph on the second page relating to the Bank Rate increase. Mr. Maude had "carefully cut off" the paragraph in question and "then handed the document to Mr. Poole, who had passed it on to Mr. Dear." The report went on: "We are . . . satisfied that the shortening of this second page did not cause either Mr. Poole or Mr. Dear to suspect that the Chancellor intended to announce any further measures beyond those set out in the document."

Representatives of Industry. The Tribunal found "that none of those interviewed received either directly or indirectly any information as to the proposed increase in the Bank Rate, and that they treated any prior information as to the restrictive financial measures as confidential and did not use it for the purpose of private gain."

Other Persons. "We think it right to say," the Tribunal declared, "that there is no suggestion and no shred of evidence that Professor Sayers, Professor Robbins, Mr. Robarts, and Sir Oliver Franks [all of whom the Chancellor had consulted in connection with the proposed restrictive measures] disclosed any information they had obtained . . ." [Professors Sayers and Robbins are eminent economists; Mr. Robarts and Sir Oliver Franks are respectively chairman and vice-chairman of the Committee of London Clearing Bankers.]

The City.

This part of the report comprised the following sections:

General. Reviewing the situation in the gilt-edged market in the week beginning Sept. 16, the report noted a number of reasons why a weakening of the market on the afternoon of Sept. 18 was extremely likely. These were: (i) that the Chancellor was generally expected to announce new restrictive measures on the eve of his visit to Washington; (ii) that there had been severe external pressure on the pound for some time; (iii) that the gold and dollar reserves had been very seriously reduced by the end of August, this trend having become even more marked in September; (iv) that an upward revaluation of the [German] Deutschemark was expected in some quarters; and (v) that since there had been a bull market at the beginning of the week, a reaction was to be expected in the ordinary course of events.

The report went on: "During Sept. 18 some £16,500,000 nominal of gilt-edged securities were sold and £14,000,000 bought. We have received figures as to the volume of sales and purchases on other comparable occasions, and there is nothing unusual in the figures for the 18th. If anything, they were somewhat lower than average. The volume of sales on the morning of the 19th was small." The report therefore concluded that "there was no evidence that the fall in prices was due to any general leakage of information about the impending rise in the Bank Rate" and that "indeed, in the light of all the circumstances, we are surprised that selling was not heavier."

Lord Kindersley. The Tribunal reviewed Lord Kindersley's position under four heads, as follows:

(*a*) The report noted that it was the policy of Lazard Bros. (of which Lord Kindersley is chairman) to maintain a liquidity ratio of between 40 and 50 per cent, and when the figure came near to 40 per cent to take steps to increase the call money. When the figure had fallen to 40.72 per cent on Sept. 13, the Managing Directors had decided in principle to sell some gilt-edged securities. Accordingly, some £1,500,000 nominal had been sold on Sept. 17 and 18. On the other hand, of a further £500,000 which it had been intended to sell, only £50,000 had in fact been disposed of, since the best price offered was 96⅛ (as against 96⅜, the price which the director in charge of the operation considered proper).

The Tribunal was satisfied, however, that although he had participated in the decision in principle on Sept. 13, Lord Kindersley had not been consulted as to the amount and nature of the securities to be sold. In this connexion the report said that it had been established that at a time of financial crisis "the Managing Directors try to avoid embarrassing Lord Kindersley by discussing with him matters upon which he might have special knowledge in his capacity as a director of the Bank of England," and that similarly "Lord Kindersley, when he has any such special knowledge, avoids discussing financial questions with his business associates."

The report then noted that on Sept. 23 and 24 Lazards had purchased £750,000 nominal of gilt-edged securities at the lower prices then ruling. It went on: "It has been said that as a result of the repurchase . . . Lazards made a profit of over £30,000. It is true that the difference between the sale and repurchase prices produces a figure of this order. We cannot, however, draw any sinister inference from this fact. Had Lazards any prior knowledge, they would no doubt have sold more gilt-edged securities and thus have reduced the overall loss which they undoubtedly suffered on their gilt-edged portfolio. Not only did they not do this, but they refused to accept a price for £450,000 of the Exchequer 3 per cent Bonds [securities which they had intended to sell on Sept. 17-18] which was only three-eighths of a point below the price which they had set. When the Bank Rate increase was announced, the price of these bonds fell more than three points. This consideration alone seems to us to establish conclusively that the Managing Directors concerned had no prior knowledge of the impending rise in the Bank Rate."

"We are satisfied" (the report concluded) that "the steps [taken by Lazards] arose out of the necessary requirements of the firm's business" and that "the realization of gilt-edged securities was the only course open to them having regard to the serious fall in the liquidity ratio."

(*b*) On Sept. 18 Mr. Cooper, Investment Secretary of the Royal Exchange Assurance (of which Lord Kindersley is Governor), had become concerned about the Corporation's liquidity as the result of a large number of impending liabilities. When he had attempted to discuss the matter with Lord Kindersley, he had been "interrupted . . . in a way which surprised him and seemed to him discourteous." Mr. Cooper had subsequently formed the view that Lord Kindersley "had deliberately avoided discussing financial matters" at that time, and the Tribunal concluded that this was in fact the case.

At a meeting later on Sept. 18, the Committee of Treasury (which controls the Corporation's finances) had approved a proposal by Mr. Cooper for the sale of securities to the value of fully £500,000. The report went on: "Lord Kindersley, although presiding, did not express a view as to the desirability or otherwise of the course suggested . . . but merely asked whether everybody was agreed." The Tribunal was satisfied (i) "that it was necessary for the Royal Exchange Assurance to sell securities"; (ii) "that to sell gilt-edged securities was a reasonable and proper course to take in all the circumstances"; and (iii) "that these sales did not result from Lord Kindersley's knowledge."

(*c*) At a meeting on Sept. 16 of the Executive Committee of the British Match Corporation (of which Lord Kindersley is chairman) it had been agreed to sell about £375,000 nominal of gilt-edged securities in order to meet an impending requirement of some £457,000. The report continued: "Although Lord Kindersley was present we are satisfied that this decision was neither the result of any discussion of the economic or financial situation of the country nor of any recommendation by him."

(*d*) At a meeting with the Governor of the Bank of England (Mr. Cobbold) on Sept. 16, Lord Kindersley had agreed to support a recommendation which the Governor proposed to make for an immediate increase in Bank Rate by 2 per cent. Later that day, however, he had again seen the Governor in order to put forward the view that the timing of the proposed increase in relation to a big new issue by Vickers Ltd., then in preparation, "might cause considerable ill-feeling in the City and might produce 'indigestion' in the underwriting market." The Governor had told Lord Kindersley that it would be impossible to postpone the Bank Rate increase and probably too late to postpone the new Vickers issue. After some inquiries, Lord Kindersley had found that it was in fact too late to postpone that issue. The report commented: "Lord Kindersley's motives were genuinely disinterested; he was concerned only with possible adverse reactions in the City, and was not in any way affected by the fact that in the ordinary way this issue would be sub-underwritten to some extent by both Lazards and the Royal Exchange Assurance."

The Tribunal's general conclusion as regards Lord Kindersley was that "he conducted himself with complete honesty and propriety during a period when he might at any moment have been placed in an embarrassing position."

Mr. W. J. Keswick. The report stated that Matheson and Co. Ltd. (of which Mr. W. J. Keswick is a director) were the London correspondents of Jardine Matheson and Co. Ltd., Far Eastern merchants operating from Hongkong, and that Jardine Matheson and Co. were General Managers of a number of companies operating in the Far East. On Sept. 18, Matheson's in London had received instructions to sell more than £1,000,000 nominal of gilt-edged securities for the account of Jardine Matheson & Co. and some of its subsidiary companies. Reviewing the circumstances in which these sales took place, the report gave the following facts:

In the summer months of 1957, the managing director of Jardine Matheson & Co., (Mr. H. Barton) had become increasingly concerned about the unstable position of sterling and had formed the view that the Jardine Matheson group should seriously consider realizing either the whole or part of its gilt-edged portfolio. In this connexion Mr. Barton had given instructions on Aug. 16 for the disposal, on behalf of two of the subsidiary companies, of sufficient gilt-edged securities to produce £100,000.

On Sept. 4 Mr. W. J. Keswick had received a letter from Mr. Mynors, Deputy Governor of the Bank of England, stating that conversations had been going on concerning possible remedies for the worsening financial situation and that, while nothing had been decided, an increase in Bank Rate was a possibility.

In letters dated Sept. 3 and Sept. 5, Mr. Barton had written respectively to Mr. W. J. Keswick and his brother, Mr. J. H. Keswick (also a director of Matheson & Co.), suggesting that it might be wise to sell the Jardine Matheson group's gilt-edged securities, and asking for their recommendations.

In a letter to Mr. Barton dated Sept. 16, Mr. W. J. Keswick had "reluctantly" recommended the sale of Jardine Matheson's gilt-edged securities In a complementary telegram drafted on the same day, Mr. W. J. Keswick had told Mr. Barton to "anticipate tighter money" and had therefore advised him to sell the majority of Jardine Matheson's gilt-edged holdings. As he expected Mr. J. H. Keswick to return from his holiday that day, Mr. W. J. Keswick had written a brief note on his draft asking for his brother's opinion. Mr. J. H. Keswick, however, had decided to prolong his holiday, and when he had not reached the office by about noon on Sept. 17, Mr. W. J. Keswick had given instructions for the telegram to be despatched.

Lunching at the Bank of England on Sept. 16, Mr. W. J. Keswick had discussed the financial situation with Mr. Mynors; while there had been no specific mention of Bank Rate, Mr. Mynors had said that there might be a "a swingeing rise in interest rates." The report added, however, that Mr. W. J. Keswick "told us that he deliberately drafted the letter and telegram before he went to the Bank, so that he could be in the position of having committed himself to a recommendation . . . before hearing, as he anticipated he might do, anything at the Bank as to official policy."

On Sept. 17, before Mr. W. J. Keswick's telegram had been received, the Board of Directors of Jardine Matheson and Co. had decided to sell the whole of the company's gilt-edged securities, having a nominal value of £539,384, and one of the subsidiary companies had also decided to sell its gilt-edged holdings of a nominal value of £46,500. Mr. Keswick's telegram had been received and considered when another subsidiary company decided, on Sept. 18, to sell its gilt-edged securities with a nominal value of £300,000.

On Sept. 18 Mr. Barton had telegraphed selling instructions to Mathesons in London in the light of the decisions taken on Sept. 17-18, and the sales had accordingly been carried out between 3.30 p.m. and 4.40 p.m. on that date.

At 4.30 p.m. on Sept. 18 Mr. W. J. Keswick had again seen Mr. Mynors, who had told him that it had been decided to recommend to the Court of Directors on the following day that Bank Rate should be raised to 7 per cent. Mr. W. J. Keswick had at once informed Mr. Mynors of the selling instructions received that day, but Mr. Mynors had advised him not to attempt to cancel the sales.

Reviewing the situation, the Tribunal said that "there can be no doubt that a sinister construction could be placed upon Mr. Keswick's actions." It went on to add, however, that despite the fact that Mr. Barton had stated in evidence that he had interpreted the phrase "tighter money" [in the telegram of Sept. 16] as meaning higher interest rates "we do not think that [the letter and telegram of Sept. 16] either disclose or hint at a rise in the Bank rate" and that it referred "only to tightening of money by credit restriction."

The report's general conclusion as regards Mr. W. J. Keswick was as follows: "In a situation of this nature, where conduct and documents are capable of an innocent or a sinister explanation, the only course is to reach a conclusion upon a dispassionate appraisal of the character and truthfulness of the person whose conduct is under inquiry. We had the advantage of observing Mr. W. J. Keswick under searching cross-examination covering every point in his conduct. Having so observed him, we have unhesitatingly reached the conclusion that he was a witness of truth, and that he behaved with complete honesty and propriety in the difficult and embarrassing situation in which he found himself. He was asked by Mr. Barton for advice, and it was his duty to Jardine Matheson to give advice. The advice he gave was given reluctantly. We are satisfied that even if he had not been a Director of the Bank of England, he would, in the circumstances prevailing at that time, have given the same advice."

Dealings at the Time of Previous Changes in Bank Rate. The Tribunal received statements describing any gilt-edged dealings by Lazards, the Royal Exchange Assurance, the British Match Corporation, and Matheson's on eight previous occasions when the Bank Rate had been changed. It found that there was no evidence to suggest that any of these corporations had any prior knowledge of the earlier changes in Bank Rate.

Mr. Oliver Poole. Mr. Poole (the report noted) was a director of Lazards and of a number of other companies forming part of the so-called Pearson Group. The last meeting which he had attended as a director of Lazards prior to Sept. 19 was in July, 1957, and his last visit to Lazards before Sept. 19 was on Sept. 4, when he had lunched with a Belgian banker.

The Tribunal stated in this connexion: "We are satisfied that Mr. Poole had nothing whatever to do with any of the sales made by Lazards on Sept. 17-18. The only sales of gilt-edged securities made by members of the Pearson Group, other than Lazards, between Sept. 16 and 19 were sales of £2 780 nominal, which were made in order to realise monies required by the Cowdray Trust. We are satisfied that Mr. Poole was not in any way concerned with those sales."

The report said that "there is not a shred of evidence that Mr. Poole made any disclosure either in regard to the Bank Rate or the restrictive financial measures to any person connected with the companies with which he is associated, or that he made use of any such information for the purpose of private gain."

Other Dealings in Gilt-Edged Securities. The report also reviewed the more important of the other gilt-edged dealings on Sept. 18 and the morning of Sept. 19. It found that in no case was there any evidence to suggest that they had resulted from prior knowledge of the Bank Rate increase.

Isolated Incidents suggesting Prior Knowledge.

The principal incidents under this category were as follows:

Miss Susan Chataway. In his memorandum to the Lord Chancellor on Oct. 9, Mr. Harold Wilson said that "a man holding an important public position . . . will state that on Sept. 25 he was told by an employee of the Conservative Central Office that they had known 'about this Bank Rate business' before the announcement . . ." The Tribunal found that the man referred to was Mr. J. L. Pumphrey, a Foreign Office official, and the Conservative Central Office employee a Miss Susan Chataway (Mr. Pumphrey's cousin), who had only joined the Office's Press Department on Sept. 16 and was employed on elementary secretarial work.

In their conversation of Sept. 25 Mr. Pumphrey had joked about his cousin's new job and had suggested that she must have access to a great deal of "inside information." Miss Chataway had replied in a similar vein and "went on, jokingly, to say that the office were expecting the police any day about 'this Bank Rate business.'"

The report stated: "We are quite clear that this claim to prior knowledge was made by Miss Chataway in jest, as part of a conversation begun by Mr. Pumphrey in jest. How he came to take her remarks seriously is difficult to understand."

Mr. Jack McIntosh. On Sept. 20 Mr. Loftus, a reporter on the staff of *Reynolds News*, had overheard a conversation between Mr. McIntosh, Principal Information Officer of the Ministry of Labour, and Mr. L. Goodman, a principal in the Ministry of Housing and Local Government. This incident had given rise to the following passage in Mr. Harold Wilson's memorandum to the Lord Chancellor: "It has also been reported to me, admittedly at second-hand, that a person who can be vouched for, but who may not be willing to come forward, overheard a conversation between a Treasury official and the P.R.O. of a Government Department (not the Treasury) during which the latter categorically stated that he was aware of the forthcoming increase in the Bank Rate, which called forth a very critical observation from the Treasury official, who said he had no right to know such a thing."

The Tribunal found that as a result of this conversation "Mr. Goodman received the impression that Mr. McIntosh was telling him that he had prior knowledge of the increase in Bank Rate," but that this impression "arose out of a misunderstanding." The report added: "We think that Mr. McIntosh only intended to convey that he had received prior information of the restrictive financial measures and was using the phrase 'Bank Rate' loosely and inaccurately to describe these measures. We were, however, surprised that Mr. McIntosh, who realized that Mr. Goodman was taken aback by something he had said, did not appreciate that Mr. Goodman thought he was claiming prior knowledge of the increase in Bank Rate and immediately correct that impression."

Mrs. Dorothy Campbell. At a cocktail party on Sept. 18, Mrs. Campbell had stated that she had heard in the City that afternoon that the Bank Rate was to be increased by 1½ per cent on the following day. Moreover, shortly after the Bank Rate increase was announced. Mrs. Campbell had claimed prior knowledge of the increase in a telephone conversation with a Mr. Fitzgibbon.

The Tribunal found that Mrs. Campbell (who was described as a "most unsatisfactory witness") had not been in the City that afternoon; that she had not been told by anyone that a rise in Bank Rate was to take place; but that "she made what she intended to be a sensational remark in order to draw attention to herself."

Other Possible Sources of Disclosure.

The report stated that there was no evidence whatsoever to suggest that the Ministers of the Crown, directors and officials of the Bank of England, and Treasury officials who necessarily had prior knowledge of the Bank Rate increase and restrictive financial measures, had failed to treat this information as confidential or had made any use of it for private gain.

Final Conclusions.

In summing up its findings, the Tribunal said: "We have unhesitatingly reached the unanimous conclusion that there is no justification for allegations that information about the raising of the Bank Rate was improperly disclosed to any person."

The report continued: "It will be observed that our inquiries into the dealings of companies with which Lord Kindersley and Mr. W. J. Keswick were connected have focussed attention on circumstances in which a Director of the Bank of England, who has other business interests, may find himself in a difficult and embarrassing position. This is particularly so in the case of a Director of the Bank who, like Mr. W. J. Keswick, is the one person to whom his business colleagues look for advice, and where he cannot escape his duty to give such advice. This raises a general and very important question of policy with which we are clearly not concerned. Had it been our duty to express an opinion on this matter, we should, before doing so, have required exhaustive evidence as to the advantages and disadvantages of continuing a state of affairs which has so long existed. The criterion, of course, must be the national interest."

In conclusion, the Tribunal said that it wished to endorse the following observations made by the Governor of the Bank of England in the course of his evidence: "I have been profoundly disturbed by the effect which the rumours about these matters have had around the world. They have, I think, caused prejudice to the financial reputation of London, and so to the national credit. Where there are justifiable suspicions they must, of course, be thoroughly investigated, and without regard to any of the personalities involved.

I am quite certain that no member of the Court of Directors of the Bank of England, nor any member of the staff of the Bank of England, would suggest otherwise. But if you should conclude . . . that these rumours are baseless, I earnestly hope that the final result of this Tribunal may be not only to maintain, but actually to enhance, the reputation of London for financial integrity. If those conclusions should be reached, I trust that everybody who has it in his power to remedy the damage which has been done by those rumours will make every effort to do so, not least those persons who may have wittingly or unwittingly contributed to the circulation of those rumours."

Statement by Labour "Shadow Cabinet."

The Parliamentary Committee of the Labour Party (the "Shadow Cabinet") issued the following statement on Jan. 21, 1958:

"The evidence submitted to the Tribunal and its report abundantly justify the holding of the investigation, which confirmed the existence of a flood of disquieting factors, as well as substantial sales of Government bonds in circumstances calling for explanation.

"Some of the conclusions of the report and a number of unresolved questions will have to be examined in the forthcoming parliamentary debate [see below]. We note in particular that the tribunal specifically declines to pass judgment on, and refers to Parliament, the two issues which emerged during the hearing:

(*a*) The propriety of the Chancellor of the Exchequer giving to selected journalists, and even to the vice-chairman of the Conservative Party Organization, secret information on investment cuts and credit restrictions the day before the increase in the Bank Rate;

(*b*) The invidious position of part-time directors of the Bank of England who, being aware of the Bank Rate decision in advance, were expected to advise firms with which they were associated on the prospects for the gilt-edged market."

Parliamentary Debate on Tribunal's Report.

The report of the Bank Rate Tribunal was debated by the House of Commons on Feb. 3, on a Government motion: "That this House welcomes the findings of the tribunal appointed . . . to inquire into allegations of improper disclosure of information relating to the raising of Bank Rate, and accepts its report."

Mr. Harold Wilson, for the Opposition, moved an amendment to make the motion read:

"That this House, whilst not dissenting from the findings of the Report of the Tribunal . . . regrets the prior disclosure on Sept. 18, 1957, by the then Chancellor of the Exchequer of secret information about the Government's financial policies to certain selected journalists and to officials of the Conservative Central Office, and also calls upon H.M. Government to take steps to obviate the present conflict between public duties and private responsibilities of part-time directors of the Bank of England."

The two-day debate was marked by acrimonious exchanges and stormy scenes in the House, during which the Deputy Speaker (Sir Charles MacAndrew) twice threatened to suspend the sittings.

Mr. Butler (Home Secretary and Lord Privy Seal) opened the debate by moving the Government's motion. He continued: "The Tribunal's findings justify the confidence rightly placed in those who, for one good reason or another, received advance information about announcements of financial policy last September. They justify the trust the Government must place in the Press. They justify the integrity of members of the Government and party officials, and the honour of those against whom individual insinuations have been made. They justify Mr. Thorneycroft. They completely vindicate the stand against rumour and calumny taken by the Prime Minister.

"In the circumstances, when issues of private honour and public import are involved, we are astonished that the most the Opposition can do is not to dissent from this vital document . . . Too many people have had details of their private lives laid bare, not only politicians, but bankers, brokers, jobbers, journalists, Government officials, and a variety of others. A heavy burden lies on those who pursue or have pursued a campaign, regardless of the means employed, as bitterly as the Opposition have in this case. There will be further opportunities of describing how certain members of the Opposition have gone to almost any length in innuendo and malice. The Tribunal . . . have given us findings which on all points have been definite and unanimous. There can be no doubt about that."

After emphasizing that the representatives of the Press, officials and employees of the Conservative Party, representatives of industry, part-time Directors of the Bank of England, and Mr. Oliver Poole had all been completely absolved of the allegations and insinuations brought against them, Mr. Butler said that the Prime Minister had been finally moved to appoint a judicial tribunal "publicly to clear Mr. Poole, who has been a victim of base insinuations in this House." He added: "The Tribunal's repeated pronouncements that there is 'no shred of evidence,' 'no validity in the suggestion,' are a solace to those involved; a sure example of the integrity of our public affairs; and a vindication of the Prime Minister's judgment of the whole proceedings."

Continuing, Mr. Butler said that the House had to consider two questions:

(1) Whether there should be prior disclosure of intended Government measures;

(2) The position of part-time Directors of the Bank of England.

As regards the first question, he submitted that it was entirely within the authority of the Chancellor or other Ministers to disclose information in the interests of his policy to anybody he could trust. This could be done deliberately and with discretion. "The findings of the Tribunal have clearly exonerated all those to whom the then Chancellor of the Exchequer gave advance information of the restrictive financial measures other than the Bank Rate."

He would be surprised (Mr. Butler continued) if any member seriously advanced the argument that under no circumstances could it be right to give advance information about a Government's announcement or actions to the Press on a confidential basis. This had been for years a clearly established practice, followed by Ministers of all political parties. Mr. Butler emphasized this point by quoting the actions of former Labour Ministers; e.g. in February 1948, when a Treasury Minister and officials had seen newspaper editors and journalists in advance of the important White Paper on personal incomes, costs and prices; in 1949, before the publication of the Economic Survey; and again in 1951. Thus "it can hardly be said that there was anything unusual or reprehensible in the Chancellor of the Exchequer seeing representatives of the Press last September just before the announcement of the Government's measures on Sept. 19."

Turning to the question of interviews with party officials, Mr. Butler said that the discretion of a Minister was really exactly the same in respect of officials of his party organization as it was to other persons whom he felt it desirable to consult. It had been publicly stated that the Labour Government not only informed but consulted their party organization in advance of announcing economic and financial decisions of the highest importance.

Mr. Harold Wilson, in his evidence before the Tribunal, had made a gratuitous suggestion that Mr. Poole was acting improperly in handing the document he had been given by Mr. Thorneycroft to Mr. Dear, on the ground that this was contrary to the Official Secrets Act. The report was quite authoritative on this point, and he (Mr. Butler) was "surprised that Mr. Wilson felt it right to dredge up every accusation that he could think of when his original evidence was proving so feckless."

In the case of Mr. Thorneycroft, there was no question of his having consulted the Conservative Party or its executive. He had handed to Mr. Poole, and to a member of the Conservative Party Research Organization, a document about restrictive financial measures other than Bank Rate which were to be announced the next day. This was to enable the party to prepare its part in public presentation of policy. "Those who have served in any Government," Mr. Butler declared, "will realize that the right relationship between Whitehall and the party organization is important. The Government in power obviously depends upon the party and its organization. It is, and should be, strengthened by contacts with its own party, whether through the organization or any research department it may have. We are in agreement that the utmost care must be exercised by a Government in giving information to party organizations. But, on the closest examination, my colleagues and I have found that this practice has been carefully watched under our administration. The frank and open explanation of Mr. Thorneycroft illustrated exactly what information he handed to Mr. Poole." The Tribunal had confirmed that there was no prior disclosure about measures to meet the economic crisis.

As regards the position of part-time Directors of the Bank of England, Mr. Butler said that this was "part of the problem of dual loyalty which exists in the whole of our public life; the dilemma is not confined to part-time Directors of the Bank all M.P.s have some experience of it." The present constitution of the Bank derived from the Bank of England Act, 1946, which was drafted and passed by the Labour Government of the day. It was laid down in the Act that, in addition to a Governor and Deputy Governor, the Bank should have a Court of 16 Directors, of whom four should give exclusive service to the Bank. On the second reading of the Bill, the Labour Chancellor of the Exchequer [then Dr. Dalton] had said that the Court should be composed so as to "reflect industrial as well as financial experience."

Mr. Butler went on: "The Labour Government knew and endorsed the way the Bank operates. From 1946 onwards they did nothing to alter its practice. They must have found it satisfactory. The Bank of England must be a commercial centre in the widest sense or it is nothing. That is why we have always attached importance, as the Labour Government did, to a proper mixture [of part-time and full-time Directors]. The Government are not prepared to take any snap decision about whether any change in this practice is or is not desirable. We agree with the Tribunal that this needs careful thought and examination."

After pointing out that this matter was within the terms of reference of the Committee under Lord Radcliffe which was inquiring into the working of the monetary and credit system [see 15513 A], Mr. Butler announced that the Chancellor of the Exchequer had asked Lord Radcliffe to include this question in their report and make recommendations, and that Lord Radcliffe had confirmed that this would be done. "In this way," Mr. Butler added, "it is possible to give the matter the exhaustive study which the Tribunal thought necessary. The Constitution of the Bank can be examined without damage to the international financial interests of the country."

Mr. Butler then turned to what he called "the part of Parliament and of Members in this affair." He recalled in this connexion that Sir Leslie Plummer had first mentioned Mr. Poole's name on Nov. 12, but two days later had stated that he made no imputations against Mr. Poole's honour. "Sir Leslie made a curious remark later on," Mr. Butler added. "He said Mr. Poole was not the first man to have his reputation tarnished or an attempt made to tarnish it in the House of Commons. It was left to Mr. Wilson to enlarge this imputation. He asked the Chancellor 'whether he did or did not see the Vice-Chairman of the Conservative Party, who has vast City interests, the day before Bank Rate went up.'"

Mr. Butler concluded: "These insinuations were made under cover of privilege. The Prime Minister decided they could be publicly cleared only through a judicial tribunal. This left unsolved one serious problem. When a highly defamatory statement is made in this House regarding any individual outside, without any reasonable or probable cause, the machinery of a Tribunal is the only existing path to justice. This realization surely imposes on us infinitely higher standards of responsibility for our privileged utterances than has guided the Opposition. Meanwhile let us be thankful that . . . the Tribunal . . . has broken the political weapon of the smear."

Mr. Harold Wilson, after moving the Opposition amendment, said that the setting-up of the Tribunal had been "thoroughly justified." He continued: "The Opposition accept unhesitatingly the findings of the report in relation to the individuals whose names have been previously mentioned. At no time have any of my friends or myself named any of these part-time directors of the Bank of England. The effect of the Tribunal is to reassure the public, and it is clear from the evidence and the statements made to the Tribunal that there was need for such reassurance. The pity is that the reassurance did not come earlier."

Mr. Wilson recalled that he and Mr. Gaitskell had suggested that the preliminary inquiry should be conducted not by the Lord Chancellor but by an independent High Court judge nominated by the Lord Chancellor. They had undertaken at the time to accept the result of such a preliminary investigation; that was the answer to everything that Mr. Butler had said. "We have not at any time said that there was a leak," Mr. Wilson declared, "only that there was a case for an inquiry. From the first letter we stressed the importance of reassuring the public."

When information had reached them about the Pumphrey-Chataway conversation (Mr. Wilson continued) it was the Opposition's duty to forward it to the Government. It suggested that something was known in the Conservative Central Office. The Opposition were not in a position to check the story at first hand, nor could they have questioned Miss Chataway; that was why they had taken it both to the Prime Minister and the Lord Chancellor. "Our main difficulty in our discussions with these Ministers was to protect all concerned, especially the Conservative Office employee, from possible victimization." [This part of Mr. Wilson's speech caused such prolonged laughter from the Government benches that the Deputy Speaker called on the House to "try to restrain itself."]

Mr. Wilson emphasized that he had never intended to reflect in any way on the integrity of Mr. Poole; that the Opposition "unreservedly accepted" the Tribunal's findings about Lord Kindersley, Mr. Keswick, and Mr. Poole; and that he had never heard any suggestion about Mr. Keswick or Lord Kindersley before the Tribunal was set up. No-one could say, however, that there had been no case for an inquiry. There were 11,000 public companies in the country, and only four of them had sold in advance of the Bank Rate announcement. Amidst uproar from the Government benches, Mr. Wilson said that each of these four companies was closely associated with Directors of the Bank of England, commenting that "the statistical odds against this happening are very high."

On the question of prior disclosure of information, Mr. Wilson said that no-one would wish to fetter the right of Ministers to consult industrial interests on matters of vital concern, such as investment programmes in public and private industry. The question raised here, however, was that of the Chancellor's [i.e. Mr. Thorneycroft's] wisdom in seeing selected representatives of newspapers, Mr. Poole, and other officials of the Conservative Central Office. He assured the House that he had never thought there had been any "leak" through the journalists.

In conclusion, Mr. Wilson suggested that the position of part-time Directors of the Bank of England needed examination, and welcomed Mr. Butler's announcement that this would be done by the Radcliffe Committee. The objectives should be to remove the conflict of duties facing such Directors, and to assert the primacy of the Treasury and the Chancellor in all matters affecting the country's financial and economic well-being. Contact between the Bank and the Treasury should be much more intimate, with a much greater exchange of staffs. He agreed that the problem of part-time Directors was not a simple one, and believed that the answer might lie in an executive board consisting of the Governor and Deputy Governor of the Bank and full-time Directors, reinforced by Treasury nominees. He agreed also that it was necessary for the Governor to get advice, but thought this could be done more satisfactorily by an Advisory Council or Court rather than by part-time Directors.

Mr. Thorneycroft (C.) said that he did not rise to defend his honour in this matter, because he did not think it was in question. Looking back on the whole episode, there were three words which stood out—"Bank Rate leak." This accusation, blazoned across the Press of Britain and the world, had been utterly refuted by the Tribunal.

Speaking of the interviews he had had, Mr. Thorneycroft said that, with the approval of the Prime Minister and the Cabinet, he first saw the clearing bankers. Such an operation as intended would have been impossible without seeing them. "Secondly, we saw the journalists. They have been seen before and I have not the slightest doubt that they will be seen again." In addition he had seen, or arranged to see, the T.U.C., certain industrial organizations, Mr. Poole, and two Conservative Central Office officials. Mr. Thorneycroft added: "This was a vast, complicated, and difficult operation, undertaken at a moment when this country was under great pressure. Every shred of evidence has been examined, every allegation and rumour, and there is not one possible shred of evidence against anybody."

Violent scenes occurred when **Mr. Aneurin Bevan** (Lab.) accused Mr. Thorneycroft of "deliberately misleading the House" by saying that he had seen the T.U.C. After the Deputy Speaker had threatened to suspend the sittings unless order was restored, **Mr. Thorneycroft** explained that the T.U.C. had been seen not by himself but by the Minister of Labour, Mr. Macleod.

Sir Lionel Heald (C.), a former Attorney-General, said that it was Mr. Wilson's duty "as a gentleman and a right honourable gentleman" to make a "frank and honest apology for the serious damage he has done, whether wittingly or unwittingly, to at least one man who has been abominably treated—Mr. Poole" After saying that he had consulted two leading authorities on slander concerning Mr. Wilson's remarks about Mr. Poole, made in the House on Nov. 12, 1957, Sir Lionel said that these statements would have rendered Mr. Wilson liable to an action for slander but for the legal immunity he enjoyed as a Member of Parliament. Sir Lionel added: "It is also my opinion, and this I have confirmed independently from the best advice I can get, that but for his ability to shelter behind parliamentary privilege Mr. Wilson would be facing the prospect of a very heavy award for damages which might well be nearer £10,000 than £5,000."

Mr. Gordon-Walker (Lab.) emphasized that there was no difference in the House with regard to the Tribunal's findings, which had been "unhesitatingly accepted" on both sides. The main difference, he asserted, was in the attempt to impute malice to Mr. Wilson. Mr. Butler had "set the tone" for this in his opening speech, but Sir Lionel Heald had "taken on the main burden" by alleging that Mr. Wilson had abused his position as a Member of the House and by making "unworthy and ineffective" innuendoes of malice on Mr. Wilson's part. After declaring that Mr. Wilson had nothing to apologize for, Mr. Gordon-Walker maintained that the inquiry was fully justified and that there had been a case for investigation.

Mr. Heathcoat Amory (Chancellor of the Exchequer) expressed gratification that "a most searching inquiry has vindicated the unrivalled reputation which the City of London and we as a people enjoy—and, I trust, will always enjoy in the world—for financial rectitude and fair dealing." Turning to the constitution of the Bank of England, and the position of part-time Directors in particular, he said that no sensible person would argue that any existing institution must always be right or should not be re-examined from time to time. The inquiry by Lord Radcliffe's Committee was being made "without casting any aspersion on those who work the existing systems and who have come through a searching test triumphantly with absolute vindication."

The Chancellor continued: "It seems to me a merit of the present system that the Bank should not be a mere executive agent of the Government but be able to give them independent information and advice. There can be little doubt of the tremendous value to the Bank of having available the experience and knowledge of part-time Directors, persons who are actively engaged in finance and industry. It would not meet the same purpose to have the advice of people who had been employed actively but have retired. Their advice might be out of date.

"I have seen references in the Press that the composition of the Court of the Bank is almost the preserve of bankers. That is not true. Of a total of 16 directors, three have their main interests in merchant banks, one in a clearing bank, one in a joint-stock bank with its main business overseas. There are seven part-time directors who have their main interest and experience in industry and commerce, including one director with special experience of organized labour in industry.

"The issue is not so much the value of part-time directors as whether the present arrangements put too great a strain on possible conflicting loyalties . . . These matters fall squarely within the terms of reference of the Radcliffe Committee. On the issue of conflict of loyalties, any doubts anyone may have had a few months ago should be lessened rather than increased by the Tribunal's evidence that, under the test of exceptionally difficult circumstances, all the individual directors concerned were completely exonerated from any fault of character or conduct."

In conclusion, the Chancellor said that the suggestions and insinuations which led to the setting-up of the Tribunal had involved much personal hardship and considerable expense to many individuals whose conduct had been found to be completely blameless. In every case these suggestions and insinuations had been found to be without any substance. He added: "I am bound to say that I simply cannot understand Mr. Wilson's attitude in not expressing any regrets at all for the pain his actions caused to so many innocent people."

Sir Leslie Plummer (Lab.) repeated that he had never made any imputations against the personal honour of Mr. Poole or Mr. Thorneycroft, but had made an imputation against the political wisdom of Mr. Thorneycroft.

Mr. Gaitskell (Leader of the Opposition), who described Mr. Wilson's speech as "massive and brilliant," said that Mr. Wilson had been vigorously attacked because he was alleged to have instituted the whole inquiry by some undesirable means. He was entitled to defend himself, and had done so with great effect. He (Mr. Wilson) had also been attacked on the ground that he was unfair and had allegedly slandered Mr. Poole. "I personally accept the view," said Mr. Gaitskell, "that Mr. Wilson's statements in this House and before the Tribunal make it abundantly clear that he did no such thing."

In putting down their amendment (Mr. Gaitskell continued) the Opposition wanted to make it plain that they were not prepared, for a very good reason, to go as far as to use the world "welcome" in accepting the Tribunal's report. The reason was that in the conclusions of the Tribunal there were remarks about the position of the Chancellor and of the part-time Directors of the Bank of England which they could not wholly accept.

"I am glad," said Mr. Gaitskell, "that the gentlemen who were suspected, or about whom there appeared some allegations regarding their conduct, were fully exculpated. I am glad, for the sake of our country, that the reputation of the City of London has come out clean. Only a report of a Tribunal of this kind could have produced that complete exculpation . . ."

After referring to the "difficult position" of part-time Directors of the Bank of England, caused by the clash between their public duties and private responsibilities, Mr. Gaitskell stressed—with regard to the conduct of Mr. Thorneycroft—that there was no question of honour involved, but a question of wisdom and propriety. "Was it wise of him to have seen selected journalists, most of them the day before Bank Rate was raised? Was it proper of him to have seen officials of the Conservative Central Office? Our views on this are well known. We think he was unwise to see these journalists the day before such a startling change was about to take place . . . It has always been the convention that changes in Bank Rate are in the same order as Budget secrets, and that it is necessary to be extremely careful. It is also a well-known convention that before the Budget the Chancellor becomes inaccessible. And quite right too; he goes into purdah. It would have been wiser on this occasion if the Chancellor had done the same thing . . ."

Mr. Maudling (Paymaster-General) wound up the debate with a speech punctuated by acrimonious exchanges between the Government and the Opposition, leading to frequent appeals by the Speaker for order. At the end of his speech Mr. Maudling accused Mr. Wilson of "the technique of smear" and said that the division would be like a vote of censure—"not a vote of censure on the Government, which was exonerated by the Tribunal, but a vote on Members opposite and particularly Mr. Wilson."

The Opposition amendment was defeated by 320 votes to 256—a Government majority of 64. The Government's motion was then adopted by 322 votes to 253, a majority of 69. (Cmnd. 350 - Times - Daily Telegraph - Manchester Guardian)

A. PERSIA. — Oil Agreement with Pan-American Petroleum Corporation.

The Persian Prime Minister, Dr. Eghbal, presented to the Majlis on April 29 a draft agreement which had been concluded between the National Iranian Oil Company and the Pan-American Petroleum Corporation (a subsidiary of the Standard Oil Company of Indiana), and which covered the exploitation of offshore oil deposits in the Persian Gulf over an area of some 6,200 square miles of the Persian continental shelf. The agreement, which provided still more advantageous terms to Persia than that concluded with the Italian company *AGIP Mineraria* in 1957, contained the following provisions *inter alia*:

(*a*) Pan-American would spend $82,000,000 on exploitation activities within the first 12 years, with no contribution from Persia. If no oil was found within that period, Pan-American would pay the N.I.O.C. half of any unspent proportion of the $82,000,000.

(*b*) Pan-American and the N.I.O.C. would form a joint company registered in Persia, shares being held equally by both parties.

(*c*) Thirty days after ratification of the agreement by the Persian Parliament, Pan-American would pay a "cash bonus" of $25,000,000 to the National Iranian Oil Company.

(*d*) The first well would have to be drilled within 18 months.

(*e*) If oil were found, Persia would contribute 50 per cent to the exploration and development expenses.

(*f*) Any net profits (including the State tax) would be divided in the proportions of 75 per cent for the Persian Government and 25 per cent for Pan-American.

(*g*) Pan-American would have to train Persian personnel to replace Americans as soon as possible.

(*h*) Oil and gas needed for Persian home consumption would be sold at cost price.

The Shah gave his assent to the agreement on June 1. (New York Times) **(Prev. rep. 15837 A.)**

B. UNITED STATES. — Further Reductions in Federal Reserve Bank Rates and Reserve Requirements of Member-Banks. - Anti-Recession Measures.

In fresh anti-recession moves the Federal Reserve Board announced in March and April two further reductions in both the discount rates of Federal Reserve Banks and in reserve requirements of member banks.

Discount Rate. A reduction in the discount rates of the Federal Reserve Banks of New York, Philadelphia, and Chicago from 2½ per cent to 2¼ per cent was approved by the Federal Reserve Board on March 6, the discount rates of the other nine Federal Reserve Banks (St. Louis, Minneapolis, Boston, Cleveland, Dallas, Atlanta, Kansas City, Richmond, and San Francisco) being subsequently reduced to the same level; the San Francisco reduction was from 3 per cent to 2¼ per cent, as that Reserve Bank was the only one which had not previously reduced its rate from 3 per cent to 2¼ per cent.

A further reduction in the discount rate of the Federal Reserve Banks of New York, Philadelphia, Chicago, St Louis, and Minneapolis from 2¼ per cent to 1½ per cent was approved on April 17, and for the Federal Reserve Banks of Boston and Atlanta on April 21. The 1½ per cent rate was the lowest since August 1955, when the rate was raised from 1¼ per cent to 2 per cent.

Reserve Requirements. The Federal Reserve Board announced on March 18 that reserve requirements of member-banks would be reduced by another ½ per cent—viz. from 19½ per cent to 19 per cent of net demand deposits for central reserve city banks (New York and Chicago); from 17½ per cent to 17 per cent for reserve city banks in other large cities; and from 11½ per cent to 11 per cent for country banks. This measure released about $490,000,000 from previously required reserves, and it was estimated that it would mean nearly $3,000,000,000 more in available credit.

The second reduction in reserve requirements was announced on April 17 together with the above-mentioned further cut in the discount rate. It was from 19 to 18½ per cent immediately and to 18 per cent as from April 24 for central reserve city banks, and from 17 to 16½ per cent for reserve city banks; no change was made for country banks. The effect of the measure was a further release of $450,000,000 of reserves, thus permitting the banks to add to their total deposits by making fresh loans and investments up to $2,700,000,000.

A Federal Reserve Board spokesman explained on April 17 that the reduction in reserve requirements was partly for technical reasons, inasmuch as it was designed to offset a withdrawal of gold from the U.S.A. of nearly $600,000,000 in the previous two months—much of it having gone to Britain.

Under the U.S. monetary system each dollar of gold leaving the country reduces the reserves of private banks by a corresponding amount; without the reduction in reserve requirements approved by the Federal Reserve Board, money would have tended to become tighter.—(New York Times) **(Prev. rep. 16034 A; Recession, 16199 A.)**

C. ARGENTINA. — Frondizi Cabinet.

A new Argentine Cabinet was formed by President Frondizi after his inauguration on May 1, portfolios being allocated as follows:

Dr. Alfredo Vitolo	Interior.
Dr. Carlos Alberto Florit ..	Foreign Affairs and Religion.
Dr. Emilio Donato del Carril ..	Finance.
Dr. Luis MacKay	Education and Justice.
Dr. Hector Noblia	Social Assistance and Public Health.
General Hector Solanas Pacheco	War.
Rear-Admiral Adolfo Estevez ..	Navy.
Commodore Roberto Huerta ..	Air.

Dr. Vitolo will also take over the Ministry of Transport and Communications *ad interim*; Dr. Donato del Carril will take over the Ministries of Agriculture and Livestock and of Trade and Industry *ad interim*, in addition to the Finance portfolio; and Dr. Noblia will be interim head of the Ministry of Labour. It was reported that Dr. Frondizi intended to appoint a trade union leader as Minister of Labour.

Dr. Vitolo, for many years a prominent Radical, joined the *Unión Cívica Radical Intransigente* under Dr. Frondizi when the party split in 1954; he was one of the chief Opposition spokesmen in Parliament against the Peronista Constitution of 1949. Dr. Florit (who is 29) belongs to the Catholic nationalists, who support Dr. Frondizi's party. Dr. Donato del Carril is an expert on economic and financial questions. (New York Times - Neue Zürcher Zeitung) **(Prev. rep. 16156 C; 16061 C.)**

D. IRISH REPUBLIC. — Bank Rate reduced.

The Central Bank in Dublin announced on May 29 that its discount rate would be reduced from 5½ per cent to 5 per cent, with immediate effect.—(Irish Times, Dublin) **(16100 D.)**

JUNE 7—14, 1958

A. CYPRUS. — Political Developments. - Eoka "Ultimatum" to Sir Hugh Foot. - Renewal of Eoka Terrorism. - Murders of British Soldiers. - Campaign against Left-wing Cypriots. - Killing of Trade Union Leaders. - Anti-Greek and Anti-British Riots by Turkish Cypriots. - Turkish Campaign for Partition. - British Negotiations with Greece and Turkey.

Developments in the Cyprus situation since the appointment of Sir Hugh Foot as Governor of the island [see 15815 B] are summarized below under cross-headings.

Sir Hugh Foot's Arrival in Cyprus. - Meetings with Greek and Turkish Cypriot Leaders.

Sir Hugh Foot arrived in Nicosia from London on Dec. 3, 1957, and was sworn in on the same day as Governor of Cyprus in succession to Field-Marshal Sir John Harding. In a statement after the ceremony, and at a subsequent press conference, Sir Hugh appealed for a "new start" in Cyprus and expressed his conviction that an "overwhelming majority" of the Cypriot people would "wish to accept the offer of friendship, understanding, and co-operation which I make." He emphasized that he would be "at all times accessible to those of the Cypriot people who want to see me," and announced his intention of making an immediate tour of the island "to see things for myself."

On the day of Sir Hugh Foot's arrival, leaflets signed "Dighenis" (the pseudonym of Colonel Grivas, the Eoka leader) were circulated in Nicosia saying that Eoka would offer a "handshake" to the new Governor if he allowed Archbishop Makarios to return to Cyprus and negotiate with him (Sir Hugh) on the island's future. The leaflets described Cyprus as "a live volcano" and said that Sir Hugh Foot's attitude would "decide whether it will erupt again or remain silent."

In accordance with his promise, Sir Hugh Foot visited all parts of the island between Dec. 4 and Dec. 30, had a number of meetings with representatives of the Greek Cypriot and Turkish Cypriot communities, and also announced certain measures designed to bring about a relaxation of tension.

After a comprehensive tour of the island on Dec. 4-8, Sir Hugh spoke in a broadcast of the "warm, cheerful, and friendly" welcome he had received from all sections of the population. He added that there was "an overwhelming desire, among Greeks and Turks alike, to see the end of the present situation and . . . progress towards a just settlement." On Dec. 12 he was cheered by large crowds when he walked virtually unescorted through the Old City of Nicosia—an area where many terrorist attacks had taken place during the past three years, and where communal disorders had occurred shortly after his arrival in the island.

Between Dec. 9 and Dec. 17 Sir Hugh Foot had two meetings with Dr. Kutchuk and other leaders of the Turkish Cypriot community, including the Grand Mufti; paid a personal call on Dr. Dervis, the Greek Cypriot mayor of Nicosia; had a meeting with Greek newspaper editors; and met the Greek mayors of Nicosia, Famagusta, Larnaka, Limassol, Paphos, and Kyrenia. Particular significance was attached to Sir Hugh's meeting with the mayors of the principal towns and his personal call on Dr. Dervis, since his inauguration as Governor had been boycotted by the Greek Cypriot mayors.

In a broadcast on Dec. 21, Sir Hugh Foot announced (*a*) that 100 political detainees would be immediately released (including all the 11 women in detention); (*b*) that 12 other persons detained in a monastery near Nicosia would also be released; (*c*) that restrictions on the movements of about 600 persons would be relaxed; and (*d*) that the Larnaka Lyceum [closed in November 1956 after serious indiscipline among the students] would shortly be reopened. On Christmas Day he paid a visit to the Pyla detention camp, where he met a committee representing the detainees.

Sir Hugh Foot visited London during the first fortnight of January to report to the U.K. Colonial Secretary, Mr. Lennox-Boyd; he also had consultations with Mr. Macmillan, Mr. Selwyn Lloyd, and the Chiefs of Staff. On returning to Nicosia (Jan. 19) Sir Hugh said that there had been "full agreement" in his discussions with the Government.

Commutation of Death Sentences on Terrorists.

During the last few months of his governorship, Sir John Harding had commuted the death sentences on five convicted Eoka terrorists—in four cases to life imprisonment and in one case to 15 years' imprisonment. The commutations brought the total number of reprieves granted by Sir John to twelve.

(1) Nicos Sofocleous, a mechanic, was sentenced to death on July 6, 1957, after a retrial, for the murder of a Limassol lawyer in the previous November [see page 15653, first column]. Sir John Harding commuted the sentence to life imprisonment on Aug. 15, 1957.

Christos Lambrou, who was re-tried with Sofocleous (see same reference), was acquitted on the charge of discharging a firearm at a British soldier in Limassol.

(2) The journalist Nicos Sampson, who had been sentenced to death on June 2, 1957 [see page 15652, second column], had his sentence commuted to life imprisonment on Sept. 10. He and Sofocleous were subsequently flown to Britain to serve their sentences in a British prison.

(3) Michael Kinighos and Demetrakis Christou were sentenced to death on Aug. 30, 1957, under the emergency regulations, for illegal possession of arms. On Oct. 15 Sir John Harding commuted the sentence on Kinighos to life imprisonment, and that on Christou to 15 years' imprisonment.

(4) Michalakis Rossides, previously sentenced to death for the murder of Private Shilton, of the Royal Leicestershire Regiment [see page 15652, second column], had his sentence commuted to life imprisonment on Oct. 15, 1957. An appeal by Rossides against the death sentence had previously been dismissed by the Judicial Committee of the Privy Council.

Terrorist Activities and Communal Disturbances, September-December 1957. - Eoka "Assassination List."

After several months of quiescence, during which Eoka continued to observe the truce announced on March 14, 1957, terrorist activity broke out again in the autumn of 1957 and continued intermittently to the end of the year. In nearly all cases the attacks were directed against Greek Cypriots who were apparently regarded as "traitors" by the Eoka organization. In addition, serious communal riots broke out in Nicosia in mid-December, shortly after Sir Hugh Foot's arrival, and the security forces were also called out to disperse *enosis* demonstrations timed to coincide with the U.N. General Assembly's debate on Cyprus [see page 16048].

The first victim of violence since the truce of March 14 was a Greek Cypriot villager who was dragged from a sick-bed and beaten up by a band of masked men on Sept. 27; he subsequently died in hospital from his injuries. On Oct. 14 the *mukhtar* (headman) of the village of Dhali—12 miles from Nicosia—was shot dead by an assailant who broke into his office and escaped by car; it later became known that the victim (Loizos Pierou) was on the Eoka "assassination list" which had come into the possession of the authorities on Oct. 9 [see below]. Further incidents occurred on Oct. 30, Nov. 6, Nov. 7, and Dec. 26, in which individual Greek Cypriots were murdered by unidentified assailants in the suburbs of Nicosia and in villages near Paphos; on Nov. 9, when a Turkish Cypriot policeman was shot dead on the Morphou-Nicosia road; and on Nov. 27, when a British Serviceman—the first British subject to be attacked since the truce—was shot at and wounded in Limassol, losing an eye as a result of the attack.

Damage estimated at £10,000 was caused by an explosion at the headquarters of the Cyprus Broadcasting Service on Oct. 17, while electrical transformers were damaged by two explosions on the same day at the R.A.F. base in Nicosia. On Nov. 26 a *Canberra* bomber was completely destroyed, and three other *Canberras* and a *Venom* fighter damaged beyond repair, in a fire which broke out at the R.A.F. base at Akrotiri, in the south-west of the island. There were no casualties in these incidents.

Two leading terrorists surrendered to the security forces in October—Michael Achiotis, a former "area leader" in the Solea valley, and Vanavas Papadopoulos, who had been "wanted" since 1955 and had been mentioned in the captured Grivas diaries [see page 15476].

Achiotis, who had escaped from a detention camp in January 1956, gave himself up on Oct. 9, 1957, declaring that he was disillusioned with the terrorist campaign. He led the security forces to a cave in the Troodos foothills where a number of documents were discovered, together with the bodies of two terrorists (a subsequent inquest returned a verdict of murder by "a person or persons unknown"). The documents contained a list of 200 persons—all of them Greek Cypriots, and including a number of women—who had been marked down by Eoka for assassination; some of those named were themselves prominently connected with Eoka, and others were connected with Cypriot left-wing organizations. Other documents showed that Eoka proposed to resume full-scale terrorist activities if the U.N. debate on Cyprus ended "unsatisfactorily." In giving these details, the authorities announced that they were taking measures to protect the intended victims from the threat of assassination. Papadopoulos gave himself up on Oct. 11, explaining that he had read of Achiotis's surrender and wished to follow his example.

The murders of Greek Cypriots in October and November, referred to above, were widely regarded as an intimidatory warning by Colonel Grivas against the possibility of further defections from the Eoka ranks, such as that of Achiotis and Papadopoulos.

Widespread disturbances occurred on Dec. 9, 1957, during an island-wide general strike, and on Dec. 10, when serious communal rioting broke out in Nicosia.

Over 100 people were injured (including 20 members of the security forces) and 150 arrests made in the general strike, which coincided with the opening of the U.N. debate on Cyprus. On the following day several hundred Turkish demonstrators marched into the Greek quarter of Nicosia after rumours that a Turkish policeman had been injured in riots at the Pan-Cyprian Gymnasium; the demonstrators

caused considerable damage to Greek property before being driven back by the security forces, who sealed off the two quarters. About 80 people were injured in the disturbances (including 41 members of the security forces) and 68 arrests made, a curfew being imposed in Nicosia for the first time in nine months. Another general strike was called on Dec. 16 as a mark of dissatisfaction with the General Assembly's rejection of the Greek resolution on Cyprus, but passed off without any serious incidents.

Turkish Cypriot Demands for Partition. - Criticism of Sir Hugh Foot. - Turkish Riots in Nicosia.

In view of the Turkish Cypriots' insistence that the Cyprus questions could only be solved by partition (*taksim*), in contrast to the Greek Cypriots' demand for *enosis*, tension between the two communities increased still further from the beginning of 1958 onwards. The formation of a Turkish "resistance organization" in Cyprus, known as T.M.T. and replacing the former "Volkan" organization, had been announced in leaflets distributed throughout the island in November 1957.

The leader of the Turkish Cypriots (Dr. Kutchuk), accompanied by the Turkish Consul-General in Nicosia, visited Ankara in January to consult with the Turkish Government on developments in Cyprus since Sir Hugh Foot's arrival. In various statements issued in Turkey, Dr. Kutchuk declared (*a*) that there was no longer "any possibility of co-existence" between the two communities in Cyprus in view of the alleged Greek Cypriot campaign against Turkish lives and property, and (*b*) that the British Government's "soft and indulgent" attitude towards Greek Cypriot terrorism was one of the principal causes for the continuation of terrorist activities. On Jan. 21 Turkish Cypriots demonstrated in Nicosia and Famagusta against what they regarded as the "pro-Greek" policy of Sir Hugh Foot, the demonstrations being dispersed without serious incident.

The first large-scale anti-British demonstrations by the Turkish Cypriots broke out in Nicosia on Jan. 27, when British troops fought pitched battles with thousands of rioters demonstrating for *taksim*. The disorders occurred while Sir Hugh Foot was in Ankara, together with Mr. Selwyn Lloyd, for discussions with the Turkish Government during the meeting of the Baghdad Pact Council [see 16023 A].

The Nicosia riots of Jan. 27 were among the most violent ever known in Cyprus. Thousands of Turkish youths hurled stones and bottles at British troops, overturned and set fire to military vehicles and police cars, and erected barricades in the Turkish quarter of the Old City; Turkish flags were prominently displayed and many of the demonstrators carried placards bearing such slogans as "Out with Governor Foot" and "Long Live Harding." British troops repeatedly broke up demonstrations with baton charges and tear-gas shells, of which over 100 were fired, and a curfew was imposed in the Turkish quarter after nine hours of violent rioting marked by many bitter hand-to-hand struggles between Turkish Cypriots and the security forces. Despite the curfew order, further riots broke out on Jan. 28 and renewed attacks were made on British forces. Order was eventually restored on Jan. 29 after strong appeals by leaders of the Turkish community, the curfew being lifted and British troops withdrawn from the Turkish quarter.

Four Turkish Cypriots were killed in the Nicosia riots—three men shot by the security forces when a car refused to halt at a road-block, and a woman who died of injuries after being accidentally knocked down by a military vehicle. A Turkish Cypriot was also killed in Famagusta when troops opened fire after being repeatedly stoned by Turkish mobs. About 120 people were injured in the disturbances of Jan. 27-28, including 40 members of the British forces.

Dr. Kutchuk was welcomed by large crowds of Turkish Cypriots when he returned to Nicosia from Ankara on Feb. 3. After appealing for order and discipline among the Turkish Cypriot community, he emphasized that the Turkish Government was solidly behind the demand for partition, declared that *enosis* was "buried once and for all," and said that *taksim* was "1,000 per cent certain." He added: "If our own force in Cyprus proves inadequate, our fatherland is ready to come to our aid."

The Turkish Cypriot community in Britain (about 8,000) staged a two-hour parade in London on Feb. 23, ending with speeches in Trafalgar Square demanding the partition of Cyprus. The demonstrators carried placards bearing the slogans "Foot Go Home" and "Partition Foot by Foot."

Sir Hugh Foot's Warning against Renewal of Eoka Violence. - Warning to Terrorists.

In a broadcast on Feb. 2, Sir Hugh Foot said that for the past few weeks "information has been coming in that Eoka has made detailed plans for a renewal of violence and . . . is ready to put those plans into effect at any time . . . After all the dreadful events of the past, we are faced with a new threat of disorder and violence."

Sir Hugh continued: "You all know that for weeks past discussion has been going forward to see if a way could be found to lead us out of our difficulties and to find new hope for the future. I should like to say to you, in the greatest earnestness, that if further violence occurs there can be no possible hope of progress of any kind. The possibility of finding the road for which we have searched would be entirely lost.

"Against the background of what has taken place, I am convinced that anyone who resorts to violence at this time will destroy both himself and his cause. Never was there a time when it was more directly in the interest of everyone in the island to keep the peace and thus make the way open for progress by discussion and argument rather than by riot and terror.

"I feel . . . that if we do return to the miserable state of fear which Cyprus has had to endure in the past, all possibilities of a reasonable settlement would be destroyed. I also feel it my duty to tell you that if there is a renewal of violence it will immediately be essential to take every possible measure to deal with it and finish it. There can be no question of 'business as usual.' Nothing will matter as much as the need to take every possible step to bring violence to a speedy end. We must not hesitate to take those steps, even if it means the dislocation of everyday life, and even if in consequence innocent people have to suffer hardship. It will be in the interests of everyone to restore the situation with all speed so that normal life can be resumed.

"For too long endeavours have been made to force conclusions by violence in Cyprus. They have led to no good whatever indeed, they have merely made it more difficult to see any final and acceptable conclusion. If we sink back into the state of affairs with which you are all too familiar, we shall perpetuate the state of emergency of which we are all sick and tired."

In a further broadcast on March 9, Sir Hugh Foot said that Eoka's threat to launch a "passive resistance" campaign [see below] "is intended to be against the Government but is in fact against the people." He gave an assurance that the Government would take all necessary measures to protect the public if Eoka's threats were put into action.

The ban on parades and processions was relaxed by Sir Hugh Foot to enable the Greek Cypriots to celebrate Greek Independence Day (March 25) for the first time for three years. Some 400,000 Greek Cypriots throughout the island took part in the parades held on that date, about 40,000 in Nicosia alone. The day passed off without a single incident and without any communal disturbances, and was described by Sir Hugh as "a triumph for good sense, good humour, and good will."

The Governor's decision to lift the ban was taken in agreement with the Chief Constable of Cyprus, Mr. J. E. S. Browne, who had succeeded Lieut.-Colonel G. C. White in that post in January. Mr. Brown, the Chief Constable of Nottinghamshire, was seconded to Cyprus for two years, his predecessor returning to his former duties as Chief Constable of Warwickshire after serving for a similar period.

Renewal of Eoka Terrorism. - Murders of British Troops. - Sabotage and "Passive Resistance" Campaigns.

During the first few days of February leaflets were distributed by Peka (the political branch of Eoka) accusing Sir Hugh Foot and the British Government of having "double-crossed" the Greek Cypriots, complaining of "collusion" between Britain and Turkey, and declaring that "the struggle must now continue." On Feb. 23 an Eoka "policy directive" was issued, signed by "Dighenis," calling on the population to prepare for a "passive resistance" campaign against Britain, including a boycott of British goods. The leaflet said that "certain categories" of merchants would be called upon to cease or restrict dealings with British firms; it also ordered Cypriots not to take part in British football pools, "which give the English £50,000 a week unnecessarily." Further Eoka leaflets were widely distributed on March 2 calling on all Greek Cypriots to begin the passive resistance campaign against Britain "as from to-day."

Prior to this development, all 67 Greek *mukhtars* (village headmen) in the Famagusta district had resigned in a body in protest against the emergency and the continued ban on Archbishop Makarios. Similar action was taken towards the end of February by some 500 *mukhtars* of villages in the Paphos area, and in March by many *mukhtars* in the Nicosia and Limassol areas. The resignations were regarded as part of the "passive resistance" campaign, although many of the *mukhtars* were believed to have resigned for fear of Eoka reprisals if they failed to do so.

The "passive resistance" campaign was accompanied by a campaign of "selected sabotage" against such targets as pumping installations serving military camps, Government workshops and storehouses, Naafi stores, etc. Bomb explosions at such establishments were of almost daily occurrence during March and April, causing damage running into tens of thousands of pounds. In none of these incidents, however, were there any casualties. Most of the sabotage took place in the Nicosia and Famagusta areas, although much damage was caused to installations at Kyrenia, Yialoussa, and other localities.

A one-day strike was called by Eoka on April 10 in protest against the continued detention of about 500 Greek Cypriots suspected of taking part in or abetting terrorism, and the banishment of 20 convicted terrorists who were serving their prison sentences in Britain. Clandestine leaflets were distributed alleging "inhuman" methods against detainees, and all shops and workshops were ordered to close down for the day throughout the island. During the one-day strike—which was observed by most of the Greek Cypriot population—detainees in a camp ten miles from Nicosia set fire to about 20 huts, while prisoners in the Nicosia gaol staged demonstrations and in some cases succeeded in climbing on to the roof of the building, where they acted as cheer-leaders for other demonstrators outside the walls.

On the following day (April 11) leaflets were distributed in Nicosia, signed by "Dighenis" and addressed to Sir Hugh Foot personally, warning the Governor that Eoka would resume its attacks on British nationals unless the "maltreatment and torture" of detainees ceased immediately; the Eoka leader said that Sir Hugh bore "the entire responsibility for the medieval methods employed by interrogators." [These allegations, like similar Eoka charges made on past occasions, were strongly repudiated by the Cyprus Government as completely baseless.] On April 14 a member of the British security forces, Mr. William Dear (61), was shot by two terrorists outside a Famagusta cinema in broad daylight, the assailants escaping. Mr. Dear (a member of the Special Branch) was severely wounded and died two days later; he was the first British victim of Eoka terrorism for more than a year. Leaflets were subsequently distributed in which Eoka admitted responsibility for the murder of Mr. Dear, who was alleged to have "tortured" political detainees.

On April 26 Colonel Grivas issued an "ultimatum" to Sir Hugh Foot saying that attacks would be renewed against British Servicemen unless "repressive measures against political detainees" were lifted within 48 hours. As a precautionary measure, the Greek Cypriot quarters of Nicosia, Famagusta, and other towns were put out of bounds to British troops for the period of the "ultimatum." On May 4, however, two British soldiers (both of the Royal Military Police) were shot dead in the Varosha area of Famagusta by terrorists who succeeded in escaping; as in the case of Mr. Dear, Eoka subsequently admitted responsibility for the murders, which were described as "reprisals." As a result of the Varosha killings, Sir Hugh Foot reimposed the death penalty (under the emergency regulations) for attacks on persons with bombs or firearms, or for carrying or possessing bombs or firearms with the intention of causing loss of life.

Two Greek Cypriots were also murdered by Eoka terrorists during April—one in Ledra Street, Nicosia (the notorious "murder mile") and the other in a Paphos hospital. In the latter case a gunman broke into the hospital and killed a patient who had been attacked a fortnight previously and was recovering from his wounds.

Eoka Campaign against Left-wing Cypriots. - Murders of Trade Unionists.

A new development in the Eoka terrorist campaign was the launching of attacks on left-wing Cypriots and trade unionists, and in particular against Communists, of whom a number were murdered during the first five months of 1958.

The first intimation of this campaign was given in leaflets, distributed in September last, in which Eoka gave details of eight separate attacks made within the previous few weeks on individual members of left-wing organizations. The persons concerned were variously accused of spying on Eoka members, speaking insultingly about Eoka, interfering with the distribution of Eoka leaflets, collaborating with the police, and giving away the names of Eoka members. It was specifically alleged that members of the banned Communist Party were collaborating with the British Intelligence Service and the Government-controlled radio, in the latter case by supplying material for "slanderous propaganda" against Eoka.

Other leaflets, signed by Colonel Grivas, said that the attacks were not specifically directed against Communists and the trade unions as such but against "individual traitors," who would be "punished" whether they belonged to the left-wing or the right-wing. Left-wing organizations were nevertheless accused of sheltering "traitors" instead of denouncing them.

The hostility between Eoka and the Cypriot left-wing came to a head in January 1958 as a result of the murder by Eoka terrorists of two leading members of the Pan-Cyprian Federation of Labour (the principal trade union organization in the island) and the wounding of three others. The attacks were made on Jan. 21 at the villages of Koma Yialou, near Famagusta, and Lyssi, halfway between Nicosia and Famagusta. The Pan-Cyprian Federation of Labour called an immediate 48-hour strike of its 35,000 members in protest against the murders; mass demonstrations were also held in many towns, and a telegram was sent to Archbishop Makarios warning him of the "danger of civil war" if Eoka continued its campaign against left-wing trade unionists.

Another island-wide general strike was called on May 26 in protest at the murder of four left-wing trade unionists—three Greek Cypriots and a Turkish Cypriot—during the previous 48 hours. The Greek Cypriots were murdered at Famagusta, Lefkoniko (south-western Cyprus), and Pera (a village near Nicosia), while the Turkish Cypriot was killed in the Turkish quarter of Nicosia. Particular indignation was aroused by the Lefkoniko murder, where the victim was tied to a tree by Eoka terrorists and beaten to death before the eyes of his wife. The Turkish T.M.T. organization admitted responsibility for the killing of the Turkish victim, who was said to have been a Communist.

Clashes between right-wing and left-wing Cypriots occurred during the demonstrations on May 26, several people being injured at Limassol. The general secretary of the Pan-Cyprian Federation of Labour (Mr. Andreas Zhiartides) publicly denounced the terrorism against left-wing trade unionists in a speech at a mass meeting in Nicosia. Eoka leaflets subsequently appeared on the streets calling on the Cypriot workers to "remove" Mr. Zhiartides and threatening him with death if this were not done. The leaflets reiterated the charge that the left-wing was sheltering "traitors," and declared that Eoka would "continue to kill traitors whatever their political party or affiliation."

Renewed Turkish Riots in Nicosia, Larnaka, Limassol and Famagusta. - Drastic Security Measures.

Widespread communal rioting broke out in Nicosia and Larnaka during the night of June 7-8, in which four Greek Cypriots were killed by Turkish mobs. Scores of people were injured in the riots, and many arrests made by the British authorities.

The Nicosia disturbances began at 10.30 p.m. on June 7, when a small bomb was thrown from a passing car at the Turkish Information Office (part of the Turkish Consulate) in Kyrenia Street. Large numbers of Turkish youths armed with sticks, cudgels, iron bars, and other weapons immediately appeared on the streets and attacked Greek premises in the Old City, setting fire to shops and a cigarette factory and smashing windows. Meanwhile crowds of Greek Cypriots had also come on the streets and a battle developed in which firearms, knives, and clubs were used indiscriminately on both sides. Rioting was particularly severe in the alleys round the Famagusta Gate, where a Turkish mob set a timber yard ablaze and burned down a Greek sports club. While the security forces tried to control the rioting mobs, the fire brigade was called out to deal simultaneously with half-a-dozen big fires. Order was only restored after the security forces had imposed a curfew and erected a barricade along the so-called "Mason-Dixon line"—the division between the Greek and Turkish quarters of the Old City. Two Greek Cypriots were killed in the riots, many Greeks and Turks injured, and 80 persons arrested.

Mob violence also broke out in Larnaka after a crowd of Greeks had gathered in one of the main squares armed with clubs. Crowds of Turks invaded the Greek quarter of the town and wrecked a number of premises, two Greek Cypriots being killed in communal fighting. As in Nicosia, a curfew was imposed by the security forces.

[The Nicosia Correspondent of *The Times* commented: "The incident which began the trouble [in Nicosia] is shrouded in mystery . . . Whether the bomb was actually thrown by a Greek, as the Turks allege, is a matter of raging controversy and the authorities have so far committed themselves to no pronouncement. Certainly what immediately followed bore all the signs of a planned and concerted action by gangs of Turkish youths—reminiscent of the tactics adopted in similar circumstances last January . . ."]

After visiting the area of the riots on June 8, Sir Hugh Foot had a meeting with Turkish communal leaders and urged them to do all in their power to stop the situation from deteriorating further. The Mayor of Nicosia (Dr. Dervis) had telephoned Sir Hugh earlier in the day to protest at what he alleged was "the inert attitude and apathy of the security forces in the face of Turkish murder and arson."

Further serious riots broke out on June 10-12 in Nicosia, Limassol, and Famagusta, in which four more Greek Cypriots were killed and large numbers of Greeks and Turks wounded. In Nicosia, bands of Turkish youths engaged in large-scale arson, in which many Greek shops were burned down and the ancient Greek Church of St. Lucas was gutted; in Limassol, at least 20 people were wounded in stick-and-stone battles between Greek and Turkish Cypriots; and in Famagusta some 17 people were injured in similar communal riots. Seven Greek Cypriots were killed in a violent communal clash on June 12 at the village of Guenyeli, a few miles from Nicosia. Daytime curfews were imposed in Nicosia, Famagusta, and Limassol, where the security forces used batons and tear-gas in attempts to bring the riots under control; about 100 persons, both Greeks and Turks, were reported to be under arrest by the latter date.

New and drastic security measures were imposed by Sir Hugh Foot on June 9, with immediate effect. They were (1) a curfew (6.30 p.m. to 4.30 a.m.) in all the main towns of Cyprus, including the suburbs of Nicosia; (2) a ban on processions and assemblies of all kinds; (3) an all-night ban on the use of buses and taxis throughout the island, except with police permission; (4) cancellation of all entertainments and sporting events. Further measures taken on June 12 included a ban on funeral and wedding processions.

It was announced in London on June 14 that the 16th Parachute Brigade Group (three battalions, each consisting of about 500 paratroopers) was being flown out to Cyprus in view of the deteriorating situation, together with a battery of artillery and a squadron of engineers.

Turkish and Greek Reactions to Communal Disturbances in Cyprus.

The Turkish Foreign Ministry issued a statement on June 8 declaring that the Turkish Government had come to "a full and mature decision to bring about the partition of Cyprus" as the only means of ensuring Turkey's own security. On the same day some 200,000 people in Istanbul demonstrated in support of the Turkish Cypriots' demand for *taksim*; speeches were made attacking both Greece and Britain, and an effigy of Archbishop Makarios was burned in public. The speakers included Dr. Kutchuk, who said that there was no possibility of the Greek and Turkish Cypriots living together, and that the question was no longer one for the Turkish Cypriots but "for 26,000,000 Turks." Tanks, troops and police were called out to disperse thousands of demonstrators attempting to march on the Greek and British Consulates. Similar anti-British and anti-Greek demonstrations took place on June 12 in Ankara, where over 100,000 people demonstrated for *taksim* at the Atatürk Mausoleum.

The Turkish Ambassador in London (Mr. Nuri Birgi) was summoned to the Foreign Office on June 9 by Mr. Selwyn Lloyd; it was understood that the Foreign Secretary had asked Mr. Birgi to urge his Government to exercise its influence on the Turkish Cypriot community to ensure calm and restraint. Similar representations were made in Ankara by the British Ambassador, Sir Roger Bowker.

In Athens, a Foreign Ministry spokesman accused Turkey of working to a "premeditated plan" in order to bring pressure on Britain on the eve of an important British policy statement on Cyprus; it was alleged that the "vandalism" in Nicosia and Larnaka formed part of this "plan." It was also announced that Greece had asked for an immediate meeting of the North Atlantic Council as a result of the anti-Greek riots in Cyprus.

Archbishop Makarios (who had just returned from a week's visit to Egypt) said in Athens on June 9 that the Nicosia and Larnaka riots had been organized in a manner which suggested that they were "part of a prepared plan on the pattern of the anti-Greek riots in Istanbul three years ago" [see 14424 A]. After declaring that the Cyprus Government had "once again proved incapable of preventing or quelling disturbances in time," the Archbishop said that the Greek Cypriots were "forced to organize in self-defence against Turkish provocation or attacks in the future." In a statement before leaving Cairo, the Archbishop had claimed that the United Arab Republic fully supported the Greek Cypriots' demand for self-determination.

The Greek Foreign Minister (M. Averoff) announced on June 12 that a protest had been made to London at the "inadequacy" of the Cyprus administration in protecting Greek Cypriots from Turkish mob violence. M. Averoff also disclosed that the Greek Government had asked for the personal intervention of the U.N. Secretary-General (Dr. Hammarskjöld) in view of the gravity of the situation.

Anglo-Turkish and Anglo-Greek Discussions on Cyprus.

As stated above, Mr. Selwyn Lloyd and Sir Hugh Foot discussed the Cyprus question with Turkish Ministers during the Ankara meeting of the Baghdad Pact Council in January last. No statement was issued on these talks (held on Jan. 28-30), in which Turkey was represented by M. Menderes, the Prime Minister, and M. Zorlu, the Foreign Minister.

On Feb. 10-11 Mr. Selwyn Lloyd and Sir Hugh Foot visited Athens for discussions on the Cyprus question with the Greek Prime Minister, M. Karamanlis, and the Foreign Minister, M. Averoff; the British Ambassador in Athens and the Greek Ambassador in London (Sir Roger Allen and M. Seferiades) also took part in the discussions.

A brief statement was issued on Feb. 12 saying (1) that Mr. Selwyn Lloyd had "explained H.M. Government's viewpoint, stressed the risks inherent in the present situation in Cyprus, outlined various ways whereby he thought progress could be made, and emphasized the importance of restraint and moderation on all sides in order that efforts to achieve a settlement should have a chance of success"; and (2) that M. Averoff had "explained the principles on which Greek policy towards Cyprus is based, and the reasons which made it necessary for a solution to take account of these principles."

Sir Hugh Foot had a private meeting with Archbishop Makarios, who was in Athens at the time and who had been kept informed of the Anglo-Greek talks by M. Averoff. On returning to Nicosia, Sir Hugh said that he had had a "frank exchange" of views with the Archbishop and that the question of his (the Archbishop's) return to Cyprus had not been raised.

Mr. Selwyn Lloyd made the following statement to the House of Commons on Feb. 18 on his discussions in Ankara and Athens:

"My purpose in these talks was to emphasize the dangers of the present situation in Cyprus and to seek an area of common ground on which a settlement could be based. I cannot claim yet to have succeeded in this, nor indeed did I expect that it would be possible to do so at this time. But I do believe that the talks have resulted in the clarification of the position of each of the three Governments, and in that sense have contributed to a solution.

"I have certain ideas as to what might form the area of common ground. I propose to discuss these ideas with my colleagues and follow them up with the two Governments in the most appropriate manner."

Although no further statements were issued, it was understood that diplomatic negotiations on the Cyprus problem were continuing between London and Athens and Ankara. Sir Hugh Foot visited London from May 6-10 for discussions with Mr. Macmillan, Mr. Selwyn Lloyd, and Mr. Lennox-Boyd, whilst the British Ambassadors in Ankara and Athens (respectively Sir James Bowker and Sir Roger Allen) were also recalled to take part in the talks. On his return to Nicosia (May 20) Sir Hugh said that there was agreement between the British Government and himself on the Cyprus question, adding that an important statement would be issued within three weeks. It was also stated in London that a statement on Cyprus would be issued when Parliament reassembled after the Whitsun recess.—(Times - Daily Telegraph - Manchester Guardian - Hellenic News Agency, Athens - Turkish Embassy Press Office, London) **(Prev. rep. Cyprus, 15778 A; 15701 A; 15649; Sir Hugh Foot, 15815 B.)**

A. ITALY - UNITED KINGDOM. — President Gronchi's State Visit to Britain.

The President of Italy and Signora Gronchi paid a three-day State visit to Britain on May 13-15 at the invitation of Queen Elizabeth II and the Duke of Edinburgh. It was the first visit to Britain by the Head of the Italian State since 1924, when King Victor Emanuel III and Queen Elena visited London at the time of the British Empire Exhibition.

The President and Signora Gronchi travelled overland to Calais, where they embarked for Dover in the destroyer H.M.S. *Grenville*, escorted by other British warships and aircraft. They were welcomed at Dover by the Duke of Gloucester and at Victoria Station (London) by the Queen, Prince Philip, and other members of the Royal family, with whom they drove to Buckingham Palace along a route lined by the three Services. In the afternoon (May 13) President and Signora Gronchi visited Westminster Abbey to place a wreath on the Tomb of the Unknown Warrior; called on the Queen Mother at Clarence House; and received addresses at St. James's Palace from the chairman of the London County Council and the Mayor and Corporation of Westminster. In the evening the President and Signora Gronchi were the guests of the Queen and Prince Philip at a State banquet at Buckingham Palace, at which speeches were made by her Majesty and the President.

In the morning of May 14 the President received at Buckingham Palace the High Commissioners of the Commonwealth countries, the Ambassador of the Irish Republic, and the *chefs de mission* of the Diplomatic Corps. Later President and Signora Gronchi drove by carriage from the palace to Guildhall, with a Sovereign's escort of the Household Cavalry, to attend a lunch given in their honour by the Lord Mayor of London (Sir Denis Truscott) and the Corporation of the City. In the afternoon President Gronchi received Mr. Macmillan and Mr. Selwyn Lloyd at Buckingham Palace, while in the evening the President and Signora Gronchi gave a dinner for the Queen and Prince Philip at the Italian Embassy.

On May 15 President Gronchi travelled to Cambridge, where he received the honorary degree of LL.D. and lunched with the Chancellor and Vice-Chancellor of the University, respectively Marshal of the R.A.F. Lord Tedder and Lord Adrian (Master of Trinity College). The President returned in the afternoon to London, where, with Signora Gronchi, he heard Mass at the Italian Church of St. Peter in Clerkenwell. Later in the day they attended a reception for the Italian colony in London, held at County Hall; dined with the Queen and Prince Philip at Buckingham Palace; and attended a reception given by H.M. Government at Lancaster House.

President and Signora Gronchi concluded their State visit on May 16, returning to Rome by air the same evening. (Times - Daily Telegraph)

A. MOROCCO. — Resignation of Si Bekkai. - New Cabinet formed by M. Balafrej. - Publication of "Royal Charter." - Attacks by "Liberation Army" on Spanish and French Territory. - Spanish Southern Morocco transferred to Moroccan Jurisdiction. - Moroccan Claim to French Mauritania. - Internal Developments.

A political crisis was caused in Morocco by the presentation to King Mohammed on April 15 of a resolution criticizing the policy of the Istiqlal members of the Government, which had been signed by seven political leaders (including two Ministers) and approved by the Prime Minister, Si Bekkai. The nine Istiqlal Ministers tendered their resignation in the early morning of April 16, as a protest against the Prime Minister's action in approving the resolution without consulting his colleagues, and Si Bekkai's resignation was announced later the same day. He subsequently told the Press that he had resigned "in order to be free and to defend public liberties and democracy better."

The resolution accused the Istiqlal of attacking freedom of the Press, assembly, and political organization, and demanded legislation guaranteeing democratic liberties before elections were held. In support of its allegations, it referred (*a*) to the suspension in February of newspapers published by the Democratic Independence Party (P.D.I.) for disregarding official instructions not to exploit the French raid on Sakhiet-Sidi-Youssef for party purposes, and (*b*) to a Bill empowering the Minister of the Interior to forbid the formation of new political parties, which was said to be in preparation. The resolution was signed by M. Reda Guedira (Minister of Information) and M. Rashid Mouline (Minister for the Civil Service), who are leaders of the Independent Liberal group; M. Ouezzani and M. Boutaleb, leaders of the P.D.I.; M. Mekki Naciri, leader of the small Moroccan Unity Party; Dr. Khatib, the former commander of the "Liberation Army"; and M. Ahardane, the founder of the banned People's Movement [see 15914 A].

It was pointed out in the French Press that the signatories had little in common except their hostility to the Istiqlal. The Liberal Independents and the P.D.I. are "modernist" in outlook and supporters of *laissez-faire* in economic policy; the former, however, are regarded as pro-American, whereas the latter have adopted an increasingly pro-Egyptian policy in recent months. M. Naciri, Dr. Khatib, and M. Ahardane, on the other hand, are regarded as "traditionalists." Although the Istiqlal includes both conservative and radical elements, its leaders are predominantly "modernists"; it draws its following mainly from the towns, the intellectuals, and the trade union movement, and is also supported by the Communist Party, which remains active although nominally banned.

The formation of a new government was delayed by the King's desire to reconcile the Istiqlal's demand for a homogeneous government "responsible both to the King and the people," and for a representative Assembly, with the minor parties' demand for guarantees for the rights of the Opposition. It was therefore announced on May 8 that the King was drawing up a "charter" which would form the programme of the new government, and that a Prime Minister would be appointed when this was completed. On May 8 the King asked M. Balafrej (general secretary of the Istiqlal, and Foreign Minister in the previous Government) to form a Cabinet; later the same day King Mohammed read a broadcast proclamation in which he announced his intention to convene an elected Assembly.

In his proclamation—which, he said, marked the opening of a new phase in the life of the nation—the King stated that he proposed to establish "political institutions allowing our loyal people to participate directly in the conduct of public affairs." The proclamation laid down the following principles:

(*a*) The national sovereignty was "incarnated in the King, who is its trusty depositary and vigilant guardian."

(*b*) The King would continue to exercise the legislative power "together with the bodies which we shall set up for this purpose."

(*c*) The executive power would be exercised by the Cabinet. Ministers would be individually and collectively responsible to the King, and a decree would be issued defining their powers.

(*d*) Freedom of opinion, expression, association, and organization would be guaranteed, subject only to "the respect due to the monarchial régime, the safety of the State, and the demands of the public interest."

(*e*) The commune would become the basis of the modern organization of Morocco, superseding the existing tribal organization.

(*f*) A committee would be appointed to draw up an electoral law and a law on public liberties.

(*g*) Municipal and communal (district) councils would be subsequently elected.

(*h*) The members of these bodies would elect from among themselves a National Assembly which would excercise the functions assigned to it by the King, and which would be empowered to discuss and vote on the Budget.

(*i*) At a later stage a National Assembly would be directly elected by universal suffrage.

The membership of the new Government was announced on May 12 as follows:

M. Ahmed Balafrej	Prime Minister and Foreign Affairs.
M. Abderrahim Bouabid	Vice-Premier, Economy, and Agriculture.
M. Abdelkrim Benjelloun	Justice.
M. Messaoud Chiguer	Interior.
M. Ahmed Lyazidi	Defence.
M. Omar Ben Abdeljalil	Education.
M. M'Hamed Douiri	Public Works.
M. Bashir Ben Abbès	Labour and Social Questions.
Dr. Abdelmalek Farraj	Health.
M. Mohammed Aouad	Posts and Telegraphs.

All the members of the Government were drawn from the Istiqlal with the exception of Dr. Farraj and M. Aouad, who are regarded as Istiqlal sympathizers.

M. Balafrej (50) was born in Rabat, educated at the Sorbonne and in Cairo, and joined the nationalist movement at the age of 18. He helped to found the Istiqlal in 1943, being elected its general secretary. In the following year he presented a manifesto demanding independence for Morocco to the then Sultan, the French Resident-General, and the diplomatic representatives of the Allied countries. In consequence he was arrested and deported to Corsica by the French authorities, and after his release in 1946 spent several years abroad as the nationalist movement's representative at the U.N. and elsewhere. He became Morocco's first Foreign Minister in 1956.

All the Istiqlal Ministers except M. Bouabid were regarded as belonging to the party's conservative wing; M. Bouabid's position, however, was strengthened by his appointment to the Vice-Premiership and the Ministry of Agriculture in addition to his previous post as Minister of National Economy, thereby bringing all branches of production under his control. The new Ministers were M. Chiguer, who as Director of the Royal Cabinet had been closely associated with the King; M. Ben Abbès, previously Governor of Marrakesh; and M. Aouad, previously Ambassador to Spain. Unlike Si Bekkai's two Ministries, the new Cabinet did not include a representative of the Jewish community.

Recent developments affecting Morocco's relations with France and Spain are described below under cross-headings.

Franco-Spanish Operations against "Liberation Army."

The "National Liberation Army"—which had adopted the name of "Liberation Army of the Moroccan Sahara," and operates independently of the Moroccan Government—was active during the later months of 1957 over much of Spanish Southern Morocco and also in parts of the Spanish Sahara (the former colonies of Saguia el-Hamra and Rio de Oro). Their infiltrations were helped by the fact that the local Spanish forces had been withdrawn to three bases on the coast—Villa Bens (Spanish Southern Morocco), El Aiun (Saguia el-Hamra) and Villa Cisneros (Rio de Oro). The "Liberation Army" was supported during this period by a large section of the Reguebat—the most important of the nomadic tribes of the western Sahara, the members of which wander over the three Spanish territories, north-western Mauritania, and the Tindouf area of western Algeria.

Communiqués issued in December and January by the Spanish authorities and the "Liberation Army," though differing widely in their estimates of casualties, confirmed that the "Liberation Army" was operating in the immediate neighbourhood of the Spanish bases on the coast. A large-scale action took place on Jan. 12-13 near El Aiun, in which Spanish forces repelled a heavy attack by Moroccan irregulars after fierce fighting; Spanish casualties were given in Madrid as 51 killed and wounded, while "Liberation Army" casualties were estimated at over 240 in killed alone. In Rio de Oro, fighting took place near Villa Cisneros on Jan. 3 with casualties on both sides, whilst clashes also occurred from time to time in the Ifni *enclave* during the first few months of the year. The French authorities announced on Feb. 10 that several minor engagements had taken place during the previous fortnight between the French forces in Mauritania and bands of irregulars raiding across the frontier from the Spanish Sahara.

On Feb. 10 a joint offensive against the irregulars was launched by 9,000 Spanish and 5,000 French troops, supported by 60 Spanish and 70 French aircraft. Two French columns advancing from Fort Trinquet (Mauritania) and Spanish columns from Villa Bens and El Aiun converged upon the small town of Smara, which had been heavily attacked by Spanish aircraft. In Rio de Oro French forces from Fort Gouraud and Spanish forces from Villa Cisneros co-operated in wiping out the "Liberation Army" bands, while on the Mauritanian frontier mopping-up operations were carried out by French troops from Tindouf and Fort Trinquet. A Spanish communiqué of March 1 announced that the operations had been brought to a successful conclusion and gave the "Liberation Army's" casualties as 214 killed, against five Spanish soldiers killed and 27 wounded.

According to French sources, however, the majority of the "Liberation Army" escaped into Spanish Southern Morocco. It was nevertheless stressed in French reports that a number of vehicles and considerable stores of food, petrol, uniforms, and medical equipment had been captured, the size of which indicated that the "Liberation Army" had intended to use Spanish territory as a base for operations against Mauritania. It was also pointed out that the operation had succeeded in forcing the "Liberation Army" to retreat behind the official Spanish-Moroccan frontier.

As a further result of the Franco-Spanish offensive, large sections of the Regueibat submitted to the French Government, including some which had never previously acknowledged French authority. Other sections of the Regueibat, however, withdrew into Morocco; by the beginning of March about 12,000 refugees had settled in the Agadir area, about half of whom had come from Ifni and the remainder from the Spanish Sahara, Spanish Southern Morocco, Mauritania, and the Tindouf area.

Transfer of Spanish Southern Morocco.

Following secret negotiations at Cintra (Portugal) between M. Balafrej and the Spanish Foreign Minister, Señor Castiella, an agreement was signed on April 1 providing for the restoration of Spanish Southern Morocco to Moroccan jurisdiction on April 10. This area had previously been administered by Spain under the protectorate treaty of 1912, which was abrogated in 1956; the Spanish Government, however, whilst recognizing Moroccan sovereignty over the territory, had emphasized in December last that it would only agree to its retrocession on condition that it was occupied by the Royal Moroccan Army and not by the "Liberation Army." A communiqué issued in Madrid on April 2 said that the recent operations against the "Liberation Army" had ensured that the Royal Moroccan Army would be able to maintain order in the territory.

Spanish Southern Morocco (also known as Tarfaya) is nearly 10,000 square miles in area, being bounded by the River Draa on the north and by parallel 27 deg. 40 min. in the south. It is mostly desert, inhabited by about 6,000 nomad tribesmen; the only considerable settlement is Tarfaya, a village of a few hundred inhabitants adjoining the post of Villa Bens.

The transfer of control was delayed by the refusal of the Spanish authorities to allow the Moroccan troops to use the main road to Tarfaya, which passes through Saguia el-Hamra; in consequence the Moroccan forces reached Tarfaya only on April 18. Offence was caused in Madrid by King Mohammed's appointment of M. Ali Bou Aida (a merchant who had sat in the Moroccan Consultative Assembly as representative of Ifni) as Governor of the new province of Tarfaya. A Spanish Government spokesman denounced M. Bou Aida as a "dishonest person" who had shown himself hostile to Spain during the Ifni disorders.

In a Note presented in Madrid on April 12, the Moroccan Government demanded the evacuation of all Spanish forces still stationed in Morocco, numbering about 35,000 men. The Spanish Ambassador in Rabat informed King Mohammed on May 10 that the garrison of Villa Bens would shortly be withdrawn and the administrative buildings handed over to the Moroccan authorities.

Moroccan Claims to Mauritania.

Open support for the concept of a "Greater Morocco" including Mauritania was expressed for the first time by King Mohammed on Feb. 25, and by his Cabinet on March 17. Addressing representatives of the Regueibat and other desert tribes during a visit to the extreme south of Morocco, the King declared on Feb. 25 that "we shall continue our efforts for the restoration of our Sahara, in accordance with our historic rights and the will of its inhabitants." The Moroccan Government subsequently announced on March 17 that it had protested to the International Bank against a request for a loan submitted by the *Société des mines de fer de Mauritanie* (which exploits the iron mines at Fort Gouraud), in view of the "Moroccan" character of the area.

King Mohammed laid claim to Mauritania in more explicit terms on March 28 when receiving four prominent Mauritanian public figures—including two members of the Executive Council—who pledged him their allegiance. They were M. Dey Ould Sidi Baba (Minister of Commerce), M. Mohammed Ould Bah (Minister of Education), the Emir of Trarza (Mohammed Ould Fall Oumer, a member of the High Commission of the Joint Organization for the Sahara), and Sheikh Hamadou.

In his speech of welcome, the King said: "For long centuries Morocco and Mauritania have formed a single body united by the same religion, speaking the same language, belonging to the same family, and sharing common traditions . . . Your arrival comes at a time when we are particularly concerned with the problem of our country's frontiers, and when we have taken measures to recover the territories of which it has been illegally dispossessed."

The Emir of Trarza formally surrendered his Emirate to the King who restored it to him as his vassal. Trarza, which includes over 10 per cent of Mauritania's population, lies at the mouth of the River Senegal, in south-western Mauritania; according to Moroccan official spokesmen, the Emir's ancestors had recognized the authority of the Sultan of Morocco in the 17th century.

The four Mauritanians (who said that they had resigned their governmental posts in Mauritania and would stay in Morocco for the time being) told a press conference that the problem was whether Mauritania was to be "integrated into a federation with Negro Africa, with which we have nothing in common, or to form part of the Sheriffan kingdom, to which we are united by our past and our religion, language and culture." Their statement referred to France in friendly terms, expressing the desire for close co-operation between France and "Greater Morocco." In a broadcast on April 9, however, the Emir of Trarza appealed to the Mauritanians to "rise up against tyranny, injustice, and slavery and against the massacre of your brothers," and to wage war against the "infidels." His broadcast was followed by a similar appeal by M. Horma Ould Babana, the former deputy for Mauritania in the French National Assembly, who had settled in Morocco in 1956 [see 15110 A].

The action of the four Mauritanian leaders was strongly condemned by the Mauritanian Government in a statement on March 29, as well as by the Territorial Assembly of Mauritania at an extraordinary session on April 2.

Addressing the Assembly, M. Moktar Ould Daddah (the Deputy Premier) accused the four Mauritanian leaders of "treason to the Mauritanian cause" and of having "betrayed the good faith of their own Government and of the Assembly." He added: "At a time when France is generously giving us the right to govern ourselves and to take our own decisions freely, we reply to Morocco 'No.' We Mauritanians will remain within French West Africa and the French Union."

In an earlier statement in March the Mauritanian Government had recalled that Mauritania did not possess any common frontier with Morocco [they are separated by the Spanish Sahara]; that its frontiers in the north and north-east had been laid down by international treaties concluded long ago; and that these treaties had never been contested in the past.

After a formal protest to Rabat (March 31) against the Moroccan Government's attitude on the Mauritanian question, the French Government issued a statement on April 14 declaring that "the cause of Mauritania, which is determined to preserve its national identity and legitimate interests against claims without historical or juridical foundation, will be defended on all occasions, on all levels, and by all methods."

Breakdown of Inquiry into Arrest of Algerian Leaders.

The Moroccan representative, M. Filali, withdrew on Feb. 28 from the international commission appointed to inquire into the arrest of five Algerian nationalist leaders in 1956 while travelling in a Moroccan plane [see 15925 A], as a protest against the commission's refusal to hear evidence from the five Algerians. This decision had been taken by three votes to two, the French, Belgian and Italian representatives voting in its favour and the Moroccan and Lebanese representatives against.

Supreme Court quashes Death Sentences on French Officers.

On March 24 the special court set up in 1957 to try offences against the security of the State condemned to death *in absentia* two French officers, Colonel Hubert and Commandant Vallache, and an Algerian interpreter, on charges of "spreading anarchy in Morocco and plotting the murder of prominent Moroccans," including M. Balafrej. The charges, which were brought under a law promulgated by the French authorities in 1953, referred to the activities of the accused during 1955-56, when Colonel Hubert was in command of the French forces in the Rif. A Moroccan citizen was also condemned to death on similar charges.

The sentences aroused strong feeling in France, in view of the vagueness of the charges and of allegations (subsequently denied by the Moroccan Government) that the two officers had not even been informed of the proceedings against them. M. Tixier-Vignancour, an extreme right-wing deputy, sent a telegram to the King of Morocco on March 25 threatening that if the condemned Moroccan was executed the Moroccan Ambassador in Paris and his staff would "suffer just reprisals." The French Government decided on March 26 (i) to protest strongly against the sentences; (ii) to open legal proceedings against M. Tixier-Vignancour; and (iii) to promote Colonel Hubert to the rank of *général de brigade*. On an appeal lodged by the Moroccan Procurator-General, the Moroccan Supreme Court quashed all the sentences on April 1 on procedural grounds—viz., that the special court, contrary to the terms of the decree establishing it, had opened proceedings without the written approval of the Minister of the Interior.

Monetary Agreements with France and Spain.

A financial agreement between France and Morocco was concluded on Feb. 1, 1958, as a result of discussions between M. Bouabid and M. Pflimlin (then French Finance Minister) which had been in progress since November last.

Following the partial devaluation of the franc by 20 per cent which the French Government had carried out on Aug. 10, 1957, without consulting the other countries of the franc area, and which affected all imports into the area, M. Bouabid warned France in November that it might become necessary to revalue the Moroccan franc at 1.10 to 1.20 French francs in order to avoid price increases. In consequence the French Government decided on Nov. 20 to release 5,000,000,000 fr. which had been voted by Parliament as a contribution to Morocco's equipment budget, but had been blocked for political reasons.

The provisions of the agreement concluded on Feb. 1 were as follows :

(1) The Moroccan franc would remain at par with the French franc, and Morocco would remain in the franc area.

(2) A compensation fund would be established to keep down the prices of imports, and the French Government would contribute 4,000,000,000 fr. as a gift and 2,300,000,000 fr. as a loan. Importers of essential goods (e.g. cereals, tea, sugar, textiles, fuel oils, industrial raw materials, and agricultural and industrial equipment) would receive an average refund of 10 per cent of the cost from the compensation fund.

(3) The Moroccan Bureau of Currency Exchange would be transferred from Paris to Rabat, and would be controlled by the Moroccan Government through the State Bank.

Under an agreement between the Moroccan and Spanish Governments, signed on Jan. 14, the peseta was withdrawn from circulation in the former Spanish zone during February and replaced by the franc.

Establishment of "Purge Commission."

A Royal decree issued on April 17 set up a "purge commission" to decide the penalties to be inflicted on persons who, between Dec. 24, 1950 (when the Pasha of Marrakesh first entered into open opposition to the Sultan) and Nov. 16, 1955 (when the Sultan returned from exile), had "knowingly and deliberately participated in the preparation, execution, or consolidation of the *coup de force* of Aug. 20, 1953 [i.e. the Sultan's deposition], or committed acts of violence against the people or the resistance movement." It was stated that only persons who took a "decisive part" in those events would be affected by the decree.

The commission was empowered to impose penalties of deprivation of civil rights for three to five years, and total or partial confiscation of "property acquired by evil means"; the accused, however, might receive legal assistance and might appeal against their sentences to the King. In anticipation of the appointment of the commission, a list of 193 persons who were forbidden to dispose of their property had been published in September last.

Reconciliation between King Mohammed and Abd El Krim.

After receiving the youngest son of Abd El Krim (leader of the Rif revolt of 1921-26) in audience on March 17, the King announced that he had granted the "fighter and hero Abd El Krim" a pension in recognition of his "inestimable services to the country." An invitation to return to Morocco from his voluntary exile in Cairo, conveyed by M. Bouabid on the King's behalf, was declined, however, by Abd El Krim, who stated that he would not return "until North Africa is completely free." The King's gesture was regarded as marking the end of a long feud between Abd El Krim, who headed a "Rif Republic" from 1921-26, and the ruling Alouite dynasty. (Le Monde - Le Figaro) **(Prev. rep. 15925 A ; 15895 A.)**

A. CANADA. — Cabinet Changes.

The following changes in Mr. Diefenbaker's Cabinet were announced on May 12 : (*a*) Mr. Raymond O'Hurley as Minister of Defence Production, a portfolio previously held by Mr. Howard Green in addition to that of Public Works ; (*b*) Mrs. Ellen Fairclough as Minister of Citizenship and Immigration, a portfolio previously held by the Minister of Justice, Mr. Davie Fulton ; (*c*) Mr. Henri Courtemanche as Secretary of State *vice* Mrs. Fairclough.

Mr. O'Hurley (M.P. for Lotbinière) and Mr. Courtemanche (M.P. for Labelle) both come from Quebec ; Mr. Courtemanche was formerly Deputy Speaker of the Federal House of Commons. Mrs. Fairclough is M.P. for Hamilton.

Mr. Diefenbaker announced on the same day that Senator John T. Haig had resigned as Government Leader in the Senate (in which he would retain his seat) and had been succeeded by Senator Walter M. Aseltine.—(Montreal Star) **(Prev. rep. 15780 B.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves. - Movement of Sterling Balances.

The Treasury announced on June 3 that the sterling area's gold and dollar reserves rose during May by $125,000,000, after taking into account (*a*) the receipt of $4,500,000 from the E.P.U. in respect of the U.K.'s surplus in April, and (*b*) the payment of $2,500,000 to creditor countries in the Union under bilateral settlements. As a result the gold and dollar reserves stood at $3,039,000,000 on May 31.

The increase—the eighth successive monthly rise since the crisis of September 1957—brought the gold and dollar reserves to their highest level since 1951. It included $5,000,000 of U.S. defence aid in consequence of the tobacco-housing deal announced in February (see 16104 C).

Provisional figures for the E.P.U. May settlement showed that Britain had a deficit of £13,000,000, three-quarters of which would be settled during June in gold or dollars and one-quarter by an increase in the U.K.'s debt to the Union.

Sterling, though maintaining generally a strong position during May, eased from 2.81$\frac{13}{16}$ on May 1 and May 2 to 2.81$\frac{1}{4}$ on May 6 and 2.81$\frac{1}{8}$ on May 7 owing to the labour position in connexion with the London bus strike and the threat of a railway strike ; it recovered on subsequent days, however, and for the rest of the month fluctuated between 2.81$\frac{1}{2}$ and 2.81$\frac{3}{4}$, closing on May 31 at 2.81$\frac{15}{16}$. The transferable sterling rate in Zurich showed parallel fluctuations, reaching 2.79225 on May 6 and 7 as its lowest point and 2.79625 on May 19 and 20 as its highest.

The May issue of *Economic Trends*, published by the Treasury, gave the first quarterly figures of sterling balances held by both Commonwealth and foreign countries.

The figures showed that these sterling balances (excluding sterling held by international organizations) amounted to £3,234,000,000 on March 31, 1958, compared with £3,267,000,000 on Dec. 31, 1957, £3,469,000,000 on Sept. 30, 1957, and £3,594,000,000 on June 30, 1957. The sterling balances had thus declined by £125,000,000 during the third quarter of 1957, £102,000,000 during the fourth quarter, and £33,000,000 during the first quarter of 1958.

Detailed movements during the latter quarter showed that the independent Commonwealth countries (especially India, Pakistan, Ceylon, and New Zealand) had run down their balances by £77,000,000. On the other hand, sterling balances held by dependent overseas territories increased by £6,000,000, those of the dollar area by £7,000,000, those of the non-dollar, non-sterling world (i.e. mainly the Soviet bloc, Communist China, and Japan) by £20,000,000, and those of O.E.E.C. countries by £14,000,000.

It was pointed out in the Press that if the fall of £33,000,000 in the sterling liabilities was taken in conjunction with the rise of £172,000,000 in the central gold and dollar reserves during the first quarter of 1958, the strength of the pound during the period became even more striking. If the position as at March 31 was compared with that at Sept. 30, 1957, it was evident that the U.K. had paid off £135,000,000 of its sterling debts during this period, whilst at the same time adding no less than £239,000,000 to the reserves, excluding the Export-Import Bank loan.—(Treasury Press Office - Financial Times) **(Prev. rep. 16188 A.)**

C. ANTARCTICA. — Belgian Expedition.

The 11-nation network of scientific bases for the I.G.Y. programme in Antarctica was completed on Dec. 12, 1957, by the establishment of a Belgian base 14 miles inland from the Princess Ragnhild Coast of Queen Maud Land, in the Norwegian Antarctic. It was named King Baudouin Base in honour of the King of the Belgians.

The Belgian Expedition is led by Commander Gaston de Gerlache de Gomery, with Captain Xavier de Macre d'Aertrycke as deputy leader. Both served in the underground Belgian Resistance during the war. In addition to carrying out meteorological, geomagnetic and other studies, the expedition will explore a high mountain range 200 miles inland which has never been visited before and which was last flown over in 1947, when U.S. Navy pilots reported peaks rising to 13,000 feet.

The expedition is equipped with prefabricated huts, tracked vehicles (U.S. Sno-Cats and a Canadian Muskeg), an Auster plane on skis, a helicopter, and 24 Greenland "huskies"; the pilot of the expedition is Prince Antoine de Ligne, a member of the Belgian Royal House.

The Belgian Expedition travelled out to the Antarctic in two Norwegian sealers, with about 450 tons of supplies on board in addition to the above-mentioned equipment.

(Prev. rep. 16179 A ; 16055 A.)

A. AFRICA. — The Accra Conference.

A conference of independent African States—the first of its kind—was held in Accra (Ghana) on April 15-22. The participating countries were Ethiopia, Ghana, Libya, Liberia, Morocco, the Sudan, Tunisia, and the United Arab Republic. Liberia was represented by President Tubman, Ghana by Dr. Kwame Nkrumah (Prime Minister), Ethiopia by Crown Prince Haile Selassie, and the other countries by their Foreign Ministers: Mr. Bouri (Libya), Mr. Balafrej (Morocco), Mr. Mahgoub (Sudan), Mr. Mokaddem (Tunisia), and Dr. Fawzi (United Arab Republic.)

The proceedings were opened with a speech by Dr. Nkrumah, on whose initiative the conference had been called.

After remarking that it was the first time in history that representatives of independent sovereign States in Africa had met together with the aim of "forging closer links of friendship, brotherhood, co-operation, and solidarity," Dr. Nkrumah enumerated the purposes of the conference as follows: (1) to exchange views on matters of common interest; (2) to consolidate and safeguard the independence of the African nations; (3) to strengthen the economic and cultural ties between them; (4) to "find ways of helping those who are still under colonial rule"; (5) to discuss the problem of safeguarding peace; and (6) to appeal to the great Powers to disarm "and thus save the world from destruction."

Dr. Nkrumah said that while he would "prefer to bury the past and build for the future," he had to emphasize that "Africa will not remain silent in the face of injustice or fail to criticize what is wrong; on the contrary, we shall always express our views honestly and fearlessly, and fight with all our strength for freedom and justice for all peoples throughout the world." He went on to mention briefly the two principal factors which had shaped the history of Africa during recent centuries—the slave trade, the abolition of which was "quickly followed by colonialism"; and the "scramble for Africa" in the 19th and 20th centuries by European Powers. The "evil consequences of colonialism and racialism" had led to rivalry between those Powers, culminating in the First World War; even after the Second World War many African territories mandated a quarter of a century earlier continued to be held "in trust."

After denouncing racialism in all its forms, Dr. Nkrumah said that the independent African nations should set an example to the world by establishing tolerant and multi-racial communities, practising goodwill towards minorities and individuals within their own countries, and demonstrating the same attitude towards other nations. He went on to recall that many Asian nations had gained their freedom in recent years, and emphasized the responsibility of the independent African States "to hasten the total liberation of Africa, the last stronghold of colonialism." He paid tribute to Britain in this connexion for helping the former British Togoland to merge with independent Ghana.

Dr. Nkrumah went on to give a warning of attempts by "imperialists of today" to influence the policies of small uncommitted countries in a particular direction, and stressed the need for those countries to remain alert and vigilant. "We must endeavour to seek the friendship of all and the enmity of none . . . and to assert our own African personality" After commending to the conference the five *Panch Sila* principles enunciated at Bandung, he spoke of the need to develop mutual trade, the desirability of closer cultural relations, and the need to develop the resources of the African continent, in which both African and friendly non-African countries should participate.

In the concluding section of his speech Dr. Nkrumah dwelt on the need to abolish colonialism, which he described as "the enemy of lasting peace", to bring about world disarmament and the abolition of destructive weapons; and to develop the under-developed countries of the world. He strongly condemned reports that the Sahara Desert might be used as a testing-ground for nuclear weapons, appealed to the U.N. to halt "this threat to the safety of Africa," and said that though the Sahara might have divided the nations of Africa in the past, it now united them and "an injury to one was an injury to all."

Among the other speakers, Dr. Fawzi asked the conference to support the rights of the "Arab nation of Palestine," while Mr. Balafrej, Mr. Mokaddem, and Mr. Bouri all denounced French policy in Algeria and expressed their support for Algerian independence. All delegates stressed the importance of inter-African co-operation, in which connexion Prince Haile Selassie announced that Ethiopia would award 200 scholarships, tenable in Addis Ababa, to Africans in all parts of the continent.

Mr. Mahgoub called upon France, "the former champion of freedom," to see "the utter folly of the Algerian war . . . and regain the friendship of all freedom-loving people by granting Algeria her independence." He described "the alleged superiority of Europeans over the coloured peoples of the earth" as "a malignant malady that has plagued human relations in Africa since the advent of the white man," adding that "the Sudan has indeed been fortunate in that under British rule we did not suffer from racial discrimination to any marked degree."

In the course of his speech Mr. Mahgoub said that the Sudan's foreign policy was based on five principles: (1) neutrality between the power blocs of East and West, and co-operation with either of them if it served Sudanese interests; (2) non-alignment with any of the Arab blocs; (3) full co-operation with all independent African nations, and encouragement of the "liberation movements" in dependent African territories and elsewhere; (4) avoidance of military pacts except for the defence of the Sudan against overt aggression; (5) acceptance of foreign economic aid provided it involved no derogation from Sudanese sovereignty and independence.

The conference also heard speeches by a representative of the Algerian nationalist movement (the F.L.N.) and by Dr. Felix Moumié, president of the *Union des Populations Camerounaises* in the French Cameroons. [The pro-Communist U.P.C. was banned by the French authorities in 1955 after a series of riots in Duala and other centres see page 15511, second column.] Dr. Moumié and a three-man F.L.N. delegation were present as observers and not as participants in the conference itself.

Dr. Moumié made numerous allegations of "colonialism" and "aggression" against the French authorities in the Cameroons; alleged that French forces were engaged in military operations against the population; and asserted that a "guerrilla war" was in progress. He said that the U.P.C. demanded the unification of the French and British Cameroons as a preliminary to Cameroonian independence; that his movement had offices in Khartoum, Cairo, and Calcutta; and that financial support would be given by Afro-Asian countries.

M. Mohammed Yazin (a member of the National Council of the F.L.N.) appealed to all independent African countries to give material and financial aid to the insurgents so that the Algerian struggle could be "brought to a successful conclusion."

Joint Declaration.

The conference ended with the adoption of a joint declaration and a number of resolutions on different subjects. The declaration was worded as follows:

"We, the African States assembled in Accra . . . proclaim and solemnly reaffirm our unswerving loyalty to the U.N. Charter, the Universal Declaration of Human Rights, and the Declaration of the Afro-Asian Conference held in Bandung.

"We further assert and proclaim the unity among ourselves and our solidarity with the dependent peoples of Africa, as well as our friendship with all nations. We resolve to preserve the unity of purpose and action in international affairs which we have forged among ourselves at this historic conference; to safeguard our hard-won independence, sovereignty, and territorial integrity; and to preserve among ourselves a fundamental unity of outlook on foreign policy so that a distinctive African personality will play its part, in co-operation with other peace-loving nations, to further the cause of peace.

"We pledge ourselves to apply all our endeavours to avoid being committed to any action which might entangle our countries to the detriment of our interests and freedom; to recognize the right of the African people to independence and self-determination, and to take appropriate steps to hasten the realization of this right; to affirm the right of the Algerian people to independence and self-determination; to uproot forever the evil of racial discrimination in all its forms, wherever it may be found; and to persuade the great Powers to discontinue the production and testing of nuclear and thermo-nuclear weapons and to reduce conventional weapons.

"Mindful of the urgent need to raise the living standards of our peoples by developing to the fullest possible advantage the great and varied resources of our lands, we pledge ourselves to co-ordinate our economic planning through joint economic effort; to study the economic potentialities, technical possibilities, and related problems in our respective States; to promote co-ordinated industrial planning either through our individual efforts and/or through co-operation with the U.N. Specialized Agencies; to increase trade and improve communications between our countries; and to encourage the investment of foreign capital and skill provided they do not compromise the independence, sovereignty, and territorial integrity of our States.

"In furtherance of our social and cultural aspirations, we will endeavour to promote and facilitate the exchange of teachers, professors, students, exhibitions, and educational, cultural, and scientific material; to encourage and strengthen studies of African culture, history, and geography in institutions of learning in the African States; and to take all measures in our respective countries to ensure that such studies are correctly orientated.

"We have charged our Permanent Representatives at the U.N. with the task of co-ordinating all matters of common concern to our States, examining and making recommendations on concrete practical steps for implementing our decisions, and preparing the ground for future conferences."

Resolutions.

Many resolutions were adopted, including resolutions which (1) called for close political, economic, and cultural co-operation among the African nations; (2) called on the colonial Powers to set definite dates for granting independence to their African colonies; (3) denounced all forms of racial discrimination; (4) urged that all African nations should celebrate April 15

(the date on which the Accra conference opened) as "African Freedom Day"; (5) condemned what was described as "the use of armed force" in the French Cameroons; (6) recognized "the right of the Algerian people to independence and self-determination"; (7) called for a "just solution" of the Palestine problem; and (8) appealed to the great Powers to cease nuclear and thermo-nuclear weapon tests.

Algeria. The resolution on this subject expressed "deep concern" at the continuance of the Algerian war and at "the denial by France to the Algerian people of the right of independence and self-determination." It (1) deplored "the appalling scale of hostilities and bloodshed" in Algeria and urged the immediate cessation of hostilities; (2) called upon France to enter into negotiations with the Algerian Liberation Front [i.e. the F.L.N.] "with a view to reaching a final and just settlement," and to "end her present military occupation of Algeria"; (3) appealed to "all peace-loving nations" to "exercise moral pressure on France to adopt a policy which is in conformity with the principles of the U.N. Charter"; and (4) appealed to "the friends and allies of France" to "refrain from helping France . . . in her military operations in Algeria."

French Cameroons. The resolution on this subject called upon France to satisfy "the legitimate aspirations" of the Cameroonian people by opening "direct negotiations with their representatives." It condemned what was described as "the use of military force against unarmed peoples in the Trust Territory of the Cameroons under French administration," and appealed to the U.N. to help the Cameroonian people to achieve their independence.

Racial Discrimination. The resolution "noted with abhorrence" the post-election statement by the Prime Minister of South Africa that the policy of *apartheid* would continue to be applied in the Union [see page 16170, first column]. It appealed to the religious and spiritual leaders of the world to "support all efforts directed towards the eradication of racialism and segregation."

Palestine. As stated above, a resolution was adopted calling for a "just solution" to the Palestine problem. Unlike the Bandung resolution on the same subject, it contained no declaration of support for the "rights of the Arab people of Palestine," nor did it specify that a solution should be based on the U.N. partition plan of 1947 and the repatriation of Arab refugees.

[The *New York Times* commented in this connexion that three of the States taking part in the Accra conference—Ghana, Ethiopia, and Liberia—had recognized Israel, and that particularly close relations existed between Israel and Ghana.]

Dr. Nkrumah left Accra on May 30 for visits to all the African countries which participated in the conference; during the first fortnight of June he visited Ethiopia, the Sudan, Libya, and Tunisia and had discussions with the political leaders of those countries on questions of common interest. While he was in Khartoum, it was announced that Ghana and the Sudan would establish diplomatic relations at embassy level and that a Ghanaian economic mission would visit the Sudan.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - Sudan Government Information Office, Khartoum)

A. ARGENTINA. — Naval Attack on Unidentified Submarine. - Statement by President Frondizi.

At a special press conference in Buenos Aires on May 23, President Frondizi disclosed that warships of the Argentine Navy had attacked and possibly sunk a submarine of unknown nationality which had been detected on May 21 inside Argentine territorial waters.

The President explained that naval manoeuvres were taking place on the latter date in the Golfo Nuevo (off the Patagonian coast) in which seven Argentine warships were engaged—the cruisers *Argentina, Belgrano* and *Nueve de Julio* and the destroyers *Buenos Aires, Entre Rios, Misiones* and *Santa Cruz*. Detector instruments had revealed the presence of a submarine travelling submerged at high speed, and the destroyers had immediately launched four attacks with depth-charges; there was a glimpse of a periscope, followed by oil patches on the sea "such as when a submarine is damaged." Subsequent searches by Argentine warships had failed to locate the submarine, and it was not known whether it had been sunk or had succeeded in escaping to sea. Argentine naval officers were of the opinion that the submarine's high velocity indicated that she belonged to one of the great Powers.

The U.S., British, Soviet, Chilean, and other embassies in Buenos Aires denied that the submarine belonged to their respective countries. The British Admiralty and the U.S. Navy Department confirmed that no British or American submarines were missing and that none had been operating in South American waters.—(New York Times)

B. UNITED KINGDOM. — Gatwick Airport opened.

London's second major airport—at Gatwick, on the Surrey-Sussex border 25 miles south of the capital—was opened on June 9 by the Queen. Built at a cost of £7,000,000, Gatwick is the first airport in the world where trunk road, main railway-line, and air facilities are combined in one unit.—(Times)

(Prev. rep. 13948 A.)

C. NORTH AFRICA. — Tangier Conference of North African Nationalist Parties.

A conference of representatives of the Moroccan Istiqlal Party, the Tunisian Néo-Destour, and the Algerian National Liberation Front (F.L.N.) met in Tangier on April 27-30 to discuss the Algerian war and methods of achieving North African unity. Protests against their exclusion from the conference were received from the Moroccan Democratic Independence Party and the Algerian National Movement (the organization led by M. Messali Hadj), and also from M. Salah Ben Youssef, the former general secretary of the Néo-Destour, now in exile.

The Istiqlal delegation consisted of Si Allal El Fassi (the party leader), M. Balafrej (then Foreign Minister of Morocco, and now Prime Minister), M. Bouabid (Minister for Economic Affairs), M. Ben Barka (president of the Consultative Assembly), M. Ben Seddik (general secretary of the Moroccan Workers' Union), and M. Khadiri. The Néo-Destour was represented by M. Ladgham (State Secretary for Defence), M. Tlili (general secretary of the General Union of Tunisian Workers), and M. Chaker. The F.L.N. representatives were M. Ferhat Abbas, M. Abdelhafid Boussouf, M. Abdelhamid Mehri, M. Ahmed Francis, and M. Boumendjel.

Apart from the opening and closing sessions, the conference held its discussions *in camera*. The final resolution, issued on April 30, pledged the full support of the Moroccan and Tunisian Governments for the Algerian insurgents; recommended the formation of an Algerian Government; supported the Moroccan claim to Mauritania [see page 16224]; and proposed the establishment of a North African Consultative Assembly as a step towards federation. The main sections of the resolution are summarized below.

The Algerian War. "The conference for the unification of the Arab Maghreb . . . solemnly proclaims the Algerian people's unquestionable right to independence as the only condition on which the Franco-Algerian conflict can be solved . . . The political parties [of Morocco and Tunisia] will ensure the complete support of their peoples and Governments for the Algerian people in their struggle for independence. In view of the fact that the rallying of the Algerian people round the F.L.N. makes it the sole representative of fighting Algeria, the conference recommends the formation of an Algerian Government, after consultation with the Tunisian and Moroccan Governments."

Foreign Aid to France. "In view of the fact that France has received financial and military aid from certain Western countries and from NATO for her colonial war in Algeria . . . the peoples of North Africa, through their representatives . . . address a solemn and urgent appeal to them to end all political and material aid intended to support the colonial war in the Arab Maghreb."

Morocco and Tunisia. "The conference denounces the maintenance of foreign troops on Moroccan and Tunisan territory as incompatible with the sovereignty of independent countries; demands the immediate ending of the use of Moroccan and Tunisan territory by the French forces as bases for aggression against the Algerian people . . . and affirms its active solidarity with the Mauritanian people's struggle for liberation."

North African Unity. "The conference . . . resolves to work for the realization of the unity of the Arab Maghreb, and considers that the federal form corresponds to the circumstances of the participating countries. For this purpose, the conference proposes the establishment during the transitional phase of a Consultative Assembly of the Arab Maghreb, formed from the National Assemblies of Tunisia and Morocco and the National Council of the Algerian Revolution. [The latter body—the Consultative Assembly of the F.L.N.—has consisted since September 1957 of 54 members, whose names have never been published.] The Assembly will be empowered to study questions of common interest and to make recommendations to the local executive bodies.

"The conference recommends that the Governments of countries of the Arab Maghreb should not enter into engagements in the field of foreign relations or defence until federal institutions have been established."

Permanent Organization. The conference decided to set up a six-member secretariat (two from each of the movements participating) to ensure the implementation of its decisions, with offices in Rabat and Tunis.

The conference resolutions were formally submitted on May 1 to the King of Morocco, who received the delegations in audience, and on May 7 to President Bourguiba.

(Times - Le Monde, Paris) (Prev. rep. 15915 A.)

D. IRISH REPUBLIC. — Par Value for Irish Pound.

The International Monetary Fund announced on May 14 that the initial par value for the Irish pound had been established by agreement with the Government of the Irish Republic at 0.357143 Irish pounds to the U.S. dollar, the other parities being £ Irish 1 = 2.48828 grams of fine gold or 280 U.S. cents.

(International Monetary Fund - Irish Times, Dublin)

(Prev. rep. 15876 A.)

A. UNITED ARAB REPUBLIC - SOVIET UNION. — President Nasser's Visit to the U.S.S.R.

President Nasser arrived in Moscow on April 29 on an official visit to the Soviet Union. He was accompanied by two of the four U.A.R. Vice-Presidents, M. el-Boghdadi and M. Hourani; M. Kamaleddin Hussein, Minister of Education; Dr. Fawzi, Minister of Foreign Affairs; Wing-Commander Ali Sabry, Minister of State for Presidential Affairs; and Major Karim, Minister of Rural and Municipal Affairs for the Syrian Region. A TU-104 airliner was sent from Moscow to Cairo to fly the President and his party to the Soviet capital.

During their stay in Moscow President Nasser and the other Egyptian delegates had a number of discussions with President Voroshilov, M. Khrushchev (the Soviet Prime Minister), M. Mikoyan and M. Kozlov (First Deputy Premiers), M. Kirichenko (a member of the Presidium of the Supreme Soviet), M. Mukhitdinov (chairman of the Foreign Affairs Commission of the Soviet of Nationalities), and M. Gromyko, the Foreign Minister of the U.S.S.R.

President Nasser and his party also attended the May Day military parade in Red Square, a sports festival at the Lenin Stadium, a Soviet-Arab friendship meeting in the Kremlin, and a State reception. On May 3 the President and his party flew to Tashkent (the capital of Uzbekistan), where they visited a large textile mill and a collective farm. Subsequently they paid visits to Baku, the Black Sea resort of Sochi, Zaporozhye (site of one of the largest Soviet power stations), and Stalingrad, returning to Moscow on May 13.

President Nasser and the other Egyptian visitors left Moscow for Cairo on May 15. A joint statement on the talks between the Soviet and U.A.R. delegations was issued on the same day, its principal sections being given below.

"The two Governments express their profound satisfaction with the development of the close and steadily expanding relations between the two countries. They will strive for the further development and consolidation of these relations, guided by the following principles: (1) mutual respect for the sovereignty and territorial integrity of all States; (2) non-intervention in domestic affairs, (3) solution of international problems exclusively by peaceful means, and renunciation of the use of force against the sovereignty and independence of any State; (4) rejection of the use of political or economic pressure; (5) equality in relations between States.

"Both Governments adhere to the principle of peaceful co-existence among States irrespective of their social systems . . . They believe that an end to the 'cold war' accords with the vital interests of all peoples . . . They denounce colonialism in all its manifestations and support the right of peoples to self-determination and independence. The two Governments denounce the existence of military bases of some countries on the territories of others. Such bases constitute a serious threat to world peace and infringe the independence of the States on whose territories they are situated . . .

"The two Governments examined the question of the Palestinian Arabs and their expulsion from their homes. They also examined the violation of human rights and the threat to peace and security in that area which this entails. They reaffirm their full support for the legitimate rights of the Palestinian Arabs.

"Both Governments denounce the colonial aggression against the Yemen and the attempts to intervene in its internal affairs. They fully support the independence, sovereignty, and territorial integrity of the Yemen.

"Both Governments deplore the savage war France is waging against the Algerian people and the crimes the French armed forces are committing against this heroic Arab country. They call the attention of world public opinion to the actions of the French authorities, who have forcibly expelled hundreds of thousands of Algerians from the Algerian-Tunisian border area . . . Both Governments fully support the right of the Algerian people to self-determination and independence . . .

"Both Governments express their deep anxiety at the acts of interference by certain foreign States in the internal affairs of Indonesia. They regard this as a threat to world peace and security and as a breach of the U.N. Charter [and] declare that the independence and sovereignty of Indonesia must be respected.

"Both Governments believe in the importance of the U.N. and its role in the maintenance of peace and security and in the peaceful settlement of international problems. They consider that efforts should be made to strengthen the organization by every means . . . They equally believe that the Chinese People's Republic must be given its seat in the United Nations . . .

"Both Governments reaffirm their support for the principles enunciated at Bandung . . . which were reasserted by the Afro-Asian Solidarity Conference in Cairo in 1957 . . . They also declare their support for the principles enunciated at the conference of independent African States at Accra [see 16226 A].

"Both Governments express their deep anxiety at the arms race . . . which may lead to a devastating nuclear war. They declare that the testing of atomic and hydrogen weapons must be ended by all States possessing such weapons, pending the necessary agreement on the final and unconditional prohibition of all types of nuclear weapons . . . Atomic and hydrogen energy should be used for peaceful purposes only, and countries should co-operate in this field . . .

"Both Governments consider that efforts must be redoubled for an agreement on a substantial reduction of national armed forces and armaments . . . [and] that the conclusion of non-aggression pacts can help to reduce international tension . . .

"It is the firm conviction of both Governments that the furtherance of economic and cultural relations between States must be encouraged as a way of establishing mutual understanding between the peoples . . . Such relations should not be accompanied by any conditions or motives designed to allow one State to dominate another. The economic and cultural agreements concluded between the Soviet Union and the United Arab Republic are consistent with these requirements and based on sound principles. Both Governments express their complete satisfaction with the development of economic and cultural co-operation between their countries and with the commercial exchanges between them. The Government of the U.A.R. expressed gratitude for the Soviet Union's sizable contribution to the U.A.R.'s industrialization programme. Both Governments reaffirm their determination to seek a further expansion of economic and cultural co-operation between the two countries . . ."

In conclusion, the communiqué expressed "complete satisfaction with the results of the present discussions"; declared "that a summit conference with the participation of the great Powers as well as of certain other States would be of paramount importance and must be expedited"; and stated that both Governments were "deeply satisfied to note the close and developing co-operation between their countries in every field of activity." It added that President Voroshilov, M. Khrushchev, and other Soviet leaders had accepted an invitation to visit the United Arab Republic.

In a broadcast on his return to Cairo, President Nasser said that his talks in the Soviet Union had taken place "between a strong and independent State and a friendly, disinterested State." Though the social systems of the U.A.R. and the Soviet Union were different, neither country had any wish to interfere in the internal affairs of the other.

It was announced in Paris on May 17 that the French Foreign Minister (M. René Pleven) had made a strong protest to the Soviet Ambassador (M. Vinogradov) against the "inadmissible" wording in the joint Soviet-A.U.R. communiqué relating to the Algerian problem and the actions of the French armed forces in Algeria.

Economic Agreements between U.A.R. and U.S.S.R. - Expansion of Soviet-Egyptian Trade Exchanges.

Prior to President Nasser's visit, an Egyptian mission had left for Moscow on April 8 to negotiate on the acquisition of mining and petroleum equipment under the agreement of 1957 providing for the implementation of Egypt's five-year industrialization programme [see 15906 C, 15998 B]. A Russian mission was in Egypt at the same time for the completion of other contracts. The Egyptian Minister of Industry (M. Aziz Sidky) stated on April 9 that the ceiling price for each of the 65 projects for which the Soviet credits were being used was based on comparative world prices, with the exchange rate of the rouble to the Egyptian pound quoted against gold equivalents.

A barter agreement between the U.A.R. and the Soviet Union was signed in Cairo on April 7, providing for the supply of 150,000 tons of Russian wheat against certain Egyptian products. An agreement on Soviet aid for establishing 15 vocational centres throughout Egypt was signed on April 15.

It was also announced on April 7 that the Soviet Union would open information offices in Egypt "similar to those maintained by the United States," and that the Egyptian Government would establish information offices in the U.S.S.R.

Statistics of Egypt's foreign trade in 1957, published in March, indicated the growth of the economic ties between Egypt and the Soviet-bloc countries.

Egyptian exports to the Soviet Union, principally cotton, amounted to £E.31,280,000, and Soviet exports to Egypt (wheat, petroleum, and other goods) to £E.18,590,000. Total trade between the two countries—nearly £E.50,000,000—represented a four-fold increase over 1956, the Soviet Union having become Egypt's main customer and supplier—a position occupied in 1956 by the United States.

The Soviet Union, Communist China, Czechoslovakia, Eastern Germany, Poland and Rumania together accounted for £E121,000,000 of Egypt's total trade turnover of £E.354,000,000. Figures for the current cotton season (which started on Sept. 1, 1957) showed that three-fifths of Egypt's total cotton exports were going to the Communist countries.

By comparison, the U.S.A. sent goods worth £E.16,390,000 to Egypt in 1957, while Egyptian exports to the U.S.A. amounted to £E.7,770,000. Western Germany imported £E.5,560,000 and exported £E.18,070,000. Combined British and French trade with Egypt in 1957 amounted to only about £E.8,000,000.

Egypt's total exports in 1957 were valued at £E.171,600,000 and her imports at £E.182,600,000; the deficit of £E.11,000,000 was the lowest for 17 years, reflecting the restrictions imposed on the import of consumer goods.—(Soviet Embassy Press Department, London - Times - Le Monde, Paris)

(Prev. rep. 15906 D.)

A. YUGOSLAVIA - SOVIET UNION. — Suspension of Soviet Economic Aid to Yugoslavia. - M. Khrushchev's Attack on Yugoslav Leaders.

It was announced in Belgrade on May 28 that the Soviet Union had unilaterally suspended for five years the utilization of the credits to Yugoslavia, totalling $285,000,000 (over £100,000,000), which had been arranged under the Soviet-Yugoslav economic agreements of Jan. 12, 1956, and Aug. 3, 1956. A Note "proposing" the postponement had been handed by M. Gromyko on the previous day to M. Micunovich, the Yugoslav Ambassador in Moscow; it referred to the possibility of some compensatory business on the basis of current trade, and stated that the East German Government concurred in the postponement of the credits.

The credit granted under the agreement of Jan. 12, 1956, amounted to $110,000,000 and referred to Soviet planning and supplies of equipment for the construction of a fertilizer factory, a superphosphate factory, and a power station, and the modernization of three coal mines. The agreement of Aug. 3, 1956, provided for a credit of $175,000,000 to be granted by the Soviet Union and Eastern Germany for the development of the Yugoslav aluminium industry.

The Yugoslav Foreign Office spokesman (M. Petrich) stated on May 30 that so far only a relatively negligible part of the Soviet credits had been drawn, mainly on plans and preparatory work. Stressing that this was the second time the Soviet Government had unilaterally suspended the fulfilment of its commitments, he said that the unilateral cancellation of valid economic agreements was "obviously not in accord with generally normal international relations." The Soviet decision would cause Yugoslavia "certain difficulties" in completing her economic plan, and Yugoslavia would be compelled to claim damages if the Soviet Government did not accept the Yugoslav view.

Asked about details of the Soviet Note, M. Petrich said that the chief reasons given by the Russians for their decision had been the need for additional resources to speed up the construction of their own chemical industry, and "a conviction that postponement corresponded to the principles of economic co-operation useful to both sides." In an oral explanation when the Note was handed over, it had been stated that the Soviet "proposal" was "not aimed at a deterioration of mutual relations but at their improvement."

Commenting on the continued attacks on Yugoslavia in the Soviet and East European Press, the Yugoslav spokesman added that this was clearly an "organized campaign" which, though "unable to convince anyone," could "only harm mutual relations and cause a deterioration in the international atmosphere." The spokesman also said that references to Yugoslavia in a resolution adopted at a recent Congress of the Chinese Communist Party amounted to an "extremely irresponsible and slanderous attack."

The Yugoslav reply to the Soviet Note, delivered on June 3 to the Soviet Ambassador in Belgrade (M. Zamchevski), expressed the Yugoslav Government's view that it was incumbent upon the Soviet Union to fulfil the obligations undertaken under formal agreements; Yugoslavia could not agree to the postponement of the credits, and if her views were not accepted she would be compelled to claim compensation for the losses suffered. A Note to the same effect was delivered to the East German Minister in Belgrade.

The Yugoslav Communist paper *Borba*, commenting on June 1 on the Soviet action, recalled that the Belgrade Declaration [i.e. the Soviet-Yugoslav statement after the visit of Marshal Bulganin and M. Khrushchev in 1955] had been based on "mutual respect and non-interference in the internal affairs of either side for any reasons whatsoever—economic, political, or ideological"; moreover, the agreement had also stipulated the abandonment of "any form of propaganda and misinformation, as well as any other action which creates distrust and . . . hampers the creation of an atmosphere for constructive international co-operation and peaceful co-existence between States."

The *Borba* article continued: "In the light of the present campaign against the 'revisionism' of the Yugoslav League of Communists, in which reprisals are beginning to find expression along inter-State lines, it is becoming clear that . . . public opinion in the Socialist countries has not been given real information about Yugoslavia. In the Chinese, Soviet, and East European Press a campaign of deliberate misinformation has recently been initiated—a campaign of downright untruths about Yugoslavia. In 'theoretical' articles our views are systematically distorted . . . and condemned. In discussing the views of the Yugoslav League of Communists, not the least attempt has been made to refute them by force of argument; they have simply been branded as 'anti-Marxist,' 'anti-Leninist,' 'revisionist,' 'treason to Socialism,' 'help to American imperialists,' and so on . . . Whereas on the one hand the need for 'peaceful co existence between nations irrespective of ideological differences' is recognized in principle, on the other hand, where Yugoslavia is concerned, 'ideological differences' are given as an obstacle to further friendly co-operation . . ."

"The Soviet Union," *Borba* added, "has always stressed that she has no thought of taking advantage of economic assistance to other countries to achieve political objectives, and that for this very reason her assistance differs in essence from the economic assistance of the United States. *Pravda* recently declared that American assistance was aimed at making the recipient countries dependent upon the U.S.A., while the Soviet Union strives to help other Socialist countries and economically under-developed countries to consolidate and develop their economy . . . How do these statements sound in the light of the Soviet Government's decision to suspend the fulfilment of its financial obligations towards Yugoslavia laid down by international agreements? The latest act of the Soviet Union inevitably reminds Yugoslav citizens of the acts of the recent past, when, shortly after the Cominform resolution, . . . mutual relations were broken off, all agreements violated, and an economic blockade organized, followed by open political and military pressure against Yugoslavia. Recent events are an ill-omen for the course which Soviet foreign policy has once more begun to follow."

M. Khrushchev made a bitter attack on Yugoslavia when addressing the congress of the Bulgarian Communist Party on June 3, during a visit to Sofia. In the course of his speech M. Khrushchev described Yugoslavia as "the Trojan horse of imperialism."

After commending the Bulgarian Communists because they had remained "most loyal" to the principle of "proletarian internationalism," M. Khrushchev declared that assertions about so-called "gaps" in the development of Marxist-Leninist theory were "contrary to reality" and showed that the Yugoslav leaders were "ignoring the practical work done in building Socialism in other countries . . ." He continued:

"I do not want to offend anyone, but I cannot help asking a question which is worrying all honest Communists. Why do the imperialist bosses, striving to wipe Socialist States from the face of the earth and to stifle the Communist movement, at the same time finance one of the Socialist countries, giving it advantageous credits and free sops? Surely no-one will believe that there are two kinds of Socialism in the world— one which is furiously hated by world reaction and another which is acceptable to the imperialists and which they help and support? The representatives of that country [Yugoslavia] pretend that it is we who are departing from Marxism-Leninism, while they are adopting the correct position.

"At the same time as the imperialists are uniting their efforts in their attacks on Socialism and against the working class, certain leaders, calling themselves fighters for Socialism, are trying to weaken the will of the working class in its battle against capitalism; to weaken its advance guard, the Communist and workers' parties; and to undermine their vigilance and weaken their unity."

After saying that the Cominform's condemnation of Yugoslavia in 1948 was "basically correct," and after recalling his reconciliation with Marshal Tito in 1955, M. Khrushchev went on: "Experience has shown, however, that the burden of the past has proved too heavy for the Yugoslav leaders to shake off, and that they have been unable to abandon their fallacious positions and move on confidently to those of Marxist-Leninism . . . During the Hungarian events the Yugoslav leaders did the greatest harm to the cause of Socialism by their public statements and actions. By their policies against the Socialist countries and fraternal parties, the Yugoslav leaders have isolated Yugoslavia and the Yugoslav League of Communists from the Socialist countries and the international Communist movement." After describing Yugoslavia as the "Trojan horse of imperialism," M. Khrushchev referred to American aid to Yugoslavia and to the impossibility of "an imperialist country helping a Communist State unless the latter is serving its interests."

It was announced in Belgrade and Warsaw during May that a visit to the Polish capital which a Yugoslav delegation headed by President Tito was to have made at the beginning of June had been temporarily postponed, as the Yugoslav Government considered that "in present circumstances a visit to Poland would not give the desired results."

Borba announced on May 17 that the final draft of the programme of the Yugoslav League of Communists [which inspired the latest Soviet campaign against Yugoslavia] had been approved by the party leadership at a special meeting presided over by President Tito. In its final form the programme was said to include the amendments which had been introduced on the eve of the Yugoslav party congress in an attempt to meet Soviet criticisms.—(Tanjug Agency, Belgrade - Soviet Embassy Press Dept., London) **(Prev. rep. 16171 A; Soviet Economic Aid, 15035 B; 14937 A.)**

B. JAPAN. — Abolition of Legalized Prostitution.

The Japanese Government's legislation outlawing prostitution, enacted in May 1956 after approval by both Houses (see 14929 E), came officially into force on April 1, 1958. Solicitation in public became punishable by six months' imprisonment or a fine equivalent to $28 (£10), whilst procurers and operators became liable to ten years' imprisonment or fines amounting to $840 (£300). The nation-wide closing of brothels particularly affected the notorious Yoshiwara district of Tokio and involved the disbanding of the Yoshiwara Coffee and Tea Parlour Association, a euphemistic name for the brothel-owners' federation in the area.—(New York Times) **(Prev. rep. 14929 E.)**

A. ARAB FEDERATION. — First Union Cabinet. - New Iraqi and Jordanian Cabinets. - Iraqi Elections.

The Arab Federation of Iraq and Jordan came officially into existence on May 13 after the necessary constitutional amendments had been approved by the Parliaments of the two countries. Following a general election in Iraq on May 4, legislation amending the Iraqi Constitution to conform to that of the Federation was adopted unanimously by the new Chamber of Deputies on May 10, and by the Senate on the following day. Parallel legislation amending the Jordanian Constitution had been unanimously approved by the Upper House in Amman on April 26, following similar action by the Lower House a fortnight earlier.

In the Iraqi elections of May 4, all but 27 of the 145 deputies were returned unopposed. As Iraq has had no political parties since 1954, nominations were by petition and candidates stood on their personal records. Supporters of the Prime Minister, General Nuri es-Said, hold 130 of the 145 seats in the new Chamber of Deputies; the other 15 seats are held by Independents who are also regarded as supporters of General Nuri's policy.

The Constitution of the Arab Federation was signed by King Faisal and King Hussein in Baghdad on May 13, and came into force on that date. The Prime Ministers of Iraq and Jordan (General Nuri and Mr. Ibrahim Hashem) subsequently submitted their resignations to their respective Heads of State, and on May 19 the membership was announced of (1) the first Union Cabinet, consisting of four Iraqi and three Jordanian Ministers; (2) the new Iraqi Cabinet; and (3) the new Jordanian Cabinet.

Union Cabinet.

The membership of the first Cabinet of the Arab Federation was as follows:

General Nuri es-Said (Iraq)	..	Prime Minister.
Mr. Ibrahim Hashem (Jordan)	..	Deputy Premier.
Dr. Tewfik Suweidi (Iraq)	..	Foreign Affairs.
Mr. Suleiman Toukan (Jordan)	..	Defence.
Mr. Abdul Karim Uzri (Iraq)	..	Finance.
General Sami Fattah (Iraq)	..	Ministers of State.
Mr. Khaloussi el-Khairy (Jordan)		

The former Prime Ministers of Iraq and Jordan became respectively Prime Minister and Deputy Premier of the Arab Federation, as shown. Of the two Ministers of State, General Sami Fattah has responsibility for military affairs and Mr. el-Khairy for Arab affairs.

Iraqi and Jordanian Cabinets.

Senator Ahmed Mukhtar Baban succeeded General Nuri as Prime Minister of Iraq, while Mr. Samir Rifai succeeded Mr. Ibrahim Hashem as Prime Minister of Jordan. The new Cabinets were as follows:

Iraqi Cabinet. Senator Ahmed Mukhtar Baban—Prime Minister; Mr. Said Qazzaz—Interior; Dr. Nadjim el-Pachachi—Finance; Mr. Burhanuddin Bashayan—National Guidance; Dr. Dhia Jaffar—Development; Mr. Sadiq Kamounah—Social Affairs; Mr. Jamil Abdul Wahab—Justice; Dr. Abdul Hamid Khadim—Education; Dr. Abdul Alawi—Health; General Saleh Jaburi—Communications.

Jordanian Cabinet. Mr. Samir Rifai—Prime Minister; Mr. Falah Madadha—Interior; Mr. Akif el-Faiz—Agriculture and Construction; Dr. Jamil Tutounji—Health and Social Welfare; Mr. Salim Bakhit—Public Works; Mr. Ahmed Tarouneh—Education; Mr. Anastas Hananiah—Finance; Dr. Samir Judeh—Communications; Mr. Mohammed Jabari—Justice.

The Union Cabinet was sworn in by King Faisal, as Head of the Federation. The new Iraqi Cabinet was also sworn in by King Faisal, and the new Jordanian Cabinet by King Hussein. Neither the Iraqi nor the Jordanian Cabinet included Ministers of Foreign Affairs or Defence, as these subjects are Federal responsibilities under the appropriate Union Ministers. The Jordanian Government officially informed all diplomatic representatives in Amman of the formation of the Union Government, thus requiring heads of diplomatic missions in Amman to present their credentials to King Faisal as Head of the Arab Federation.

The Federal Parliament (consisting of 20 Iraqi and 20 Jordanian parliamentarians) held its first session in Baghdad on May 27, when King Faisal was sworn in as Head of the Arab Federation. The ceremony was attended by King Hussein of Jordan, the deputy head of the Federation.

King Faisal issued a decree on June 2 appointing General Mohamed Aref (an Iraqi) as Chief of Staff of the combined forces of Iraq and Jordan—collectively known as the Arab Army. Two Assistant Chiefs of Staff were appointed, one Iraqi and one Jordanian.—(Times - Le Monde, Paris - New York Times - Neue Zürcher Zeitung)

(Prev. rep. Arab Federation, 16132 C.)

B. CANADA - UNITED STATES. — Air Defence. - The North American Air Defence Command.

The joint establishment by Canada and the United States of a North American Air Defence Command (NORAD) was announced in an exchange of Notes published on May 19 in Ottawa and Washington and signed by Mr. Christian Herter, U.S. Acting Secretary of State, and Mr. N. A. Robertson, Canadian Ambassador in Washington.

The agreement implemented the decision of Aug. 1, 1957, on the establishment of a joint air command (see 15691 B) and laid down the following principles governing the future organization and operations of NORAD:

(1) The C.-in-C., North American Air Defence Command (CINCNORAD) would be responsible to the Chiefs of Staff Committee in Canada and the Joint Chiefs of Staff in the United States, who in turn would be responsible to their Governments. He would "operate within a concept of air defence approved by the appropriate authorities of the two Governments, who will bear in mind their objectives in the defence of the Canada-U.S. region of the NATO area."

(2) NORAD would include "such combat units and individuals as are specifically allotted to it by the two Governments." The jurisdiction of CINCNORAD over these units and individuals would be limited to operational control as defined in (3) below.

(3) "Operational control" was defined as "the power to direct, co-ordinate, and control the operational activities of forces assigned, attached, or otherwise made available." No permanent changes of station would be made without the approval of the higher national authorities concerned. Temporary reinforcement from one area to another to meet international requirements, including the crossing of the international boundary, would be within the authority of the commanders exercising operational control.

(4) The appointment of CINCNORAD and his deputy would have to be approved by the Canadian and U.S. Governments. They would not be from the same country, and CINCNORAD's staff would be recruited from both countries.

(5) NATO would be kept informed of the arrangements for the air defence of North America through the Canada-U.S. Regional Planning Group.

(6) Plans and procedures to be followed by NORAD in wartime would be formulated and approved in peacetime by the appropriate national authorities, and would be capable of rapid implementation in an emergency.

(7) Terms of reference for CINCNORAD and his deputy would be consistent with the foregoing principles. Changes in these terms of reference could be made by agreement between the Canadian Chiefs of Staff Committee and the U.S. Joint Chiefs of Staff, with the approval of the higher national authorities.

(8) The question of the financing of NORAD expenditures would be settled by mutual agreement between the two Governments.

(9) NORAD would be maintained in operation for a period of ten years "or such shorter period as shall be agreed by both countries in the light of their mutual defence interests and their objectives under the terms of the North Atlantic Treaty." The agreement could be reviewed at the request of either country at any time.

NORAD had been operating on an interim basis since Aug. 1, 1957, and the agreement of May 19 established it on a permanent basis as stated. General Earl E. Partridge, of the U.S. Air Force, is Commander-in-Chief (CINCNORAD), and Air Marshal C. Roy Slemon, of the Royal Canadian Air Force, is deputy C.-in-C. The Command's operations cover Canada, the continental United States, and Alaska. Its headquarters are at Colorado Springs.—(New York Times - Montreal Star)

(Prev. rep. 15691 B.)

C. INDIA - SOVIET UNION. — Air Agreement.

An agreement between the Indian and Soviet Governments providing for direct air services between Delhi and Moscow was signed in New Delhi on June 2 by Chief Marshal Zhigarev (head of the Soviet civil aviation organization) and Mr. M. M. Philip (Communications Secretary). Under the agreement, Air India International and Aeroflot will operate initially one service a week between the Indian and Soviet capitals in each direction, *via* Amritsar and Tashkent. A commercial agreement between the two airlines, complementary to the main agreement, was signed on the same day relating to tariffs, agency commissions, and pooling of revenues.

(Indian High Commissioner's Office, London)

D. FISHERIES. — Accession of U.S.S.R. and Western Germany to International Fisheries Convention.

It was announced on May 22 that the U.S.S.R. had joined the International Fisheries Convention of 1946, which came into force in 1953, provides for the regulation of fishing-net meshes, and imposes minimum-size limits for certain fish caught in Atlantic and Arctic fishing grounds. The German Federal Republic's accession to the Convention had been announced in 1954.—(Times)

(Prev. rep. 12977 A.)

JUNE 14—21, 1958

A. HUNGARY. — Execution of Imre Nagy and General Pal Maleter. - World Reactions.

It was announced in Budapest on June 17 that M. Imre Nagy, Prime Minister of Hungary at the time of the uprising in October 1956, had been sentenced to death and executed after trial by a "people's court." It was also announced that General Pal Maleter (Defence Minister in M. Nagy's Cabinet), Joszef Szilagyi, and Miklos Gimes had been executed with M. Nagy, and that five other persons had been given prison sentences varying from five years to life imprisonment. The news was broadcast by Budapest radio without comment, and given on the inner pages of all Hungarian newspapers.

The announcement of the trial and execution of Imre Nagy and his leading associates was given in the following statement issued by the Hungarian News Agency :

"Legal authorities have completed the proceedings in the case of the leading group of those persons who, with the active participation of the imperialists, unleashed a counter-revolutionary armed revolt with the aim of overthrowing the legal order of the Hungarian People's Republic on October 23, 1956.

"The Chief Public Prosecutor . . . charged Imre Nagy and his fellow accused—Ferenc Donath, Miklos Gimes, Zoltan Tildy, Pal Maleter, Sandor Kopacsi, Jozsef Szilagyi, Ferenc Janosi, and Miklos Vasarhei—with the crime of forming an organization aimed at overthrowing the Hungarian people's democratic State order. In addition, Imre Nagy was charged with treason and Sandor Kopacsi and Pal Maleter with the crime of military revolt. The Prosecutor's office ended the penal proceedings against the defendant Geza Losonczy because he had died of illness in the meantime.

"The People's Courts Council of the Supreme Court stated, on the ground of the testimony of the accused and of 29 witnesses, and having investigated the wide range of documentary evidence, that Imre Nagy and his most intimate accomplices—Geza Losonczy, Ferenc Donath, Miklos Gimes, and Jozsef Szilagyi—established in December, 1955, a secret anti-State organization with the aim of seizing power by force and overthrowing the Hungarian People's Republic.

"It was established during the trial that Imre Nagy and his accomplices had played a leading role in the preparation and unleashing of the counter-revolutionary rising of October 1956. Zoltan Tildy and Pal Maleter became acquainted with the inimical aims of Imre Nagy and his companions . . . and actively joined the counter-revolutionary revolt . . .

"The members of this group mobilized and included in their ranks all categories of enemies of the people's democratic order. At the same time, by hiding their real objectives and voicing demagogic and false 'Socialist' slogans, they temporarily misled . . . unsuspecting people as well. The group of conspirators . . . worked out in detail the political platform of the movement against the people's democracy -- intermediate tasks, methods, and future objectives. These secret documents, written largely by Imre Nagy himself, were submitted by the Public Prosecutor to the Court.

"Imre Nagy, in his essay *Morals and Ethics*, written by him in December, 1955, called the people's democratic State order a 'degenerate Bonapartist Power' and incited to its overthrow by force. In another essay, *Some Current Questions*, written in January 1956, he outlined the task of forming an alliance with the forces opposing the people's democracy and set as an aim . . . the restoration of the multi-party system. In his pamphlet entitled *The Five Basic Principles of International Relations*, also dated January 1956, he set the nullification of the Warsaw Pact as one of the objectives of the group of adventurers, under the pretext of 'liquidation of bloc policy' . . .

"The conspirators included in their illegal activities Gabor Tanczos and Balazsh Nagy, who later fled to the West, and . . . turned the Petöfi Circle into a meeting-place for hostile elements and a forum for attacks against the party and the State . . . They prepared beforehand many hostile speeches, among others Tibor Dery's appeal in which he urged youth to counter-revolutionary actions. Part of their method was to publish in the Press inciting articles by Tibor Dery, Gyula Hay, Tamas Aczel and similar elements who opposed the People's Republic.

"In September, 1956, Geza Losonczy publicly declared to an Israeli newspaperman who was then in Budapest : 'If it comes to that we will oppose the Government by force.' At an illegal meeting arranged by himself, Jozsef Szilagyi said on Oct. 20, 1956 : 'Imre Nagy and his companions are prepared to take over the Government.'

"The demonstration of Oct. 23 [i.e. the outbreak of the revolt] was initiated by Imre Nagy and his group, availing themselves of the connexions they had built up in the Petöfi Circle and in the Universities . . . It was directed by the Nagy group through Gabor Tanczos and his companions . . . On the initiative of Imre Nagy, Geza Losonczy, Ferenc Donath, Miklos Gimes and other members of the conspiracy began to work out between Oct. 19 and Oct. 22 the programme of the Government that was to be set up.

"On the morning of Oct. 23, 1956, a secret meeting was held in Losonczy's flat at which Miklos Gimes, Miklos Vasarhei, Ferenc Janosi, and Sandor Haraszti were present, led by Imre Nagy. They worked out a Government list which they wished to instal in power by overthrowing the legal Hungarian Government. Imre Nagy designated himself as Prime Minister.

"The members of the conspiracy set up several illegal centres. One of these centres, the members of which were Sandor Kopacsi, Jozsef Szilagyi, Miklos Gimes, Gyorgy Fazekas and Tamas Sczel, was organized in the main Budapest police station. Kopacsi, breaking his pledged oath, abusing his position as police chief, and misleading his subordinates, executed the tasks drawn up by the illegal centre. Close co-operation existed between this group and a sub-centre, brought into being on Oct. 24, 1956, of which Geza Losonczy, Ferenc Donath, and Ferenc Janosi were members. This group directed, among others, the disintegrating activities which were taking place in the ranks of the Army.

"Imre Nagy and his accomplices established secret contacts with the representatives of bourgeois restoration well before the October uprising, and concluded an alliance with them to seize power by force. Geza Losonczy and Sandor Haraszti personally reached agreement with Anna Kethly as early as July, 1956, regarding her participation in a future Nagy Government At the end of 1955 Imre Nagy decided to re-establish the old 'coalition' parties and to form a Government with them.

"When, however, he obtained the post of Prime Minister by force and deception, he went far beyond that point. He made possible, contrary to the Constitution, the unrestricted creation of 70 different parties and organizations in the few days of the counter-revolution—among them such notorious bourgeois-fascist parties, prohibited under the Peace Treaty, as the Party of Hungarian Life, the Christian Democratic party, the Hungarian People's party, the Christian Front, the Catholic People's party, the Christian People's party, and the Hungarian Nazi party in Györ.

"The group also 'rehabilitated' the lawfully and justly sentenced Jozsef Mindszenty, the former Prince Primate, and made him take a stand against the People's Republic. After an agreement had been reached with him through Zoltan Tildy, Mindszenty proclaimed the programme of capitalist restoration over the radio on Nov. 3.

"Imre Nagy . . . set up unlawfully a so-called Cabinet . . . in such a way that the reactionary forces were in the majority, although as an act of deception he also included persons loyal to Socialism. On Nov. 2, however, he expanded this Cabinet by including extremist representatives of bourgeois restoration and leaders of the counter-revolutionary rising. At that time, apart from Imre Nagy, Geza Losonczy and Zoltan Tildy, the members of the Government included Anna Kethly, Istvan Szabo, and Istvan Bibo, as well as Pal Maleter, commander of the armed counter-revolutionary rebels, in the capacity of Minister of National Defence.

"The treacherous and subversive activities of Imre Nagy and his accomplices . . . paralysed the armed forces defending the People's Republic. Simultaneously they organized, supplied with arms, and finally legalized the counter-revolutionary forces in revolt. War criminals and anti-democratic offenders, convicts released from prison, all categories of enemies of the people's democracy, were rallied in the so-called 'National Guard' . . . White terror started to rage in Budapest and throughout the country. According to data uncovered so far, 234 defenceless citizens were murdered. During the same period 3,000 progressive persons, loyal to the people's democracy, were imprisoned and their execution planned in the immediate future. In addition, death lists were compiled of more than 10,000 people and preparations were made for their massacre.

"A member of the group of conspirators was in contact with Cape [apparently meant to refer to the former First Secretary in the British Legation in Budapest, Mr. Cope], a former official of the British Legation, through whom Imre Nagy's political writings were funnelled out to the West. Through Pal Maleter they were in contact with Cowley, the British Military Attaché, who took a direct part in the military direction of the rising. The American Intelligence organization called 'University of Strasbourg' worked out the programme of the counter-revolutionary rising in September 1956, and this programme was spread illegally within the country.

"During the counter-revolution considerable quantities of small arms were smuggled into the country among Red Cross gifts. At the same time the imperialist press and radio started a propaganda campaign in favour of Imre Nagy. They emphasized that . . . it would be more advantageous to the Western Powers if the dismemberment of Hungary from the Socialist camp was carried out by a group that was called 'Communist.'

"To realize their objectives, and also to clear the road for imperialist intervention, Imre Nagy and his group attempted to repudiate the Warsaw Pact illegally and unilaterally. This attempt was crowned by Imre Nagy's radio appeal of Nov. 4, 1956, in which he appealed for the open and armed intervention of the Western imperialists against the Revolutionary Workers' and Peasants' Government [i.e. the Kadar regime which established itself under Soviet protection at Szolnok] and the Soviet troops whose assistance was requested by it.

"After the defeat of the counter-revolutionary uprising, several groups of conspirators sought refuge where support had previously been granted them. Bela Kiraly, Anna Kethly, Jozsef Kovago, and others escaped to the West . . . Jozsef [Cardinal] Mindszenty went into hiding in the American Legation ; Istvan Szabo tried to seek refuge in the British Legation ; the group of Imre Nagy, which had fought under the black flag of 'National Communism,' escaped to the Yugoslav Legation in Budapest.

"It is characteristic of the conspirators' infamy that they continued their counter-revolutionary activities even when . . . the Hungarian people began to restore legal order . . . Anna Kethly,

Bela Kiraly, Jozsef Kovago, and their associates sent instructions from the West, and Imre Nagy, Geza Losonczy and others issued instructions from the Yugoslav Legation to continue armed resistance, organize strikes, and reorganize underground subversion . . .

"At the trial the defendants Ferenc Donath, Miklos Gimes, Zoltan Tildy, Sandor Kpacsi, Ferenc Janosi, and Miklos Vasarhei showed repentance and pleaded guilty. Imre Nagy, Jozsef Szilagyi and Pal Maleter denied their guilt, but were unmasked as a result of incriminating evidence and material proof, and made partial confessions . . .

"The People's Courts Council of the Supreme Court . . . declared the defendants guilty. Imre Nagy was sentenced to death, Ferenc Donath to 12 year's imprisonment, Miklos Gimes to death, Zoltan Tildy to six year's imprisonment, Pal Maleter to death, Sandor Kopacsy to life imprisonment, Jozsef Szilagyi to death, Ferenc Janosi to eight years' imprisonment, and Miklos Vasarhei to five years' imprisonment. The sentences are final. The death sentences have been carried out."

Imre Nagy (62) first became Prime Minister of Hungary in July 1953, after the resignation of Matyas Rakosi. [A biography of M. Nagy up to that time is given on page 13104, second column]. During his Premiership of nearly two years he took a number of important measures to mitigate the severities of the Rakosi regime—e.g. by abandoning the policy of compulsory agricultural collectivization, closing internment camps, releasing political detainees, and permitting a partial return to private trading. In April 1955, however, he was deposed from the Premiership and deprived of party membership after his "new course" economic policy had been violently denounced as "right-wing deviationist" and "anti-Marxist" [see 14208 B, 14107 A]. Imre Nagy was the focus of the Hungarian people's uprising in October 1956, and Prime Minister for ten days until his Government was overthrown by the Soviet military intervention. He left the Yugoslav Legation (where he had taken refuge) under a "guarantee" of safe-conduct by the Kadar regime, but was immediately arrested by the Soviet authorities in violation of the safe-conduct pledge. He and other leaders of the revolt were subsequently deported to Rumania, and nothing more had been heard of them until the Budapest announcement of the trials and executions.

General Pal Maleter (47), Minister of Defence in M. Nagy's Government, was invited by the Soviet authorities to enter into negotiations with them for the withdrawal of Soviet forces from Hungary. He was arrested by the Russians while conducting these negotiations.

Pal Maleter was born in Slovakia, educated in Hungary, and served as a regular officer in the Hungarian National Army. He became a Communist after being captured by the Russians in the Second World War, was subsequently parachuted into Hungary to organize partisan activity against the Germans, and became famous as an anti-Nazi guerrilla leader. In the October revolt he was the first Hungarian general to throw in his lot with the uprising, and became commander of the Free Hungarian forces based on the Killian Barracks in Budapest.

The Hungarian Public Prosecutor (Dr. Szenaszi) stated at a press conference on June 21 that the trials had taken place in Budapest "not long ago" and had lasted 12 days; that they had been held in secret "for reasons of State interest," as the Western Powers might otherwise have "interfered" and "spread lies and calumnies"; that the defendants had been allowed to choose their own defence counsel; and that they had been allowed to present "petitions for clemency," which had been "rejected." The Public Prosecutor made no mention of the date of the trial and executions, nor did he give the names of the judges, prosecutors, or defence counsel taking part in the trials.

Reactions to Execution of Imre Nagy and General Maleter.

Intense indignation was aroused in the Western countries, and also in many of the "uncommitted" countries, at the execution of Imre Nagy and his associates; it was widely commented in British, American, French, and other Western newspapers that the first announcement of the executions had come from Moscow radio and not from Budapest.

President Eisenhower said at a press conference (June 18) that no incident could have more greatly shocked the civilized world than the execution of Imre Nagy and Pal Maleter, men who had sought to free their country from Russian domination. Nor could any incident have "more alerted the free world to the lack of confidence we are compelled to place in the words and actions of the Communist imperialists." The executions constituted a violation of good faith [i.e. of the safe-conduct pledge to M. Nagy when he left the Yugoslav Legation]; placed a "very great obstacle" in the way of further negotiations for a summit conference; and were clear evidence of the Soviet Union's intention of pursuing her "own policies of terror and intimidation" with the aim of ensuring complete subservience to her will.

Mr. Macmillan said in the British House of Commons (June 19) that "the whole House, the whole country, and the whole civilized world has been shocked by this latest development." In the House of Lords, Lord Lansdown said that "H.M. Government consider that the manner in which Mr. Nagy and General Maleter were kidnapped, held in custody, tried in secret, and executed, is repugnant to every principle of justice." After speaking of "the horror and indignation which this shameful act has aroused . . . throughout the country" he added: "This barbaric behaviour must have seriously diminished the confidence of the West in the sincerity of Soviet intentions, either in relation to the preparations for a summit conference or to the settlement of international problems by other means." Viscount Alexander of Hillsborough (leader of the Labour peers) described the executions as "a cruel and shameful perversion" of justice.

The British Labour Party issued a statement denouncing the executions as "judicial murder," while the Socialist International issued an appeal to all its member-parties to "make the strongest possible protest against these barbaric acts." "The Kadar regime," it said, "conducted the trial and carried out the executions, but the Soviet Union gave the orders and the Soviet Union's was the treachery."

In the Communist countries (except in Poland and Yugoslavia), and especially in China, approval of the executions was combined with violent attacks on Yugoslav "revisionism" and renewed denunciations of President Tito. The Peking *People's Daily* (organ of the Chinese Communist Party) described the executions as "glad tidings to us all," and added: "It is impossible not to link the case of Nagy with the role played by the Yugoslav revisionists in the Hungarian riots [i.e. the revolution]. The Hungarian events fully confirm that revisionism is the most dangerous enemy within the international Communist movement."

No official comment was made in Poland, but the Warsaw Correspondent of *The Times* said that the executions had come as "a shock to Poles of all political views, including Communist Party members except, perhaps, for a small minority of unrelenting Stalinists."

The Correspondent added: "Privately, disgust is being expressed in political circles and bewilderment at why it has been found necessary to take this cruel action . . . There are also misgivings about what the development may mean for Poland . . . From the point of view of international politics the executions are seen in the first place to be aimed at Marshal Tito, in Moscow's eyes the arch-revisionist; but there are also warning implications for Mr. Gomulka, who went to prison once because he opposed the Cominform campaign against Yugoslavia."

Deep indignation at the executions was reported from Belgrade, where, however, the Government confined itself to issuing a brief statement refuting the allegations made against Yugoslavia in the Hungarian announcement [i.e. that Mr. Nagy and his associates had received support from the Yugoslav Legation in Budapest before seeking asylum there; and that Mr. Nagy had continued to organize "subversive activities" while sheltering in the Legation.] The Yugoslav statement said that these "false allegations" were "contrary to the truth" and represented "a new, disturbing and premeditated sharpening of the anti-Yugoslav campaign." It was announced in Belgrade on June 21 that the Yugoslav Government was preparing a Note to be presented in Budapest.

The two leading Yugoslav newspapers, *Borba* and *Politika*, published front-page pictures of the executed Hungarian leader, with eulogistic biographies referring to him as "an eminent person in Hungary's political and cultural life." They pointed out that Imre Nagy was the head of a legally-constituted Government, and recalled his kidnapping in Budapest despite the assurances of safe-conduct. *Borba* (official organ of the Yugoslav League of Communists) also published the first hostile caricature of M. Khrushchev ever to appear in a Yugoslav newspaper; it showed him engaged in conversation with Mao Tse-tung (the Chinese Communist leader) and bore the caption: "Well, who is going to be Beria now?"—a sarcastic reference to M. Khrushchev's "reconciliation" visit to Belgrade in 1955, when he blamed Beria for the initial breach between the Soviet Union and Yugoslavia.

It was announced at U.N. headquarters on June 19 that the U.N. Special Committee on Hungary would meet in closed session to consider the execution of Mr. Nagy and his associates, in response to requests from several delegations.

(Prev. rep. Imre Nagy, 15661 A.)

A. UNITED KINGDOM. — By-elections.

Five by-elections took place on June 12 without any change in political representation, three of the seats being held by the Conservatives and two by Labour. The constituencies were Argyll, Ealing South, St. Helens, Wigan, and Weston-super-Mare.

Argyll.

The by-election was caused by the death of Major Sir Duncan McCallum (Conservative). Result :

Noble, Michael (Conservative) ..	12,541
McKean, William (Liberal) ..	7,375
Young, Robert (Labour)	6,884
No change. Conservative majority	5,166

Figures at the general election were : Sir D. McCallum (C.) 19,119, R. Young (Lab.) 9,091—Conservative majority, 10,028.

The Conservative candidate polled 46.8 per cent of the votes, the Liberal candidate 27.5 per cent, and the Labour candidate 25.7 per cent, whereas at the general election the Conservatives received 67.8 per cent of the votes and Labour 32.2 per cent in a straight fight. The Conservative proportion thus fell by 21 per cent and the Labour proportion by 6.5 per cent. The Liberals last contested Argyll in 1945, when they polled 3,228 votes in a three-cornered contest.

67.06 per cent of the electorate voted in the by-election, compared with 56.61 per cent at the general election. The total electorate numbered 39,962, a decrease of 2,220 since the general election.

Sir Duncan McCallum (69), who died on May 10, had a distinguished military record in the First World War, serving in France and West Africa and winning the M.C. and mention in despatches. In 1923, while British liaison officer with the French in Syria, he took part in an adventurous pioneering motor journey across the Syrian desert to Baghdad—the first official reconnaissance of the trans-desert route. Four years later, while Commandant of the British Legation Guard in Peking, he motored overland from China to Britain—a distance of 15,200 miles—as a member of a two-car expedition. He subsequently served at the British Legations in Sofia and Cairo before entering Parliament. Sir Duncan was the son of Charles Whitton McCallum (Charles Coborn, the music-hall comedian and singer), famous for his songs *The Man Who Broke the Bank at Monte Carlo* and *Two Lovely Black Eyes*.

Ealing South.

The by-election was caused by the resignation of Mr. Angus Maude (Independent Conservative) following his appointment as editor of the *Sydney Morning Herald*, one of Australia's leading newspapers. Result :

Batsford, Brian (Conservative) ..	17,417
Garside, Hugh (Labour)	11,258
Skelsey, Philip (Liberal)	5,956
No change. Conservative majority	6,159

Figures at the general election were : A. Maude (C.) 25,992, D. Allen (Lab.) 13,462, D. Evans (L.) 4,182—Conservative majority, 12,530.

The Conservative candidate polled 50.3 per cent of the votes, the Labour candidate 32.5 per cent and the Liberal candidate 17.2 per cent, compared with respective percentages of 59.6, 30.9 and 9.5 at the general election. The Conservative proportion of the total vote thus fell by 9.3 per cent, while the Liberal proportion increased by 7.7 per cent and the Labour share by 1.6 per cent.

64.5 per cent of the electorate voted in the by-election, compared with 77.8 per cent at the general election.

Mr. Angus Maude (45) had represented Ealing South since 1950. An economist and financial journalist, he has been on the staff of *The Times*, the *Daily Mail*, and the *Sunday Express*, and was director of the Conservative Political Centre from 1951-55. He resigned the Conservative Whip in May 1957 at the time of the Suez crisis, and had since sat as an Independent Conservative.

The Independent Conservative group in the House (the "Suez rebels"), originally numbering eight members, was reduced to five as a result of Mr. Maude's resignation—Lord Hinchingbrooke, Mr. Paul Williams, Mr. Anthony Fell, Mr. Laurence Turner and Mr. Biggs-Davison. Of the other two members, Sir Victor Raikes had resigned from Parliament in the autumn of 1957 (see 15903 A), while the Conservative Whip was restored to Mr. Patrick Maitland on Dec. 23.

St. Helens.

The by-election was caused by the resignation of Sir Hartley Shawcross, Q.C. (Labour), who had represented the constituency since 1945. Result :

Spriggs, Leslie (Labour)	26,405
Carlisle, Mark (Conservative) ..	14,411
No change. Labour majority ..	11,994

Figures at the general election were : Sir H. Shawcross (Lab.) 35,737, J. M. Caplin (C.) 19,845—Labour majority, 15,883.

The Labour candidate received 64.7 per cent of the votes and the Conservative candidate 35.3 per cent, compared with respective percentages of 64.3 and 35.7 at the general election. Only 54.2 per cent of the electorate voted in the by-election, compared with 73.5 per cent at the general election.

Sir Hartley Shawcross (56) was Attorney-General and President of the Board of Trade in successive Labour Governments, holding the former post from 1945 to 1951 and the latter from April to October, 1951. One of Britain's leading lawyers, he was chief U.K. prosecutor at the Nuremberg trials of Nazi war criminals. He retired from the Bar in 1957 and is now legal adviser to the Royal Dutch-Shell group of oil companies, and a member of the board of the Ford Motor Company.

In a letter to the St. Helens Labour Party (March 7, 1958) Sir Hartley explained that he was resigning for private and family reasons, and because of his inability to devote sufficient time to his duties as an M.P. He added that it would "be idle to pretend that I have not disagreed with certain proposals which have found some favour in the [Labour] Party while it has been in Opposition, notably those involving further nationalization of industry and certain aspects of foreign, defence, and educational policy, on which I have favoured more bi-partisan consultation."

Wigan.

The by-election was caused by the death of Mr. Ronald Williams (Labour), who had represented the constituency since 1948. Result :

Fitch, E. A. (Labour)	27,415
Hodgson, J. J. (Conservative) ..	10,248
*Weaver, Michael (Communist) ..	972
No change. Labour majority ..	17,167

*Forfeited deposit.

Figures at the general election were : R. W. Williams (Lab.) 29,775, H. D. Lowe (C.) 14,883, T. Rowlandson (Comm.) 1,567—Labour majority, 14,872.

The Labour candidate received 70.9 per cent of the votes, the Conservative candidate 26.6 per cent and the Communist candidate 2.5 per cent, compared with respective percentages of 64.4, 32.2, and 3.4 at the general election. The Labour proportion of the total vote thus rose by 6.5 per cent, while the Conservative and Communist proportions fell by 5.6 and 0.9 per cent respectively.

69.3 per cent of the electorate voted in the by-election, compared with 80.2 per cent at the general election.

Mr. Ronald Williams (50), who died on March 13, was solicitor to the Durham Miners' Association (1936-45) and to the National Union of Mineworkers (1945-48) before entering Parliament.

Weston-super-Mare.

The by-election was caused by the death of Sir Ian Orr-Ewing (Conservative), who had represented the constituency since 1934. Result :

Webster, David (Conservative) ..	21,271
Hampton, Edward (Labour) ..	11,295
Taylor, Edward (Liberal)	10,588
No change. Conservative majority	9,976

Figures at the general election were : Sir Ian Orr-Ewing (C.) 27,357, R. G. Andrews (Lab.) 16,275—Conservative majority, 11,082.

The Conservative candidate received 49.3 per cent of the votes, the Labour candidate 26.2 per cent, and the Liberal candidate 24.5 per cent, whereas at the general election Sir Ian Orr-Ewing received 62.7 per cent and his Labour opponent 37.3 per cent in a straight fight. The Conservative proportion thus fell by 13.4 per cent, and the Labour proportion by 11.1 per cent. The Liberals last contested Weston-super-Mare in 1950, when they obtained 15.6 per cent of the votes in a three-cornered contest (the Conservatives receiving 56.4 per cent and Labour 28 per cent).

72.2 per cent of the electorate voted in the by-election, compared with 73.8 per cent at the general election.

Sir Ian Orr-Ewing (64) was Parliamentary Private Secretary to five Ministers between 1936-40, and a member of the Royal Commission on Rhodesia and Nyasaland in 1938. He served with the Scots Guards and the Royal Scots Fusiliers in the First World War, being wounded in action.

Of the five new Members of Parliament, Mr. Noble (44) is a farmer ; Mr. Batsford (47) is chairman and managing director of the publishing house of B. T. Batsford ; Mr. Spriggs (47) is a railway worker ; Mr. Fitch (43) is a miner ; and Mr. Webster (34) is a stockbroker's clerk and a former parachute instructor.—(Times - Daily Telegraph - Manchester Guardian - Daily Herald) **(Prev. rep. By-elections, 16173 A.)**

B. JAPAN. — Bank Rate reduced.

The Bank of Japan reduced its official rediscount rate on June 17 from 8.395 per cent to 7.665 per cent, with effect from June 18. This was the first change in the Japanese Bank rate since May 1957, when it was raised as part of a disinflationary programme to cope with a balance-of-payments crisis. **(Times)**

A. ANTARCTICA. — President Eisenhower's Proposals for Antarctic Treaty. - 11-Nation Acceptance of International Conference on Antarctica.

The U.S. Government sent Notes on May 3 to all countries participating in the International Geophysical Year programme in Antarctica proposing the conclusion of a treaty which would have the following objects :

"(1) Freedom of scientific investigation throughout Antarctica by citizens, organizations, and Governments of all countries, and a continuation of the international scientific co-operation which is being carried out so successfully during the current International Geophysical Year.

"(2) International agreement to ensure that Antarctica is used for peaceful purposes only.

"(3) Any other peaceful purposes not inconsistent with the Charter of the United Nations."

The Notes were sent to Great Britain, France, Norway, the Soviet Union, Australia, New Zealand, Japan, Belgium, Argentina, and Chile—all of which, in addition to the United States itself, are taking part in the current I.G.Y. programme in Antarctica. All these countries were invited to participate in a conference "to be convened at an early date at such place as may be mutually agreeable."

President Eisenhower issued a statement on the same day in which he declared that the United States was "dedicated to the principle that the vast uninhabited wastes of Antarctica shall be used only for peaceful purposes." He expressed confidence that the American proposal would "win the wholehearted support of the peoples of all the nations directly concerned, and indeed of all other peoples of the world."

The U.S. Notes were identically worded, the text being as follows :

". . . The International Geophysical Year comes to a close at the end of 1958. The need for co-ordinated scientific research in Antarctica, however, will continue for many more years in the future. Accordingly, it would appear desirable for those countries participating in the Antarctic programme of the I.G.Y. to reach agreement among themselves . . . to assure the continuation of fruitful scientific co-operation.

"Such an arrangement could have the additional advantage of preventing unnecessary and undesirable political rivalries in that continent, the uneconomic expenditure of funds to defend individual national interests, and the recurrent possibility of international misunderstanding. If harmonious agreement can be reached among the countries directly concerned in regard to friendly co-operation in Antarctica, there would be advantages not only to these countries but to all other countries as well.

"The present situation in Antarctica is characterized by diverse legal, political, and administrative concepts which render friendly co-operation difficult in the absence of an understanding among the countries involved. Seven countries have asserted claims of sovereignty to portions of Antarctica, some of which overlap and give rise to occasional frictions. Other countries have a direct interest in that continent based on past discovery and exploration, geographic proximity, sea and air transportation routes, and other considerations.

"The United States for many years has had, and continues to have, direct and substantial rights and interests in Antarctica. Throughout a period of many years, commencing in the early 19th century, many areas of the Antarctic region have been discovered, sighted, explored, and claimed on behalf of the U.S.A. by U.S. nationals and by expeditions carrying the U.S. flag. During this period, the U.S. Government and its nationals have engaged in extensive activities in Antarctica. In view of these activities, the U.S. Government reserves all rights of the United States with respect to the Antarctic region, including the right to assert a territorial claim or claims.

"It is the opinion of the U.S. Government, however, that the interests of mankind would best be served, in consonance with the high ideals of the U.N. Charter, if the countries which have a direct interest in Antarctica were to join together in the conclusion of a treaty . . ."

After proposing an international Antarctic treaty with the three objectives mentioned above, the U.S. Government expressed its belief that "such a treaty can be concluded without requiring any participating nation to renounce whatever basic historic rights it may have in Antarctica, or whatever claims of sovereignty it may have asserted." The Notes continued :

"It could be specifically provided that such basic rights and claims would remain unaffected and no new claims be made by any country during the duration of the treaty. In other words, the legal *status quo* in Antarctica would be frozen for the duration of the treaty, permitting co-operation in scientific and administrative matters to be carried out in a constructive manner without being hampered or affected by political considerations. Provisions could likewise be made for such joint administrative arrangements as might be necessary and desirable to ensure the successful accomplishment of the agreed objectives. The proposed treaty would be deposited with the United Nations, and the co-operation of the U.N. Specialized Agencies would be sought.

"Such an arrangement would provide a firm and favourable foundation for a continuation of the productive activities which have thus far distinguished the I.G.Y.; would provide an agreed basis for the maintenance of peaceful and orderly conditions in Antarctica during the years to come ; and would avoid the possibility of that continent becoming the scene of international discord."

In conclusion, the U.S. Government invited the other Governments concerned to an early conference at an agreed place.

The U.S. State Department announced on June 4 that all the countries approached had agreed to take part in a conference on Antarctica. In a joint statement on June 8, however, the Argentine and Chilean Governments said that they had accepted "only in principle and with reservations."

In **Britain**, a Foreign Office spokesman said (May 20) that H.M. Government welcomed the U.S. proposal "to ensure freedom of scientific investigation and the non-militarization of the area." The **Australian** Minister of External Affairs (Mr. Richard Casey) said that there had been close consultation between the Commonwealth countries associated with Antarctic activities, adding that President Eisenhower's proposals "clearly serve the general interest and ought not to give rise to controversy." Mr. Casey emphasized that Australia's title to a major part of Antarctic territory would not be impaired.

The Prime Minister of **New Zealand** (Mr. Walter Nash) welcomed the President's proposal as "a constructive step towards the establishment of a stable regime in Antarctica," and expressed his pleasure that "a formal move has been made to arrange for consideration of the future of the Antarctic continent." Mr. Nash pointed out that he had himself referred on several occasions to "the desirability of perpetuating the essential features of the I.G.Y. Antarctic programme —international co-operation, and free access for all nations for peaceful purposes."

The **Soviet Union** sent a Note to Washington (June 2) accepting the invitation to a conference on Antarctica, and noting the "fruitful co-operation" already achieved by scientists of many nations participating in the I.G.Y. programme. After saying that the U.S.S.R. was ready "to promote the development of this co-operation in every way," the Note went on : "The Soviet Government . . . cannot recognize as legal any separate settlement of State jurisdiction over Antarctica. Although the Soviet Union reserves all rights based on the discoveries and explorations of Russian navigators and scientists, including the right to put forward territorial claims in the Antarctic, it nevertheless considers it possible and desirable to reach an international agreement which will ensure freedom of scientific research in the Antarctic and its use for peaceful purposes only." In conclusion, the U.S.S.R. proposed (1) "that the treaty should avoid inclusion of any propositions concerning the question of territorial claims in the Antarctic which could be regarded as placing some States in an unequal position in relation to others"; and (2) that all States wishing to take part in a conference on Antarctic problems should be invited.

The **Argentine-Chilean** statement (June 8) reserved the territorial claims of the two countries to parts of Antarctica, and opposed Soviet participation in the conference.

As shown in the map on page 16055, five countries have established political claims to sectors of the Antarctic continent: (1) Great Britain in the Falkland Islands Dependencies and Graham Land ; (2) Australia in the Australian Antarctic Territory ; (3) New Zealand in the Ross Dependency ; (4) Norway in Queen Maud Land ; and (5) France in Adélie Land, which separates the two parts of Australian Antarctica. In addition, Argentina and Chile claim large parts of the Falkland Dependencies (the claims overlap each other) and have established stations on various islands. No formal claim has been made to Marie Byrd Land, where American expeditions have been particularly active, nor have territorial claims yet been put forward by the Soviet Union, Japan, or Belgium. As stated above, both the U.S. and Soviet Governments reserved the right to make territorial claims in Antarctica. (New York Times - New York Herald Tribune - Times - Daily Telegraph - Australian News and Information Bureau - New Zealand Government Office - Soviet Embassy Press Department, London) **(Prev. rep. Antarctica, 16225 C ; 16179 B ; I.G.Y. Programme, 16055 A.)**

B. ETHIOPIA. — Cabinet Reorganization.

It was announced in Addis Ababa on April 3 that the Emperor Haile Selassie had ordered the following changes in the Ethiopian Government : (*a*) M. Yilma Deressa (Ambassador in Washington) as Minister of Foreign Affairs *vice* M. Aklilou Habtewold, who had held the portfolio since 1948 and would remain a Deputy Premier ; (*b*) M. Abbye Abebe (a former Ambassador in Paris) as Minister of Justice ; (*c*) M. Makonnen Habtewold (Minister of Finance) as Minister of the Interior *vice* M. Sileshi ; and (*d*) M. Woldemaskal (a former Minister of Agriculture) to succeed M. Makonnen Habtewold at the Finance Ministry.—(Le Monde, Paris)

(Prev. rep. Cabinet, 14380 A.)

A. UNITED KINGDOM. — Rent Act. - Mr. Brooke's Warning to Landlords. - Legislation to protect Tenants against Eviction in Special Cases of Hardship.

The text was published on April 16 of the Government's Landlord and Tenant (Temporary Provisions) Bill, intended to help tenants, especially elderly people, who might otherwise be badly affected under the Rent Act when their homes became decontrolled in October. The Bill—which enabled tenants who fulfilled certain conditions to obtain a stay of eviction—implemented a promise given by Mr. Henry Brooke, the Minister of Housing and Local Government, in the House of Commons on April 2.

Mr. Brooke had previously issued a statement on Feb. 22 warning landlords against abusing the provisions of the Rent Act and using eviction notices as a prelude to negotiations with their tenants, instead of first endeavouring to make reasonable agreements with them.

In his statement of Feb. 22 Mr. Brooke said that the Government had acted in the belief that landlords in general would make new agreements with their tenants on reasonable terms. He continued :

" In the great majority of cases that belief has come true. Many landlords have shown restraint and moderation, and a real understanding of the tenant's point of view . . . Large numbers of agreements have been made all over the country.

" But as always there are exceptions. I am thinking particularly of those landlords who, instead of re-letting, are planning to sell simply for the sake of selling. These are people who are giving their tenants no option but to buy or get out.

" Then there are some landlords who say they want to make new agreements but are asking too high rents. That is the way to lose good tenants, and a good tenant is more use to a landlord than a fancy rent. Then there are some others who so far have made no offer of any kind, but have simply left their tenants wondering what they intend to do.

" These classes of landlords are in a minority, but I say plainly to them that . . . they are failing in their duty as landlords to treat good tenants with the fairness and consideration they are entitled to expect. So I want these landlords to think again, while there is still ample time for negotiation. If they have not yet offered to make a new agreement with their tenants, they ought to do so at once.

" They have no right to leave their tenants in uncertainty and anxiety. If there is an exceptional case where for some reason the landlord cannot offer a new agreement, he should at least explain to his tenants what his difficulty is.

" It is quite understandable that in some cases a landlord will prefer to sell. But if he really does not require to sell, and if his tenants are unable to buy, he ought to reconsider and offer to re-let on a new agreement. He can get a perfectly fair return on his money that way, and the tenant will be saved unnecessary anxiety and upset. Any landlord who is uncertain in his own mind whether to re-let or sell should start by finding out what his tenants wish.

" Landlords intending to offer new tenancy agreements have no justification for using eviction notices as a prelude to negotiations. They should tell their tenants straight away what terms they are prepared to offer, and seek to reach agreement as quickly as anyone reasonably can.

" Over all but a small fraction of the rented houses and flats, taking the country as a whole, the Rent Act is working fairly and smoothly. I believe that in many of the cases where difficulties have arisen, it is because the landlord has not fully realized his responsibility nor thought sufficiently of what is entrusted to him. It is in his interest as well as in the tenant's to reach agreement."

Mr. Brooke concluded : " There is still plenty of time for my words to have effect. Those who do not heed them may regret it. I shall be watching closely to see how things go on."

House of Commons Debate on Rent Act.

A debate on the working of the Rent Act took place in the House of Commons on March 3 on an Opposition motion (moved by Mr. Mitchison, Lab.), deploring " the oppressive agreements and serious hardships imposed on tenants " as a result of the Act, and calling on the Government to " take immediate steps to remedy these grievances."

Mr. Mitchison declared that because of the great difficulty in finding alternative accommodation, tenants faced with the consequences of the Act and wishing to avoid eviction would have no choice but to accept any bargain, however oppressive, that their landlords might offer. In some cases, tenants had been served with notices to quit and informed that no new agreements would be offered to them since it was intended to let the property furnished. In others, they had been told that rents would be increased by 300 or 400 per cent—in some cases by 600 or 800 per cent. Most of these people had been living in their houses or flats for some time ; if they were obliged at comparatively short notice to pay many times what they had been accustomed to pay, they would only be able to find the money by cutting down on food and necessities.

After speaking of " the vast mass of landlords who hold their houses as an investment for the money they can get out of them," Mr. Mitchison denied the Government's claim that the Act would result in better maintenance of the nation's stock of houses. Contending that there was " nothing in the Act to compel a landlord to get a house into better repair before increasing the rent," he declared that the formalities which a tenant had to go through before he could secure repairs were " well and truly weighted in the landlord's favour." As a result, although a few houses were being " patched up," the majority were not being attended to at all.

Mr. Mitchison concluded by referring to Mr. Brooke's warning to " landlords who did not realize their responsibilities " [see above] and asked what steps the Government proposed to take to implement the warning.

Mr. Brooke, who replied, moved the following amendment :

" This House congratulates the Government upon the rapid expansion of house building achieved in the past six years, which has rendered a measure of decontrol possible ; reaffirms its belief that the Rent Act will make a valuable contribution to the nation's housing needs by securing better maintenance of the nation's stock of houses and by bringing into use accommodation which because of rent restriction has remained under-occupied ; and maintains its support for the Government in all measures necessary to achieve these ends in a fair and reasonable manner."

Declaring that the Labour Party's failure to build sufficient houses between 1945 and 1951 had " contributed more hardship than the Rent Act will ever do," the Minister argued that it was impossible to remove the " frustration of rent control," under which many tenancies had been " petrified for 18 years," without causing hardship or inconvenience to anyone. What had to be done was to keep down the hardship as much as possible and go forward with the decontrol policy. Never before had there been so much house-room in the country, since 3,000,000 houses and flats would have been built since the war—two-thirds of them under a Conservative Government.

The Rent Act (Mr. Brooke continued) affected the tenants of only about 5,000,000 of the 15,000,000 dwellings in Britain, and six out of seven tenants still enjoyed security of tenure. The Act had been so successful in stimulating the putting in hand of repairs that up to Dec. 31, 1957, local authorites had issued only 13,000 certificates of disrepair, with another 10,000 under consideration. Even if all these were granted, it would make only a total of 23,000 certificates of disrepair out of over 4,250,000 tenancies. In all other cases where the landlord had claimed a rent increase, he had undertaken to do the necessary repairs. This was entirely due to the Rent Act.

The great majority of decontrolled tenants, the Minister went on, had neither been threatened with eviction nor asked to pay unreasonable rents ; exaggerations helped no-one except the small minority of landlords who wished to frighten tenants into paying too much. Mr. Brooke alleged in this connexion that a good many cases of hardship had been directly caused by the Labour Party's " thoughtless and misleading " pledge to municipalize rented houses, but for which there would not have been " anything like so many landlords wanting to sell." It should also be remembered that there was " another common type of case, in which irresponsible tenants have been trading on landlords' inability to get rid of them and a kind of civil war has been going on for years." In spite of these exceptions, however, the majority of tenants in London and elsewhere had already taken up new leases for three years ; in other cases negotiations were proceeding, and in yet others tenants were buying their houses from their landlords, often at prices below the market value. The bigger property-owners had, in the main, quoted reasonable new rents for sitting tenants.

As regards his warning to landlords, Mr. Brooke said that although he did not propose to elaborate on this until he had seen whether the advice was being taken, the Government would endeavour to overcome " in a fair and reasonable manner " the difficulties which decontrol was causing in London and " a small number of other places." He added : " So far as I can judge it is largely a problem, not of the young and able-bodied, but of the elderly. It is not easy for old people to move. These are the people we want to help . . . The Government has no intention of repealing the Rent Act, or any part of it . . . If we conclude that any further steps are necessary to secure that the objects of the Act are accomplished in a fair and reasonable way, we shall take them."

After debate, the Opposition motion was defeated by 304 votes to 246 and the Government amendment agreed to by 307 votes to 246. Four Conservative M.P.s (Colonel J. K. Cordeaux, Mr. Anthony Marlowe, Mr. Robert Jenkins, and Mr. Henry Price) abstained from voting on the Opposition's motion, but the first three voted on the Government amendment. Mr. Price and the six Liberal M.P.s abstained in both divisions.

A group of 16 Conservative M.P.s had sent a letter to the Prime Minister on Feb. 25 expressing " grave concern " at the working of the Rent Act, and asking him to receive a deputation from them. The letter spoke of the " widespread fear of eviction in October " felt by tenants ; the refusal of many landlords to negotiate new leases ; and the " oppressive contracts " drawn up for new tenancies by other landlords, and accepted by their tenants " at pistol point."

Unsuccessful Amendment Bills by Labour Members.

A series of attempts to introduce Bills to amend the Rent Act was made by Labour back-bench M.P.s under the "10-minute rule" between January and April. In each case leave to introduce the Bills was refused on the motion of Conservative back-benchers. The objects of the Bills are summarized below, with sponsor's names, dates of refusal of leave, and voting figures in parentheses.

(1) To extend by 12 months the date on which notices of eviction would become operative (Mr. Arthur Lewis, Jan. 28. Leave refused by 238 votes to 173).

(2) To enable tenants of decontrolled houses to remain in possession for up to three years at rents to be determined by tribunals (Mr. Gibson, Feb. 5. Leave refused by 234 votes to 195).

(3) To empower the Courts to restrain or delay eviction in cases of aged tenants, long occupation, or grave hardship (Mr. Orbach, Feb. 11. Leave refused by 243 votes to 204).

(4) To authorize local authorities to purchase land compulsorily to prevent evictions from houses decontrolled under the Rent Act (Mr. Julius Silverman, Feb. 25. Leave refused by 259 votes to 211).

(5) To raise the level above which houses in Scotland would be decontrolled from £40 to £60 rateable value (Mrs. Jean Mann, March 5. Leave refused by 250 votes to 203).

(6) To simplify and expedite the procedure for securing repairs to rent-controlled dwellings, and to shorten the time allowed for the performance of landlords' undertakings. (Miss Alice Bacon, March 12. Leave refused by 232 votes to 202).

(7) To provide that the rent of a dwelling-house which was unfit for habitation and included in proposals submitted to the Minister of Housing under the Housing Repairs and Rents Act should not exceed the gross rateable value. (Mr. Sparks, March 19. Leave refused by 261 votes to 189).

(8) To give County Courts power to order exchanges of statutory tenancies where both tenants were willing and the landlord unreasonably withheld his consent. (Mr. Darling, March 26. Leave refused by 233 votes to 191).

(9) To provide that the Minister of Housing should fix a multiplier of the gross rateable value of houses as a price-ceiling, and that if a house was sold above this figure the tenant or former tenant who had been evicted by his landlord in order that the house might be sold should be entitled to the excess amount. (Mr. Paget, April 29. Leave refused by 243 votes to 187).

(10) To enable the widow of a person dying intestate, or other member of his family living with him at the time of his death, to retain possession where that person had become a tenant under the Increase of Rent and Mortgage Interest Act. (Mr. Janner, May 13. Leave refused by 254 votes to 200).

The Landlord and Tenant (Temporary Provisions) Bill.

As stated above, the Government itself introduced legislation with a view to overcoming special hardships arising from the application of the Rent Act. The terms of the Bill (which applies to England, Wales, and Scotland) are summarized below :

(1) A landlord wishing to regain possession of decontrolled property when notice to quit expired would have to apply to the County Court (in Scotland to the Sheriff Court) for an order of possession.

(2) The tenant could stay in possession pending the hearing of the action, but in England and Wales would have to pay a rent equal to twice the gross rateable value of the property, plus rates and a reasonable charge for any services provided by the landlord. In Scotland he would pay the existing rent plus half the 1954 rent. If the rent he had previously been paying was higher than these amounts, he would continue to pay the higher sums.

(3) The court could suspend the possession order for not less than three or more than nine months if the tenant could prove (*a*) that he had made "all reasonable efforts to reach agreement with the landlord for a tenancy of at least three years"; (*b*) that he had taken "all reasonable steps" to find other suitable accommodation, but had failed; (*c*) that he had paid, or offered to pay, all rent due from him up to the date of hearing; (*d*) that an order for immediate possession would cause him greater hardship than the suspension of the order would cause to the landlord. In considering whether conditions (*a*) and (*b*) were satisfied, the court would have regard to the tenant's means and age, as well as to any disability from which he might suffer.

(4) The court might subsequently, and on a fresh application by the tenant, extend the period of suspension for further periods of six months at a time, provided that the appropriate conditions were still satisfied.

(5) If the court suspended the possession order, the rent payable would be the figure asked by the landlord, unless the court was satisfied that this was beyond the tenant's means. In such cases the court might fix a lower rent, but not below the rent which the tenant was paying before the hearing.

[The minimum rent which the court could fix would thus be twice the gross rateable value plus rates and services in England and Wales, and the existing rent plus half the 1954 rent in Scotland—see provision 2 above].

(6) The protection given by the Bill would extend to the tenant's widow or other relative who could have succeeded to a statutory tenancy under the Rent Acts. It would not apply where the tenant voluntarily gave up possession or made an agreement for at least three years. If, however, he made an agreement for a shorter period, the Bill would apply when the new tenancy came to an end.

(7) A landlord who attempted to get possession of his property except by a court order, or who unreasonably withheld services previously provided, would be liable to a fine of up to £100, or up to six months' imprisonment, or both.

(8) The court would not be able to suspend a possession order if the landlord could prove that before April 2, 1958 (the date when the Minister of Housing and Local Government announced his intention to introduce the Bill) he had made an agreement under which he was obliged to give vacant possession on a specified date to a person requiring the accommodation for his own occupation or that of a parent or grown-up child.

(9) The grounds on which the court could grant the landlord possession under the Rent Acts (e.g. non-payment of rent or a breach of the tenancy agreement) would also be grounds on which a Court could refuse to postpone possession under the Bill.

(10) The Bill would remain in force for three years after enactment.

The second reading was moved in the House of Commons on April 24 by the Minister of Housing.

Mr. Henry Brooke claimed that the Rent Act had enabled thousands of houses to be put in proper repair and had succeeded also in its second objective of creating a free market in houses and flats above a certain rateable value. Since the Act had come into effect, however, two developments had occurred to make the transition to decontrol more difficult. These were (1) the increase in Bank Rate and intensification of the credit squeeze in September 1957 [see 15770 A]; (2) the Labour Party's threat to repeal the Rent Act and municipalize rented houses [see page 15892, second column]. "This ill-advised and well-publicized resolution," Mr. Brooke continued, "induced many owners to sell their property with vacant possession as quickly as possible, and led to thousands of tenants receiving notice to quit who would not otherwise have received it." In spite of these developments, most of the 800,000 tenants of decontrolled houses and flats had already made new arrangements, and there was time before October next for many more agreements to be made.

The object of the Bill (the Minister continued) was to aid the small number of decontrolled tenants mostly in London and a few big cities - who by October next had not succeeded in making fresh arrangements, although they had endeavoured to do so. The Government had no intention of bringing back control in any shape or form, and the Bill would only help those who were prepared to help themselves, and protect them against undeserved hardship by giving them more time to find other accommodation. Any tenant who had received notice to quit and wished to stay should tell his landlord that he was willing to pay a reasonable rent, only if no fresh agreement was possible should he start looking for something else. The Bill would make it illegal for the landlord to regain possession without a court order; if the court suspended the order in the tenant's favour, the extra time granted the tenant would in many cases solve the problem.

Mr. Mitchison (Lab.) claimed that by introducing the Bill the Minister really sought to amend the Rent Act—which previously he had consistently refused to do. Complaining that Mr. Brooke's "tardiness" in acting had been "grossly unfair to those tenants who have been driven into harsh and unconscionable bargains with their landlords," he accused the Government of "playing politics" in view of the prospect of an L.C.C. election, and of introducing "in a weak and modified form" the very proposals they had previously refused to accept from the Opposition [see above]. After asserting that a tenant who applied for the suspension of a possession order would "have to prove everything" and be faced with costs of about £25 a day if his application failed, Mr. Mitchison particularly criticized the "hardship clause," asking how a court was to weigh up the "greater hardship" as between a company owning a block of flats and a tenant who, if evicted, would have to find somewhere else to live. Although the Opposition thought that the Bill would not go far to rectify hardships caused by the Rent Act, it would not oppose it because "even this small snack is worth something to somebody."

The Bill was given an unopposed second reading after debate. (Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM. — Further Bank Rate Cut.

A further cut in the Bank Rate from 5½ per cent to 5 per cent was announced by the Bank of England on June 19, bringing the rate back to the pre-crisis level existing before the 2 per cent emergency increase of last September. The reduction was described in official circles as another technical adjustment to meet the steady fall in short-term interest rates in New York and other international financial centres. It was stressed that it involved no relaxation of the credit squeeze.—(Financial Times) **(Prev. rep. 16188 A.)**

A. HUNGARY - SOVIET UNION. — M. Khrushchev's Visit to Hungary. - Speeches on Hungarian Uprising. - Soviet-Hungarian Economic Agreements.

The Soviet Prime Minister, M. Khrushchev, accompanied by M. Kozlov (First Deputy Premier) and M. Gromyko (Foreign Minister), visited Hungary from April 2-10 for talks with M. Kadar (First Secretary of the Hungarian Socialist Workers' [Communist] Party, Dr. Muennich (Prime Minister), M. Marosan (First Secretary of the central committee of the H.S.W.P.), M. Sik (Foreign Minister) and other party leaders. During their stay in Budapest the Soviet Ministers attended a mass meeting to celebrate the anniversary of Hungary's liberation by the Soviet armies ; they also visited a number of towns in the provinces, as well as industrial enterprises, scientific institutions, and co-operative farms.

A joint statement was issued on April 9 announcing (*a*) that a trade agreement had been signed providing for " a further increase in reciprocal deliveries of goods during 1958-60 "; (*b*) that the Soviet Government had extended to Hungary " additional economic aid for the building and reconstruction of enterprises in the metallurgical, machine-building, electrical engineering, chemical, oil, consumer goods, and other industries, and also transport " ; (*c*) that agreement had been reached for long-term scientific and technical co-operation between Hungary and the U.S.S.R., including co-operation in the production of electrical equipment, precision instruments, and diesel engines ; and (*d*) that a cultural co-operation plan for 1958 and an agreement between the Academies of Sciences of the two countries had been signed for promoting cultural and scientific ties.

The lengthy statement, after reviewing the development of Soviet-Hungarian relations since the Joint Declaration of March 28, 1957 [see page 15665, first column], said that the talks had " revealed complete identity of views on the role and significance of the Warsaw Treaty." It stressed the aim of both countries of " further strengthening and welding together the Socialist camp in the interests of consolidating world peace "—a unity which " no power on earth can disrupt "—and spoke of the importance of an early " summit " meeting as a basis for establishing an effective system of collective security in Europe, notably by a non-aggression treaty between NATO and the Warsaw Treaty countries. The statement urged the ending of nuclear weapon tests ; concrete disarmament measures ; the ending of the " cold war " ; and the abolition of military bases on the territories of other countries. It expressed " grave concern " at the decision to equip the West German Army with nuclear weapons and at the plans for missile bases in Western Germany, and called for the creation of a Central European zone free from nuclear and rocket weapons.

Finally, the statement emphasized that " the question of the State system in the people's democracies " could not form the subject of discussion at a summit conference, as such discussion would be " incompatible with the principles of the U.N. Charter " and would constitute " inadmissible interference in the affairs of sovereign States." It condemned both " revisionism " and " dogmatism and sectarianism " in terms similar to those of the Moscow 12-party declaration [see 15899 A] ; reaffirmed the " unswerving loyalty " of the Soviet Communist Party and the Hungarian Socialist Workers' Party to " the Leninist principles of proletarian internationalism " ; and declared that they would "wage a resolute struggle against the attempts of the enemy to make use of nationalism in order to foment hostility and hatred among the peoples."

During his visit to Hungary M. Khrushchev made a number of public speeches in which he defended the Soviet intervention in Hungary in 1956 and declared that the U.S.S.R. would suppress " counter-revolution " in any Socialist country.

Conflicting reports were given of a short extempore speech made by M. Khrushchev on April 5 to iron and steel workers at Sztalinvaros (a centre of resistance during the 1956 uprising). According to reports by four Western news agencies, M. Khrushchev said : " You should not think that if a counter-revolution comes again you can depend on the Russians coming to your aid once more. You must help yourselves." In a subsequent speech at Tatabanya on April 8, however, he accused " bourgeois journalists " of misquoting him, and continued : " I told our Hungarian friends at Sztalinvaros that they should manage their affairs in such a way that there would be no new counter-revolution and it would not be necessary for us Russians to come to their aid. If provocateurs or enemies of the workers attempt a *putsch* or counter-revolution in any Socialist country, then I tell them here and now that all the Socialist countries and the armed forces of the Soviet Union will be ready at all times to give the provocateurs the answer they deserve."

Addressing a meeting at Csegled on April 7, M. Khrushchev attributed the 1956 uprising to the " serious mistakes " committed by the Hungarian Communist leadership and to " reactionaries " who, supported by " outside imperialist forces," had taken advantage of those mistakes. The decision to intervene had been a hard one to take, as " a section of the workers were also on the side of the counter-revolution," but the Soviet Government had decided that it could not stand aloof " when Fascist elements began to butcher the finest representatives of the working people." In a speech at the Csepel steelworks in Budapest (the scene of heavy fighting during the uprising) M. Khrushchev said that " the overwhelming majority of the Hungarian workers remained loyal to the people's democracy " ; he claimed that the Csepel workers had demanded arms to fight the rebels, but had been refused them by " the traitorous Imre Nagy group."

On returning to Moscow on April 10, M. Khrushchev highly praised M. Kadar and Dr. Muennich as " true revolutionaries " and " faithful friends of ours " [see page 16172, first column]. On the other hand, he denounced M. Rakosi (the former First Secretary) as primarily responsible for the 1956 uprising ; recalled that M. Kadar had spent five years in prison under Rakosi's rule ; and commented that " Rakosi is even now offended that he is not being recognized." M. Khrushchev's remarks were interpreted as an affirmation of Soviet support for the moderate section of the Socialist Workers' Party led by M. Kadar as against the " Stalinist " wing, which had recently been demanding M. Rakosi's return from his exile in the Soviet Union.

An agreement on economic co-operation between the Soviet Union and Hungary during the years 1961-65 was signed in Moscow on June 2. It provided that the U.S.S.R. would supply iron ore, pig iron, non-ferrous metals, coke, oil, timber, and cotton to Hungary in return for machinery, equipment, shipping, medicines, fabrics, and footwear. It also provided for Soviet technical assistance to Hungary in constructing and enlarging a number of industrial establishments.

B. IRISH REPUBLIC. — Report of Atomic Energy Committee. - Reactor proposed for Dublin.

The report of an Atomic Energy Committee which was set up in March, 1956, was published in Dublin on May 30, 1958. Its principal recommendations were for the establishment by the Government of an Atomic Energy Board which should have responsibility for an atomic research reactor (to be situated in Dublin), the custody of the fuel, a training and research programme, and other matters relating to atomic energy development in the Irish Republic. Other recommendations included the following :

(1) The reactor should, if possible, be operated under contract by a University institution or college, in the first instance for five years.

(2) Executive responsibility for the safe operation of the reactor should rest with a committee of five persons, of whom two should be the senior officers of the reactor.

(3) An advisory centre should be established to further the application of radioactive isotopes in Irish industry.

(4) Existing work in the application of radioactive isotopes to agriculture should be extended.

(5) Units for therapeutic use of radioactive isotopes should be established in a few general hospitals, and facilities for the use of such isotopes for diagnostic purposes should be extended to a number of centres throughout the country.

(6) A research reactor suitable for Irish needs should be established in Dublin in an area free from continuously occupied buildings over a 500-foot radius. Parts and control gear for the reactor should be bought from a specialist contractor in Britain or the U.S.A., but the design of the reactor pool and buildings should be entrusted to an Irish engineer, and the construction to an Irish contractor.

(7) Post-graduate courses should be established for training Irish engineers in the peaceful uses of atomic energy.

In a minority report, two members of the committee (General M. J. Costello and Professor E. T. S. Walton) suggested that instead of being operated by a university college it would be better if the reactor was operated directly by the Atomic Energy Board. Both these members, as well as Mr. John Conroy (president of the Irish Transport and General Workers' Union) and Professor Cormac O'Ceallaigh, doubted the advisability of expenditure on a research reactor at the present time.

The chairman of the Atomic Energy Committee was Mr. Daniel McAleese, a former Revenue Commissioner.
(Irish Times, Dublin)

C. UNITED STATES. — Interment of Unknown Soldiers of Second World War and Korean War.

The bodies of two unknown American soldiers, one killed in the Second World War and the other in the Korean War, were interred on May 30 in the Arlington National Cemetery, Washington, beside the tomb of the Unknown Soldier of the First World War. The ceremony was attended by President Eisenhower, Vice-President Nixon, Administration and Congressional leaders, representatives of the armed forces, and more than 100,000 civilians.—(New York Times)

A. NORTH ATLANTIC TREATY ORGANIZATION - WESTERN EUROPEAN UNION. — Council and Defence Ministers' Meetings. - Plan for Pooling of Arms Production. - The Support Costs Question.

The North Atlantic Council met at ministerial level in Copenhagen on May 5-7. The meeting took place at Christiansborg Palace (the seat of the Danish Parliament) and was attended by the Foreign Ministers of all 15 member-countries—M. Larock (Belgium), Dr. Sidney Smith (Canada), Hr. Hansen (Denmark), M. Pineau (France), Dr. von Brentano (Western Germany), M. Pesmajoglu (Greece), Hr. Gudmundsson (Iceland), Signor Pella (Italy), M. Bech (Luxemburg), Dr. Luns (Netherlands), Dr. Lange (Norway), Dr. Paulo Cunha (Portugal) M. Zorlu (Turkey), Mr. Selwyn Lloyd (United Kingdom), and Mr. Dulles (United States).

M. Spaak (Secretary-General of NATO), who addressed the Council on May 5, stressed that there must be no weakening of the Alliance. He declared that while the Soviet Union had been held in check in Europe and in the military field, she was now trying to turn the flank of NATO in other parts of the world and in the political, economic, and psychological spheres. He emphasized the progress made in the past 12 months in developing political consultation within the Council, both over the talks on disarmament and on the Western correspondence with Marshal Bulganin, as well as in the preparations for a summit conference. M. Spaak also spoke of the need for greater economic and scientific co-operation among the member-countries.

The talks were held in closed session, but it was reported that the Ministers had dealt *inter alia* with the question of a "summit" conference, disarmament, the Middle East, and the strengthening of NATO in non-military fields, especially in the economic sphere. The following communiqué (cross-headings inserted) was issued at the end of the meeting:

Development of NATO. "The Foreign Ministers . . . have deepened and strengthened their mutual understanding and their unity of purpose. NATO, a defensive organization, is now much more than merely a military alliance. It is becoming a true community of free nations. Within this community, to a degree unprecedented in history, countries are carrying out a policy of close co-operation in peace-time without abandoning their independence. This development is one of the most significant and promising events of our time."

Political Co-operation. - Co-ordination of Defence Production. "The Council reviewed the activities of the alliance and examined the international situation. For the first subject of discussion, the Council had before it a report submitted by the Secretary-General. The Council was in agreement with this analysis of the work of the alliance in the past year. They agreed in particular that the outstanding achievement had been the remarkable progress made in the strengthening of political consultation. This has been successfully applied to an increasing number of problems and has led to co-ordination of policy on major questions of common interest. The Council also expressed its satisfaction with the results of the recent conference of Defence Ministers and with the good start made in the field of scientific co-operation [see below]."

Economic Co-operation. "Ministers recognized that political unity and the efficient organization of defence were not enough. Economic co-operation is also essential between the members of the alliance. Every effort should be made to ensure economic prosperity, notably by expansion of international trade and by aid to under-developed countries. Consultations on methods and machinery for such co-operation will take place within the alliance. Ministers attach special importance to the successful conclusion of the economic negotiations now being undertaken, and to the establishment of close ties between the European countries and the whole free world."

Summit Conference. - Disarmament. "During their consideration of the international situation the Ministers had a discussion on the question of a possible summit conference. The Council believes that summit meetings are desirable if they offer prospects of reaching settlements on important questions. It considers that conferences at the summit are not the only way, or necessarily the best way, of conducting negotiations or reducing international tensions. In any event, such conferences must be properly prepared and take place in a favourable atmosphere.

"Ministers regretted that during the last few weeks the Soviet Union has made the preparations for a possible summit conference more difficult by posing unreasonable conditions. The Soviet Union has recently aggravated international tension by its veto in the Security Council of the U.S. proposals to reduce the risks of surprise attack over the Arctic [see 16166 A]. Despite the disappointment and doubts to which the Soviet attitude gives rise, the NATO Governments will not be discouraged nor give up their attachment to the principle of negotiation.

"Should a summit conference take place at this time it should consider certain important problems, among others the German problem, which were identified by the Heads of Government at Geneva in 1955 and on which unfortunately little or no progress towards a solution has been made. Controlled disarmament . . . should be one of the main questions on the agenda. The proposals made by the Western Powers on Aug. 29, 1957 [see 15941 A], and approved by a large majority in the United Nations, could afford a reasonable basis for this discussion.

"The Council expressed the hope that it might yet prove possible, in spite of repeated Soviet refusal, to inaugurate expert technical discussions between representatives of the Soviet Union and of the Western Powers principally concerned, on detailed measures of control over disarmament. Agreement on measures necessary, for example, to prevent surprise attack or to detect nuclear explosions might go far towards demonstrating the possibility of agreement on disarmament, improving its prospects, and accelerating its application when reached. To prepare the way for such agreement the Council will consider the possibility of carrying out studies and experiments on the technical problems of inspection and control."

Conclusion. "Finally, the Ministers confirmed the full agreement of their Governments on the basic principles of the alliance, its goals, and the methods of obtaining them."

In connexion with the talks on the composition of an eventual Foreign Ministers' or summit conference, the following statement was issued on May 7 by the British, French, and U.S. delegations:

"The three countries conducting the preliminary diplomatic contacts with the Soviet Union indicated that they did not consider that they would necessarily be the only Western nations to take part in a pre-summit Foreign Ministers' conference or in any summit conference. Other countries, for instance Italy, might also be included." [It was understood that Signor Pella had intimated during the Copenhagen meeting Italy's desire to take part in a "summit" or preparatory Foreign Ministers' conference].

Meeting of NATO Defence Ministers.

The North Atlantic Council meeting had been preceded by a conference of the Defence Ministers of NATO countries (except Iceland) which was held in Paris on April 15-17 under the chairmanship of M. Spaak, in accordance with the decision taken by the Heads of Government at the Council's meeting in December 1957. The communiqué stated:

"The Ministers heard full reports by the Military Committee, the Standing Group, and the Supreme Allied Commanders on the present state of the forces of the Alliance; on the progressive introduction of the most modern weapons and equipment; and on the forces needed for NATO defence in the years ahead. They also heard progress reports on projects initiated by the Heads of Government in December. On the basis of these reports a most useful discussion took place between the Ministers and the NATO military authorities.

"In order to meet the continuing efforts of the Soviet leaders to equip their forces with the most modern weapons, the Ministers discussed ways and means of making the best use of the resources of the Alliance and of achieving greater effectiveness for its forces. They confirmed their support of the basic NATO strategy for the preservation of peace and the defence of member-countries. This defensive strategy continues to be founded on the concept of a strong deterrent, comprising the 'shield' with its conventional and nuclear elements, and the nuclear retaliatory forces.

"The Ministers were also in agreement on certain measures to achieve greater co-ordination and to widen co-operation among member-countries, both with respect to defence research, development and production, and the organization of forces.

"The Ministers are confident . . . that the progressive modernization of NATO forces, on the basis of agreed strategic plans, will enable the Alliance to maintain its defensive strength, while efforts continue to be made to re-establish international confidence through effective, controlled disarmament."

In addition to the regular meetings, the French Minister of Defence (then M. Chaban-Delmas) had private meetings with the Defence Ministers of Great Britain, the U.S.A., Western Germany, and Italy (Mr. Duncan Sandys, Mr. McElroy, Herr Strauss, and Signor Taviani) aimed at giving the Western European Union a greater scope of activity within the NATO framework than hitherto. In his conversations with Mr. McElroy, M. Chaban-Delmas was reported to have stressed the important role which France played in Algeria by preventing the outflanking of NATO in the south—i.e. *via* North Africa.

Authoritative press reports stated that the conference had taken two important decisions: (*a*) approval of reports by the Military Committee and General Norstad (the Supreme Allied Commander) on minimum force requirements and the re-equipment of forces with the most modern weapons; and (*b*) formal acceptance of a British plan, presented by Mr. Duncan Sandys, for a West European arms production "pool" between the Governments of Britain, France, Western Germany, Italy, and the three Benelux countries.

Strength and Equipment of NATO Forces. The report of the Military Committee contained a five-year plan outlining the present proportions of the Soviet military threat; assessing the strength of the forces required to meet it; and suggesting a policy of re-equipping the forces of the Alliance with tactical atomic weapons. It also set out the form and size of the contributions which each member-country should make to the common defence effort in the coming years in terms of nuclear arms and strategy.

In connexion with this report the Ministers were addressed by General Oen (Norway), chairman of the Military Committee; General Johnson (U.S.A.), chairman of the Military Standing Group; General Norstad, the Supreme Allied Commander in Europe; Admiral Wright (U.S.A), Supreme Allied Commander, Atlantic; and Admiral Sir Guy Grantham (U.K.), C.-in-C., Channel Command. General Norstad also presented a report on minimum force requirements, which he estimated at 30 divisions equipped with tactical atomic weapons, or one-half the target of 60 divisions set by the North Atlantic Council meeting at Lisbon in 1952. The Defence Ministers were reported to have approved the strategic aspects of General Norstad's report, though reserving their position on the ability of their Governments to provide the necessary funds for equipping 30 divisions with modern weapons. Mr. McElroy was said to have given an assurance that the U.S. Government was willing to provide its Allies with the necessary tactical atomic weapons as soon as possible.

Pooling of Arms Production. The British plan for the joint development of modern weapons by the seven member-countries of W.E.U. provided for the pooling of their resources for the research, development, and production of various types of arms, excluding nuclear weapons. The plan envisaged collaboration by scientists of the seven countries in research, and harmonization of the national arms industries to permit different countries to specialize in different weapons or types of machinery. Mr. Sandys was reported to have put forward a list of some 20 joint projects, including proposals for the joint production of certain submarines; of anti-submarine measures to ensure standardization in the Baltic, North Sea, and Mediterranean; of guided missiles—both surface-to-air and surface-to-surface—and ballistic missiles of several ranges, including inter-continental missiles; of radar equipment; of certain types of tanks and jet engines; and of a new type of machine-gun.

Under the plan (which received the full support of the U.S.A.) Britain would become entirely dependent on European countries for certain weapons, and *vice versa*. While the plan was initially limited to the seven member-countries of the W.E.U., co-operation with other European members of NATO would be invited. Details of the plan—which will supersede most existing bilateral or trilateral arms production agreements [see below]—will be worked out by the W.E.U. Armaments Committee.

Among other proposals discussed at the meeting was one put forward by Canada which offered to build up large stocks of food in Europe for the use of Allied forces, in view of the possible Soviet submarine menace in the Atlantic at the beginning of a war. M. Chaban-Delmas explained a French plan to reorganize the French Army into a group of highly mobile light mechanized divisions.

NATO Estimate of Strength of Soviet Forces.

Following General Norstad's report to the Ministers on the strength of the Soviet armed forces according to latest estimates, the NATO Secretariat published the following figures: (1) The Soviet Army was estimated to have 82 divisions at present under arms (or 3,000,000 men altogether), which could be expanded to 400 divisions within 30 days after the outbreak of a war. (2) There were enough tanks, mortars, and anti-tank guns for at least 300 divisions. (3) Of the 82 divisions at present available, 22 (mostly armoured) were stationed in Eastern Germany, with another 60 in Eastern Europe and Western Russia. (4) The Soviet Air Force had 20,000 aircraft. (5) Within two or three years the Soviet Union would have about 700 submarines (the previous estimate of Soviet submarine strength was 500). (6) The U.S.S.R. would also have intermediate and long-range ballistic missiles within several years.

Anglo-German Agreement on Support Costs.

After protracted negotiations, agreement was reached during April and May between Britain and the German Federal Republic on the question of German payments to the U.K. to help in meeting the costs of maintaining British forces in Germany over the next three years.

It had been announced in Bonn on Dec. 2, 1957, that Britain had again asked the Federal Government to pay support costs totalling £50,000,000 in 1958-59 as a contribution towards the maintenance of British troops in Western Germany—the total comprising the equivalent of £17,000,000 as "support costs" and £33,000,000 as "mutual aid." [The total amount was later reduced to £47,000,000—see page 16031, second column]. The Federal Government, however, rejected this demand, and discussions in London on Dec. 4-5 between Dr. von Brentano, Mr. Macmillan, and Mr. Selwyn Lloyd failed to result in any agreed solution. The British Government therefore submitted the matter to the Permanent Councils of NATO and W.E.U., which considered the dispute on Dec. 9. As a result, the NATO Council appointed a three-man group of independent experts to examine the financial aspect of the matter, consisting of Hr. Brofoss (Governor of the Bank of Norway, and a former Norwegian Finance Minister), M. Frère (Governor of the National Bank of Belgium), and M. Jacques Rueff (Deputy Governor of the Bank of France).

The British request was based on the "escape clause" in the Paris Agreements which authorized Britain, in case of balance-of-payments difficulties, to invite the North Atlantic Council "to review the financial conditions on the basis of which the U.K. formations on the Continent are maintained." The special meeting of the W.E.U. Council was requested to consider the British action taken in NATO.

On returning to Bonn from London, Dr. von Brentano said that Britain did not pretend to have a legal claim to support costs. She had argued, however, that she could not maintain her troops in Germany out of her own resources because of her foreign currency difficulties. Germany had been informed of Britain's approach to the North Atlantic Council and would "await the results of its deliberations."

The Permanent Council of NATO met again on Jan. 8, 1958, to consider the report of the three experts, the following statement being issued:

"Monetary difficulties arising from the stationing of British troops on the Continent have been the subject of discussions in the Council for some time. In conformity with NATO procedure in cases of this kind, the Council appointed experts charged with examining certain technical aspects of the U.K. balance-of-payments in the coming months. The experts had to decide whether the U.K. was justified in asking for the help of her allies to settle this problem.

"The experts have now prepared their report, whose conclusions indicate that the United Kingdom was justified in appealing to her allies. The report has been submitted to member-Governments for their examination."

The German Federal Government, while repeating its readiness to take account of Britain's "currency difficulties" by "appropriate measures," nevertheless refused to resume negotiations with Britain on the question of support costs.

An official statement, issued on Jan. 27 by the Finance Ministry in Bonn, admitted that 3,000,000,000 DM. of the current year's Defence Budget (1957-58) of 9,000,000,000 DM. (about £750,000,000) would remain unspent, but maintained that this credit balance would be "urgently needed to finance expenditure of 10,000,000,000 DM. on the defence forces in the financial year 1958-59." The Finance Ministry added that if support costs were paid in 1958-59 this would considerably delay the expansion of the *Bundeswehr*, thus preventing the Federal Government from fulfilling its NATO commitments. In a press statement on Jan. 31 both Dr. von Brentano and Herr Etzel (the Finance Minister) reaffirmed that the Federal Government had decided not to pay support costs.

M. Spaak visited Bonn on Feb. 2 in an effort to break the deadlock, but his discussions with Dr. von Brentano, Herr Etzel, Herr Strauss (the Defence Minister), and General Heusinger (Inspector-General of the *Bundeswehr*) proved abortive. Although his financial and economic adviser (M. Gregh) stayed behind for further talks, M. Spaak declared on leaving Bonn that he had "found no solution."

On Feb. 5 the German Federal Government announced that, in order to alleviate Britain's foreign exchange position, it would be prepared to deposit with the Bank of England £100,000,000 immediately as an advance payment for arms purchases. The deposit would be paid from the Defence Vote and not by the *Bundesbank*, and would therefore be interest-free. Of the total, £50,000,000 would be spent in the first two years and the remainder in the third and final year, any unexpended balance being returnable to Germany. [In effect, however, the advance would have amounted to only £90,000,000 of new money, since £30,000,000 had been deposited with the Bank of England for the same purpose in 1957, but only £20,000,000 had been spent and the balance of £10,000,000 would have been withdrawn had the new offer been accepted.]

A West German spokesman explained that the proposal had been made to M. Spaak during the latter's visit; had since been approved by the Federal Cabinet; and would amount to a saving in interest for Britain of £10,500,000 because of the interest-free character of the loan. He made it clear that though depositing the amount in London as an advance payment for arms purchases, Western Germany would be under no obligation to place any orders, as purchases would be on the usual competitive basis. [The British Press recalled in this connexion that only a few months earlier the West German Defence Ministry had decided not to carry out its earlier intention of buying *Centurion* tanks or SR-177 aircraft from Britain—see page 16020, second column.]

The new German offer was rejected by Britain as completely unsatisfactory, and the dispute was once more referred to the North Atlantic Council. Subsequent lengthy negotiations within the Council, however, resulted in the broad basis of an agreement being reached, the following statement being issued by NATO on April 14:

"In the course of discussions within the special North Atlantic restricted group, a possible basis has now been found on the problem of the cost of stationing British troops in Germany. This will, however, have to be worked out in detail and submitted shortly to the Council of NATO." [The restricted group referred to in the communiqué included M. Spaak, Sir Frank Roberts (Britain), Herr

Blankenhorn (Western Germany), and Mr. Burgess (U.S.A.)] It was reported in the Press that agreement had been hastened by Dr. Adenauer's anxiety to have the question settled before his official visit to London [see 16242 A].

The terms of the final agreement (which was subsequently approved by the NATO Council) were given in broad outline on April 23, full details being announced in London, Bonn, and Paris on May 29. The arrangements, covering the next three years (April 1, 1958 to March 31, 1961), were as follows :

(1) The British Government would maintain " a substantial force on the Continent until 1960-61 within the limits of what can be afforded in relation to the balance of payments." They had " declared to NATO their intention to maintain the British Army in Germany at the strength of 55,000 until the end of 1958." After that time they intended to maintain a minimum of 45,000 men and the Second Tactical Air Force at its present strength until April 1961.

(2) Western Germany would pay during the next three years, under Article III of the North Atlantic Treaty, £12,000,000 annually towards the cost of maintaining the British troops on Federal territory.

(3) The German Federal Government would also make a new interest-free deposit in London of £50,000,000 against payments for arms orders placed in Britain.

(4) In addition, the Federal Government would make an advance repayment of £22,500,000 (representing the three instalments due between 1962 and 1964) on its post-war debt to Britain. This repayment would be made out of the £75,000,000 deposited by the *Bank Deutscher Länder* with the Bank of England in 1957 to meet the annual instalments of £7,500,000 on the German debt to Britain for post-war economic assistance [see page 15726].

It was stated (*a*) that this advance repayment would require certain waivers by the U.S.A., France and Denmark, which were parties to the London debt agreements of 1953, and that the Federal Government were " initiating the necessary action to obtain these waivers " ; (*b*) that negotiations would also take place for the reduction of the interest rates (undisclosed) at present payable on the balance of the deposit.

(5) Discussions would be held in NATO to see if " further financial arrangements " could be made which would enable the British Army in Germany to be maintained at the strength of 55,000 throughout 1959, though the British Government " do not themselves feel able to make any additional financial contribution " towards this end.

The agreement was regarded in London as a satisfactory compromise. The Foreign Office said on May 29 that the British Government was " sure that its Allies recognize the importance of the contribution which H.M. Government are making in the arrangement which has been reached. One of the major advantages is that it should provide stability over a period of at least three years, removing the necessity for annual discussions and the uncertainties which they create within the Alliance."

It was pointed out in *The Times* that, with the foreign exchange costs of BAOR in 1958-59 equivalent to £47,000,000, the German contribution of £12,000,000 would leave £35,000,000 to be provided by Britain. In 1957-58 Western Germany contributed about £50,000,000 towards the estimated foreign exchange requirements of £54,000,000. In 1959-61, owing to the reduction in the British forces stationed in Germany, the annual cost was estimated at the equivalent of £37,000,000, of which Germany would refund £12,000,000.

These figures, however, made no provision for that part of the men's pay given in marks, amounting to approximately the equivalent of £9,000,000 annually. The total strain on British foreign exchange reserves attributable to the stationing of troops in Western Germany was therefore estimated as follows :

	Marks cost of BAOR	Marks paid to the men	German contribution	Balance to be met by Britain
1957-58	£54,000,000	£9,000,000	£50,000,000	£13,000,000
1958-59	£47,000,000	£9,000,000	£12,000,000	£44,000,000
1959-60	£37,000,000	£9,000,000	£12,000,000	£34,000,000
1960-61	£37,000,000	£9,000,000	£12,000,000	£34,000,000

Mr. Maudling (the Paymaster-General) stated in the House of Commons on Feb. 21 that loans to Western Germany in kind in the early post-war years were valued at £201,800,000. It had been agreed in 1953 that the Federal Republic should pay £150,000,000 over 20 years in full settlement [see 13156 B ; 12920 A ; 11904 C] ; £37,500,000 had so far been repaid, leaving a balance outstanding of £112,500,000, not taking into account the deposit of £75,000,000 made with the Bank of England in 1957 out of which future repayments could be made [see above].

Other Allied Support Cost Claims.

It was announced in Bonn on Dec. 5, 1957, that the U.S. Government had asked Western Germany for a further payment of 325,000,000 DM. (about $77,000,000, or £27,000,000) towards the upkeep of U.S. forces stationed in Federal territory. When accepting the German offer to pay 325,000,000 DM. to the United States for the 1957-58 financial year, the U.S. Government had reserved the right to ask for further support costs [see page 15726, second column]. On May 30, 1958, however, it was announced in Bonn that the American demand had been rejected by the Federal Government, which had nevertheless offered to accelerate repayment of the Federal Republic's post-war debts to the United States.

A spokesman of the French Embassy in Bonn stated on March 7 that France had requested a German contribution of 225,000,000 DM. (nearly 22,500,000,000 francs) towards the cost of maintaining French forces in Western Germany in 1958-59 i.e., the same amount which Germany had agreed to pay for 1957-58.

It was also reported on March 11 that the Belgian Government had put forward a claim for a German contribution of 15,000,000 DM. as support costs for the Belgian forces in Western Germany.

W.E.U. Council Meeting. - Agreements on Joint Arms Production within Western European Union.

The Council of the Western European Union met in Rome on March 5-6 under the chairmanship of Signor Pella. Belgium was represented by M. Larock, France by M. Maurice Faure (then State Secretary for Foreign Affairs), Western Germany by Dr. von Brentano, Luxemburg by M. Bech, the Netherlands by Dr. Luns, and the United Kingdom by Mr. Selwyn Lloyd.

A communiqué said that the Council had " reviewed progress in the field of joint research, development, and production of armaments." It continued : " They considered in particular the problems involved in harmonizing the activities of member-States in bilateral and trilateral groups with their activities in the Standing Armaments Committee of W.E.U. and in NATO. Having regard to the pragmatic approach hitherto adopted in this complex field of co-operation, they made arrangements for informing each other and NATO of the workings of the restricted groups."

The communiqué also announced that after examining " certain aspects of the control of atomic weapons foreseen in the Paris Agreements," the Council had approved " in principle " the establishment of contacts between the Armaments Control Agency of W.E.U. and the Commission of the European Atomic Energy Community, " with a view to a clear delimitation of the spheres of activity of the two organizations in the control of the use of nuclear substances and the avoidance of overlapping in this field." It was also stated that the Council had considered recent developments in East-West relations.

On March 6 the Council held a joint meeting with the W.E.U. Assembly's Committee on Defence Questions and Armaments ; it was subsequently stated by Signor Lucifero (the Italian president of the Committee) that points of disagreement previously existing had been settled, and that it had been agreed to establish closer collaboration between the Council and the Committee.

The Permanent Council of W.E.U. met on April 23 and approved in principle a German request for permission to manufacture short-range anti-tank guided missiles.

Under the Paris Agreements German manufacture of certain weapons was restricted or forbidden, but short-range anti-aircraft missiles (with a range of about 20 miles) were permitted. The anti-tank missiles which were the subject of the German request will have a range of about two miles and will carry only conventional warheads.

The Defence and Armaments Committee of the W.E.U. Assembly met in Paris on April 14 [i.e. the day before the opening of the meeting of NATO Defence Ministers] to consider a report by Mr. Goedhardt (Netherlands) on the military consequences of the " Rapacki plan " and other proposals for disengagement in Central Europe.

The report expressed the view that all formulas for a military " disengagement " in Europe would involve the risk of a weakening of Western security, and that a withdrawal of NATO forces from Western Germany and of Soviet troops from Central Europe would constitute a mortal danger to the West unless it were accompanied (*a*) by a Soviet political withdrawal (*repli politique*) from the East European satellite countries, and (*b*) by a general disarmament agreement with a rigorous control and inspection system.

The Committee approved the report and agreed that the Rapacki plan would deprive NATO of an effective " shield " ; would result in the withdrawal of nearly all the Anglo-American forces from Western Germany ; and would deprive the West of sufficient room for the deployment of its forces.

Franco-German Agreement on Ballistic Research Centre.

A convention making the French Military Research Institute at Saint-Louis (Upper Alsace) a joint Franco-German undertaking was signed on March 31 by the two Defence Ministers, M. Chaban-Delmas and Herr Strauss.

The Institute at Saint Louis, which lies near the French frontiers with Germany and Switzerland, was founded in 1945. In addition to French technicians, it employs a large number of German scientists who formerly worked at the Ballistic Institute of the *Luftwaffe* in Berlin. The Saint-Louis Institute, which works under the direction of Professor Schardin (Germany) and Colonel Castagnou (France), carries out fundamental research in armaments for the French armed forces, notably in the fields of ballistics, aerodynamics, electronics, and physical and chemical problems related to explosives.

An annexe to the convention laid down that the administrative council of the Institute would in future comprise three French and three German directors designated by their Governments, and that the chairmanship would alternate between a Frenchman and a German, thus giving both countries equal rights.

Franco-German-Italian Armaments Production Arrangements. - Mr. Sandys's Talks in Rome, Bonn, and Paris.

The Defence Ministers of France, Western Germany, and Italy met in Rome on April 8 to discuss questions connected with the standardization and pooling of their armaments productions under the tripartite agreement of Jan. 21, 1958 [see 16006 A]. This was their third meeting since the conclusion of the agreement.

Mr. Duncan Sandys visited Rome on March 18-19 and Bonn on March 24-25 for discussions with Signor Taviani and Herr Strauss respectively on the broadening of the basis of co-operation between all members of W.E.U. on research, development, and production of weapons and military equipment.

It was announced after these meetings that the Ministers concerned had reached an understanding on the principles of an agreement on such wider co-operation, and that an Anglo-Italian group of experts would be appointed to prepare further details.

As stated above, Mr. Sandys also had discussions on this matter with M. Chaban-Delmas prior to the meeting of the NATO Defence Ministers in Paris, which approved the broad outlines of Mr. Sandys's plan.

Other NATO Developments.

The following further developments within NATO in recent months are summarized below.

First Session of Science Committee.

The NATO Science Committee, which was created after the meeting of the Heads of Governments last December, held its first session in Paris from March 26-28 under the chairmanship of Dr. Ramsey (U.S.A.), the scientific adviser to the Secretary-General [see 16006 A].

The other members of the Committee are M. Paul Bourgeois (Belgium), Dr. E. W. R. Steacie (Canada), Professor Poul Brandt Rehberg (Denmark), M. A. L. Danjon (France), Professor Rucker (Germany), Dr. Alexopoulos (Greece), Professor F. Giordani (Italy), Professor Sizoo (Netherlands), Professor Rosseland (Norway), Professor Rui Ferro Mayer (Portugal), Dr. Cavit Erginsoy (Turkey), Sir Solly Zuckerman (U.K.) and Dr. Isidor Rabi (U.S.A.).

A communiqué issued on March 28 said that the Council had explored "ways and means of achieving the full development of science and technology by the Atlantic Community"; that among the topics discussed had been "ways and means for increasing the national support of research in member-countries to meet the demands of the times"; that an "interesting French proposal for scientific co-operation" had also been examined; and that a working group had been appointed to study in detail proposals for an increased number of fellowships, summer institutes, and other aids to scientific education, which had been agreed upon in principle by the Committee. [According to the French Press, the French plan envisaged the setting-up of an international "Foundation" to intensify exchanges of information and facilitate talks between research scientists in different countries, as well as to aid the material implementation of a certain number of research projects.]

It was also stated in the communiqué that "broad powers" had been vested in the chairman to arrange studies for the purpose of furthering research in all fields of natural science of interest to member-countries, and that—except in the field of defence—the results of NATO-sponsored research and the facilities provided by NATO would not be confined to NATO countries but would be extended "as a cultural bond" to peoples in other countries. Another working group had been appointed to make recommendations on methods of improving the dissemination and exchange of results of scientific research.

NATO Maintenance Supply Services System.

Following a proposal previously made by the U.S. delegate, the North Atlantic Council decided on April 9 to set up a NATO Maintenance Supply Services System.

The new organization, which will deal with the problem of the regional supply of spare parts in Europe, will consist of a Board of Directors (comprising one representative of each country desiring to participate in the system) and an Agency for executive purposes. The Agency will be principally responsible (i) for analysing the needs of the various countries for spare parts, and their resources; (ii) for studying and adopting measures for the joint repair, maintenance, and renovation of equipment; (iii) for organizing common procurement of spare parts with a view to economy and an equitable distribution of production among the countries concerned, (iv) for exchanging information with a view to facilitating the solution of technical problems and the functioning of national logistical systems.

Further German Divisions transferred to NATO Command.

It was announced on April 2 that the 2nd West German Army Corps had been officially placed under NATO command, bringing the total of West German divisions under NATO to seven.

Reduction of British Base in Belgium.
